All vessels proceeding from South East Asian ports or Suez via the Torres Strait to ports in the South West Pacific must either transit the Inner Route (inside the Great Barrier Reef) or alternatively via the Great North East Channel (GNEC).

We are pleased to announce the establishment of a new service with a Pilot Boarding Ground (PBG) North of Stephens Island close to the North Eastern boundary of the IMO and Australian Government recommended pilotage area at Bramble Cay.

The new PBG is on:

Stephens Island PBG   Lat. 9° 22′ S., Long. 143° 39′ E.

Previously pilotage has only been available from near Dalrymple Island, which is more than 20 miles to the South West and within the recommended pilotage area. The new PBG is well clear of all charted obstructions with extensive sea room for pilot transfers. It is positioned on the boundary of the Australian Economic Exclusion Zone.

The location of the new PBG will ensure that vessels will be able to complete the full transit of Torres Strait and GNEC under the advice of an AMSA licensed pilot. Vessels entering the GNEC Westbound from Bligh Entrance will be able to avoid significant course alterations prior to pilot boarding.

Our pilotage services to and from Port Moresby and the Umuda/Ok Tedi storage vessel will continue to be available.

Signed: Operations Manager.

SHIPMASTER'S REPORT: August 1992.

Vessel on passage from Whangarei to Singapore.

Quote:

Pilots advise change in boarding area to Dalrymple Island. No longer necessary to call off Port Moresby. This cuts pilot on board distance by about 180 miles.

Unquote.

Editor's Note:

Vessels transiting the Great North East Channel are advised that IMO Resolution A711(17) (Use of Pilotage Services in the Torres Strait and the Great North East Channel) designates the extremity of the recommended area as Bramble Cay (9° 09′ S., 143° 53′ E.), which is 40 miles beyond the present Pilotage Boarding Ground off Dalrymple Island.

SHIPMASTER'S REPORT: December 1993 (Updated 1996).

Torres Strait Pilot Associations:

On this occasion (loaded passage from Kumul to Dalian), we were instructed to sail via Torres Strait.

Torres Pilot of the Queensland Coastal Pilot Service boarded at Kumul during final stage of loading on December 2nd and left vessel off Booby Island on December 3rd at 1506 hrs.

Nomination: On this occasion I selected "Torres Strait Brisbane", merely guided by the "Guide". The given information herein was in line with my experience earlier this year (April), when we also passed through Torres Strait.

We sent our initial telex to "Torres Brisbane", copied to the old telex number of Thursday Island Pilots, unaware of the present situation of two competitive Pilot Associations covering the same area. However, within one hour I knew there were now two Associations.

I then nominated Coastal Pilots as their pilot could join the vessel at Kumul. Two reasons for that decision, the weather was not very favourable in the area, and having a pilot already on board saves up to one hour, as you can now pass Dalrymple Island at full speed, no slacking down, etc.

Performance: In my opinion, both Pilot Associations will perform equally. They are the same pilots as in earlier days, only they split themselves on July 1st 1993.

Coastal Pilots kept the Brisbane Office with the telex number, and have kept their relations with agencies.

Reef Pilots kept the launches in Torres Strait and the old telex numbers, but severed connections with agencies.

Passages: For most passages through Torres Strait, Barrier Reef and Great North East Channel, both Associations can be used.

Exception: When using Great North East Channel and Torres Strait coming from the East, Coastal Pilots do not (yet) have launch facilities at Dalrymple Island, and pilots have to board off Port Moresby (See Notice dated 1st February 1996 which supersedes these remarks).

When coming from New Zealand, there is no deviation, only that the pilot is on board for an extra 180 miles. However, coming from the South (Australia/Tasmania), ships have to deviate.

In this case, ships normally will use "Reef Pilots", as they have the launch facilities at Dalrymple Island.

The same applies for the other way, when "Reef Pilots" can leave at Stephens Island, while "Coastal Pilots" have to disembark off Port Moresby.

According to our pilot, there are plans (maybe vague ones), that in near future "Coastal Pilots" will also have launch facilities off Stephens Island.

Up to now, Masters are not coerced into traversing the Great N.E. Channel without a pilot as "Reef Pilots" are available.

Also see "Shipmaster's Report" in section above.

AUTHORITY: Queensland Coastal Pilot Service Pty. Ltd., Brisbane Operations Office, 13th Floor, Dalgety House, 145 Eagle Street, Brisbane, Australia. (Postal address: GPO Box 209, Brisbane, Qld 4001, Australia). *Tel:* 61-7-38395144. *Telex:* AA140222. *Cables:* 4BTORRES. *FAX:* 61-7-38395242. *After Hours Contact:* Perry Sutton, Tel: 61-7-33991478. Iain Steverson, Tel: 61-7-32632642.

TOWNSVILLE, Queensland: 19.15 S. 146.50 E.

(See Plan)

PORT LIMITS: *Jurisdiction:* The Townsville Port Authority exercises jurisdiction over the Port of Townsville.

Commencing at the HW mark at the most Northern extremity of Cape Cleveland, thence by a line to a point Lat. 19° 05′ 30″ S., Long. 146° 52′ E., thence by a line due Westward to 146° 45′ E., thence by a line due South to HW mark at a point on the mainland, thence by HW mark to the point of commencement and including all navigable rivers communicating with that area and the banks and shores and foreshores thereof.

The Harbour Master, representing the Department of Harbours and Marine, controls the movement of vessels within the port area whilst the allocation of berths and moorings is controlled by the Port Authority.

APPROACHES: The approach to Cleveland Bay from the Southward is clear of dangers, with the exception of Salamander Reef, the Four-foot Rock, and the Twenty-foot Rock, all these lying within a radius of 3 miles of Cape Cleveland Lighthouse.

To clear these dangers, passing North of them bring Mount Marlow in transit with the extremity of Hawkings Point, bearing 265° (258° Mag.) before approaching within 5 miles of Cape Cleveland, which will then bear 252° (245° Mag.). Proceeding into Cleveland Bay a depth of not less than 8.2 m. will be obtained by keeping North of the line Mount Marlow in line with Hawkings Point.

Approaching Cleveland Bay from the Northward, passing East of Magnetic Island a vessel should keep at least half a mile off Magnetic Island shore to obtain not less than 11 m. of water at LWOST. The shore is steep to except for Orchard Rocks off the N.E. extremity of the island.

There is good holding ground everywhere in Cleveland Bay and vessels awaiting Pilot should anchor according to draft and as close to the Fairway Beacons as possible.

ENTRANCE CHANNELS: Depth in the 92 m. wide entrance channels, which are marked by pairs of lighted beacons, is 11.7 m. at LAT (subject to change).

The Sea Channel is 1.75 miles in length and Platypus Channel 3.5 miles; the channels alter in direction at Beacons No. 6 and No. 7. For detailed information see Queensland Sailing Directions.

DOCUMENTS: *Customs:*

3 Crew Lists – Form M & S–11.
3 Passenger Lists, if applicable.
3 Lists of Ports of Call.
1 Form 42A – Ship's Stores.
1 Form 5 – Articles Owned by or in the possession of Master, Officers and Crew.
1 Form QA4 – Quarantine Notice.
2 Forms QA5 – Quarantine Shipmaster's Bond.
2 Inward Manifests.
1 Bill of Lading.
1 Form 40 – Application for Clearance and Guarantee to Pay Duty.

PILOTAGE: Pilotage is available 24 hours a day, 7 days a week, subject to notice.

Unless a Master is the holder of a Current Certificate of Exemption, pilotage is compulsory and vessels requiring the service should cable draft and probable time of arrival to their Agent, or to the Regional Harbour Master, Townsville, from their last port of departure, or advise by radio at least 24 hours before arrival (Telex: Hartow 47124; Fax: (077) 212028).

The pilot vessel is equipped with VHF Radio, having international frequencies 16 and 67 and all working frequencies.

Vessels will be advised by VHF radio which boarding ground is to be used. Generally, vessels with drafts greater than 8.0 m. will only use Pilot Boarding Ground Alpha (A).

Coastal and Reef Pilotage: Pilotage through the Inner Route of the Great Barrier Reef to Torres Strait, and also Palm Passage, is conducted by licensed pilots available from Australian Reef Pilots Ltd. and Queensland Coastal Pilot Service Pty. Ltd. See "Torres Strait" for details.

Masters are advised that pilotage in the Inner Route and at Hydrographers Passage is compulsory. Pilotage in the Great North East Channel is recommended by IMO. See "Torres Strait".

ANCHORAGES: Boundaries: Orchard Rocks/Cape Cleveland. Cleveland Bay Depths 8.2 m. to 12.2 m.

RESTRICTIONS: *Under-Keel Clearance:*

Dead Weight Tonnage	*Under-Keel Clearance* *Sea & Platypus Channel*	*Channel Inner Harbour*
Up to 40,000 tonnes	0.90 m.	0.60 m.
40,000 – 50,000 tonnes	1.10 m.	0.90 m.
Over 50,000 tonnes	1.30 m.	0.90 m.

Vessels alongside every berth in the port are required to remain afloat at all time with a minimum clearance of 0.30 m.

For vessels arriving in the ballast condition, the forward draft must be not less than 2% of the vessel's overall length and the after draft propeller fully immersed.

Harbour Depths at L.A.T.:

Sea Channel	11.7 m.
Platypus Channel	11.7 m.
Deep Draft Swing Basin, to Berths 1, 2 and 3	11.7 m.
*No. 1 (Tanker) Berth	11.5 m.
*No. 2 Berth	12.1 m.
*No. 3 (Portainer Crane only) Berth	12.4 m.
No. 3 (including Ro-Ro) Berth	12.4 m.
*No. 4 (General Cargo and Ro-Ro) Berth	9.9 m.
*No. 7 (Minerals) Berth	10.7 m.
*No. 8 (Freezer) Berth	10.1 m.
*No. 9 (Bulk Sugar Gantry) Shed	12.2 m.
No. 10 (Container/Ro-Ro Berth)	9.5 m.
Between Nos. 4 and 6 (77 m.)	10.4 m.
Between Nos. 7 and 8 (84 m.)	11.3 m.
Between Nos. 9 and 10 (142 m.)	11.9 m.

* Depths at 4.5 m. off fender piles.

HEALTH: *Pratique:* Townsville is a First Port of Entry and notification of quarantine inspection. Requirements should be made not more than 24 hours nor less than 12 hours in advance. Inspections may be carried out at all hours at the wharf or at the quarantine anchorage, at the discretion of the Quarantine Officer. Rat guards are to be maintained on all mooring lines while vessels are berthed in the Townsville Harbour.

MAX. SIZE:

Berth No.	*Length*	*Max. Length of Vessel*	*Wharf Deck at L.A.T.*
1	270 m.	238 m.	5.46 m.
2	254 m.	238 m.	6.07 m.
3	254 m.	238 m.	6.07 m.
3	Ro/Ro pad	—	5.09 m.
4	228 m.	200 m.	5.46 m.
4	Ro/Ro pad	—	5.09 m.
6	122 m.	160 m.	5.37 m.
7	183 m.	180 m.	5.37 m.
8	213 m.	205 m.	5.77 m.
9	228 m.	238 m.	5.77 m.
10	160 m.	152 m.	5.27 m.

The maximum length of a vessel entering No. 4 Berth is 220 m., but only on condition that any vessel berthed at No. 3 Berth is *not* closer inshore than the 360 metre mark (See "Appendix").

When tankers of over 213 m. in length are being berthed at No. 1 Berth, no vessel at No. 2 Berth is to be seaward of the 660 metre mark. When vessels of over 180 m. length are being berthed at No. 2 Berth, tankers or other vessels of over 180 m. berthed at No. 1 Berth may be shifted to allow berthing space at the seaward end of No. 2 Berth.

Decking of all wharves is between 4.81 m. and 5.79 m. above datum.

Largest Single Cargo: Inward 63,870 tonnes of bulk ore. Outward, 43,772 tonnes of raw sugar.

Deepest draft vessel, 12.50 m. Longest vessel, 262.08 m. Largest vessel (Tanker) 85,180 d.w.t.

Appendix: Conditions of Vessels Berthing No. 4 Berth: The following conditions will apply to the arrival and departure of vessels at No. 4 Berth.

Arrival:

Length of vessel to No. 4 Berth	*Vessel at No. 3 Berth (not closer inshore than)*
200 m.	350 metre mark
190 m.	340
180 m.	330
170 m.	320
160 m.	310
150 m.	300
140 m.	290
130 m.	280

Departure:

Length of Vessel to No. 4 Berth	*Vessel at No. 3 Berth (not closer inshore than)*
200 m.	310 metre mark
190 m.	300
180 m.	290
170 m.	280

All vessels at No. 6 Berth to be inshore of the 50 metre mark with beam not greater than 12 m. during arrival and departure of vessels at No. 4 Berth.

Dependant on weather, type and characteristic of vessel using Berth No. 4, the above conditions are subject to alteration, which will be determined by the Regional Harbour Master or his delegate.

RADIO/VHF: Townsville Radio. The Port Radio Station "Townsville Harbour" keeps continuous watch on VHF Channel 16. Working Channels 6 and 12.

TUGS: Under licence from the Authority, North Queensland Marine Towage Pty. Ltd., operates 2 tugs, one with 32 tonnes and one with 42.5 tonnes bollard pull, which are available to shipping at all hours. Additional tugs, if required, may be brought from neighbouring ports. Tugs are equipped with VHF and SSB radios.

The necessity to use tugs is at the sole discretion of the Regional Harbour Master, and depends upon the vessel size, draft and the berth being occupied.

BERTHING: Cargo Handling:

No. 1 Berth (isolated) is used exclusively by tankers for bulk oil discharge and by all types of vessels for bunkering.

No. 2 Berth (Eastern Breakwater) is a general purpose wharf and is designated "Special Berth" for certain cargoes.

No. 3 Berth (Eastern Breakwater) is equipped with a container crane which is leased to Townsville Transport & Services Pty. Ltd. and is operated and controlled by Northern Shipping & Stevedoring Pty. Ltd. Both of these companies are part of the M.I.M. Holdings Group. The crane has lifting capacity of 55.9 tonnes and its equipment includes an extendable spreader to suit all sizes of containers, grabs of 7.6 cu.m., 13.0 cu.m. and 17.5 cu.m. capacity and a heavy lift hook. Maximum height of lift above wharf deck is 27 m. whilst the outreach over rail and road services is 23.77 m. Distance between bogies is 32.61 m. The crane traverses the full length of Berth No. 3 and Berth No. 2. A landing pad at the berth allows simultaneous use of the container crane and stern angle ramp for Ro/Ro traffic.

The berth is also equipped with 25.4 tonne, 32 m. radius travelling jib crane for container and unit load handling.

No. 4 Berth (Eastern Breakwater) has a landing pad, supported by steel piling, to service stern angle ramp Ro/Ro vessels. The molasses pipeline to this berth is capable of loading up to 400 tonnes p.h. Bulk cement imports of up to 300,000 tonnes per annum are also handled at this berth.

No. 6 Berth (No. 1 Pier E.) is a general purpose berth with oil bunker pipeline facilities.

No. 7 Berth (No. 1 Pier W.) supports a bulk shiploader through which passes mineral concentrates, phosphate rock and ores up to 102 mm. aggregate at the rate of 1,500 tonnes/hr. The berth is also equipped with bulk molasses loading pipeline facilities.

No. 8 Berth (No. 2 Pier E.) services the export frozen beef trade with cargoes drawn from freezer stores adjacent to the harbour. It also serves as a general purpose berth, and is equipped with a 25 tonne (30 m. outreach) crane. The berth is also equipped with bulk molasses loading pipeline facilities.

No. 9 Berth (No. 2 Pier W.) is the raw sugar loading berth. A bulk shiploader delivers sugar to carriers at the rate of 2,000 t.p.h. The berth is also equipped with bulk molasses loading pipeline facilities.

No. 10 Berth (Ro/Ro Berth) is equipped with a stern ramp for Ro/Ro traffic and a 30 tonne crane.

Wharf Sheds: No sheds are available for general cargo storage at the Port. Both free and bonded warehousing is available within 4 km. of the wharves.

Storage Facilities: Oils – All major Oil Companies operate ocean terminals close to the Port.

Raw Sugar – 2 storage sheds of 285,000 tonnes total capacity.

Molasses – 3 bulk storage tanks of 35,000 tonnes total capacity.

Concentrates – 115,000 tonnes covered storage area.

Frozen Meat – 5,000 tonne capacity cold store is available adjacent to the port.

Cement – 30,000 tonne bulk cement silo.

Open space storage for Rock Phosphate, Sulphur, Crude Lead and Refined Copper.

Container Terminals: No. 2 Berth with an area of 0.8 hectares for storage of 300 dry containers.

No. 3 Berth, with an area of 1.2 hectares, has storage accommodation for 184 dry containers.

No. 8 Berth, with an area of 0.4 hectares for storage of 200 dry containers and 10 reefer containers.

No. 10 Berth, with an area of 2.6 hectares, can accommodate 400 containers, 18 of which may be connected to refrigeration power outlets.

Northern Shipping and Stevedoring Terminal with an area of 1.6 hectares has a holding capacity of 160 refrigerated containers and 400 dry containers.

Container Terminals work 24 hours per day, seven days per week to effect speedy turn around of shipping.

STEVEDORES: *Port Labour:* 3 stevedoring companies engage their own labour under enterprise agreements.

Working Hours: Working hours can be arranged with the individual stevedores up to continuous 24 hours/day, 7 days a week.

MEDICAL: Advance notice not particularly required unless urgent assistance required. Hospital facilities available. Health book inspected by boarding doctor.

TANKERS: Diameter of load/discharge lines: white fuel 10 in., black fuel 12 in. No residue discharge facility available. One tanker at berth at any time. Max. permitted draft at berth 31 ft.

Also see "Shipmaster's Report".

DENSITY: Average density 1025 at all times.

FRESH WATER: Fresh water is available at all berths.

FUEL: Bunker fuel oil and distillate are available through pipelines at Berths No. 1, 6, 7 and 9. Road tankers are used to bunker small ships at other berths.

FIRE PRECAUTIONS: *Fire Fighting Equipment:* Throughout the Port there are 19 hydrants in conspicuous red boxes which are connected to flaked hoses with spray nozzles. The opening of a hydrant automatically brings an electric pump into operation.

The various oil terminals at Townsville have a stock of over 10,000 litres of foam additive.

Fire fighting monitors are also provided at No. 1 Tanker Berth, with foam making capability.

Tankers required to have safety fire wires lead off fo'c's'le head and run as far aft as possible. Vessels are at all times to be capable of manoeuvring with main engines.

DRY DOCK: *Ship Repair:* A slipway situated on the Eastern side of Ross Creek is capable of accommodating vessels up to 67 m. in length and 800 tonnes deadweight. A modern ship repair workshop is attached which has a lathe for shafts up to 7.2 m. in length.

GANGWAY/DECK WATCHMEN: This service is arranged through the ship's Agent.

OPENING/CLOSING HATCHES: Optional for either crew or stevedores.

CERTIFICATES:

Passenger Ship Safety.	Ship Safety Equipment.
International Load Line.	Ship Safety Radiotelegraphy.
Ship Safety Construction.	

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 250 grams tobacco on arrival and then can be purchased by the packet from bar on board. Wine and/or spirits: 1 opened bottle (26 oz.) spirits or wine on arrival and then spirits by the glass and wine by the bottle, from the bar on board.

CARGO GEAR: Australian Navigation Department requirements.

REPATRIATION: Full facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Townsville Airport is located 6.5 km. from the city, and two major airlines each operate four services daily to Brisbane with connecting flights to other State capitals.

TIME: See "General" before first port.

HOLIDAYS: Cargo can be worked on all holidays except Christmas Day, Good Friday, Anzac Day (25th April), Labour Day and the Waterside Workers' Picnic Day (First Tuesday in November).

EMERGENCY TELEPHONE NUMBERS: Police, Ambulance or Fire "000", and ask to be connected to service required. Non-emergency numbers. Police 72 3000, Ambulance 79 3722, Fire Station 71 2111, Hospital 81 9211.

TELEPHONE: Mobile telephones supplied by Townsville Port Authority are required to be placed on all vessels while in port. Oil tankers berthed in the port are required to have on board a flash proof telephone of a type approved by Telecom Australia.

Some mobile telephones have operator access.

SERVICES: Services available for compass adjusting, radio and radar service. A floating boom and an oil skimming device is available to deal with oil spills. Chemical dispersants are used for minor spills.

SHORE LEAVE: Crew members allowed shore leave.

GARBAGE DISPOSAL: A garbage collection vehicle will call at each ship which has ordered the service before 0800 hrs. each day or at other times as directed by the Quarantine Officer.

All garbage must be kept in sealed plastic bags on board the vessel until the arrival of the collection vehicle. The ship's crew is required to deliver garbage to the collection vehicle. Bags will be supplied to the vessel on arrival. Charges: A$52.00 per day plus A$3.50 per crew member per day.

WASTE OIL DISPOSAL: Townsville Trade Waste, Tel: (077) 745555. Fax: (077) 746255. Two vacuum tankers, each with 7,000 litres capacity. Rate of A$101.00 per hour each. Available to attend all berths.

SEAMAN'S CLUBS: The Missions to Seamen, No. 9 Berth. Tel: (077) 722774 and 715599. Shop, international telephone service, church services arranged, 8 and 22 seater buses, postage facilities, licence to sell beer and spirits, library, currency exchange.

CURRENCY: Australian Dollar.

SECURITY: Townsville Port Authority operates a 24 hour Port Protection Unit to maintain current Australian and IMO security requirements. The port area is also under 24 hour electronic surveillance.

SHIPMASTER'S REPORT: August 1995.
Charts: AUS. No. 256 and 257.
Approach: Magnetic Island provides a good landmark.

Beaconed channel can be visually confusing in daylight. Radar provides the best indication of channel alignment.

North Cardinal Beacon (Lat. 19° 07.7′ S., Long. 146° 51′ E) (conspicuous) which should be left to port on approach, marks S.E. line of deep water.

Anchorage: Generally exposed. Pilots advise large vessels to anchor North of Magnetic Island (Lat. 19° 05′ S., Long. 146° 51′E.). For coasters, anchorage is in Horseshoe Bay (Lat. 19° 06.3′ S., Long. 146° 51′ E.).

This vessel found a position East of Magnetic Island (Lat. 19° 09′ S., Long. 147° 00′ E.) to be satisfactory.

Pilots: VHF range is poor, masked by Mt.Cleveland to South and Magnetic Island to the North. Pilot on VHF Channels 16/12 throughout 24 hours. Contact Pilot 1 hour prior to arrival.

Pilotage available 24 hours but dependent on draft/tide.

Entry possible in winds up to 30 knots and departure in winds of 20 knots – 25 knots maximum. Pilots board as per AUS. No. 256. Alpha and Bravo grounds dependent on draft.

Pilots use fast white cutter, but are generally not on time.

Vessel has to wait off North Cardinal Beacon. Beware of set onto Magnetic Island.

Channel: Depth 11.7 m. datum.

Maximum size of vessel for port is 13.0 m. draft (dependent on tide), and 250 m. LOA.

The leading lights not constantly lit. They can be activated by telephoning No. 726861. Lights stay on for 45 minutes.

Strong cross currents at certain times of year running from S.E.

Large vessels entering/leaving through the narrow breakwater entrance require plenty of power.

Tugs: 2 tugs of 20 tons and 40 tons bollard pull. The small tug is barely adequate for the port.

Tugs' lines used. Tugs meet vessel just outside breakwater.

Berth: The multi-user tanker/liquids berth on Eastern Breakwater handles all products and LPG. The berth is of modern concrete construction (tanker type 'T' jetty) and has good fenders. Length of fender landing is 95 m. There are 2 mooring dolphins either side of central section.

The berth is dredged to 12.5 m. datum.

Normal maximum length handled is 230 m. LOA.

Berthing is nearly always starboard side alongside.

No shore gangway available, so we used 'brow' from amidships.

No Chicksans, only flexible hoses available.

Fresh water is available through meter. Tie up was 3-1-2 each end. There is one lineboat available.

Terminal: LPG receiver was 'Boral'. They have storage facility 1,200 m. away (5×500 cu.m. pressure bullet tanks). They are able to handle minimum −25°C (First 250 tonnes and last 100 tonnes to be at a minimum of +2°C), ideally at ambient.

We discharged Propane at 200 t.p.h. at 10 bar BP (Temperature +6°C). The line to terminal 10 in. and hose is 6 in. ASA 300. Positioning is critical as hose only just reaches ship's manifold, due to jetty fendering recently being extended outwards.

Customs: If First Port of Entry, inward papers to be submitted via Agent by Fax at least 7 days beforehand. Failure to do this might delay vessel. The following are required on Australian Forms:

Crew Report List (Alphabetical order), Ship's Inward Cargo Report, Quarantine Declaration, Report of Ship's Stores, Ports of Call List, Ship's Report of Arrival.

Plus on arrival, Crew Effects Declaration (Alphabetical order).

Customs are generally fair and reasonable.

If sailing coastwise, Customs then issue 'Rider Envelope' with all relevant documents plus Clearance to next port.

Customs also act for Immigration and sign crew on and off.

Telephone: Portable Cellphone provided by Harbour Authority for safety, it can also be used for Australian internal calls.

There is a payphone at base of jetty in Watchman's Cabin.

Card phones by Control Tower about 10 minutes walk.

Airport: Frequent internal flights to Brisbane from Garbutt Airport, about 4 miles from port.

Chandlers: Several boarded. We used Nautilus. Tel: 077755766. Fax: 077755966.

Seaman's Club: Small Missions to Seamen open in evening at base of Control Tower.

Construction: Reclaimed land to East of port being infilled for container and nickel ore storage.

New berth under construction on seaward side of Eastern Breakwater.

Port: The port handles Panamax bulk carriers with nickel ore (import) and sugar and concentrates (export). Petroleum products also handled.

AUTHORITY: Townsville Port Authority, P.O. Box 1031, Townsville, Queensland 4810, Australia. *Tel:* (077) 602111. *FAX:* (077) 602122.
Contact: R.E. Kenny, Chief Executive Office. B.W. Holden, Secretary and Manager Administration.

Captain R.C. Johnson, Regional Harbour Master, Queensland Transport, P.O.Box 1921, Townsville, Queensland 4810, Australia. *Tel:* (077) 715135. *FAX:* (077) 212028.

AGENT: Sub-agent of Patrick Sleigh Shipping Agencies Pty. Ltd., Brisbane.

VARANUS ISLAND TERMINAL: 20.38 S. 115.36 E.

(See Plan)

LOCATION: The onshore terminal is situated on Varanus Island which is the largest of the Lowendal group of islands. The offshore Tanker Terminal is situated 2.0 miles offshore in Lat. 20° 38′ S., Long. 115° 36′ E. (See "Plan"). Masters are referred to the current hydrographic chart Aus. 742 for further information.

NOTE: In May 1992, two additional unmanned offshore platforms, "Campbell" in Lat. 20° 24′ S., Long. 115° 42′ E., and "Sinbad" in Lat. 20° 29′ S., Long. 115° 43′ E., were installed, including high pressure subsea gas pipelines.

APPROACHES: *Water Depth:* Within the 0.5 nautical mile mooring circle there is a least depth of 20.4 m. within the conical approach area (060°/240° and 120°/300° boundaries) depths in excess of 20.4 m. are found. Although attention is brought to the 20.1 m. patch and the 20.2 m. patch as indicated on the hydrographic survey certificate, at this stage it is envisaged that the max. draft of vessels using the port would be 17.0 m.

Departure: After completion of loading, a vessel's departure should be as prompt as practicable. Once clear of the berth and the Pilot has disembarked it is recommended that the Master follows the recommended course laid down on the appropriate hydrographic chart.

PILOTAGE: The Pilot and 2 Operators will board via a launch in position Lat. 20° 38′ S., Long. 115° 42′ E. All vessels should ensure that a good lee is provided and the derrick or deck crane is ready to pick up the terminal equipment container from the launch. Accommodation and meals are to be provided for Pilot, 2 operators, cargo surveyor and Agent's representative if applicable.

Pilot ladders should be rigged in accordance with all relevant S.O.L.A.S. Regulations.

ANCHORAGE: The recommended anchoring position is Lat. 20° 38′ S., Long. 115° 40′ E., but due to the variable holding qualities of the whole area it is recommended that Masters exercise the utmost caution when anchoring and whilst laying at anchor.

RESTRICTIONS: See "Mooring" - Paragraph (d).

MAX. SIZE: The terminal is designed to accommodate vessels from 20,000 d.w. tonnes to 140,000 d.w. tonnes. The largest dimensions being:

(a) Deadweight 140,000 tonnes (approximate).
(b) Length overall (LOA) 300 m.
(c) Beam 46 m.
(d) Draft 17 m.

Vessels exceeding the following dimensions cannot be accommodated at the Loading Terminal unless express permission is granted by Apache Energy Ltd.

RADIO: *ETA and Arrival Messages:* Vessels proceeding to the Varanus Island loading terminal shall notify Apache Energy Ltd. (See "Operator"), their estimated time of arrival, not less than 96 hours before arrival, amending or confirming the ETA at intervals of 48 hours and 24 hours before arrival at the Terminal. Failure to comply with the above procedure may result in the Pilot not being available on the vessel's arrival.

Ballast Water: Quantity, condition and origin of ballast water on board to be advised in the 96 hour message. Facilities are not available for dirty ballast or slops to be pumped ashore.

Declarations Prior to Arrival: The following declarations are to be included and verified in the 24 hour message:

(a) Is the hull leak free?
(b) Is an inert gas system fitted?
(c) If fitted, is the inert gas system fully operational?
(d) Are there any defects to the vessel, machinery and equipment, which may effect safe pilotage, berthing, cargo or ballast operations?
(e) Have stress calculations for the envisaged programme of cargo handling and ballasting been made?
(f) Is the hull stress calculated within recommended safety limits?

VHF: A 12 hour listening watch is maintained on international marine VHF Channel 16 between 0600 hrs. and 1800 hrs. local time. Vessels should tune their VHF sets to Channel 16 when within 100 nautical miles of the Lowendal Islands and as soon as practicable thereafter contact the Island Radio Room and confirm the vessel's ETA at the Pilot Boarding Station.

VHF Marine Channels available:
Marine Channel 16 calling and distress.
Marine Channel 67.
Marine Channel 9 working Channel.
Marine Channel 74 working Channel.

TUGS: Tugs are not available to assist with berthing operation.

TERMINAL FACILITIES:
ONSHORE:
Storage: 3 tanks with storage capacity of 750,000 bbls. (119,250 cu.m.).
Pumps: The 3 cargo pumps are rated at 1,654 cu.m.p.h. each.
Also see "Ballast".
OFFSHORE:
Pipeline: A 4,200 m. long × 762 mm. (30 in.) pipeline leads from the shore to the Tanker Terminal. At the pipeline end manifold (PLEM) there is a valve at the 406 mm. (16 in.) take off prior to connection to the submarine hose.

Hose: The submarine hose is 73.15 m. (240 ft.) long, consisting of 8×9.144 m. (30 ft.) sections, including (from the PLEM) 4×406 mm. (16 in.) hoses, 2×406 mm. (16 in.) buoyancy chamber hoses, 1×406 mm. (16 in.) to 305 mm. (12 in.) reducer and 1×305 mm. (12 in.) rail hose. At the end of the 305 mm. (12. in) hose there is a butterfly valve spool piece and a 12 in. flange fitted with camlocks for connection to the ship's manifold. The weight of hose to be handled by the ship is 4.0 tonnes when full of crude oil.

Moorings: The mooring consists of an 8-leg Multi-Point Mooring (MPM), with 4 buoyed legs and 4 swamped legs.

Although the ship's anchors will be laid out during the berthing, due to the variable seabed holding qualities, swamped moorings will be picked up and tensioned to back up the ship's anchors.

MOORING: Mooring is without tug assistance.

Mooring Equipment: All tankers must have sufficient equipment for mooring at the Terminal:

(a) A minimum of 4 sets of bitts are required on the after deck and a set of bitts on the port and starboard side at the after end of the main deck forward of the bridge front. A set of bitts on the port and starboard side of the main deck forward and a minimum of 2 sets of bitts on the forecastle. All the above mentioned sets of bitts must be able to accept preventer lines or swamp moorings which must be hove tight and made fast.

(b) A minimum of two, two drum tension winches on the aft deck and a minimum of one two drum tension winch on the after end of the main deck with at least 220 m. of good quality mooring line on each winch are required. All terminal mooring preventers and swamp moorings are 280 mm. circumference, and suitable winch drum capacities are required for these winches to heave tight all lines and make fast.

(c) Prior to berthing vessels should have on the after deck and the after end of the main deck, 2 mooring lines securely joined together giving an effective length of approximately 440 m.

(d) Only vessels fitted with adequate bridge wing searchlights will berth at night.

LOADING:

1. Prior to arrival vessels must have the starboard derrick or crane rigged and ready for pick up of the terminal deck box and the submarine hose.

The PLEM is marked by a spar buoy and the end of the submarine hose is marked by a pick-up buoy.

When the vessel is in position and secured to the satisfaction of the Master and Pilot/Loading Master the submarine hose pick-up shall commence. Once pick-up has commenced the propeller must not be turned until the hose is disconnected and laid back onto the seabed unless it is turned by use of the turning gear only.

2. Once the hose is connected and all ship/shore safety check lists have been satisfactorily completed, the butterfly valve and ship's manifold valve will be opened and gravity loading will commence. Once the ship's checks are completed and clearance given, the loading pumps will be started.*

3. During loading at least one ship's tank is to be open to the inflow of oil and the inflow of oil is not to be shut off by closing ship's valves or the hose valve without prior approval of the Pilot/Loading Master. In order to reduce back pressure at the ship's rail, as many tanks as possible should be open during loading. In any event the ship's rail back pressure should not exceed 150 p.s.i.

4. The Pilot/Loading Master is to be informed when 200 tonnes is required to complete loading so that the loading rate can be eased down, and again at 50 tonnes so that the loading pumps may be stopped and the loading completed by gravity. When loading is completed the ship's manifold valve is to be closed slowly. When the manifold valve is closed the butterfly valve will be closed.

5. During loading the tank tops should be kept closed at all times, ullage plugs should be kept closed at all times except when sampling, gauging, thieving or inspecting.

6. Portable UHF radios will be supplied for communication between the tanker and terminal. Hourly checks between tanker and terminal will be required so that undetected radio failure can be minimised.

*During loading operations, a responsible deck officer must be present to supervise the ship's crew and approve the hose connections.

BALLAST:

1. Vessels should arrive at ballasted draft acceptable to the pilot, a cargo free vessel is normally requested to maintain maximum segregated ballast on board, to assist steerage. No tugs are available to assist berthing.

2. *Clean Segregated Ballast:* This ballast water will be discharged consecutively within the loading. The Pilot/Loading Master must be notified prior to any deballasting and at least one quarter of the Summer deadweight must be loaded before deballasting commences.

TIDES: *Tide Times & Height:* The times of high and low water occurring at the moorings approximate to the Barrow Island times as published in the Australian National Tide Times. The heights of tide may be taken as the same as Barrow Island. The above tidal information can only be taken as a guide as times, direction, height, and rate of flow may vary dependent upon weather conditions.

Tidal Flow: The tidal flow at the Tanker Terminal is approximately 173°/353° and may attain a speed of 2 knots at Spring tides.

MEDICAL: No services available.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities available.

CONSULS: None.

SURVEYORS: None locally.

GENERAL: *Agency:* No ship's agency services are provided by Apache Energy Ltd. Tankers arriving from foreign ports must make prior arrangements for quarantine and Customs clearance through their Agents. Dampier Agents and Customs attend on arrival, Customs only on departure.

Services: Laundry and Stores not available locally.

Ship's crews cannot be accommodated ashore on Varanus Island.

OPERATOR: Apache Energy Ltd., P.O. Box 477, West Perth, Western Australia 6872, Australia. *Tel:* 61-9-4227222. *FAX:* 61-9-4227445. *Contact:* N. Jones, Operations Manager.

WALLAROO, S.A.: 33.56 S. 137.37 E. (See Plan)

PORT LIMITS: Chart Aus.777. A line following the coast line at the HW mark between Point Riley and Point Hughes; thence a line drawn 270° from Point Hughes for 1.5 miles and thence a line drawn 360° to meet a line 270° from Point Riley for 1.5 miles.

DOCUMENTS: All documents necessary for first entry vessels are as for other Australian ports (i.e. Customs, Health, etc.).

PILOTAGE: Pilots board approximately 1 mile seaward of Entrance Beacon. Pilotage is compulsory. Vessels awaiting Pilot for extended periods should anchor 1 mile – 2 miles to seaward of Entrance Beacon. Vessels approaching Pilot Station should take care not to approach the Entrance Beacon before Pilot has boarded due to restricted sea room.

ANCHORAGES: Outer Anchorage as above.

RESTRICTIONS: Daylight berthing only. Sailing at any time. Sailing times dependent upon tides. Tides may be greatly effected by prevailing weather conditions. A high pressure system in Bight may cause tides to be depressed below predicted levels and conversely a low pressure system may cause tides to be above predicted heights. Channel depth 8.45 m. (27 ft. 9 in.) LW. There is a minimum depth of 8.40 m. (27 ft. 6 in.) in the swinging basin off the berths.

Underkeel Clearance in Channel:

1. 21.3 m. – 27.4 m. beam, clearance 0.75 m.
2. Over 27.4 m. beam, clearance 0.90 m. or 10% of draft.

HEALTH: Radio Pratique available within 24 hours of arrival providing sufficient information is supplied. Quarantine/Health Officer will board vessel after arrival in order to grant formal Pratique. Vessels arriving directly from other Australian ports have automatic Pratique, but Health Officer will attend the vessel on arrival.

RADIO: ETA messages for Agents, Harbour Master, etc. may be routed through any Australian coastal radio station, the nearest being Adelaide Radio (VIA), not less than 24 hours prior to arrival.

MAX. SIZE: LOA 200 m., beam 30 m. Consideration may be given to accommodating larger vessels on a restricted draft.

Arrival Drafts: As vessels are permitted to discharge clean ballast whilst alongside, drafts should be as follows: 2 m. minimum forward and 8.5 m. maximum aft.

VHF: Channels available, 16, 12, 8, 6, 67. Channel 16 used for general call up, and Channel 6 is usually used for port operations. Call sign; "Wallaroo Harbour". Hours of operation; Monday to Friday 0845 hrs. to 1700 hrs. except Public Holidays, otherwise by arrangement.

TUGS: One tug "Kalanbi", 11.5 tonnes bollard pull (650 h.p.). Launch available to run lines.

BERTHING: Jetty extends 870 m., W.N.W. from the foreshore abreast the town. There are 3 berths on either side of the jetty, extending over a length of 400 m. from the outer end.

Coir springs are provided at all berths and vessels may lie alongside in all weathers. Vessels may be required to berth either head to sea or head in, dependent upon weather conditions prevailing at the time of berthing.

Berths	*Length* (m.)	*Depth* (m.)	*Width Dredged Area* (m.)
No. 1 North	83.5	9.45	24.4
No. 2 North	290.0	9.45	36.4
No. 3 North	68.6	7.32	24.4
No. 1 South	168.0	9.30	24.4
No. 2 South	198.0	8.22	30.0

CRANES: None.

BULK GRAIN FACILITIES: No. 2 North Berth – 5 fixed manoeuvrable spouts. Served by a conveyor bulk loading plant. Rated at 800 t.p.h. Maximum working clearance of spout above LW 17.4 m. Maximum coverage spout tip from W.F.A. 20.12 m. The plant is manned on a 2 shift basis from 0800 hrs. to 2300 hrs. daily, Sunday to Friday and from 0800 hrs. to 1500 hrs. Saturdays.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Ordering of labour organised through Agents and Grain Handling Authority.

MEDICAL: 2 private medical practices available, also 1 dental surgery located in adjacent town (12 km.). District hospital is located at Wallaroo. Ambulance service also available and may be used to transport seriously injured patients to Adelaide if required. Vaccination certificates as for all Australian ports.

TANKERS: No facilities available.

DENSITY: Average density between 1028 – 1030.

FRESH WATER: Available at 17 tonnes/p.h. By prior arrangement may be boosted to 60 tonnes/p.h.

FUEL: Available by arrangement in small quantities from Adelaide by road tanker.

FIRE PRECAUTIONS: Usual precautions necessary, bearing in mind danger of grain dust. Local fire brigade available. International shore connection should be in position.

CONSULS: None.

REPAIRS: Minor repairs available locally, marine engineers available from Adelaide.

DRY DOCKS: None.

SURVEYORS: (1) Cargo Surveyors available – may be arranged by Agents as required.

(2) Lloyd's Surveyor should be obtained through principal Agent. Lloyd's Agent is situated at Port Adelaide.

(3) Other Classification Society Surveyors also available in Australia.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: Normal Australian allowances.

CARGO GEAR: No shore based cargo gear apart from bulk grain plant. Other berths - ship's gear.

REPATRIATION: May be arranged through ship's Agent.

AIRPORT: None. Bus connection twice daily to Adelaide.

TIME: See "General" before first port.
HOLIDAYS: New Years Day; Australia Day (January); Good Friday; Easter Monday; Anzac Day (April); Adelaide Cup Day (May); Queen's Birthday (June); Labour Day (October); Christmas Day and Proclamation Day (December 26th). The bulk loading plant operates on most public holidays.
POLICE/AMBULANCE/FIRE: Police: Tel. 211200. Ambulance: Tel. 232069. Fire: Tel. 232000.
EMERGENCY CO-ORDINATION CENTRE: "Coastwatch" (Australian Coastal Surveillance Organisation) free telephone call from all Australian ports by STD or reverse charge 062-476666.
TELEPHONES: Telephones placed aboard on arrival. Cost approx. $60.00 plus $1.08 per day rental plus calls.
SERVICES: Tank and hold cleaning services available.
BANKS: Bank SA, Owen Terrace, Wallaroo.
STORING: See "Prelims".

1. By truck.
2. –
3. Wharf access available for trucks.
4. Wharf access available for forklifts.
5. Normal Customs Bond Regulations apply.
6. Labour available for storing.

SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Normal Australian ID cards necessary, but not required to be carried ashore.
GARBAGE DISPOSAL: *Notice:*

Ports Corp, South Australia
Wallaroo

Notice to Masters of Overseas Vessels

Ships quarantinable garbage is collected on Monday/Wednesday/Friday in the Port of Wallaroo.
A fee is levied for this service. Exemption from collection/fees will not apply if your vessel has an incinerator, macerator/steriliser or integral holding tank, approved by Australian Quarantine.
Any enquiries should be directed to Ports Corp, South Australia *via your ships agent.*
Under the Marpol Convention plastic items including plastic bags/bottles *must not* be disposed of at sea.

Australian Quarantine Requirements

Quarantinable Ships Garbage:
(includes galley scraps, organic refuse, animal waste and used food cartons)
– *must* be stored in plastic bags or heavy duty wet strength paper bags. The bags *must* be stowed within rodent/bird proof containers with tight fitting lids.
– *must not* be incinerated, macerated/sterilised or held in an integral holding tank *unless* prior Quarantine permission has been obtained for this specific voyage.
Australian Quarantine also requires that:
– garbage disposal unit inlets/outlets *must* be kept sealed.
– garbage stowage area *must* be kept cleaned and disinfected. Food scraps *must not* be littered on deck.
NB. Under no circumstances are the ship's crew/visitors to remove food stuffs/animals/pot plants from your vessel.
Heavy penalties apply for breaches of Australian Quarantine legislation.
WASTE OIL DISPOSAL: No facilities available.
SEAMAN'S CLUBS: None.
REGULATIONS: No unusual regulations.
DELAYS: May be experienced due to awaiting tide or awaiting bulk loading berth during grain season.
AUTHORITY: Ports Corp, South Australia, Jetty Road, Wallaroo, SA 5556, Australia. *Tel:* 088-232307. *FAX:* 088-232280. *Contact:* Division Manager – Port Operations at Port Adelaide (Head Office).

Head Office: Ports Corp, South Australia, P.O.Box 19, Port Adelaide, SA 5015, Australia. *Tel:* (08) 470611. *FAX:* (08) 470605.

AGENT: See "Adelaide".

WANDOO MARINE TERMINAL, W.A.: 20.08 S. 116.25 E. (See Plan)

LOCATION: The Wandoo 'B' production facilities are approximately 70 km. N.N.W. of Dampier, Western Australia, and consist of:

Wandoo 'B'	Lat. 20° 07′ 43″ S., Long. 116° 26′ 04″ E.
CALM Buoy	Lat. 20° 07′ 02″ S., Long. 116° 26′ 02″ E.
Wandoo 'A'	Lat. 20° 08′ 20″ S., Long. 116° 25′ 17.5″ E.
Anchorage	Lat. 20° 05′ 00″ S., Long. 116° 23′ 48″ E.

DOCUMENTS: The Master should provide a Notice of Readiness on arrival, and have the vessel presentable for an inspection on arrival.
PILOTAGE: Pilot boarding position is Lat. 20° 05′ 00″ S., Long. 116° 23′ 48″ E.
ANCHORAGE: *Anchorage Area:* Lat. 20° 05′ 00″ S., Long. 116° 23′ 48″ E.
RESTRICTIONS: No night berthing.

Berthing only undertaken when the wind speed at the Terminal does not exceed 25 km./hr. and when there is no tropical cyclone, or tropical depression which is likely to develop into a cyclone, within 400 nautical miles of the Terminal, or likely to pass within that range within 24 hours of the tanker berthing.

Maximum bow to centre manifold 120 m.

There are no freeboard limitations.

MAX. SIZE:
LOA: No restriction.
Beam: No restriction.
Summer d.w.t.: 100,000 tonnes.
Draft: 50 m.

The minimum size of vessel accepted is 40,000 tonnes S.d.w.t.
RADIO: Prior to arrival, the Master is required to advise ETA 72 hours, 48 hours, 24 hours and 12 hours in advance.
VHF: Communication is with a full marine VHF radio, and is manned from 0600 hrs. to 1800 hrs. (local time) and stands by on Channels 16 and 71.

Additionally, the facility operates a UHF radio with the following 2 working channels:

1. 463.45 MHz
2. 453.95 MHz

The Production Facility Operations Room is manned 24 hours and stands by on UHF Channel 1 (463.45 MHz) for call up and Channel 2 (453.95 MHz) as the working channel. The tanker support vessel also stands by on the same VHF Channels 16 and 71 and UHF 3 over the 24 hour period.

The facility can also be contacted by vessels outside Australia by telephone on:

OIM	Tel: 61-9-429-8872.	Fax: 61-9-429-8843.
Control Room	Tel: 61-9-429-8870.	
Comm's Room	Tel: 61-9-429-8871.	Fax: 61-9-429-8842.

TUGS: One tug/support vessel capable of a bollard pull of 25 tonnes shall normally be available.
BERTHING: *C.A.L.M. Buoy System:* Position Lat. 20° 07′ 02″ S., Long. 116° 26′ 02″ E. It is 15 m. in diameter and is anchored in 50 m. of water, 1,185 m. South of the production facility. The buoy is anchored by 6 legs of anchor chain, attached to 6×15 tonne Stevpris anchors and classified for 100,000 tonne vessels.
LOADING: Wandoo 'B' will produce at peak production 40,000 barrels per day. The storage capacity of the CGS is 400,000 barrels and will have the capacity to load tankers at the rate of 300,000 barrels per day, using 2 export pumps.

Tankers will carry out a closed loading with the inert gas vented through the mast riser.

Tankers must have a presentation flange 16 in. (400 mm.) to take a 16 in. (400 mm.) overrail loading hose on their manifold.
BALLAST: No slops or dirty ballast accepted.
MEDICAL: Emergency medical facilities are available, and the crew members would be transferred via tug to the Wandoo platform, then to Dampier (Karratha Airport) via helicopter.
FRESH WATER/FUEL: Not available at the berth. However, tug may be used during fair weather to proceed to Dampier to arrange for utilities within 24 hours. Should this happen, then the tanker shall use own engine to maintain her station.
AIRPORT: An airport is available in Karratha, which accesses the Wandoo platform by helicopter. However, repatriation/crew changes from the Wandoo facility are not possible.
TIME: GMT plus 8 hours.
GENERAL: *Customs:* Services available at Dampier.
Weather: November to April is normal cyclone period. Wandoo platform area is most exposed during January to March.
Officials: The tanker shall provide victualling and accommodation for the Pilot and Mooring Master to the standard of a senior officer.
Charges: Port charges and associated costs are now imposed on tankers using the facility. Owners should contact the operator for the applicable rates.
OPERATOR: Ampolex Ltd., Level 29 QV1, 250 St.George's Terrace, Perth, W.A. 6000, Australia (P.O.Box L902, Perth, WA 6001). *Tel:* (09) 4293200. *FAX:* (09) 4293276 or 4293544. *Contact:* George Wilson, Production Superintendent.

WEIPA, (including Albatross Bay), Queensland: 12.42 S. 141.41 E. (See Plan)

PORT LIMITS: Seaward boundary commencing at a point at HW mark on the Western Extremity of Duyfken Point, thence by a line in a 173° (T) direction to the HW mark at Boyd Point.
DOCUMENTS/HEALTH: See "Melbourne".
PILOTAGE: Vessels requiring Pilot may apply to Harbour Master, Weipa 48 hours before arrival, confirming ETA 24 hours before. Vessels to give Harbour Master their draft. Generally speaking minimum berthing draft should be, forward 2% of vessel's length and aft, the propeller completely immersed.

Pilot boat is 15 m. (length), named "Cape Melville" and painted white and orange. It may be contacted on VHF Channel 16. Pilot boards 1 mile S.W. of Fairway Beacon.
ANCHORAGE: Anywhere in Albatross Bay except between 2 lines situated 1 mile North and South respectively of the line of leads and extended to the port limits.
RESTRICTIONS: Weipa Approach Channel is 7.8 miles long with a minimum depth of water 10.8 m. LAT. Usually vessels up to 30,000 d.w.t. enter channel at any stage of the tide. Vessels of over 30,000 d.w.t. enter at any stage of the flood up to 2.5 hours before HW.

Usually vessels up to 30,000 d.w.t. can berth at any state of the tide. Vessels of over 30,000 d.w.t. due to their departure draft and existing tug power must berth starboard side alongside and can do so at any stage of the flood tide. Vessels normally depart 1 hour 15 minutes before HW. Some vessels up to 30,000 d.w.t. can depart on LW.
MAX. SIZE: Maximum LOA 254 m. (835 ft.) Beam 35.3 m. (116 ft.) Draft depends on height of tide and 90 cm. (3 ft.) keel clearance is required.
HEALTH: Weipa is not classed as a First Port of Entry. See "General – Health" before first port.
RADIO: Forcomal, Sydney Radio and within 48 hours of arrival.

VHF: Call "Weipa Harbour" on Channel 16 on arrival 1 mile S.W. of Fairway Beacon. Tugs operate on Channels 6, 8 and 12. Vessels to advise "Weipa Harbour" passing Fairway Beacon inward and outward and on arrival at and prior to departure from the wharf.

TUGS: Vessels entering North of Cora Bank, tugs join at No. 25 Beacon. Vessels entering South of Cora Bank, tugs join at No. 19 Beacon. Tugs are usually used in the lashed up position using tug's lines.

3 tugs are available of 23, 43 and 45 Tonnes bollard pull, of which only 2 are in use at any one time.

BERTHING: Loading and discharge at Humbug Point generally by ship's gear but mobile cranes may be hired if required.

Evans Landing Wharf is generally only used for petrol and distillate discharge.

Berth	*Length* (m.)	*Depth at L.W.D.* (m.)
Lorim Pt.	548	12.5
Evans Landing	191	9.6
Heavy Equipment Wharf	114	9.5

BULK HANDLING FACILITIES: *Lorim Point East:*
Bauxite: One travelling, luffing, slewing shiploader.
Loading rates:
  Raw bauxite: 6,000 t.p.h.
  Calcined bauxite: 1,000 t.p.h.
  Live storage capacity: 350,000 tons.
  Dead storage capacity: 400,000 tons.
  Max. reach from fender face: 20.3 m.
  Max. operating air draft above L.W.D.: 18.3 m.
Lorim Point West:
Bauxite: One travelling, luffing, slewing shiploader.
Loading rates:
  Raw bauxite: 3,200 t.p.h.
  Calcined bauxite: 1,000 t.p.h.
  Max. reach from fender face: 19.2 m.
  Max. operating air draft above L.W.D.: 16.7 m.
Kaolin: One linear shiploader with retractable boom.
  Loading rate: 800 t.p.h.
  Stockpile capacity: 10,000 tons.
  Max. reach from fender face: 29.5 m.
  Max. operating air draft above L.W.D. (fixed): 15.7 m.

CRANES: 2×70 tonne P.&H. 1×31 tonne P.&H. 1×26 tonne P.&H. 2×12 tonne Austin and Weston. 1×12 tonne B.H.B. 1×8 tonne Cranville.

BRIDGES: None.

STEVEDORES: No special advice required. None available for working on ships.

MEDICAL: Inoculations per Australian Regulations. No notice required for medical attention. Urgent cases flown out and treated at Cairns or Thursday Island. Hospital facilities available for minor cases.

TANKERS: *Lorim Point West:* 1×200 mm. pipeline for heavy fuel oil imports. Max. discharge rate 400 t.p.h.
Evans Landing:
  1×200 mm. line for distillate.
  1×200 mm. line for aviation fuel/motor fuel.
  1×100 mm. and 2×70 mm. lines for aviation fuel.
  Total storage capacity: 24,400 tons.

DENSITY: Dry Season 1024. Wet Season 1012. These figures can vary considerably.

FRESH WATER: Available at all berths. 5 t.p.h.

FUEL: Not available.

FIRE PRECAUTIONS: Observe general safety precautions.

STORES: Very limited stores are available. In emergency large orders could be supplied only if several days notice given by radio, as they have to be flown from Cairns.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Work carried out by crew.

SHIP CERTIFICATES: Ship's Register, Load Line, Safety Radio and Safety Equipment Certificates. See also "Melbourne".

CONSULS: None.

REPAIRS: Not available.

DRY DOCKS: None.

SURVEYORS: Lloyd's Surveyor available at Cairns.

CUSTOMS ALLOWANCES: See "Melbourne".

CARGO GEAR: See "Berthing".

REPATRIATION: Can be arranged.

AIRPORT: 10 km. from port. Served by major airline.

TIME: See "General" before first port.

HOLIDAYS: Vessels are loaded and berthed or sailed at any time.

POLICE/AMBULANCE/FIRE: Police 699119, Ambulance 699811, Fire 697444. As no telephone supplied contact "Weipa Harbour" on Channel 16 for these services.

SERVICES: Not available.

BANKS: No banking facilities available.

SHORE LEAVE: See "Melbourne".

IDENTIFICATION CARDS: See "Melbourne".

GARBAGE DISPOSAL: Daily collection available on demand. Launch provided by Weipa Tug Services.

WASTE OIL DISPOSAL: Tanker truck available at Humbug Wharf.

SEAMAN'S CLUBS: None available.

REGULATIONS: Vessels may not immobilise without written permission from the Harbour Master.

DELAYS: The only delays to be normally expected are as under restrictions, i.e. awaiting tides.

DEVELOPMENTS: The Alumina Plant at Weipa has been deferred indefinitely.

AUTHORITY: Ports Corporation of Queensland, G.P.O.Box 409, Brisbane, Queensland 4001, Australia. *Tel:* (07) 3224 7088. *FAX:* (70) 3224 7234. *Contact:* Chief Executive Officer.

Captain P.J. Zealley or Captain G.W. Ring, Senior Marine Pilots. Tel: (070) 697170. Fax: (070) 697420.

AGENT: Sub-agent of Patrick Sleigh Shipping Agencies Pty. Ltd., Gladstone.

WHYALLA, S.A.: 33.02 S. 137.36 E. (See Plan)

LOCATION: Situated on Western shore of Spencer Gulf opposite to and 27 miles by sea from Port Pirie. Open to all Southerly winds, which seldom interfere seriously with operations.

BUOYAGE: "IALA" Buoyage system "A" has been adopted.

The system is that the port hand beacons are red in colour, lights red, topmarks can shape and even numbered. The starboard beacons are green in colour and lighting, topmarks cone shape and odd numbers.

FACILITIES: Jetty for iron ore loading, and dredged harbour with one main wharf for steel and general cargo, and for bulk cargoes of coal, coke, limestone, salt, etc. Harbour berths are safe berths.

DOCUMENTS: See "Melbourne".

PILOTAGE: Compulsory except for Australian vessels whose Masters hold Exemption Certificates. Pilots board 1.7 miles - 143° from Fairway Buoy. Vessels requiring Pilot should request service in sufficient time enable Pilot be ordered before 1600 hrs. Monday to Friday and should show prescribed signal within at least 10 miles of Whyalla. If delayed berthing, Master informed by radio and recommended anchor at Pilot boarding station (see above).

ANCHORAGES: Quarantine line extends in direction 241° from Black Point to Coast Southwestward of port. Quarantine anchorage shown on Australian Chart AUS.135, lies Southeastward of quarantine line and Eastward of jetty. Anchor in close proximity to Pilot boarding area. Vessels should not anchor on harbour or jetty leads, but should anchor, draft permitting, approximately 1 mile North of Outer Fairway Beacon. Holding ground good with hard clay and sand bottom.

RESTRICTIONS: Vessels will not be moved within port by Pilot unless at least 10% of max. draft in water beneath keel.

Also see "Berthing".

HEALTH: Whyalla is a Port of First Entry. 48 hours' notice of request for Pratique required. Pratique granted at anchorage or in berth. Also see "Melbourne".

Also see "Australia-General" before first port – Answers required to questions in Quarantine form by radio.

RADIO: Cable local Agent *(a)* on departure from previous port advising ETA and total cargo for discharge Whyalla (if any); *(b)* 48 hours prior arrival giving ETA; *(c)* 24 hours prior arrival giving ETA; *(d)* advise any alteration in ETA; *(e)* advise estimated draft on arrival fore and aft. These cables necessary in order ensure loading and labour. Cables to be signed with Master's name. Cables sent outside working hours should be prefixed "Shipserv". In event vessel arriving direct from overseas port requiring Pratique, following additional advice to be cabled: No. of crew, nationality, and whether health vaccination certificates required.

VHF: Port equipped with VHF. Service maintained 24 hours a day. Call sign "Whyalla Harbour".

TUGS: All tugs fitted VHF radio. 3 tugs available between 6 and 52 tons bollard pull. Wire towropes not to be used unless risk of damage to tug undertaken by ship. Charge for use of tug's lines. Orders for tugs to be made at least 2 hours before required and not later than 1530 hrs. Monday to Friday. Ferry services undertaken to ships at anchorage outside harbour when requested.

BERTHING: No. 2 Jetty: Max. length of vessel 250 m. Depth of water alongside 11.6 m. LW (Temporary restriction 11.4 m.). Approach Channel depth 10.7 m. LWOST. Swinging basin, depth 10.7 m.. LWOST.

Stowage factor iron ore, 13 cu. ft. – 15 cu. ft. per ton. No stevedoring incurred and generally cargo loaded lower holds and no trimming necessary.

Whyalla Harbour: About 1.25 miles to North of Iron Ore Jetty. Entrance Channel 120 m. wide and approx. 3,100 m. length. Water depth in Channel and basin 10.0 m. LWOST. Depth of water at Harbour Wharf 10.7 m. LWOST. 4 berths, full wharf 700 m.

DENSITY: Density of water approximately 1028 to 1035 therefore vessels must load light.

STEVEDORES: Shift work 21 hours per day on continuous 7 day roster. At least 24 hours notice for labour requirements.

MEDICAL: Resident doctors and hospital available.

FRESH WATER: Available at No. 2 Jetty and all wharves.

FUEL: Bunkering not normally undertaken. Fuel oil, coal and diesel oil available at Whyalla Harbour Wharf in emergencies only, by road tanker from Adelaide.

REPAIRS: Consult ship's Agents before maintenance or repairs undertaken.

SURVEYORS: The following Surveyors available anytime if advance notice given: (1 hour flight from Adelaide).

Lloyd's Register: 171 Commercial Road, Adelaide, South Australia 5015. Tel: Adelaide 2410366. After hours: Adelaide 2936846. Fax: 3412009.

Bureau Veritas: 20 Didett Street, Port Adelaide, South Australia 5015. Tel: 47 5924. Telex: AA88593.

STORES: Marine and bonded stores can be procured by arrangement with Adelaide. 5 days notice required. Small amounts can be arranged locally. Consult Agent for details.

GANGWAY/DECK WATCHMAN: Not available.

REPATRIATION: Air, road and rail facilities available.

STORING: See "Prelims".
Storing at the Blast Furnace Wharf:

1. Vessels can be stored by trucks.
2. Vessels can store during loading or discharging if the vessel can provide cranes and labour for this purpose. Barges not used at this wharf. Storing must not cause any delay to stevedoring operations.

Stevedoring operations cease between the hours of 0700 to 0800; 1500 to 1600; 2300 to 2400.

3. Trucks can proceed alongside at all berths.
4. Forklifts are available for hire and can be used at all berths. Bulk berth has an 8 ton axle loading limit.
5. Application to load stores should be made to Customs by submitting a requisition showing details of items required, prior to loading.

At least 24 hours notice is required by Customs during business hours, Monday to Friday.

Form 957 (Entry for Exportation) is then completed showing all details and value of the goods, and signed by the Ship Owner or his Agent, and lodged with Customs within 7 days.

6. Shore labour is not available for storing.

Storing at the Ore Loading Jetty:

Modest amounts can be loaded by launch on the port side using ship's cranes. Launch charges from $211.00 – $445.00 per hour.

Small orders can be manhandled to ship's starboard side at the jetty.

Vessels always berth head out, starboard side to the ore jetty.

AMBULANCE: In event of accident contact Agent or BHP 404000. St. John's Ambulance Services (Tel: 45-7777) available 24 hours daily or call "Whyalla Harbour" on VHF Channel 16.

Aerial Ambulance available for transfer of patients to a metropolitan hospital.

EMERGENCY CO-ORDINATION: Whyalla Police Tel: 488020.

State Emergency Service Tel: 440088.

Local Emergencies within B.H.P. Area, including Ships Alongside: e.g. Accidents, fire, flooding, deaths, electrical faults causing hazards, oil spills and other pollution.

Dial 4000 from BHP internal telephones or 404000 from external telephones.

BANKS: A.N.Z. Banking Group, Forsyth Street, Whyalla. 5600. Tel: 45 7122

Commonwealth Banking Corporation, Forsyth Street, Whyalla. 5600. Tel: 45 8666.

National Bank of Australia, Forsyth Street, Whyalla. 5600. Tel: 45 8033.

Westpac Banking Corporation, Forsyth Street, Whyalla. 5600 Tel: 457155.

SHORE LEAVE: Crew members permitted shore leave, and launches, at ship's option, provide regular schedule to anchorage – weather permitting.

Crew members are required to use taxis through steelworks from all berths.

GARBAGE DISPOSAL: Service available Monday, Wednesday and Friday morning. Additional services available with 24 hours notice. Drums provided alongside wharf. Wet garbage to be in bags in leakproof drums, dry garbage to be bagged. Charges: A$132.00 per service during office hours and A$165.00 out of office hours. Contact: B.H.P. Co. Ltd. for service (See "Authority").

WASTE OIL DISPOSAL: Restricted service available only in an emergency situation. Charges: A$50.00 per hour. Contact: B.H.P. Co. Ltd. (See "Authority").

SEAMAN'S CLUBS: None. Facilities available to seamen on request to Whyalla Tourist Information Service. B.H.P. can also assist.

AUTHORITY: *Port Authority:* B.H.P. Steel International, Long Products Division, P.O.Box 21, Whyalla, South Australia 5600 *Tel:* (086) 404444. *Telex:* AA 80270. *Cables:* "Hematite" Whyalla. *Contact:* Superintendent Shipping and Stevedoring. *Tel:* (086) 404080. *FAX:* (086) 404787.

Ports Corp South Australia, 293 St.Vincent Street, Port Adelaide, SA 5015, Australia. *Tel:* (08) 470611. *Contact:* Captain David Mansfield, Port Manager and Harbour Master – Whyalla/Port Bonython (After hours Tel: (086) 441456).

AGENT: Sub-agent of Patrick Sleigh Shipping Agencies Pty. Ltd., Adelaide.

WYNDHAM, W.A.: 15.27 S. 128.06 E. (See Plan)

PORT LIMITS: All waters in the Cambridge Gulf South of a line extending from Cape Dussejour to the summit of Hill 437 on Lacrosse Island, thence to Cape Donett.

DOCUMENTS/HEALTH: See "Melbourne".

APPROACHES: Generally speaking, it is preferable to arrive at the Pilot Station at daybreak. Approach Medusa Bank and pass Westward (buoy bearing 090° distance 1 mile). Steer 180° until Lacrosse Island Lighthouse bears 040°, distance 2 miles. Alter course to 145° to a position with Shakespeare Hill and Cone Hill in transit (086°), Cone Hill distance 4 miles. The course should then be altered to 225°. Course clears Guthrie and East Banks and puts Black Cliff right ahead.

It will be noted that a conspicuous hill (un-named) is sighted immediately behind Black Cliff Point and these together form an excellent lead down this part of the Gulf to a position off Islet Point. From this point onwards pilotage is fairly complicated. There is a submerged wreck off the jetty, which must be considered when berthing and unberthing. Large vessels may only navigate the Hare Channel at half tide or better, as there is a 5.5 m. patch in the fairway.

PILOTAGE: Compulsory for all vessels entering the port except those whose Masters have pilotage exemptions. Pilot Boarding Ground, Nicholl's Point bearing 214° distance 5.2 miles (Lat. 14° 58.2′ S., Long. 128° 10.3′ E.). By special arrangement, and if the vessel has no charts and subject to weather, the Pilot will board at the Outer Pilot Boarding Ground, Lacrosse Island Light bearing 351° distance 4.7 miles. Pilotage in daylight only.

Harbour Master/Pilot is stationed permanently at Wyndham. Early ETA advice (10 days) is essential and should be sent to Harbour Master, Wyndham. 48 hours and 24 hours prior to arrival give ETA to Harbour Master, Department of Transport, Wyndham.

The approaches Channel has a minimum depth of 5.5 m. LWOST.

RESTRICTIONS: The max. length of vessel permitted to navigate the Gulf is 189 m. overall. Longer vessels fitted with bow thrusters have used the port by special permission.

The Gulf is not navigable during hours of darkness at present.

MAX. SIZE: Length 190 m., draft 8.8 m. Max. displacement 26,000 tonnes.

HEALTH: Wyndham is a First Port of Entry. Masters are required to radio Port Health Authority, Wyndham, not less than 12 hours prior to arrival at pilotage station and giving state of health of the vessel. Examination for pratique is usually conducted after arrival alongside and nobody is permitted ashore until doctor's examination is completed.

RADIO: *ETA:* Shipserve "Harbour Master Wyndham" required 48 hours and 24 hours notice prior arrival. The 24 hours message should be timed to be delivered before 1500 hrs. local time on the day before arrival so that arrangements can be finalised, when possible, in working hours.

Indicate max. draft in the 48 hours notice.

VHF: "Wyndham Harbour" on Channel 16 during office hours (0700 – 1600).

TUGS: None.

BERTHING: There is a jetty of 342 m. in length. The Southern 210 m. having a least depth of 9.0 m., and the North end having a depth of 5.0 m.

Ordinary moorings are used. A launch is on station to run lines. There is no tug available.

CARGO HANDLING: By ship's gear only direct to motor transport. Forklift trucks and pallets are used for handling general cargo where suitable.

A container park and facilities for handling and storage of reefer and dry containers ashore has been installed.

Bulk Loader on South Berth, grain loading rate 120 t.p.h. The loader is 105 m. from the South end of berth. Airdraft 16.4 m. Outreach 9.7 m.

STEVEDORES: Working hours: 0730 – 1130 hrs., 1230 – 1630 hrs., 1630 – 1830 hrs. When no extension of work, labour finishes at 1630 hrs.

Labour is organised by stevedores. WWF conditions prevail. Prior advice as to labour requirements, hatches to be worked, etc., is of great assistance to stevedores.

FRESH WATER: Available at both berths. Supply is 10 t.p.h. approx.

FUEL: Small quantities available by arrangement with oil companies.

REPAIRS: No facilities.

CERTIFICATES: See "Melbourne".

TIME: See "General" before first port.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Australian Dollar.

AUTHORITY: Department of Transport, P.O.Box 186, Wyndham, Western Australia 6740. *Tel:* (091) 611006, 611203. *FAX:* (091) 611244. *Contact:* Harbour Master.

AGENT: Sub-agent of Patrick Sleigh Shipping Agencies Pty. Ltd., Fremantle.

YAMBA, N.S.W.: 29.26 S. 153.21 E. (See Plan)

PORT LIMITS: One nautical mile Eastwards of the ends of the North and South Breakwaters defines the seaward limits of the port.

DOCUMENTS:

2 Crew Lists, Form M&S 11.
2 Port of Call Lists.
2 Passenger Lists, Forms M308, 309, 310 (2 each).
1 Crew Personal Effects List, Form 5.
1 Store List, Form 42A.
1 Animal Pets aboard, Form QA4.
Ship's Log.
Last Port Clearance.
Safety Certificates: Construction, Equipment, Safety Equipment, Loadline, Radio.

Where possible, cargo manifests and stowage plans should be forwarded by airmail ahead of the vessel to the local Agent.

PILOTAGE: The Clarence buoyage is IALA "System A". Pilotage is compulsory for all craft exceeding 30.48 m. LOA, unless a current Pilotage Exemption is held by the Master.

Notice of ETA and request for a Pilot must be made to the Harbour Master not less than 24 hours before ETA at breakwater. Cable address is "Pilot Yamba". Confirmation of ETA is required 2 hours before arrival breakwater. Channel 16 VHF is continuously watched 1 hour before last given ETA and ETA may be confirmed or adjusted on this frequency. Pilot boat is 15 m. LOA and is a black hulled tug with black funnel and white superstructure, called "Francis Freeburn". The usual international signals may be employed by vessels requiring a Pilot. The Pilot boarding point may vary according to weather and sea conditions, if possible it will be 1 nautical mile seaward of the breakwater, otherwise Pilot will either issue instructions or lead vessel into the river and board just inside breakwater entrance. Pilot boarding arrangements must be according to IMO rules. Vessels awaiting Pilot or suitable tide may anchor between 1 and 2 miles East of the breakwater entrance – sand bottom and good holding ground.

Pilot ladder 1.0 m. up from waters edge, no manropes for inward vessels, ladder on starboard side, port side for departure, plus manropes.

ANCHORAGE: Masters familiar with the port and pilotage vessels may proceed to an anchorage downstream of the Harwood Bridge for berthing at Harwood Sugar Mill in 5.0 m. of water or to a position midway between Freeburn Island and Illuka Wall in 6.0 m. of water for vessels berthing at Goodwood Island wharf. Also see "Pilotage".

RESTRICTIONS: Vessels can enter the port day or night. The only restrictions would be on bar conditions and the height of tide in relation to vessel's draft.

MAX. SIZE: Generally, there is no restriction on length, max. beam would be approximately 70 m. to get through a 91 m. passage in a rock reef inside the breakwater entrance. The main restriction is draft of vessel which is 5.0 m. to Goodwood Island Wharf plus height of tide, such tides being almost identical to Sydney in both height and time.

HEALTH: Australian Commonwealth Rules apply.

RADIO: Sydney Radio (VIS) or Brisbane Radio (VIB) are the long range area stations.

VHF: The base station with call sign "Yamba Harbour Control" is situated behind the Wooli Head Lighthouse. A continuous watch is not maintained, only on prior notice that a vessel is due. Initial calls are made on Channel 16, another Channel will be used after contact has been made. The pilot vessel, which also acts as tug, if required, has Channels 16, 12, 6, and 8.

RADAR: There is no Port Control Radar.

TUGS: There are no commercial tugs, the pilot vessel may act as a tug if required either by the Master of the vessel or on advice from the Pilot. The "Francis Freeburn" is 460 b.h.p. and five tonnes bollard pull.

BERTHING: Main general cargo berth is Goodwood Island Wharf. This is a concrete decked, concrete piled wharf with timber and rubber fender piles. Permissible wheel loading (Cargo stacking – 2,750 kg./sq.m.; forklift truck wheel loads – 6 tonnes (12 tonnes max. axle load); mobile crane loads – special permission required; gross vehicle weight for trucks – 40 tonnes), wharf 70 m., deck floor 2,600 kg./sq.m. Vessels of greater than 70 m. length can secure at the berth as bollards are available 24 m. and 30 m. up and downstream respectively from the wharf. The least depth alongside the wharf is 7.0 m. An 18 m. × 12 m. covered storage shed is available. The shed can not be used for general cargo, if goods under Customs control are stored therein. A large paved cargo stacking area is available, together with container washdown facilities and a small incinerator for waste cargo packing. The port has been upgraded to a Port of First Entry to Australia for cargo ships only. Ship's gear is usually employed, but mobile cranes up to 50 tonnes capacity are available at reasonable notice for extended hire.

There are no Roll-on/Roll-off traffic berths or berths for handling liquid chemicals or LPG carriers. The berth at Goodwood Island is suitable for loading or discharging explosives.

STEVEDORES: Working hours are from 0800 – 1900 hrs. 5 days per week, weekends by arrangement, also second and third shifts by arrangement.

MEDICAL: Full hospital facilities at Level 2 available without prior notice, Level 3 on transfer to Grafton or Lismore with specialist services.

FRESH WATER: Good quality potable water available in unlimited quantities at 30 tonnes/p.h. per connection, ship's hoses used at the present time.

FUEL: Nearly all grades of fuels and lubricants are available by road transport with arrangements being made through Agent.

CONSULS: Nearest at Sydney or Brisbane.

REPAIRS: Routine maintenance and boilermaking assistance to light engineering standards. The nearest foundry is in Ballina, 1 hour's drive from the port.

SURVEYORS: Lloyd's Agents who also represent other Classification Societies and Surveyors can be brought from Sydney or Brisbane at short notice.

GANGWAY/DECK WATCHMEN: Gangway and deck watchmen are not normally used in this port but can be obtained at Union award rates, with prior notice to the Agent. Watchmen engaged by stevedores for main gates.

HATCHES: Opening/closing normally handled by stevedores whilst alongside or by ship's crew before arrival.

CUSTOMS ALLOWANCES: Australian Commonwealth Regulations apply.

CARGO GEAR: Discharge or loading of cargo at Goodwood Island Wharf is by ship's gear, however mobile cranes up to 50 tonnes capacity are available for extended hire at short notice.

REPATRIATION: Scheduled aircraft to Sydney are available twice daily at Grafton Airport, 1 hour's drive away. Rail connections to and from Sydney are also available at Grafton. All facilities exist for changes of crew and repatriation of seamen with prior notice to Australian Customs at Coffs Harbour.

AIRPORT: See "Repatriation".

TIME: See "General" before first port.

HOLIDAYS: Christmas Day, New Year's Day, Anzac Day and Good Friday.

POLICE/AMBULANCE/FIRE: All emergency services are available through the local wharf office.

Police: Iluka 46 6019: Maclean 45 2444.
Fire: If unanswered Tel: 42 0222.
Ambulance: Maclean 54 2420/45 2020.

EMERGENCY CO-ORDINATION CENTRE: All emergencies are co-ordinated through Canberra.

TELEPHONES: This service is available aboard ships at Goodwood Island Wharf by prior arrangement through the Agent, local calls only, account rendered through the Port Authority.

SERVICES: A compass adjuster resides at the port.

STORING: Vessels can be stored by trucks, all "under Bond" goods are subject to Australian Bureau of Customs control. Trucks can proceed alongside vessel at berth during storing. Fork lift trucks can be used on wharf to handle stores. Local riggers can be employed to assist storing.

SHORE LEAVE: When Immigration and Customs requirements have been satisfied, there is no restriction on crew shore leave, so long as they rejoin the vessel before departure.

IDENTIFICATION CARDS: There is no need for identity cards or shore passes except in so far as non-English speaking persons may wish to be able to identify themselves.

GARBAGE DISPOSAL: Subject to Plant Quarantine Regulations, skips on wharf for rubbish. Charge is covered with normal utility wharf charge.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

DELAYS: Berthing delays are very infrequent, only possible delay would be due to adverse bar conditions.

AUTHORITY: Office of Marine Safety and Ports Strategy, G.P.O.Box 32, Sydney 2001, Australia. *Tel:* (02) 3642003. *FAX:* (02) 3642321. *Contact:* John Sturday.
Local Office: Captain G.W. Gray, Pilot Station, Yamba, NSW 2464. *Tel:* (066) 462002. *FAX:* (066) 461596.

AGENT: Sub-agent of Patrick Sleigh Shipping Agencies Pty. Ltd., Sydney.

NOTES

Please also advise Shipping Guides Ltd.

Azores

HORTA, Faial: 38.32 N. 28.38 W. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
For Customs
Arrival Declaration.
Manifest of Cargo for Discharge or in Transit.
Provisions List.
Request to Commence Load/Discharge.
For Port Health
Derat Certificate or exemption.
Health Clearance from Last Port.
For Port Captain
Seaworthiness Certificate.
Certificate of Registry.
Tonnage Certificate.

PILOTAGE: Can be called by 2 long and 1 short blast on the whistle, or by International Code flag "G". Radio contact with Pilot Station can be made by VHF Channel 16; Tel: 2182; via radio station CUG, or in cases of urgency, through the Horta Naval Radio Station CTH.

Pilot launch painted black with "Pilotos" painted on each bulwark. If requested by Master, Pilot will board at entrance of Faial-Pico Channel or Faial-St. George Channel. Otherwise Pilot will board at port entrance. Vessels waiting for Pilot must remain 1.5 miles from the breakwater with Ponta de Doca Lighthouse in line with Avia Larga Lighthouse on Pico Island.

ANCHORAGE: The best holding ground is with the breakwater light in line with the tower of San Francisco church bearing 272°, and with Ilheu Negro in line with Casa Joao Catita bearing 203°. Another line of good soundings is in the open Channel dos Ingleses.

MAX. SIZE: For berthing, max. draft 22 ft. Depth in the artificial port is 36 ft. at HW. Depth at buoy moorings: 33 ft. Vessels of any draft can anchor outside the port.

HEALTH: If vessel has not touched any contaminated port, Pilot will haul up signal "TO" and Health Inspector will give Free Pratique. Master is obliged to send the Maritime Declaration of Health given by the Pilot to shore within one hour together with a Crew List and Cargo Manifest. If vessel has suspected case of fever on board or is coming from a port in a contaminated zone, Pratique will only be given after Health Inspector has boarded.

RADIO: Commercial station CUG and Naval station CTH.

TUGS: None available.

STEVEDORES: Gangs are provided by local stevedores syndicate when requested by Master or Agent.

MEDICAL: Doctors and hospital facilities always available.

FRESH WATER: Can be provided by one water barge, capacity 200 tons. Also available from 3 hydrants on quay, rate 50 t.p.h.

FUEL: Gas oil and gasoline available by pipeline on quay.

CONSULS:
France
Greece
Germany
Italy
Netherlands
Norway

REPAIRS: Machinery and small electronic repairs can be effected.

GANGWAY/DECK WATCHMEN: Police Guard or Coast Guard (Policia Maritima).

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Up to 150 grammes tobacco and small allowance wine or spirits for each man.

REPATRIATION: Can be arranged.

AIRPORT: Several flights during the day from Faial Airport, 10 km. from the port, to Lajes Airport and International Airport at Santa Maria. There is a daily boat service to Pico and several weekly to other islands.

TIME: GMT minus 1 hour in Winter. GMT in Summer (See "Ponta Delgada").

HOLIDAYS: 1st January; 25th April; 1st May; 10th June; 24th June; 15th August; Corpus Christi; 5th October; 1st November; 8th December; 25th December.

POLICE/AMBULANCE/FIRE: Police 22022; Ambulance 115; Fire 22333 and 115.

TELEPHONES: Can be connected on board vessels berthed alongside.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Containers for garbage available on the main pier.

WASTE OIL DISPOSAL: 200 litre drums are provided by the Port Authority. No private companies available.

SEAMAN'S CLUBS: No Seaman's Club available. Long distance telephone calls can be made from the Post Office. Churches available.

CURRENCY: Portuguese Escudo.

AUTHORITY: Junta Autonoma do Porto da Horta, Avenida Gago Coutinho S. Cabral 7, 9900 Horta, Azores. (Postal address: Apartado 70, 9901 Horta Codex). *Tel:* (092) 22164, 22165, 22166. *FAX:* 092-22523. *Contact:* Angelo Leonardo Andrade, Port Director.

PONTA DELGADA, San Miguel: 37.44 N. 25.40 W. (See Plan)

DOCUMENTS:
1 Stores List.
4 Crew Lists.
4 Landing Passenger Lists.
4 In-Transit Passenger Lists.
2 Manifests of Cargo being landed.
1 In-Transi Cargo Manifest.
Ship's Register.
Load-line Certificate.
Safety Equipment Certificates (London Convention).
Derat Certificate.
Shipmaster's Report: April 1990 (Research Vessel).
2 Stores Lists (Deck, Engine, Catering, Bond) – Form C 132.
5 Crew Lists.
2 Crew Effects Declarations – Form C 142.

PILOTAGE: Good deep approach. Harbour Pilot boards 0.5 miles S.E. of breakwater. Radio Harbour Master direct or through Agent ETA 48 hours notice. ETA message to include draft, reason for calling, type of bunker required, fresh water required, oil products needed, nature of repairs and what cargo, if any, aboard.

Pilot station with visual signal tower and radiotelephony, at entrance of port installations. Telephone number 2.35.50. Pilot's motorboat – Pilotos in capital white letters printed both sides hull, as well as flag "P" hoisted during day or 1 red and 1 white light at night.

When necessary, Pilot motorboat will complete identification by flashing word "Pilotos".

Besides usual signals of ICS, Pilots' station, when necessary, will hoist on main signal tower the following:

By Day – Flag "X" of ICS – Wait outside Harbour (for Portuguese or foreign ships regularly visiting Ponta Delgada); Flags "OG" of the ICS – Wait outside Harbour (for all other ships);

By Night – Two green lights (one above the other) – Wait outside the Harbour (for Portuguese and foreign ships).

ANCHORAGE: Outside artificial harbour, in roadstead and off breakwater, anchorage suitable for all ships whose drafts are too deep for admission into artificial port – over 40 ft. depth. Good holding ground.

RESTRICTIONS: Vessel considered adversely trimmed when more than 10 ft. "by the stern" or 2 ft. "by the head".

MAX. SIZE: Up to 38 ft. draft.

HEALTH: The Pilot requests Master to hoist quarantine flag when vessel comes from an infected port, or when sick people carried on board. Port doctor then boards for inspection and nobody allowed to board or leave vessel before completion of inspection.

Animals: Importation and transit of all birds and small animals allowed but valid Health Certificate and valid Rabic Vaccination Certificate required.

RADIO: San Miguel Radio, call sign CUG. Transmitting on 1663.5 kHz. Receiving on 2182 kHz. Radio telephone frequencies 4415.8, 8792.8, and 13175.5 kHz.

RADAR/VHF: Harbour radar covers range of 20 sea miles; controls inside harbour waters. VHF location – main signal tower. Call sign – "Pilotos". Operating 24 hours on Channel 16. Range 20 to 25 miles.

Calls must be made on Channel 16 and then shift to Channels 20 or 22 as indicated by Port Operations Station. Channel 14 used for communications between tug, Pilot station, Pilot aboard, during manoeuvres of mooring and unmooring. It should be understood that the Port Operations Station is not to be used for ship's business with Agents or Shippers of cargo.

TUGS: Two tugs, 1,100 h.p. and 3,400 h.p. operated by Junta Autonoma available for assistance during berthing and unberthing.

BERTHING:
No. 1 – Quay for small craft.
No. 2 – West Quay, 1,069 ft. long, min. depth alongside, LW, 20 ft.
No. 3 – Central Quay, 678 ft. long, min. depth alongside LW, 27 ft.
No. 4 – East Quay, 2,023 ft. long, min. depth alongside, LW, 40 ft.
Mooring buoys in depths ranging from 20 ft. to 30 ft.

MEDICAL: Large well-equipped hospital. Santa Casa da Misericordia de Ponta Delgada, telephone number 2.23.22 and Clinica de Bom Jesus, telephone number 2.53.52.

TANKERS: Vessels carrying explosives, inflammable liquid or any other dangerous cargoes, before entering port, must hoist International Code Signal "B" at foremast during day and a red light at night. Upon boarding vessel the harbour Pilot enquires from the Master whether there are explosives and any other dangerous cargoes on board. Masters requested to supply accurate information as to quantity and nature in order to enable Port Authorities to select a suitable berth or anchorage for vessel.

Constant Readiness: Vessels carrying dangerous cargoes, while moored, must maintain engines and propulsion machinery in readiness to leave the port under full power, if necessary.

STEVEDORES: Available. Early advice to Agent recommended.

FRESH WATER: Available at all quays ex-hydrants.

FUEL: Bunkers are readily available but, for their own convenience Masters should telegraph Agents quantity and type of bunkers required. In order to avoid possible delays to their own and other vessels, Masters e requested to replenish bunkers at the time suggested by their Agents.

GANGWAY/DECK WATCHMEN: Customs Guards are on duty upon the quay and at the entrance of the wharf. Customs guards are also placed on board and those assigned for this duty should be provided with meals (at regular meal times) and sleeping quarters on board.

CUSTOMS ALLOWANCES: Storerooms will be sealed but a reasonable quantity of stores, estimated as indispensable for consumption, may be removed before sealing. This amount should be ready for removal from the storeroom prior to arrival at berth.

CARGO GEAR: *Electric Cranes:* 1×25 tons. 1×12 tons. 2×6 tons. 1×3 tons.
Mobile Cranes: 1×15 tons.
Forklift Trucks: 2.5 tons – 42 tons.

CONSULS:

Belgium	Tel: 2 30 11	Italy	Tel: 2 42 46
Brazil	Tel: 2 26 38	Mexico	Tel: 2 27 04
Chile	Tel: 2 32 26	Netherlands	Tel: 2 22 04
Denmark	Tel: 2 42 91	Norway	Tel: 2 27 83
Dominican Rep.	Tel: 2 53 90	Panama	Tel: 2 20 45
Finland	Tel: 2 35 59	Spain	Tel: 3 26 40
France	Tel: 2 71 27	Sweden	Tel: 2 26 38
Germany	Tel: 2 39 35	Turkey	Tel: 2 26 67
Greece	Tel: 2 41 29	U.S.A.	Tel: 2 22 16

REPAIRS: Engine or other repairs can be undertaken. Repairs to electric installations, motors and refrigerating systems can also be undertaken as well as repairs to wireless stations (including VHF, radio-telephone equipment, radar, echo-sounders, direction-finders, gyro-compasses, steering-gear, Sal logs and cinema projectors).

Workshops duly equipped to undertake hull and engine repairs. Divers and equipment also available for some underwater work. Small tugs, motor-launches and lighters. Small slipway for vessels up to 200 ft. long. No dry docking available. A sea-going salvage tug, owned by Junta Autonoma is stationed in the port.

REPATRIATION: Can be arranged.

AIRPORT: 3 km. from Ponta Delgada. Daily flights to Lisbon by TAP-Air Portugal and to all other islands of the Azores, by SATA Airlines.

Daily connections with flights of TAP-Air Portugal, to and from Europe and United States or Canada.

TIME: GMT minus 1 hour in Winter. GMT in Summer from 0000 hrs. last Sunday in March to 0100 hrs. (local time) last Sunday in September.

HOLIDAYS: 1st January – New Year's Day, 25th April (Liberty Day), 1st May (Workers Day), June 10th (Portugual Day), Corpus Christi, August 15th, October 5th, November 1st, December 1st, Monday before Ascension Day. Government offices close on afternoon of Maundy Thursday and on afternoon of Christmas Eve. Most firms close on Shrove Tuesday and Good Friday.

POLICE/FIRE/AMBULANCE: Police Tel: 22022; Fire Tel: 22333; Ambulance Tel: 22022 or 115.

TELEPHONES: Any ship moored alongside can be connected to the city's telephone network, upon request through the ship's Agent.

SERVICES: Fresh and dry provisions available all the year round.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: No Crew members allowed ashore without landing cards, which are supplied by Agents.

REGULATIONS: Ballast: Vessels must arrive with sufficient ballast to permit safe handling.

Ratguards: It is advisable to use ratguards while moored alongside. Scupper Covers: Boards or other suitable devices must be used to cover outlets from lavatory discharges, etc., to prevent fouling of pier or craft alongside.

Garbage: It is absolutely forbidden to dispose of cinders, garbage, or any other refuse inside the harbour or within the territorial waters limit. Non-compliance is subject to heavy fines.

GENERAL: Visual storm signals are shown on Main Signal Tower.

AUTHORITY: Junta Autonoma do Porto de Ponta Delgada, Rua Teofilo Braga 1, 9500 Ponta Delgada, San Miguel, Azores. *Tel:* 25221-25225 (5 lines). *Telex:* 82287 Portos P. *FAX:* 23390. *Contact:* Luis Brandao, Port Director.

NOTES

Please also advise Shipping Guides Ltd.

Bahamas

FREEPORT: 26.31 N. 78.46 W. (See Plan)

DOCUMENTS:

(a) Inwards:

	Description	Customs	Immigra-tion	Agents	Total
1.	Crew Lists	2	1	1	4
2.	In Transit Passenger List	2	2	2	6
3.	Disembarking Passenger List	2	2	2	6
4.	Stores List	2	—	—	2
5.	Gift Shop Inventory	2	—	—	2
6.	Crew's Declaration	2	—	—	2
7.	Ship's Report Inwards (supplied by Agents)	2	1	1	4
8.	Maritime Declaration of Health (supplied by Agents)	1	—	—	1
9.	Cargo Manifest for Freeport	4	—	2	6

10. Landing cards supplied by Agents to be completed by each disembarking passenger.
11. Baggage Declaration forms supplied by Agents to be completed by each disembarking passenger.
12. Clearance from Last Port will be collected by Customs.
13. Derat Certificate should be available for inspection.

If vessel's previous port of call was in Bahamas items (7), (8) and (13) need not be complied with.

When vessel requires Consular Despatch to country such as Venezuela, 2 extra copies items (1), (4) and (6) should be supplied.

(b) Outwards:

	Description	Customs	Immigra-tion	Agents	Total
1.	Ship's Report Outwards (supplied by Agents)	2	—	—	2
2.	List of Embarking Passengers (if any)	2	2	2	6
3.	Outward Manifest Freeport Cargo	2	—	2	4

If vessel clearing for another Bahamian port item (1) does not have to be complied with, but copy of next port's manifest required.

APPROACHES: The following landmarks are prominent when approaching the port: Borco Refinery 3 chimneys. 369 ft. above MLW. White with red bands showing 3 sets of 4 red lights at night. Visible approx. 20 miles. Flames occasionally visible from Borco stacks. Bahamas Cement Company storage silos just to West of harbour entrance. Visible approx. 15 miles.

Currents in the area are not predictable and are largely wind induced. Harbour is approached through straight channel 1,800 ft. in length, 500 ft. width and with controlling depth of 32 ft. below MLW. Turning basin, 2,000 ft. by 1,800 ft. Vessels may enter and leave harbour on 24 hour basis, weather permitting.

Vessels using Freeport Harbour are advised that an Aero Beacon situated in the Dock 1 area transmits continuously on 209 kHz. the group "ZEP" at a rate of 7 words per minute. The output is rated at 100 Watts. Reception by surface craft has been registered at 60 – 70 nautical miles distance.

PILOTAGE: Compulsory for passenger vessels exceeding 199 gross tons and freighters exceeding 399 gross tons. Pilotage is compulsory for tankers berthing at Borco Dock, but vessels calling for bunkers only may anchor and bunker by barge without using Pilot services. However, pilotage recommended. Pilot station located in position in which Freeport Light bears 050° True, distance 2 miles. Approaching Freeport, particularly from North West, keep at least 3 miles from shore, and, when off port, remain at Pilot Station until boarded by Pilot. Pilotage area extends from Pilot Station to offshore refuelling moorings, anchorage to West of harbour entrance and harbour. Pilots available any time of day or night. Freeport Harbour Control maintains a 24 hour watch for radio signals. Borco on VHF Channel 13 only.

Vessels can communicate by RT on 2182 kHz, and once they have established contact will normally be asked to switch to one of the following frequencies: 2638 or 2738 kHz. Vessels can also communicate by VHF Channels 16 and 14. Freeport call sign on all frequencies is ZFP 81 or Freeport Harbour Control. Give ETA 48 hours in advance, with subsequent corrections as necessary.

The Restricted Area has been extended to 1 nautical mile radius from the Eastern end of No. 2 Jetty (Inner Jetty). Vessels are prohibited from anchoring in this area. No other vessels (with the exception of Borco or Harbour Company vessels) should enter the Restricted Area owing to the fire hazard created by the handling of inflammable liquids emitting explosive vapours.

Additionally, a 2 nautical mile area centered on the Eastern end of No. 2 Jetty (Inner Jetty) has been established. Any vessel closing the port from seaward in order to take on stores, land crew members, take on bunkers, fresh water, etc., other than a vessel going alongside the jetties or entering the harbour, should remain outside this 2 mile limit.

Unauthorised entry into these areas does not carry a penalty, however, the prudent mariner is advised that in any investigative proceedings into accidents within these areas, due account will be taken of any failure by a vessel to observe the 2 nautical mile and 1 nautical mile limits as indicated.

ANCHORAGES: There is a good offshore anchorage approximately 2,500 ft. to the N.W. from the entrance channel for a distance of 1.5 miles (submarine cable in existence) which is sheltered from Northerly winds. The bottom of the sea is lime and coral rock covered by sand and loose lime.

Anchorage area is exposed during periods when strong Southerly winds prevail. During these periods, vessels may drag their anchors. Mariners are therefore advised to use anchorage areas with caution.

A vessel can anchor in depths of 14.6 m. to 18.3 m. (48 ft. to 60 ft.) to the West of the harbour entrance with No. 1 Jetty (Outer Jetty) in transit. Anchorage is not recommended for vessels greater than 60,000 d.w.t. and vessel should be prepared to vacate the anchorage at short notice, particularly if the wind sets in from between S.E. and West. Pilotage is not compulsory but recommended and is available upon request.

MAX. SIZE: *Tanker Berths.*

Berth		d.w.t.	Depth Alongside (MLW)	Max. Draft
No. 3	up to	38,000	50 ft.	40 ft.*
4	" "	80,000	54 ft.	47 ft.*
5	" "	90,000	80 ft.	50 ft.*†
6	" "	312,000	87 ft.	82 ft.
7	" "	65,000	53 ft.	40 ft.*
				Heading East 42 ft.
				Heading West
8	" "	100,000	56 ft.	50 ft.*†
9	" "	130,000	68 ft.	*‡
10	" "	500,000	92 ft.	91 ft.

*Drafts on Berths No. 3, 4, 5, 7, 8 and 9 are limited by depths over submarine pipe-lines in berth approaches.

†47 ft. if headed S.E.

‡46 ft. arriving/47 ft. departing.

HEALTH: Pratique granted by Customs Boarding Officer after Maritime Declaration of Health Form completed by Master and Derat Certificate examined. Important that vessel should not commence refuelling nor work cargo until cleared. A vessel arriving from another Bahamian port, e.g. Nassau, does not require Pratique. If any suspected disease or fever on board, Pratique may be withheld, pending examination by Government Medical Officer.

RADIO: Recommended that radio messages giving ETA, etc., be transmitted via Miami Radio.

Tankers proceeding to Borco Installation should transmit the following information within 6 hours of clearing at last port:

(a) name of tanker;
(b) name of port at which the tanker last called;
(c) date and hour of estimated time of arrival at Freeport.

It is imperative that the Master of each tanker shall establish communications with the refinery at least 72 hours prior to the estimated time of arrival, and that the refinery be notified of any change in ETA. Four hours before arrival at Freeport the Master should establish contact by VHF radio and advise on vessels precise ETA. Any berthing instructions will be passed to the Master at this time.

Radio Telephone: A continuous watch is maintained by the Control Tower of Freeport (Bahamas) Harbour on 2182 kHz and on VHF Channels 16 and 14.

Working frequencies are:

Medium Frequencies:

2638 kHz – Ship-to-Shore
2738 kHz – Ship-to-Shore
2782 kHz – Freeport Harbour (Private frequency).

VHF: Channel 14

In addition, Freeport Harbour can communicate on:

2031.5 kHz – Miami Marine.
2118 kHz – Miami Marine.
2198 kHz – Nassau Marine.
2670 kHz – Coast Guard

As far in advance of the time of arrival as possible, but not less than 1 hour, vessels should establish radio communication with "Freeport Harbour Control" to amend or confirm the ETA.

TUGS: Borco Towing (Bortow) provide 3 tugs for assisting in berthing and unberthing. These are of 4,500 h.p. In addition there are 2 chartered tugs of 4,000 h.p.

BERTHING: 17 berths, depth alongside up to 30 ft.

STEVEDORES: Freeport Harbour Company, Ltd., are the sole stevedoring company. Some limitation on labour availability and difficult to obtain more than 2 gangs at any one time. Normal discharging rate 10 d.w.t. per hook per hour. First ETA at least 48 hours prior arrival, to ensure labour booked in time.

CRANES: Forklift trucks ranging from 8,000 lbs. to 36,000 lbs. capacity. Mobile cranes up to 75 tons capacity may be hired from local companies.

SPECIALISED CARGO HANDLING FACILITIES: *Cement:* Bahamas Cement Company own and operate the whole of Basin No. 3 (1,365 ft. by 350 ft. by 636 ft. – depth 30 ft. at MLW), with bulk handling facilities.

Roll-on/Roll-off: Basin No. 1: 2 ramps for 2 vessels (passenger/car ferry type) at S.E. end. Depth 28 ft. MLW. Both ramps approx. 4 ft. above MHW.

Basin No. 2: 2 ramps for landing ship type vessels at S.E. end. Depth 32 ft. MLW. 1 ramp 4 ft. above MLW (4 vls.), the other 0 ft. (1 vl.).

LPG: There is an LPG and Chemical Berth in Basin No. 4 (Berth No. 14) which accommodates coastal tankers.

Basin No. 4: Berths No. 12-14 used for bunkering vessels up to 600 ft. LOA.

Berth No. 14 used for bulk chemicals (Shell) and gas. Berth No. 12 used for wet docking.

Berths No. 14 (West) and No. 12 (West) accommodate ships and barges for loading of rock for export.

MEDICAL: No port Medical Officers. Persons requiring attention must proceed approximately 7 miles to Freeport's hospital and dental clinic, or to Antoni Clinic or Lucayan Medical Group Clinic which approximately same distance from port area. Holistic Health World also approximately 7 miles from Freeport Harbour. Advance notice to Agent desirable but not essential.

TANKER BERTHING FACILITIES: There are 4 off-shore loading platforms (Sea Islands) situated between 2,500 ft. and 3,600 ft. from the shore line at Pinder's Point. There are 2 berths on each platform making a total of 8 berths which can accommodate tankers ranging in size from 16,000 to 500,000 d.w.t.

Inside the harbour at Dock 1 are facilities for handling smaller vessels, mainly barge loading and import/export of refined products on a small scale. This is the only Mogas import berth for the island.

Borco Dock 1: The No. 1 Dock area is the centre of Bortow's Operations. Bortow is responsible for the maintenance and provision of all marine transport associated with the off-shore operation. Bortow provides tugboats, mooring boats, personnel carriers, pilotage service and bunker barge facilities, the barges being used to bunker and water vessels in the harbour and in the anchorage.

The working length of the dock is 600 ft., it will accommodate vessels up to approximately 18,000 d.w.t. with a maximum draft of 27 ft.

Bortow provide a bunkering service. This service is given to vessels visiting the Port of Freeport, (cruise ships, cargo ships), and to vessels anchoring outside the port solely to purchase, bunker fuel. The barge service is also used occasionally at Borco's marine facilities when it is more convenient to bunker a vessel by barge. Bunker fuel supplied to the above mentioned vessels ranges from diesel oil to heavy fuel oil, blends being made in between to suit individual customer requirements.

Products imported or exported via the No. 1 Dock loading facilities are:

Imports:
1. Premium Gasoline.
2. Regular Gasoline.
3. Heavy Fuel Oils for Bunkering.
4. Heavy Fuel Oil, to be supplied as bunker fuel to visiting tankships.

Exports:
1. Diesel oil to small craft for inter-island distribution.
2. All grades of fuel oil into barges or tankships when scheduled for delivery to the Out-Islands or the East Coast of U.S.A.
3. Kerosene.
4. LPG.

Note: Tankships, except for gasoline imports and local sales of kerosene and LPG, normally only use the No. 1 Dock facilities during occasions of extreme bad weather.

Loading Platforms: The 3 loading platforms which accommodate Berths No. 3 & 4, 5 & 6, 7 & 8 are of fully enclosed, box like type of construction the interior of which contain equipment for the operation of each respective platform.

The platform serving Berths No. 9 & 10 is of a slightly different design in-so-much that it is of an open type construction with no between decks storage space.

All of the platforms are situated in an elevated position approximately 40 ft. above sea-level and are supported by piling structures sunk into the sea-bed.

The platforms serving Berths No. 3 & 4, 7 & 8 and 5 & 6, 9 & 10 are interconnected by cat-walks which extend in a N.W./S.E. direction, in line with prevalent weather conditions. The overall lengths of these structures are approximately 2,040 ft. and 3,000 ft. respectively.

Each loading platform is entirely self-sufficient in that they each have their own power supply, fresh water, office and store-rooms, fire fighting and anti-pollution equipment, slop systems, storm water systems and a host of contributory operating equipment. Communication systems amount to P.B.X. Telephones, Magneto Telephones (inter-Jetty communication) and 2 VHF Radio systems.

Two fresh water lines extend from the shore, one to Berths No. 9 & 10 and the other to Berths No. 3 & 4. Fresh water is then supplied to Berths No. 5 & 6 via Berths No. 9 & 10, and Berths No. 7 & 8 via Berths No. 3 & 4. This water supply can also be used to water tankships alongside the platforms.

To enable tankships to be safely secured alongside the loading facilities, each platform and associated cat-walk unit has mooring dolphins with quick-release mooring hooks and integral capstans.

Berths No. 3 & 4: Situated approximately 2,500 ft. from the Pinder's Point shore-line with a platform size of 94 ft.×100 ft.× 12 ft. in depth. Submarine sea lines available are:

1×30 in.	Diameter	Crude Oil Line.	Mothballed
2×24 in.	"	Fuel Oil Lines.	
1×20 in.	"	Diesel Oil Line.	
1×20 in.	"	Kero/Jet Line.	
1×20 in.	"	Naphtha Line.	
2×20 in.	"	Dirty Ballast Lines.	
1×18 in.	"	Bunker Fuel Line.	

These pipelines terminate at 12 in. Chicksan marine loading arms – counter balanced and hydraulically powered.

Berths No. 5 & 6: Situated approximately 3,600 ft, from the Pinder's Point shore-line with a platform size of 100 ft.×144 ft.×12 ft. in depth. Submarine sea lines available are:

Berth No. 5.

2×30 in.	Diameter	Crude Oil Lines.	Mothballed
1×24 in.	"	Fuel Oil Line.	
1×20 in.	"	Diesel Oil Line.	
1×20 in.	"	Kero/Jet Line.	
1×20 in.	"	Dirty Ballast Line.	
1×18 in.	"	Bunker Fuel Line.	

Berth No. 6.

2×30 in.	"	Crude Oil Lines.
1×24 in.	"	Fuel Oil Line.
1×20 in.	"	Dirty Ballast Line.
1×18 in.	"	Bunker Fuel Line.

These pipelines terminate at 16 in. Chicksan marine loading arms of the same design as on Berths No. 3 & 4.

Berths No. 7 & 8: This platform was completed and handed over in 1973. Situated approximately 2,500 ft. from the Pinder's Point shoreline with a platform size of 110 ft.×90 ft.×12 ft. in depth.

Submarine sea lines available are:

2×24 in.	Diameter	Fuel Oil Lines.
1×20 in.	"	Diesel Oil Line.
1×20 in.	"	Kero/Jet Line.
1×20 in.	"	Naphtha Line.
1×20 in.	"	Dirty Ballast Line.
1×18 in.	"	Bunker Fuel Line.

There is no crude oil facility available at this berth. Crude oils will be handled by Berths No. 6, 9 & 10 under normal conditions.

The above listed pipelines terminate at 12 in. Chicksan marine loading arms, again similar in construction to the berths mentioned previously. 6 arms service each berth of which 2 are bunker lines and the remaining 4 for product loading.

Berths No. 9 & 10: This platform, the most recent addition to the marine loading facilities at Borco was completed and handed over in 1974.

Situated approximately 3,600 ft. from the Pinder's Point shore-line with a platform size of 190 ft.×125 ft. (No below deck space) this facility is of a rather different design to the other loading platforms namely:

The platform is of a completely open design with major operating equipment sited on the top surface. Ancillary equipment such as slop and storm water systems are situated below the platform. Because of its design, equipment is more readily available and build up of hydrocarbon vapours is eliminated.

Other features incorporated within the platform design are:
1. Weather recording station.
2. Meter (bunker) proving systems – electronically controlled.
3. Berthing approach system for Berth No. 10 which is used by the Pilots as an aid in safety moving vessels on or off the berth.

Submarine sea lines available are:

1×20 in.	Diameter	Bunker Fuel Line.
1×24 in.	"	Fuel Oil Line.
1×20 in.	"	Ballast Water Line.
1×42 in.	"	Crude Oil Line.
1×30 in.	"	Crude Oil Line.

As can be readily seen this platform is a crude oil/fuel oil loading/discharging facility only, white oil products are not available. The above stated lines terminate at 10 Chicksan marine loading arms, again similar in construction to those on other platforms. The service per berth as below:

Berth No. 9.

1×12 in.	Diameter	Bunker Fuel.
1×12 in.	"	Ballast.
1×12 in.	"	Fuel Oil.
2×12 in.	"	Crude Oil.

Berth No. 10.

1×16 in.	Diameter	Bunker Fuel.
1×16 in.	"	Ballast.
1×16 in.	"	Fuel Oil.
2×16 in.	"	Crude Oil.

Also see "Shipmaster's Report".

BALLAST: Facilities are provided for discharge of dirty ballast at the tanker jetties. Each jetty is connected by a 20 in. ballast pipe-line. These lines have been tested to 350 lb. pressure and are designed for 150 lb. working pressure.

DENSITY: Salt water. Rise and fall of tide between 3 ft. and 3 ft. 6 in.

FRESH WATER: Fresh water available by pipe-line in the harbour. Average pumping rate 18 t.p.h. per connection with maximum 2 connections in the harbour. Fresh water also supplied by barge to the tanker berths at the rate of about 30 t.p.h. and to vessels at anchorage.

FUEL: All grades available. 24 hours notice desirable. Bunkering facilities are provided at each tanker jetty. 1×16 in. pipe-line provides "C" fuel and intermediate fuel, and 1×16 in. pipe-line provides marine diesel and gas oils. Fuel also available to vessels at anchor by barge.

CONSULS: No Consuls in Freeport.

REPAIRS: Only minor repairs.

SURVEYORS: 1. Caleb Brett (Bahamas) Ltd., 1st Floor Administration Building, Freeport Harbour, P.O.Box F-2428, Freeport, Bahamas. Tel: (809) 352-7608. Telex: (297) 30029. Cables: Brettcalcabhm.

2. E. W. Saybolt & Co., S.A., 24C Kipling Building, P.O.Box 2049, Freeport, Bahamas. Tel: (809) 352-7616. Telex: (297) 30042. Cables: Saycosa. Additional offices South Riding Point, Grand Bahama, Harbour Area, Freeport.

3. Epic Petroleum Inspection Co. Ltd., P.O.Box F-2525, 25 Churchill Building, Freeport, Bahamas. Tel: (809) 352-2525, 352-4139, 373-4840. Telex: 30051.

GANGWAY/DECK WATCHMEN: Not necessary as security guards patrol port area 24 hours a day.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: Derat Certificate required.

CUSTOMS ALLOWANCES: 50 cigars or 200 cigarettes or 1 lb. tobacco and 1 quart of spirits per man.

CARGO GEAR: Currently no cranes based permanently in harbour area. However, mobile cranes can usually be made available, although essential shipowners consult Agents before accepting heavy lifts requiring shore facilities for discharge

REPATRIATION: Facilities for crew changes and repatriation by air.

AIRPORT: Approximately 5.5 miles from harbour, served by following airlines: Bahamas Air, T.W.A. and Air Canada.

TIME: GMT minus 5 hours. Summertime, from April to October, GMT minus 4 hours.

HOLIDAYS: No normal business activity in the port on following days: New Year's Day; Good Friday; Easter Sunday; Christmas Day; Labour Day (1st Friday in June); Whit Monday; Independence Day (July 10th); Boxing Day (December 26th); Emancipation Day (1st Monday in August); Discovery Day (October 12th). Work ceases 1700 hrs. on day preceding above holidays and commences 0800 hrs. on day after.

POLICE/AMBULANCE/FIRE: Police Tel: 352-8333. Police Station at Passenger Terminal (Deck No. 1) and another approximately 2 miles from harbour, and operates several radio-controlled vehicles. Ambulance Tel: 352-6735. Ambulance based at Rand Memorial Hospital which approximately 7 miles from harbour. Fire Tel: 352-8888. Fire Station approximately 7 miles from harbour and at present consists of 2 fire-trucks with auxiliary vehicles.
TELEPHONES: Can be placed on board at certain berths. There is a connecting charge.
SHIP SUPPLY SERVICE: Lucaya Shipping and Trading Co. Ltd., P.O.Box F-3240, Freeport, Grand Bahama, Bahamas. Tel: (809) 352-3581. Cables: Caytrade. Telex: 30 711.

Services may be performed by launch or tug boat 2.5 to 3 miles off the port; at a berth in the harbour or at anchorage.
IDENTIFICATION CARDS: Port personnel and agents wear I.D. cards issued by Freeport Harbour Co.
GARBAGE DISPOSAL: Collection service available 0900 hrs. – 1700 hrs. Drums or skips can be provided as requested alongside. Contact: Sanitation Services on (809) 352-9721.
WASTE OIL DISPOSAL: Shore tanks, barges and tanker trucks are available through Sanitation Services. Tel: 352-9721.
SEAMAN'S CLUBS: There are no Seamans Clubs available. Freeport is a total community. There are churches, synagogue, major banks and an interesting and varies social life. International telephone calls can be made using state of the art equipment. Sporting events can be arranged and transportation is by bus or taxi.
CURRENCY: Bahamian Dollar is on a par with the U.S. Dollar and is freely exchanged with the U.S. currency.

SHIPMASTER'S REPORT: December 1984 (updated 1990).
Pilotage: Pilot boards from pilot boat.
Radio: With 5 Day Message Receivers require the following:
Name of vessel and call sign.
Deepest arrival draft.
Gross bbls. at observed temperature on arrival (estimated).
Average temperature in °F on arrival (estimated).
Expected discharge rate in bbls/hr. assuming unrestricted by shore facilities.
Maximum freeboard 55 ft.
No. and size of cargo manifolds.
No. of hours required to ballast.
Ship's loaded gross bbls. at 60°F less retained slops.
Ship's slop quantity on arrival load port indicating oil and water in bbls.
Indicate if Loading On Top (L.O.T.).
Which slop tank.
Indicate ship experience factor for last 5 cargoes excluding initial voyage after dry dock.
Was Letter of Protest noted, if so give brief details.
VHF: Channel 13 for working Pilots.
Tugs: Usually 2 tugs, 1 of which will put up 2 headlines and 2 quarter lines, the other just 2 headlines. Depends on weather conditions as to which tug is forward and which aft.

AUTHORITY: Freeport Harbour Company, Ltd., P.O.Box F-42465, Freeport, Grand Bahama. *Tel:* (809) 352-9651/4 or (809) 352-9088. *FAX:* (809) 352-6888. *Cables:* Freharco. *Contact:* Captain Michael O'Brien, Port Director. E. Charles Rolle, Harbour Master.

MORTON: 21.03 N. 73.39 W. (See Plan)

SHIPMASTER'S REPORT: June 1996.

LOCATION: The berth (Morton Salt Loading Facility) is located in Man of War Bay on Grand Inagua Island.
DOCUMENTS:
3 copies Crew List.
3 copies Ship's Stores Declaration.
3 copies Crews Declaration.
Clearance from Last Port.
PILOTAGE: Compulsory. Pilot boards 1 mile off berth.
ANCHORAGE: Not available for large vessels.
VHF: Channels 16, 12, 13 and 14 for Pilot and Agent.
TUGS: Pilot boat or other small craft used.
BERTHING: Port anchor with 2 shackles in water (See "Plan"). Four ropes are sent to dolphins. Bottom is soft coral. Depth 40 ft. – 42 ft. Length of the berth 630 ft. Anchor remains in water with about 6-8 shackles to assist with departure.
CARGO FACILITIES: Belt conveyor fixed on the centre of berth. Rate of loading 700 tonnes per hour. Normal working time, with short intervals for meals while the ship is alongside the berth.

No draft surveyor available. Quantity of cargo counted by the number of trucks. There are no scales on the salt terminal.
FRESH WATER: Not available.
TIME: GMT minus 5 hours. Daylight saving time GMT minus 4 hours.
SHORE LEAVE: No limitations. Nearest village is 7 miles from berth.
CURRENCY: Bahamian Dollar and U.S.Dollar.
GENERAL: *Stores:* Local provisions available for cash.

NASSAU: 25.05 N. 77.20 W. (See Plan)

DOCUMENTS:
(a) Inwards:

Description	*Customs*	*Immigration*	*Agents*	*Total*
1. Ship's Report Inwards (supplied by Agents)	2	—	—	2
2. Maritime Declaration of Health (supplied by Agents)	1	—	—	1
3. In transit Passenger Manifest	2	1	2	5
4. Disembarking passenger manifest	2	1	2	5
5. Crew Lists	2	—	1	3
6. Crew Curio List	1	—	—	1
7. Stores List	2	—	1	3
8. Gift Shop Inventory	1	—	—	1
9. Cargo Manifest	3	—	3	6

10. Derat. Certificate – should be available for inspection.
11. Clearance from last port to be given to Customs.
12. Immigration landing cards must be completed by all passengers. (These are supplied by Agents.)
13. Customs Declaration forms must be completed by all disembarking passengers. (These are supplied by Agents.)
14. Cargo Tally books – two per hatch where Nassau cargo is to be discharged.

If vessel's previous port of call was in Bahamas items 1, 2 and 10 need not be complied with. Item 9 – two cargo manifests supplied to Agents should show freight charges in detail.
Note: All non-Bahamian passengers finally disembarking at Nassau must be in possession of return ticket or have proper Bahamas Immigration Entry Permit.

(b) Outwards:

Description	*Customs*	*Immigration*	*Agents*	*Total*
1. Ship's Report Outwards (supplied by Agents)	2	—	—	2
2. List of embarking passengers	2	1	2	5
3. Manifest covering cargo loaded	3	—	3	6

Note: If vessel clearing for another Bahamian port, item 1 does not have to be complied with, but copy of next port's manifest required.
PILOTAGE: Presently no signal station and Masters requested telegraph ETA at least 48 hours in advance with subsequent amendments as necessary to Agents, who will inform Pilots. Pilot normally boards in approximate position one mile North of Western end of Hog Island (Paradise Island). When port closed due to bad weather a red flag will be displayed at Western end of Hog Island by day and red light in same location at night. Vessels may anchor in vicinity of Pilot Station where depth of water allows. There are three Pilots and boats are clearly marked "Pilot" and display international pilotage signals. Pilots are accustomed to boarding by pilot ladder. Pilots on VHF Channels 16 and 14. Pilots may be contacted by Tel: (809) 322-7982/3 or Fax: (809) 322-7984.
ANCHORAGES: Anchorage just off Nassau Harbour extends over area North and East of Western point of Hog Island to approximately half a mile off shore, where it becomes too deep.
RESTRICTIONS: No restrictions apart from adverse weather conditions or excessive draft which may make it advisable to enter on certain state of tide.
MAX. SIZE: No restriction on length or breadth but safe draft is considered 35 ft. Largest vessel to enter harbour to date is QE II. Safe draft cargo pier 25 ft.
HEALTH: Provided vessel healthy Customs grant Free Pratique on receipt International Declaration of Health form completed and signed. If any suspected disease or fever on board Master should advise Agent by cable, who will inform appropriate authorities and advise Master clearance procedure. Once vessel obtained Free Pratique in one Bahamas Port and proceeds another there are no further procedures at next port.
RADIO: Communications can be directed through Nassau Harbour Control, which came into existence in 1974, in an effort to control shipping and movements in and out of the harbour of Nassau.

VHF frequencies used are Channels 6, 9, 14, 16, 12, 68, 73, 74, 79, 20, 65 and 66.

Single Side Band frequencies used are 2082.5 – 2182 kHz. Also transmits 2522 kHz, receive 2126 kHz upper sideband.

AM Radio Ship-to-Shore frequencies are 2182 kHz.
TUGS: 4 tugs, 2,180 h.p. – 4,620 h.p. Tugs normally join vessel at entrance to turning basin. Usual for vessels to provide tow line.
BERTHING: No specific requirements but due to congestion essential that Agent is kept well informed of ETA.

Depths at the 12 cruise ship berths range from 30 ft. – 40 ft. (9.15 m. – 12.20 m.).
CRANES: There are 2 lift cranes for Container Handling at the Union and John Alfred Wharves. Both wharves are geared exclusively for container traffic, but a limited amount of break bulk cargo is handled at the Union Wharf.

At the Union Wharf is an "American" Truck Crane of 120 ton capacity geared to handle 20 ft. and 40 ft. containers with a 100 ft. boom used in Lo/Lo method.

The John Alfred Wharf is served by a Manitowac Track/Crawler crane of 130 ton capacity with a 150 ft. boom. Here 20 ft. and 40 ft. containers are landed by Lo/Lo method. Also available 135 ton mobile crane.

The Union Wharf encompasses a total berth length of 546 ft., while at the John Alfred Wharf berth length is limited to 500 ft.
BULK CARGO FACILITIES: There are no facilities for bulk cargo.

BRIDGES: No bridges affecting entrance to main berths.
STEVEDORES: Master should include in ETA number gangs required and tons per hatch for discharge, as shipping documents do not always arrive in advance. Discharge rate approximately 10 t.p.h.
MEDICAL: Full medical services available. In serious cases requiring immediate attention Agent should be advised so that doctor may board on arrival.
TANKERS: Limited facilities provided for tankers at Clifton Point on S.W. side of Island. Vessels moor to dolphins offshore and discharge through submarine pipeline. Vessels proceeding Clifton Point (unless otherwise advised) should pick up Pilot off Nassau and clear Customs. Only oil imports are for domestic purposes and there is no oil refinery. Max. draft Clifton Point 36 ft.
Tugs: 2 tugs of about 2,000 h.p. each are used to assist in berthing. Usually 1 tug assists when leaving.
Cautionary Advice: In the past few years several Caribbean berths/fendering systems were damaged during berthing operations, the absence of towing line, between tanker and tug(s) being a contributory cause. It is recommended that the Master discuss berthing practices with the Pilot before the approach and insist that a towing line be passed.
Berthing: The vessel is moored port side to the pier. The starboard anchor is used at times. This procedure is sometimes reversed. Mooring is usually carried out during daylight hours, but vessels unmoor and sail at all hours. A boat takes the headlines to the buoy first, then the forward and aft breastlines, the springlines to the platform last. Six ropes forward, the same number aft. The boat remains in attendance at the pier to transport personnel and crewmen, during the discharge.
Hoses and Boom: One or more 8 in. diameter hoses are used for clean products. Two or more grades can be pumped simultaneously.

The platform is fitted with oil cargo pipelines as follows:
1 LPG line, owned by Tropigas/Taylor, 6 in.
1 distilled products line, Texaco, 8 in.
1 diesel oil line, Bahamas Electric Co., 12 in.
1 jet fuel/diesel oil line, Esso, also Shell, 12 in.
1 Avgas/Mogas line, Shell, also Esso, 8 in.
1 fuel oil line, Bahamas Electric Co., 10 in.

Tankers carrying more than one grade to Clifton Point should lay out the cargoes in such a way that two or more grades can be discharged simultaneously.

1×10 in. diameter hose is used for dirty products. Maximum pressure allowed on the hoses is 125 p.s.i.

Vessel's cargo boom is required for lifting cargo hoses.

On completion of discharge, vessel's Butterworth or fire hose is connected to special hydrants on the cargo pipelines, to flush back the cargo hoses to the vessel's slop tanks.
DENSITY: 1025.
FRESH WATER: Available Prince George Wharf on old section but not yet provided on new deep water pier. Rate 10 – 15 t.p.h. from hose connections on dock. Public Water Department supplies hose end connections. Price approximately $9.55 per 1,000 gals. depending on amount required. No water barges available.
FUEL: No fuelling facilities available with exception of small quantities diesel which may be delivered by Tanker Truck (4,000 gals.) by prior arrangement.

Small tankers can deliver fuel (80,000 – 100,000 gals.).
FIRE PRECAUTIONS: No special requirements. Vessels carrying explosives should notify Agent in advance so that Authorities may be advised.
CONSULS:

Country	*Status*	*Location*	*Telephones*	
			Office	*Home*
Austria	Honorary Consul	Nassau	74258	74258
Belgium	Honorary Consul	Nassau	32371	74233

Switzerland	Honorary Consul	Nassau	28349	

REPAIRS: Only limited repairs and requirements should be passed to Agent in advance of vessels arrival.
GANGWAY/DECK WATCHMEN: Vessel to supply own watchman if required.
OPENING/CLOSING HATCHES: Roller hatches usually opened and closed by vessel's crew but older wooden hatches and tarpaulins handled by stevedores.
CERTIFICATES: Only certificate normally required for inspection is Derat Certificate.
CUSTOMS ALLOWANCES: Quantity should be reasonably based on individual requirement and length of stay in port. Actual amount is at discretion of Customs Officer clearing vessel.
REPATRIATION: Crew changes can be arranged but accommodation expensive and not always available at short notice.
AIRPORT: Extremely good air services. At certain periods airlines become fully booked and suggested that reservations be made in advance.
TIME: Local time (Eastern Standard Time) 5 hours behind GMT. Daylight Saving Time 4 hours behind GMT applicable 27th April to 26th October.
HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; Whit Monday; Independence Day; Labour Day; Emancipation Day; Discovery Day (12th October); Christmas Day (25th December); Boxing Day (26th December); Cargo can be worked on all holidays except Labour Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Police 24444; Ambulance 22221; Fire 919.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Most specialised services unavailable, e.g. radar, radio, gyro, tank cleaning, compass adjusting. If Agent given sufficient notice arrangements can be made for technicians to be flown from Miami.
SHORE LEAVE: No limitations.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: A collection service is available, size ranges in cubic yards (containers) and are provided alongside. Garbage pick-up is $70.00 for first collection and $50.00 for any additional collections. Collection time is usually early morning to late afternoon.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Bahamian Dollar. There is no local currency restrictions placed upon seafarers. The U.S. dollar is exchanged dollar for dollar on the local market.
GENERAL: *(a)* Bonded Stores only available to passenger vessels regularly calling Nassau. *(b)* Passenger Vessels: Is of assistance to Agent to know how many passengers disembarking and how many in transit.
AUTHORITY: Port Authority of Nassau, P.O.Box N-8175, Nassau, Bahamas. *Tel:* (809) 322-8832, 326-5677. *Telex:* 20590 Bahport. *FAX:* (809) 322-5545. *Cables:* Port Department, Nassau, Bahamas. *Contact:* Harvey A. Sweeting, Port Controller.

SOUTH RIDING POINT: 26.37 N. 78.14 W. (See Plan)

LOCATION: The terminal is situated at South Riding Point on the South coast of Grand Bahama Island, about 35 miles East of Freeport.

At a distance of 4,000 ft. offshore, the Sea Island Mooring Dolphin extremities are positioned thus:
No. 1 Mooring Dolphin: Lat. 26° 36′ 43.7″ N., Long. 78° 13′ 49.5″ W.
No. 6 Mooring Dolphin: Lat. 26° 36′ 46.7″ N., Long. 78° 13′ 33.6″ W.
BAHAMIAN FLAG: Bahamian national flag shall be flown during daylight hours by all vessels within Bahamian territorial waters.
DOCUMENTS: Incoming:
Prepared by Ship:
5 Crew Lists.
3 Stores Lists.
3 Crew Declaration forms (Signed by all on board).
4 Copies of Bills of Lading.
3 Cargo Manifests.

In addition the ship will have to supply a clearance from last port of call, Derat Certificate, vaccination lists and the usual ships papers viz: Register, Safety Construction, Radio, Safety Equipment, Load Line Certificate. Oil Record Book must be up to date and available for inspection.

All vessels must have a valid certificate of insurance or other financial security in respect of civil liability for pollution damage.
Prepared by Agent:
1 Copy of Maritime Declaration of Health.
2 Copies of Inwards Report.
Customs and Immigration: After pratique has been granted, an immigration and customs inspection is carried out. The Master will be required to furnish particulars including:
(a) Name and nationality of vessel.
(b) Last port or ports of call.
(c) Nature of cargo.
(d) Number of crew.
(e) Port of destination and name of Agent.
(f) Number of days since departure from last loading/unloading port.

Copies of the Crew List and stores remaining on board will be required before clearance is granted.

Masters of vessels must take every precaution to ensure that no drugs, wine or alcoholic liquors are supplied, sold or conveyed to any person at the terminal.
Outgoing:
Prepared by Agent:
4 Copies of Outward Cargo Manifest.
2 Copies of Outwards Report.
Port Clearance Certificate.

In order to comply with Immigration regulations, crews should be checked before sailing and any missing seaman reported to the Agent. In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation.

Documentation and Clearance:

Documentation on completion of cargo operations is normally attended to prior to the vessel vacating the berth. In cases where excessive documentation is anticipated a vessel may be asked to leave the berth to complete this standing off. In such cases launches would be made available to transport documents and personnel in order to expedite the vessel's departure.

APPROACHES: Vessels approaching South Riding Point from the Eastern entrance of Northwest Providence Channel are recommended to make departure from Great Stirrup Cay Lighthouse Gp. Fl. (4) 15 sec. 14m. and head directly for South Riding Point Terminal.

Preliminary extensive soundings by U.S. Hydrographic Department indicate no underwater obstructions up to 100 fathom line within Northwest Providence Channel.

An observation airship/balloon is sited just North of the Terminal in position: Lat. 26° 38′ 00″ N., Long. 78° 14′ 22″ W.

It is clearly visible from seaward, painted white and at night a bright Qk. Fl. strobe light marks position. When in use it rises to a distance of 10,000 ft. above the ground.

A conspicuous parabolic dish antenna is situated in position: Lat. 26° 37′ 30″ N., Long. 78° 17′ 58″ W. The antenna has a face diameter of 85 ft. and maximum height above sea level is 134 ft.

The large buff-painted oil storage tanks are visible behind the sea island. The terminal frontage is backed with pine trees and scrub.

Lights: A light, Fl.R. 3 seconds, is exhibited from a height of 140 ft. above sea level on top of the sea island control building on the central platform, whilst Nos. 1 and 6 mooring dolphins are marked by quick flashing red lights.

Two leading line (range) towers mark the 300 ft. wide approach channel centre line. Lights with clear lenses, each 2.5 seconds flash, 0.5 seconds eclipse, are exhibited from the top of the towers at elevations of 39.4 ft. and 53 ft. The towers are located at Lat. 26° 37′ 21.7″ N., Long. 78° 13′ 10.2″ W., and Lat. 26° 37′ 22.8″ N., Long. 78° 13′ 11.5″ W. respectively. Daymarks are attached as follows:

Leading mark: A 9 ft. triangle at the base of the tower.

Rear mark: A 9 ft. × 6 ft. diamond immediately below the light.

Both marks are painted with 'dayglo' orange.

Buoys: Red and Black Buoys mark the outer channel entrance to the inner harbour whose light characteristics of red and green respectively are each 2.0 seconds flash, 2.0 seconds eclipse.

Three white buoys with white lights mark the 50 ft. contour.

PILOTAGE: Berthing and operational instructions will be given by South Riding Point Control on vessel's arrival at South Riding Point.

A vessel will be deemed to have arrived when in a position, 3 miles South of the sea island and in this position the Berthing Master will board from a tug.

Before a vessel is allowed to proceed the Master will be required to sign the following forms:

(a) Conditions of use of sea berths and inner harbour at South Riding Point (See "Appendix I").

(b) Tug Requisition (See "Appendix II"). The Master will also be provided with copies of the Fire and Safety Regulations (See "Appendix IIIA and IIIB") and a Ship/Shore Safety Check List Form (See "Appendix IVA and IVB").

ANCHORAGES: Anchorage or the lowering of anchors is prohibited at the Sea Island berths.

HEALTH: On completion of mooring, Customs officials acting on behalf of Health and Immigration authorities will board the vessel to grant Pratique.

RADIO: Vessels loading for South Riding Point should communicate ETA date to the terminal immediately after clearing loading port.

Variations of this original ETA date should be communicated throughout the voyage.

Vessels proceeding to South Riding Point Terminal to load should communicate their ETA immediately upon clearing departure port.

All vessels should upgrade ETA's 72, 48 & 24 hours prior to arrival and should transmit the information laid out in "Appendix VII" at least 36 hours prior to arrival.

VHF: Station "South Riding Point Shore Control" located at the terminal is equipped with VHF radio maintaining continuous watch on Channel 16. After making successful contact, vessels will be required to change to a working frequency, where information will be exchanged regarding berthing, manifold connections, quantity of ballast and deballasting time required.

The terminal is also equipped with approved intrinsically safe VHF walkie-talkie radio sets and vessels will have this additional communication with the terminal after boarding by the Berthing Master.

TUGS: 2 × 4,200 h.p. diesel tugs are stationed at the terminal. Each tug has a bollard pull of 50 tons. Additional tugs are available to handle large size vessels.

All tugs are equipped for fire fighting and can deliver water at the rate of 2,000 gallons per minute through direct or fan spray nozzles. The tugs have foam making and oil dispersant equipment.

Conditions of hire are given in Appendix II.

Small Craft: The terminal has one diesel engined personnel/general purpose carrier for up to 25 persons. Launches are available for hire when operationally convenient.

Small Craft Landing: A landing is situated on the West side of the platform of the oil berths and there are additional landing stages at mooring dolphins Nos. 1 and 6.

BERTHING/UNBERTHING: *Responsibilities:* In all circumstances, the Master of any vessel shall remain solely responsible on behalf of his owners, for the safety and navigation of his vessel.

Tugs: Tank lids and openings should be securely closed before tugs are made fast. Tug utilisation in berthing operations will be as required by the Berthing Master who will meet the vessel in position as directed off the sea island. Masters of calling vessels are reminded of their obligation to comply with statutory pilot ladder rules and associated safe access regulations

Mooring System: The Berthing Master will advise the Ship's Master of minimum mooring requirements. Usual moorings consist of 2 springs, 3 breast and 4 head/stern lines at each end.

The berths have double and triple quick release hooks of 150 and 100 tons capacity. Mooring and berthing dolphins have electrically operated capstans with 2 ton line pull at 100 ft. per minute in association with mooring assemblies. Messengers are provided on all mooring dolphins.

Ship Connection: The positioning of the vessel's deck manifold in relation to the loading arms on the berth must be carried out to a close tolerance to the requirements of terminal personnel and as directed by the Berthing Master.

Loading arm connection will be made to ship's manifold by the sea island crew with assistance from ship's personnel.

Independent oil measurement representatives will attend for ullaging and sampling and/or inspection of cargo tanks in vessels discharging or loading.

Unberthing: Tug attendance and numbers will be dependent on weather conditions and on the advice of the Berthing Master.

BERTHING FACILITIES: The Sea Island has two berths interconnected for tanker to tanker transfer and to the shore tanks and inshore berths by 2×36 in. diameter submarine lines. One line for ballast/slops and another for crude.

The island is 1,470 ft. long with a central platform 48 ft. above datum and 3 mooring dolphins 25 ft. above datum on each side.

There are 4 fixed and 4 oscillating foam/oil dispersant monitor units on the platform.

The berths have a sacrificial anode cathodic protection system and ships that have an impressed voltage cathodic protection system should turn it off in the vicinity of the sea island.

Berth No. 1: Tankers of 50,000 to 500,000 d.w.t. can dock at this outer berth which is equipped with a self levelling and articulated gangway and 4×16 in. diameter Chicksan loading arms with quick release couplings.

Water depth at the berth is 100 ft.

Berth No. 2: Tankers of 35,000 to 100,000 d.w.t. with a max. LOA of 900 ft. can dock at this inner berth which is equipped with a self levelling and articulated gangway and 4×12 in. diameter loading arms with quick release couplings.

Water depth at the berth is 85 ft.

Small Boat Harbour: This harbour is at the S.W. corner of the inner harbour and has a water depth of 25 ft. The harbour is used by the Company's tugs and small craft.

LOADING/UNLOADING: Cargo transfer operations are carried out on VHF Channel 74.

Procedure: Once the vessel is secure, the Berthing Master, who also acts as Loading Master, will advise the Master and Chief Officer of their cargo programme and discuss the vessel's ability to comply. Any adjustments will be mutually agreed at this stage and be reflected on the Loading/Discharging instructions which the Master will sign.

Ballast Water: Ballast water can be received in the terminal oil and water separation tanks through one of the submarine or onshore lines at rates of up to 5,000 t.p.h. On no account may ballast water be otherwise discharged in territorial waters, unless vessel has segregated ballast system. A charge is levied on all slops and ballast received ashore.

Dirty ballast and slops from ships' cargo tanks which, on the previous voyage, carried product including fuel oils or any crude requiring heat, cannot be accepted ashore. In such cases, vessels must arrive with clean ballast for shore reception.

During ballast operations at the berths, strict observance of rules and regulations governing the opening of sea valves is necessary and in correct sequence with ballast pump commencement to eliminate the risk of oil spills. Vessels may be required to ballast concurrent with discharge and throughout all cargo operations, maintain draft and trim conditions consistent with prevailing weather conditions, on the advice of Berthing Master.

Control: A responsible Ship's Officer is required to be on duty continuously.

The Terminal Operators in the control buildings offshore and onshore continuously monitor the cargo transfer rates and status of the onshore tanks or shuttle tankers receiving cargoes direct from VLCC's. The Ship's Officer will be advised immediately of changes necessary in the pumping programme.

The Terminal Operator in the offshore control room will activate all cargo movements from the tanker's manifold to or from shore tanks/receiving shuttle tankers.

Mooring Lines: It is the responsibilty of the Ship's Master to ensure that all mooring lines are kept tight. Berthing Master will constantly check a vessel's moorings and may at any time direct lines to be adjusted as circumstances warrant.

Tension Winches: When a vessel is fitted with tension winches, the latter must be set to manual operation and the brakes securely applied.

MEDICAL: The Rand Memorial Hospital in Freeport is open on a 24-hour emergency service and two medical clinics, Lucayan and Antoni are open during regular office hours.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Facilities for minor repairs to electrical, radio and mechanical equipment are available in Freeport but should these be required Masters should give as much advance notice by radio as possible.

SURVEYORS: Saybolt, Caleb Brett, Charles Martin, Redwood and Epic represented on Grand Bahama.

Lloyd's have agency in Freeport. Classification and Salvage Association Surveyors available from Florida.

TIME: Bahamian Standard Time is 5 hours behind GMT. Daylight Saving Time is observed from the end of April through the end of October when clocks are advanced one hour.

EMERGENCY CO-ORDINATION CENTRE: Bahamas Air Sea Rescue Association, Freeport. Telephone Nos.: Base Station 809 373-2264, Mobile Radio Telephone 809 352-9889, Daytime 0800 – 1700 hrs. 809 352-8826.

TELEPHONES: The Sea Berths have a telephone connection to the shore and to the Freeport exchange. Calls are restricted to emergency use only. All other calls should be made from agency offices ashore.

STORES: Stores are not available at the terminal but may be obtained through the auspices of ships' agencies and chandlers. All deliveries to vessels are restricted to daylight hours and operational convenience. Transportation and handling must be arranged and attended by the vessel's Agent and it is imperative that advance terminal approval is obtained since responsibility cannot be accepted for custody should operational considerations cause delivery delays.

BANKS: Chase Manhattan, Mall and Pioneer Way, P.O.Box F-2432, Freeport, Grand Bahama.

Citibank N.A., on the Mall, P.O.Box F-2681, Freeport, Grand Bahama.

Barclays International, Mall & Pioneers Way, P.O.Box F-2404, Freeport, Grand Bahama.

Royal Bank of Canada, Bank of Nova Scotia, Canadian Imperial Bank of Commerce, Bank of Montreal.

STORING: See "Prelims".

(i) Storing at Terminal discretion. Terminal launches normally employed.

(ii) Storing permitted during cargo transfer using stern lifting devices only.

(v) Usual Customs regulations.

(vi) Labour usually supplied by chandler.

LAUNDRY: Limited services are available in Freeport but in view of the distance from the terminal (35 miles) and the relatively short time at berths, Masters are advised not to depend on such services.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

Terminal is 35 miles from town. Facilities in town include churches, shops and post office. Present taxi fare is U.S.$65.00 each way.

CURRENCY: Bahamian Dollar is equal to U.S.Dollar. Notes and coins are interchangeable. U.S.Dollars are universally accepted.

WEATHER: From November to May, average temperatures in the 70's Fahrenheit prevail, with low humidity and little rain. From June to October, average temperatures rise into the 80's with relatively high humidity and rainfall of between 5 in. and 9 in. per month.

SEA CONDITIONS: Prevailing winds are from the S.E. During the Winter season numerous cold fronts transit the area producing a normally predictable wind veer to S.W. then Northerly with the passage of the front. A strong frontal system may cause seas and swell of up to 10 ft. but these quickly subside following frontal passage.

Current in the vicinity of the Sea Island seldom exceeds 1 knot and runs predominantly East and West. Tidal ranges above datum are Low Water 0 – 0.5 m. and High Water 0.8 – 1.5 m.

SAFETY: *TERMINAL SAFETY REGULATIONS:* With the object of protecting all concerned against the possibility of fire hazards, oil and smoke pollution, vessels calling at South Riding Point Terminal must comply with the following safety regulations or other regulations which may be issued by the proper authorities from time to time.

Dangerous Area: The whole of the sea island and the onshore terminal are declared Dangerous Areas and the use of naked lights and smoking therein is strictly prohibited except in those places expressly designated by the Master of a vessel and the Terminal Manager.

A copy of the "Fire and Safety Regulations" (See "Appendix IIIA and IIIB") is given to the Master of every vessel by the Berthing Master on boarding and it is the responsibility of the Master to see that these regulations are strictly observed.

Inspection: The Berthing Master will conduct a safety inspection prior to the commencement of loading/unloading and at regular intervals thereafter to ensure that all safety regulations are being enforced.

A comprehensive list of safety requirements are detailed on a Ship/Shore Safety Check List (See "Appendix IVB") and must be signed by the Master of the vessel or his delegate and the Berthing Master (The "Check List" is as laid out in I.S.G.O.T.T.).

Galley Fires: Only approved steam or electric galleys in selected locations in the after part of the vessel, as agreed to by the Master and the Berthing Master, are permitted.

Boiler Tubes: Boiler tubes must not be blown whilst vessel is alongside and emitting smoke is strictly prohibited while vessels are in the vicinity of the terminal. Every precaution must be taken to prevent sparks and soot particles escaping from the funnel.

Firewires: Firewires of steel must be made fast and hang over the outboard bow and quarter whilst alongside to enable tugs to connect readily in an emergency situation. Firewires must be tended on board throughout cargo operations in order to maintain towing eyes at water level.

Deck Scuppers: Deck Scuppers must be securely plugged and cemented before loading/discharging operations commence. Approved mechanical means of closing scuppers may be acceptable.

Spillage Trays: See "Oil Pollution – Minor Leakages Onboard".

Main Engine(s): Immobilisation is prohibited whilst alongside a terminal berth. Minor engine repairs may be effected after receipt of written permission from the Berthing Master and providing the repair will not affect the prompt sailing of the vessel in an emergency or upon cargo completion.

Maintenance Work: No chipping, scaling, hot work or work of any kind that would cause a spark is allowed while alongside a berth.

Ventilation: When loading or discharging cargo or ballast, all open ullage pipes and sighting ports shall have installed approved flame arresters.

Stores: Inflammable or explosive ship's stores shall be kept in a safe place securely fastened.

Bilge and Dirty Ballast Water: Disposal of bilge and dirty ballast water over the side is strictly prohibited by the authorities and any pollution of the sea through these mediums will result in heavy claims and fines. The terminal will, in case of an oily discharge, take such steps as may be deemed necessary to fight the pollution before it spreads.

If the discharge is due to faulty equipment or material on the vessel or to negligence on the part of ship's personnel, the terminal shall be indemnified for any expenses incurred in connection with the preventative action taken. (See Oil Pollution – "Oil Spills").

International Code Flag 'B': International Code Flag 'B' shall be flown during the day and a red light exhibited by night by all vessels during cargo or ballast operations.

Transfer Cargo Operations: Transfer cargo operations shall not be started, or if started, shall be discontinued by the Berthing Master or Terminal Control if any of the following conditions prevail:

(a) During severe electrical storms.

(b) If fire breaks out at berth or on vessel.

(c) Should any condition develop which represents a hazard to the vessel or terminal facilities.

Fire-Fighting Equipment: Fire-fighting equipment of vessels alongside must be kept ready for use at all times.

Gas-Freeing: Gas-Freeing of vessels alongside sea island berths will not be permitted.

Earthing and Bonding: All metal on the shore side of an insulating flange should be electrically continuous to the sea island or inshore berths earthing systems and all metal to the seaward side should be electrically continuous to the vessel.

Insulating flanges are fitted on each loading arm.

Small Boats or Craft: Small boats or craft will not be permitted to moor alongside a vessel during cargo or ballast operations, unless special permission has been granted by the Berthing Master.

Permitted Entry: Only persons holding authorized passes will be permitted entry to the terminal or sea island. The terminal reserves the right to refuse admission.

Safety Responsibilities: Nothing in these regulations will relieve Masters of their responsibilities in observing the normal safety, fire prevention and security regulations. The Berthing Master is authorised to advise and request Masters to take additional measures to ensure a higher degree of safety if they find that circumstances warrant such action.

FIRE FIGHTING:

Responsibilities: The Fire and Safety Officer is responsible for all fire fighting operations at the sea island and the onshore terminal.

Fire Alarm: Do not hesitate to raise the alarm in the event of fire however small it may be.

The ship's fire alarm at the terminal will be one or more blasts of the ship's whistle or siren, each blast of not less than 10 secs. duration supplemented by a continuous ringing of the ship's bell and continuous sounding of the general alarm system.

The fire alarm at berths or elsewhere within the terminal or harbour area will be a continuous blast on the sirens sited on the onshore and offshore control buildings.

Action Ship – Fire On Your Ship:

1. Raise alarm.
2. Cease all cargo operations and then close all valves.
3. Fight fire and prevent it spreading.
4. Inform terminal of details.
5. Standby to disconnect loading arms.
6. Bring engines to standby.

Action Ship – Fire On Other Ship: You will be advised of necessary instructions to:

1. Cease all cargo operations and then close all valves.
2. Standby to disconnect loading arms.
3. Bring engines and crew to standby ready to unberth.

Action Shore: The operator in the control room will immediately contact the Fire and Safety Officer by phone or VHF radio. The Fire and Safety Officer will then direct operations.

1. Raise alarm.
2. Cease all cargo operations and then close all valves.
3. Fight fire and prevent fire spreading.
4. Standby to disconnect loading arms.
5. Inform all ships of details.
6. Terminal emergency procedure is immediately effective.

Emergency Situation: During an emergency situation on board a vessel alongside, the Berthing Master will be in charge of organising the preliminary fire-fighting/anti-pollution procedures assisted by the operators in the Control Room and at the berths until the Fire and Safety Officer at the terminal takes over the direction of all fire fighting operations.

The Berthing Master is to make use of all available means at his disposal, such as tugs, launches, terminal equipment and other facilities to assist the vessel and protect lives and terminal facilities.

OIL POLLUTION/ACCIDENTS:

Oil Spills: Oil spills from whatever source must be reported immediately to the Berthing Master or Terminal Control. Cargo movements will be ordered suspended upon such a report or upon observation of pollution by terminal personnel and they shall not resume until the source of leakage is determined and controlled and the pollution dispersed or contained. The terminal maintains adequate anti-pollution equipment to attend to minor spills and this will be mobilised promptly. Clean-up costs in regard to pollution known to be the responsibility of a vessel using the facility will be billed to that vessel. The terminal shall also be indemnified against any fines and claims for damages resulting from such pollution (See "Appendix V"). Vessels discharging oil into Bahamian waters are liable to fines not exceeding $120,000.

Minor Leakage Onboard: Spillage trays or other receptacles should be placed under the flange connection at the vessel's manifold. Oil absorbing material in suitable quantity should be available for immediate use in the event of oil leakage on deck.

Damage to Facilities: If a Master has reason to believe that damage has been caused to berth, other vessels, craft or terminal property by his vessel, he should immediately notify the Berthing Master in writing. (A Typical Accident Form See "Appendix VI").

GENERAL: *Charts:* The best available charts of the area at present are U.S. Defense Mapping Agency Hydrographic Centre N.O. 26326 and British Admiralty No. 390.

Currency: Currency is the Bahamian dollar which is on a par with the U.S. dollar. U.S. dollars are generally acceptable anywhere without changing to local currency.

Garbage: Garbage or refuse disposal overside at berths or in terminal approaches is strictly forbidden.

APPENDICES:

Appendix I:

South Riding Point Holding Ltd.
South Riding Point Oil Terminal, Grand Bahama
Contractual Berthing Conditions

This Agreement is made between SOUTH RIDING POINT HOLDING LTD., its servants and Agents and its Sub-Contractors (hereinafter called "the Terminal") and the Owners and Charterers of the vessel (hereinafter called "the vessel").

In consideration of the Terminal permitting the vessel to berth at and to use the terminal and its facilities or providing to the vessel tug line handling services, ferry services or other ancillary services connected with the use of the terminal by the vessel, the undersigned Master of thefor and on
behalf of the Vessel agrees to the following conditions.

1. The Terminal shall not be liable for any loss or damage suffered by the vessel howsoever arising including negligence on the part of the Terminal in connection with or by reason of the use or intended use of the Terminal by the vessel.

2. The Vessel will indemnify the Terminal in respect of all liability to third parties including costs and any other expenses and interest arising out of claim in connection with or by reason of the use or intended use of the Terminal by the vessel howsoever arising including negligence on the part of the Terminal. The vessel will indemnify the Terminal in respect of any penalties and fines incurred by it in connection with or by reason of the use or intended use of the Terminal by the vessel. The vessel will indemnify each party referred to in this Agreement collectively as "the Terminal" in respect of any liability to any other party referred to as "the Terminal" by reason of the use or intended use of the Terminal by the vessel howsoever arising including negligence on the part of the Terminal.

3. The vessel will indemnify the Terminal in respect of any damage or loss including financial loss suffered by the Terminal in connection with or by reason of the use or intended use of the Terminal by the vessel, howsoever caused including negligence by the Terminal.

4. It is agreed that if the vessel sinks or grounds or otherwise becomes, in the opinion of the Terminal, an obstruction or danger in any part of the port or its approaches the Terminal may in its sole discretion take any steps it deems necessary to remove the obstruction or danger and any expenses of such removal shall be payable by the vessel's Owner or Charterer.

5. The obligations of the vessel hereunder shall be joint and several.

6. The obligations of the vessel hereunder shall be without right of limitation of liability.

7. If any one or more of the provisions or part of this Agreement should at any time for any reason be declared invalid or void or otherwise inoperative by a court of competent jurisdiction, such declaration or decision shall not affect the validity of this Agreement as a whole.

8. This Agreement cannot be varied other than in writing signed by all parties.

9. This Agreement shall be governed by and construed in accordance with English Law and all disputes arising hereunder shall be and hereby are referred to the High Court of Justice in England.

Appendix IIIA:

Safety and Fire Regulations

To be posted in prominent positions on board ship.

The following Fire Regulations and Smoking Restrictions should be brought to the notice of all personnel on board and must be strictly enforced.

SMOKING IS PROHIBITED while alongside berths EXCEPT in the following rooms in the after part of the vessel specified by Master.

Masters and Officers must ensure that these SMOKING RESTRICTIONS are strictly adhered to.

Only approved electric and steam galleys, in selected locations in afterpart of the vessel, agreed to by the Master and the Shore Authorities, are permitted.

CIGARETTE ENDS AND HOT MATERIALS MUST NOT BE THROWN INTO THE WATER AT ANY TIME.

No chipping or scaling is allowed whilst alongside. Overside hull painting is not allowed on jetty side of vessel.

All ship's scuppers on main deck must be plugged and cemented oil tight.

Approved mechanical means of closing scuppers may be accepted.

All vessels moored at these berths must have the eye of a steel hawser paid out to the water's edge and securely made fast on board on the offshore bow and quarter, to be of sufficient strength to enable tugs to take the vessel to a place of safety. Main engines must be available for use at all times whilst alongside the jetty.

Fire hoses on forward and after decks to be rigged and ready for instant use.

It is the responsibility of the Master to ensure that the mooring lines of his vessel are tight at all times.

Alarm in case of fire

1. The ship's fire alarm at the terminal will be one or more blasts of the ship's whistle or siren, each blast of not less than 10 seconds duration supplemented by a continuous ringing of the ship's bell and continuous sounding of the general alarm system.

2. The fire alarm at berths or elsewhere within the terminal or harbour area will be a continuous blast on the sirens sited on the onshore and offshore control buildings.

Overflow or escape of oil into the water

In the event of an overflow and/or escape of oil into the water, loading will be suspended immediately on the vessel concerned. Loading will not be resumed until the area has been cleared of oil and conditions declared safe.

Terminal safety and fire inspections

It is the duty of the Berthing Master to make periodical inspections on board vessels at berth in respect of any breach of the Terminal Safety and Fire Regulations.

Inspectors must be allowed free access on board all vessels at all times for this purpose.

IN ALL CASES OF EMERGENCY CONTACT SOUTH RIDING POINT CONTROL.

Appendix IIIB:

Instructions in case of fire

Ship's fire alarm at terminal

One or more blasts of the ship's whistle or siren each blast of not less than 10 seconds duration supplemented by a continuous ringing of ship's bell and continuous sounding of the general alarm system.

Terminal fire alarm

Continuous long blast on all fire sirens.

Action Ship

Fire on your ship
Raise alarm
Fight fire and prevent fire spreading
Inform terminal of details
Cease all cargo operations and then close all valves
Stand by to disconnect hoses or arms
Bring engines to standby

Fire on other ship at terminal
Cease all cargo operations and then close all valves
Stand by to disconnect hoses or arms
Bring engines to standby and crew to stand by ready to unberth

Action Shore

Fire on terminal
Raise alarm
Cease all cargo operations and then close all valves
Fight fire and prevent fire spreading
If required stand by to disconnect hoses or arms
Inform all ships of details
Terminal Emergency Procedure is immediately effective
In case of fire, terminal will direct movement of vessels.
Do not hesitate to raise the alarm.

Dear Sir,

SOUTH RIDING POINT TRANSSHIPMENT TERMINAL SAFETY REQUIREMENTS

Responsibility for the safe conduct of operations whilst your ship is at this Terminal rests jointly with you, as Master of the ship, and with the responsible Terminal representative. We wish, therefore, before operations start, to seek your full co-operation and understanding on the safety requirements set out in the Ship/Shore Safety Check List, which are based on safe practices widely accepted by the oil and tanker industries.

We expect you and all under your command to adhere strictly to these requirements throughout your stay alongside this Terminal and, for our part, we will ensure that our personnel do likewise and co-operate fully with you in the mutual interest of safe and efficient operations.

Before the start of operations, and from time to time thereafter, for our mutual safety, a member of the Terminal staff, where appropriate together with a responsible officer, will make a routine inspection of your ship to ensure that the questions on the Ship/Shore Safety Check List can be answered in the affirmative. Where corrective action is needed, we will not agree to operations commencing or, should they have been started, will require them to be stopped.

Similarly, if you consider safety is endangered by any action on the part of our staff or by any equipment under our control, you should demand immediate cessation of operations.

There can be no compromise with safety.

Please acknowledge receipt of this letter by countersigning and returning the attached copy.

The Master,
s.s./m.v. ". . . . ."
Dear Sir,

At . . . . hours on . . . . . an oil spill occurred on board your vessel and a quantity of oil escaped into the sea, necessitating cleaning up operations by our personnel and equipment.

In accordance with Terminal Regulations, we hereby hold you responsible for any expenses incurred as a result of the oil spill and subsequent clean-up operation, in addition to fines which may be imposed by the Authorities.

You are requested to furnish the Terminal management with an extract of your "Oil Transfer Log" and a written reason for this incident.

Yours faithfully,

To: Master
s.s./m.v. . . . .

Dear Sir,

During your stay at South Riding Point Terminal, your co-operation is requested with regard to shipboard visitations by Terminal staff.

With the exception of official visits necessary to the satisfactory performance of cargo and safety operations, none of our terminal staff should board your vessel.

We are particularly concerned in cases where food and drink have been unofficially provided by visiting ships and we would respectfully request that you bring to the attention of your crew, the need to disregard any requests of this nature.

We trust that your compliance and understanding will avoid any embarrassment for your vessel whilst alongside and that as a result our operating attentions will be rendered more efficient.

Thank you.

Ship/Shore Safety Check List

Ship's Name

Berth . . . . Port

Date of Arrival . . . . Time of Arrival

Instructions for Completion:
The safety of operations requires that all questions should be answered affirmatively. ☐ If an affirmative answer is not possible, the reason should be given and agreement reached upon appropriate precautions to be taken between the Ship and the Terminal. Where any question is not considered to be applicable, a note to that effect should be inserted in the remarks column.

☐ – The presence of this symbol in the columns 'Ship' and 'Terminal' indicates that checks shall be carried out by the party concerned.

The presence of the letters A and P in the column 'Code' indicates the following:
A – The mentioned procedures and agreements shall be in writing and signed by both parties.
P – In the case of a negative answer, the operation shall not be carried out without the permission of the Port Authority.

	Ship	Terminal	Code	Remarks
1. Is the Ship securely moored ?	☐	☐		
2. Are emergency towing wires correctly positioned ?	☐	☐		
3. Is there safe access between Ship and Shore ?	☐	☐		
4. Is the Ship ready to move under its own power ?	☐	☐	P	
5. Is there an effective deck watch in attendance on board and adequate supervision on the Terminal and on the Ship ?	☐	☐		
6. Is the agreed ship/shore communications system operative ?	☐	☐	A	
7. Have the procedures for cargo, bunker and ballast handling been agreed ?	☐	☐	A	
8. Has the emergency shut-down procedure been agreed ?	☐	☐	A	
9. Are fire hoses and fire-fighting equipment on board and ashore positioned and ready for immediate use ?	☐	☐		
10. Are cargo and bunker hoses/arms in good condition and properly rigged and, where appropriate, certificates checked ?	☐	☐		
11. Are scuppers effectively plugged and drip trays in position, both onboard and ashore ?	☐	☐		
12. Are unused cargo and bunker connections, including the stern discharge line, if fitted, blanked ?	☐	☐		
13. Are sea and overboard discharge valves, when not in use, closed and lashed ?	☐	☐		
14. Are all cargo and bunker tank lids closed ?	☐	☐		
15. Is the agreed tank venting system being used ?	☐	☐	A	
16. Are hand torches of an approved type ?	☐	☐		
17. Are portable VHF/UHF transceivers of an approved type ?	☐	☐		
18. Are the ship's main radio transmitting aerials earthed and radars switched off ?	☐	☐		
19. Are electric cables to portable electrical equipment disconnected from power ?	☐	☐		
20. Are all external doors and ports in the amidships accommodation closed ?	☐	☐		
21. Are all external doors and ports in the after accommodation leading onto or over-looking the tank deck closed ?	☐	☐		
22. Are air conditioning intakes, which may permit the entry of cargo vapours, closed ?	☐	☐		
23. Are window-type air conditioning units disconnected ?	☐	☐		
24. Are smoking requirements being observed ?	☐	☐		
25. Are the requirements for the use of galley and other cooking appliances being observed ?	☐	☐		
26. Are naked light requirements being observed ?	☐	☐		
27. Is there provision for an emergency escape possibility ?	☐	☐		
28. Are sufficient personnel on board and ashore to deal with an emergency ?	☐	☐		
29. Are adequate insulating means in place in the ship/shore connection ?	☐	☐		
30. Have measures been taken to ensure sufficient pump room ventilation ?	☐	☐		

	Ship	Shore
Are tank cleaning operations planned during the ship's stay alongside the shore installation?	Yes/No *	
If so, have the Port Authority and Terminal been informed?	Yes/No *	Yes/No *

* Delete Yes or No as appropriate.

Declaration:

We have decided, where appropriate jointly, the items on this Check List, and have satisfied ourselves that the entries we have made are correct to the best of our knowledge, and arrangements have been made to carry out repetitive checks as necessary.

Bahrain

GENERAL (See Plan)

ANCHORING: It is compulsory for all ships entering Bahrain waters for reasons other than berthing at Mina Sulman, ASRY, Bapco, Alba, or other private jetties to obtain a prior written permission from the Port Director before anchoring in Bahrain waters. All ship's Agents are required to submit to the Harbour Master at the end of each month, a list of all vessels managed by their Agency which entered Bahrain waters.

PORT OPERATIONS SERVICE: The following has been received from the Customs & Ports Affairs, Directorate General of Ports, State of Bahrain. (Harbour Notice 4/84).

The above service is to be established based initially in the radio room of Mina Sulman. All information concerning the movement of vessels within the area under the jurisdiction of the 'Bahrain Ports Authority' will be conducted through the Bahrain Ports Operations and Information Service, hereinafter referred to by its call sign 'Bahrain Port Control'. This service will be manned continuously throughout 24 hours, with a duty Pilot available for advice on request. Close liaison will be maintained between Owners/Agents, Marine Terminals of Bapco, Alba, ASRY and G.I.I.C. and other private wharves within the Mina Sulman area.

Communications: (a) All vessels having gross tonnage of more than 50 g.r.t. and any vessel engaged in towing shall carry fixed or portable VHF radio equipment capable of operating on port operation channel in addition to Channel 16.

(b) A Port Operations VHF radio channel has been introduced, Channel 74 (156.725 MHz). All vessels must monitor this Channel when transiting the port limits or approach channels, or at anchor and communicate with 'Bahrain Port Control' as required.

Reporting Procedures: The Master of the inward bound vessels shall on coming within VHF radio range of 'Bahrain Port Control' give the vessel's ETA at Sitra Beacon, and shall at the same time advise of his vessel's draft and any other information requested, and of any circumstances which may affect the seaworthiness or handling capacity of the vessel. To facilitate keeping track of a vessel's whereabouts, vessels should inform 'Bahrain Port Control' when passing the following seamarks as appropriate:

Deep Draft Channel	*N.E. Approach Channel via Sitra Inwards Buoy*
Bahrain Light Vessel	Sitra Inwards Buoy
No. 3 Beacon	Vidal Buoy
Bahrain Approach Buoy	No. 27 Buoy
No. 14 Buoy	Sitra Beacon
No. 27 Buoy	Mina Sulman Approach Buoy
Sitra Beacon	When berthed or at anchor
Mina Sulman Approach Buoy	
When berthed or anchored	

The Master of an outward bound vessel shall inform 'Bahrain Port Control' within 15 minutes prior to commencing navigation in the area, and again immediately prior to such navigation commencing. During the outward passage he shall report to 'Bahrain Port Control' when passing the above seamarks as appropriate.

The Master of a vessel berthed, moored or anchored within the area of jurisdiction and who wishes to move his vessel to another berth, mooring or anchorage within that area shall request permission from 'Bahrain Port Control' prior to moving and report when finally secured, anchored or moored.

Special Directions: (a) The deep draft channel is primarily for vessels confined by their draft to use it. No vessel inward bound shall proceed beyond No. 3 Beacon without seeking prior approval from 'Bahrain Port Control'. No vessel outward bound shall proceed beyond Bahrain Approach Buoy without seeking prior approval.

(b) The Master of any vessel proposing to anchor should inform 'Bahrain Port Control' of the position it is intended to anchor the vessel. This notice shall be given in sufficient time to enable 'Bahrain Port Control' to give a special direction to the Master to place the vessel in an alternative anchorage if required.

(c) Any vessel engaging in towing, except tugs engaged in berthing/unberthing operations shall inform 'Bahrain Port Control' of the length of tow, speed of tow and anticipated passage. Such vessels must seek approval before commencing such operation within the area of jurisdiction.

Interpretation: In these directions: 'Port Limits' means the area of water enclosed by straight lines drawn from the following positions:

A.	Latitude: 26° 13′ N.	Longitude: 50° 32′ E.
B.	Latitude: 26° 22′ N.	Longitude: 50° 32′ E.
C.	Latitude: 26° 22′ N.	Longitude: 50° 47′ E.
D.	Latitude: 26° 06.7′ N.	Longitude: 50° 47′ E.
E.	Latitude: 26° 06.7′ N.	Longitude: 50° 38′ E.

'Area of jurisdiction' includes the marine terminals of Mina Sulman, Bapco, Alba, ASRY and G.I.I.C. and all other private wharves within the Mina Sulman area, also the deep draft and N.E. approach channels.

Commencement: A full V.T.M.S. "Vessel Traffic Management System" is in force and based in the control tower at Mina Sulman.

MINA SULMAN, including ASRY Dry Dock: 26.12 N. 50.37 E. (See Plan)

DOCUMENTS:

International Declaration of Health.
5 Crew Lists.
Ship's Report (given by Customs on arrival).
Cargo Gear Register (Blue Book).
Agents to submit Cargo Manifest 3 days before vessel's arrival.

Exports to Bahrain: Shipping documents for exports to Bahrain should include a Certificate of Origin bearing the stamp of a Bahrain Embassy or Consulate, where such representation does exist. Alternatively the stamp of any other Arab Embassy or Consulate will be acceptable.

Compliance with the above regulation will help process the clearance of goods without delay.

PILOTAGE: Mina Sulman Pilots board at Sitra Beacon. Pilotage compulsory except for naval vessels and small locally-owned craft whose Masters are familiar with the port and control.

Port equipped with 3 pilot cutters and a number of mooring launches and work boats.

Pilot cutters mostly blue with white-painted wheel-house and cabin accommodation.

ANCHORAGE: Normal anchorage in vicinity of No. 27 Buoy. Approximate position Lat. 26° 10′ N., Long. 50° 47′ E. Sitra Anchorage now restricted anchorage and may only be used by special permission of Port Authorities.

MAX. SIZE: Vessels up to 300 m. may enter port subject to tide. Depth of channel 9.75 m. New berths dredged to 10.9 m. Finger pier, depth 30 ft. (9.1 m.).

HEALTH: Port Health Authorities board vessel on arrival at berth alongside Deep Water Jetty and grant Pratique.

RADIO: Vessels intending call Mina Sulman should advise Agents via Bahrain Radio, call sign A9M, their ETA, draft, hatch distribution and any other requirements, giving as much notice as possible. Agent to give Coastguard 72 hours notice of ETA.

VHF: Vessels equipped with VHF should, when within range, contact Bahrain Port Control on Channels 16 or 74. VTM System in operation. Also see "General" before first port.

TUGS: 3 tugs available, 1×3,620 h.p. (42 tons BP), 1×1,600 h.p. (28 tons BP) and 1×1,600 h.p. (25 tons BP). Tugs usually join vessel between Channel Buoy Nos. 7 and 8 or 9 and 12 during final approach to Deep Water Jetty. Tugs fitted with VHF.

BERTHING: Finger pier 800 m. long, berthing on both sides with 10 berths each of 150 m. in length for vessels up to 9 m. draft and 3 general cargo berths each 200 m. in length with depth of 10.9 m.

Two container berths (Berth Nos. 15 and 16) each 300 m. in length and 10.9 m. depth equipped with 4 container handling gantry cranes, 2 × 30.5 tons and 2 × 35 tons capacity with 38 m. outreach.

Berths for coastal vessels, length of quay 285 m. with depth of 7 m. Small Ro/Ro ramp for vessels up to 5.5 m. draft. Width of ramp 15.5 m.

Each general cargo berth is provided with modern fork lift trucks, trailers and units to facilitate the movement of cargo.

Pallets are available to assist cargo handling. Shore mobile cranes of various capacities ranging up to 200 tons available from private companies. Cargo handling equipment of various types also available.

Storage Facilities: Storage facilities consist of 14 sheds (one of which is located in the container terminal area) having an area under roof of 1,000,000 sq.ft. in addition hard surfaced yards and the container terminal stacking/parking area provide extensive storage capacity.

Hyundai Jetty: Lat. 26° 11′ N., Long. 50° 39′ E. Length of jetty 175 m., depth alongside 9 m. Berthing permitted between 0600 and 1800 hrs.

GRAIN HANDLING: Two portable pneumatic suction/blowing units are used. Capacity 75 t.p.h. each. Wheat is discharged into 20 ton trailers, which takes about 8 to 12 minutes for each trailer.

STEVEDORES: Stevedoring gangs shall be ordered and paid for by ship's Agents.

Working Hours: The port will operate on a 2 shift basis 6 days per week. Additional work on Fridays and Public Holidays are subject to extra charges.

Saturday to Thursday – 0700 hrs. to 2300 hrs. (Container Terminal, 24 hours a day, 7 days a week).

Working hours are subject to change at the discretion of the Port Authority. Requirements for Port Labour must be submitted by Ship's Agents to the Port Authority by 1400 hrs. for work during the first shift on the following day and by 1000 hrs. on the same day for work on the second shift.

Special overtime to finish and sail a ship may be granted after 2300 hrs.

MEDICAL: As per present local regulations all crew for medical treatment have first to be reported to the Public Health Department from where patient, if required, will be referred to Government hospital or specialists.

FRESH WATER: Well water available and can be delivered on berths at Deep Water Jetty at rate of approximately 20 t.p.h. per hose. Fresh water also available by barge with capacity of 300 tons.

FUEL: Bunkers available alongside in Mina Sulman and also provided by barge of 8,700 barrels capacity, which is owned by the Bahrain Petroleum Company. All usual grades of commercial oil available. 48 hours' notice required. This can also be arranged by local Agents.

REPAIRS: Good facilities for both hull and engine repairs which can be effected by the principal slipway company. Facilities exist to receive single vessels of 1,000 d.w.t., and a tower crane capable of a 15 tons lift at 40 ft. Also see "Dry Dock".

SURVEYORS: Available on request through Agent.

DRY DOCK: ASRY Dry Dock: The dry dock measures 375 m.×75 m., the bottom structure being strong enough for double dockings.

This is the first repair dock in the world specially designed for shallow draft VLCCs. With the sill beam at 9 m., it can accept vessels of 34 ft. draft.

Four dockside arms, two per side, give access to almost the entire surface of a VLCC hull for cutting, welding, shotblasting and cleaning/painting purposes, without the need for scaffolding.

In addition to the above graving dock, ASRY has acquired 2 floating docks of the following capacities:

1. 252 m. × 45 m. for vessels up to 120,000 d.w.t.
2. 227 m. × 41 m. for vessels up to Panamax size.

The added capacity at ASRY would transfer the Yard into a three dock operation, capable of handling a large number of vessels of different sizes and types at the same time.

Manoeuvring Basin: The manoeuvring basin dredged to 10 m. allows ships of up to 32 ft. draft to dock at any time. If necessary, ships may lie directly on the basin's sandy, levelled bottom.

Jetties: The 2 finger jetties are 170 m. long × 21 m. wide and can accommodate at least 4 large vessels for in-water repairs.

Mechanical Shop: The mechanical shop is equipped with 36 major machine tools, plus additional supporting services.

Plate Shop: The plate shop is equipped with 45 machine tools and portable equipment, plus additional supporting services.

Pipe Shop: The pipe shop is equipped with 26 machine tools and portable equipment, plus additional supporting services.

Electrical Shop: The repair capability in the electrical shop is summarised as follows:

Motor rewinding
Transformer and operating coil rewinds
Generators (main and auxiliary), large motors; strip, inspect, clean, replace bearings and rebuild
Rewiring (limited facility)
Switchboards: clean and repair
Motor controllers: find fault and repair
Air conditioning equipment: servicing and repair
Engine and bridge control panels (limited repair facility).

Navigational equipment (radar, DF, UHF, gyro compass, auto pilot, echo sounder) repairs are carried out by manufacturers' agents, who are fully represented in Bahrain.

Cranes: Four rail cranes of 15 tons lifting capacity and 75 m. outreach are located on the 2 finger jetties and adjacent to the dry dock. In addition, 1 rail crane of 100 tons lifting capacity and 61 m. outreach is located adjacent to the dry dock.

These five rail cranes cover about 90% of ASRY's outdoor production area. For the remaining production areas, 4 mobile cranes each of 20 tons capacity and 2 hydraulic lifting platforms of 80 tons each are available.

Inside the workshops, overhead cranes of 6, 15, 25 and 160 tons lifting capacity are available.

Floating Crane: A floating crane of 200 tons lifting capacity, specially designed to reach any point on the deck or superstructure of a VLCC in ballast condition, is available. This lifting equipment is installed on a pontoon which has an overall length of 35.5 m. and a beam of 23 m. The crane is of the luffing type, which permits the height of the hook to be maintained while the outreach can be adjusted in travel.

Tugboats: The yard has a fleet of 6 tugboats, each of 32 tons bollard pull, which have been specially designed to manoeuvre large ships both in the yard and at sea.

Each tugboat has an overall length of 33 m. and a moulded beam of 8.5 m., with a draft fore and aft of 2.55 m. and 3.05 m. respectively.

The main engine is rated at 2,400 b.h.p. at 500 revs. per minute in accordance with DIN 6270A, and provides each tug with a normal free navigation speed of 12.5 knots.

Largest vessel so far to enter dry dock was 411,000 d.w.t.
Largest vessel to be repaired was 508,000 d.w.t.
Total workforce is 1,400 persons.

GANGWAY/DECK WATCHMEN: Not customary to employ deck watchman.

REPATRIATION: It is possible for whole crews or just individual crew members to join or leave vessels at Bahrain. As much notice as possible should be given to Agents to enable arrangements to be made for their reception, hotel accommodation and transportation.

AIRPORT: Bahrain International Airport regularly served by main international airlines, with frequent services to Europe, U.S.A., Far East, and Australia. Also frequent inter-Gulf flights.

TIME: GMT plus 3 hours.

HOLIDAYS: Public holidays in accordance with Muslim calendar as follows: 3 days during Eid Al Fitr; 3 days during Eid Al Adha; 3 days during Muharram; 12th R'Awal Prophet's Birthday; Accession of H.H. The Amir, 16th December; 1st January. Apart from 6 days, two during each of the religious anniversaries, all holidays will be worked in the port as on Fridays, the Sabbath day.

TELEPHONES: Can be provided at each berth on Deep Water Jetty. In case of emergency, dial 242 for ambulance; 236 for Duty Police Officer; 500 for Fire Brigade.

SERVICES: Bahrain well provided for services including repairs, stores and supplies, fumigation surveys, adjustments, radar and gyro compass repairs, professional diving, and underwater brushing.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: These cards necessary for any crew member wishing to proceed ashore. Identification card is surrendered to Immigration Authorities at main entrance to port in return for a pass. On return to port, the pass is surrendered and seaman's identity card returned to him.

AUTHORITY: Ministry of Finance and National Economy, Customs and Ports Affairs, Directorate General of Ports, P.O.Box 15, Bahrain. *Tel:* 727173. *Telex:* 8642 Mina Bn. 8643 Harbour Bn. *Cables:* Stateport. *FAX:* 725534. *Contact:* Captain Saleh Al Musallam, Harbour Master (Tel: 719370, Fax: 727985). Captain Mahmood Y. Al Mahmood, Director General of Ports.

AGENT: Gulf Agency Co. (Bahrain) W.L.L., P.O.B. 412, Manama, Bahrain. Tel: (973) 530022 (10 lines). Telex: 8211 (A/B "GAC BN"). Fax: (973) 530063. Cables: "Confidence".

SITRA: 26.09 N. 50.40 E. (See Plan)

Bahrain Port incorporates all the harbours on the N.E. Coast of the Bahrain Islands. The Port Limits extending approximately Westwards and Southwards from Bahrain Approach Buoy.

The Bahrain Government Harbour Master at Mina Sulman has jurisdiction over Bahrain Port including the marine terminals of Mina Sulman, BAPCO, ALBA, ASRY, GIIC and all other private wharves within the area.

Sitra Marine Area is situated at the entrance to the Port of Mina Sulman and the Khor Khaliya which is protected by the islands of Bahrain, Sitra and Muharraq, and the ASRY-GIIC Causeways.

Sitra Inner Anchorage lies on the Northern side of the Fairway between Sitra Beacon and Mina Sulman and is afforded some protection during the prevailing N.W. winds by Muharraq Island and the ASRY-GIIC Causeways.

OPERATORS:

1. *The Gulf Industrial Investment Company – GIIC:* GIIC operates a plant producing iron pellets from imported ores.

Enquiries regarding its facilities should be sent to GIIC, P.O.Box 50177, Hidd, Bahrain. Tel: 673311. Telex: 9993 GIIC Bn.

2. *Aluminium Bahrain – ALBA:* ALBA operates a plant producing aluminium ingots from imported alumina and coke.

Enquiries regarding its facilities should be sent to Aluminium Bahrain, P.O.Box 570, Manama, Bahrain. Telex: 8253 Alba Bn. Cable address: Metalba, Bahrain. Tel: 830000. Fax: 830083.

3. *Bahrain National Gas Company B.S.C. – BANAGAS:* BANAGAS operates a plant producing refrigerated butane and propane which are exported over BAPCO's Wharf.

Enquiries regarding its facilities should be sent to Bahrain National Gas Company B.S.C., P.O.Box 29099, Rifa'a, Bahrain. Tel: 756222. Telex: 9317 Bangas Bn.

4. *The Bahrain Petroleum Company B.S.C. (Closed) – BAPCO:* The company operates the Bahrain Refinery and related facilities on behalf of the Government of the State of Bahrain and Caltex Bahrain. Petroleum products for Banoco, Caltex and Banagas are handled at the BAPCO Terminal.

Enquiries regarding port information should be sent to The Bahrain Petroleum Company B.S.C. (Closed), Bahrain Refinery, Bahrain. Telex: 8218 Bapshp Bn. Cable address: Bapco, Bahrain.

5. *Gulf Petrochemical Industries Company (B.S.C.) – GPIC:* GPIC operates a plant producing refrigerated liquified ammonia and methanol which are exported from Sitra Wharf.

Enquiries regarding its facilities should be sent to Gulf Petrochemical Industries Company (B.S.C.), P.O.Box 26730, Manama, Bahrain. Tel: 731777. Telex: 9897 Kemia Bn.

See individual berths for limitations and procedures.

SPECIAL FEATURES:

1. The Sitra Marine Area encompasses the marine facilities provided by the following companies: BAPCO, ALBA, ASRY, GIIC.

BAPCO has 6 berths for ocean-going vessels and 1 berth where small vessels of up to 240 ft. in length and 16 ft. draft may be berthed.

ALBA has a jetty with 2 berths; the outside berth being used for bulk carriers unloading coke and alumina ore and the inside berth being for vessels loading metal products.

ASRY has 2 jetties 400 ft. apart, with a solid quay wall providing 6 berths as well as the drydock 375 m. in length by 75 m. wide.

GIIC has 1 jetty with offlying dolphin providing 2 berths, the Eastern Berth being utilised for offloading iron ore, whilst the Western side is used for loading.

2. BAPCO Marine Officers advise and assist Masters in berthing, unberthing, mooring and navigating their vessels in the Sitra Marine Area.

3. All vessels entering Bahrain Port must have accredited Agents. They should also establish radio contact with BAPCO via "Bahrain Radio" (A9M), at least 48 hours prior to arrival, giving a firm ETA, arrival draft, and their requirement for bunker fuels.

4. The laws of Bahrain are in force in the Port and crew members are advised, for their own protection, to abide by them.

5. All vessels must display international quarantine signals when approaching the Port and keep them displayed until Pratique is granted. The national flag of Bahrain is to be flown at the foremast head during the vessel's stay in the port.

6. Safety is a prime concern and Masters must comply with all Safety Regulations.

DOCUMENTS: Crew List 3 copies. Passenger List 3 copies. Customs Declaration 2 copies. Health Declaration 2 copies. Log Book for Inspection by Customs Officers.

Cargo and bunker documents are delivered to the vessel as soon as possible after the vessel has been cleared on quantity and quality. Delays are sometimes incurred. As a result, BAPCO reserves the right to unberth a vessel and deliver documents by launch so as to minimise berthing delays to subsequent vessels.

Early Departure Procedure (E.D.P.) is available on Master's request.

The Tanker Owners Voluntary Agreement concerning Liability for Oil Pollution: All tankers carrying or loading/discharging at BAPCO any persistent hydrocarbon mineral oil, such as crude oil, fuel oil, heavy diesel oil and lubricating oil, whether or not carried as cargo, shall be in possession of a TOVALOP (Tanker Owners Voluntary Agreement concerning Liability for Oil Pollution) Certificate. NO other certificates will be accepted.

PILOTAGE: Pilotage is not provided between Bahrain Light Vessel and Sitra Anchorage. Pilotage is compulsory from Sitra Beacon inwards.

There are 2 Pilotage Authorities for Bahrain Port both of which co-ordinate through Bahrain Port Control.

1. The *Bahrain Pilots,* under the Bahrain Government's Harbour Master, handle all vessels bound for the Khor Khaliya. This includes the main Mina Sulman Wharfage, the wharves of Hyundai on the West side of the ASRY/GIIC Causeway and the private company wharves on the North Sitra Industrial Estate.

2. The *Sitra Pilots,* under BAPCO's Port Officer, the Superintendent Marine Operations, handle all vessels having business with the marine terminals of GIIC, ALBA, ASRY and BAPCO.

The Sitra Pilot will normally board the vessel in a position 0.5 miles South of Sitra Beacon from either an orange hulled pilot cutter, tug or a tow-boat displaying the normal pilot vessel signals.

The Sitra Pilots will only embark or disembark from vessels providing the regulation pilot ladder.

The Sitra Pilots will normally hand over control of the tugs to the ASRY Dock Master at a mutually agreed position close by ASRYs dock and jetties for completion of berthing. The ASRY Dock Master in consultation with Sitra Pilot will arrange for the number of tugs to be used in these operations.

For vessels bound for GIIC, ALBA or BAPCO's jetties the Sitra Pilot will decide on the number of tugs to be used in the berthing and unberthing operations. Normally, 2 tugs are used.

Harbour Pilotage: Under no circumstances will any vessel, irrespective of size, berth alongside Company wharves unless a Sitra Pilot is on board and the correct documentation signed. A Sitra Pilot will also be on board a vessel for the unberthing operation. However, under special circumstances certain small vessels may be allowed to unberth without a Pilot on board, providing the Pilot has given permission immediately prior to unberthing and B.P.C. have been informed.

The services of the Sitra Pilot are provided without charge.

Boarding: The Company Mooring Master may board the vessel from either a pilot cutter, tug or a tow-boat displaying the normal pilot vessel signals.

If no berth is available, vessels should anchor in the prescribed anchorage until such time as a berth is available. Every endeavour will be made to give the Master berthing instructions prior to the boarding of the Mooring Master, and to this end, Masters are requested to maintain a continuous watch on the VHF. In cases where it is impossible to give prior berthing instructions, the Master and Chief Engineer are requested to co-operate with the Company by getting the vessel's engines ready for use with the least possible delay.

APPROACHES: *General:*

1. Without accepting any responsibility, the following suggestions are made for the benefit of Masters who are not familiar with Bahrain waters.

2. The buoyed channel from Sitra Anchorage to the Bahrain Light Vessel is primarily for vessels confined by their draft to use it. Vessels intending to transit this channel must obtain clearance from Bahrain Port Control prior to entering.

3. The buoyed channel has a min. depth of 13.25 m. (43 ft. 6 in.) at Chart Datum. This permits unrestricted use at all states of the tide for vessels drawing up to 12.2 m. (40 ft.).

4. Vessels in excess of 12.2 m. (40 ft.) and up to a maximum of 13.4 m. (44 ft.) are restricted to tidal ranges.

5. Vessels with drafts of less than 9.2 m. (30 ft.) are requested to make use of Sitra Inward and Vidal Buoys.

6. The colour of beacon structures and buoys are often obliterated by Guano.

7. For details of the buoys, lights and beacons see the section marked "Sitra Channel Marks". The entrance and near approaches to Mina Sulman are marked by aids not described herein.

8. The "Alteration of Course" positions in the following directions are based upon a radius of turn of 5 cables. This may necessitate an increase in engine revolutions, together with full helm in some vessels.

(a) Inward Under 9.2 m. (30 ft.)

(i) From a position (Lat. 26° 27.8′ N., Long. 51° 00′ E.) 2.5 miles S.E. of No. 3 Beacon (Lat. 26° 28.5′ N., Long. 50° 57.4′ E.) a course should be set to position 0.75 miles North of "Sitra Inward" Buoy (Lat. 26° 21.2′ N., Long. 50° 49.7′ E.) (Qk. Fl. (9) 15 sec.) leaving the "Caisson Wreck" Buoy (Lat. 26° 24.2′ N., Long. 50° 52.7′ E.) (Qk. (6) + L. Fl. 10 sec.) at least 0.5 miles to starboard.

(ii) From the position above a course should then be set towards No. 16 Buoy (Lat. 26° 12.9′ N., Long. 50° 46.3′ E.) (Fl. Y. 6 sec.).

(iii) When the vessel has reached a position with No. 16 Buoy, 1.5 miles ahead, course can be adjusted to due South, passing Westwards of "Vidal" Buoy (Lat. 26° 14.1′ N., Long 50° 47.2′ E.) (Fl. (2) R. 10 sec.) until "Sitra Beacon" (Fl. 3.3 sec.) bears due West.

(iv) If instructed by B.P.C. or the Pilots to proceed in to meet the Pilot, course should be altered to pass South of No. 18 Buoy (Lat. 26° 10.3′ N., Long. 50° 43.9′ E.) (Qk. R.) to the Pilot Station 0.5 miles due South of Sitra Beacon; thus keeping clear of the Deep Water Channel.

(v) All vessels, unless otherwise instructed should proceed to an anchorage South of No. 27 Buoy (V. Q. (6) + L. Fl. 10 sec.).

Inward Over 9.2 m. (30 ft.):

(i) Vessels wishing to utilise the Deep Water Channel should follow the reciprocal of the courses described for the "Recommended Deep Water Departure Channel".

(ii) Vessels with drafts of between 9.2 m. (30 ft.) and 12.2 m. (40 ft.) may be required by B.P.C. to depart from the marked channel at certain points to allow freedom of movement for vessels with drafts in excess of 12.2 m. (40 ft.).

(b) Deep Water Departure Channel

(i) The Pilot will normally leave vessel after having crossed the Sitra Middle Ground Bar; 2 cables South of "Sitra Beacon" (Fl. 3.3 sec.) with the vessel proceeding to close North of No. 18 Buoy (Qk. R.).

(ii) When No. 18 Buoy comes abeam, course should then be altered to 090°(T) which will bring Sitra Beacon dead astern, bearing 270°(T) to pass South of No. 27 Buoy.

(iii) As No. 27 Buoy (South Cardinal Yellow above Black Pillar Buoy) (V. Q. (6) + L. Fl. 10 sec.) comes abeam to port, course should be altered to 022°(T).

(iv) When Buoy Nos. 21, 23 and 25 are sighted in line bearing 344°(T) course should be altered to 344°(T).

(v) On course 344°(T) Buoy No. 25 (Green Cone) (Fl. G. 5 sec.) and Buoy No. 23 (Green Conical) (Qk. Fl. G.) will be passed close on the port side and Buoy No. 16 (Yellow Can) (Fl. Y. 6 sec.) on the starboard side.

(vi) As No. 21 Buoy (East Cardinal) (V. Q. (3) 5 sec.) comes abeam to port, course should be altered to 015°(T), which should bring Buoy No. 12 (Yellow Can) (Fl. Y. 2 sec.) dead ahead and Buoy No. 21 dead astern. The bearings of these buoys should be watched closely to estimate and correct for cross set which is sometimes quite strong on this course and the next. On this course No. 14 Buoy (Yellow Can) (Fl. Y. 10 sec.) will be left to starboard.

(vii) On No. 19 Buoy (Green Conical) (Fl. G. 3 sec.) coming abeam, course should be altered to 002°(T) bringing Buoy No. 15 (Green Conical) (Occ. G. 5 sec.) dead ahead. Buoy No. 12 (Fl. Y. 2 sec.) will then be left close to starboard and No. 17 Buoy (Green Conical) (Qk. Fl. G.) will be left to port.

(viii) In order to pass over a cable Eastwards of Buoy No. 15, course should be altered to 016°(T) as Buoy No. 10 (Yellow Can) (Fl. (3) Y. 10 sec.) comes abeam to starboard and then altered to 356°(T) as Buoy No. 15 comes abeam to port. This course would pass 3.5 cables West of Bahrain Approach Buoy. It may be advisable to reduce engine revolutions shortly after steadying on course 356°(T), in order to be able to increase revolutions, if required to provide better steerage on the next course over the Bar.

(ix) When the Bahrain Approach Buoy bears 051°(T) course should then be altered to 051°(T). As this heading is approached, it should be found that Buoys No. 8 (Red Can) (Fl. R. 2 sec.) and No. 6 (Red Can) (Fl. (3) R. 6 sec.) are in line to starboard, as Bahrain Approach Buoy comes abeam at 2.5 cables, and then should commence to open. Buoys No. 13 (Green Conical) (Fl. G. 5 sec.) and No. 11 (Green Conical) (Q. G.) are parallel to the course on the port side of the vessel, give clearance on the 13.1 m. (43 ft.) patches and given the extent of the bar which should be traversed at Slow Speed.

(x) On No. 11 Buoy coming abeam to port, course should be altered to 054°(T) passing between No. 9 Buoy (Green Conical) (Fl. G. 10 sec.) and Buoy No. 4 (Red Can) (Q. R.), followed by Buoy No. 7 (Green Conical) (Fl. G. 5 sec.) to port.

(xi) When Buoy No. 2 (Red Can) (Fl. (2) R. 10 sec.) bears East, course should be altered to 071°(T) to pass close South of Buoy No. 5 (Green Conical) (Fl. G. 3 sec.).

(xii) Buoy No. 5 should be close abeam to port, when the course is altered to 057°(T) and speed reduced in readiness to cross the spit which extends in a Southerly direction from No. 3 Beacon (Fl. 6 sec.) and which has a minimum depth of 13.25 m. (43 ft. 6 in.) at Chart Datum.

(xiii) When Buoy No. 1 (Green Conical) (Q. G.) bears 040°(T), course should be altered to 040°(T) bringing the Bahrain Light Vessel (Gp. Fl. (3) 20 sec.) on the starboard bow. 1.5 miles after Buoy No. 1 has been left to port, the minimum depth of water is greater than 50 ft., and it is safe to go full ahead.

(xiv) Masters can expect to have to make adjustments from time to time, to the recommended courses, due to set. Effects of tide and current should be watched for at all times.

Sitra Channel Marks:

Bahrain Light Vessel	26° 33′ 00″ N. 51° 03′ 30″ E.	A light vessel painted Red with the word 'Bahrain' in white on both sides of the vessel.	Gp. Fl. (3) every 20 secs. Range 15 miles. Racon.

No. 23 Buoy	26° 12′ 37″ N. 50° 46′ 05″ E.	Starboard hand buoy, Green conical.	Quick Green.

No. 25 Buoy	26° 11′ 47″ N. 50° 46′ 21″ E.	Starboard hand buoy, Green conical.	Fl. Green 5 secs.
No. 27 Buoy	26° 10′ 28″ N. 50° 45′ 32″ E.	South Cardinal Yellow Black Pillar.	Very Quick (6) + L Fl. 10 secs.
Caisson Wreck Buoy	26° 24′ 14″ N. 50° 52′ 40″ E.	South Cardinal Yellow Black Pillar.	Quick (6) + L Fl. 15 secs.
Sitra Inward Buoy	26° 21′ 03″ N. 50° 49′ 41″ E.	West Cardinal Yellow Black Yellow Pillar	Quick (9) 15 secs.
Vidal Buoy	26° 14′ 04″ N. 50° 47′ 10″ E.	Port hand buoy, Red can.	Fl. (2) Red every 10 secs.
Bahrain Approach Buoy	26° 21′ 38″ N. 50° 46′ 40″ E.	West Cardinal Yellow Black Yellow Pillar.	Very Quick (9) 10 secs.
Sitra Beacon	26° 10′ 20″ N. 50° 42′ 51″ E.	Black framework tower 50 ft. high, with Radar Reflector & Racon.	Fl. every 3.3 secs. Range: 11 miles.
Sitra Beacon Guard Buoy	26° 10′ 16″ N. 50° 42′ 51″ E.	Starboard hand buoy, Green conical.	Fl. Green 3 secs.
South Shoals Beacon	26° 09′ 25″ N. 50° 41′ 47″ E.	Pile structure, 20 ft. high.	Gp. Fl. (2) Red 4 secs.
North Range Beacon	26° 10′ 02″ N. 50° 39′ 55″ E.	Pile structure, 20 ft. high.	Fl. Red Green 2½ secs.
South Range Beacon	26° 09′ 18″ N. 50° 41′ 01″ E.	Pile structure, 20 ft. high.	Fl. Red every 4 secs.
Sitra Middle Ground Buoy	26° 10′ 01″ N. 50° 40′ 33″ E.	South Cardinal Yellow Black Pillar.	Very quick (6) + L. Fl. 10 secs.
Seistan Wreck Buoy	26° 09′ 22″ N. 50° 43′ 12″ E.	North Cardinal Black Yellow Pillar.	Very Quick Fl.
Alba Beacon	26° 09′ 14″ N. 50° 40′ 23″ E.	Pile structure, 20 ft. high.	Scintilating Fl. Green.
GIIC North	26° 11′ 17″ N. 50° 41′ 22″ E.	Green Conical.	Quick Fl. Green.
GIIC South	26° 11′ 07″ N. 50° 41′ 33″ E.	Green Conical.	Fl. Green 3 secs.

ANCHORAGE: The normal anchorage for arriving vessels waiting orders or tide is 1 mile South of No. 27 Buoy.

The whole of the navigable waters to the West of Sitra Beacon are restricted for anchorage unless specific permission has been granted by Bahrain Port Control. Pilotage is compulsory West of Sitra Beacon.

The area South of a line joining Sitra Beacon and Sitra Middle Ground Buoy is the fairway to Mina Sulman, and the approaches to ALBA, GIIC, ASRY and BAPCO terminals and as such *anchorage is prohibited.*

The area North of this line joining Sitra Beacon and Sitra Middle Ground Buoy and bounded on the North by ASRY Drydock and GIIC, is Sitra Inner Anchorage.

Vessel may ONLY anchor in Sitra Inner Anchorage after specific permission has been granted by Bahrain Port Control, as this area is also the approaches to the ASRY Drydock and GIIC jetty. Permission will be granted for vessels working with ASRY, working barges, or taking bunkers by barge.

Vessels should not immobilise their engines without having received on board written permission from the Port Authority.

A CONTINUOUS WATCH ON VHF CHANNEL 74 MUST BE MAINTAINED.

RESTRICTIONS: Berthing carried out night and day.

Explosives: Merchant vessels carrying explosives are not permitted to enter the Sitra Inner Anchorage, unless permission has been granted and anchorage allocated. Masters of such vessels will be advised by Bahrain Port Control to anchor in the Explosives Anchorage in a position 1.5 miles S.E. of Sitra Beacon.

Merchant vessels carrying explosive material are not permitted to enter the limits of BAPCO's Oil Wharves including the ALBA facilities.

Tidal Information:

The Standard Port for the area is Mina Sulman.

No.	Place	High Water Mean Springs	High Water Mean Neaps	Low Water Mean Springs	Low Water Mean Neaps
		Standard Port		Standard Port	
4252	Mina Sulman	2.4 m. (7.9 ft.)	1.9 m. (6.2 ft.)	0.6 m. (2.0 ft.)	1.0 m. (3.3 ft.)
		+0005 hours		+0005 hours	
4251	Sitra	2.3 m. (7.5 ft.)	1.9 m. (6.2 ft.)	0.6 m. (2.0 ft.)	1.0 m. (3.3 ft.)
		−0017 hours		−0013 hours	
4250a	Bahrain Approach Buoy	2.1 m. (6.9 ft.)	1.7 m. (5.6 ft.)	0.4 m. (1.3 ft.)	0.8 m. (2.6 ft.)

For vessels with drafts in excess of 12.2 m. (40 ft.) the following notes are recommended:

1. During Neap Tides vessels with drafts up to 12.8 m. (42 ft.) can navigate the channel at all stages of the tide.
2. *Tidal Sailings:* The rise of tide must be utilised to pass through the shoal areas between Bahrain Approach Buoy and No. 3 Beacon over the HW period at reduced speed. Departing vessels should be underway from No. 27 Buoy not later than 3.5 hours before the next predicted HW at Mina Sulman, or at a time not later than that which would allow vessels to make the passage between Bahrain Approach Buoy and No. 3 Beacon at a reduced speed of 8 knots, having the full benefit of the tide, and passing Bahrain Approach Buoy 1.5 hours before the predicted HW at Mina Sulman.

MAX. SIZE: See individual berths for limitations.

HEALTH: Bahrain Port Health Regulations are based on International Sanitary Regulations adopted by World Health Organisation, May 1951.

In accordance with International practice, quarantine signals must be prominently displayed by all vessels approaching Bahrain Port.

Pratique is normally granted by the Bahrain Government Port Health Officer or the Agent's Representatives, or for healthy vessels scheduled for immediate berthings in the Sitra Marine Area by the BAPCO Pilot.

No persons, excepting the Bahrain Coast Guard, Agents' Representatives and Pilots are permitted to leave or board a vessel until Pratique has been granted.

A radio message should be sent to the Government Port Health Officer, Bahrain, advising last Bill of Health and present health conditions aboard.

Rat guards should be properly placed on all mooring ropes as soon after berthing as practicable.

Bahrain Port is not classed as a "Plague Port" but all crew members must have in their possession valid certificates of vaccinations and inoculations against cholera in accordance with current Health Regulations.

The Bahrain Government Port Health Officer is available by arrangement through vessel's Agent. The Port Health Officer, in addition to official duties, will provide consultation and treatment for other than quarantine purposes.

Derat and Derat Exemption Certificates are obtainable in Bahrain. Requests should be made through the vessel's Agent.

RADIO: The company does not operate a coast radio station, long distance radio communication being routed through Bahrain Radio.

All vessels are requested to keep the company, on cable address "Bapcoship Bahrain", fully advised regarding ETA. Vessels fitted with telex may contact BAPCO by telex through A9M on Telex: 8218 Bn (answerback being BAPSHP) but messages to the vessel from BAPSHP will all be relayed through Bahrain Radio for onward transmission.

It is requested that vessels provide an ETA, arrival and departure drafts, not later than 48 hours steaming time from Sitra.

Long distance radio communication should all be routed through Bahrain Telecommunication Company's Coast Station "Bahrain Radio" (A9M) of P.O.Box 14, Manama, Bahrain, to which a regular watch should be maintained.

All communications to the Company should be quoted in GMT, and the appropriate letters, GMT, inserted after the time.

Vessels calling at Bahrain should listen to Bahrain Radio from 4 – 5 days prior to arrival, as BAPCO send the following questionnaire by *radio only.*

Telex to All Cargo Loaders:

MASTER Date:

BAHRAINRADIO

(A) We hold cargo nomination barrels/M.Tons .... for ....

(B) To assist us expedite the loading/turnaround of your vessel please provide the following information:

1) ETA at 72/48/24 hours prior arrival and when 50 miles from Bahrain L/V confirm ETA.
2) Names of last three ports of call and departure dates.
3) Arrival draft, fore and aft and berthing displacement.
4) Maximum departure draft.
5) Distance bow to manifold in metres.
6) Is vessel ready to berth/load on arrival?
7) Is a TOVALOP Certificate available for the Berthing Pilot's inspection? Please advise if Tovalop Certificate on board is valid until 20th February 1993, (English version please), issued by Tovalop, London. Without this certificate available on board, your vessel will not be allowed to dock.
8) Is vessel part loaded? Quantity.
9) Hours required to discharge ballast.
10) If required, hours to mop/clean ship's tanks after deballasting.
11) Order of loading, and maximum loading rates.
12) Slops on board: volume, contents.
    a) Do you wish to discharge same?
    b) Are slops segregated?
    c) If not segregated, do you agree to load on top?
13) If intending to load into ship's dirty tanks.
14) If comingling of cargo required.
15) Will the vessel's tanks be under IGS pressure on arrival.
16) Will you release the IGS pressure for visual inspection by independent Surveyor?
    If no, do you accept responsibility for the quality of the first-in product to approximate feet levels or until there is sufficient product in tank(s) to readily obtain a sample.
17) Do you require to inert tanks whilst alongside a berth?
    For your information, this is only permitted when absolutely necessary and when approved by shore. All delays to subsequent vessel(s) awaiting same berth and/or loading facilities as a result of this operation will be for your vessel's owner's account.
    Please note: The Terminal normally ask vessel to arrive with all tanks gas-free ready for visual inspection, inerting before loading not required. However, if vessel arriving with tanks inerted, Master will have to accept responsibility in writing for first in product, approximately 3 feet for sampling.

(C) When passing Bahrain Light Vessel: VHF contact with "Bahrain Port Control" and "Bapco Terminal" should be maintained at all times on Channel 74. Bapco Terminal will give berthing prospects/instructions.

(D) Advise present health conditions on board.

(E) Acceptable *minimum* berthing draft is calculated by following IMO Formula: Draft amidships = 2.0 + 0.02 × LOA trim not to exceed 0.015 × LOA.

LOA 182.30 m., forward 4.28 m., aft 7.02 m.

(F) Advise vessel's g.r.t./n.r.t./d.w.t. as per present certificates.

(G) Would appreciate if you could give us maximum notice in case chandler is required, listing all items.

Do you have other requirements such as cash, laundry, etc.

(H) Clearance formalities requirements: Please arrange to have following ready:

4 Crew Lists.
2 Bonded Stores Lists (alcoholic items and cigarettes).
Last Port Clearance.
Log Book.

BAPCOSHIP

Bahrain Radio is equipped with Marconi Spector "ARQ" and "FEC" equipment type U2221. The equipment conforms to CCIR Recommendation 476. There are 4 operating positions with answerbacks 8474A A9M BN, 8474B A9M BN, 8474C A9M BN, and 8474D A9M BN. For direct contact ships should call in the Master (ARQ) mode as A9M monitors in the Slave mode. During a link call A9M will work as Master once contact has been established. Bahrain Radio accepts telex tapes from local clients to be passed on to ships fitted with radio telex on Telex: 8221 Bahrad Bn. The address should include the ship's name, call sign, and SELCAL number.

Sitra Port Control

Call sign "Bapco Terminal".

R/T, VHF Continuous Channels 16, 74. Channels 6, 8, 9, 12, 14 are the working channels.

When within 50 miles of Bahrain, communication should be established on VHF with BAPCO Terminal.

Vessels must maintain a continuous watch on VHF Channels 16 and 74.

When passing "Bahrain Light Vessel" or "Sitra Inwards Buoy" they should also establish and maintain watch with Bahrain Port Control on Channel 74.

A separate radio message should be sent to the Government Port Health Officer, Bahrain, advising last Bill of Health and present health conditions on board.

The Radio and Radar equipment of any vessel must *not* be operated whilst alongside Company wharves.

VHF: See "Radio".

BAHRAIN PORT CONTROL: A Vessel Traffic Management System has been established and is responsible for co-ordinating and regulating the flow of marine traffic in all waters within the port limits and the Deep Draft and N.E. Approach Channels.

It is required that all vessels in excess of 50 g.r.t. inform Bahrain Port Control, on VHF Channel 74, prior to leaving a berth or anchorage, or immediately after berthing or anchoring, and when passing the following sea marks inwards and outwards:

Deep Draft Channel	*N.E. Approach*
Bahrain Light Vessel	—
No. 3 Beacon	—
Bahrain Approach Buoy	Sitra Inwards Buoy
No. 14 Buoy	Vidal Buoy
No. 27 Buoy	No. 27 Buoy
Sitra Beacon	Sitra Beacon
Middle Ground Buoy	Middle Ground Buoy

TUGS: The assistance of Company tugs is normally available on a 24 hour basis.

When assisting in berthing and unberthing operations, the tugs are under the direct orders of the Sitra Pilot.

The Company normally has 2 tugs on station. Each tug is fitted with fire pumps and monitors and can provide limited assistance fighting fires.

The Sitra Pilot will decide upon the number of tugs to be used in berthing and unberthing operations. Normally, 2 tugs are used in each instance.

If the assistance of a tug is required for purposes other than berthing or unberthing, the request should be directed to the Superintendent – Marine Operations, Sitra, via the vessel's Agents.

Towboats: Normally there are 3 tow-boats of 365 h.p. on station. Primarily intended for other harbour duties, these tow-boats are available for assisting in the berthing/unberthing of the smaller class of vessel.

BERTHING: Berthing and unberthing operations are conducted on a 24 hour basis at the discretion of the Sitra Pilot; wind, weather, tide and other circumstances permitting.

Full power must be available on the main engines and the vessel must be sufficiently ballasted for the operation envisaged. The Sitra Pilot will decline to berth vessels if they are not properly equipped with satisfactory mooring lines, or if deck appliances are inoperable, or if steering gear, telegraphs and whistles are not in an efficient condition. The Master should notify the Pilot of any defects or peculiarities pertaining to his vessel.

Minimum Manoeuvring Drafts for Tankers: Due to the exposed location of the wharves, vessels are required to be sufficiently ballasted with clean ballast water ballast before coming alongside.

Acceptable ballast drafts are those calculated by the following IMO formulae:

Draft amidships (2.0 + 0.02L) m.

Trim not to exceed 0.015L.

Where L = Length overall.

Minimum tanker drafts normally acceptable are:

LOA	*Forward*	*Aft*
150 m. (490 ft.)	3.9 m. (12.8 ft.)	6.1 m. (20.0 ft.)
175 m. (570 ft.)	4.2 m. (13.8 ft.)	6.8 m. (22.3 ft.)
200 m. (650 ft.)	4.5 m. (14.8 ft.)	7.5 m. (24.6 ft.)
225 m. (730 ft.)	4.9 m. (16.0 ft.)	8.1 m. (26.6 ft.)
250 m. (820 ft.)	5.2 m. (17.0 ft.)	8.8 m. (28.9 ft.)

Ballast draft should be sufficient to completely immerse the propeller. Pilots may decline to berth vessels if they are not sufficiently ballasted.

Trim: Whilst alongside the berth the period of undesirable trim shall be minimised.

Anchors: The "Offshore" anchor should be cleared and lowered to the waterline, ready for letting go, before approaching the berth. Anchor buoys are NOT to be used.

Handling Mooring Lines: BAPCO provides a shore gang for handling mooring lines on the wharves. This service is directed by the BAPCO personnel on the wharf.

Vessels berthing at BAPCO wharves must be equipped with *at least* 5 lines forward and 5 lines aft, in addition to backsprings fore and aft. These lines must be of sufficient length to enable moorings to be "doubled up" in bad weather. Method of mooring will be at the discretion of the duty Pilot.

Constant tension winches to be set on manual brake.

BAPCO TERMINAL: Two main wharves were constructed, lying 146° – 326° to handle ocean-going vessels, with a special services coastal tanker wharf lying 023° – 203°.

Whilst bunkers (fuel oil and gas oil) are available on Wharf No. 2, the main wharves handle all normal petroleum products with specialities handled on particular berths for dependent clients. Gas oil is not available at Island Wharf, but delivery of bunkers is by barge.

	Berth No.
BANOCO/CALTEX	
Asphalt	2,4,7
Pressurised LPG	2, 4
Blended Fuel Oil	2, 4
T.E.L. Imports	1
BANAGAS	
Butane/Propane (Vapour Return/Main)	1
(Main/Vapour Return)	2

No. 1 Island Wharf: No. 1 (Island) Wharf consists of 1 main central platform supported on steel piles with 4 inter-connected mooring dolphins, 2 positioned to the North-West and 2 to the South-East; giving the wharf an overall length of 281 m. (923 ft.). This wharf, which is supplied by submarine pipe-lines, provides 2 berths protected by 4 breasting dolphins each side. The latter precludes berthing freighters.

Limitations:

Berth	*LOA*	*Charted Depth*	*Sailing Draft*	*Max. Berthing Draft*	*Berthing Displacement*
5	Min: 165 m. (540 ft.)	14.00 m. (46 ft. 0 in.)	13.40 m. (44 ft. 0 in.)	12.19 m. (40 ft. 0 in.)	[3]
6	Max: 274 m. [1](900 ft.)	See table below		10.67 m. (35 ft. 0 in.)	[2]

Notes: 1. Maximum distance manifold to ends of 137 m. (450 ft.).
2. Max. d.w.t. 110,000 tonnes.
3. 72,650 tonnes.

LOA (m.)	(ft.)	*Manifold/Stern* (m.)	(ft.)	*Maximum Draft* (m.)	(ft.)
213	700	106	350	13.41	44.00
228	750	114	375	12.95	42.50
243	800	121	400	12.65	41.50
259	850	129	425	12.50	41.00
274	900	137	450	12.19	40.00

In order to ensure the required underkeel clearance of 2.0 ft. is maintained, the maximum drafts of vessels berthed at Berth No. 6 will be dependent upon the distance manifold to the stern (nominally LOA) and tidal conditions throughout the berth occupancy.

However, the above maximum draft tabulated against LOA may be increased by the *lowest* tidal level predicted in the British Admiralty Tide Tables for Mina Sulman during the period of 72 hours following the time that the vessel actually berthed at Berth No. 6.

Example:

(a) Vessel 800 ft. berthing on 16.3.88 may load to 12.65 m. + 0.2 m. = 12.85 m. (42 ft. 2 in.).

0.2 m. being the minimum predicted level above Chart Datum within the 72 hour period after berthing, i.e. at 1242 hrs. on 19.3.88.

(b) Vessel 900 ft. berthing on 12.3.88 may load to 12.19 m. + 0.7 m. = 12.89 m. (42 ft. 3.5 in.).

0.7 m. being the minimum predicted level above Chart Datum within the 72 hour period after berthing, i.e. at 0917 hrs. on 15.3.88.

No. 2 Wharf: No. 2 Wharf is a pile driven 'T' head structure with 3 interconnected dolphins, 2 positioned to the N.W. and 1 to the S.E., giving the wharf an overall length of 508 m. (1,666 ft.), and providing four berths. Both outside berths (Nos. 1 and 2) and the N.W. Inner Berth, No. 3 are protected by berthing beams. This wharf is connected by a road trestle 518 m. (1,680 ft.) to a causeway 3 miles from the main island of Sitra.

Limitations:

Berth	*LOA*	*Charted Depth*	*Maximum Arrival Draft*	*Sailing Draft*	*Berthing Displacement*
1	250 m. *1 (820 ft.)	12.80 m. (42 ft. 00 in.)	10.67 m. (35 ft. 00 in.)	12.19 m. (40 ft. 00 in.)	58,930 M.T. *3
2	250 m. *1 (820 ft.)	12.95 m. (42 ft. 06 in.)	10.67 m. (35 ft. 00 in.)	12.34 m. (40 ft. 06 in.)	58,930 M.T. *3
3	170 m. (560 ft.)	11.89 m. (39 ft. 00 in.)	10.00 m. (33 ft. 00 in.)	10.36 m. *2 (34 ft. 00 in.)	35,561 M.T.
4	160 m. (525 ft.)	11.89 m. (39 ft. 00 in.)	08.10 m. (26 ft. 06 in.)	10.36 m. (34 ft. 00 in.)	15,240 M.T.

Max. d.w.t.:

Berth 1	80,000 tonnes.
Berth 2	80,000 tonnes.
Berth 3	34,000 tonnes.
Berth 4	25,000 tonnes.

Notes:

*1. Centre of manifold to stern should not exceed 120 m.

*2. 10.97 m. may be permitted under suitable *tidal conditions.*

*3. Maximum windage 5,000 sq.m.

Coastal Tanker Wharf: This wharf is a pile driven structure, fendered on its Eastern side only and connected by a catwalk to the Causeway. At its outer end is a warping dolphin.

Limitations:

Berth	*Vessel LOA*	*Charted Depth*	*Draft Never To Exceed*
7	73.1 m. (240 ft.)	5.48 m. (18 ft. 0 in.)	4.88 m. (16 ft. 0 in.)
	or with special permission		
	73.1 – 79.2 m. (240 – 260 ft.)	4.88 m. (16 ft. 0 in.)	4.26 m. (14 ft. 0 in.)

Basic Wind Speed Guidelines:

Basic maximum Northerly wind is 35 knots.

When wind is from the Easterly/Southerly direction, the tabulated restrictions apply:

Vessel Type	*Berth*	*Wind Direction*	*Restriction Bow North*	*Berthing Bow South*
Tankers	1	Easterly/Southerly	15 – 20 knots	Up to 30,000 d.w.t.
	2	Easterly/Southerly	15 – 20 knots	Never - due to pipeline.
	3	Easterly/Southerly	15 – 20 knots	30 knots
	4	Easterly/Southerly	15 – 20 knots	15 – 20 knots Coastal tankers only.
	5	Easterly/Southerly	15 – 20 knots	35 knots
	6	Easterly/Southerly	15 – 20 knots	35 knots – Max. dep. draft 12.19 m.
	7	Easterly/Southerly	10 – 15 knots	Never
LPG		Northerly	25 knots	10 – 15 knots
LPG		Easterly/Southerly	10 – 15 knots	10 – 15 knots.

BAHRAIN NATIONAL GAS CO.:

General: Butane and propane are stored at Sitra storage tanks at 0.5 p.s.i.g., and −5°C and −42°C, respectively. Maximum storage capacity is 188,000 bbls. (29,890 cu.m.) per product.

Product is pumped to the loading arms via a 16 in. insulated loading line by 2 pumps, each with a capacity of 5,000 b.p.h. There is a 10 in. vapour return line. The vapour return line can be routed to a tank or to flare as required. Note that if during the loading, pressure on the vapour return line exceeds 1.25 p.s.i.g. at the flare, then a control valve may shut against the vessel. This may happen without prior warning.

The loading line and the vapour return line are in the configuration as per plan (See "Plan" – Sitra Wharf No. 2). Loading and vapour return operations are accomplished via Chicksan type arms, the arms having 12 in., 150 A.S.A. rating, and 8 in., 150 A.S.A. rating flanges respectively.

As propane and butane cargoes are loaded through a single shore system it may be necessary for the shore tank to be switched in order that the loading system content is displaced to the vessel with the other product. Masters are requested to maintain an accurate assessment of the cargo loaded at all times and inform the wharf staff as required.

Vessels MUST advise Terminal personnel of any need to shut down loading, even on an emergency basis, so that the Terminal emergency shut down system can be activated BEFORE on-board valves are shut to the loading hoses/arms.

Atmospheric venting is not permitted alongside the wharves. Vessels which are "hot" will be required to load a quantity of coolant, unberth and purge and cool down in the holding anchorage.

Arrival Communications: Vessels intending to load LPG at Sitra will be contacted approximately 72 hours prior to arrival, and will be required to furnish the following information to BAPSHP BN:

1. Names of last 3 ports of call and ETA at 72, 48 and 24 hour intervals to No. 27 Buoy.
2. Arrival draft, departure draft, and berthing displacement.
3. State of readiness to berth/load and composition of vapours in ships tanks. If "hot", quantity required for cooling down procedure.
4. Order of loading, disposition of cargo to load and maximum loading rate.
5. Disposition of cargo already on board, and if intend co-mingling.
6. Ships particulars:
   (a) Length overall.
   (b) Distance bow to liquid connection.
   (c) Distance bow to vapour return connection.
   (d) Maximum freeboard of manifold during cargo operations.
   (e) Minimum freeboard of manifold.
7. Bunker requirements.
8. Radio "Porthealth Bn" with present health conditions.

This information should be updated every 24 hours or sooner should any major alterations to the original be made.

Arrival Procedure: VHF communications should be established with:

(a) BAPCO Terminal to obtain the latest berthing schedule.

(b) Bahrain Port Control to whom vessels should pass their intended passage route and timings from Bahrain Light Vessel to No. 27 Buoy, and obtain clearance.

Should the berth be unavailable, vessels will be directed to the Sitra Holding Anchorage, which is 1 mile South of No. 27 Buoy. Vessels carrying out cooling down procedures will also use this designated anchorage.

LPG vessels will not under normal conditions use the Sitra Inner Anchorage but if special circumstances warrant then permission must be first obtained from Bahrain Port Control.

Berthing and unberthing operations are at all times governed by prevailing weather conditions and the larger freeboard of LPG vessels will be taken into account when considering berthing prospects.

Mooring arrangements will be generally similar to those outlined for BAPCO Berths, but particular attention should be given to extra moorings when warning of imminent weather change is received.

GULF PETROCHEMICAL INDUSTRIES CO.: BAPCO Berths No. 1 and 2.

General: Ammonia and methanol are manufactured and stored at the GPIC plant situated 2 miles from the berths on the Southern side of the causeway. Ammonia is stored in 2 tanks at atmospheric pressure and at a temperature of −33°C with a total capacity of 40,000 tonnes. Methanol is stored in 2 nitrogen blanketed tanks at atmospheric pressure and ambient temperature with a total capacity of 40,000 tonnes also.

The 16 in. ammonia loading line and the 10 in. vapour return line terminate at a combined 10 in. and 4 in. Chicksan type arm. Methanol is similarly routed through a 16 in. loading line to a separate 10 in. Chicksan type arm.

Both products can be loaded each utilising 2 pumps at a maximum capacity of 1,200 tonnes per hour.

Methanol is a typical hydrocarbon product and is handled similarly to other products on the wharf.

Ammonia is a toxic product and should be handled with additional caution. The GPIC office on the wharf contains breathing apparatus sets and other equipment for emergencies.

Arrival Communication: Vessels intending to load ammonia or methanol will be required to provide the following information to GPIC (Telex: 9897, Answerback Kemia Bn) via Bahrain Radio:

1. Names of last 3 ports of call.
2. ETA at 72, 48 and 24 hour intervals to No. 27 Buoy.
3. Arrival draft, departure draft, berthing displacement and Tovalop for Methanol.
4. State of readiness to berth/load and composition of vapours and temperatures of ship's tanks. Noting for ammonia loadings that the vapour return line can only be utilised if the tanks are filled with gaseous ammonia.
5. Order of loading, disposition of cargo to load and maximum loading rate requested.
6. Disposition of any cargo already on board.
7. Ship particulars:
   (a) Length overall.
   (b) Distance bow to liquid connection.
   (c) For ammonia loadings: Distance bow to vapour return.
   (d) Maximum freeboard of manifold during cargo operations.
   (e) Minimum freeboard of manifold.
8. Loading arms terminate with flanges of:
   (a) Ammonia liquid – 10 in. × 300 ASA.
   (b) Vapour return – 4 in. × 150 ASA.
   (c) Methanol – 10 in. × 150 ASA.
   Vessel requested to inform if suitable sized and constructed adaptors not on board, giving manifold size flange required.
9. Any deficiencies in vessels equipment, safety appliances.
10. Bunker requirements.
   Vessels are required to radio "Porthealth Bn" with present health conditions.

Arrival Procedure: VHF communications should be established with:

(a) Bahrain Port Control to whom vessels should pass their intended passage route and timings from Bahrain Light Vessel to No. 27 Buoy, and obtain passage clearance.

(b) BAPCO Terminal to obtain the latest berthing schedule.

Both on VHF Channel 74.

Should the berth be unavailable, vessels will be directed to Sitra Holding anchorage, which is 1 mile South of No. 27 Buoy.

All the normal BAPCO Terminal procedures and regulations will apply in conjunction with additional safeguards.

In addition to the mooring lines required (5 head lines and 5 stern lines), 2 fore and 2 aft backsprings must be rigged. These backsprings must be of the same type of construction (nylon, polyprop, or wires with same length tails).

Access to the "T" head will be restricted.

Loading Masters: GPIC provide Loading Masters, independent of BAPCO, who will make all necessary arrangements, inspections and checks for the loadings.

The BAPCO Wharf Superintendent and his delegates have the responsibility for the overall safety and security of the wharf and access to the wharf will be restricted during ammonia loading operations.

Loading Information: As the loading pumps for ammonia have to be cooled down prior to operations the ship's maximum acceptable loading rate, up to 1,200 tonnes/p.h. cannot be changed after receipt of arrival telex.

The max. loading rate utilising 2 shore pumps is 1,200 tonnes/p.h.

Before commencement of any cargo operations the GPIC Loading Master and the vessels Loading Officer must mutually agree on the procedures for Normal and Emergency Stoppage.

Vessels must advise the GPIC Loading Master of any need to shut down loading, even on an emergency basis, so that the Terminal shut down systems can be activated before on-board valves are shut against the loading arms.

In the event of an emergency disconnection the loading arms will automatically rise about 2 m. above its current operating position with an arm full of product, leaving 1 quick closing valve connected to the vessel.

Prior to commencing operations the GPIC Loading Master and the ship's Loading Officer will mutually agree on the correct sampling procedure for the vessel.

Gas masks, breathing apparatus and first aid equipment must be checked for full serviceability and be ready to hand prior to commencing any operations.

Prior to and on completion of loading, the loading arms will be purged with nitrogen to displace the product on to the vessel.

During ammonia loadings the vapour return line should be used to assist in the displacement of the shore tanks. However, this will only be carried out if the ship's tanks are filled with gaseous ammonia. It is not permitted for the ship to vent inert gas or other vapours into the vapour return line.

ALUMINIUM BAHRAIN:

General: Berthing and unberthing operations are conducted on a 24-hour basis at the discretion of the Bahrain Pilot; wind, weather, tide and other circumstances permitting.

Owing to the confined area of operations and the strong cross currents experienced on the Inner Berth some arriving vessels may have to anchor South of No. 27 Buoy for slack water.

Full power must be available on the main engines and the vessel must be sufficiently ballasted for the operation envisaged. The Bahrain Pilot will decline to berth vessels if they are not properly equipped with satisfactory mooring lines, or if deck appliances are not operable, or if steering gear, telegraph and whistles are not in an efficient condition. The Master should notify the Pilot of any defects or peculiarities pertaining to his vessel.

Due to exposed location, vessels alongside the Inner Berth may experience considerable surging in rough weather and careful watch should be kept on mooring ropes. Slack lines present a hazard to the safety of vessels moored alongside. It is recommended that at least half hourly routine checks on moorings are carried out. The use of shore storm moorings are mandatory for vessels moored at ALBA Inner Berth. Vessels requesting additional lines to be run out, etc., will be given every assistance by shore staff.

Anchors: The "offshore" anchor should be cleared and lowered to the waterline, ready for letting go, before approaching the berth. Anchor buoys are not to be used.

Gangways: Vessels shall provide an efficient gangway, which shall be adequately lighted during the hours of darkness and be of sufficient length to provide safe access when the vessel is discharged.

Mooring Charges: BAPCO will make a charge for the use of tugs/tow-boats and services rendered during berthing and unberthing operations, and for tugs utilised holding/repositioning vessel if required during periods of inclement weather.

Smoking: Smoking is strictly prohibited on the ALBA jetty except at approved "Smoking Points". The Marine Superintendent Operations, Sitra has approved vessels berthed alongside the ALBA jetty as "safe places" for smoking except during bunker operations. This approval may be withdrawn by ALBA's Marine Superintendent or his delegate if any condition arises which in his opinion is likely to prove hazardous.

The Master shall be responsible for ensuring that the crew of the vessel are informed of the safe places so approved and that they comply with the regulations.

Swimming: Swimming is not permitted in the vicinity of the ALBA jetty.

Vessels' Engines: The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst alongside the jetty.

Fire Wires: Vessels berthed at the ALBA Jetty must have the eye of a wire hanging over the offshore bow and quarter to enable tugs to connect up readily in an emergency. The wire shall be suitable for the intended purpose and shall have sufficient scope on deck for free running. These wires must be tended to keep the eyes at sea level.

Shore Leave: Shore leave may be taken by *bona fide* crew members in accordance with the Regulations prescribed by the Government of Bahrain, and in accordance with the Agents' Notice to Masters.

All persons landing from vessels at ALBA's berths must use transport provided by the Agent between the ALBA Storage Island and ALBA Security Gate where they must show their shore leave pass, BAPCO 2564. It is not permitted to walk along the causeway between the Storage Island and ALBA Security Gate. All persons going ashore must hand in either their valid passport or Seaman's Continuous Discharge Certificate to the Immigration Officer and be cleared by the Customs Officer, both of whom are located in BAPCO's Sitra Shipping Office.

Communications: Vessels should provide their Agent through Bahrain Radio with:

1. ETA at least 72 hours in advance.
2. Names of last 3 ports of call.
3. Arrival drafts fore and aft.
4. State of readiness to berth/load/discharge.
5. Bunker requirements.

This information should be updated should any major alterations to the original be made.

They should also radio "Porthealth Bn" with present health conditions.

When within VHF range communications should be established with:

(a) Bahrain Port Control (Channel 74)

and

(b) BAPCO Terminal to obtain the latest berthing schedule from Bahrain Pilots.

During cargo operations while a vessel is alongside ALBA jetty, VHF Channel 8 is used for contact with the wharf staff. Masters are requested to maintain a watch on this channel. There are no facilities for providing vessels alongside with telephones.

ALBA Wharf: Description: The ALBA wharf is a pile driven, "L" shaped structure, 171 m. (562 ft.) long with a reinforced concrete decking. A mooring dolphin is situated 47.5 m. (165 ft.) to the N.W. and a warping/mooring dolphin 60 m. (197 ft.) to the S.E. These dolphins give the wharf an overall length of 281 m. (924 ft.).

The Alba Wharf can be easily accessed via the new constructed Alba 3.5 miles causeway, South of BAPCO Causeway. This causeway provides dedicated direct vehicular access from Sitra to the Alba Wharf without the need to utilise the BAPCO Causeway.

This causeway was constructed mainly to allow transport of raw material by Alumina bulk carrier tankers from Alba Wharf to main Alba smelter. It is exclusively for the use of Alba authorised traffic.

The old Aerial Ropeway raw material transport facilities are kept for petcoke and as a secondary means of alumina transportation.

Limitations: Outer Berth: Depth of berth is 11.3 m. (37 ft.) at Chart Datum. This allows vessels with a draft of 10.67 m. (35 ft.) to berth at all states of the tide.

Inner Berth: Forward: 9.15 m. (32 ft.) at Chart Datum.
Aft: 10.35 m. (34 ft.) at Chart Datum.

This allows vessel with a draft of 8.6 m. (28 ft.) to berth at all states of tide.

Displacement:

Outer Berth: Fenders on the Alba Outer Berth have been designed to accept loaded vessels of up to 57,000 tonnes displacement, with LOA of 189 m. (620 ft).

Vessels over 97.5 m. (320 ft.) LOA must have a minimum parallel body of 76.2 m. (250 ft.).

Smaller vessels with a LOA of between 40 m. (140 ft.) and 97.5 m. (320 ft.) may be berthed on one group of fenders either 1, 2 and 3 or 4, 5 and 6.

Inner Berth: The Inner Berth is designed to accept vessels of up to 12,000 d.w.t., with a maximum LOA of 165 m. (540 ft.) and with a maximum beam of 21 m. (68 ft.).

Facilities: A suction ship-unloader is installed on the Outer Berth as part of the Alba modernisation programme. The suction ship-unloader is capable of unloading alumina, petroleum coke and pitch from a bulk carrier of up to 40,000 tonnes deadweight.

The unloader is a "single job" type having a "free digging" rate of:

Alumina	550 tonnes per hour (approx.).
Petroleum Coke	550 tonnes per hour (approx.).
Pitch	Variable between 100 and 200 tonnes per hour.

Note: "Free digging" denotes the flow rate obtained at the start of unloading a full hold.

The annual quantities to be unloaded are as follows:

Alumina	880,000 tonnes (approx.).
Petroleum Coke	190,000 tonnes (approx.).
Pitch	44,000 tonnes (approx.).

If the suction unloader is out of service, vessels will be unloaded by 2×10 ton capacity grab equipped cranes, with maximum outreach of 28.6 m.

GULF INDUSTRIAL INVESTMENT COMPANY:

Gulf Industrial Investment Company (G.I.I.C.), P.O. Box 50177, Hidd, Bahrain. Tel: 673311. Telex: 9993 GIIC Bn.

Berthing/General: Under normal circumstances, berthing and unberthing operations are conducted on a 24 hour basis at the discretion of the Bahrain Pilot; wind, weather, tide and other circumstances permitting.

Owing to the confined area of operations for ore carriers arriving at the maximum permitted drafts for the berth, and the strong cross currents experienced on the berth, arriving vessels may have to anchor South of No. 27 Buoy for slack water.

Full power must be available on the main engines and the vessel must be sufficiently ballasted for the operation envisaged. The Sitra Pilots will decline to berth vessels if they are not properly equipped with satisfactory mooring lines, or if deck appliances are inoperable, or if steering gear, telegraphs and whistles are not in an efficient condition. The Master should notify the Pilot of any defects or peculiarities pertaining to his vessel.

Approaches: The area surrounding the wharf and its approaches have been dredged for deep drafted vessels of up to 12.8 m.

To assist in the pilotage, leading beacons and marker buoys have been installed. The beacons, rear (Gp. Fl. (2) 2 sec.) 12 m. and front (Qk. Fl.) 7 m. are situated parallel and 320 m. to the West of the wharf centreline, and provide clearance for maximum drafted vessel turning from the Main Fairway into the dredged area. The buoys, GIIC South (Fl. G. 3 sec.) and GIIC North (Fl. 3 sec.) mark the Eastern edge of the dredged area for unloading berth approaches.

Anchors: The "offshore" anchor should be cleared and lowered to the waterline, ready for letting go, before approaching the berth. Anchor buoys are not to be used.

Gangways: Vessels shall provide an efficient gangway, which shall be adequately lighted during the hours of darkness and be of sufficient length to provide safe access when the vessel is light.

Gangways shall not obstruct the ship unloader or ship loader railways, or obstruct the movement of these appliances.

Main Deck Access: The area between the ship's hatches and the dockside rail shall be prohibited for personnel access during the ship loading/unloading operations. All personnel shall be informed accordingly and suitable barriers installed and "No Entry" notices clearly posted.

Under no circumstances shall ship's crew ascend the shore loader/unloader or pass under the conveyor belts.

Illumination: Proper illumination shall be provided on the vessel's working decks, hatches, holds, and other working areas during the hours of darkness.

Swimming and Fishing: Swimming and Fishing or any other recreational activities from or on the jetty are strictly prohibited.

Fire Wires: Vessels berthed at the GIIC jetty must have the eye of the wire hanging over the offshore bow and quarter to enable tugs to connect up readily in an emergency. The wire shall be suitable for the intended purpose and shall have sufficient scope on deck for free running. These wires must be tended to keep the eyes at sea level.

Shore Leave: Shore Leave may be taken by bona fide crew members in accordance with the Regulations prescribed by the Government of Bahrain, and in accordance with the Agents' Notice to Masters.

All persons landing from vessels at GIIC's berths must hand in either their valid passport or Seaman's Continuous Discharge Certificate to the Immigration Officer and be cleared by the Customs Officer who are located at GIIC main entrance.

All persons landing from and rejoining vessels lying at GIIC jetty must use transport provided by the Agent between the Jetty and the Security Gate.

Access to the plant area shall be strictly prohibited.

Fire Points: The jetty is provided with fire fighting water and six hydrant points located along the berth.

Mooring Charges: BAPCO will make a charge for the use of Pilot, tugs/towboats and services rendered during berthing and unberthing operations.

Communications: Vessels should provide their Agent through Bahrain Radio with:

1. ETA at least 72 hours in advance.
2. Last 3 ports of call.
3. Arrival drafts fore and aft and berthing displacement.
4. State of readiness to berth/load/unload.

This information should be updated should any major alterations to the original be made.

They should also radio "Porthealth Bn" with present health conditions.

When within VHF range communication should be established with:

(a) Bahrain Port Control (Call on Channel 74), to whom vessels should pass their intended passage route and timings from Bahrain Light Vessel to No. 27 Buoy and obtain passage clearance.
(b) BAPCO Terminal to obtain the latest berthing schedule from Sitra Pilots.

Whilst alongside vessels will be provided with a telephone to communicate with the plant operators. In an emergency, vessels may utilise VHF Channel 68 to communicate with GIIC Terminal.

GIIC Wharf: Description: Situated to the North of Sitra Anchorage, and on the South side of the pelletising plant, is a 300 m. finger jetty constructed on concrete piles with a 35 m. wide concrete deck connected to the island by a 145 m. trestle. There are 2 mooring dolphins, one situated 75 m. to the South of the jetty, on the jetty centreline, and the other 79 m. to the North of the discharge berth. The jetty consisting of 2 berths, the discharge berth for iron ore on the Eastern side, and a loading berth for pellets on the Western side. 2 shore grab cranes, each with capacity 1,500 t.p.h. are available.

Parameters:

	Unloading	*Loading*
Length	300 m.	300 m.
Depth of water alongside at CD	13.4 m.	13.4 m.
Max. deadweight in tonnes	100,000	60,000
Max. displacement in tonnes	130,000	85,000
Max. freeboard to top of hatch	18.4 m.	16.5 m.
Max. outreach of appliances	29.5 m.	19.6 m.
Max. length of ship	290 m.	240 m.
Max. permissible draft of vessel for manoeuvring at all states of the tide	12.8 m.	12.8 m.

BALLAST: The discharge of dirty ballast within the territorial waters of Bahrain is strictly prohibited. As a further measure to avoid pollution by oil of the Marine environment, Masters of tankers are requested not to pump any oil overboard within the Gulf area.

Vessels should arrive with all ballast clean.

In special circumstances limited quantities up to 200 tons slops may be accepted at a certain charge per barrel. The use of these facilities is entirely at vessel's risk.

In the event of a vessel spilling oil in Sitra Harbour the Company will, at its discretion, clean up the oil and recover costs by charging the vessel.

MEDICAL: Advance notice to Agents preferable. Good hospital and medical facilities.

Emergency hospital cases will be treated as such, and will be handled by the vessel's Agent or by Company facilities, whichever is first available. Under normal conditions, the vessel's Agent should handle all personnel from vessels other than "Company" vessels.

RESIDUES: Limited slop tank facilities for oily residues at all berths.

Shipmaster's Report: May 1992.

BAPCO can receive up to 5,000 barrels of slops, provided their tanks are empty. Cost is U.S.$0.20 per barrel.

LOADING/DISCHARGING: *Readiness:* The following will apply in regard to Notice of Readiness.

Notice of Readiness to load is a warranty on the part of the Master that the vessel is in all respects ready to load and that the tanks, pipes, pumps and accessories of the vessel are fit to receive the cargo to be loaded.

The Master or his representative is required to hand to the Company, a written Notice of Readiness to load. Receipt of such Notice of Readiness by the Company does not necessarily imply acceptance.

The Company will make every effort to accept Notice of Readiness when tendered on arrival, provided vessel is in all respects ready to load. The Company will endeavour to load vessels upon arrival and/or as promptly as a berth is available.

Arrival, where used above, means when the vessel passes Sitra Beacon when proceeding straight to the berth or passing North Range Beacon on departure from Mina Sulman, or the time of anchoring in the area South of No. 27 Buoy providing that the presence of the vessel is made known to BAPCO Terminal on VHF or BAPCOSHIP (Tel: 755662) via Bahrain Radio, at the time of anchoring.

Responsibility: Loading will not start until the vessel's Loading Officer reports the vessel is ready to receive cargo and the Company's Loading Master is satisfied with the preparations for loading. Any inspection made by the Company's Loading Master in this regard is performed without the Company assuming any liability.

All operations on board the vessel in connection with loading and discharging are the responsibility of the vessel.

A Company Loading Master will be available throughout the loading to offer advice to the Master on loading procedures and loading hazards.

Warning is given of the danger of closing a valve against an incoming oil stream. This procedure will create excessive pressures which may result in damage to the loading hoses, vessel's pipe-lines or Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Hose Handling: Without assuming any liability on behalf of BAPCO, BAPCO employees will assist in connecting and disconnecting hoses to vessels. A ship's officer must be present, and the ship's deck officer on duty must approve the hose connection on board.

All unused cargo, bunker and ballast lines must be effectively and positively isolated during loading.

BAPCO has air operated hose handling rigs on Berths No. 1, 2, 3, 5 and 6.

BANAGAS has separate liquid and vapour return Chicksan arms for RLPG on Berths No. 1 and 2.

GPIC has combined Chicksan arms for ammonia liquid and vapour return, and separate Chicksan arms for methanol, on Berths No. 1 and 2.

The vessel's hose rigging derricks should be in a constant state of readiness to give additional assistance as necessary. BAPCO employees will not operate ship's derricks or winches.

For convenience, vessels should have fittings conforming to the templates or provide adaptors. This is not mandatory, but expedites hose rigging and guarantees a good connection.

Cargo Inspection Service: The service of the Bahrain Government, Ministry of Development and Industry, Oil Inspection and Gauging Inspectors are available for the inspection and certification of the condition of a vessel's tanks, pipes, pumps and appurtenances. the Agent will, upon request, arrange for the services.

This Cargo Inspection Unit also carries out quantity and quality checks as required.

BAPCO will not issue any certificate purporting to state that vessel's tanks, pipes, pumps and appurtenances are clean or acceptable for receiving cargo. In the event a BAPCO Representative either alone or accompanied by the Bahrain Government Petroleum Inspector, inspects the vessel, BAPCO will make no representation nor assume any responsibility in connection with the condition of vessel's tanks, pipes, pumps and appurtenances, nor will BAPCO assume any liability for contamination of cargo aboard ship caused by same.

Loading Rates: This table prescribes the approximate maximum loading rates of products available at the wharves:

Product	*Up to bbls.p.h.*	*Sea Lines*	*Hoses No. × Size (in.)*
Motor gasoline	12,000	3	2×8
Naphtha	10,000	2	2×8
Jet fuel (JP4 and JP5)	10,000	2	2×8
Kerosene	8,000	2	2×8
White diesel	12,000	3	2×8, 1×12
Black diesel	2,000	1	1×8
Fuel	30,000	3	2×12, 1×8
Press. LPG	400	1	1×3
RLPG (Loading)	10,000		12 in. Chicksan
RLPG (Vapour)	10,000		8 in. Chicksan

Loading rates of kerosenes and jet fuels are restricted due to static electricity hazards. These rates, dependent upon individual tank pipeline diameter and ship's current loading pattern, will be made available by the BAPCO Loading Master.

A maximum pressure of 135 p.s.i. is allowed on the loading hoses.

Discharging Rates: The discharge rates will be governed by the vessel's pumps, which must be limited to 135 p.s.i. at the manifold.

DENSITY: Average 1030.

FRESH WATER: Only in cases of extreme emergency will vessels be berthed at BAPCO Oil Wharves for water alone, and this at an additional docking charge to the berthing/unberthing.

There is no water available on the BAPCO, ALBA or GIIC Wharves except by barge.

Water is made available from lighters in the Sitra Anchorage. Requirements should be requested well in advance through the vessels' Agents.

FUEL: *Facilities:* Bunkers can be supplied at all oil berths and can be loaded simultaneously with bulk cargoes.

Bunker quantities are measured by "Brodie" positive displacement meters.

Chief Engineers are requested to avail themselves of the opportunity of checking the opening and closing counter readings on the meters supplying bunkers to the vessel.

Product	*Bunkering Rates are approximately* Bbls./hr.	Tons/hr.
Fuel oil	2,500	360
Marine diesel	1,500	200

Bunker Barge Service: BAPCO operates a bunker barge service principally to supply diesel and gas oil to vessels at Mina Sulman. This service is also available to vessels in the Sitra Marine Areas, but delays may occur due to adverse weather conditions. This service only operates to the West of Sitra Beacon except under special circumstances when vessels may be bunkered in the Explosives Anchorage.

This service is maintained by the barges "BAPCO 1", "BAPCO 2" and "BAPCO 3", and applications for use should be via the vessel's Agent and it is desirable to give as much notice as possible. The minimum notice for diesel and gas oil deliveries is 48 hours, weekends excluded.

"BAPCO 1": This self-propelled barge has the following capabilities of loading/discharging:

	Maximum Capacity	*Gas Oil*
Diesel/gas oil	bbls.	7,700
	tonnes	1,000
Discharge	bbls.p.h	100 – 1,500
Rates	t.p.h.	30 – 200

"BAPCO 2" and "BAPCO 3": These dumb barges have the following capabilities each:

		Diesel Gas Oil
Capacity	bbls.p.h.	1,300
	tonnes	170
Discharge	bbls.p.h.	50 – 760
Rates	t.p.h.	5 – 100

Lubricating Oils and Greases: A full range of Caltex lubricants and greases are available at Bahrain.

In order that lubricating oils may be promptly delivered, Masters of vessels or their Agent's are requested to telex their requirements at least 48 hours prior to their arrival to "Caltex Bn", Telex: 7039.

Empty lubricant containers are not accepted at Bahrain.

GANGWAY/DECK WATCHMEN: An officer must be on deck during all loading or discharging operations. A deck watch must be maintained for moorings and hose connections.

TOBACCO ALLOWANCE: No restriction.

WINE AND/OR SPIRIT ALLOWANCE: Ship's requirements. Bond sealed but can be re-opened upon application. Liquor trafficking between vessels alongside wharves or between vessels and shore strictly prohibited.

CONSULS: Embassies are established in Manama, Bahrain.

SURVEYORS: The American Bureau of Shipping, Norske Veritas, Hellenic Register and Lloyd's Register of Shipping have surveyors stationed in Manama, Bahrain.

REPAIRS: Local marine repair companies can undertake most repairs of general nature.

Also see "Mina Sulman".

REPATRIATION: Facilities for crew change and repatriation by sea or air.

AIRPORT: An international airport served by regular airlines located on Muharraq Island, about 15 miles from Sitra.

TIME: GMT plus 3 hours. No changes during year.

HOLIDAYS: Holidays do not affect operation of Port, which operates 24 hours a day, 7 days a week. Thursday and Friday are the official days of rest.

TELEPHONES: No facilities for placing telephones on ships.

SHORE LEAVE: Shore leave may be taken by *bona fide* crew members in accordance with the Regulations prescribed by the Government of Bahrain, and in accordance with the Agents' Notice to Masters.

All persons landing from vessels at BAPCO's berths must use transport provided by the Agent between the "T" berths and BAPCO's Security Gate where they must show their shore leave pass, BAPCO 2564. It is not permitted to walk along the trestle and causeway. All persons going ashore must hand in either their valid passport or Seaman's Continuous Discharge Certificate to the Immigration Officer and be cleared by the Customs Officer, both of whom are located in BAPCO's Sitra Shipping Office.

All persons landing from and rejoining vessels berthed at the Island Wharf must use the Agent's launch, landing on the steps on the South side of the Sitra Shipping Office.

IDENTIFICATION CARDS: Discharge Book or Passport to be deposited with Immigration when going ashore.

SEAMAN'S CLUBS: Bahrain Seafarers Society. Mina Sulman, Manama.

CURRENCY: The unit of currency is the Bahrain Dinar, which is divided into 1,000 Fils. The value of the Bahrain Dinar is linked to the value of the IMF Special Drawing Right.

NAVIGATION: The Superintendent – Marine Operations will be available for advice concerning navigation of channel.

Navigation Warnings: Attention is drawn to the service provided by the Middle East Navigational Aids Service (MENAS) in promulgating navigation warnings covering the whole of the Gulf area.

Mariners are requested to report any hazard/obstructions encountered, observed failure of or alterations to navigational aids, etc., to:

Middle East Navigational Aids Service,
Post Box 66, Bahrain,

or if the information is urgent, radio/cable to

Megulite, Bahrain or to Telex: 8246 Menas Bn.

Printed Navigation Notices:

(a) The notices promulgate all navigational information of a permanent or semi-permanent nature.

(b) Each notice, which is serially numbered, remains in force until specifically cancelled by a later notice, when the information in the notice is:
  (i) Known to have been promulgated in British Admiralty Notice to Mariners.
  (ii) No longer valid.
  (iii) Considered sufficiently promulgated.

(c) These printed notices are distributed to various Agents, Port and Harbour Authorities, where they can be viewed.

Radio Navigation Warnings:

(a) The warnings relate to navigational information which may immediately effect the safe navigation of ships at sea.

(b) These warnings are serially numbered, with the prefix "NAV" and authenticated by the signature "Megulite".

(c) The warnings are broadcast by Bahrain Radio (A9M) on 487 kHz on receipt and at 0518, 0918, 1318 and 1718 GMT. For further details consult the latest edition of "Admiralty List of Radio Signals" Volume V.

(d) Each radio warning is rebroadcast for a period of from 24 hours to one month, depending upon the nature of the information it contains. At the end of which period it is either self-cancelling or superseded by a new warning.

WEATHER: *Winds:* The direction and strength of winds in this area vary and change at very short notice without any prior indication. However, the prevailing wind is from the N.W.

For a more complete description of winds in the Gulf, refer to the "Sailing Directions".

Weather and Temperature: The local weather during the period May through September is hot and very humid with temperatures up to 45°C in the shade. Masters should be aware of the possibilities of crews experiencing heat exhaustion or heat stroke.

Weather during the remaining months is pleasant with temperatures ranging between 10°C to 25°C.

Visibility: The visibility is generally good but at times sand and fine dust is held in suspension in the atmosphere and visibility is greatly reduced. This haze can provide deceptive visibility. Fog, with or without dust, can occur in the mornings.

GENERAL:

Anchors: The offshore anchor should be cleared and lowered to the waterline, ready for letting go, before approaching the berths. Anchor buoys are not to be used whilst moored alongside in Sitra.

Rat Guards: Every vessel berthed at Company wharves must fit adequate rat guards to all mooring ropes and wires.

Gangway: Every vessel berthed at the wharves shall provide an efficient gangway, which shall be adequately lighted during the hours of darkness and be of sufficient length to provide safe access when the vessel has discharged ballast.

Where a safe and efficient gangway to the wharf cannot be installed due to wharf/ship configuration, an accommodation ladder shall be provided on the offshore side. Hose connections, in this instance, must be made by the ship's crew and the loading operations may be commenced providing suitable methods of communication are established. Delays due to the inability of wharf staff to board the vessel shall be for vessel's account.

Alternative Access/Egress: All vessels shall provide an alternative means of access/egress from the vessel for emergency use. This will normally take the form of a pilot ladder on the offshore side of the vessel, and as such should be constantly tended to 2 ft. above the waterline.

Fire Wires: All vessels berthed alongside BAPCO Berths must have the eye of a wire hanging over the outside bow and quarter, to enable tugs to connect up readily in an emergency. The wire shall be suitable for the intended purpose and shall have sufficient scope on deck for free running. These wires must be tended to keep the eyes at sea level.

Engines: The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst the vessel is alongside the wharves.

Port Police and Company Security: The Bahrain State Police maintains launch patrol in the vicinity of the wharves, and ex-officio have access to wharf installations in the course of their duty.

The Company maintains security guards and officers on its wharves to enforce the regulations of the Bahrain Government and to safeguard its own interests.

The Company security officers are fully recognised by the Bahrain Government and have the full powers of a police officer.

Masters are required to co-operate with any request made to them by a security officer.

Swimming: Not permitted in the vicinity of the wharves.

Publications and Charts: The following British Admiralty or U.S. Hydrographic publications are recommended for use in Bahrain waters:

British Admiralty
No. 3790 – Ras Laffan to Ras Tannura.
No. 3792 – Approaches to Mina Sulman and Al Manama.
No. 3796 – Mina Sulman and Approaches.
No. 3798 – Bahrain Outer Approaches to Mina Sulman.
The current edition of "The Pilot".

U.S. Hydrographic Office
No. 62411 – Ras Tannura to Ras Laffan.
No. 62412 – Approaches to Jazirat Al Muharraq.
No. 62413 – Sitra Anchorage.
The current edition of "Sailing Directions for the Gulf".

Bahrain Survey Directorate
No. 1501 – Approaches to Mina Sulman.

Launch Services: The Company does not provide launches for general use. Transportation of ship's personnel between vessel, the mainland of Bahrain and the wharves is provided by the vessel's Agents.

Tank Cleaning and/or Gas Freeing: Tank cleaning and/or gas freeing are not permitted alongside the wharves.

Fishing: Fishing is not permitted from the wharves or from vessels alongside as nylon lines constitute a safety hazard to personnel travelling on the launches and foul launch propellers.

Spares: Deck and Engine Room spares are not normally available in Bahrain.

Provisions: Supplies of provisions are available in Bahrain. All requests should be routed through the vessel's Agent prior to the vessel's arrival.

Laundry: Local laundry services are available.

SAFETY: The Company is primarily concerned with Safety, and Masters of vessels are requested to provide the maximum co-operation. Detailed regulations concerning safety are contained in the Sixth Schedule of the Bahrain Port Ordinance 1965 and certain of these regulations are summarised below for convenience:

Smoking: Smoking is strictly prohibited within 280 m. (900 ft.) of the wharves, and on board vessels alongside except in those enclosed spaces aboard ship specifically designated by the Master as "Smoking Areas". Failure to comply with this regulation can involve cessation of loading operations and unberthing pending complete investigation, and receipt of written assurance from the Master that effective controls have been established.

The Master shall be responsible for ensuring that the crew of the vessel is informed of the safe places so approved and that they comply with the Regulations.

The Company reserves the right in unusual circumstances to prohibit smoking at any time in any place on or adjacent to the Company's wharves during loading operations.

Fire Wires: Whilst alongside, vessels must have the eye of a wire hanging over the offside bow and quarter to enable tugs to connect up readily in an emergency.

Funnel Sparks: Whilst alongside, vessels must not blow boiler tubes, and every precaution must be taken to prevent sparks escaping from the funnel.

Vessels' Engines Alongside Wharves: The main engines and all gear must be in an operable condition and in a state of immediate readiness while vessels are alongside the wharves.

Trim of Vessels Alongside Wharves: During loading or discharging operations the loading officer must ensure that at no time does the vessel assume a trim which will, in case of emergency, preclude the unberthing of the vessel under her own power.

Scupper Plugs: All scuppers must be plugged and cemented prior to mooring alongside wharves.

Ullage Screens: During loading or discharge of highly volatile cargoes, all ullage pipes and sighting ports, when necessary to be left open, are to be protected by a fine mesh copper screen or gauze plug.

Fire Hoses: Whilst a vessel is within BAPCO's Terminal Area, her fire hoses shall be connected and kept ready for instant use.

Craft Alongside Vessels at Wharves: Once a vessel is berthed, no craft are allowed alongside. This applies to any local craft, agents' launches, etc.

Suspension of Loading: In the event that Safety Regulations are violated Sitra Pilots and Loading Masters are authorised to shut down loading operations.

Vessels Carrying Bulk Sulphur: Owing to the hazardous nature of this cargo, vessels having bulk sulphur on board are not allowed alongside the oil wharves and will be bunkered by barge as available.

Gas Venting: During loading, tanks must only be vented through the vessel's permanent venting system.

Tank lids must be closed prior to berthing and must be kept tightly closed throughout the period of loading. This includes permanent ballast tanks. During loading/discharge all openings must be protected by a fine mesh copper screen or gauze plug.

Radio Silence at Wharves: Vessels' radio and radar equipment, including the main VHF installation, must not be operated whilst alongside Company wharves.

Permission may be granted for the use of certificated intrinsically safe hand-held radios for the use of cargo operations only.

PORT REGULATIONS: The Superintendent – Marine Operations should be contacted for any queries not covered by lists of regulations provided on arrival.

SHIPMASTER'S REPORT: December 1979 (Updated 1994).

Anchorage: East of No. 27 Buoy, good holding ground with thick mud. Inner Anchorage thick mud and VLCC's not dragging with 6 shackles out, in force 7 winds.

Fuel: Diesel/Gas oil available from barge which holds about 1,000 L/t (BAPCOSHIP). Barge will not come alongside after 1800 hrs. or in rough weather but will stay alongside pumping after 1800 hrs. if already there. Will only bunker in inner anchorage.

AUTHORITY: The Bahrain Petroleum Company B.S.C. (closed), Bahrain Refinery, Bahrain. *Tel:* 755661. *Telex:* 8218 Bapshp Bn. *Cables:* Bapco Bahrain. *FAX:* 755890. *Contact:* Superintendent – Marine Operations.

The Harbour Master, Bahrain.

AGENT: See "Mina Sulman".

Baltic Deep-Sea Pilotage

THE BALTIC PILOTAGE AUTHORITIES COMMISSION (BPAC): (See Plan)

A non governmental organisation of pilotage authorities of the countries adjacent to the Baltic Sea, i.e.

Denmark
Estonia
Finland
Germany
Latvia
Lithuania
Poland
Russia
Sweden

Informs about:

Recommendations
Rules
Requesting Deep Sea Pilots for the Baltic

Recommendation on the use of adequately qualified deep-sea pilots in the Baltic: (Resolution A. 480 (XII) Nov. 1981.

The IMO recommends that ships which wish to avail themselves of deep-sea pilots in the area of the Baltic should only take deep-sea pilots licenced by a pilotage authority of a Baltic coastal state, i.e. Denmark, Estonia, Finland, Germany, Latvia, Lithuania, Poland, Russia and Sweden (IMO-Resolution A.480 (XII)).

Such licensed deep-sea pilots are in possession of a red identity card.

Port-of-Departure Rule: (1st January, 1983).

The pilotage authorities of the Baltic coastal States draw special attention to the following rule which came into force on 1st January, 1983:

Deep-sea pilotage in the Baltic Sea area shall be performed by deep-sea pilots from the respective ports of departure of the Baltic coastal States only, including the Kiel-Holtenau Locks, the Sound and the Belts. A deep-sea pilot shall disembark from a ship at the first port of call and shall return home as soon as possible.

If the ship wants further advice of a deep-sea pilot it is the responsibility of the local pilotage authority of that port to supply a deep-sea pilot.

Duty Hours: A deep-sea pilot should not normally be engaged on the bridge for more than 12 hours in 24 hours. Deep-sea pilots should take adequate rest periods between spells of pilotage and should reach agreement with the Master of the ship in advance regarding adequate rest periods to be taken during the passage. The appropriate pilotage authorities shall check that this is done to their satisfaction.

The Baltic Pilotage Authorities Commission: (4th June 1985).

Recognising that deep-sea pilotage helps to enhance safety of navigation and prevention of pollution of the marine environment, in particular to reduce the risks resulting from the high density of ships carrying dangerous or noxious cargoes and that the presence of a deep-sea pilot on board would strengthen a vessel's navigational team and improve emergency measures in case of incidents and *having considered* the necessity of establishing a certain order in the Baltic Sea, *recommends.*

A. Masters of ships which are constrained by the draft and
B. Masters of ships other than registered in one of the Baltic States, *infrequently* sailing in the respective area coming from or being bound for ports in the Baltic Sea.
C. Masters of oil tankers in loaded condition and all loaded chemical tankers and gas carriers, irrespective of size

to avail themselves of deep-sea pilots, certified by a competent authority of a Baltic coastal State.

IMO Recommendations: (Baltic Sea).

Recommendation on navigation through the entrances to the Baltic, (Resolution A.620 (15), Nov.1987).

The Assembly,

Recalling Article 15(j) of the Convention on the International Maritime Organisation concerning the functions of the Assembly in relation to regulations and guidelines concerning maritime safety and the prevention and control of maritime pollution from ships.

Being aware of the close relationship between safety of navigation and the prevention of pollution from ships.

Noting that, owing to the risk of grounding or collision and the strong sea current, the navigation of large ships through the entrances to the Baltic Sea constitutes a potential danger of pollution of the entrances and of the entire Baltic Sea area.

Noting also that ships carrying radioactive material constitute a potential danger of pollution of the entrances to the Baltic Sea and a potential hazard to international shipping.

Noting further that, at several places, the entrances to the Baltic Sea are difficult to navigate,

Taking note of

(a) Resolution 5: On International pollution of the sea and accidental spillage adopted by the International Conference on Marine Pollution, 1973.
(b) Resolution A. 159 (ES. IV): – Recommendation on pilotage.
(c) Resolution A. 156 (ES. IV): – Recommendation on the carriage of electronic position-fixing equipment.
(d) Resolution A. 339 (IX): – Recommendation on navigation through the entrances to the Baltic Sea.
(e) The established routeing system (Route T) through the entrances to the Baltic Sea.

Having considered the recommendation made by the Maritime Safety Committee at its fifty-third session.

1. Recommends

(a) That ships over 40,000 tonnes deadweight, when passing through the entrances to the Baltic Sea, in view of the fact that 17 metres is the maximum obtainable depth without dredging in the area N.E. of Gedser and that the charted depths, even under normal conditions, may be decreased by as much as 2 metres due to unknown and moving obstructions, should:

(i) not pass the area unless they have a draft with which it is safe to navigate through the area, taking into account the possibility of depths being as much as 2 metres less than charted as mentioned above, and additionally taking into account the possible changes in the indicated depth of water caused by meterological or other effects;
(ii) participate in the ship reporting systems (SHIPPOS) operated by the Government of Denmark; and
(iii) exhibit the signal prescribed in Rule 28 of the International Regulations for Preventing Collisions at Sea, 1972, in certain areas in the Store-Baelt (Hatter Rev, Vengeancegrund and in the narrow route East of Langeland) when constrained by their draft;

(b) That ships with a draft of 13 metres or more should furthermore:

(i) be equipped with a VHF radiotelephone installation capable of operating on appropriate frequencies;
(ii) have on board suitable electronic position-fixing equipment to make use of hyperbolic systems providing sufficient position-fixing accuracy for navigating in these areas;
(iii) use for the passage the pilotage services locally established by the coastal States; and
(iv) be aware that anchoring may be necessary owing to the weather and sea conditions in relation to the size and draft of the ship and to the sea level and, in this respect, take special account of the information available from the pilot and from radio navigation services in the area;

(c) That, irrespective of size or draft, ships carrying a shipment of Class 7 radioactive materials, as specified in paragraph 9.5.2. of the introduction to Class 7 of the International Maritime Dangerous Goods Code (IMDG Code), should:

(i) participate in the ship reporting system (SHIPPOS) operated by the Government of Denmark;
(ii) be equipped with a VHF radiotelephone installation capable of operating on appropriate frequencies; and
(iii) use for the passage the pilotage services locally established *by the coastal states.*

Recommendation on the use of pilotage services in the Sound: (Resolution A.579 (14) 20 Nov. 1985).

The Assembly,

Recalling Article 15(i) on the Convention on the International Maritime Organisation concerning the functions of the Assembly in relation to regulations and guidelines concerning maritime safety and the prevention and control of marine pollution from ships.

Being aware of the close relationship between the safety of navigation and the prevention of pollution from ships,

Being also aware of the urgent need to protect the Baltic Sea area, which is listed as a special area in Annex I to the international Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto.

Noting that navigation of loaded gas carriers and loaded chemical tankers of 1,600 gross tonnage and above carrying noxious liquid substances of category A or B, as defined in Annex II to the international Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto, and navigation of ships carrying a shipment of Class 7 radioactive materials as specified in paragraph 9.5.2 of the introduction to Class 7 of the International Maritime Dangerous Goods Code (IMDG Code), constitutes a potential danger of pollution of the entrances to the Baltic Sea and a potential hazard to international shipping.

Bearing in mind:

(a) Resolution 5 on Intentional Pollution of the Sea and Accidental Spillages, adopted by the International Conference on Marine Pollution, 1973,
(b) Resolution A. 159 (ES. IV) on pilotage,
(c) MSC/Circ. 158 of 5 April 1974 on control of movements of chemical tankers and gas carriers,
(d) Resolution A. 620 (15) on Navigation through the Entrances to the Baltic Sea,

1. Recommends that oil tankers with a draft of 7.0 m. or more, and all loaded chemical tankers and gas carriers, irrespective of size, and ships carrying a shipment of Class 7 radioactive materials as specified in paragraph 9.5.2 of the introduction to Class 7 of the International Maritime Dangerous Goods Code (IMDG Code), when navigating the Sound between a line connecting Svinbadan Lighthouse and Hornbaek Harbour and a line connecting Skanor Harbour and Allandshage (the Southernmost point of Amager Island), use the pilotage services established by the Governments of Denmark and Sweden.
2. Revokes Resolution A.427 (XI).

Estonia

The competent pilotage authority:

Estonian National Maritime Board
Co-Ordination Centre
9 Lume Street
EE 0004 TALLINN
Telex: 173027 EVA EE
Telefax: 372-6-339226
Phone: 372-6-339223

Deep-sea pilotage should be ordered 24 hours in advance.

When ordering Pilot, the following information should be given: Port of destination, size of vessel and cargo characteristics. Deep-Sea Pilotage only performed by licensed Government Pilots.

Finland

The competent pilotage authority:

Finish Maritime Administration
Traffic Department
PoB 158
FIN-00141 Helsinki 14,
Telex: 121471
Telefax: +358 (9) 0 1808431 or 1808475
Phone: +358 (9) 0 18081

A Deep-sea Pilot may be ordered via the vessel's agents or via all coastal Pilot Stations. Deep-sea Pilot should be ordered 24 hours in advance.

Deep-sea pilotage is performed by duly licensed government pilots during their off-duty time but under supervision.

When ordering a deep-sea pilot, the usual information of the port of destination, ship's size, speed, specific behaviour or unusual characteristics should be given in advance by the agent.

People's Republic of Bangladesh

CHITTAGONG: 22.19 N. 91.48 E.

DOCUMENTS: *Before Vessel's Arrival:*

2 copies Freight Manifest.
2 sets Bills of Lading.
3 copies Stowage Plan.
15 copies Passenger List.
4 copies Cargo Manifest.
3 copies Hatch Lists.
1 copy Exception Lists.
2 copies Passenger Money Manifest.
2 copies Special Cargo List.
2 copies Hazardous Cargo List.
2 copies Heavy Lift Cargo List.

With vessel:

1 set Arrival Papers as per booklet available from Agent.
2 copies Cargo Manifest.
Last Port Clearance.
Passenger Lists, disembarking and transit — 6 copies each.
Crew List, 8 copies plus 2 for Immigration Police.
List of Favour Parcels 2 copies.
Currency declaration of ship's money, officers and crew, together with the personal property list.
Ship's Stores Lists on local Customs forms – 3 copies.
Cargo Clearance Certificates.
Derat Exemption Certificate.
International Load Line Certificate.
Radio Safety Equipment Certificate.
Safety Equipment Certificate.
Record of Safety Equipment Certificate.
Load Line Certificate.
Ship's Articles.
Ship's Register.
Light Dues Receipt.
Radio Telegraphy Certificate.
Safety Construction Certificate.
Voyage Licence.
Exemption Certificate of Crew Members.
I.P.B. Permission of Foreign Nationals.
Gear Register Book with Annealing Certificate
Authority Letter of Supernumerary.
Stores List.

APPROACHES: Since South Patches Lightvessel is missing, it is advisable to make for Elephant Point/Cox's Bazaar, and then shape course to pass West of South Patches. Due allowance must be made for the state and rate of tide. In this area, the tide runs in a North–South direction.

Once it is ascertained that the vessel is West of South Patches, course can be shaped to pass 8 – 9 miles off Kutubdia Lighthouse. The buoys indicating the channel to Chittagong Outer Anchorage are mostly out of place or missing and cannot be relied upon. The buoys are unlit and without radar reflectors and navigating in their vicinity during hours of darkness can be hazardous.

A current and wave recorder has been placed at position Lat. 22° 10′ 39″ N., Long. 91° 47′ 37″ E., marked with a yellow spherical buoy. Flashing characteristics – flash white every 5 seconds. All vessels approaching Chittagong Roads, or leaving harbour or at anchorage, are advised to navigate with caution keeping a clear distance from the buoy.

Vessels must reach pilot grounds at mouth of River Karnaphuli 3 hours before H.W. of a particular tide. Both tides used for handling vessels.

PILOTAGE: Pilotage is compulsory. Pilots board and leave vessels 1.5 miles W.S.W. of No. 1 Sea Buoy.

Inward ships must present themselves at Fairway Buoy at least 3 hours before H.W. to enter on a particular tide, both day and night.

Night navigation possible for outward and inward movements of vessels upto 164.60 m. and 137.15 m. LOA respectively.

ANCHORAGE: The Anchorage is considered safe and the holding ground is good. The bed of the river is soft mud and is harmless in case of grounding.

Holding ground off Kutubdia fairly good but strong tides render it necessary to pay-out extra length of cable.

Spring tides at outer anchorage are very strong (6 to 8 knots) and at times of freshets the rate may be more. It is advisable to keep engines ready at all times during Spring tides, and maintain continuous and efficient anchor watches.

Ship Masters approaching Chittagong Roads are advised not to attempt to cross bow of vessels at anchor/underway to avoid drifting on them resulting in probable collision in view of the prevailing strong current at Outer Anchorage. However, if it is inevitable to cross, Ship Masters may do so with caution by giving a wide berth to the vessel at anchor/underway considering the minimum velocity of the current being 6 knots and other marine factors.

Vessels at the outer anchorage should maintain a deck watch forward and aft.

RESTRICTIONS: Night sailings both inward and outward are permitted, however with restriction on the vessels of up to 164.6 m. length for outward and 173.2 m. for inward. Night sailing not permitted for vessels with the bridge on the bow, vessels with the bridge aft are allowed but only up to 152.4 m. in length.

Draft: Normally between 7.5 m. and 9.14 m., depending on state of Karnaphuli draft restrictions. Published monthly.

Power Lines: The minimum clearance of Power Transmission Lines crossing over the River Karnaphuli from CPA Dock Office Tower – 21 (approx. Lat. 22° 18.04′ N., Long. 91° 48.47′ E.) on the opposite bank of the River Karnaphuli is 52 m. from jetty level and the transmission lines are charged at 132 kV. Mariners are advised to navigate with caution.

MAX. SIZE: Anticipated safe drafts are predicted three months in advance. The depth of water over the Outer, Inner and Gupta Bars is maintained at 4.42 m. at low water throughout the year. The bars are situated at distances of half, one and 4.75 miles from the entrance. In order to calculate the draft for entering and leaving port, the depth of 4.42 m. over the bars is added to the height of water in the tide tables for day tides. Also see "Tankers".

Shipmaster's Report: 1985.

Vessel with deep draft must go in on full tide and advice on this should be sought from a local source (Agent), and not rely on tables only, as local factors may affect the tidal situation considerably.

HEALTH: All vessels must send the standard quarantine messages by radio. Vessels which have touched ports between Port Sudan and Durban, on the East Coast of Africa including these two ports, or any other yellow fever port or other port on the continent of Africa, or ports which are declared from time to time as quarantine areas, are suspected vessels on account of yellow fever or jigger, or other infectious disease as the case may be and may not have communication with the shore till declared by the Port Health Officer, who attends only between sunrise and sunset, except in special circumstances. The incubation period for yellow fever is 9 days, but vessels arriving later than 9 days are still not free from quarantine because there is no incubation period for jigger.

RADIO: Chittagong Radio Control. MF/RT distress frequency 2182 kHz. SSB equipment with 200 mile range also available.

Arrival Advice: ETA advice should reach Agents 72 hours and confirmation cable at least 24 hours before arrival at the Pilot Station. While advising ETA Masters should bear in mind that W/T messages generally take minimum 12 hours to reach Agents.

The radio message should contain the following information:

1. Name of vessel.
2. ETA Pilot Station.
3. g.r.t.
4. n.r.t.
5. d.w.t.
6. Length.
7. Date and Hour sailed last Port of Call.
8. Quantity and description of cargo to discharge.
9. Next Port of Call.
10. Classification of Vessel and Nature of cargo carried.
11. Name of Master.
12. Max. arrival fresh water draft.

VHF: *Port VHF Service:* The Harbour Master can be contacted day and night on Channels 16 and 12. Calls may be connected to the public telephone system via Channel 27.

Private VHF Service:

(i)	Location:	Port Office.
	Call Sign:	"Port Radio Control".
	Position:	Lat. 22° 19′ 30″ N., Long. 91° 50′ 00″ E.
	Watchkeeping:	From 0830 – 1700 hrs. continuous.
	Frequency:	156.80 MHz.
(ii)	Location:	Port Signal Station.
	Call Sign:	ARH 24.
	Position:	Lat. 22° 14′ 03″ N., Long. 91° 50′ 34″ E.
	Watchkeeping:	(i) Duration of daylight Flood tide: beginning every hour. (ii) Duration of night Flood tide only when ship-movements are being performed: every half hour.
	Frequency:	156.80 MHz (Channel 16) (short range about 7 miles from Pilot Station to Anchorage).
(iii)	Location:	Pilot Vessel: Capt. Fuhrmann P.V. Rahnuma
	Call Sign:	AQEG.
	Watchkeeping:	(i) Duration of daylight Flood tide: every half an hour. (ii) As above.
	Frequency:	156.80 MHz (Channel 16).
(iv)	Location:	Patrol Tugs Kandari 7 and Kandari 8. (S. T. Khalid – under repair).
	Call Sign:	AQEF.
	Watchkeeping:	(i) Duration of daylight Flood tide: every half an hour. (ii) As above.
	Frequency:	156.80 MHz (Channel 16).
(v)	Location:	Sea-Tug "Suljuq".
	Call Sign:	AQEP.
	Watchkeeping:	Duration of daylight Flood tide and in emergencies.
	Frequency:	2182 kHz.

Remarks: Vessel should shift to some other Channel after contact has been made on Channel 16 (International Frequency 156.80 MHz).

A cable to be sent to Port Health Officer before arrival requesting free pratique, stating issuance date of Derat (Exemption) Certificate.

RADAR: No service available.

TUGS: Available, under direction of Pilot.

BERTHING: Chittagong port has 17 jetties (including 2 pontoon jetties) provided with shore cranes and railway tracks and with transit sheds. Vessels up to 186 m. LOA with day's draft may be berthed at a concrete main jetty. Depth of jetty berths range from 7.01 m. to 9.14 m. and depth at moorings ranges from 6.24 m. to 9.19 m. and above. Besides above jetties, there are jetties for the following:

Grain Silo Jetty: Grain silo has storage capacity of 170,000 tonnes, equipped with necessary equipment for unloading, storing from ship's tackle direct. Vessels up to 186 m. LOA can take berth at the jetty.

T.S.P. Jetty: Triple Super Phosphate Complex having storage capacity of 127,500 tonnes has been constructed adjacent to TSP Jetty and is equipped with necessary equipment for unloading/storing rock phosphate from ship's tackle direct. Vessels up to 175.25 m. are able to berth at TSP Jetty.

Cement Clinker Jetty: Cement clinker plant having storage capacity of 40,800 tonnes is adjacent to Chittagong Cement Clinker Jetty. The jetty is equipped with necessary equipment for unloading/storing cement clinker direct from ship's tackle. Vessels up to 175.25 m. are able to berth at the Cement Clinker Jetty.

Further there are 9 river moorings, out of which River Moorings Nos. 4, 5 and 6 are equipped with pontoons and shore connections for oil in bulk and River Mooring No. 7 for crude oil discharge in bulk. River Moorings Nos. 2, 3 and 8 are for dry cargo for overside work. River Mooring No. 9 is for repair of vessel/lay-by berth. River Mooring No. 10 for LASH vessels.

Container yard of 14,108.55 sq.m. and back-up yard facilities are available for handling container/container cargo vessels. Further there is one lighter jetty for vessels up to 70 m. with dry cargo and 5 lighter jetties for coastal and inland vessels/tankers.

CRANES: Variety of cargo handling equipment, maximum lifting capacity 125 tons.

STEVEDORES: Available through Agent. Working hours: Monday to Thursday and Saturday day shift, 0730 – 1200 and 1330 – 1700 hrs. Night shift, including Friday 2000 – 2400 and 0000 – 0400 hrs. Friday, day shift, 0700 – 1200 and 1400 – 1700 hrs.

MEDICAL: Doctors and Hospital facilities available.

TANKERS: Crude oil tankers up to a draft of 10.36 m. can be handled at the Outer Anchorage.

Clean tankers enter the river and berth at petroleum jetties inside the port, restricted to length of 170.73 m. overall, and subject to published river draft.

Tankers up to 60,000 d.w.t. discharge into lighters at Kutubdia anchorage where depth is 7 fathoms.

Also see "Shipmaster's Report" – May 1986.

DENSITY: From 1000 to 1004.

FRESH WATER: Available from quays. Also available at outer anchorage. Require 3 – 4 days notice. Capacity of water barge about 500 tons. Supply daylight hours only.

FUEL: All grades available at oil berths. Otherwise supplied by barge. The Government have occasionally suspended sale of bunkers to foreign vessels.

REPAIRS: Facilities for repairs available. Ships' engines may not be dismantled or immobilised whilst at berths or moorings without the prior sanction of the Port Authority.

DRY DOCK: Construction of a dry dock is in progress.

SURVEYORS: Germanischer Lloyd: Shaw Wallace Bangladesh Ltd, Rashid Bldg., Strand Road, Chittagong (P.O.Box 12). Tel: (031) 500624, 500628, 225416. Fax: (031) 225245, 225669.

HATCHES: Opened by ship's crew.

CARGO GEAR CERTIFICATES: International Cargo Gear Test Certificates not more than 12 months old must be presented to the Dock Labour Inspector before a vessel is allowed to use derricks/winches. Annealing and testing of gear at Chittagong is an expensive process. In certain cases dispensation can be obtained at the discretion of the Dock Labour Inspector.

CUSTOMS ALLOWANCES: 200 cigarettes or 0.5 lb. of tobacco and 1 bottle of wine/spirit per week per man or 2 pints of beer per day.

REPATRIATION: Possible.

AIRPORT: Patenga Airport about 5 miles from city.

TIME: GMT plus 6 hours.

HOLIDAYS: Eid-e-Milad, Shaheed Day, Independence Day, Bengali New Year, May Day, Buddhu Purnima, Shabe Barat, Jamatul Wida, Eid-ul-Fitr, Durga Puja, Revolution Day, Eid-ul-Azha, Muharram, Victory Day, Christmas.

POLICE/AMBULANCE/FIRE: Call "Port Control", Channels 12 and 16, call sign "S2YA" or Tel: 505021/505041.

SHORE LEAVE: Allowed, prior permission from Immigration arranged by Agent.

GENERAL: *Berthing Priority:* All concerned are reminded that vessels loading/carrying cargo/mixed-up cargo or loading/carrying cargo in less than 3 holds, or unequally stowed in more than 3 holds, or with inoperative ships derrick, will be classed as Grade-II ships and shall be given berth conveniently, and if required, shall be shifted to another berth/mooring or outer anchorge convenient to the Port Authority.

Frequent breakdown in the machinery and engine of a ship, will also entail her being classed as Grade-II ship and the consideration for priorities will rest on the Administration.

This will be strictly followed with effect from January 1st, 1984, and no further consideration will be entertained from that date.

Hydrological and Hydrographical Data: The width of the navigation channel (5.49 contour) varies from place to place. Effective width is between 243.90 m. to 304.88 m. A minimum channel width of 250 m. is maintained.

Tidal Works:	At Patenga	3.35 m.
	At Khal (Channel) No. 10	2.74 m.
	At Sadarghat	2.29 m.

Max. velocity of current opposite Khal (Channel) No. 10:

Spring Tides (S.W. Monsoon):	4.5 to 5.5 knots
Neap Tides (S.W. Monsoon):	2.5 to 3.5 knots
Spring Tides (Winter Months):	up to 3 knots
Neap Tides (Winter Months):	up to 2 knots
Freshet Ebbs (Winter Months):	up to 8 knots

Meteorological Data:

Temperature: 32.10°C Max., 13.40°C Min.

Rainfall: 24.25 Max., 0.10 Min.

Normal Pressure:

1018.80	Max.	0000 GMT.
1000.90	Min.	at 0600 hrs.
1016.20	Max.	0300 GMT.
1002.30	Min.	0900 hrs.
1013.00	Max.	1200 GMT.
1000.00	Min.	1800 hrs.

The following cautionary notice has been issued by the Chittagong Harbour Master:

"Shipmasters trading to Chittagong are informed that a hot sultry day/afternoon, followed by "Still" air conditions in the early evening, usually result in thunderstorms. The peculiarity of these thunderstorms is that they approach from the North and West in the form of a line squall, and are accompanied by intense lightning activity, thunder, rain and cyclonic rotation winds which may reach a velocity upwards of 50 knots.

When percursory signs of such a "North-Wester" storm exist shipmaster's must exercise great caution, have a responsible Officer on watch and attend carefully to moorings. Vessels at fixed moorings and pontoon jetties must exercise extreme caution when a North-Wester storm is blowing."

Mooring: Vessels moored alongside the pontoon jetty and vessels moored alongside each other must ensure that adequate numbers of rat guards are used to prevent movement of rats between ship/shore and ship/ship.

DEVELOPMENTS: Two multi-purpose berths of length 450 m. and 10.0 m. depth with back-up facilities are located downstream of No. 13 Berth to cater for the increased flow of containers. More cargo handling equipment will be procured in phases (16 forklift trucks, 8 tractor-trailer units, 27 cranes – including 19 × 6 tons and 1 × 30 ton mobile). Berth construction completed early 1991.

For maintenance or dredging of the navigational channel CPA is going to acquire a hopper dredger. Outer and inner bars to be dredged to 9.1 m. and 7.1 m. respectively.

SHIPMASTER'S REPORT: May 1986.

The route from Singapore to Chittagong was passing Pu. Perak, South Preparis Channel thence West of South Patches thence passing Kutubdia Island keeping to the deepest water. When Kutubdia Island Light bearing 109.5°×7 miles course altered 014° to make for position: Lat. 22° 05.6′ N., Long. 91° 46.2′ E. and from there into the Outer Anchorage. In this last area the minimum chartered depth is 8.5 m. therefore with the vessel on even keel draft of 10.95 m. (FW) required to stage across the shallows on the tide.

The S.W. monsoon had set in giving Westerly Force 4 winds in the Anamdan Sea and S.W. Force 4 – 5 in the Bay of Bengal with a confused S.W./N.W. swell. There was a strong Southerly – going current in the Bay of Bengal. The swell decreased considerably after passing South Patches.

The vessel anchored to await HW to cross the shallows in position Kutubdia Light bearing 046°×15.04 miles. There was another vessel anchored nearby on the position previously chosen. Unable to raise Chittagong on VHF from this position. After anchoring the wind veered N.W. and several squalls passed in the next few hours with gusts up to Force 9 – 10. These having passed through Chittagong Anchorage earlier.

The next morning proved fine with light winds and little swell and with HW at Chittagong 0840 hrs. (3.4 m.); Kutubdia Is. 0642 hrs. (3.25 m.); Normans Point 0717 hrs. (3.60 m.) aimed to cross the shallows with one metre under keel clearance and pass position: Lat. 22° 03′ N., Long. 91° 45′ E. at 0700 hrs. at the top of HW, allowing 0.25 m. for swell and 0.2 m. for squat at 6 knots. The density off Kutubdia Island was 1015.

The under keel clearance was not identified as the Sal Accord ceased to function under 2.0 m. (its minimum) and the chart recorder trace disappeared into the base line noise even at minimum settings. The seascape hovered around the one metre but when crossing the bar later did not give the same 1 ft. under keel clearance that was known from the tide guage.

Lightening Operations: The vessel anchored in Chittagong outer anchorage 'A' at 0840 hrs. in position Patenga Beacon 091°×3.1′. There were quite a few ships anchored in and outside this anchorage, mostly lightening, but there was room to have sufficient water under the vessel at LW and have 5 cables clear of other ships. Estimate the maximum current was 4 knots but no problems with 6 shackles in the water.

The first coaster arrived at 1050 hrs. with the Agent and Shore Officials onboard. After ullaging and sampling the cargo, gas/oil parcel, was started at 1310 hrs. Several coasters were used working both sides of the vessel and 11 trips were made. The vessels varied in size from 850–1,000 tons with one coaster of 1,500 tons.

Hoses were brought out with the first coasters and appeared in good condition but one set had obviously been used recently for black oils and although this was pointed out to the Shore Supervisor they were not changed. During the lightening to one of the coasters at the start, there was a blockage, which was found to be that one length of the hose had the inside stripped causing the blockage, this was changed and no further problems. The decks were well manned throughout the operations and there was no evidence of any smoking on the coasters. The discharge rates varied as the the requirements of the different vessels, but each side was given a separate line and tank so that quantities could be accurately measured onboard.

These coasters usually only use car tyre fenders when lightening vessels. Their shoulder is well padded with tyres and then more spread at intervals along the sides. The first coasters arrived with additional fenders made up from floating hoses. Originally one for each side. One being sufficient for the smaller vessels as their parallel body is short when in the light condition and subject to the most movement. I would have preferred two of these fenders for the larger vessel M.T. 'Doel' but the wire pennant parted while being brought off. As it happened the M.T. 'Doel' was well handled throughout and with their ropes being well tended there were no problems in just using one fender. The coasters, because they normally use the tyre fenders, were not well protected on the quarters but this was soon rectified by moving some of the tyres and having additional ones supplied. The hose fenders were fitted with polypropylene rope pennants shackled to a wire strop attached to each end of the hose. These did give problems caused by snatching with the movement and was solved by having them made fast to the coaster and ends passed over to us when they left to pass to the next vessel.

The weather was variable during the lightening but mostly the wind Southerly Force 4/5, this being near fore and aft caused the coasters to lay well alongside and to pitch rather than corkscrew, thus there was no danger from their superstructures. Once the wind veered to the N.W. and freshened to Force 7 gusting to Force 9 giving a rough sea. Luckily there were no vessels alongside at the time. This occurred at the change of tide and caused the vessel to sheer about as the squalls came through the anchorage. The rain squalls can be easily seen on the radar at 30 miles and seem to occur in the early evening, so the radar can give adequate warning.

The River Passage and Berth: Once the lightening has been completed the vessel has to wait for a daylight high tide to cross the bar into the river. The berthing programme can be obtained from Port Control by VHF after 1600 hrs. on the previous evening. On this occasion the notified Pilot boarding time was given as 0730 hrs. We had planned on being ready to weigh anchor at 0645 but at 0600 hrs. Port Control ordered us to heave up and come in for the Pilot. We were ready so we weighed and the Pilot boarded at 0704 hrs. (pilot ladder needs to be 3 m. above the water as the Pilot boards from a large tug). We then had to wait along with the other vessels at the Pilot Station all stemming the current until 0825 hrs. when there was sufficient water on the bar for us to cross. The Pilot had been keeping in contact with the Signal Station on VHF as the Signal Station monitors the tide guage.

Once the bar is crossed the river passage is quick. When off the berth the vessel is turned short round to starboard and may require the use of the starboard anchor. The turn is helped by a tug but this pushes and does not make fast. Once the vessel is round and stemming the tide the port anchor is made ready and when in position for the berth it is let go. The starboard head line is then run to the port head buoy. Then the port head line to the starboard buoy and the vessel is heaved across the berth into position while the after lines are run in the same fashion. Engines are required to prevent the vessel falling back on to the aft buoys. The final moorings are 3 lines each side to the opposite buoy thus 6 lines crossed each end.

The hoses come from a floating pontoon that is moored with another that is brought round to be between the pontoon and the ship. Access is by boat from shore. 4 extra men are supplied at the berth to help with the moorings and there are 2 mooring boats and a launch. 6 watchmen were supplied at the anchorage from the start and stayed with the ship in the anchorage and on the berth. The watchmen did a fair job and the vessel had no problems with thieves.

The Agents' telex was only working intermittently but found we could pass messsages via their branch office in Dhakra. Also found that the 3 VHF stations for the port had calling frequency VHF Channel 16 they then went to the working channel, mostly Channel 12, but often they had to be contacted on the working channel. Chittagong Radio calling is Channel 16 and working 24/26; was weak but workable.

While lightening there was difficulty for the Supervisors as there is no direct contact with the installation other than making a link call. However, one of the coasters has VHF and if it can be persuaded to keep it on then some sort of contact can be maintained.

SHIPMASTER'S REPORT: December 1992.

Agents: The Agents have VHF, but do not keep continuous watch. They can be contacted by telephone through Chittagong Radio, working on Channel 27.

Approaches: B.A. Charts No. 859 and 84.

From S.W. of Sri Lanka to 21° 00′ N., 92° 00′ E. to avoid Firing Area 'B', then to 21° 30′ N., 91° 40′ E., then to 22° 00′ N., 91° 40′ E., between Firing Area 'A' and North Patches, then to 22° 14.5′ N., 91° 42.2′ E. to skirt the anchorage area and approach an anchorage point with Patenga Point bearing 106° × 2.75 miles, intending to arrive about 1 hour before H.W. at Norman's Point and stem the tide on a course of 160° when anchoring.

None of the navigation marks or buoys were sighted, even though visibility was good, but radar positions were obtainable from the coast.

A number of fishing boats were passed using oil lights which were picked-up on radar before being visible.

Speed was reduced for the approach and using tide prediction charts for Kutubdia Island and Norman's Point, allowance made to maintain water under the keel, according to chart soundings, and there was sufficient water to approach safely at a draft of 10.69 m., mostly at dead slow ahead, nominally 5.3 knots, on arising tide all the way.

It was necessary to reverse course for a short period to allow the rising tide to catch up.

Anchor was let go in the planned position which was approached steering 140° T and making good 106° T.

Anchor was let go moving dead slow ahead, but stern movements were required to maintain sternway over the ground and vessel brought up with 9 shackles in the water.

Anchorage: The bottom is soft mud and the holding ground poor. With 9 shackles and a high holding power anchor in a charted depth of 12.4 m., this vessel at 49,184 tonnes displacement dragged anchor and required slow ahead on the engines (8.0 knots), to maintain position, this was with the lightening vessel alongside.

Some areas of the anchorage were found to be deeper than charted and the depths changed with each tide.

Particular emphasis is made by the Port Control and Agents not to pass ahead of other vessels at anchor due to the strong current.

The dragging line is 160° and 340°.

Communications: Port Control keep watch on VHF Channels 16 and 12 on a 24 hour basis, and should be contacted on approach and on anchoring, and will advise the Agents of a vessel's arrival.

This vessel was to discharge to lightening vessels at the anchorage. The lightening vessel made contact on VHF and was helpful with information.

The Agents have VHF, but can also be contacted by telephone through Chittagong Radio on VHF Channel 27.

Pilots: Not required to anchor in the Outer Anchorages 'A', 'B' and 'C'.

Clearance: The Charterer's Agent, one Customs Officer and Cargo Surveyors boarded at 0800 hrs. and the bonded store is sealed.

All normal declarations are required, but the Agent will also have a quantity of other forms in triplicate to be completed and signed, mostly duplicating the ship's standard declarations. The certificates requested are taken ashore to complete the clearance and returned on Outward Clearance.

Personal Currency Declaration is required.

List of Agent's forms:

Letter of Authority.
Load Line Certificate.
Certificate for Opium and Dangerous Drugs.
Arrival Report.
List of Certificates for Certificated Officers.
Maritime Declaration of Health.
Stores List, in triplicate.
Arms and Ammunition List.
Dock Labour Certificate.
Deck Cargo Certificate.
No Bangladesh Crew Certificate.

List of Certificates and Documents:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Record of Safety Equipment.
Safety Construction Certificate.
Safety Radio Telegraphy Certificate.
De-Rat Exemption Certificate.
Last Port Clearance.
Crew List, 7 copies.
Ship's Articles of Agreement.
Gear Testing Certificate Register.
International Oil Pollution Prevention Certificate.
Ship's Radio Station License.

Officers' Certificates of Competency, for Master, Chief Officer, 2nd Officer, 3rd Officer, Chief Engineer, 2nd Engineer, 3rd Engineer, 4th Engineer and Radio Officer.

Officials: One Customs Officer boards to clear the vessel with the Agent, both inwards and outwards.

It is possible that a Customs rummage crew will board to search the vessel, so all declarations should be accurate.

Thieves: Board regularly at anchorage and are particularly interested in mooring ropes.

Local watchmen should be employed. On a previous visit to the port, one of the watchmen employed was identified as having been amongst a band of thieves previously chased off, after cutting the mooring ropes in use, before shore watchmen were employed.

Three watchmen were ordered, but the Agent brought six, as three would be insufficient for a vessel of this size.

Food and accommodation are required for the watchmen.

Density: At the anchorage, it varied between 1008 and 1010. The water is generally very muddy, and a sample in a 10 oz. coffee jar resulted in 10 mm. of silt settling in the bottom.

All drafts are requested in fresh water.

Cargo Work: This vessel was to discharge a cargo of bulk wheat to a draft of 7.0 m. in order to get into Mongla.

Lightening vessels of around 8,000 – 12,000 d.w.t. are brought alongside. They are well fendered, and are equipped with grain vacuvators and pipework. Drums of diesel fuel for the machines are transferred to the discharging vessel and set up on deck.

Allow 100 metric tonnes for this equipment.

14 vacuvators were brought on board, but only 12 were used at a time, and an overall discharge rate of 173.2 t.p.h. was achieved for 18,445 tonnes, about 14 t.p.h. each vacuvator.

About 100 stevedores accompany this equipment and camp out on deck, complete with cooking fires, firewood, vegetables and live chickens, the smell of curry cooking on a wood stove is delicious.

This vessel with side opening hatches was ideal for camping out, but problems could have been experienced if it was required to close the hatches for rain.

It took about 8 hours to set up the equipment, but once started, discharge was continuous to each lightening vessel, even when steaming around the anchorage whilst dragging anchor.

About 2 hours is required for disconnecting and re-connecting the pipework when changing lightening vessels.

Ship's cranes are used to rig and adjust the equipment in the holds.

Accommodation: Accommodation is required for Stevedore Supervisor, foreman and 3 persons, and food and accommodation for a Cargo Superintendent appointed by the Receivers, in addition to food and accommodation for any watchmen employed.

A number of other people request accommodation, but are usually put off by insisting that an Agent's letter is issued, also all spare accommodation on board was filled.

Thunder Box: A thunder box is required by the stevedores. Even though a stevedores toilet was available, the vessel was advised not to allow it to be used.

Fresh Water: Required by the stevedores, and 4×250 ltr. drums (ship's supply) were required 3 times a day.

Supplies of fresh water are available by barge at the anchorage, but should be ordered early. On this visit, 150 tonnes were ordered, but only 100 tonnes were delivered in 2×50 tonne lots, although the barge was large enough to carry the full order at one visit.

Fresh Provisions: Fresh provisions and most stores are available at reasonable prices.

There are a number of ship chandlers with varying prices. On this occasion, Anowar Traders were used, but took a long time to deliver, and then only after a reminder from the Agent, and also failed to bring the priced accounts before the vessel sailed.

Repatriation: Can be arranged. Departing crew members must complete an accurate Effects Declaration, in triplicate, including all currencies.

AUTHORITY: Chittagong Port Authority, Bandar Bhaban, P.O.Box 2013, Chittagong, Bangladesh. *Telex:* 66264 Port BJ. *Cables:* Potasraya.

MONGLA (Bagerhat), formerly Chalna Port: 22.29 N. 89.36 E. (See Plan)

PORT LIMITS: *To the North:* A line drawn due East-West from a point in position Lat. 22° 38′ 00″ N., Long. 89° 20′ 00″ E. to a point in position Lat. 22° 38′ 00″ N., Long. 89° 40′ 00″ E.

To the South: A line drawn due East-West from a point in position Lat. 21° 27′ 00″ N., Long. 89° 20′ 00″ E. to a point in position Lat. 21° 27′ 00″ N., Long. 89° 40′ 00″ E.

To the East: A line joining the point in position Lat. 22° 38′ 00″ N., Long. 89° 40′ 00″ E. to a point in position Lat. 21° 27′ 00″ N., Long. 89° 40′ 00″ E.

To the West: A line joining the point in position Lat. 22° 38′ 00″ N., Long. 89° 20′ 00″ E. with the point in position Lat. 21° 27′ 00″ N., Long. 89° 20′ 00″ E.

The centre of the permanent port jetty is in position Lat. 22° 29.32′ N., Long. 89° 35.57′ E.

DOCUMENTS: See "Chittagong".

ARRIVAL ADVICE: Inward ships must present themselves at Mongla Fairway Buoy at least 3 hours before HW at Hiron Point to enter on a particular day.

The Master should send the following information to port via Khulna Radio call sign S3E and Pilot Station call sign S3K 24 hours prior to arrival at Mongla Fairway Buoy.

1. ETA Mongla Fairway Buoy.
2. Fresh water draft.
3. Speed available.
4. Vessel's length.
5. Vessel's gross tonnage.
6. Fresh water requirements.
7. Flag of vessel.
8. Local Agent.

APPROACHES: Approaching from the East vessels should carefully monitor soundings and try to stay between the 10 and 20 fathom lines and alter course to North when at swatch of no ground. Vessels should sight Mongla Fairway Buoy (Fl. 1 long 10 sec.) on this course and should then contact Pilot Station for further instructions. Due care should be taken to appreciate the tide condition because vessels have been known to drift North/Northwest during strong floods and run aground in the shallows. Approaching from the West, vessels should manoeuvre to keep to the South of the 20 fathom line and steer a course of about 045°(T) when Western end of swatch of no ground is reached. This course will take the vessel to Mongla Fairway Buoy. Due care should be taken to guard against Northerly set during flood times. When approaching from S.E. or S.W. similar action as before should be taken on reaching the edges of swatch of no ground. Due care should be given to avoid the wreck of m.v. "Cherry Laju" in position Lat. 21° 26.4′ N., Long. 89° 30.2′ E.

PILOTAGE: Compulsory. Master should in addition to usual ETA to Agents keep in touch with Pilot Station at Hiron Point about 45 miles from the base calling S3K. Pilot Station is equipped with radio and maintains regular watches on 500 kHz from 0600 to 0800, 1000 to 1200, 1400 to 1600 and 1800 to 2000 hrs. local time. If a message is not being picked up, by Khulna Radio call sign S3E, it should be relayed through Chittagong Radio or the Pilot Station.

Ships over 5.0 m. draft are usually piloted on the flood to cross the bar and the pilot vessel, which has been in contact with the incoming ship, leaves from Hiron Point in time to coincide with the arrival of the vessel at the pilotage ground, situated about 5 cables S.W. of B-18 Buoy where ships can anchor. The channel from Fairway up to the B-18 Buoy has been marked with lighted buoys and pilotage is carried out by the Master.

In rough weather and especially during the monsoon, ships are led into calm waters by the pilot vessel, which maintains close radio contact, and Pilots board inside the river.

Night navigation is allowed for vessels up to 140 m. in length subject to the following conditions:–

(a) Ship's radar, gyro-compass, steering system should be in perfect working order.

(b) Weather conditions should be good and favourable.

(c) Booking for arrival/departure should be done at least 24 hours in advance.

(d) Minimum manoeuvring speed should be 10 knots.

(e) Maximum draft allowed 6.5 m.

(f) A boat will be employed with a searchlight to remove all country boats, barges and any other obstacles in the channel within the harbour limit.

ANCHORAGE: Mongla port consists of a sheltered deep-water anchorage at Mongla on Pussur River.

Depth of water 5.8 m. to 23.0 m. at LLWD. Distance from sea 65 miles.

RESTRICTIONS: Entrance to the Pussur River is about 6 miles wide at the mouth and has a bar over about 5 miles where the depth is 5.8 m.

MAX. SIZE: Ships drawing up to 7 m. can cross the bar in all seasons. In S.W. monsoons vessels up to 8.0 m. can be accommodated on spring tide. Also see "General".

HEALTH: On arrival at the mouth of the Pussur River, vessels are required to radio "Quarantine" Khulna, giving health report, to avoid difficulties with Port Health Authorities.

RADIO: At present coast station Khulna Radio of Telegraph and Telephone Dept. maintain 24 hours W/T watch on 500 kHz call sign (S3E). In addition to the T & T system, the port has harbour control station (call sign S3K) at Mongla and Pilot Station (call sign S3K) at Hiron Point to maintain 24 hours W/T watch on 500 kHz. The station at Hiron Point guides incoming and outgoing vessels from fairway to pilot grounds and vice versa and remains in touch with Khulna Radio, Mongla S3H and ships anchored at Hiron Point for movement of Pilots, mooring of vessels, etc.

VHF: The Pilot Station and harbour control of Khulna and Mongla are equipped with VHF Channel 16.

TUGS: 3 powerful tugs available to assist in emergency. Not required for berthing.

BERTHING: 8 swinging moorings and 21 anchor berths. 5 jetties also available.

CRANES: Cranes of 3, 5, 40 and 100 tons are available at the new jetties.

STEVEDORES: Plenty of labourers available.

TANKERS: Oil is not handled at the port at the present time.

DENSITY: The density of water at the Outer Bar varies from 1005 to 1025 and at Mongla from 1002 to 1015.

FRESH WATER: Available by barges.

FUEL: Fuel oil can be arranged in limited quantities if sufficient advanced notice given.

FIRE PRECAUTIONS: Fire fighting tugs are available.

CONSULS: None.

REPAIRS: Minor repairs can be arranged through Khulna shipyard.

DRY DOCKS: A dry dock for sea-going vessels is under construction at Chittagong.

SURVEYORS: Lloyds/NKK. P&I Club and private surveyors are available at Khulna.

GANGWAY/DECK WATCHMAN: On receipt of orders from the Master the Stevedores will arrange to supply watchmen by day and night.

Piracy: Acts of piracy have taken place at the port.

HATCHES: Opening and closing of hatches is normally carried out by the stevedores.

CARGO GEAR: Goods loaded and unloaded by the ship's gear, handling equipment and crane available at the port jetty.

REPATRIATION: Local shipping Agents are responsible for arranging repatriation of the crew.

AIRPORT: Jessore, which is 70 miles from the port.

TIME: GMT plus 6 hours.

HOLIDAYS: Eid-ul Azha, Moharram, Eid-I-Miladun Nabi, Independence Day, Jamat-ul-Bida, Eid-ul-Fitr, depending on the sighting of moons calculated in the basis of moon months.

POLICE/AMBULANCE/FIRE: Police telephone no. 222 and for other purposes Assistant Harbour Master's telephone No. 61460 is available.

TELEPHONES: No arrangement is available at the anchorage for placing telephones on board the vessels.

SHORE LEAVE: Crew members of foreign vessels are allowed to disembark ashore subject to Immigration permission.

IDENTIFICATION CARDS: Seaman's Book is sufficient for identification.

REGULATIONS: Crew members are not allowed to undertake chipping/painting of vessels whilst in the port. This is to be done by licenced contractors.

DELAYS: No unusual delay in the port.

GENERAL: Port of Mongla Authority

INSTRUCTIONS FOR MASTERS OF VESSELS:

1. As these are fresh water drafts, the incoming ships should give necessary allowance. The outgoing ships may have to leave anchorage a day earlier to take advantage of next A.M. tide at Outer bar.
2. Inward ships must present themselves at Fairway Buoy at least 3 hours before high water at Hiron Point to enter on a particular day.
3. Masters should send the following information to Port Khulna, via Khulna Radio (call sign S3E) and Pilot Station S3K, 24 hours prior to arrival at Mongla Fairway Buoy: (a) ETA Mongla Fairway Buoy; (b) fresh water drafts on arrival; (c) anticipated fresh water drafts at the time of sailing; (d) speed available; (e) length; (f) gross tonnage; (g) fresh water requirements; (h) nationality; (i) local Agents.

   In addition to Khulna Radio (call sign S3E) Harbour Control Station (call sign S3H) and Pilot Station (call sign S3K), maintain 24 hours W/T watch on 500 kHz. The ships are strictly to follow the instructions given by the Pilot while crossing the Outer Bar and anchor 5 cables S.W. of B-18 Buoy at Hiron Point and wait for the Pilot. The time of crossing the Outer Bar is given by the Pilot Station under instructions from the Pilot. QTG service available. VHF on Channels 16 and 11 available at Pilot Station Hiron Point, Harbour Control Mongla and Port Control Khulna.
4. *Important:* Ships due to enter must keep W/T and VHF Channel 16 watch while crossing Outer Bar and International Radio watch while waiting for Pilot at Hiron Point and in the vicinity of Fairway Buoy. Whilst navigating in Port Limits, W/T and VHF Channel 16 watch would be maintained as advised by Pilot.
5. All vessels entering port shall display their signal letters and the mooring/anchor berth in addition to pilot flags. They are also to display their signal letters while waiting for Pilot at Hiron Point and/or in the vicinity of Fairway Buoy.
6. The Port can reduce these declared drafts without notice.
7. Ship Owners and their Agents are advised to consult the Harbour Master's Office regarding incoming and outgoing deep draft vessels well in advance.
8. *Outward Ships* of deep drafts will leave the anchorage with the first of flood at Mongla.
9. Vessels entering or leaving Port must have full power on main engine and deck machinery and both anchors must be available for use at all times.
10. Masters are advised to manoeuvre with great care and make good lee while receiving and disembarking Pilots. A neat and clean pilot ladder as specified in Merchant Shipping (Pilot Ladders) Rules 1967. Manropes and boat ropes should be ready on lee side. A responsible Officer must be present on the deck near the pilot ladder while Pilot boards/disembarks and a lifebuoy must be kept handy near the pilot embarkation/disembarkation point for emergency use and also bulwark ladder for climbing down on deck.
11. In spring tides, ships of less than 10 knots shall not be permitted to transit the river. However, if permission is given under special

circumstances, a suitable tug will have to be hired from the Port to escort the vessel within the Port limits. Requests for the tug must be made at least 24 hours in advance.

12. In adverse weather if boarding is not possible at Hiron Point, the pilot vessel will lead incoming ships up to Sibsa (Akrampoint), where the Pilot will board in sheltered water.
13. Vessels of 182 m. length or more are required to have a tug standing-by during in and outward river passage and if the length is more than 198 m. a tug may be required to standby throughout her stay in the Port at the discretion of Port Authority.
14. The length of vessels entering the Port is restricted to 200 m. and may be increased depending on the season and circumstance of the case and normally only 2 vessels of more than 182 m. can be accommodated at a time.
15. Masters of the visiting vessels are advised to ensure that while their ships are in the anchorage, no Officer or crew travels to and from ships in native boat, sampan or any other boat, not authorised by the Port Authorities to ply in the anchorage for carrying passengers.
16. Masters of the visiting vessels are also advised to post 3 watchmen on duty, one on the forecastle, one aft and one on gangway all the time the ships are at the anchorage. The watchmen shall be provided with lifebuoys for use in emergency.
17. While the vessels are in Port, the Masters are to ensure that no ship's crew is employed for chipping, painting and working overside.
18. In port limits, wireless communication with any station except those operated by Port or Khulna Radio (S3E) is strictly prohibited.
19. In case of *emergency* whilst at anchor/mooring in harbour limits, the Assistant Harbour Master should be immediately contacted: (a) by use of lamp signal to signal tower; (b) by W/T on 500 kHz, call sign S3H; (c) VHF Channel 16.
20. Masters of vessels are advised that more than 8 barges or 4 flats (one flat being equivalent to 2 barges) should not be allowed to lie alongside. Under adverse conditions, this permissible number may further be reduced.
21. Whilst in anchorage limits, adequate anchor watch should be maintained and power on main engines and deck machinery should be available on immediate notice, specially during spring tides and inclement weather.
22. Fire hoses should be rigged and water kept running when working cargo of jute, jute goods and any other inflammable cargo.

Harbour Master, Mongla Port Authority, Bagerhat.

Requirements and Instructions for Securing to Single Swinging Buoy:

1. Wire snotter. Length = 1 m. wire size = 10 mm.
2. Slip wire with eyes. Length = 100 m. Wire size = 20 mm.
3. Nylon mooring rope. Length = 100 m.
4. 1 mooring shackle.
5. 1 small shackle, 5 tons.

Procedure for Preparing Chain for the Buoy (See "Plan"):

(a) Secure port anchor and break the chain.
(b) Pass the mooring shackle through the last open link.
(c) Pass the wire snotter through the 5th transverse link, counting from the chain end and then connect the eyes of the snotter with the small shackle.
(d) Lower the chain through the fair lead or panama lead from the port side, 2 transverse links into the water.
(e) Lower the slip wire from the port side down to the water level.
(f) Keep the nylon rope ready on the starboard side for lowering to the mooring party.
(g) When the vessel is close to the Buoy pass the nylon line to the mooring boat and make fast the vessel to the buoy with the nylon mooring rope.
(h) Connect the chain.
(i) Pass the slip wire and make it fast, keep it slack so that the weight is taken by the anchor chain.
(j) Let go the mooring rope and take it onboard.

SHIPMASTER'S REPORT: October 1991 (Updated 1994).

Anchorage: Special attention is required when anchoring in the Fairway/Roads. When lowering the first shackle into the water, the vessel should be stationary. When the vessel has one shackle on deck, drift back using the current until there are 7 shackles in the water.

Vessels should avoid anchoring in the above area and at Hiran Point Anchorage during S.W. monsoon season and during a depression, as over 1,000 anchors and chains have been lost.

The local authorities do not advise Masters of the above.

Loss of anchors and chains can delay ship's clearance and involve additional costs for extra pilotage and tug escorts.

Approaches: On approach, the Pussur River Estuary is marked by Fairway Buoy and 9 pairs of buoys. Masters of vessels are requested to contact Hiron Point Station (S3K) to confirm the latest positions of buoys.

Documentation: Officers and crew should declare all their personal effects. All deck stores and provisions should also be declared.

Vaccination List and yellow cards are examined by Health Control. If so much as an apostrophe is missing next to doctor's signature, vaccination is considered void and vessel is debited for a new certificate.

SHIPMASTER'S REPORT: December 1992/January 1993.

Pussur River Bar:

Position: 21° 27′ N., 89° 35′ E.

Charts: B.A. Charts No. 859 and 732.

Arrival Times and Drafts: Vessels should arrive at the Fairway Buoy when entering and Hiran Point when leaving, 3 hours before H.W. at the Pussur River entrance.

Anticipated drafts published by Mongla Port Authority for 1992 varied from a low of 6.36 m. on the A.M. tide (27th February), to a high of 8.18 m. on the P.M. tide (26th October). A rough guide for the port is 7.0 m.

The permitted drafts are published against the arrival times required at the Fairway Buoy or Hiran Point, for A.M. on 20th December this was 0429 hrs. – 6.99 m.

Notices and Pilot Station Instructions: The required notices were sent to the Pilots and Port Authorities 24 hours before arrival with an ETA at the Fairway Buoy of 0400 hrs. on 20th December 1992.

The Pilot Station was contacted on VHF when 12 miles from the Fairway Buoy, and the following instructions were received:

"On arrival Fairway Buoy, please pass 5 cables West of the Fairway Buoy at 0430 hrs. (local time) today 20th, and steer a course of 315° to B5 and B6 Buoys.

After passing B5 and B6 Buoys, alter course to starboard 003° to B15 and B16, then keeping B1, 3, 5, 7, 9, 11, 13 and 15 to starboard and B2, 4, 6, 8, 10, 12, 14 and 16 to port.

On arrival Hiron Point, drop anchor 1 mile S.E. of B18 Buoy.

Please note that B3, 4, 7, 10 and 13 are missing.

Keep VHF watch on Channel 9 and 16."

The Pilot Station was in contact a number of times, and later amended the time to pass the Fairway Buoy to between 0415 hrs. and 0420 hrs., and advised to keep close to the port side buoys as there was deeper water on that side of the channel.

Instructions from the Pilot Station were helpful and given clearly in good English.

There was one other vessel at anchor off Hiron Point and the Pilot Station gave instructions to anchor using that as a mark.

Passage: Passage over the bar can be undertaken day or night on the high tides.

Current: The current caused no problems, and no exceptional set was experienced on this tide at dead slow ahead (5.3 knots).

Approaches: The vessel approached from the East, last port Chittagong, with satellite navigator and echo sounder as a guide, and the Fairway Buoy was picked up easily.

The swatch of no ground is very distinctive on the echo sounder.

Buoyage: The Fairway Buoy was Fl. 7 sec. instead of 10 sec., and no Racon signal was seen.

The buoy marking the wreck to the East was seen (Fl. (2) 20 sec.).

The buoys listed as missing were not seen, although radar echoes in their approximate positions were noted, but these could have been fishing boats.

The other buoy lights were as noted on the chart, but no Racon was operating on B18.

Radar positions from ashore indicate that the buoys are in the charted positions.

Depths: The vessel had a draft aft of 6.81 m. in the brackish water, and a least depth of 0.65 m. was recorded under the keel at 0441 hrs. on 20th December 1992 in the approximate position of missing Buoys No. 3 and 4.

Fishing Boats: There were a number of small fishing boats anchored across the channel which made no attempts to get out of the way. They had oil lights which were lit up on close approach. The largest concentration was close to the anchorage.

Shoal Patch: The outward Pilot reported a shoal patch of 5.6 m. – 5.8 m. just South of Buoy B18 (See "Plan").

With a draft aft of 5.54 m., a sounding of 0.3 m. under-keel was recorded in approximate position Hiron Point bearing 338° by 3.6 miles, which would indicate that the shoal is further East and South of the Pilot's sketched position. This would also be indicated by the fact that the vessel anchored in the position on the chart on the inward passage with a draft of 7.0 m. and remained afloat through 2 successive low tides on 20th/21st December.

Buoy B17 has been moved as indicated by the Pilot on the copy chart (See "Plan").

Pussur River: Hiran Point to Jayman Reach.

Chart: B.A. Chart No. 732. The river was found to be as charted.

Shallowest water was experienced at 0803 hrs. shortly after picking-up the anchor.

The Pilot passed close to Buoy B18 on the port side with another vessel at anchor close to starboard.

A depth of 0.6 m. under-keel with a draft of 6.81 m. close to the pilot boarding station. Otherwise the least water under-keel was 1.1 m. at 1208 hrs., shortly before anchoring between Tatral Point and Ihir Khal, with the buoy abeam to starboard.

The upriver passage was uneventful and the Pilot capable.

Tug: One tug is required to stand-by large vessels when anchoring, and is used to push as required.

Waiting Anchorage: In Jayman Reach, and is referred to as Base Creek. Inward Clearance will be done at this anchorage.

Pussur River: Jayman Reach to Mongla Port.

This section of the river was also found to be as charted.

The shallowest water experienced was 0.5 m. under-keel at a draft of 6.9 m. in a position with Jayman Reach (green buoy) bearing 140° × 0.85 miles.

Mooring Buoys: Buoy No. 6 on the chart should be re-numbered to No. 5, and there is no Buoy No. 6.

Mongla Port:

Communications: Local telephone calls only can be made by calling Mongla Radio on VHF Channel 16 with various working channels, and requesting Mongla Agent's telephone number. These calls are charged through the Agency.

Port Control keep continous watch on VHF Channels 16 and 14.

Overseas telephone calls can be made either from the Agent's office or by using the local telephone office. These are on occasions not very good connections.

Fax messages are all sent to Khulna and can be delayed up to a day reaching the vessel via road and launch.

Size of Vessel: Maximum draft depends on the tide (See "Arrival Times and Drafts – Pussur River Bar").

The Pilot advised that the usual maximum length is 185 m., and Port Control advised that 2 years ago a vessel of 189 m. length had been allowed into the port.

Vessels of this length (188.4 m. LOA) cannot be safely anchored in the port as there is insufficient swinging room. There are 2 berths at buoys available for this size vessel, requiring the anchor cable to be broken to connect to the buoy. Large vessels will secure to the buoys on the ebb tide and sail on the flood, as there is insufficient room to turn a manoeuvring vessel in the port.

Pilots: There are 7 pilots serving the port and Pussur River. The 2 pilots handling this vessel were found to be efficient.

Night Navigation: Not permitted on the river for large vessels, but smaller ones may be permitted, from Hiran Point to the port, navigation over the bar is allowed at any time depending on the tide.

Clearance Inward: As for the Port of Chittagong, except that the Crew Agreement was not taken ashore.

Certificates: All certificates must be in date, and the correct Officers qualifications must be on board, or the vessel will not be permitted to sail.

Outward: The resident Customs official attends to the cargo papers with the stevedores and Agents.

Other Customs supervisors will board to inspect the vessel.

The Clearance Certificate was issued about 18 hours before the vessel could sail, due to the tides.

Shore Leave Passes: Issued on arrival and are to be handed back to the Agent on departure.

Customs: The Customs Officer, who boards for Inward Clearance, seals the bond store and remains on board throughout the vessel's stay in port and requires accommodation and food.

A rummage gang of about 10 persons will also board.

The resident Customs Officer issues Clearance to the various barges during discharge.

An issue to the crew is permitted after one week in port.

Watchmen: Should be employed as soon as the vessel arrives, and stationed forward, aft and at the gangway. They change about every day and do not require accommodation, but do require food. Thieves will board at any stage in the river. Another vessel was relieved of 6 mooring ropes from the forward store within half an hour of anchoring at Base Creek in the middle of the afternoon.

Brass sounding caps, butterfly nuts, etc., should be removed prior to arrival, even if they are of the thief-proof type. Anodes on the hull will also be taken when above water.

Accommodation and Food: Requested for consignees representative, stevedore overseer and foremen.

Barges: The Port Authority impose a fine on vessels if there are more than 8 barges alongside at one time and occasionally make representations on board.

As the barges are ordered in by the stevedores and consignees with no control from the vessel, they were given a letter advising them that they would be held responsible for any fines for this reason. This resulted in a marked decrease in the number of barges coming alongside.

The barges are poorly fendered, usually just a couple of old tyres, an attempt was made to use ship's fenders but these rapidly disappeared.

The barges supply their own ladders for boarding of the stevedores.

Cargo Working: Discharged 20,800 metric tonnes of bulk grain. Before starting, bales of bags are brought aboard, broken open and stencilled with appropriate marks.

The cargo is shovelled into the bags, the gangs splitting up into groups of four, two to hold the bags open, and two to fill them with grain using buckets.

The bags are then stitched, slung and lifted to the barges with ship's gear. There appeared to be about 30 men in each gang with additional men to prepare the bags on deck.

A selection of the bags are landed on deck and weighed on antique steelyards suspended from bamboo tripods. In this manner, combined with the bag tally, the stevedores arrive at a tonnage discharged.

The stevedores work one gang to a hold and do not double up at a hold.

Part of Hold No. 1 was discharged in bulk by scooping the grain into lined nets. How this quantity was measured is doubtful, as draft marks on the barges are rarely in evidence.

Working Hours: Stated as 0700 hrs. – 1900 hrs. and 1900 hrs. – 0700 hrs., with a meal break from 1100 hrs. – 1200 hrs. However, with late starts and early finishes, about 20 hours a day is achieved.

A net discharge rate of 33.63 tonnes per gang hour was achieved, which with 3 gangs working gives about 2,000 tonnes a day.

Weather: During the period mid-December 1992 to mid-January 1993, there were generally early morning fogs, but otherwise cool and dry.

The fog may delay the day gangs arriving, as the launches either do not leave the shore or cannot find the vessels.

Port Regulations: A copy of these was requested, but not forthcoming, but they generally seem to be relaxed. The local people swim in the river and no problems were experienced by the crew using local small boats for going ashore.

Provisions: Local fruit is available either from the ship chandlers or local trading boats, also local fish is available and of good quality.

Ship chandlers lists contain most items, but they may not be available and could be expensive.

Fresh Water: Available. The Pilot's Note on the way in asks for the quantity required. Generally about 2 or 3 days notice is required for delivery, after ordering through the Agent. Not recommended for drinking.

Density: 1002 (approx.).

AUTHORITY: Mongla Port Authority, P.O. Mongla Port Sub-Post Office, Bagerhat, Bangladesh. *Tel:* 62331, 61997, 60503. *Telex:* 27241 Mport BJ. *Cables:* Port Mongla. *Contact:* Md. Rezwanul Hoque, Chairman. Captain Azizul Hassan, Harbour Master. Tel: 60810, 61460, 60503, (04031) 221.

NOTES

Please also advise Shipping Guides Ltd.

Barbados

BRIDGETOWN: 13.06 N. 59.38 W. **(See Plan)**

DOCUMENTS:
8 copies Crew Lists.
5 copies Passenger Lists.
1 copy Health Certificate.
4 copies Ship Particulars.
1 copy Vaccination Report on Crew.
1 copy Vaccination Report on Passengers.
Derat Certificate.
2 copies Manifest.
1 copy Bill of Lading.
1 copy Clearance from Last Port.
2 copies Ship Stores List.
2 copies Crew s Declaration List.
1 copy Animal Declaration List.

Vessel should be entered within 24 hours and articles deposited in Shipping Office if staying longer than 48 hours.

Immigration:

1. List of passengers: (a) in-transit; (b) landing.
2. All disembarking passengers must fill out an E/D Card.
3. List of Crew, and if necessary, list of crew who will be landing.

PILOTAGE: Pilotage is compulsory for all vessels entering Bridgetown Harbour, except in cases of warships where pilotage is optional. Agents of vessels intending to visit the port are required give ETA as early as possible and to submit details on Form A in accordance with the Barbados Harbour s Regulations, 1961, and in advance of the vessel s arrival. Notification of arrival and request for services on Saturday should be known to the Harbour Master by 1100 hrs. local time on the previous Friday if there is to be no delay. Notification of arrival and requests for services on Sundays should be made known to the Harbour Master by 1200 hrs. on the previous Friday if there is to be no delay.

Pilot Station: Located 0.8 km. West of Fairway Buoy (Admiralty Chart No. 502). There is no alternative station in bad weather. Usual Jacob s ladder in good condition should be rigged on port side of vessel when approaching the harbour.

Signal for pilot boat International Code Letter G by day. Blue light by night. Call and watch on VHF Channel 12 156.60 MHz and HF SSB 2182 kHz. Pilotage vessels, (power driven launches) are approximately 10 m. in length. The two launches are painted blue, white and gold.

ANCHORAGES: Quarantine Anchorage as indicated Admiralty Chart 502. Explosive anchorage as indicated on chart. Carlisle Bay Anchorage see Chart 502.

RESTRICTIONS: Bridgetown Deep Water Harbour offers 24 hours service to ships with draft up to 9.6 m.

Tankers: May enter and leave any stage of tide, day or night, except Needham s Point where daylight berthing only.

MAX. SIZE: Max. length permitted in Deep Water Harbour 244 m. Vessels of greater length allowed to berth if fitted with bow thruster (up to 293 m.). Draft 9.6 m. Oil Carriers Pier outside Deep Water Harbour max. draft 11.6 m.

Also see Tankers .

HEALTH: Pratique may be obtained by radio or from Pilot or Health Officer on arrival. In case of suspected disease Port Doctor should be notified by radio through Agents.

Procedure for Granting of Pratique:

1. The radio request should be sent not more than 18 hours and not less than 4 hours before the expected time of arrival.
2. The message should be addressed to the Shipping Agent, who will inform the Medical Officer of Health (Port) of the contents of the Message.
3. The Medical Officer of Health will inform the Shipping Agent whether or not Pratique is granted, and the Shipping Agent will inform the Master, by radio, of the decision.
4. The Medical Officer of Health will inform the Officer on duty at the Signal Station whether or not Radio Pratique has been granted, and the Officer on duty at the Signal Station will inform the Berthing Master and the Public Health Inspector of the decision of the Medical Officer of Health.
5. The Berthing Master on boarding a ship which has been granted Radio Pratique will authorise lowering of Q flag, if still flying.
6. The Berthing Master on boarding a ship which has not requested Radio Pratique will inquire as to the presence of any illness in the ship; if there is no illness, he will grant Pratique in his capacity of Visiting Officer, *and will ensure that the Q flag is lowered.*
7. If Radio Pratique has been refused or if the Berthing Master is informed that there is illness in the ship, the Q flag *must* be kept flying and the Public Health Inspector will board the ship, and if satisfied will grant Pratique; if he is not satisfied he will refer the matter to the Medical Officer of Health (Port).
8. Disembarking passengers (not passengers in transit) and any Crew members being signed off will be kept segregated on the ship until their Vaccination Certificates have been inspected by the Public Health Inspector.
9. No person except the Berthing Master, the Public Health Inspector, the Medical Officer of Health or the Immigration Officer will be permitted to board a ship before Pratique has been granted. The granting of Pratique is indicated by the lowering of the Q flag.

   Notes: From the foregoing it will be seen:
   (i) that healthy ships will be granted Pratique either by radio or by the Berthing Master;
   (ii) that ships with any illness on board will be granted Pratique by the Public Health Inspector or the Medical Officer of Health;
   (iii) that the Public Health Inspector will board a ship for the following reasons only:
      a. when Radio Pratique has not been granted and the Berthing Master cannot grant Pratique;
      b. to inspect Vaccination Certificates of disembarking (not in-transit) passengers and signed off crew members.
   (iv) that to avoid misunderstanding and delay the Q flag must be lowered as soon as Pratique is granted.
10. A ship with disembarking passengers may be granted Pratique and permitted to work e.g. load or unload cargo, *provided* that disembarking passengers are kept segregated *on the ship* until Vaccination Certificates have been inspected and immigration formalities completed.

RADIO: Cable and Wireless, Barbados Radio: Call sign 8 PO. 24 hours watch is maintained on 500 kHz. ETA to include name and nationality of Master, number and nationality of crew. Name of last and following ports of call and quantity and grades of cargo to be discharged, if any.

VHF: Barbados Radio VHF Channels 16 and 26. Barbados Port Department VHF Channels 12 and 16.

TUGS: Three tugs available namely Barbados , Culpepper and Pelican II , 1,700 h.p., 1,500 h.p. and 4,600 h.p. respectively. 2 tugs for vessels of 20,000 n.r.t. or over, and 1 tug for vessels of 10,000 n.r.t. or over or 167.64 m. in length. The tug will meet the ship at the entrance to the harbour. For vessels under 550 ft. in length having bow thrusters the tug will be optional.

BERTHING: Harbour is situated on the North-Western side of Carlisle Bay, approximately 0.75 miles (1.21 km.) N.W. of the Molehead of the careenage. The harbour is dredged to 9.75 m. LWOST and was constructed by joining Pelican Island to the Mainland by reclamation, providing 702 m. of quay space and 829 m. of protective breakwater, and offering berths for eight ocean-going vessels. All berths are equipped to supply fresh water, bunker fuel and telephone service.

Berth	*Length* (m.)	*Width* (m.)	*Depth* (m.)	*Remarks*
No. 1	152	23	9.7	
Nos. 2 and 3	366	15	9.7	
No. 4	184*	24	9.7	Container berth. *215 m. with dolphins.
Breakwater	522 outer arm	9.3	9.7	Passenger vessels.
	307 inner arm		9.7	Bulk sugar and molasses.
Shallow Draft	156	15.2	6.7	Inter-island vessels, max. draft 6.8 m.
Bulk Handling Facility	dolphins		11.5	Max. LOA 183m.
Black Rock				Max. LOA 122 m., max. draft 7.5 m.
Spring Garden				Max. LOA 103 m., max. draft 4.9 m.

Cold Storage Facilities: Cold Storage facilities of the Port of Bridgetown are supplied by BICO Ltd., who are sub-contracted by the Barbados Port Authority to handle all locally consigned and Trans-shipment reefer cargoes .

The facility abounds the Harbour perimeter and has four receiving doors.

4×20 ft. reefer containers may be stripped simultaneously or 2×20 ft. and 2×40 ft. containers. The receiving rate is in excess of 350 tonnes per day.

Storage capacity is 2,100 tonnes frozen (−18°C), 300 tonnes chilled cargo (+2°C).

Cargo movements are effected by seven Clark 1.5 tonne capacity Forklift Trucks.

Power supply is guaranteed by Ring circuit feed supplemented by standby generator.

CONTAINER HANDLING FACILITIES: The extensions to the Harbour were completed in 1978 and included the provision of a Container Berth, a Container Shed and an open land area for the development of a Container Stacking Park and other ancillary requirements for the making of a Container Terminal.

Phase I of the development of this area was completed in 1980 and included the paving and lighting of the area adjacent to the Container Quay for the provision of a Container Park, a Container Control Office and an area for the stuffing and unstuffing of containers.

Phase II of the development of the Terminal was completed in 1981.

In January, 1981, a new Container handling unit, the Ferranti 830 L Straddle Carrier, was introduced to the Terminal which was followed by another unit in 1982 and 2 Valmet Straddle Carriers in 1985. An additional Valmet Straddle Carrier was acquired in 1987 and two others joined the fleet in 1990, bringing the total to 7 straddle carriers. These units are capable of handling fully laden 40 ft. containers.

In addition, there are ample Tractor Trailer units to cope with the present movement of containers.

During 1982, the old Container Park was re-opened to provide further space for the stacking of trans-shipment containers and also the North Gate was opened to facilitate the free movement of containers to and from the Port.

The Terminal is geared to handle 75,000 container movements annually.

The Container Terminal consists of the following:
a. Container Berth
b. Container Shed (C.F.S)
c. Container Park

The Container Berth is 188 m. long, with one breasting dolphin providing an additional 36 m. of berthing space.

This berth can accommodate a vessel up to 205 m. in length and a maximum draft of 9.60 m.

The Container Shed (C.F.S.) has a floor area of 5,314 sq.m. and is used for the storing of cargo to be stuffed into containers or for cargo unstuffed from containers.

The Container Park can accommodate a total of 2,000 containers in lane stacked positions (2 high).

The full Container Park can stack 320 containers, the empty Container Park can stack 744 containers and the Trans-shipment Park can stack 840 containers (2 high).

Space for 320 additional boxes (full) has been provided.

The Container Control Office directs the movement of the Seven Container Handling Units in the delivery, receiving and spotting of containers by means of UHF communication equipment.

A 40 ton gantry crane was purchased in 1987.

A new Engineering Workshop completed in early 1984 ensures that equipment at the Terminal is readily available and that 'downtime' is kept to a minimum.

CRANES: 1×100 ton link-belt truck crane.

BULK HANDLING FACILITIES: *Grain:* The bulk unloading facility of Barbados Mills Limited is primarily used for wheat, corn and soyabean meal. It consists of a 6 storey workhouse, 14-"Lippe" type metal silos each with a capacity of 1,000 tonnes and a 669 sq.m. flat storage warehouse of re-inforced concrete capable of receiving and storing 2,400 tonnes.

The dock consists of a 557 sq.m. apron on steel piling with 4 breasting dolphins of similar construction in line with the end of the dock and parallel to the shoreline. There is a lightweight steel catwalk between the dolphins and the dock apron.

Grain enters the Terminal by means of a 762 mm. wide covered conveyor belt running 68.5 m. to the workhouse where it is cleaned of tramp metal, sticks, dust, etc. and weighted before being directed to one of the silos or the flat storage.

The conveyor belt has a capacity of 200 tonnes per hour and is equipped with one tonne hopper mounted dockside over the belt to accommodate self-discharging vessels. In addition the facility has a drag conveying system for conventional bulk vessels and an electrically driven portable suction system that can be used separately or in conjunction with the drag system

Diesel powered skid steer tractors with buckets are used for clean-up of the holds.

Sugar and by-products: All sugar from Barbados' six sugar factories is transported to the Bulk Sugar Terminal at the Bridgetown Port in special trucks with bins, which are the property of Sugar Transport Limited.

The Bulk Sugar Installation at the Bridgetown Port has a capacity of 81,284 tonnes and is 171 m. long with a width at floor level of 43 m.

The Bulk Sugar Installation has been in operation since 1961, and is serviced by a fleet of 27 sugar trucks with bins.

Barbados Molasses Terminals were resited at the Bridgetown Port from Needham Point in 1963, commencing operations in 1964. There is a capacity of 11,356 cu.m., and this is stored for local consumption and export. There is a storage charge from July 1st to the start of the following crop.

In 1981, a new tank was constructed to facilitate T/S Molasses. This tank has a capacity of 20,000 tonnes, and is presently leased to the United Molasses Company of England which is a subsidiary of the Tate & Lyle Group of Companies for handling T/S Molasses within the Caribbean region.

Barbados Fancy Molasses is owned and operated by Jason Jones Ltd., DaCosta & Musson Ltd., Plantations Trading Company Ltd., and Evelyn Roach, Ltd.

There is a capacity of 14,006 cu.m. of which 99.5% is for export and the balance for local consumption.

Description of the Bulk Sugar Installations: The storage shed has a capacity of 81,284 tonnes of sugar and is 171 m. long with a width at floor level of 43 m. The side retaining walls are 4.6 m. high and the roof slopes from the top of these walls to a height of 31 m. at the apex.

Sugar is delivered from the factories in 7 tonne containers fitted to road lorries and is received at the reception area at the East end of the store. After weighing, the container is discharged through a side top-hung door on the container into a reception hopper. This hopper feeds a 1.65 m. conveyor belt which runs the full length of the store underground through a reinforced concrete tunnel. At the Western end of the store the conveyor, used for both reception and reclamation of sugar, rises above ground level through an enclosed steel gantry which slopes upwards to the top of a distribution and weigher tower. Here the sugar falls on a second conveyor belt which slopes back up to the top of the store and extends some 122 m. through the store at a high level. This conveyor is fitted with a mobile take-off and high speed thrower capable of throwing the sugar some 15.25 m. in any direction.

In the floor of the store and over the tunnel carrying the reception/reclamation conveyor belt, 57 louvred hoppers with 0.46 sq.m. openings are spaced along the entire length of the store. During shipment, sugar is run at a controlled rate on to the underground belt which carries it to the top of the weigh tower where it is diverted into the feed hopper of an automatic 10 tonne Servo-Balans scale. After weighing, the sugar falls on to a third which carries the sugar 165 m. through an underground tunnel to a transfer house near the breakwater. At this point the conveyor system turns through an angle of 45° and the sugar is transferred to a fourth conveyor which rises out of the ground from the transfer house and continues 152.5 m. in a covered steel gantry to the first of the three towers which house the power and control units for the ship outloaders. These towers, which are 38 m. apart, each carry 18.25 m. cylindrical boom, with 1.65 m. conveyor belt, which can be raised and lowered like a crane jib and can be slewed through an arc of 80°. A high speed thrower is suspended in the hold of the ship from a telescopic chute at the end of each boom.

During shipment a loading rate of 500 tonnes per hour can be maintained through one outloader or this loading rate can be distributed between two or three outloaders if necessary.

The conveyor system enables sugar to be recirculated within the store if desired. When a ship is loading at the same time as sugar is being received, however, the freshly delivered sugar must go direct to the ship mixed with additional sugar from store.

The store is open along the eaves of the roof and forced ventilation is possible by running extractor fans installed on both sides of roof near apex.

STEVEDORES: Gangs must be ordered before 1500 hrs. on day preceding date of arrival and 1000 hrs. on Saturday for Sunday or following Monday. Average rate of cargo discharged:

Bag Stuff, 22 tonnes (weight) per hour.
General Cargo, 12 tonnes (weight) per hour.
Ships specially equipped for handling palletised cargo, 30 tonnes/p.h.
Average rate of loading of cargo: General cargo 12 tonnes; Bag Stuff 18 tonnes.

MEDICAL: Agents should receive advance notice of required medical attention as soon as possible. Modern 800 bed hospital. Private clinics and usual medical facilities available.

TANKERS: Vessels arriving during darkness for Needham's Point Terminal should anchor in Carlisle Bay. Services of a Pilot are not compulsory but a Pilot must be taken to berth and unberth. Daylight berthing only.

Oistin: Submarine discharge. Max. LOA 172 m. Max. draft 10 m.

Needham's Point: Mobil Oil Barbados Ltd. Multi-buoy mooring Max. LOA, 198 m. Max. draft, 11.6 m. Depth at MLW, 12.19 m. Nature of bottom, sand on coral. Daylight berthing only. Vessels may berth and unberth any stage of tide. No fuel or dirty ballast facilities. Fresh water available by tug. Product handled, crude oil. Sealine taken aboard on starboard side. One 12 in. (30 cm.) pipeline, length 498.35 m. connected to 1×10 in. hose. Pumping rate 300 t.p.h. max. pressure, 50 p.s.i.

Esso Standard Oil S.A. Ltd.: 2 berths. Esso Jetty outside breakwater. "T"-Head finger jetty. Max. LOA, 244 m. Max. draft, 11.6 m. Depth at MLW 55 ft. Vessel berths port-side alongside.

Deep-water Harbour Oil Pier: Max. LOA 244 m. Max. draft 9.14 m. Depth at MLW, 9.75 m. Vessels berth either side alongside.

Fuel and fresh water available. No facilites for receiving dirty ballast.

Berth	*Grade Handled*	*Pipe-line (in.)*	*Length (ft.)*	*Load/ Discharge Rate (t.p.h.)*	*Hoses (in.)*
Esso Jetty	Bunker C	1×16	2000	400	1×8
	Marine Diesel	1×12	2000	270	1×8
	Light Marine Diesel/gasoil	1×8	2000	150	1×8

Max. Pressure 100 p.s.i.

Also see"Shipmaster's Reports".

DENSITY: 1025.

FRESH WATER: Easily available. Delivery 20 t.p.h. per hose. Delivery by hose-pipe through hydrants installed in each berth.

FUEL: Modern bunkering facilities are supplied by Esso Standard Oil on a 24 hour basis, however, a minimum of 24 hours advance notice is required. This may be done through an Esso branch in the previous port of call. Bunkering is done alongside at the bunker pits, which are supplied with Bunker "C" fuel, marine gas oil and marine diesel oil. A blend of Bunker "C" and diesel intermediate fuel can also be supplied, as well as marine lubricants. Small yachts and schooners can also be bunkered, and at the Esso Bay Street Jetty, fishing boats and pleasure craft can be supplied with diesel fuel. Loading and discharge facilities consist mainly of an 8 in. pipeline for gas oil, a 12 in. pipeline for marine diesel and a 16 in. pipeline for fuel oil. These pipelines run underground for approximately 1 km. from the Bridgetown Port to a bulk terminal at Holborn, Fontabelle. Pumps located at the terminal are used for deliveries to the Port.

The speed of delivery to the Bridgetown Port varies widely depending on the size of the vessel being bunkered. Pumps are rated to deliver from a minimum of 25 tonnes/p.h. to a maximum of 300 tonnes per hour.

There are 16 refuelling points along the berth of the Bridgetown Port. These permit any vessel with a maximum draft of 9.6 m. to be refuelled at any point within the port.

CONSULS: Consulates, Embassies and High Commissions:

Austria
Belgium
Brazil
Canada
China
Colombia
Cyprus
Denmark
Dominican Republic
Ecuador
Finland
France
Germany
Iceland
Israel
Italy
Japan
Netherlands
Norway
Sweden
United Kingdom
United States
Venezuela

SURVEYORS: Lloyd's Register, Bureau Veritas, A.B.S., N.K.K., G.L. and Det Norske Veritas.

OPENING/CLOSING HATCHES: By stevedores.

CERTIFICATES: Load Line Certificate, Certificate of Registry, Safety Certificates.

CUSTOMS ALLOWANCES: Two packages or 100 cigarettes per person. Wines and spirit allowance at discretion of Customs Officer.

REPATRIATION: Facilities for crew changes available.

AIRPORT: Served by regular lines. Distance from harbour about 13 miles (20.92 km.). Island is served by flights from Europe and fromNorth America.

TIME: GMT minus 4 hours. DST (Daylight Saving Time) 1 hour advanced is now being used from 16th April to 22nd October every year.

HOLIDAYS: New Year's Day, Errol Barrow Day (January 21st), Good Friday, Easter Monday, May Day (1st Monday in May), Whit Monday, Kadooment Day – Crop Over Festival (1st Monday in July), Caricom Day (1st Monday in August), United Nations Day (1st Monday in October), Independence Day (November 30th), Christmas Day (December 25th), Boxing Day (December 26th).

TELEPHONES: All berths equipped with telephone lines.

IDENTIFICATION CARDS: Desirable for entrance to port from shore leave.

BANKS: The following international banks service Barbados: Some are located within very close proximity to the Bridgetown Port.

Barbados Development Bank
Barbados National Bank
Bank of Nova Scotia
Barclays Bank plc
Canadian Imperial Bank of Commerce
Caribbean Commercial Bank
Citibank N.A.
Royal Bank of Canada

The main offices are located in Bridgetown. Service hours are:

0800 1500 hrs. Monday through Thursday.
0800 1730 hrs. on Friday.

SHIP SUPPLY SERVICE: The Barbados Port Authority operates 2 tugs and 1 heavy duty launch which is used when requested by Agents for transporting to super-carriers, stores and crews which are sometimes changed at this port. Service available on 24 hours basis and advance notice required.

The Ship Chandlers are as follows:

J. N. Goddard and Sons Limited,
Broad Street,
Bridgetown.

Hanschell Larsen & Company Limited,
Kensington,
Fontabelle,
St. Michael, Barbados.

Stanfield Scott & Company Limited,
Spring Garden Highway,
St. Michael, Barbados.

The cost of tug hire is Bds.$600.00 per hour and that of the launch is Bds.$150.00 per hour.

Ships can lie safely on 100 fathoms depth at a distance of 2 miles West of the Signal Station.

GARBAGE DISPOSAL: Collection service available. Skips provided alongside. Arrangements through agent or Barbados Port Authority, Tel: (246) 4366883. Charges on applications. Normal collection time 0730 hrs. 1630 hrs. Collection outside normal time at overtime rate.

WASTE OIL DISPOSAL: Collection service available using tanker truck. Arrangements made through agent. No special berth for this service. Service provided by Mobil Oil Barbados Ltd., Tel: (246) 4260580.

SEAMAN S CLUBS: None.

CURRENCY: Barbados Dollar. Pegged to U.S.Dollar exchange rate. U.S.$1.00 = BDS$ 2.05. Exchange rate stable.

SHIPMASTER S REPORT: October 1989.

Documents:

2 copies Crew Manifest.
2 copies Stores List.
1 copy Unmanifested Cargo.
4 copies Cargo Manifest.

Officials and Oil Company Representatives board the vessel at the anchorage on arrival.

An Oil Company representative boards the vessel at the berth and accepts the Notice of Readiness. He also boards prior to departure for signing of quantity discharged and issues Clearance.

The bond was not sealed.

Pilotage: Compulsory. Pilot boards at anchorage. On occasions, small vessels are allowed to unberth without a Pilot if moored at Spring Gardens.

Approaches: The Shell/Texaco offshore mooring is at Spring Gardens, which is just North of the main harbour, next to the power station, which is conspicuous. The grain silo near the main breakwater is also conspicuous.

Anchorage: Tankers waiting for clearance should anchor in the explosives anchorage which is just North of the main breakwater.

We anchored in Carlisle Bay with the Careenage Breakwater light bearing 053° at a distance of 0.3 miles, depth 12.0 m. This anchorage is safe but the Port Authorities do not like tankers mooring here as this is too close to the town.

A new fishing harbour has been constructed in the Northern part of Carlisle Bay which is West of the town.

Channel: Vessel approached the berth through a channel marked by 4 buoys. These buoys are lit when required. The buoys are liable to shift but are promptly reset in position by the Oil Company.

Restrictions: No night berthing permitted, vessels are permitted to unberth through 24 hours.

Max. Size: The maximum draft at Spring Garden is 5.0 m. Maximum LOA 100 m. The maximum beam is approximately 25 m.

Radio/VHF: Barbados Radio (8PO). Barbados Port Department on VHF Channels 16 and 12 but were difficult to raise.

Tugs: Tugs stand-by on arrival and departure but are generally not used.

Berthing: Vessel moored with 3 shackles on the port anchor and a starboard bow line to a buoy. Lines were sent from each quarter to 2 buoys. Vessel berthed head out.

A small boat is used to run lines to the buoys and will also be used for connecting the hose. The boat is also available for running crew ashore but there is a charge for this service so it is best to use the ship s lifeboat.

The maximum permitted wind force for berthing is Force 5. The wind is generally from offshore and is generally calm to slight.

Berth: Spring Garden Buoy Mooring: The mooring is designed for vessels with a stern discharge line which can be connected to the undersea line which goes ashore at the power station. This undersea line has a 3 in. flange and is connected at the water s edge by the boatman. At the time of our visits (October, November and December), the undersea line was under repair. This did not create any difficulties as all local LPG and product vessels have their own hoses. Normally, the undersea line is picked up by the vessel s stern crane/derrick. Pumping is permitted 24 hours when using the undersea lines but daylight only pumping is permitted when using the floating hose, which is best taken back aboard at night.

Water skiers and swimmers like using the hose.

The pumping rate is about 300 bbls.p.h.There is no night pumping for kerosene or LPG. When using the floating hose, vapour is pumped to clear lines.

Shell have a surveyor locally and also provide a radio. Texaco do not have a surveyor locally and use one of the ship s portable radios for communication.

General: It is a 30 minute walk along the beach to Bridgetown where telephone calls may be made via Cable and Wireless.

There are plenty of hotels and beach/water sports immediately to hand.

If arriving at around 0600 hrs., the vessel may be delayed if cruise ships are arriving at the same time, in which case the vessel may not be berthed until 0800 hrs. or 0900 hrs. (Later in November we were delayed until 0930 hrs.)

On departure in mid-afternoon we were delayed 3 hours and we requested permission to unberth without a Pilot but this was not granted.

When near the Explosives Anchorage keep a careful lookout for the Atlantis Tourist submersible, which is sometimed in the area.

The Shell tanks have a capacity of 200 tonnes.

Provisions may be obtained from Goddard s Supermarket which is near the Esso station. The supermarket is 35 minutes walk and prices of imported items are high.

SHIPMASTER S REPORT: January 1990.

Berth: Oistins Bay.

Anchorage: Vessels anchor at Bridgetown Explosives Anchorage for clearance (B.A. Chart No. 502).

If request made to Port Control, vessel may anchor East of the breakwater elbow.

Occasionally a backswell off the breakwater may be running, making it difficult for Customs Officers and officials to board.

The anchorage in Oistins Bay is 3.5 cables Northwest of Kendal Point or 4.5 cables Southwest of the Fishing Jetty.

Pilotage: Pilotage is available throughout 24 hours and is compulsory for berthing. The pilot boards in Bridgetown Anchorage from the pilot boat Clarence Lewis which has a blue hull and white superstructure. The time for transit to Oistins Bay is about 45 minutes.

Max. Size: Max. LOA 150 m. Max. draft 8.5 m.

Tugs: One tug is required to standby when berthing at Oistins Bay but not required for sailing. Tug comes from Bridgetown.

Berth: See B.A. Chart No. 502. The vessel moors to 3 buoys. Two lines are sent to a buoy on the port bow, 1 line is sent to a buoy on the port quarter and another line is sent to a buoy on the starboard quarter. The starboard anchor is used with 3 shackles in the water.

The mooring is sheltered from Easterly winds.

Loading: The ship s port manifold should be prepared for receiving an 8 in. hose which lays on the sea bed and is marked by an orange marker buoy. The line handles aviation jet fuel to the nearby shore tanks. Ships can pump to a maximum pressure of 8 Bar.

On completion of discharge the tanks are gauged ashore, this takes about 2 hours.

Night-time pumping and sailing are permitted.

Cargo operations are co-ordinated with Shell/Texaco on VHF Channel 9.

General: Clearance: Vessels can only clear inward during daylight hours. Documentation is same as for Spring Gardens (See Shipmaster s Report October 1989).

Mooring boat: The mooring boat will run the crew ashore and back to the ship. Call on Channel 9 for service.

AUTHORITY: Barbados Port Authority, University Row, Bridgetown, Barbados, W.I. *Tel:* (246) 436-6883. *Telex:* 2367 Portman WB. *Cables:* Portman. *FAX:* (246) 429-5348. *Contact:* Mr.E.Walters, General Manager. Mr.R.Alleyne, Harbour Master.

AGENT: Goddards Shipping & Tours Ltd., P.O.Box 1283, Hincks Street, Bridgetown, Barbados. Tel: (246) 426-9918. FAX: (246) 426-7322.

Belgium

GENERAL (See Plan)

ESTIMATED TIME OF ARRIVAL – REGULATION:

The commissioners in charge of the joint supervision, as indicated in Article 67 of the Scheldt Regulations.

Due to the Scheldt Radar Chain coming into use, the Vessel Traffic Services Scheldt and its Approaches (VTS – SM) as from March 1st, 1991, and considering Article 16, first paragraph of the Scheldt Regulations.

DECREE

Article 1. The Master of an inward bound ship for a Belgian port on the Scheldt or on the Ghent – Terneuzen Canal, must report his ETA at one of the Pilot Stations in the Scheldt estuary not less than 6 hours before that time.

Article 2. The Master, as meant in Article 1, has to report together with the ETA the following data:

A – B – I – J – O – (possibly P) – T – U – (possibly X).

The meaning of these letters is given in the Annex of this regulation.

Article 3. The Master of a seagoing vessel, to which the Regulations for the carriage of dangerous substances in seagoing ships apply, has to give notice as indicated in Articles 8 and 18 of those Regulations, having filled in the letter 'P' as indicated in Article 2 of this decree, to the Services and in the manner prescribed in Article 5 of this decree.

For tankers, to which apply the provisions of the EEC rule 79/116/EC of December 21st, 1978 regarding the minimum requirements for tankers entering or leaving the seaports of the Community, the notice as indicated in Article 1, has to be accompanied by the notices stipulated in that EEC rule.

Article 4. If the port of destination is Antwerp and on behalf of the municipal authorities, all data indicated in Article 2 has to be completed with hailing data in sequence and using the following codes:

Number of tugs	From 0 to 9.
Type of tugs	A or B
where:	A - tugs with a pulling power up to 14 tons. B - tugs with a pulling power over 14 tons.
Dock pilot	J (Yes) or N (No).
Boatmen	J (Yes) or N (No).
Fendermen	J (Yes) or N (No).
Helmsmen	J (Yes) or N (No).
Gangway requested	J (Yes) or N (No).

Article 5.

1. The notice indicated in Article 1 for vessels passing the Pilot Station at "Wandelaar", has to be given to "Pilot VTS Wandelaar".
   This can be passed by:
   (a) Ostend Radio (OST).
   (b) or Tel: 32-(0)50-550801.
   (c) or Fax: 32-(0)50-547400.
   (d) Telex and Satcom: 81417.
2. The notice as indicated in Article 1 for vessels passing the Pilot Station at "Steenbank" has to be given to "Pilot VTS Steenbank".
   This can be passed by:
   (a) Scheveningen Radio (PCH).
   (b) or Tel: 31-(0)1184-89600.
   (c) or Fax: 31-(0)1184-12321.
   (d) Telex and Satcom: 37811.

Article 6.

1. A delay of more than 2 hours in the expected time of arrival, as indicated in Article 1, has to be reported by stating A – B – I – J – (possibly X).
2. In case the expected time of arrival, as indicated in Article 1, has to be cancelled completely, this has to be reported by stating A – B – (possibly X).

Article 7. A Master who does not observe the obligations of Articles 1 to 6 inclusive has to take into account a delay of maximum 6 hours at both the Pilot Station and at Flushing Roads.

Article 8.

1. A Master of a ship approaching one of the Pilot Stations and requiring a pilot, will be provided with a pilot according to the following rules:
   (a) Ships that have reported their ETA at the Pilot Station in accordance with the provisions of Article 1 will be provided with a pilot in sequence of their arrival at the pilot cutter. In case such a ship arrives earlier than the reported ETA, she will not be provided with a pilot before that ETA unless a pilot can be made available earlier.
   (b) A ship that has reported her ETA in accordance with Article 1 may have priority in being provided with a pilot if the ship is limited to high tide or has to enter ports, preferably, at slack water.
   (c) Warships and government vessels of the Netherlands or Belgium will be provided with a pilot by priority when requested.
   (d) Ships that have reported their ETA at the Pilot Station less than 6 hours before are subject to the provisions of (a), (b) and (c) starting with the time of reporting.
   (e) Ships arriving at the Pilot Station more than 2 hours after their latest ETA notified in accordance with Article 1, as well as ships that did not send an ETA, may be provided with a pilot within a period of 6 hours after arrival only if this does not delay the other ships in being provided with a pilot. After this period has elapsed the provisions laid down in (a) and (b) will apply.
   (f) Ships in danger will, on request, be provided with a pilot before all other vessels and, if necessary, be assisted in any other way.
2. The Master of the pilot cutter can deviate from the provisions in Article 8, sub-paragraph 1. (a), (b), (c), (d) and (e), if circumstances so require.
3. Ships that, as a result of the above mentioned, have to wait before being provided with a pilot and, without awaiting their turn, proceed inwards without pilot, will have to pay the pilotage dues in accordance with the tariff.

Article 9. The decree comes into force from March 1st, 1991 and will be published in "Berichten aan de Zeevarenden".

ANNEX TO THE ETA REGULATION – 1/3/1991

The meaning of the letters, mentioned in the notice procedure of this regulation, are as follows:

A (ship)	Name, call sign and flag.
B (time of Notice)	Date and time group (4 digits) in G.M.T. of the moment at which the notice is given.
I (destination)	Name of port of destination.
J (ETA)	Date and time group (4 digits) in G.M.T. of the expected time of arrival (ETA) at the Pilot Station and its call name ("Wandelaar" or "Steenbank").
O (draft)	The correct draft in metres and centimetres.
P (cargo)	Nature of cargo for ships to which the "Regulations for the Carriage of Dangerous Substances" (RVGX) in seagoing ships apply. Indication of the IMDG dangerous goods classes as mentioned in the RVGZ, Article 1, 3rd paragraph. Indication "General" or "Bulk" and by approximation the total volume of dangerous substances onboard ship in accordance with the RVGZ.
T (agent)	The name of the ship's agent or owner.
U (dimensions)	The size of the ship in g.r.t., length in metres and centimetres in accordance with the ship's International Measurement Certificate.
X (remarks)	Possible remarks regarding the (general) condition of the ship, especially damage, manoeuvrability, equipment, list, etc. or particulars regarding ship's crew or cargo, or more general particulars.

ANTWERP: 51.14 N. 04.23 E. (See Plan)

DOCUMENTS:

Ship's Register.
2 Lists Passengers in Transit.
2 Lists Passengers Disembarking.
2 Personal Effects Lists.
3 Crew Lists indicating full date and place of birth, nationality and No. of Identity Document (Seaman's Book or Passport).
2 Stores Lists indicating alcoholic beverages in bottles and size of bottles.
International Health Declaration.
Manifests and usual ship documents.

PILOTAGE: Access to River Scheldt is:

(a) Via Wielingen and Scheur Channels (West) (Wandelaar Station) where Belgian sea pilot cutter is stationed near A.1. Buoy. Cutter has black hull with a white number on bow, yellow funnel with black top, red flag with white letter "P".

(b) Via Oostgat Channel (Pilot Steenbank), where 2 Dutch pilot vessels are stationed.

Incoming traffic: One pilot vessel in the vicinity of Schouwenbank Buoy (Racon).

Outgoing traffic: One pilot vessel stationed in the vicinity of M.B. Buoy.

Pilot boards at Wandelaar or Steenbank. Pilots boarding at Steenbank can use Oostgat Channel with a maximum draft of 10.0 m. at H.W. and a draft of 8.1 m. at L.W. If passage is not possible due to the draft, the pilot will route the ship via the inner route, Rabsbank – West Pit to Vlissingen.

IMO Class 2 vessels need permission from Traffic Control Steenbank.

Wandelaar and Steenbank pilots can be contacted on VHF Channel 6.

ETA Pilot Station, should be given 6 hours before arrival, stating point of entry. Changes in ETA of more than 2 hours have to be reported.

Entrance via 'A1' Buoy:
Pilot VTS Wandelaar.
Via Ostend Radio (OST) or Telex and Satcom: 81417.
Entrance via Steenbank:
Pilot VTS Steenbank.
Tel: 31-(0)1184-89600.
Fax: 31-(0)1184-12321.
Telex and Satcom: 37811.
or Scheveningen Radio.

Also see "General" before first port.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg".

ANCHORAGE: There is sufficient anchorage for deeply loaded vessels at all times around the A.1 Buoy, and for smaller vessels around the MSB Buoy. There are unlimited possibilities for anchoring at Flushing Roads. Anchorage on the river is limited.

RESTRICTIONS: No restrictions on night entry. Tankers larger than 2,000 g.r.t. destined for berths on the river upwards of Kallo Lock are not allowed to transit during hours of darkness or visibility less than 2,000 m. Ban can be lifted by the Maritime Commissioner (Waterschout-Sambt).

LOCKS: *Right Bank:* Royers Lock, length 590 ft., width 72 ft. 2 in., depth at high tide 36 ft. 4 in.

Van Cauwelaert Lock, length 885 ft., width 115 ft., depth at high tide 49 ft. 2 in.

Boudewijn Lock, length 1,180 ft., width 147 ft., depth at high tide 50 ft. 10 in.

Zandvliet Lock, length 1,639 ft., width 187 ft., depth at high tide 60 ft. 8 in.

Berendrecht Lock, length 1,639 ft., width 223 ft., depth at high tide 60 ft. 8 in.

Kattendijk Lock, length 360 ft., width 81 ft. 4 in., depth 20 ft. 7 in.

Left Bank: Kallo Lock, length 1,180 ft., width 165 ft., depth 52 ft. 6 in.

Also see "Developments".

MAX. SIZE: Maximum size of vessels (draft) depends on the tide.

At HW under normal weather conditions and depending on tidal conditions, vessels with a draft of up 49 ft. may enter. It is advisable to check with pilot service in each case what maximum draft will be allowed for a specific large vessel.

HEALTH: No special requirements to obtain Free Pratique. Vaccination Certificates must be valid. Recent Derat Certificate required. In case of contagious illness aboard, advise Agent.

RADIO: Cable Agents ETA Flushing, max. fresh water draft, and requirements via Ostend Radio-OST or OSU (radio telephone). Radio Antwerp-OSA operates only on medium frequency.

RADAR/VHF: A radar chain established from "A1" to Kallo. Masters can keep close contact for information, day and night, on the following channels:

Pilot Cutter Wandelaar: Channel 6 and 65.
Pilot Cutter Steenbank: Channel 6 and 64.
Flushing: Channel 14.
Zandvliet Radio: Channel 12, when in appropriate sector.
Harbour Office: Channel 18.

A radar chain, depending on the zone, using from sea to port: Compulsory listening.

Radar Zeebrugge: Channel 4.
Centrale Vlissingen: Channel 21.
Radar Terneuzen: Channel 3.
Radar Hansweert: Channel 65.
Radar Waarde: Channel 19.
Radar Saeftinge: Channel 21.
Radar Zandvliet: Channel 4.
Radar Kruisschans: Channel 66.

Also see "Plans".

Vessels not equipped with VHF can rent a portable portaphone. The Scheldt Information Service gives information by VHF within an area extending from the sea to the mouth of the river Rupel, situated upstream of Antwerp. On every full hour plus 5 minutes until that hour plus 10 minutes, vessels should switch to Channel 16 to listen to the traffic list and navigation reports, issued by Antwerp Radio.

On every full hour plus 55 minutes, Flushing Radio (Channel 14) and Zandvliet Radio on every hour plus 35 minutes (Channel 12) transmit information regarding visibility and Traffic information.

As soon as one of the stations reports a decrease of visibility under 3,000 m., visibility reports are transmitted by Antwerp Radio on every hour plus 48 minutes.

TUGS: Tugs for berthing at a riverside berth or entering the lock are ordered at River Pilot's request according to weather conditions and tide. Generally at Lieftkenshoek for Van Cauwelaert and Baudouin Locks and between Saftingen and North Ballast Fort for Zandvliet Lock. For super-tankers, tugs may join at Bath. Ship's lines are usually used for towage. If ship asks for tug lines there will be an extra charge per line.

The number of tugs required in the dock area shall be mentioned on the "hailing bill". Eventually, "according to Dock Pilot's advice" can be mentioned.

Tugboats on the Scheldt belong to private companies. There are 26 tugboats. They can assist the vessels up to the entrance in the lock. Inside the dock area the service is supplied by the Port Authority (municipal tugs). 21 tugs available, up to 2,200 h.p.

BERTHING: Deeply loaded vessels normally moor at their berth in the docks 2 hours after high water or earlier, depending on geographical location of the berths.

BULK HANDLING FACILITIES: *Container Terminals:* Private terminals with gantries from 40 tons to 70 tons lifting capacity.

Name	Terminals	Gantries
Hansadock	1	1
Vrasenedock (Left Bank)	1	1
Churchilldock	3	4
Delwaidedock	4	13
New Scheldt Container Terminal	1	6

4 container cranes at railroad container terminals; 9 quay-cranes (32 and 35 tons) suitable for container handling; 4 mobile container cranes.

Grain:

1. Sobelgra Terminal at Sixth Harbour dock has 5 elevators with capacity of 400 t.p.h. each for unloading and 2 loading towers of 400 t.p.h. each for loading seagoing vessels. Elevators are combined with conveyor belts for direct transhipment or storage in silo (106,000 tons). Water depth 48 ft. in dock for seagoing vessels, 24 ft. in dock for barges. Quay length 1,200 ft.
2. Grain handling plant of S.A. des Magasins a Grains (SAMGA) at Lefebvre Dock. Quay length 500 m., draft 32 ft. fresh water, silo 120,000 tons, 5 elevators on quay plus use of floating elevators. Discharge rate 1,100 t.p.h. Loading rate 1,400 t.p.h. into barges.
3. Smaller installation of De Trouw (silo 10,000 tons) and De Molens van Antwerpen (silo 4,000 tons).
4. Cargill Terminal for seeds at Canaldock B1: Storage capacity 30,000 tons.

Potash: Plant situated at Quay Nos. 152/160 in the Albert Dock, can accommodate vessels up to 35 ft., fresh water draft. Loading rate up to 6,000 tons per day. Storage capacity 322,000 cu.m.

Ore/Coal/Phosphate:

Antwerp Bulk Terminal (ABT): Terminal at Delwaidedock (Quays No. 750-752), quay length 1,000 m. Depth 55 ft. (+600 m. for barges); 2×50 tons travelling and 5×25 tons bridges and conveyor belt system. Discharge rate 2,500 t.p.h.

Antwerp Bulk Terminal (ABT): Terminal at Canaldock (Quays No. 508-514): 5 bridges of 25 tons for non-ferrous ores. Quay length 500 ft., depth 50 ft., max. discharge rate 3,000 t.p.h. average discharge rate 2,400 t.p.h. Antwerp Bulk Terminal (ABT) also operates a terminal on the left bank (available quay length 700 m.) with mobile cranes. Also see "Report December 1984".

Coal Terminal Vloeberghs: 3 cranes 10 tons. Quay length 800 m., Several smaller installations for coal.

Sulphur: Transhipment installations of Duval Sales (Antwerp Cleaning and Storage) near Boudewijn Lock with covered storage over 100,000 sq. ft.

Soda: The Solvay concern has built specialised warehouses on the South Quay of the 5th Harbour Dock, comprising 14 silos with a capacity of 6,700 tons of soda products. This installation is equipped with 10 cranes, 3 transporter bridges and 4 km. of conveyor-belt.

Fertilisers: Besides quays of chemical plants such as Bayer and BASF there are specialised terminals for fertilisers mainly at 3rd Harbour Dock (Manuport) and Canaldock B1 (Manufert), Ferchimex (the latter used for fertiliser, sulphur, phosphates etc.) and Albert Dock (Northern Shipping Service).

Total covered warehousing space for chemical fertilisers is 38,405 sq. m.

Other specialised installations include:

Refrigerated storage:	695,000 cu.m.
Tank storage capacity:	10.7 million cu.m.

CRANES:

Container cranes	(35/53 tons)	25
Quay cranes	(2.5/100 tons)	346
Floating cranes	(40/800 tons)	6
Mobile cranes	(5/90 tons)	122
Loading bridges	(5/50 tons)	16
Grain elevators	on quay	18

STEVEDORES: To enable Agents to order gangs, important to obtain ETA Flushing before arrival. Latest time to order gangs, normal day shift 0800 – 1545 hrs. before 0630 hrs. same day. First shift 0600 – 1345 hrs., before 1400 hrs. previous day; second shift 1400 – 2145 hrs. before 1230 hrs. same day; night shift 2200 – 0545 hrs. before 1500 hrs. same day. First shift Monday, 0600 – 1345 hrs. before 1400 hrs. previous Friday. Failure to give exact ETA may result in losing 12 hours to 24 hours and the cost of gang's idle time. No work performed on Saturday and Sunday unless overtime paid.

MEDICAL: Ample medical attendance in the port. Hospital facilities available.

DENSITY: Fresh water in the docks, slightly brackish in the river.

FRESH WATER: All berths supplied by shore connections. Fresh water also available by barge.

FUEL: All grades available. Minimum 24 hours advance notice preferred. All grades can also be supplied by barge. Tankers may not refuel by barge whilst working cargo or ballast.

FIRE PRECAUTIONS: No floating objects allowed alongside during loading/discharge/ballasting.

TANKERS: Five important refineries and oil storage installations, located at Antwerp have a total tank storage capacity of 6,947,000 cu.m. The total quantity of crude oil refined amounts to nearly 40 million tons yearly. In the vicinity of the Van Cauwelaert Locks, S.I.B.P. and Esso have important plants. R.B.P. is established in the 4th Port Basin, whereas Belgian Refining Company and Nafta (B) have their installations along the Canal Dock B-2. In the Southern sector of the port, on the River Scheldt and of an earlier construction, the Oil Terminal Antwerp South is situated with restricted length of 650 ft.

Also see Table on next page.

Chemicals, Minerals and Edible Oils:

Installation	*No. of Berths*	*Quay No.*	*Max. draft FW*		*Storage Capacity*
			ft.	in.	cu.m.
Havenbehandelingen S.A.	2	273/275	36	0	290,000
Noordnatie S.A.	2	239/241	35	0	175,000
Panocean-Eurotank NV	7	387/399	36	6	459,000

LPG Terminal: Antwerp Gas Terminal at Left Bank for LPG tankers.

The first phase of the construction of AGT is now completed. It includes construction of 4 spheres of 3,300 cu.m. each and 3 jetties. These are the Main Jetty, the Secondary Jetty and the Barge Jetty. Each jetty is "T" shaped and is equipped with Wiese loading arms provided with an emergency shut-off/disconnecting device. The minimum water depth at the Main Jetty is 11.85 m. enabling tankers handling up to 75,000 cu.m. to berth.

Antwerp Cleaning and Storage CY NV: This terminal situated between the Boudewijn Lock and the Bayer plant, is able to receive ballast water from tankers and other seagoing vessels, and is fitted with separators with a capacity of 600 t.p.h.

Installation	No. of Berths	Quay No.	Max. Draft FW ft.	in.	Bunkers ex-Installation	Rate tonnes per hour load/disch.	Shore facilities for dirty ballast	Spares Stores

REPAIRS/DRY DOCKS: 8 private drydocks for vessels up to about 150,000 d.w.t., and 19 private repair berths.

Besides carrying out general repairs, conversion and dry-docking of ships, the yard can carry out licensed repairs and are spare parts suppliers for the following diesel engines:

Burmeister & Wain; Doxford; Fiat; Gotaverken; Mann; Pillstick and Sulzer. They also are an approved repair centre for Lips and Kamewa propellers.

Dimensions of Private Dry Docks:

No.	Length (m.)	Width (m.)	Depth (m.)
1	146.30	18.50	5.85
2	166.40	21.15	6.50
3	192.60	26.00	7.25
4	206.60	27.00	7.75
7	225.00	29.78	8.25
5	255.00	39.40	8.70
8	270.00	37.29	8.25
6	312.35	50.00	9.20

Facilities:

Gritblasting machines for ship's sides and ship's bottom.
Tank cleaning (2 barges available).
Tank storage barges.
Testing plant for anchor chains and cargo gear (up to 300 tonne test capacity).
Dynamic balancing plant for motors, turbines, up to 11 tonne.
Lifting capacity in drydocks and workshops.
Floating crane and heavy mobile cranes.
Specialised fuel valve repair shop.

Apart from above yard, various smaller repair firms are available to carry out deck and engine repairs. They have qualified labour, specialised workshops but no drydock facilities. For example Messrs. Longueville Bros., Messrs. Locomar Inc. and Messrs. S.K.B.

SURVEYORS: American Bureau of Shipping, Tel: 232.28.66; Bureau Veritas, Tel: 233.79.30/31; Det Norske Veritas, Tel: 232.69.16; Germanischer Lloyd, Tel: 233.74.16; Lloyd's Register of Shipping, Tel: 232.09.40; Registro Italiano, Tel: 233.78.60.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended in general and specially for ships berthed at river quays because of rise and fall of tide.

OPENING/CLOSING HATCHES: Normally opened/closed by crew. Stevedores usually helping lift beams. Tramp vessels according to charter party.

CERTIFICATES: Registered Tonnage Certificate, Derat Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes or 20 cigars or 250 gm. tobacco per man. Spirits 0.25 litres per head.

REPATRIATION: All arrangements for crew changes and repatriation can be made.

AIRPORT: Zaventem Airport (distance 50 km.) served by regular airlines. Antwerp Airport Deurne (distance 15 km.) only regular service with Amsterdam and London (3 flights per day). Plans to extend.

TIME: Summertime: April to September (April to October) GMT plus 2 hours. Remainder of year, GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Harbour Police Tel: 232.18.40; Alarm and Accidents Tel: 101; Ambulance and Fire Tel: 100.

HOLIDAYS: New Year's Day; Easter Monday; 1st May; Labour Day; Ascension Day; Whit Monday; 21st July; Assumption (15th August); 1st November; 11th November; Christmas Day. Plus the replacement days when New Year's Day; 1st May; 21st July; Assumption; 1st November, 11th November or Christmas Day fall on a Saturday or a Sunday. Cargo work can be arranged when labour available and at surcharge 100%.

TELEPHONES: At shipyards and oil terminals telephone is placed on board or in the vicinity without extra cost for local calls. Long-distance calls at special request.

CURRENCY: Belgian Franc (BFr).

DEVELOPMENTS: New container terminal in the river South of Berendrecht Lock completed and operational. Quay length 1,406 m. Surface area 55.4 ha. 6 container gantries installed.

Left Bank of River Scheldt: Vrasenedock with quay length of 4,500 m. fully operational. Terminals for forest products, dry bulk, scrap and cars.

Second Scheldt container terminal (Noordzee Terminal) completed and operational second half of 1996, capacity 600,000 TEU p.a.

Various studies carried out for 3 new container terminals on the left bank of the river; terminals planned to become operational between 2,000 (1st) and 2010 (3rd).

First phase of deepening of the River Scheldt has started: (Under average tidal conditions): 48 ft. for bulk carrier entering on one tide, 42 ft. 8 in. for container vessel leaving on one tide, 38 ft. independent of tide.

REPORT: December 1984 (Updated 1994).

Bulk Handling Facilities:

1. Antwerp Bulk Terminal (ABT):
Canaldock B.1 Berths:
LOA: No restriction (See "Remarks").
Draft: 54 ft. fresh water at berth (See "Remarks").

Beam: Discharge coal: No restriction.
Discharge ores: Crane Nos. 1 – 3 outreach 41.6 m.
(See "Remarks").
Crane Nos. 4 – 5 outreach 49.0 m.
(See "Remarks").
Clear height from waterline to top of hatch coaming:
Crane Nos. 1 – 3: 17 m.
Crane Nos. 4 – 5: 21 m.

2. Antwerp Bulk Terminal (ABT):
Delwaidedock Berths
LOA: No restriction (See "Remarks").
Draft: 55 ft. fresh water (See "Remarks").
Beam: No restriction (See "Remarks").
Clear height from waterline to top of hatch coaming: 24 m.

Remarks:

Drafts are based on fresh water.

For vessels over 270 m. (884 ft. 10 in.) LOA, drafts have to be reduced as follows:

LOA 270 m. (884 ft. 10 in.) up to 280 m. (917 ft. 8 in.): 6 in. per 10 ft. (3.05 m.) exceeding 270 m.

LOA over 280 m.: 6 in. per 10 ft. exceeding 270 m. and 3 in. per 10 ft. exceeding 280 m.

The maximum LOA allowed is 300 m.

The maximum beam in the Zandvlietlock is 45 m.

Sailing: Maximum draft allowed is 12.19 m. from Zandvlietlock.

REGULATIONS: Royal Decree – dated 23rd September 1992:
Chapter IV.
Stipulations covering vessels transporting hazardous materials:
First Section: Stipulations relating to sea-going vessels.

Article 27: Para 1. The hazardous materials to which the articles of the present section apply are spread over the following classes of the IMDG Code:

Class 1 : Explosives.
Class 2 : Gases which are compressed, liquified or dissolved under pressure.
Class 3 : Inflammable liquids.
Class 4.1 : Solid inflammable materials.
Class 4.2 : Materials subject to spontaneous combustion.
Class 4.3 : Materials which, on contact with water, give off inflammable gases.
Class 5.1 : Oxidising materials.
Class 5.2 : Organic peroxides.
Class 6.1 : Toxic materials.
Class 6.1 : Infectious materials.
Class 8 : Corrosive materials.
Class 9 : Other materials for which experience has shown that they present or could present a dangerous character.

Para 2. In order to determine whether dangerous materials of Class 1 can explode en masse, the opinion of the Head of the Explosives Dept. of the Ministry of Economic Affairs is determinant.

Para 3. The stipulations of the present section do not apply to dangerous materials which form part of the provisioning or the equipment of vessels.

Article 28: Para 1. The Owner, the Operator or the Master of a vessel which intends to transport on the lower maritime Scheldt, dangerous materials for which the stipulations of Appendix 1 are applicable, is required to notify or to have notified this intention to the Scheldt Information Department.

Para 2. For the applications of Para 1 are assimilated to ocean/sea tanker vessels loaded with hazardous material, sea tankers which have been loaded with hazardous material, but for which a declaration has not yet been delivered, certifying that the vessel no longer contains hazardous material, either by an approved expert or by the competent authority or on behalf of this authority.

Article 29: The notification required in Article 28, Para 1 must be made at least 4 hours before preparing to sail, stating:

1. The name, call sign, nationality, length overall and draft of the vessel.
2. Her port of destination or departure.
3. The IMDG Class of the hazardous materials, their approximate quantity and the indication "General Cargo" or "Bulk Cargo".
4. If there has been any spontaneous hearing, fire damage to the vessel or to the cargo or presumption of such an incident.
5. Whether there have been any incidents or shortcomings susceptible of reducing the normal and safe manoeuvrability of the vessel, of comprising safety and the facility of passage or of involving a danger for the environment.

Article 30: On the lower maritime Scheldt, vessels are authorised to have on board the following quantities of explosive materials of Class 1 of the IMDG Code:

1. Danger Category 1.1 or 1.5: 30,000 kg. gross.
2. Danger Category 1.2 or 1.3: 120,000 kg. gross.
3. Danger Category 1.4: Unlimited quantity.

On condition that the stowage and segregation stipulations of the IMDG Code, or the relevant Belgian regulation quoted in Article 35, are observed.

Article 31: Para 1. The Master of a vessel loaded with hazardous material must ensure that:

1. Transport is effected in conformity with the stipulations of the IMDG Code, of the IMO Code of Safe Practice for Solid Bulk Cargoes, of the IMO Gas Carrier Code and of the IMO Bulk Chemical Codes.
2. Efficient measures are taken on board the vessel with a view to preventing and fighting against fire in accordance with or by virtue of the SOLAS stipulations.
3. In accordance with the ordinary experience of the mariner, the necessary measures are taken, and that there are on board written instructions which must be in conformity with the IMO recommendations, indicating the measures to be taken with regard to hazardous materials transported when an accident occurs or an incident occurs liable to present a danger.
4. Additional instructions emanating from the competent authority and reinforcing the stipulations laid down in the present chapter are followed.
5. Radio contact by VHF be maintained permanently with the Scheldt Information Department.
6. The prescriptions relevant to signalling laid down in Appendix 1 are applied.

Para 2. The Master of a sea tanker loaded with liquified gas in bulk covered by the IMO Gas Carrier Code must furthermore observe the following prescriptions:

1. A Pilot competent for the lower maritime Scheldt must be on board.
2. Competent crew members must be available in sufficient numbers in order to manoeuvre the vessel in complete safety.
3. It must be ensured that there is no danger of excess pressure in the tanks.
4. There must be permanent listening on VHF.
5. The onboard radar must be functioning.
6. Cleaning, degassing and scouring of tanks cannot be effected without the authorisation of the competent authority.
7. Sailing is forbidden or navigation must be interrupted as much as possible by anchoring when visibility is equal to or less than 2,000 m.
8. The intention to anchor must be reported to the Scheldt Information Department.
9. The construction and equipment of the vessel must comply with the stipulations of the Gas Carrier Codes of the IMO, and on board must be valid documents attesting to this conformity issued by or in the name of the flag State. These documents must be produced whenever requested by the competent authorities, so that they may be able to take due cognisance of them.

Second Section: Stipulations relating to all vessels.

Article 32: On the part of the lower maritime Scheldt inclusive between the extension of the straight line connecting the two alignment posts positioned approximately 1 km. upstream of the Southern extremity of the Antwerp quays and the straight line traced across the river at the level of the Southern extremity of the access channel to the Kallo Lock, a vessel loaded with one of the hazardous materials covered by the Appendices 1, 3 and 4, of the present regulation, or which after having been loaded with one of these materials has not yet been declared as degassed when it is submitted to this obligation, cannot navigate in the following conditions:

1. When visibility is less than 2,000 m.
2. At night, except in the event of force majeure, or if the functionaries or Agents of the Maritime Police have lifted this ban under exceptional circumstances.

Article 33: Except with the authorisation of the competent official, all vessels loaded with one of the hazardous materials quoted in Appendices 1 to 4 of the present regulation, or which have been loaded with one of these materials, but have not yet been declared as degassed when it is submitted to this obligation, may not, by derogation to the stipulations of Articles 6 and 7, anchor or moor in the part of the lower maritime Scheldt inclusive between the extension of the straight line connecting the two alignment posts positioned approximately 1 km. upstream of the Southern extremity of the Antwerp quays and the straight line traced across the river at the level of the sector light situated 150 m. to the West of the Western end of the access channel to the Royers Lock.

Article 34: Apart from the lights and marks laid down by the Regulation for Navigation in the lower maritime Scheldt:

1. The vessels transporting hazardous material covered by the first appendix of the present regulation or having on board hazardous residues, carry the light or the mark required in this appendix.
2. River craft transporting hazardous material covered by Appendices 2 to 4 of the present regulation or having on board dangerous residues, carry the lights and marks respectively required in these appendices, it being understood, nevertheless, that if they transport materials or have onboard residues covered by several of these appendices, they must carry the lights and marks prescribed for the most hazardous of these materials requiring the greatest number of lights and marks. When a convoy is involved, the lights and marks mentioned above are exclusively carried by the pushing tug or the propulsive vessel.

Article 35: The following are applicable apart from that which is laid down by the present chapter:

1. Royal Decree of 3rd September 1958 covering the reglementation of transport, storage and the sale of ammonium nitrate and of its mixtures.
2. Royal Decree of 23rd September 1958 covering the general regulation of manufacture, storage, detention, sale, transport and use of explosive products with the exception of Articles 121 to 123.

Note: The above is a translation of the French and Flemish originals, and they shall be the final authority on the matter.

SHIPMASTER'S REPORT: April 1988 (Updated 1996).

Pilotage: Pilot boards at Wandelaar or Steenbank. Pilots boarding at Steenbank can only use Oostgate Channel with prior permission of Flushing Control and then only with a maximum draft of 5.5 m. (dependent on tide) and for IMO Class 2 vessels if individual tanks are under 1,500 cu.m.

For the outward passage the Antwerp Agent telexed Flushing Control on behalf of the vessel, as using Oostgate and Steenbank saves over 60 minutes over Wandelaar if proceeding North or East.

Anchorage: The Netherlands Authorities are very particular about IMO Class 2 vessels anchoring in Netherlands waters if bound for Antwerp.

Wielingen North near Flushing cannot be used by IMO Class 2 vessels. Therefore vessel is to wait at Wandelaar (A1 Buoy) or at Antwerp.

Entering: Full speed permitted in the Scheldt. Passage from Wandelaar to Antwerp takes about 6 hours. If docking at Industriedock, vessel uses the old lock (Van Cauwelaert).

There are no fenders in the locks so ship's fenders have to be made ready. Tyres are not officially allowed.

Tugs: When entering the locks from the river it is advisable to use a small tug at the stern.

For Esso Berth in Industriedock we took 2 tugs, one each at the bow and stern using the ship's lines. This is advisable as manoeuvring room is very limited when barges are present. For the outward passage it is advisable to have one stern tug.

Berthing: Esso 383-Industriedock: Vessel berthed starboard side to. Depth alongside 12 m., max. draft allowed is 9.0 m.

Esso 379-Industriedock: This berth is just ahead of No. 383. Max. draft allowed 11.0 m. The berth has a modern dolphin type jetty with good fenders and mooring facilities. A mooring boat runs ropes.

Cargo: Berth 383: Ethylene is handled through a 6 in. liquid line and a 3 in. vapour line, both on the same Chicksan.

Storage tanks of 10,000 cu.m. are situated close to the berth. Maximum pressure 200 kg. Storage temperature −102° C. Gas returned to ship. Maximum allowed pumping rate 600 cu.m.p.h. We achieved a full rate of 300 cu.m.p.h. (172 t.p.h. average). The terminal personnel not in attendance at jetty while pumping.

Berth 379: Propane and Butane handled at this berth.

General: A very good hydraulic gangway is provided. Stores are allowed up to 50 m. from the ship's side. No jetty cranes available. Fresh water available through meter. We used Antwerp Radio for telephone calls as telephone on jetty out of order. This method was efficient but subject to interference from Ostend and PCH.

AUTHORITY: Port of Antwerp, General Management, Havenhuis, Entrepotkaai 1, B-2000 Antwerp, Belgium. *Tel:* (03) 2052011. *FAX:* (03) 2052020. *Contact:* E. Bruyninckx, General Manager.

AGENT: Vinke & Co. N.V., Jordaenskaai 25, B-2000 Antwerp, Belgium. *Tel:* +32 (0) 3.2024 770. *Telex:* 31310 Eknivco. *Fax:* +32 (0) 3.2250 282

BRUSSELS: 50.51 N. 04.22 E. (See Plan)

DOCUMENTS: Same as Antwerp and to be handed to Agent at Antwerp Roads, where clearance obtained.

PILOTAGE: Notice of ETA Antwerp Roads should be given 24 hours beforehand to Antwerp Agent, who will apply for upper Scheldt Pilot. This Pilot takes over at Antwerp Roads and brings ship up Rivers Scheldt and Rupel to Wintam Lock. Canal Pilot boards Wintam Lock. Boatmen service on canal optional, but advisable for ships over 164 ft. length and according weather conditions. Boatmen for possible mooring Wintam Lock Entrance always available. All locks equipped with VHF. Call and answer on Channel 68.

ANCHORAGES: Use of anchors strictly regulated on canal and only permitted certain areas in emergency.

RESTRICTIONS: Ships proceed upstream from Antwerp to Wintam day and night accordance state of tide, direction of current, length and draft.

MAX. SIZE: Overall length: 344 ft. 06 in.; Extreme breadth: 48 ft. 02 in.; Max. draft: 19 ft.

HEALTH: See "Antwerp".

RADIO: See "Antwerp".

VHF: All locks and tug boats equipped with VHF.

TUGS: Normally tug joins vessel Wintam Lock. Ship's lines always used. Although not compulsory, towage advisable in accordance length and draft or weather conditions.

BERTHING: No specific requirements for berthing in canal. Owing to dense traffic, ships should moor strongly.

The Brussels' Harbour extends over a length of about 14 km. between the regional limits, being approximately the bridge of the "ring" at Drogenbos and the bridge of the "ring" at Vilvorde.

The Inner Port offers: 14 km. of quays and mooring berths 220,000 sq.m. of wharf areas. 390,000 sq.m. of storage areas. 169,000 sq.m. of warehouses.

Materials Quay: Length: 710 m. Number of berths: 15. Depth: 3.5 m.

Barges Quay: Length: 710 m. Number of berths: 15. Depth: 3.5 m. Equipment: 1 private installation for cargo handling.

Shipowners Quay: Length: 920 m. Number of berths: 15. Depth: 4.2 m. Equipment: 6 private installations for cargo handling.

Steamers Quay: Length: 920 m. Number of berths: 15. Depth: 4.2 m. Equipment: 7 private installations for cargo handling.

Factories Quay: Length: 2,000 m. Depth: 4.2 m. (along the quay wall: 3.20 m.)

Leon Monnoyer Quay: Length: 1,800 m. Number of berths: 20. Depth: 6.5 m. Equipment: 11 private cranes from 3 to 10 tons lifting power. 9 private installations for cargo handling.

Heembeek Quay: Length: 360 m. Number of berths: 4. Depth: 6.5 m. Equipment: 9 private installations for cargo handling. Private crane with 1 ton lifting capacity.

Industrial Harbour Section: Length: 6,000 m. Number of berths: 60. Depth 6.5 m. Equipment: 59 private installations for cargo handling, (electric cranes from 1 to 10 tons lifting power, grain elevators, belt conveyors, suction devices.)

Maritime Canal: Length: 20 km. Depth: 6.5 m. Equipment: 26 private installations for cargo handling.

SPECIALISED CARGO HANDLING FACILITIES: Private cargo handling facilities exist in the whole of the Industrial Maritime Canal for grain, coal, fertilisers, liquid chemicals and L.P.G.

BRIDGES: Ships can reach outer harbour with clearance of 100 ft. and pass under fixed bridges to inner harbour with clearance of 20 ft. Road bridges open on demand. Railway bridges open according timetables, which subject to change.

STEVEDORES: Arrangements made by Agents.

MEDICAL: No notice required for medical attendance. Hospital facilities available. In case of accident or emergency call phone number 100. No particular inoculations or certificates required.

TANKERS: Oil usually imported by tank barges. No slop facilities. Max. draft permitted for wine tankers, gas tankers and acid carriers: 19 ft.

DENSITY: Canal is fresh.

FRESH WATER: Fresh potable water delivered from shore in Wintam Lock at average rate of 3 t.p.h. during passage through lock, and in outer harbour at maximum rate of 20 t.p.h. according diameter of hose.

Fresh water at all docks in Brussels, Agent requires 24 hours notice in order to arrange supply.

FUEL: All grades available. At least half a day notice should be given.

FIRE PRECAUTIONS: The usual precautions to be taken by tankers and ships handling inflammable or dangerous goods.

CONSULS:

REPAIRS: No shipyards in Brussels, but in Boom and Temse, not far from Brussels, and Antwerp. Minor deck and engine repairs by small shipyard on canal.

GANGWAY/DECK WATCHMEN: Services of shore watchmen optional.

OPENING/CLOSING HATCHES: Carried out by ship's crew.

REPATRIATION: Arrangements for repatriation can be made with Maritime Authorities on Antwerp Roads or at Brussels with the Harbour Authorities. Consuls in Brussels arrange for crew changes or repatriations (Consulates closed Saturdays, Sundays and Holidays).

AIRPORT: Brussels Airport served by regular airlines. Air terminal situated in town centre, directly connected with Airport by special railway.

HOLIDAYS: Official Holidays: January 1st (New Year), Easter Monday, May 1st (Labour Day), Ascension Day, Whit Monday, July 21st (National Holiday), August 15th (Assumption Day), November 11th (Armistice Day), December 25th (Christmas). Most offices closed on Saturdays.

POLICE/AMBULANCE/FIRE: General call, Ambulance/Fire: 100; Police: 101; Fire: 02/219.46.90. – 512.22.22. Police 02/517.96.11.

TELEPHONES: Only placed for warships at one particular berth.

SHORE LEAVE: Crew members allowed ashore without restriction.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

REGULATIONS: At night only main gate of outer harbour on right bank is open.

GENERAL: Bus 47 near left bank and street-car 58 near right bank of outer harbour, lead to town centre (10 minutes). General Information Office situated on de Broukeresquare (town centre). Ship stores can be obtained, but no bonded stores.

DEVELOPMENTS: Complete schedule for modernising canal, including building a larger lock, widening and deepening canal.

AUTHORITY: Port de Bruxelles, (Port of Brussels Authority), Place des Armateurs, 6, 1210 Bruxelles, Belgium. *Tel:* 02/425.10.00. *Telex:* 62207. *FAX:* (02) 425.18.74. *Cables:* Bruportus. *Contact:* General Manager.

Harbour Master: Rue de L'Avant-Port 2, Boite 1, 1210 Brussels. *FAX:* (02) 215.32.66. *Contact:* L. Byloos, Harbour Master.

GHENT: 51.02 N. 03.44 E. (See Plan)

PORT LIMITS: As a rule, the Notice of Readiness must be given in writing and will generally not be accepted by the receivers before the ship has berthed. Exceptionally, when the berth is occupied, the notice can be tendered as soon as the vessel has dropped anchor at Flushing or Terneuzen Roads, or has moored at a waiting berth. Strictly speaking, port limits are at the border between the City of Ghent and the town of Zelzate, i.e. at about 3 km. from the Dutch border.

DOCUMENTS:

Documents Needed for Customs:

1 Cargo Manifest No. 125.
1 Stores List.
1 Crew List, with the list of personal effects of the crew, such as cameras, guns, cigars, cigarettes, tobacco, alcohol.

Documents Needed for the Water Bailiff:

1 Crew List.
1 Passenger List.
Tonnage Certificate.
Oil Register.
Certificate for Civil Liability when the ship carries more than 2,000 tons of oil in bulk.

PILOTAGE: See "General" before first port.

ANCHORAGE: The roads of Terneuzen offer a safe and spacious anchorage outside the fairway, at the so-called Pit of Terneuzen and at the Everingen Channel. Depth is at least 49 ft.

RESTRICTIONS: Navigation day and night. There are no restrictions for entering the locks at LW for vessels with a draft not exceeding 32 ft.

MAX. SIZE: In normal practice, length 256 m., breadth 34 m., draft 12.25 m. Fresh water. Also see "Shipmaster's Report".

RADIO: All cables to Agents, receivers, etc. to be sent via Ostend Radio (call sign OST), eventually via Scheveningen Radio (PCH) for vessels coming from the North. Also see "Pilotage".

VHF: Contact pilot-cutters via Channel 6, Flushing Radio via Channel 14 and Terneuzen Harbour via Channels 3 or 11. All communications with the Harbour Master's Office in Ghent should go via Channels 5 or 11.

RADAR: Scheldt Radar Chain.

TUGS: Tugs needed for entering the locks usually meet the vessels near Buoy 23. The Master decides whether to use own lines or not.

BERTHING: All docks in the port have direct access to the sea-canal. The quay at Sidmar Steel Factory has a depth of 13.5 m. but the draft is limited to 12.25 m.

CRANES: All docks mentioned above are equipped with handy, powerful cranes, the majority of which are owned by the Port Authority.

At the Sifferdok there are 4 multi-purpose cranes of 40 tons and 3 tobogans. The Sifferdok and Zuiddok each have two bulk-handling gantry cranes of 15 tons and 10 tons respectively. Two floating cranes of 25 tons are also available.

At the Port Arthur Quay there are 10 cranes of 5 tons, 8 cranes of 15 tons and 2 tobogans owned by Manuport.

BULK CARGO FACILITIES:

Sifferdok: The installations of Euro-Silo at the end of the dock offer facilities for all kinds of grain and derivatives. Quay length: 475 m. Storage capacity: 130,000 tons heavy grain. A warehouse for flat storage of 114,000 tons. Equipment: 2 pneumatic discharge towers of 500 t.p.h. each; 2 screw unloaders of 700 t.p.h. each; 2 mobile cranes for grab discharge of barges; 2 train unloading stations of 500 t.p.h. each. 3 loading towers of 1,000 t.p.h. each; 2 loading stations for trains of 600 t.p.h. each. The Compagnie Belge de Manutention (CBM) situated on the left bank of the Sifferdok specialises in the handling of bulk cargoes such as pyrites, ores, phosphates, coal, cokes etc. Equipment: 2×15 ton and 2×10 ton cranes for grab discharge and 2 mobile cranes of 18 tons and 28 tons. Also mechanical shovels for the discharge of bulk goods into rail-wagons. Storage capacity: 2,500,000 tons.

The same commodities are also handled by CBM at the Zuiddok; grab discharge with 10 ton cranes.

Rodenhuizedok: The new grain silo "Ghent Grain Terminal" can accommodate vessels up to 80,000 tons. For unloading, there are 2 mobile pneumatics with a capacity of 700 t.p.h. and 450 t.p.h., and a mobile crane with a capacity of 1,600 t.p.h.

For loading, there are 2 mobile posts and 1 fixed post with a total capacity of 2,400 t.p.h.

Vertical storage capacity is 120,000 tons.

Horizontal capacity is 240,000 tons.

Quay length is 800 m.

Mercatordok: Formerly the Petroleumdok. Multi-purpose dock – Steel and forest products, car terminal (Honda), Ro-Ro facility (2 Jetties), fruit terminal.

Sea Canal – Ghent Coal Terminal: Quay length 700 m., max. draft 12.25 m. Storage capacity 3,000,000 tons. Equipment 2×20 ton cranes/ 20,000 tons per day.

Sea Canal – Sidmar: Steel plant situated on the right bank of the ship-canal to Ghent, with 1,050 m. quay length of which it is the exclusive user. Maximum depth at terminal: 13.50 m. Equipment: for the loading of steel sheet and coils, 1×25 ton and 1×35 ton crane. For grab discharge: 2 portal cranes of 25 tons each and 1×15 ton crane.

SPECIALISED CARGO HANDLING FACILITIES:

Fertilisers: Equipment for handling fertilisers is available at the Grootdok Quay No. 0270 (Manuport), Middendok Quay No. 0610-0620 (GTS), Sifferdok Quay No. 0830 (Stukwerkers); cranes for grab discharge, funnels and conveyor belts.

Liquid Bulk: Liquid chemicals can be handled at the Rhone-Poulenc factory in Rieme, on the left bank of the Sea Canal, most commonly liquid sulphur, phosphoric and sulphuric acid. No berths for LPG carriers exist in Ghent.

The Rodenhuizedok (Oiltanking) has 2 jetties for tankers up to 80,000 d.w.t. The storage capacity is 600,000 cu.m. with possibility for storage of petroleum and non-petroleum products.

In the Middendok (Locachim), there is possibility for storage of non-flammable liquids (200,000 tons).

Containers: Can be handled on the right bank of the Sifferdok (See "Cranes").

Ro-Ro: One double Ro-Ro berth with a fixed concrete ramp is situated at Quay No. 1010/1020, and other Ro-Ro ramps are situated in the Noorddok and Mercatordok.

Concentrated Fruit Juice in Bulk: In the Sifferdok, there is possibility for handling fruit juice in bulk with a storage capacity of 42,000 tons.

BRIDGES: There are 3 bridges across the Ghent/Terneuzen Canal, namely at Sluiskil, Sas-van-Ghent and Zelzate. They open day and night, on signals by Pilots.

High tension cables cross the canal at the Rodenhuize and Langerbrugge power-stations. Maximum air draft permitted: 48.90 m.

MEDICAL: Agents to be advised by radio or cable if urgent medical assistance required. Ample hospital facilities available.

STEVEDORES: Will be advised by Agents of ETA. Gangs must be ordered by noon in order to commence at 0600 hrs. next working day (morning shift); by 1700 hrs. to commence at 0750 hrs. next morning (normal working day); by 0700 hrs. to commence at 1400 hrs. same day (afternoon shift); by 1300 hrs. to commence at 1325 hrs. (half working day).

TANKERS: There are 2 tanker berths for seagoing vessels, owned by Oiltanking, in the Rodenhuizedok. 3 load and discharge lines available, capacity 2,000 cu.m./hr. Each berth can accommodate ships of 70,000 tons with a draft of 12.25 m. maximum.

DENSITY: Water in the docks and the Ghent-Terneuzen Canal is practically fresh.

FRESH WATER: (For seagoing vessels). Supply by barge, to be ordered at Port Commander's Office.

FUEL: All grades are delivered either by barge or truck. At least 24 hours' notice required.

CONSULS:

REPAIRS: Practically all kinds of deck and engine repairs are possible. Radio and electronic apparatus can also be repaired.

DRY DOCKS: There are 2 dry docks for ships with following dimensions.

(1) length: 120 m. breadth: 13 m. draft: 5.0 m.
(2) length: 70 m. breadth: 11 m. draft: 3.9 m.

SURVEYORS: All major Classification Societies have branch offices in Antwerp.

GANGWAY/DECK WATCHMEN: Not compulsory, but recommended. Cost per watchman: Fr. 5995 per shift; Fr. 7165 per night shift and Fr. 8645 per shift on Sundays and holidays.

HATCHES: Opening and closing is normally done by crew, if not otherwise specified by Charter-Party.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 250 gm. tobacco or 100 cigarillos. Wine is practically free. Spirits, one opened bottle per crew member.

CARGO GEAR: Either shore or ship's gear may be used.

REPATRIATION: All arrangements for crew changes and repatriation can be made.

AIRPORT: Brussels (70 km.), Ostend (65 km.) or Antwerp (60 km.).

TIME: Summertime, GMT plus 2 hours, from beginning of April to end of September. Otherwise, GMT plus 1 hour.

HOLIDAYS: New Year; Easter Monday; Labour Day (1st May); Ascension; Whit Monday; National Day (21st July); Assumption (15th August); All Saints (1st November); Armistice (11th November); Christmas Day. Work on these days possible at special overtime rates.

POLICE/AMBULANCE/FIRE: Dial 100 for any emergency. Dial 101 for Police assistance. Harbour Master's Office: 51.04.57 or by VHF, Channels 5 and 11.

TELEPHONES: Only placed on board visiting warships.

SERVICES: All kinds of special services are available, e.g. tank-cleaning, reception of waste oil, discharge of tank-washings or slops, compass adjusting, etc.

SHORE LEAVE: No restriction of any kind. Seaman's Book is sufficient.

SEAMAN'S CLUBS: Stella Maris, Hoge Weg 71, Ghent. Tel: (91) 51.17.63. Free bus service every day to Stella Maris, city centre and back.

Departure:

	Time (hrs.)	*From*
(a)	1800	Grootdok, Rigakaai (berth)
	1810	Noorddok, Middendok, Zuiddok (on the main road)
	1820	Stella Maris (Seamen's Club – closed on Friday)
(b)	1840	Sidmar (berth)
	1845	Rodenhuizedok – Ghent Grain Terminal (berth)
	1850	Vamo Mills – Ghent Tanking (berth)
	1855	Ghent Coal Terminal (berth)
	1900	Texaco Chemical Plant (gate)
	1903	Petroleumdok (gate)
	1905	Sifferdok (from berth No. 104 to 83 on main road)
	1920	Stella Maris (Seamen's Club, telephone, mail box)
	1930	City Centre (Arrival Korenmarkt – General Post Office)

Return:
from City Centre and Stella Maris to
(a) 2230 Grootdok, Rigakaai, Zuiddok, Midden and Noorddok
(b) 2300 City Centre to Stella Maris, Sifferdok and Sidmar

For excursion and shopping in town contact your agent or Port of Ghent, Tel: 51.05.50.

Reception Department: For many years the port of Ghent has been promoted not only as a modern, versatile and dynamic port, but also as the "friendly port", a port where the human being is still at the centre.

In co-operation with the Ghent City Administration, the Ghent Port Authority has set up a whole range of services which are mainly focussed on the human aspect of the otherwise tough harbour business.

In most ports all over the world, Port Managers do their utmost to handle vessels and cargoes as efficiently as possible, but in doing so they very often forget the human beings crewing those vessels as well as the people working in the port.

Since 1971, a staff member of the Reception Department goes aboard each sea-going vessel calling at Ghent to welcome both the Master and crew, to supply some general information on the port and the city and to inform them about the services provided by the Reception Department of the Ghent Port Authority.

On the same occasion, an English summary of the most important movies being played in Ghent at that particular moment is put at the seaman's disposal. This information is handed over to the Master, together with a touristic leaflet and another brochure containing a lot of useful information on the port and the city of Ghent.

In April 1979, the Board of Burgomaster and Alderman acquiesced in the Ghent Port Authority's proposal to maintain a shuttle bus service between the port area and the city centre for the benefit of the crew of sea-going vessels mooring in Ghent port.

This proposal was made because a large number of vessels are crewed by people originating from countries with a poor standard of living. Otherwise, as public transport between the spacious port area and the city centre is almost non-existent, those seamen would have to pay an expensive taxi ride.

During the day, sightseeing tours of the town are made. The seamen are driven and escorted by a Dockmaster giving the necessary touristic explanation during the tour.

On those sightseeing tours seamen usually have the opportunity to do some shopping in the town centre during a couple of hours, what is at the same time profitable to the local tradesmen.

Furthermore, all kinds of sports activities are organised for the purpose of the visiting seamen. Transport to and from the sports field, sports-halls, swimming pools and so on is organised by the Reception Department too.

For some years, those seamen are collected about 1800 hrs. and driven to the sailor's home or to the city centre. About midnight, they are collected once more and driven back to their vessel.

GARBAGE DISPOSAL: Skips and garbage containers can be provided through ship's agent or Port Authority. Tel: 09/2510457 or VHF Channel 11.

WASTE OIL DISPOSAL: Small barge and tanker trucks are available and can be ordered through ship's agent or Port Authority. Tel: 09/2510457 or VHF Channel 11.

CURRENCY: Belgium Franc. U.S.$1.00 = 31.00 BEF (April 1996).

SHIPMASTER'S REPORT: July 1983.
Terneuzen: Terneuzen locks are used to come into the canal system to Ghent. The authorities are extremely strict on the draft being 12.25 m. or less so Masters should be warned when loading max. cargo for Ghent not to go over 12.25 m.

AUTHORITY: Havenbedrijf Gent, J.F. Kennedylaan 32, 9042 Gent, Belgium. *Tel:* 09/2510550. *Telex:* 11460. *FAX:* 09/2515406 and 09/2516061. *Contact:* Captain A. De Wilde, Director General.

AGENT: See "Antwerp".

LIEGE: 50.38 N. 05.34 E. (See Plan)

LOCATION: The Port of Liege comprises 24 public docks and quays along the banks of the Meuse and the Albert Canal, near the border with the Netherlands.

APPROACHES: Depth on Albert Canal from Antwerp to Liege is 3.4 m. Depths on River Meuse range from 2.4 m. at Namur to 3.4 m. in Liege. Merksem Bridge on Albert Canal, 6.7 m. air draft and Arches Bridge on River Meuse has 6.8 m. air draft at normal times.

To make enquiries about access to ports at normal river discharge, contact Direction de la Navigation (Tel: (32) 41/677048).

For information at flood water – contact Etudes Hydrauliques Service (Tel: (32) 2/2084054).

MAX. SIZE: *Largest Vessel:* LOA 134 m. Max. beam 12.5 m. Max. draft 3.4 m.

BERTHING: 22.1 km. of public quays; 8 km. of private quays. One sheltered dock, 110 m. long, 26 m. breadth equipped with 4 warehouses, 10,000 sq.m. total storage area, good road and rail connections. 170 berth marina.
Ro/Ro Facilities: Ramp at the Port de Seraing for loads up to 1,200 tonnes.

CARGO GEAR: No additional requirements.

REPATRIATION: Through Immigration Officers and Maritime Police, Tel: 500925 and 500926.

AIRPORT: 3 miles from port, served by regular airlines.

TIME: Local time GMT plus 1 hour. GMT plus 2 hours in Summertime.

HOLIDAYS: New Year (1st Jan.); Easter Monday (changeable); Labour Day (1st May); Ascension Day (changeable, in May); Whit Monday (changeable); Independence Day (21st July); Our Mary Ascension Day (15th Aug.); All Saints' Day (1st Nov.); Armistice Day (11th Nov.); Christmas Day (25th Dec.). Cargo work can be arranged on those days at sufficient notice.

POLICE/AMBULANCE/FIRE: Police Tel: 701111 and 701057; Ambulance Tel: 900; Fire Tel: 701010 and 701086.

TELEPHONES: No arrangements for placing on board.

SERVICES: Compass adjusting, radio and radar repairs.

DEVELOPMENTS: New deep water quay with max. depth 8.0 m. LLW, to be increased to 10 m. in the near future.

AUTHORITY: Stad Oostende, Havendirectie, Slijkensesteenweg 1, 8400 Ostend. *Tel:* 059-321669, 059-321687. *Telex:* 81281 (Osthav B). *FAX:* (059) 330387. *Contact:* Patrick Vermandel, Harbour Master – Director.

ZEEBRUGGE: 51.20 N. 03.12 E. (See Plan)
BRUGES: 51.13 N. 03.13 E.

PORT LIMITS: A line drawn between the seaward end of the East and West jetties.

DOCUMENTS:
1 List of Dangerous Goods.
2 Crew Lists or Passenger Lists.
4 Cargo Manifests.
2 copies Bills of Lading.
3 Freight Lists (prepared by Agents).
2 Customs Provision Lists (prepared by Agents).
1 General Declaration (prepared by Agents).
1 Customs Declaration, outward bound (prepared by Agents).
Certificate of Registry.
Tonnage Certificate.
Bill of Health.
Derat Certificate.
Oil Record Book.
Certificate of Insurance in respect of Civil Liability for Oil Pollution Damage.
Safety Certificates.

PILOTAGE: Compulsory. Notice of ETA and request for a Pilot must be made at least 6 hours in advance to "Pilot VTS Wandelaar", through Oostende Radio, Channel 16, or Tel: 32-(0)50-55.08.01, Fax: 32-(0)50-54.74.00, Telex and Satcom: 81417. Message to contain ETA Pilot, draft and destination.

First reporting is by VHF on Channel 65 to Traffic Centre Wandelaar, 1.5 hours before entering traffic zone (Line – A Noord Buoys to A Zuid Buoys).

The Pilot boards the vessel near the A1 Buoy (14 miles N.W. of the port, co-ordinates Lat. 51° 22.5′ N., Long. 02° 53.5′ E.) or for small vessels near the Scheurzand Buoy.

Pilotage Service Addresses: Ostend: Sir Winston Churchillkaai 2, B-8400 Oostende. Tel: 059-55.28.11.

Zeebrugge: Loodswezenstraat 30, B-8380 Zeebrugge-Brugge 5. Tel: 050-54.50.72.

ANCHORAGE: Safe anchorage in Zeebrugge Roads for vessels drawing up to 9.70 m. Vessels drawing more than 9.70 m. will be anchored if needed around "A1" Buoy.

RESTRICTIONS: Vessels with a draft of over 12.0 m. are dependent on tide for entry.

Access Channel: "Pas van het Zand", beaconed; 2,000 m. long, 600 m. wide; depth Z (−13.5 m.) LLWS over a width of 300 m.; direction N.W./S.E.

TIDES: *Tidal Currents:* Rising tide: direction S.W./N.E., average velocity: 2 knots. Outgoing tide: direction N.E./S.W., average velocity: 2 knots.

Tidal Differences: Mean tide: +4.35 m. at HW; +0.70 m. at LW; +4 m. from 50 minutes before HW to 1.20 hours after HW; +3 m. from 1.40 hours before HW to 2.50 hours after HW.

Spring tide: +4.70 m. at HW; +0.40 m. at LW.

Neap tide: +3.82 m. at HW; +1.05 m. at LW.

MAX. SIZE: Vessels up to 350 m. and 55 m. beam can be accepted in Outer Harbour. Max. draft is 14 m. (keel clearance 1.80 m.). Inner Harbour: LOA 400 m., beam 48 m. and draft 51 ft. (to be increased to 55 ft.).

For Bruges: Max. beam 19 m., max. draft 6.75 m.

HEALTH: Pratique is normally given at Pilot Station provided health situation satisfactory. Any advice on health matters also obtainable from pilot service.

RADIO: Ostend Radio (VHF Channel 16) used for all messages.

VHF: Pilotage: Contact Traffic Centre Wandelaar on Channel 65. Port Control: (V.T.S.): Channel 71 (continuous watch). Lockmaster and inner port: Channel 13 (continuous watch). Tugs: Channel 71 (continuous watch) working on Channel 71, 13 and 8.

TUGS: Tugs join the vessel near "Scheurzand" Buoy.

Tugs available on 1 hour's notice; extra tugs available on 4 hours notice.

From "Scheurzand" Buoy more than 4 tugs can be available with notice of 4 hours. Tugs range from 2,500 h.p. to 4,000 h.p. (38 to 45 tons bollard pull). Applications to Zeebrugge Port Control VHF Channel 71.

Towage service address: Unie van Reddings-en Sleepdiensten (U.R.S.) c/o Zeebrugge Shipping and Bunkering Co. N.V., Minister Beernaetstraat 9, 8380 Zeebrugge. Tel: 050-542411. Telex: 81138. Fax: +32-50-546098.

Salvage: Via Ostend Radio, Via Port Control VHF Channel 71; or via URS.

BERTHING FACILITIES: Outer Harbour:

Harbour Mole: Leopold II

Quay No.	*Length* (m.)	*Depth at LLWS* (m.)
101, 102, 103	450	10.5
104, 105, 106 (part)	375	9.0
106 (part), 107, 108, 109, 110	746	7.2

Cranes: 6×8 ton, 2×8 – 16 tons and 2×3 ton.

Quays No. 106 and 107 used by North Sea Ferries. Two pontoons each with a ramp connected to a central platform. Two Ro-Ro ships can be loaded/discharged at the same time.

Car Ferry Terminal: Car ferry terminal operated by P&O European Ferries, area 20.3 ha., 4 berths. Quay No. 110: Double-deck/double-lane, heavy loads up to 120 tons. Quays No. 111 and 112: Single-deck/single-lane, maximum 60 tons with axle load of 20 tons over 4 wheels. Quay No. 113: Double-deck/single-lane.

Ramps: 2×53 m. Width of the bridge, including 2 separate protected footpaths for passengers: 7.10 m. Max. load capacity: 400 kg./sq.m. (heavy articulated loads to a maximum of 60 tons with an axle load of 20 tons over 4 wheels).

Berths: 2, on both sides of a line of 6 dolphins with a diameter of 10 m., linked with a gangway length: 145 m. Water depth: 7 m. at LLWS.

Ships: Max. length allowed, no limitation. Max. beam allowed: 21.20 m. with the ship's axis in line with the ramp axis (ships of 33 m. beam, however, can berth obliquely, or out of axis).

Western Peninsula: Area: 18 ha. Total quay length: 1,915 m., of which 1,525 m. with a water depth of −13 m. and 300 m. with a water depth of −16.0 m. (LLWS), quay height 8 m. above LLWS.

West Quay: Quay No. 201: 90 m. of connecting quays. Quay No. 202, 203: 725 m. for Ocean Container Terminal Zeebrugge (31 ha.). Gantry cranes: 2×45 ton and 1×35 ton. Storage area 10,000 TEU. Straddle carriers: 14×35 ton. Forklifts 15×2 ton - 30 ton, 1 trailer tractors, 2 tractors, slots for reefer container.

North Quay: Quay No. 204: 205 m. for OCZ and waiting quay.

East Quay: Quay No. 205, 206: 595 m. and 300 m. extension with depth 16.0 m. (available March 1997) for Ocean Container Terminal Zeebrugge. Gantry cranes: 2×40 tons. and 3×65 tons (18 m. across, twin-lift).

Quay No. 207: Jetty for lighters.

The Pacific Ferry Terminal: Area: 8 ha. Quay No. 208: Berth for ferry ships. Length: 195 m. Width: 25 m. Water depth: −8.0 m. LLWS. Linkspan: 144 m., SWL 100 tons; 1 ramp, length: 50 m. Width: 9.6 m. Max. size: 193 m. LOA, 18.5 m. width. Quay No. 209: Jetty for lighters.

The Short-Sea Container Terminal (S.C.T.): Area: 9.5 ha. Quay Nos. 210, 211, length 270 m. Terminal for loading/discharging container vessels. Water depth: −7 m. LLWS. Quay height: 7.30 m. above LLWS.

2 berths for container vessels. 2 gantry cranes (Peiner) of 30 ton SWL. 2 Peiner straddle carriers (30 tons). Fork lift trucks and tractors. Capacity 2,200 TEU's.

The Swedish Quay: Area: 12.4 ha. Quays: No. 702, 703, 704 and 705. Length 913 m. Water depth: −14 m. to −18 m. LLWS. Quay height: 8 m. LLWS.

Sea-Ro Terminal: Area: 12.4 ha.; 2 Ro/Ro berths (702,703) equipped with MacGregor pontoon (50 m. × 33 m.); 1 Ro/Ro berth (705) equipped with ramp; mobile crane, linkspans (2) 1×100 tons and 1×140 tons SWL.

The Brittannia Dock (operated by Sea-Ro): Areas: 15.1 ha. Berths: 6. Quay No. 608: 245 m. Quay No. 605-607: 588 m. Quay No. 613: 250 m. (landing bridge). Quay No. 614: 251 m. (landing bridge). Water depth 8.0 m. Linkspans (2) 1×88 tons and 1×80 tons SWL. All size Ro/Ro equipment.

L.N.G. Terminal: Ships up to 280 m.; draft 11.80 m.; water depth −13.0 m.; 3 L.N.G. tanks, each 90,000 cu.m.; length of jetty 380 m.

Other Installations: Bunkering station: 5 tanks, total capacity: 20,450 cu.m. (bunkering from lighter, however, is possible on all quays).

Gas freeing station (near Bunkering station), capacity : 4,000 cu.m. in gaseous nitrogen.

Maritime station: Equipped for the embarkation and disembarkation of cruise-ship passengers (hall, banking services, refreshment rooms, etc.).

Tank storage for molasses, 10 tanks with a total capacity of 87,350 tons. Quay No. 106 for tankers up to 200 m. LOA and max. draft 32 ft.

Flanders Container Terminals: Area: 100 ha. (26.3 ha. is paved). Quay length: 1,300 m. (of which 1,023 m. is achieved). Water depth: Z (−16 m.). Quays No. 120-123: 3 post-Panamax berths, 3 gantry cranes, 60 tons – 70 tons SWL, 14 straddle carriers (33 tons).

Inner Port at Zeebrugge: The water level in the inner port is at Z (+3.50 m.) LLWS.

Pierre Vandammelock: Length: 500 m., width 57 m., sill depth: Z (−15 m.) LLWS. The water depth in the lock is (15 m. +3.50 .) = 18.50 m.

The Visart Sealock: Length: 210 m., width: 19.70 m., sill depth: −5.50 m. LLWS. The usable water depth in the lock varies between 5.50 and 9 m.

The Connection Dock: Length: 3,200 m. from P. Vandammelock to Baudouin Canal. Width: 210 m. at sealock exit, widening to 400 m. in first section, 600 m. in front of East quay of North inlet basin, and again 400 m. in front of West quay of same basin to Baudouin Canal Depth: from sealock to North inlet basin Z (−15 m.) from North inlet basin to Baudouin Canal Z (−5 m.)

The North Inlet Basin: Length: 1,130 m. with a width which varies between 275 m. (South end) and 225 m. (North end). Depth Z (−14.5 m.)

Quays: East Quay Nos. 402, 403, 404: Length 890 m. Belgian New Fruit Wharf 400 m. quay (402, 403) has 6 fully insulated sheds.

C.T.O., Quay (404-405) has 2 insulated sheds, one open timbershed and 3 covered general cargo sheds.

Cranes: 2 electric travelling cranes 8 – 16 ton, 2 mobile Gottwald cranes 8 ton, mobile Gottwald crane 20 ton and 3 cargoveyors.

West Quay Nos. 408, 409, 410, 411, 412: Length 1,130 m. Combined Terminal Operators (CTO) Quay Nos. 408, 409, 410 has 600 m. quay. Equipped with a Ro-Ro pontoon and a general cargo warehouse (6,000 sq.m.), bulk shed (30,000 cu.m.), forklifts 3 – 42 tons, tugmasters, flatbeds, bagging installation. Andrew's Fruit Terminal has 640 m. of quays (No. 410-413). Area: 14 ha. (8 ha. is reserved for container handling and storage); 2 fully insulated sheds for storage of fruit, 4 pallet hoisters with 8 tons capacity. General cargo shed operated by Lalemant. Cranes: 3 electric cranes, 8-16 tons, 2 mobile Gottwald cranes. Flanders Cold Center (Located at Quays No. 412-413) has 3 cold stores for frozen products and a veterinary clearance station.

South Inlet Basin: (A) Canada Terminal (Operated by SeaRo Terminal) for the import/export of new cars. Area: 38 ha. (36 ha. is surfaced). Quay length: 606 m. Water depth: 18.0 m., no tidal difference. Berths: 2.

Quays No. 530-532: Linkspan pontoon: 100 tons SWL. The Canada Terminal is linked to the Brittannia Dock by the Minerva Square (also operated by SeaRo). Area: 22 ha. for parking new cars. The Car Centre Zeebrugge comprises an assembly line for custom-made options to new cars.

(B) ZBM, Terminal for bulk (West side of the dock): Surface area: 80 ha. Quay length: 600 m. Water depth: 18.00 m. Quays: 501 and 502. Cranes: 2×35 ton gantry cranes and 2×28 ton mobile cranes. Bulk facilities: 2 stacker/reclaimers. Stacking capacity: 4,500 t.p.h. Reloading capacity: 2,000 t.p.h. Total length of conveyor belts: 1,810 m.

The Prince Philip Dock: Length: 560 m., width: 200 m., depth: 8.40 m.

North Sea Ferries (disused): Ro-Ro platform length 24 m., width 7.8 m. max. load 60 ton, 20 ton per axle.

The Former Ferrydock: Length: 500 m. Width: 130 m. Depth: 8 m.

The Baudouin Canal: Length between the old sealock and the bridge at Dudzele: 5.5 km. Width at water surface: 70 m. Width at bottom: 22 m. Depth: 6.40 m. Quays, with a length of 450 m., in front of the coke and glassworks.

The Turning Area behind the Old Sealock: Length: 500 m. Width: 175 m. Depth: 8 m.

Inner Port at Bruges:

The Baudouin Canal: Length between the bridge at Dudzele to the entrance of the West dock: 6,650 km. Width at water surface: 125 m. Width at bottom: 50 m. Depth: 8 m.

The East Dock: Length: 617 m. Width: 90 m. Depth: 8 m.

The West Dock: Length: 1,818 m. Width: 90 m. Depth: 8 m.

The Industrial Dock: Length: 2,300 m. Width: 125 m. Depth: 8 m.

The Junction Lock: Length: 115 m. Width: 12 m. Sill depth: 4 m.

Quays: Cranes: 2×5 ton, 2×8 ton.

Berth No.	*Dock*	*Length*
921 – 923 (Quenastkaai)	East Dock	389 m.
924 – 925 (Kaap Hoornkaai)	East Dock	228 m.
926 (Albertakaai)	East Dock	148 m.
927 – 929 (Graaf Visartkaai)	West Dock	315 m.
940 – 944 (Julius Sabbekaai)	West Dock	520 m.

BULK HANDLING FACILITIES: *Cereals:*

Borlim nv: Head Office: Lanceloot Blondeellaan, B-8380 Zeebrugge-Brugge 5. Tel: 050-54.48.61.

Storage capacity: 9 silos, total capacity: 40,000 tons. Discharge capacity: 250 t.p.h. Loading capacity: 300 t.p.h.

Shore and quay length: total shore length: 160 m., actual quay length: 99 m.

Dumon Agro, Pathoekeweg 32, B-8000 Brugge 1. Tel: 050-31.51.61.

Storage capacity: 2 silos, 11,300 tons each.

H.E.L.B., Krakeleweg 34, B-8000 Brugge 1. Tel: 050-31.50.24.

Storage capacity: 95 cells, 10,000 tons.

Voeders Huys, Krakeleweg 38, B-8000 Brugge 1. Tel: 050-31.80.38.

Storage capacity: 84 cells, 8,000 tons.

WACO, Pathoekeweg 68a, B-8000 Brugge 1. Tel: 050-31.80.08 – 016-24.26.43.

Storage capacity: 34 cells, 16,500 tons.

C.T.O., Noordelijk Insteekdok: V.S.A., Kaai B-8380 Zeebrugge -Brugge 5. Tel: 050/545464. Telex: 61608 – flatsilo of 35,000 cu.m. - bagging installation.

Coal and Ore: Zeebrugse Behandelings Maatschappij (ZBM). Zuidelijk Insteekdok, Bastenakenkaai, B-8380 Zeebrugge-Brugge 5. Tel: 32(0)50-59.99.15. Head Office: C.B.M., Sea-Invest Group, Skaldenstraat 1, B-9042 Gent. Tel: 32(0)9-255.02.22. Fax: 32(0)9-259.08.94. Area 80 ha., 690 m. quay in South Inlet Basin.

STEVEDORES: 24 hours notice required to arrange gangs.

MEDICAL: Hospital at Bruges, Blankenberge and Knokke. Facilities available without prior notice.

TANKERS: No crude oils, only refined products delivered with smaller vessels to private installations on the Baudouin Canal and in the Port of Bruges.

Company	*No. of Tanks*	*Total Capacity* (cu.m.)
Petrover	4	12,500
Detavernier	3	3,500
L. Francois	3	3,500
Rosseel	14	12,400
Traen Gebr	9	10,000
Molasses		
Tameco	11	29,700

Cleaning Station: Euroservices nv, Minister Beernaertstraat 9, B-8380 Zeebrugge-Brugge 5. Tel: 050-54.42.61. Telex: 81.138.

The nitrogen plant operated by Euroservices nv offers gasfreeing and cleaning facilities for liquid gas carriers. The station is equipped with a ground flare and provides the necessary equipment to change grade with the shortest delay. 24 hour service is guaranteed (Quay No. 101).

DENSITY: 1025.

FRESH WATER: Available from the berths, rate 30 t.p.h.

FUEL: All grades of fuel and lubricants available. Can be supplied ex-wharf or by barge provided advance notice given. There are 5 tanks (total capacity 20,450 cu.m.).

Bunker Station: Belgische Bunkeroliemaatschappij, Administrative Office: Wetstraat 33, B-1040 Brussels.

Head Office: Zeebrugge Shipping and Bunkering Co., Minister Beernaertstraat 9, B-8380 Zeebrugge-Brugge 5. Tel: 050-54.42.60. Telex: 81.138.

The bunkering station situated at the end of the mole delivers all grades of marine fuel. Supplies can be effected directly ex-wharf (Quays No. 101 and 102) or by barges and tank lorries throughout the port. The depot is offering 24 hour service.

Operators are Messrs. Belgische, Bunkeroliemaatschappij.

REPAIRS: *Ships' maintenance and repairs:* Slipway on the transverse quay of the Prince Philip Dock (Quay 305) in the inner port at Zeebrugge.

Management: MBZ. Operated by: Indimec NV, Tijdokstraat 26, B-8380 Zeebrugge-Brugge 5. Tel: 050-54.41.79. Telex: 81.426.

Actual maintenance of ships is done by the company commissioned by the shipowner.

Slope: Length: 248 m., width of the cradle: 17.50 m., capacity: ships up to 1,000 tons.

Transfer area: Length: 85 m., width: 25 m.

Equipment: Tower crane: Lifting height: 30 m., max. reach: 30 m., lifting capacity: 1.8 tons with jibs at 29 m., 6 tons with jibs at 11 m.

Several ships can use the slope and the transfer area simultaneously.

Area of the adjacent grounds: 3.8 ha., which can be used by various ship repairers.

CONSULS: Denmark, France, Netherlands, Norway, Portugal, Spain and Sweden.
SURVEYORS: Available through local Agents.
GANGWAY/DECK WATCHMAN: Available. Only required when handling explosives.
OPENING/CLOSING HATCHES: Normally by crew.
CERTIFICATES: Registry, tonnage and usual certificates.
CUSTOMS ALLOWANCES: Each crew member 200 cigarettes or 200 gm. tobacco. Officers: 1 open bottle of spirits.
CARGO GEAR: Discharge of general and containers is usually by shore gear. Heavy lifts by mobile crane or ship's gear.
REPATRIATION: Brussels Airport. All facilities exist for changes of crews and repatriation of seamen.
AIRPORTS: *Ostend Airport:* Situated at 30 km. from Bruges and Zeebrugge. Charters and private business flights; no passenger flights. *Brussels Airport:* 120 km. from Bruges and 135 km. from Zeebrugge (to be reached via E40-motorway and Circular road R0 around Brussels) or by rail (1.5 hour ride).

More than 50 airline operators have landing rights at Brussels Airport. An average of 200 take-offs and landings take place every day, of which 80% to and from European airports and 20% to and from outside Europe. These flights are either direct or indirect via the closest transit airports of Amsterdam, Paris, London, Frankfurt.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.
HOLIDAYS: None.
POLICE/AMBULANCE/FIRE: All emergency services are available through the Port Control, VHF Channel 71. Ambulance and Fire: Tel: 100. Police: Tel: 101.
TELEPHONES: This service is available aboard ships at all berths by prior arrangement through the Agents.
SHIP SUPPLY SERVICE: *Off-Shore Facilities:* Facilities for supply of fresh water or stores and for transport of personnel by sea-going tugs available from Zeebrugge.
SHORE LEAVE: When Immigration and Customs requirement have been satisfied there is no restriction.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Service available through private contractors. Garbage containers provided alongside.

De Bree & Zonen, Krommewege 42, 9990 Maldegem. Tel: 050-712792.
De Keyser, Zandstraat 450, 8200 Brugge. Tel: 050-315107.
Gardin, Zeelaan 1, 8380 Brugge. Tel: 050-316102.
Vermander, Dudzelesteenweg 59, 8000 Brugge. Tel: 050-330470.

WASTE OIL DISPOSAL: No special berth. Tanker trucks available from private companies recognized by the government.
SEAMAN'S CLUBS: Octopus Seamen's Club, Kustlaan 25, 8380 Zeebrugge.
CURRENCY: Belgian Franc (BEF). U.S.$1.00 = BEF 30 (March 1996).
REGULATIONS: Port regulations and regulations concerning the handling of dangerous goods and explosives must be observed.
DEVELOPMENTS: Completion of the Albert II Dock in the Western outer port with the construction of a new container terminal to be operated by Hessenatie.

Development of the Wielingen Dock, the most seawardly located dock in the outer port for inter-European and intercontinental Ro-Ro traffic (To be operated by SeaRo).

Deepening of the access channel to the port to accommodate vessels drawing 55 ft.

Construction of 1 additional rail track between Bruges and Zeebrugge and 2 additional tracks between Bruges and Ghent.
AUTHORITY: Maatschappij van de Brugse Zeevaartinrichtingen NV (MBZ), Louis Coiseaukaai 2, B-8000 Brugge, Belgium. *Tel:* 050-44.42.11. *Telex:* 81201 Porbrg B. *FAX:* 050-44.42.24. *Cables:* Ports Brugge. *Contact:* P. Kerckaert, General Manager. R. Creyne, Senior Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Belize

BELIZE: 17.29 N. 88.11 W. (See Plan)

PORT LIMITS: Usually upon arrival at English Caye Pilot Station for vessels arriving from North and East and at anchorage in Belize Harbour for vessels arriving from South inside the reef.

DOCUMENTS:

Crew Lists – 6 copies for local use plus 10 Spanish copies for Consular Clearance.

Passenger Lists – 5 copies for local use plus 10 Spanish copies for Consular Clearance.

Stores List – 5 copies for local use plus 10 Spanish copies for Consular Clearance.

Manifests – 10 copies.

Customs Documents – Clearance for last port and crew declaration.

Health Documents – International Declaration of Health plus one copy crew vaccination list.

Ship's Papers and Certificates should be available on request.

PILOTAGE: A Pilot is always on station at English Caye. Contact can be made with the Pilot Station on VHF Channel 16. Vessels consigned to Eurocaribe can make contact on Channel 16 VHF.

ANCHORAGES: Depths in harbour anchorage area vary due to a natural slope; for example, a vessel drawing 14 ft. can anchor within 0.25 miles; 16 ft. 0.5 miles; 20 ft. 1 mile and so on Southward. Masters should refer to Pilot for this information.

MAX. SIZE: Size and length, within reason is not a problem. Tankers bringing oil to the Esso storage depot secure to buoys fore and aft. Max. draft 19 ft. 6 in.

PRATIQUE: Granted by Customs after boarding in harbour or at berth.

RADIO: Most ships' Agents man their own radio stations and usually stand-by on Channel 16 VHF with alternative Channels 6, 11, 12, 13 and 14.

TUGS: Tugs are not normally necessary but small tugs are available.

BERTHING: Main berth – length 220 ft., depth 17 ft. (approx.). Ro-Ro berth is 70 ft. wide, vessel lies alongside dolphins.

STEVEDORES: Gangs usually require 2 hours notice during normal working hours. Work rates average between 3 tons and 10 tons per gang hour.

MEDICAL: Hospital facilities are available.

TANKERS: Undersea pipe-line 8 in. in diameter.

Hand-pump discharging rate 250 to 300 g.p.m., also gravity flow. Normal discharge rate 2,000 barrels per hour.

DENSITY: Density varies with outflow from rivers during wet season (July-December).

FRESH WATER: Very scarce and expensive if vessel cannot berth at dock.

FUEL: Light diesel oil 45/48 available subject to Government approval. Can be supplied at buoys with 8 in. dia. pipe (reductions to 4 in. available or by barge). Also available by truck if vessel able to dock.

FIRE PRECAUTIONS: None.

CONSULS:

Belgium
Brazil
Canada
Chile
Cuba
Denmark
France
El Salvador
Israel
Italy
Jamaica
Lebanon
Netherlands
Nicaragua
Norway
Sweden
Germany

Embassies:

Costa Rica
El Salvador
Guatemala
Honduras
Mexico
Panama
Taiwan
United States
Venezuela

High Commission: British

REPAIRS: Only small minor repairs possible.

SURVEYORS: Lloyd's and A.B.S.

GANGWAY/DECK WATCHMEN: Not required.

HATCHES: Stevedores open and close hatches except MacGregor type.

CUSTOMS ALLOWANCES: 200 cigarettes plus 1 bottle spirits (0.20).

CARGO GEAR: Ship's gear; heavy lift cranes are available up to 140 tons for vessels which can reach the dock.

REPATRIATION: Possible, regular air services to and from Miami, New Orleans, and neighbouring Republics.

AIRPORT: Phillip Goldson International Airport 10 miles from Belize City.

TIME: Normally GMT minus 6 hours.

HOLIDAYS: Public Holidays: New Year's Day*; Baron Bliss Day (9th March); Good Friday; Holy Saturday; Easter Monday*; Columbus Day (12th October); Labour Day* (1st May); Commonwealth Day (24th May); St. George's Caye Day* (10th September); Independence Day* (21st September); Carib Settlement Day (20th November); Christmas Day* (25th December); Boxing Day* (26th December).

*Special arrangements must be made with Union. All other days are subject to overtime rates.

POLICE/AMBULANCE/FIRE: All emergencies dial 911.

EMERGENCY CO-ORDINATION CENTRE: None.

BANKS: Barclays Bank International Ltd., P.O.Box 363, Albert Street, Belize City. Tel: 77211/2. Telex: 217. Fax: 78572.

Belize Bank Limited, 60 Market Square, Belize City. Tel: 77132. Telex: 229. Fax: 72712.

Bank of Nova Scotia, P.O.Box 708, Belize City. Tel: 77027. Telex: 218. Fax: 77416.

Atlantic Bank, 6 Albert Street, Belize City. Tel: 77124. Fax: 77736.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Seaman's Book sufficient.

CURRENCY: Belize Dollar.

STORING: See "Prelims".

1. Yes.
2. Vessels may store by barge during loading and discharging.
3. Yes.
4. Yes.
5. Prior arrangements must be made.
6. Possible to use riggers, however, it is best to use crew.

SHIP SUPPLY SERVICE: There are numerous small craft each individually owned, which ply between the wharves and ships anchored in the harbour. These craft provide ship to shore transport of personnel, and/or essential stores and/or sick crew members.

REGULATIONS: None.

DELAYS: Discharge and loading operations occasionally delayed by weather (rain) and sometimes by shortage of equipment (trailers, etc.).

GENERAL: Starboard anchor usually used to make lee for operations on portside if vessel is at anchor. It is necessary for vessels to provide toilet facilities for stevedores. Feeding of Supervisors and Customs Officials is normal.

SHIPMASTER'S REPORT: February 1987.

Port Limits: 3 miles from English Caye light and on leading lights.

Documents:

6 Crew Lists.
2 Passenger Lists.
2 Crew Declarations.
1 Health Declaration.
8 Cargo Manifests.
2 copies of Bills of Lading.

Pilotage: Pilot ordered through Agents. Pilot boards outside reefs and asks vessel to go on to English Caye leading lights 2 – 3 miles from the leading lights. Pilotage to berth is straight forward in deep natural channel. Once vessel leaves this channel the waters shoal rapidly and 20 ft. is the maximum draft, although the Pilot says he has berthed ships at 21 ft. Approach berth on 045° T and when starboard buoy almost abeam let go starboard anchor and manoeuvre into berth. First line to port aft buoy needs to be the best and to be doubled up. The stern is heaved around with this and as the wind was Northerly 10 – 15 knots it was taken steadily. Forward port buoy lines were run and vessel then heaved over to pipe-line buoy. Stern buoy line then run and vessel backed into position. Cable was out to 5 shackles on deck. Other buoy lines were run and on completion vessel was heading 108°T. Throughout our stay the weight remained on the port buoy lines as the wind stayed in the North. Very little tidal influence.

Anchorages: None specified, numerous safe areas to anchor if required.

Restrictions: Daytime berthing and unberthing.

Max. Size: Limiting factor is 20 ft. draft.

Health: Port Health Officer gives Free Pratique and 'Q' flag to be flown until given. Renewed Derat Exemption here.

Radio: All communication done via Sat Com.

VHF: Pilot on Channel 16 and 6. Port working Channel is Channel 6 which Agents and all use. Port not very busy so no problems. They have 1 tanker per month.

Radar: None.

Tugs: None.

Berthing: See "Pilotage".

Bridges: None.

Medical: Doctors in the town but anything serious has to be flown out.

Tankers: 1×8 in. submerged pipe-line through which all grades are pumped with water plug between each. Line to be left in gas oil. Max. B.P. is 140 p.s.i. and a general rate of 375 cu.m.p.h. was obtained on all grades.

Density: 1021.

Fresh Water: No means to supply at tanker berth.

Fuel: Diesel with 48 hours' notice. No fuel oil.

Fire Precautions: Normal ship precautions; no help from shore.

Repairs: Very minor repairs only.

Dry Docks: None.

Surveyors: Lloyd's, A.B.S. and B.V.

Gangway/Watchman: None.

Customs Allowances: 200 cigarettes and 1 bottle of spirits. Bond sealed.

Repatriation: No problems with staff or crew changes.

Airport: 12 miles from town.

Time: GMT minus 6 hours.

Police/Ambulance/Fire: None.

Emergency Co-Ordination Centre: None.

Telephones: None.

Services: None.

Banks: Royal Bank of Canada, Barclay's Bank, Bank of Nova Scotia, and Atlantic Bank.

Storing: Fresh vegetables only. Lobster in season January to March.

Shore Leave: No restrictions and boat stays with ship all the time.

Identification Cards: Not required.

Regulations: None.

Delays: Weather, daylight berthing and unberthing.

Developments: None anticipated.

General: Shore capacity: Avgas 2,400 bbls., REG Mogas 24,800 bbls., Premium Mogas 7,900 bbls., Avtur 22,800 bbls., gas oil 29,600 bbls.

AUTHORITY: Belize Port Authority, P.O.Box 633, Ceasar Ridge Road, Belize City, Belize, Central America. *Tel:* 72449, 72449. *FAX:* 73571. *Contact:* Mr.A. Coye, Port Commissioner and Chief Executive. Mr.L. Garbutt, Operations Manager.

Republic of Benin

COTONOU: 06.20 N. 02.32 E. (See Plan)

PORT LIMITS: The area contained within an arc of a circle of 1 mile radius centred on the red light at the West Jetty.

DOCUMENTS: Once berthed the ship must be able to produce to the Port Authorities:

6 copies Crew List.
4 copies List of Ports of Call.
6 copies Passenger List, and passengers in transit.
6 Customs Declarations (personal effects list).
2 Maritime Declarations of Health.
3 Lists Provisions and Stores, including foodstuffs.
10 copies Manifest.
1 Bill of Lading.
1 Declaration of Arms and Ammunition.
3 Lists of Dangerous Cargo (unloading or in transit).
6 Stowaway Lists.
3 Vaccination Lists.

Also international documents of ownership and safety.

PILOTAGE/APPROACHES: Vessels must advise ETA to Port Authority "Dirport Cotonou" 24 hours prior arrival weekdays, and before midday Saturday for Sundays and before midday on day preceding holidays. Cable address Pilot Station "Commandant du Port, Cotonou". Telex: 5004 "Dirport Ctnou". On approach to port vessels may also call Pilot Station on 2182 kHz or VHF Channel 16. Permanent radio watch kept by Port Coast-Guard Station. Pilot services permanent and operate night and day, Sundays and holidays, except for nights of 24th and 31st December from 1800 – 0600 hrs. Ships drawing more than 30 ft. must enter on high tide. On arrival in approaches, ships coming from West or South must steer a Northerly course in direction of lighthouse, and take Pilot about half a mile from fairway. If arriving from East, vessels should take Westerly course in direction of fairway and take Pilot about half a mile from fairway. Pilot boat is small cutter with black hull and white superstructure, by day carries flag "H" and by night carries statutory lights for pilot boats. Piloting obligatory for ships over 100 net tons.

Fairway Buoy: Position Lat. 06° 20.4′ N., Long. 02° 26.8′ E. Light-flash "A" (· –) 10 secs.

ANCHORAGES: In cases of bad weather or of waiting for Pilot, ship must anchor approx. 1 mile to South of lighthouse. Sound anchorage with sand bottom and depth 14 m. Forbidden to anchor within radius of 700 m. from red light of West Jetty.

Prohibited Anchorage: All the area to the West of the meridian of the West breakwater red light.

RESTRICTIONS: No restrictions on hours of entry or departure.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Free Pratique generally given by Agent.

RADIO: Advisable give Agent 72 hours notice of ETA. Thereafter re-confirm 36 hours prior arrival.

RADAR/VHF: No port radar service. VHF Channel 16, 14 and 12. R/T 2182 kHz.

TUGS: Tug assistance performed by Port Authority of Cotonou and compulsory for every vessel over 500 g.r.t., mooring, unmooring, at berth or shifting. Extra charge for using tug's lines. Vessels with length over 100 m. require 2 tugs.

BERTHING: Berthing quay 620 m. long, 10.0 m. depth, which will accept alongside a minimum of 4 ships working together. Harbour dredged up to 11 m. below chart datum and will permit almost all sizes of ships to work safely. Railway line runs 4 m. side of quay, under ship tackles, and used only for heavy lifts. Berthing priority only given cargo ships and tankers which have specially reserved berths. Other ships berth dependent on berths available and in order of arrival. As well as 2 tanker berths there is loading berth for bulk palm-oil, one waiting berth at harbour entrance, and 4 quays with warehouses for import/export traffic.

New Quay: Length 660 m. Depth alongside 11.0 m. Two conventional berths (360 m.), one container berth (200 m.) and one Ro/Ro berth.

Facilities include a container storage area of 65,000 sq.m., 2 warehouses of 6,000 sq.m. each, 1 transit warehouse of 4,000 sq.m. and an open storage area of 60,000 sq.m.

STEVEDORES: Ship must advise Agent in advance of number stevedore teams required, and specify number of hours work required. This must be done 24 hours in advance on weekdays, and before midday Saturday for Sundays, and before midday on day preceding holidays. Loading and unloading rate: Working days – 600 tons for bagged cargo. 400 tons for other cargo. Sundays and holidays, half above rates. Days counted as 24 hours starting from first break following berthing. For ships having to handle smaller quantities, assessment of time calculated in multiples of 300 tons for bagged cargo and 200 tons for other cargo, per 12 hours. Loading and unloading operations can be carried out on Sundays and public holidays if ship's Master wishes, with exception of Labour Day (May 1st), 26th October, 30th November, 31st December and Independence Day.

MEDICAL: Well-equipped modern hospital in Cotonou.

TANKERS: 2 tanker quays for ships of 215 m. length and 31 ft. draft. (Depth at seaward berth 11.0 m.). Unloading carried out by 100 mm. pipeline. Loading of petroleum products carried out by pumping (80 cu.m.p.h.) or by gravity (50 cu.m.p.h.). Products are aviation spirit 100/130, "Super" petrol, low-grade petrol, Kero Avtur, and gas oil.

Also see "Seme Terminal".

FIRE PRECAUTIONS: Port has following safety equipment: 2 tugs equipped with fire hose of 50 cu.m.p.h. 2 motor pumps of 30 cu.m.p.h., 1 draining pump of 150 cu.m.p.h. In addition special security watches are kept on dangerous merchandise in classes 1a, 1b, 1c, 1d and 111c. Normal watch up to 5 tons, double watch from 5 tons to 16 tons. Motor pump standing by from 16 – 50 tons. Tug standing by for quantities above 40 tons for inflammable liquids (flashpoint less than 55°C) and above 50 tons for other dangerous cargo.

FRESH WATER: Supplies available at all berths on quay by pipeline of 100 mm. with reduction of 70 mm. (rate 25 t.p.h.).

FUEL: Fuel oil of 1,500 seconds viscosity available at Berth No. 1 and at the Fishing Quay. Rate 50 to 80 cu.m.p.h.

CONSULS:

	Telephone	*Telex*

REPAIRS: Workshops for small repairs. No tank-cleaning facilities.

DRY DOCKS: Only hauling gear of 250 tons for careening small ships and trawlers.

WATCHMEN: (See "Fire Precautions".) Recommended that a watchman be on board. Can be arranged by Agents.

OPENING/CLOSING HATCHES: Carried out by stevedores

CUSTOMS ALLOWANCES: 200 cigarettes and 3 opened bottles of spirits for each crew member.

AIRPORT: 5 km. from port. Regular flights to European destinations (5 departures a week for Paris).

TIME: GMT plus 1 hour.

HOLIDAYS: January 1st; January 16th; Easter Sunday 1st April; Labour Day (May 1st) – no cargo work; 26th October; 30th November; 31st December – no cargo work; Assumption; November 1st (All Saints' Day); 25th December (Christmas); Tabaski and Ramadan at the beginning of Lunar Year (Moslem holidays).

POLICE/AMBULANCE/FIRE: Harbour Police 31-3942; First Aid 17; Hospital 31-2713 and 31-2717; Fire Brigade 18.

TELEPHONES: A telephone can be placed on board at request of ship's Master.

SHORE LEAVE: Crew must carry shore pass.

REPORT: March 1988 (Updated 1994).

The Port of Cotonou is a well sheltered harbour enclosed by a 1,200 m. long West Breakwater and a 4 cables long East jetty projecting S.S.W. from shore (East cross breakwater). It was opened to traffic in August 1965 and is managed by Port Autonome de Cotonou.

The harbour is accessible to vessels of up to 210 m. in length and a max. draft of 10 m. The entrance is from the Ocean through a 0.6 mile long channel, 180 m. wide and 12 m. deep. The harbour pool was dredged to 11 m. in 1975. Silting is reported along the North side of the West breakwater and the new Dock. Dredging work carried out (1993).

Vessels drawing more than 30 ft. transit the channel on high water.

Petroleum Berths: The inner side (Westerly side) of the East breakwater provides berthing facilities for tankers of up to 200 m. in length and a max. draft of 32 ft. There is no deadweight or displacement limitation. However, tankers of up to 40,000 d.w.t. can safely enter the harbour and moor starboard side to berth called "P II". Berth "P II" does not have fuel oil receiving facilities. Clean products are handled through 1 × 8 in. flexible hose, rate 1,000 bbls./p.h. No facilities for dirty ballast. The fendering system consists of large cylindrical rubber fenders in excellent condition.

Fuel oil is discharged at Berth "Q I" located at the very end of the main quay (East side). Vessels of up to 150 m. in length with a max. draft of 8.0 m. can be accommodated. Vessels berth port side alongside. The quay is fenderless. There is no deadweight limitation. However, it would be unsafe to berth vessels larger than 15,000 d.w.t. Fuel oil is handled through 6 in. flexible hoses, rate 700 bbls.p.h. Max. back pressure 100 p.s.i.

Fire coverage is marginal – 2 × 60 lb. wheeled dry chemical fire extinguishers.

Charts: British: 595 and 1861. U.S.: 57006, 57041 and 57100.

Tides and Currents: The spring tide values are 1.50 m. and 0.20 m.

Currents set across the entrance and may attain a rate of 4 knots. The predominant direction of the swell is from the third quadrant, reaching 12 ft. in length between June and September.

The rainy season is mid-April to mid-July (tornado season).

Anchorage: Vessels can anchor 1 mile South East of the lighthouse. Good holding ground in a depth of 48 ft.

Pilotage/Towage: The Pilot boards 0.5 miles from the head of the West breakwater. Pilotage is around the clock, but between 2200 hrs. and 0600 hrs. 2 hours' notice is required.

Towage is performed by the Port Autonome de Cotonou. 2 × 1,400 h.p. tugs and 1 × 2,000 h.p. tug are available.

Telecommunication: The service to other Francophone West African countries is good. There is usually no problem with calls to the U.S.A. placed through the operator. There is no coastal radio station. The Port Authority monitors VHF Channel 16 and SSB 2182 kHz.

Repairs: There are no repair facilities.

Supplies: Fuel and gas oil are available from SONACOP. Fresh water is available at all berths by pipeline. Rate 25 cu.m.p.h. There are no barges available. Repatriation is possible. There are frequent air connections to Europe.

Oil Surveyor: There is no representation of independent Surveyor Companies.

Caleb Brett Ltd. is present in the surrounding countries (Togo and Nigeria.)

SONACOP: Societe Nationale de Commercialisation des Produits Petroliers is a state owned company and is the sole distributor of petroleum products in the country.

SONACOP operates a tankfarm which has a storage capacity of 70,000 cu.m. (19 tanks).

The national annual consumption of products is as follows:

Clean (Mogas, Gas Oil, Kerosene, Avgas)	150,000 tons.
Fuel oil	12,000 tons.

AUTHORITY: Port Autonome de Cotonou, B.P. 927, Cotonou, Benin. *Tel:* 312890, 315280. *Telex:* 5004 Dirport. *Cables:* Dirport. *FAX:* 312891. *Contact:* I. Badaron-Soule, Port Director. Badaron Madjidi, Harbour Master (Tel: 312782).

AGENT: SCAC, B.P. 433, Cotonou, Benin. Tel: (229) 331178, 331198 and 331611. Telex: 5121. Cables: Ctnou Scac Benin. Fax: (229) 330611.

SEME TERMINAL: 06.18 N. 02.39 E. (See Plan)

LOCATION: The loading terminal is located at Lat. 06° 18′ 23″ N. and Long. 2° 39′ 32″ E., about 4 nautical miles off the coast of the People's Republic of Benin.

Depth of water at the loading berth is 18 m. The bottom is sand, mud and shell.

DOCUMENTS: See "Cotonou".

NAVIGATION AIDS: *Beaconing:* Four area marker buoy units in the IALA System A, i.e. each unit consisting of 4 beacons, are placed in position to mark the following installations:

Platform No. 1:	Lat. 6° 14′ 23″ N.	Long. 2° 41′ 16″ E.
Platform No. 2:	Lat. 6° 12′ 19″ N.	Long. 2° 41′ 35″ E.
Platform No. 3:	Lat. 6° 15′ 29″ N.	Long. 2° 42′ 05″ E.
Seme Offshore Terminal:	Lat. 6° 18′ 23″ N.	Long. 2° 39′ 32″ E.

PILOTAGE: A Mooring Master will be provided by the Operator.

Boarding position will be agreed upon with the Mooring Master by radio upon arrival.

It is the responsibility of the ship's Master to provide, rig and maintain a safe accommodation ladder for access to and exit from the vessel or hoist.

ARRIVAL: *Temporary Anchoring:* No berthing will be attempted between 1500 hrs. and 0700 hrs., unless approved by the Mooring Master, the same for leaving at night.

Notice of Readiness can only be received between 0600 hrs. and 1400 hrs.

In the event of arrival after 1500 hrs. and during the hours of darkness, a holding area is located at Lat. 6° 16′ 00″ N. and Long. 2° 34′ 00″ E., in water depth of approximately 20 m. (66 ft.) The bottom is sand, mud and shell.

RESTRICTIONS: See "Arrival".

MAX. SIZE: Maximum permissible draft is 14 m. (46 ft.). However, the Operator may reduce this draft should meteorological and tidal conditions prove unfavourable.

HEALTH: *Sanitary Boarding:* The Mooring Master shall be entitled to conduct sanitary inspection.

The Master shall supply:

1. The Maritime Declaration of Health.
2. The Vaccination Certificates for the crew.

In case of infectious disease on board, the following institutions may be contacted:

Polyclinique	Tel: 301431/301420.
Clinique les Graces	Tel: 321171.
Doctor Lam	Tel: 300766.

RADIO: Vessels should send their ETAs by telex to Tender "Drill Fish" (Benin Cotonou 5134, 5173, 5174).

Notice of Arrival: Vessels bound for the Seme Offshore Terminal must notify their ETA to Seme Oilfield Project (Attn. Loading Master) at the following times:

(1) 7 days before arrival.
(2) 72 hours before arrival.
(3) 48 hours before arrival.
(4) 24 hours before arrival.

and then every 2 hours if any change in ETA.

When within 12 hours before arrival, a continuous watch must be kept on the VHF Channel 16.

The "7 days notification" need only be given if the sea passage in progress is in excess of 2 weeks' duration.

The "72 hours notification" must include the following information:

1. Name of vessel (if available).
2. Firm ETA (local time and date).
3. Quantity of cargo required in barrels and metric tons.
4. Estimated salt water arrival draft.
5. Manifold fittings flange sizes and ASA, DIN or BSS rating.
6. Any special requirements.

The "48 hours, 24 hours and 12 hours notifications" need only the notification of the name of the vessel and ETA plus any amendments to the details already provided in the "72 hours notification".

After the initial notification has been made, any change in ETA of more than 12 hours requires immediate notification to the Seme Terminal.

VHF: During vessel's stay at the terminal, a permanent watch must be kept on the Channel 9 or 6.

Communications: Normally, Channel 6 is used as the communicating channel between Seme Tank Farm, Seme Oilfield Project personnel and Seme Oilfield Project tugs. VHF sets for this purpose are supplied by the Operator.

TUGS: An adequate number of tugs will be available for all mooring operations at all times, these will be directed and co-ordinated by the Mooring Master.

The tugs available at the Seme Offshore Terminal are of the AHTS type, each with 2 × 2,640 b.h.p., generating a bollard pull of 50 tons.

Normally, the attending tug is "Drill Fish".

Mooring Boat: An adequately powered line handling boat is provided for running moorings, under the direction of the Mooring Master. Release of mooring lines will be performed by the mooring boat, except in an emergency.

BERTHING: *Loading Berth:* This is a modified conventional buoy mooring (CBM) to which a Mediterranean style moor has been adopted for berthing operations. The centre-line is oriented in a direction of 253° True, which relates directly to the bow heading. Under certain conditions, the vessel may be required to adopt a heading of ± 10° from the established norm.

Subject to draft, the berth can accommodate tankers up to about 120,000 d.w.t. to load part cargo with Benin as first port of call.

Mooring Equipment: There are 4 mooring buoys:

Buoys No. 1 and 2 are connected to 260 m. × 76 mm. stud link chain terminating with a 7,500 kg. Stevin MK 3 anchor, having a design holding capacity of approximately 110 tons.

Buoys No. 3 and 4 are connected to 310 m. × 76 mm. stud link chain terminating with a 10,000 kg. Stevin MK 3 anchor, having a design holding capacity of approximately 145 tons.

Each buoy is equipped with 2 quick-release hooks.

Special Moorings: These are carried aboard the attending tug and if their use is deemed necessary, the tug and the mooring boat will work in conjunction to put the lines aboard the tanker. First passing the eye over the mooring buoy hook and then passing the bitter end to the tanker to be made fast.

Weather Criteria: The following criteria are for the weather conditions under which the tanker may remain berthed.

Max. wind speed at 10 m. above sea level:

1 hour mean	– 20 knots (10.3 MS – 1)
1 minute mean	– 25 knots (13.0 MS – 1)
Max. wave:	– 2.5 HSTG

Wind and/or waves to these values are not restricted to any particular direction.

BALLAST: *Ballast on Arrival:* Ships must arrive with sufficient ballast and correct trim to be able to manoeuvre with complete safety.

Deballasting will not be allowed without the consent of the Loading Master.

Deballasting – Water Pollution: The vessel must approach the terminal with clean ballast.

Any vessel approaching with polluted ballast may be forced to leave the terminal and shall be fully liable for ensuing delays. Acceptance of Notice of Readiness would also be amended accordingly.

It is forbidden to dispose of cinders, burning materials, objects and waste of any kind in the sea.

The Master shall be responsible for any leakage or overflow on board and any other difficulty which may involve an occasional jettisoning of hydrocarbon. Such leakage shall be stopped.

Scuppers shall be securely blocked during the entire loading time.

The Operator declines any liability related to non-compliance with International and Port Regulations the Mooring Master may discover.

Non-compliance with the above regulations involves express notification to the Master or filing of a report.

LOADING: *Notice of Readiness:* Notice of Readiness shall be tendered to the Loading Master (See "Arrival").

Connection of Flexible Hoses: Loading of vessels shall be carried out through a 12 in. flexible submerged hose. Connection to the manifold is by a 12 in. Camlock flange. The Operator may supply 10 in., 12 in. and 16 in. adapters.

The loading hose is equipped with a manually operated shut-off valve at ship's side of the hose end.

The tanker derrick is to be rigged on the starboard side before mooring. The S.W.L. of the derrick hook shall be at least 4 tons.

During connection and disconnection of the flexible hoses, assistance of the crew will be essential, in particular for the handling of the winches and derricks. During the entire stay of the vessel at the loading site, the Mooring Master shall ensure that a safety watch is maintained onboard. The Loading Master or his representative, performs the duties of head of loading and remains in touch with the terminal.

The assisting vessels are to remain at the disposal of the Loading Master.

A ladder must be kept permanently ready alongside the vessel so as to permit access by the team in charge of the flexible hoses. A boat rope must be rigged near the ladder.

Loading: Loading may be carried out at a maximum rate of 1,650 cu.m.p.h. or 11,000 bbls.p.h.

Inspection of tanks after deballasting and ullages after loading is to be carried out in the presence of the Loading Master.

The terminal shall place on board the vessel sealed samples representing the cargo.

Since it is a "Shore stop" operation, the Loading Master shall notify the vessel, 30 minutes before end of the loading.

The Master shall be fully responsible for operating the valves and for the safety of the cargo on board.

MEDICAL: In cases of emergency, contact the three institutions mentioned in the "Health" section.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: See "Cotonou".

REPAIRS: No facilities available.

TIME: GMT plus 1 hour.

SHORE LEAVE: Not possible.

WEATHER: *Meteorology:* The rainy seasons (monsoon) extend from May to June and from September to October.

The dry season extends over a period of 3 to 4 months, that is to say from November to February.

Air Temperature: The air temperature varies on average from 24° C to 36° C.

Sea Temperature: The sea temperature varies from 21° C to 31° C.

Visibility: During the rainy season, visibility can be reduced to less than one mile due to precipitation.

Tides: The tides are of a semi-diurnal type. Max. amplitude is 2 m.

Wind: The prevailing wind blows from the South and West, and is strongest from May through September.

Currents: Maximum current that may be present is assumed to be 3 knots, from direction around 260° (Guinea Current). Normally the current is well below the maximum from this direction. From other directions lower rate currents are to be expected (i.e. tidal current).
Swell: Southwesterly swell is most frequent from April thorugh October. The higher waves are expected as a combination of locally generated Southwesterly wind, waves and swell. Wave heights above 3 m. are relatively rare.
GENERAL: *Visitors:* Except for personnel with specific tasks on board the vessel, the boarding of personnel takes place under the full responsibility of the Master.
Chart: No. 595 (French).
Sailing Directions: Africa Pilot, Volumes No. 1 and 2, published by the British Admiralty.

REPORT: March 1988 (Updated 1994).
Seme Terminal is located about 4 miles offshore. The Oil field is now run by local technicians assisted by contractors.
Seme's output is around 6,000 barrels per day.
Location: 06° 18′ 23″ N., 02° 39′ 32″ E.
Anchorage: 06° 16′ N., 02° 34′ E. Depth 66 ft. Range of tide 6.0 ft. Current 2–3 knots. Bottom is sand, mud and shells.
Radio: ETA Instructions: Advise Seme Offshore Terminal and Agent 7 days, 72 hours, 48 hours, 24 hours and 12 hours prior to arrival of the following: ETA, quantity of cargo required, arrival draft and size of manifold fittings.
VHF: Channels 16 and 6.
Restrictions: Mooring and unmooring during daylight hours only (0700 hrs.–1500 hrs.)
Pilot: The Pilot boarding position is agreed prior to arrival.
Readiness: Notice of Readiness only received between 0600 hrs. and 1400 hrs.
Tugs: 2 × 2,650 h.p.
Documents/Clearance: See "Cotonou".
Production Platforms:

No. 1	06° 14′ 23″ N.,	02° 41′ 16″ E.
No. 2	06° 12′ 19″ N.,	02° 41′ 35″ E.
No. 3	06° 15′ 29″ N.,	02° 42′ 05″ E.

Berth: Depth in approaches and at berth 60 ft.
The berth is a conventional mooring buoy (CMB). Max. draft permissible 46 ft. Max. d.w.t. 60,000–80,000 tons. Larger tankers up to 120,000 d.w.t. can be berthed to load part cargo if Seme is first port of call (Max. displacement 75,000 tons).
The vessel berths on a heading of 253° to 4 mooring buoys. The use of wire ropes is not allowed. Synthetic hawsers are provided by the terminal. Vessel's hose boom to be rigged for 4 tons SWL minimum.
Loading: Seme Crude (API 23.0) is loaded through a single 12 in. hose which is connected to an undersea pipeline of 16 in. diameter and 5 miles long. Loading rate 11,500 barrels per hour.
Ballast: No facilities for dirty ballast.
Services: None available.

AUTHORITY: Seme Oil Terminal. *Telex:* 5173, 5174 Semoil Ctnou.

NOTES

Please also advise Shipping Guides Ltd.

Bermuda

HAMILTON, (incl. Freeport): 32.17 N. 64.47 W.

(See Plan)

NAVIGATIONAL WARNINGS: (Circulated by the Department of Marine & Ports Services)

Government Notice No. 196 (27.4.79)

The attention of all mariners is drawn to the dangers and hazards of close approach to the reefs which surround Bermuda, especially to the North and West of the Islands. They extend in places to a distance of 12 miles from the visible land and are virtually unmarked by navigational aids at their extremities.

Ships on passage with no intention of calling at Bermuda are advised to give the Islands a berth of at least 30 miles, observing that little distance is lost on the passage by so doing and nothing is gained by a closer approach. On the contrary, stranding or shipwreck has occurred all too often through the years with pollution of the surrounding reefs and beaches and destruction of the ecological life as well as possible ruin of the economy of the Islands.

Ships making for Bermuda are advised to do so from the East and South as the only entrance to the sheltered waters is at the S.E. of the Islands off St. George's. Here Pilots are available and can be embarked in daylight hours. Entry at night is dangerous and prohibited and close approach in dark hours should not be attempted without local knowledge.

Government Notice No. 197 (27.4.79)

Ships approaching Bermuda should contact the Bermuda Harbour Radio which is manned day and night on Channel 16 (VHF) or 2182 kHz or 500 kHz W/T giving vessel's name, call sign and position. Only after clearance has been given and instructions issued should ships – in daylight only – approach within 3 miles of St. David's Head on a heading between 240° and 300°. On no account should any other approach be made without local knowledge and large scale charts.

Pilots are available in this area for those who require them and are compulsory for all commercial vessels making entry to these Islands.

Notice to Boatmen. Admiralty Notices to Mariners:

1114. North Atlantic – Bermuda Islands – Caution (15.6.79).

5. Mariners are advised to navigate with extreme care in the approaches to Bermuda Islands, owing to the existence of extensive reefs which encircle the Islands and which are a constant hazard to navigation. North Rock Lt. (32° 28.5′ N., 64° 46′ W. approx.) and then outer seabuoys may not be reliable through lack of maintenance due to inaccessibility, except in very calm weather.

NOTICES: Implementation of IMO-adopted Area to be Avoided.

(1) Mariners are advised that at 0001 hrs. GMT on 1st December, 1985 an Area to be Avoided (ATBA) will be established covering the offshore reefs on the Northern coasts of Bermuda.

(2) The limit of a Restricted Area is to be:

(a) Gibbs Hill Light (Lat. 32° 15.1′ N., Long. 64° 50.0′ W. approx.).
(b) Lat. 32° 08.00′ N., Long. 64° 53.00′ W.
(c) Lat. 32° 12.00′ N., Long. 65° 10.00′ W.
(d) Lat. 32° 24.00′ N., Long. 65° 10.00′ W.
(e) Lat. 32° 39.00′ N., Long. 64° 53.00′ W.
(f) Lat. 32° 39.00′ N., Long. 64° 38.00′ W.
(g) Lat. 32° 32.00′ N., Long. 64° 29.00′ W.
(h) St. Davids Light (Lat. 32° 21.8′ N., Long. 64° 39.0′ W. approx.).

Bermuda Department of Marine and Port Services.

DOCUMENTS:

Ship's Register.
Derat Certificate.
Clearance from Previous Port.
5 Crew Lists.
5 Passenger Lists.
2 Provision Lists.
2 Crew Personal Effects Lists, i.e. cameras, binoculars, cigarettes, etc.
6 copies Cargo Manifest if discharging.

Cruise Ships: Customs require:

(Note: Forms may be secured in advance for prospective vessels.)

*5 Crew Lists
1 Crew Declaration
*5 Lists of All Disembarking Passengers
*5 Lists of All Transit Passengers
*5 Lists of All Non-United States Citizens in Transit (on ships from and returning to the United States)
1 Stores List
1 Declaration of Health
Clearance from Vessel's Last Port of Call
1 Bermuda Vessel Report (Customs No. 49).

(**Note:* Plus 1 of each of these forms for Agents)

N.B.

1. A facility for examining disembarking passengers and luggage must be provided. No passenger or luggage is to be allowed to board the tender without Custom's approval.

2. All documentation for passengers on vessels from, and returning to, the United States who are not U.S. Citizens must be seen by the Customs Official.

3. All disembarking passengers and luggage must be seen by the Customs Official.

4. Persons purchasing a ticket in Bermuda must complete an Immigration Embarkation Card which should be lodged with the Purser on embarkation. Similarly persons arriving by air and leaving by sea must lodge their duplicate immigration cards with the Purser on embarkation. It is required that the Purser pass all such cards to the Duty Customs Official prior to the vessel's departure.

PILOTAGE: Pilot ordered by Agent on receipt of vessel's ETA (72, 48 and 24 hrs.). Pilot boards vessel approximately 2 miles East of Island with St. David's Lighthouse bearing 240° True. Boats black hull with orange or white superstructure with "Pilots" or "Pilot Rescue" on side.

If vessel's ETA alters, Bermuda Harbour Radio which in direct contact with Pilot station can be contacted by VHF Channels 10, 12, 16, 26. Pilotage is confined to daylight hours only with exception of vessels calling for medical aid – some of which handled off-shore.

ANCHORAGES: Grassy Bay and Great Sound. These anchorages are used mainly by passenger liners as they are close to Hamilton Harbour and are protected from heavy weather. Also used by large vessels carrying out extensive repairs.

RESTRICTIONS: Restricted by draft of 26 ft. and length 700 ft. Daylight piloting only.

MAX. SIZE: Largest ship to enter to date, length 703 ft., draft 26.5 ft.

HEALTH: Pratique granted on 24-hour basis and can be obtained by wireless by sending message via VRT to "Health Bermuda" requesting Free Pratique be granted. If any suspected disease or fever on board advise "Health" as well as Agent.

RADIO: Bermuda Harbour Radio, controls channel traffic, call sign ZBM Bermuda.

VHF: Operated by Bermuda Harbour Radio. Contact on Channels 10, 12, 16, and 26.

Bermuda (VRT) on Channels 16, 26 and 28.

VTM system in operation.

TUGS: 3 tugs available, 1×1,200 i.h.p. and 2×3,200 i.h.p. Tugs normally join vessel in harbour if requested. Tugs ordered depending on the size of the vessel and weather conditions. Tug's lines used during normal tug operations.

BERTHING: Docks and tugs are agreed upon between Agent and Pilot prior ship's arrival.

Hamilton

Berth	*Length of Berth*	*Max. Draft*	*Remarks*
No. 1	510 ft.	26 ft.	Port layout allows ships in excess of 510 ft. in length to be accommodated. Primarily a passenger berth.
Nos. 5 and 6	620 ft.	26 ft.	Primarily a passenger berth.
No. 7	650 ft.	26 ft.	A small Ro/Ro ramp is provided at Berth No. 7 West.
No. 8	450 ft.	23 ft.	Berth Nos. 7 and 8 provide facilities for container operations, with approx. 5.5 acres of open area.
No. 8 East	250 ft.	16 ft.	Primarily a lay-by berth.

Drafts are governed by depth of water in channel approaches to the Harbour, i.e. 26 ft. MLW.

Freeport (West End Development Corporation) 32° 19′ N., 64° 50′ W.

Commercial (South Basin)	800 ft.	32 ft.	Bulk cement and Shell Company of Bermuda bunkering facilities. Max. length of vessel 600 ft.
King's Wharf (North Basin)	1,000 ft.	34 ft.	Passenger ship berth for winds below 20 knots. Bearing surface 500 ft., consisting of 2 dolphins 500 ft. apart with central dock 300 ft. long. Vessels berthing must drop anchor about 600 ft. from dock to facilitate vacating the berth. One or two tugs mandatory for berthing/unberthing, depending on size of vessel and weather conditions. Usually port side berthing.
Murray's Anchorage		36 ft.	
The Great Sound		34 ft.	
Five Fathom Hole		Unlimited	

CRANES: 1 × 225 ton Amhoist 9310, 1 × 165 ton P & H C-165.

STEVEDORES: Ordered by Agent after receipt of ETA. Average discharge general cargo 10 t.p.h.

Gangs and Priorities: Basically Bermuda operates with a maximum of 3 gangs although this can reduce when breakbulk or refrigerated cargo are being handled, or for the tying-up and letting-go of cruise ships. Gang Allocation Rules (BSA No. 97 15-3-79) are:

1. The first vessel to arrive to have all available gangs.

2. The second vessel to arrive to have 1 gang on arrival.

3. The third vessel to arrive will get labour from 1 or 2 when it becomes available.

4. When it is necessary for full utilisation of labour, all vessels must work maximum overtime in order to retain gangs.

Hours of Work (Longshoremen):

Straight time	Monday/Friday	0800 – 1200 hrs. 1300 – 1700 hrs.
Double time	Monday/Friday	1800 – 2200 hrs.
	Saturday	0800 – 1600 hrs.
	Sunday and Public Holidays	0800 – 2200 hrs.
	Meal hours	0700 – 0800, 1200 – 1300, 1700 – 1800 hrs.

Note: Normally the port stops Sunday/Friday inclusive at 2200 hrs. Should work proceed past 2200 hrs. it would be at double time. If required by the Union, a half hour meal break could be taken between 0400 hrs. and 0430 hrs.

Work stops at 1600 hrs. on Saturday until 0800 hrs. on Sunday, unless vessel is being worked through to a finish for sailing that night or early the next day.

Good Friday and Christmas Day are not worked on the Bermuda waterfront.

MEDICAL: No advance notice required for medical attention if other than critical cases. First-class hospital facilities available. Vaccination Certificates required for all seamen.

TANKERS: Shell bunkering berth, Freeport, Ireland Island. Discharge lines 8 in. and 10 in. No slop discharge facilities.

DENSITY: 1025.

FRESH WATER: Available alongside at Berths Nos. 6-7, by truck (capacity 4 tons), or by barge. Order prior arrival to avoid delay.

FUEL: Grades available from Shell or Esso: Bunker "C" fuel oil, viscosity 100 SSF at 122°F. Diesel oil. Viscosity 3616 at 100°F.

CONSULS:

Belgium
Bolivia
Chile
Denmark
Finland
France
Germany
Greece
Italy
Netherlands
Norway
Portugal
Sweden
United States

REPAIRS: All types minor deck and engine repairs can be carried out. Also major temporary repairs. Electronic repairs possible.

DRY DOCKS: Only yacht slipways available.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

TOBACCO/WINE ALLOWANCE: Customs allows about 1 carton cigarettes and limited amount of spirits per man.

REPATRIATION: First-class facilities available for repatriation and crew changes.

AIRPORT: Distance from airport 10 miles. Connections to all parts of world. Average 15/20 flights per day.

TIME: Local time GMT minus 4 hours (October-April). GMT minus 3 hours (0200 hrs., last Sunday in April – 0200 hrs. last Sunday in October).

HOLIDAYS: New Year's Day; Good Friday; Bermuda Day (May 24th); Queen's Birthday (celebrated annually in June) June 17th in 1991; Cup Match (Thursday and Friday before first Monday in August); Labour Day (1st Monday in September); Remembrance Day (November 11th); Public Holiday (November 12th); Christmas Day, Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: 911. Air Sea Rescue 2971010.

TELEPHONES: Can be placed on board vessel when alongside.

IDENTIFICATION CARDS: Required by all crew going ashore.

GARBAGE DISPOSAL: Hunt's Sanitation Services. Tel: 236-7477. Fax: 236-9472.

David A. Atcheson Ltd. Tel: 238-8972

Skips are provided. Pick-up by arrangement, about twice a day, at a time of mutual convenience.

WASTE OIL DISPOSAL: Hunt's Sanitation Services – see above.

By tanker truck to regular berth, capacity about 2,500 imperial gallons.

SEAMAN'S CLUBS: Bermuda Sailor's Home, Richmond Road, Hamilton. Tel: 295-5598. Facilities: Restaurant, bar, accommodation, library, games, sports arranged.

CURRENCY: Bermuda Dollar, equivalent to U.S. dollar.

No currency restrictions for non-residents.

GENERAL: Port of Freeport, Ireland Island, situated in the Port of Hamilton at the old British Dockyard is used mainly by the Royal Navy, Shell Bunkering and cruise ships in Summer.

SHIPMASTER'S REPORT: Update 1994.

Pilotage: There are 10 Pilots who operate on a rotation basis. Least depth is in the Dundonald Channel and Two Rocks Passage approaching Hamilton. Passenger Vessels over 26 ft. anchor in Grassy Bay just North of the Dundonald Channel. Official max. draft is 26 ft.

Berthing: Vessel berths starboard side to with tug assistance. During a long stay vessels often have to shift up and down the wharf to make room for other ships making short calls. At one time the bow was overhanging the end of the quay by 100 ft. but even in this position ship can be well secured.

Cargo Operations: Two container gangs can be worked at all times. At weekends additional men are available from other areas within the stevedoring firm and a third gang can be made up.

Fresh Water: Not readily available in large quantities due to a water shortage. Price when available is $15.0 a ton. We managed without buying any in spite of a prolonged stay.

Stores: Very expensive and would suggest only plan on buying essentials from supermarket in small quantities.

Discharge Averages:

Rolls of newsprint	22.07 tons per hour
Vehicles and parts (Ro-Ro)	44.37 " " "
Breakbulk	30.72 " " "
Breakbulk items off container vessel	27.58 " " "
Containers	19.19 T.E.U. "

AUTHORITY: Department of Marine & Ports Services, P.O. Box HM180, Hamilton HM AX, Bermuda. *Tel:* (441) 295-6575. *FAX:* (441) 295-3718. *Contact:* R.D. Ross, Director. M. Dolding, Assistant Director/Harbour Master.

AGENT: Meyer Agencies Ltd., 35 Church Street, P.O.Box HM 510, Hamilton HMCX, Bermuda. Tel: 441-295-4176 (After hours 441-297-0664). Telex: 3361 Meyer BA. Fax: 441-295-4556. Cables: Meyerco Bermuda.

Shipping, Freight, Insurance, Travel Agents. Marine repairs, Tug/Barge Operators, stevedoring Operators, P and I Reps.

ST. GEORGE'S: 32.22 N. 64.41 W. (See Plan)

NAVIGATION WARNINGS: See "Hamilton".

NOTICES: See "Hamilton".

DOCUMENTS: See "Hamilton".

PILOTAGE: See "Hamilton".

ANCHORAGES: *(a)* Five Fathom Hole, located at Eastern end of Island and is point where Pilots embark/disembark. Used by vessels not required to enter or those awaiting daylight. *(b)* Murray's Anchorage, used instead of Five Fathom Hole during times of heavy weather (daylight hours only). Also, by vessels unable enter St. George's Harbour and wishing to take on water, carry out repairs, etc. A stand-by anchorage for vessels waiting berth at Esso Oil bunkering pier and for vessels leaving this pier and awaiting daylight. *(c)* St. George's Harbour, when weather conditions such that Five Fathom Hole and Murray's Anchorage unsuitable to land ill/injured persons vessel proceeds directly to St. George's Harbour and anchors for short stays only, subject to size.

RESTRICTIONS: Entry to St. George's Harbour restricted waterline length of approximately 600 ft. and by draft of 28 ft. at H.W. Murray's Anchorage restricted by draft of 38 ft. H.W.

MAX. SIZE: Largest ship to enter to date – length 704 ft. However, size controlled by max. draft of 28 ft., displacement and weather conditions.

HEALTH: Pratique granted on 24 hour basis and can be obtained by wireless by sending message via VRT to "Health Bermuda" requesting Free Pratique be granted. If any suspected disease or fever on board advise Health as well as Agent.

RADIO: Commercial radio station operated by Cable & Wireless Limited, call letters VRT Bermuda, on VHF 16, 26 and 28. Pilots and Bermuda Harbour Radio control Channel traffic, call sign ZBM Bermuda (VHF Channels 16 and 12).

VHF: Operated by Bermuda Harbour Radio. Contact on Channels 10, 12, 16, and 26.

VTS: System installed at the signal station at Fort St. George.

TUGS: 3 tugs available, 1×1,200 h.p. and 2×3,200 h.p. Tugs normally join vessel in harbour if requested. Tugs not compulsory (except for cruise ships) and ordered depending on the size of the vessel and weather conditions. Tug's lines used during normal tug operations.

BERTHING: Dock and tugs agreed upon between Agent and Harbour Master prior ship's arrival.

St. George's as a Port of Discharge: Stevedores advised the 51st meeting (1974) of The Bermuda Shipping Association that as St. George's is no longer being used for cargo, all gear and equipment have been removed from the port. In the event of discharge taking place at St. George's there will be an 'item of cost' for transport of gear and equipment from Hamilton to St. George's. Similarly an 'item of cost' is applicable to discharge at Freeport (Dockyard).

Berth	*Length*	*Max. draft*	*Remarks*
Penno's Wharf	750 ft.	28 ft.	Cruise ship (New cruise ship terminal completed 1991) or cargo-handling berth. Large area on Western end for bulk cargo discharge.
Hunter's Wharf	335 ft.	28 ft.	Concrete jetty with steps for small boat berthing. Large vessels berthed at Pennos Wharf overhang up to 250 ft. over Hunter's Wharf in depths up to 30 ft.
Ordnance Island	160 ft.	26 ft.	No cargo-handling facilities. New cruise ship terminal completed May 1994, capable of berthing 650 ft. cruise ships.

STEVEDORES: Ordered by Agent after receipt of ETA. Average discharge general cargo 10 t.p.h.

Also see "Hamilton".

MEDICAL: No advance notice required for medical attention if other than critical cases. First-class hospital facilities available. Vaccination certificates required for all seamen.

TANKERS: Esso Oil Pier: Two dolphins, centre platform and walkways. Vessels up to 700 ft. in length and 38,000 d.w.t. can be accommodated. Discharge lines 8 in. and 10 in. No slop discharge facilities.

Berthing: The berth was rebuilt in 1980 about 40 ft. further out (the old pier debris was left in place). Ships are moored to 4 buoys, forward and aft centreline and offshore on the beam also to bollards on the shoreline and on the 2 breasting dolphins. Ships normally approach from the North with 2 tugs alongside forward and aft. The anchor may be dropped and 3 – 4 lengths of chain run out. A launch will take the mooring ropes, usually to the forward buoy first, to the aft buoy and then to the breasting dolphins. When the ship is in position, all other moorings are sent out; those to the shoreline last. The minimum number of ropes is: 2 to each of the offshore buoys, 1 to the fore and aft buoys and to 4 bollards ashore, 2 or 4 spring lines to the dolphins. Length of breasting lines must be minimum 750 ft. long to reach shore.

Caution: The ropes to the buoys must be kept taut at all times; particular care must be paid to these moorings during the hurricane and Winter seasons. Occasionally ships may be berthed heading N.E. In strong winds from S.W. to N.E. vessel will not be berthed, nor be permitted to remain alongside if wind shifts onto the dock.

Cargo: Two or more 8 in. hoses are used for the discharge of cargo. The ship's cargo boom may be used to connect or support the hose. Maximum pressure on the hose 100/120 p.s.i.g. There are several cargo lines. Tankers carrying more than one grade to St. George should arrange the cargo to permit discharging two or more grades simultaneously. Hand radios are used during the cargo operations.

Requirements for Vessels Using the Esso Oil Terminal:

1. Tankers and Large Vessels for Bunkers:
   (a) It is an Oil Terminal requirement that a Pilot remains on board at all times while alongside the Terminal.
   (b) It is a Terminal requirement that all vessels on completion of either discharging or bunkering/ballasting leave the berth and proceed either to sea, or wait daylight.
   (c) One tug is mandatory for berthing and unberthing and a second tug depending upon weather and other conditions decided by the Master and Pilot, and the Agent will be informed accordingly.
   (d) Tug requirements for unberthing outside normal working hours must be discussed well in advance between Master and Pilot (and Agent informed) as it may take up to 4 hours before the second tug is available at the Terminal. Weather conditions, especially at weekends during the winter months, must be assessed and if any likelihood of strong Northerly winds, precaution should be taken of ordering a tug(s) or if necessary have a tug standing-by in readiness.
   (e) Max. draft alongside not to exceed 34 ft. (10.3 m.) and/or length 700 ft., 38,000 d.w.t. unless under exceptional circumstances and permission authorised by Esso Management.
2. Liquid Gas Carriers and Smaller Vessels for Bunkers:
   (a) It is mandatory to have a tug for berthing liquid gas carriers but depending upon conditions prevailing at the time, the Master and Pilot will decide whether or not a tug is advisable for unberthing.
3. General:
   The over-riding factor must be for the safety of the ship at all times and the Pilot with his local knowledge and skill will advise the Master (who probably is unfamiliar with Bermuda waters) as to the advisability of the necessary assistance required.
   Pilot detention will be paid at an hourly rate from the time the vessel is secured alongside as this is not in his normal line of duty. He is retained at the request of the Terminal as a precautionary measure should the ship have to be moved at short notice.

DENSITY: 1025.

FRESH WATER: Available. Order prior arrival to avoid delay.

FUEL: Grades available: Bunker "C" fuel oil, viscosity 122 SSF at 122°F. Diesel oil, viscosity 3616 at 100°F.

CONSULS: See "Hamilton".

REPAIRS: All types minor deck and engine repairs can be carried out. Also major temporary repairs.

DRY DOCKS: Only yacht slipways available.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually carried out by the stevedores.

TOBACCO/WINE ALLOWANCE: Customs allow about one carton cigarettes and limited amount spirits per man.

REPATRIATION: First-class facilities available for repatriation and crew changes.

AIRPORT: Distance from airport 2 miles. Connections to all parts of world. Average of 15/20 flights per day.

TIME: See "Hamilton".

HOLIDAYS: See "Hamilton".

POLICE/AMBULANCE/FIRE: Police 911; Ambulance 911; Fire 911; Air Sea Rescue 297-1010.

TELEPHONES: Can be placed on board vessels when alongside.

IDENTIFICATION CARDS: Required by all crew members going ashore.

GENERAL: Esso Oil Berth, within Port of St. George, is purely a bunkering and petroleum discharge pier situated on the Southern side of Murray's Anchorage.

AUTHORITY: Department of Marine and Ports Services, P.O. Box HM 180, Hamilton HM AX, Bermuda. *Tel:* (441) 295-6575. *FAX:* (441) 295-3718. *Contact:* Michael Dolding, Harbour Master/Deputy Port Director.

AGENT: Meyer Agencies Ltd., Water Street, P.O.Box GE 48, St. George's, Bermuda. Tel: 441-297-1616 (After hours 441-297-0664). Telex: 3361 Meyer BA. Fax: 441-297-1428

Shipping, Freight, Insurance, Travel Agents. Marine repairs, Tug/Barge Operators, Stevedoring Operators, P and I Reps.

NOTES

Please also advise Shipping Guides Ltd.

Bolivia

GENERAL: Bolivia is completely land locked with no ocean ports.

The country has special port facilities or 'in transit zones' in Brazil at Santos; in Argentina at Buenos Aires and Rosario, and to the Pacific at Matarani in Peru, also Arica and Antofagusta in Chile.

Santos (Brazil): The railway is from Santos to Santa Cruz (Bolivia) via the Bolivian border town of Corumba, a total distance of 1,300 miles. The port has a shed for Bolivian and Paraguayan imports and exports.

Buenos Aires and Rosario (Argentina): At the port of Rosario, a quay of 820 m., with land and sheds, has been made available for the discharge, loading, reception, dispatch and storage of Bolivian imports and exports. A railway runs from Rosario to La Paz via the Bolivian frontier town of Villazon, and another line past Salta to Santa Cruz via Yacuiba on the boundary, distances of 1,300 miles and 1,500 miles respectively. Buenos Aires has no 'free zone' for Bolivian cargoes.

Matarani (Peru): The port has facilities for handling Bolivian imports and exports. There are storage sheds for general cargo, a mobile loading tower for ores and concentrates, and a mobile pneumatic tower for discharging bulk grain. Containers can be landed and sent through to Bolivia or stripped and the goods stuffed into local containers (railway owned, if possible) for transport to Bolivia. A railway unites the port with Puno on Lake Titicaca, where a steamer transports cargo to Guaqui and then by rail or road to La Paz (525 miles) or other Bolivian towns.

There is also an unpaved road direct to La Paz and to other Bolivian cities, that is a useful alternative to the railway, but, as with the road from Arica, it is often in bad condition during the rainy period, December to April. A road from Ilo to the Bolivian frontier town of Desaguadero has been completed.

Arica (Chile): The railway is the shortest route (283 miles) from a seaport through to La Paz. There is also a road, on which trucks take about 48 hours to transit between Arica and La Paz, but during the rainy season, December to April, the condition of this unpaved road so deteriorates that road transport can be delayed for up to 12 days.

The port has a warehouse for Bolivian cargo and facilities for handling containers and dispatching them in bond by rail or road to Bolivia.

Antofagasta (Chile): The railways transports the greatest tonnage of Bolivian imports (mostly bulk grain) and exports (minerals – ingots, ores and concentrates).

It links Antofagasta with La Paz via Oruro and is 729 miles long. There are branches to Cochabamba, and Potosi and Sucre.

DOCUMENTS: In each port there are Bolivian Customs Authorities under the control of the Bolivian Consul. At none of the 'in-transit ports' are any special Consular despatches or documents needed by vessels, other than those required by the particular country. It is only necessary to present separate manifests for cargo in transit to Bolivia.

However commercial invoices, and goods documentation does require consular intervention.

Shippers must provide Bills of Lading and Consular Invoices and also attach suppliers invoices, certificates of origin and insurance policy. Most imports are handled under letters of credit. Documents must be made out in Spanish. At Ocean Port, forwarding Agents replace the Bill of Lading with a railway bill or trucking bill. There is no exchange control or shortage of foreign exchange in Bolivia.

Claims are finally set up (shortages, condition, etc.) in Bolivia, and hook tallies, local port receipt to Bolivian Customs, railway or truck receipts, etc., all form part of the settlement.

CONTAINERS: It is possible to despatch sealed containers right through to Customs in Bolivia for opening there.

WEIGHTS AND MEASURES: All weights and measures are to be expressed in the metric system, except for lumber, in board feet.

NOTES

Brazil

GENERAL (See Plan)

SHIP REPORTING SYSTEM:

Information System of Maritime Traffic Control (SISCONTRAM)

Description:

A voluntary reporting system operated by the Naval Command for the Control of Maritime Traffic (COMCONTRAM). The limits of the search and rescue (SAR) area covered by the system are:

(a) 04° 31′ N., 50° 59′ W. Brazil – Guyane border.
(b) 05° 00′ N., 48° 00′ W.
(c) 05° 00′ N., 40° 00′ W.
(d) 07° 40′ N., 35° 00′ W.
(e) 06° 22′ S., 16° 00′ W.
(f) 06° 22′ S., 10° 00′ W.
(g) 34° 00′ S., 10° 00′ W.
(h) 34° 00′ S., 53° 00′ W. Brazil – Uruguay border.

In addition vessels are requested to participate in the scheme within the larger area of the Atlantic Ocean, South of 23° 30′ N.

Requirement for messages.

DEPARTURE MESSAGE (Type 1). This contains the vessel's Sailing Plan and should be sent:

(a) On sailing from a port within the area.
(b) Prior to entering the reporting area.

ALTERATION OF ROUTE MESSAGE (Type 2). This should be sent whenever the ship has to modify the route or change the destination given in the Departure Message.

POSITION MESSAGE (Type 3). This should be sent:

(a) When the vessel is more than 25 miles off the planned route.
(b) On a change in the navigational status of the vessel, e.g. stopped or damaged.
(c) When the vessel observes a danger to navigation.

ARRIVAL MESSAGE (Type 4). This should be sent:

(a) When the last point on the pre-established route close to the port of arrival is reached.
(b) When leaving the reporting area.

Form of messages.

Each message consists of a selection of items from the format list shown below. Message items should be separated by a stroke (/), omitted items by a dash between two strokes (/–/) and the end of the message by a double stroke (//).

A. Vessel's call sign (4-8 characters).
B. Vessel's nationality (2 character abbreviation of name).
C. Vessel's name (up to 18 characters).
D. Type of vessel. (CGO – general cargo, container, Ro/Ro; BLK – bulk carrier; PAS – passenger; TKR – tankers in general; TUG – tug; FSH – fishing.
E. Message type (e.g. "3" indicates Position Message).
F. Port of origin/departure (up to 18 characters).
G. ETD in GMT (6 digits with suffix Z – represents time of departure from a port, time of entry into the area or time of position).
H. ARRIVAL PORT (up to 18 characters).
I. ETA in GMT (format as for G – represents time at last route point close to destination or time on leaving the area).
J. SPEED (4 digits, knots and tenths of knots, e.g. 15.5 – this is estimated speed over pre-established route or new estimated speed if route has changed).
L. POSITION[1] (for message types 1 and 2 a minimum of 2 and maximum of 16 latitude and longitude groups, representing course change points, can be sent; each group should be separated by "/". Type 3 messages require a single latitude and longitude group).
M. COURSE CHANGE POINT NUMBER (2 digits representing the last pre-established course change point passed).
N. DATE/TIME (format as in G – time of transmission).
O. DOCTOR ONBOARD (Y for yes, N for no).
P. OTHER INFORMATION (Use codes from the International Code of Signals to provide additional information about the incident which caused the Position Message to be sent – maximum of 18 characters).

[1] Latitude (4 digits) in degrees and minutes N or S, e.g. 2125S; longitude (5 digits) in degrees and minutes E or W, e.g. 05125W.

DEPARTURE MESSAGE (Type 1) consists of items A/B/C/D/E/F/G/H/I/J/O/L/N//

ALTERATION OF ROUTE MESSAGE (Type 2) consists of items A/B/C/D/E/G/H/I/J/L/N//

POSITION MESSAGE (Type 3) consists of items A/B/C/D/E/L/G/M/I/J/P/N//

ARRIVAL MESSAGE (Type 4) consists of items A/B/C/D/E/H/I/N//

Transmission of messages.

Reports addressed to COMCONTRAMAR are free of charge and can be sent through one of the following Brazilian coast radio stations: Belem (PPL), Olinda (PPO), Rio (PPR), Juncao (PPJ). Alternatively, reports addressed COMCONTRAM RIO can be sent by radiotelex No. 2153158, 2153159 or 2153181 MMAR BR. Reports sent in this way are chargeable.

DOCUMENTS:

Required prior to arrival:

Notice of arrival:

At least 24 hours prior to the anticipated arrival of the vessel, the following must be notified: the Captain of the Port, the Federal Maritime and Air Police, and Maritime Health. Likewise, the Cooperative of Health Inspector of Bahia (VHF radiotelegraph station, Channels 12 and 18) must be notified either directly or through the agency. (The Bahia Cooperative is a private institution, controlled by the Office of the Captain of the Port.) .

Information on cargo for the port:

The agency should receive by airmail, at least 24 hours in advance of the anticipated arrival of the vessel, the following documents for distribution as indicated.

Documents	*Port Authority*	*Customs*	*Agency*	*Total*
Cargo Manifest	1	1	2	4
Manifest of Dangerous Cargo	1	1	2	4
Freighted Bills of Lading	–	1	2	3
Stowage Plan	1	–	1	2

All manifests not in the Portuguese language must be translated into Portuguese and put on a special form, (copia de traducao de manifesto de carga) copy of translated cargo manifest.

Request for port services:

At least 24 hours prior to arrival, the Brazilian Port Authority, Empresa de Portos do Brasil, S.A. (PORTOBRAS), must receive their berthing request, to obtain port services.

Additional requirements:

All communications with the above mentioned Authority must be made through a shipping broker. The Port Agent handles all cargo operations. The shipping broker may also be the Port Agent.

On arrival:

Type of Document	*Number and distribution of documents*					
Basic forms	*Port Captain(a)*	*Customs*	*Maritime Police*	*National Health*	*Agency*	*Total*
1. General Declaration(b)	1	1	1	–	1	4
2. Cargo Manifest(c)	–	1	–	–	1	2
3. Crew List	1	3	3	1	2(d)	10
4. Passenger List	1	3	3	2	2(d)	11
5. Ship's Store List	–	3(a)	1(f)	–	1	5
6. Crew Effects Declaration	–	3	–	–	–	3
7. Maritime Declaration of Health	–	–	–	1(g)	–	1
8. Mail List	–	–	–	–	1(h)	1
9. Health Pratique Book from preceding Brazilian Port	–	–	–	1	–	1
10. Entrance Declaration	1	–	–	–	–	1
11. Certificate of Customs Inspection	–	1	–	–	–	1
12. No-cargo Manifest	–	1	–	–	1	2
13. No Passenger Declaration	1	1	2	1	2(d)	8
14. List of Passengers in transit	1	–	1	1	–	3
15. Bills of Lading	–	1	–	–	1	2
16. Declaration of On-deck Cargo	1	–	–	–	–	1
17. In-ballast Declaration	1	–	–	–	–	1

(a) These documents are delivered to the Office of the Captain of the Port, where their contents are recorded. They are then sealed and returned for the vessel's departure operation.

(b) In addition to the special Entrance Declaration for the Office of the Captain of the Port, and the Certification of Customs inspection.

(c) The Manifest should include the number and contents of the containers, as well as an indication of unfreighted containers.

(d) One copy for the exit gate of the harbour.

(e) In the event that the next port of call should be Brazilian, an additional copy must be submitted, which is stamped by Customs.

(f) If the drugs are not included on the Ship's Store List, a list of medicinal drugs (narcotics) must be presented to the Maritime Police.

(g) Only for the first Brazilian port of call. There is a special form in the Portuguese language, but the LAFTA/OAS form will be accepted.

(h) For delivery to the Postal Authority.

Other requirements:

The landing card requirement provision is still current, but it is not always requested. The agency delivers blank forms. The cards are filled out on board, and a photograph of the passenger or crew member must be affixed. The cards must be presented to the Maritime Police within 48 hours after the arrival of the vessel, but in the meantime all interested persons may land. The cards must be returned to the Police before the vessel's departure.

Crew members' Documents: Certain Brazilian ports authorities have been levying fines at an increasing rate, against vessels in cases where crew members' documents have been incomplete or improperly prepared. In order to avoid such fines, the following guidelines should be adhered to:

(1) All crew members should possess a valid Seaman's Book.

(2) Crew members without a Seaman's Book must have a statement in their passport, mentioning 'Seaman' as profession, preferably with the vessel's name and the crew member's rank.

(3) If the above requirements are not satisfied, the crew member should be listed on a Passenger List, but still bear a valid passport and valid visa, plus vaccination certificates.

(4) Supernumeraries are not accepted on Crew Lists. Any relatives of crew members should be stated on a valid Passenger List, also bearing a valid passport with required visa and vaccination certificate.

Prior to Departure:

At least 24 hours prior to sailing, to avoid possible delays, the following documents must be processed:

Customs:

The original of the payment voucher covering the lighthouse and beacon fees, to obtain the clearance permit;

Captain of the Port:

A copy of the above mentioned voucher; Crew List, should there have been any crew changes; List of Passengers Embarked; upon presentation of these, the sailing permit is granted.

Maritime Police:

Passenger List or no-passenger declaration; Crew List, should there have been any crew changes.

Postal Service:

A certificate of mail delivery or a no-mail certificate must be obtained.

In the event that the next port of call is Brazilian, the local authorities check the sailing permit issued by the four agencies mentioned above; if the next port of call is foreign, the sailing permit issued by the Captain of the Port suffices.

Other Provisions:

The agency must, within seven days following the departure of the vessel, deliver a copy of the cargo manifest of freight embarked in the port, and a copy of each bill of lading issued to Customs, PORTOBRAS, and SUNAMAN.

FLAG: The Brazilian flag is a green ground with a yellow lozenge enclosing a blue sphere, with 21 white stars of which 5 form the Southern Cross and the motto 'Ordern & Progresso'.

This must be flown from the foremast when in Brazilian Ports, from 0800 hrs. to sunset daily.

The customs flag – blue with a white star – to be flown 24 hours a day after clearance is granted.

FREE PRATIQUE: Vessels must report ETA via Agent 24 hours in advance, confirming 12 hours prior to arrival. The message must report that sanitary conditions are satisfactory or otherwise and an indication of the number of passengers intending to disembark and/or in transit.

On arrival the Port Health Authority will board, and further to the documents previously mentioned will require to sight vaccination certificates.

The reception committee will only board by accommodation ladder, or gangway if the vessel is alongside, and must be met at the head of the ladder by a Ship's Officer.

PILOTAGE: This is compulsory for all vessels over 200 g.r.t. There are specific boarding points shown on the charts for each port and vessels must wait there, flying flag G, either at anchor or under way. A safe rope ladder must be provided and must be properly illuminated. Pilots should be ordered at least 2 hours prior to arrival by ship's Agent, or in the event of outlying ports 24 or 48 hours ahead (See each port).

VHF: Vessels in coastal regions to maintain watch on Channel 16.

STEVEDORES: Longshoremen are provided by the dock companies and paid for from the Port Charges. Stevedoring can be carried out either by ship's Agents or by contract. In all cases the number of men per gang and their salaries are fixed by Sunaman (Merchant Shipping Superintendency in the Ministry of Transport).

The vessel is legally the employer of the labour, and as a result the vessel is responsible for any damage to the cargo, ship or any third party, by the stevedores.

GENERAL BERTHING INFORMATION:

A berthing priority in Brazilian Ports is given as follows:–

(1) Warships, Brazilian or Foreign.
(2) Regular Passenger Liners for whom immediate berthing facilities are available. if requested at least 24 hours in advance.
(3) Cargo vessels, for whom there are special installations, are given preferential berthing rights.
(4) Vessels with perishable cargoes are given priority berthing.
(5) Vessels that can load and discharge simultaneously can obtain preference over others.

As soon as cargo operations finish, all vessels must leave their berth, or be removed by the Port Authority.

FUEL: A monopoly on supply is held by PETROBRAS, and owners requirements must be made well in advance to the Petrobras offices in New York, London or Rio de Janeiro. Supplies are not plentiful, and in certain ports only certain grades are available.

WATCHMEN: Services of watchmen compulsory.

PIRACY: Acts of piracy have taken place at Rio de Janeiro and Santos in recent times, with loss of life of crew members.

POLLUTION: Very strict penalties are enforced, and fines are the same, however little pollution is caused. No dumping of any oil is permitted within 50 miles of the coast.

Garbage: It is forbidden to dump any garbage in any harbour or river. In some ports garbage collection can be arranged.

CREW: Crew members wishing to join a vessel, must carry a Letter of Instruction for the ship's Agent. They must be signed on within 48 hours of arrival.

For Crew members joining from abroad it is advisable to be in possession of a two year multiple entry visa, as only U.S. Consulates in Rio de Janeiro, Recife and Brasilia are authorised to issue visas.

Seamen's Missions:

Scandinavian Seaman's Mission
Flying Angel Club
German Seaman's Home

The above Missions are in Santos, and can arrange football matches, tours, etc. There are no Missions in other ports.

GENERAL: Operators and Masters of Liberian flag vessels should consult Agents well in advance respecting requirements for endorsement of Seamen's Books or Passports.

SHIPMASTER'S REPORT: July 1987.

VHF: Arrival Reports: The Port Captain's Department of each port requires the vessel to make reports in a specified form:

1. On entering, in English via Pilots or Port Control.
2. On entering, (normally by Pilot in Portuguese).
3. On leaving (normally by Pilot in Portuguese).

Information to include: Name, Call Sign, Flag, Last Port, where to berth, ETA and the anchorage position (probably in Latitude and Longitude).

Customs: A regulation of 1950 is applied in some ports which requires the declaration of all ship's stores and spare gear. Items such as propeller, tail shaft, anchor, tools, paints, etc., are confiscated and sold at auction after the vessel's departure if they are not declared. It is recommended to contact Agent for the requirements at the port of call.

Pollution: No oil to be discharged within 50 miles of the coast and no garbage within 12 miles of coast. Patrols are made by aircraft. Fines are calculated on a flat rate, multiplied by the g.r.t. of the vessel, whether for 1 litre or 1,000 litres. Imprisonment up to 3 years.

ALUMAR: 02.40 S. 44.21 W. (See Plan)

LOCATION: Alumar Port is located at Sao Marcos Bay, on the West bank of Sao Luis Island, 5.5 miles South of the Port of Itaqui in position 02° 40.5′ S., 44° 21.5′ W.

The port was built in the confluence of the Rio dos Cachorros with the Estreito dos Coqueiros which was dredged to permit access to the Baia de Sao Marcos.

The dredged access channel in the Estreito dos Coqueiros is located between the Islands of Sao Luis and Taua-mirim.

DOCUMENTS:

Documents Required on Arrival:

6 copies Crew List.
3 copies Stores List.
3 copies Crew Personal Effects List.
6 copies Passenger List (or Negative Passenger List).
1 Ballast Declaration.
2 copies of Manifest and 1 copy of each Bill of Lading, if with cargo for Alumar Port.

The following will be inspected:

Crew and Passenger Vaccination Certificates.
Ship's Documents.
Fuel, Diesel, Water quantities on arrival.
Derat or Exemption Certificate.

Cargo Papers:

Master will receive copies of each document listed below:

Notice of Readiness.
Bill of Lading (non-negotiable copy).
Cargo Receipt.
Statement of Facts.
Draft Survey Result.
Cargo Manifest.

Masters shall approve and sign the Notice of Readiness, Bill of Lading, Draft Survey Result, Statement of Facts and Cargo Receipt, as required by the shippers and Agents.

Clearance:

Ship's Agent will furnish clearance papers for sailing as well as the Cargo Manifest.

PILOTAGE: Compulsory for all ships sailing to and from Alumar Port.

They will board and disembark in the Pilots waiting area, abeam of Ilha do Medo, which is also used by the Port of Itaqui.

ANCHORAGE: Masters shall contact the Pilot Station on VHF Channel 16, prior to proceeding to the Anchorage Area.

The waiting area is also used by the Port of Itaqui and is located at Lat. 02° 28.4′ S., Long. 44° 23.5′ W.

The area is a circle around the above coordinates with a minimum depth of 21.5 m.

Brazilian Government Officials may board ships in the anchorage area for clearance formalities.

A suitable and adequate ladder for this purpose must be provided soon after anchoring.

It is extremely important that Masters comply with Brazilian Anti-pollution Laws while in Brazilian waters.

RESTRICTIONS: The Access Channel is located between the Islands of Sao Luis and Taua-mirim. It is 3.0 miles long, with minimum width of 120 m., and dredged to 7.0 m.

The Turning Basin has been dredged to 7.0 m. depth and has a diameter of 400 m.

The Berthing Basin, located in front of the wharf, is 320 m. long, 50 m. wide and dredged to 11.0 m. depth.

Maintenance dredging is periodically carried out to maintain these conditions.

All depths are related to DHN - Brazilian Navy Datum (low sea level).

MAX. SIZE: Max. draft 10.5 m. (berthing only during hightide).

HEALTH: Free Pratique should be requested by radio 72 hours prior to arrival, by forwarding quarantine message to Port Health Authorities through the ship's Agent.

RADIO/VHF: Long distance radio communications shall be made through Embratel Coastal Stations.

Alumar Port Operations may be called through VHF Channel 16 from the vicinity of the waiting area or from other areas when within range.

Arrival Notice: The Master of an arriving vessel is required to cable to the Agent his ETA 15 days in advance or when sailing from previous port if distance is less than 15 days.

Additional ETAs to be sent 5 days, 48 hours and 24 hours prior to arrival at Alumar Port. Any significant change in ETA should be advised immediately.

48 hours message shall provide the following information: ETA, cargo tonnage by hatch number, arrival draft, ballast tonnage on board and deballasting time.

TUGS: Tug service is compulsory for all vessels in Alumar Port. There are 2 tugs of 1,830 h.p. (27 ton bollard pull) permanently based at the port.

BERTHING: The wharf consists of a 252 m. long×19.6 m. wide concrete platform.

There is a mooring dolphin at a distance of 50 m. from the West end of the wharf, and a mooring buoy with a 30 ton sinker, located 110 m. from the same West end of the wharf.

The docking wharf is fitted with 9 sets of fenders, spaced 29 m. apart.

Bulk Cargo Unloader: Clamshell type ship unloader, with 1,200 t.p.h. unloading rate.

Ship's air draft shall not exceed 20.3 m. at any stage of the tide.

Alumina Loader: The linear type shiploader to load alumina, is rated at 1,500 t.p.h. and has a 60 in. wide belt conveyor. Ship's air draft shall not exceed 14.0 m. at any stage of the tide.

Caustic Unloading Facilities: The caustic unloading facilities are located at the West end of the main wharf.

It consists of 1×6 in. fixed coupling system, which is to be fitted to flexible hoses supplied by the ship. The caustic soda shall be pumped by the ship.

BALLAST: There are no shore facilities available at Alumar Port for receiving slops, dirty or contaminated ballast.

Masters are cautioned that discharging of anything other than uncontaminated ballast will be subject to penalties as prescribed by Brazilian law.

FRESH WATER: Potable water is available to ships at Alumar Port. Ships which require potable water shall notify Port Authorities before berthing.

FUEL: Available by barge. Agent requires advance notice.

TIME: GMT minus 3 hours.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No waste oil disposal service available at the port or at Sao Luis City.

SEAMAN'S CLUBS: There are no Seaman's Clubs in Sao Luis, but the city provides good shopping at the shopping centers available, as well as international telephone services, churches, post office, and mini-bus collection can be arranged with the shipping agents.

CURRENCY: Local currency is the Cruzeiro. There are no restrictions placed upon seafarers regarding local currency.

GENERAL: *Weather:* Sao Luis is located within the Intertropical Convergence Zone (I.T.C.Z.) and it is not on the route of Tropical hurricanes and cyclones.

Local temperature ranges between 24°C. and 30°C., and mean humidity from 75% to 85%.

Annual average rainfall is 2,250 mm., distributed in 2 well defined seasons: the rainy season from January to June and the dry season from July to December.

Predominant winds, characterised as trade-winds, come from N.E. and E.N.E.

Annual average wind speed is about 10 knots.

Tides: Special care is required with the tides, which range from −0.3 m. to +7.10 m. during Spring tides.

Tide level variation generates reversible currents all over the area. During Spring tides, approximately 3 hours after the beginning of the ebb or the flood tide, current reaches 5 knots to 6 knots.

Charts: The following Nautical Charts should be consulted for navigation in the Baia de Sao Marcos area:

Diretoria de Hidrografia e Navegacao – DHN – Brazilian Navy:

Chart No.	Title
010	From Cabo Orange to Recife
400	From Cabo Gurupi to Ilha de Santana
411	Baia de Sao Marcos
412	Vicinity of the Ports of Sao Luis and Itaqui
413	Port of Itaqui
414	Vicinity of the Island of Taua-mirim

U.S.A. Defense Mapping Agency Hydrographic and Topographic Centre:

Chart No.	Title
24020	Baia do Oiapoque to Rio Parnaiba
24260	Ilha de Santana to Camocim
24270	Cabo Gurupi to Ilha de Santana
24271	Baia de Sao Marcos

Fire Protection: The wharf is equipped with 4 hydrants with double outlet of 2.5 in. diameter and 60 m. flexible hoses.

Lighthouses: Sao Marcos, Mangunca, Santana, Aracagi, Pirajura, Alcantara, Ponta da Areia, Ilha do Medo, Ponta da Madeira.

Radio Beacon: Sao Joao Lighthouse, Sao Luis Airport.

Access: The same access used for Itaqui Port, and the cited navigation aids system should be used for the approach to the waiting area of Alumar Port.

AUTHORITY: Porto da Alumar, P.O.Box 661, Sao Luis, Maranhao, C.E.P. 65095-050, Brazil. *Tel:* (098) 216-1392, 216-1878. *Telex:* 981058 (Port Operations). *FAX:* (098) 232-1272. *Contact:* Ronildo Jose Carvalho, Port Superintendent.

ANGRA DOS REIS: 23.01 S. 44.19 W. (See Plan)

(A) GENERAL CARGO SECTION.
(B) TANKER SECTION.

(A) GENERAL CARGO SECTION

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage compulsory for tankers, propane carriers, nuclear powered vessels, vessels carrying explosives and all foreign vessels.

Pilot boards in position Lat. 23° 04′ S., Long 44° 14′ W.

Request for pilot must be made 24 hours in advance via the vessels agent

ANCHORAGES: In the Bay of Ilha Grande; approximately midway between the ports of Rio de Janeiro and Santos; offering excellent anchorages, amongst which may be mentioned: Enseada das Estrelas, Enseada do Abraao, Enseada das Palmas, Enseada Sitio Forte and Enseada de Aracatiba.

The inspection area of the Port Health, Federal Receipt and Maritime Police authorities is covered by a radius of 300 m. around the point of co-ordinates 23° 00′ 42″ S., 44° 18′ 41″ W.

Anchorage for vessels of more than 31 ft. draft and 10,000 g.r.t. 23° 01′ 54″ S., 44° 19′ 18″ W.

Anchorages for vessels of less than 31 ft. or 10,000 g.r.t. 23° 00′ 48″ S., 44° 18′ 30″ W.

Anchoring prohibited in the approach channel and manoeuvring basin.

Quarantine Anchorage: 23° 06.47′ S., 44° 27.1′ W.

RESTRICTIONS: The Bay of Ilha Grande possesses two entrances, from the East and the West, permitting immediate access to the Port of Angra dos Reis from the direction of Rio de Janeiro or the Port of Santos, without any change of course. Both access Channels are adequately marked, enabling ships of up to 14 m. draft to navigate in complete safety as far as the port basin about 1 mile from the wharf, where they may lie at anchor and take on cargo from tenders tied up alongside There is another basin with a mud bottom even nearer the wharf, permitting anchorage and docking manoeuvres for ships of up to 10 m. draft.

Access Channel: The port has an access channel 120 m. wide running in the direction 345° true, starting at the junction of the South and North channels, and is marked on Brazilian chart No. 1604. The tidal amplitude is 1.80 m. and the depth at the bar is 40 m.

Near to Ilha da Francisca and the port, the depth is about 10.5 m.

Manoeuvring Basin: The basin is 500 m. long and 320 m. wide and has a depth of 9.0 m. from the access channel up to the port where it is 150 m. wide and 9 m. deep.

HEALTH: Port doctor visits all ships on arrival and requires Maritime Declaration of Health, Derat Certificate, 2 Crew Lists. Vessels from another Brazilian port automatically receive Free Pratique and should not fly Quarantine Flag. If suspected disease or fever on board it is advisable to cable Agent before arrival.

TUGS: Available: 4 tugs of up to 600 h.p.

BERTHING: Pier of 400 m. length with 340 m. of berthing space and a depth of 9.0 m.

BULK CARGO FACILITIES: Silo for wheat and bulk grain with a capacity of 10,000 tons, owned by Moinho Sul Mineiro S/A. There are 2 suction plants of 60 t.p.h. each.

CARGO FACILITIES: 2 electric cranes of 3.2 tons capacity, 1 crane of 6.3 tons capacity and 2 electric cranes of 2 tons capacity. Mobile cranes, 1 for 40 tons, and 10 for 22 tons. Verolme have an 80 ton floating crane available for hire.

Also available for hire are 2 mechanical conveyors, each with 80 t.p.h. capacity.

MEDICAL: All facilities available. If doctor needed on arrival or making emergency call to land sick persons, cable ETA 12 hours before arrival.

FRESH WATER: Available at a rate of 8 cu.m.p.h. Connection is 4 in.

FUEL: No facilities for supplying large vessels. Small vessels can be supplied with diesel oil.

CONSULS: There are no Consuls in this port. They are situated in Rio de Janeiro.

REPAIRS/DRY DOCKS: Various mechanical workshops for the execution of shipboard repairs, equipped with lathes, presses, planes, electric and acetylene welding, drills, power-saws and grindstones, etc. The large shipyards of Verolme with facilities to dry dock vessels up to 600,000 d.w.t. are situated in the Bay of Jacuecanga, near the port of Angra.

CUSTOMS ALLOWANCES: For each crew member, 2 cartons of cigarettes and 1 bottle wine or spirits.

WATCHMEN: Gangway watchmen strongly recommended for any vessels working cargo with shore labour on board. Watchmen from shore not necessary for coal, iron ore and oil cargoes.

TIME: The local time is GMT minus 3 hours.

HOLIDAYS: 1st January; 1st May; 29th June; 7th September; 8th December; 25th December; 31st December, also local holidays January 6th, April 3rd and December 8th.

TELEPHONES: Not available.

GENERAL: *Charts:* No. 1600, 1602, 1604, 1608, 1609, 80, 81, and 30.

AUTHORITY: Porto de Angra dos Reis, Av. Beira Mar S/No., Angra dos Reis 23.900, Rio de Janeiro, Brazil. *Tel:* (0243) 65-0273, 65-0602. *Telex:* 223227 CDGB-BR. *Contact:* Fernando Mauricio de Lima Cavalcanti, Manager.

AGENT: See "Rio de Janeiro".

(B) TANKER SECTION – TERMINAL GERENCIA DA BAIA DA ILHA GRANDE – GEBIG.

POSITION: 23° 03′ 38″ S., 44° 13′ 10″ W.

IMPORTANT FEATURES:

1. Anchorage – (see Brazilian Nautical Charts No. 1600, 1602 and 1609).

Anchorage for tankers: The anchorage for tankers waiting for berth is a circle with one mile radius, its centre near Ponta Acaia. Bearing 075° – 2.8 miles from Lage Branca light – (Lat. 23° 09′ 00″ S., Long. 44° 23′ 48″ W., shown on Brazilian Nautical Charts Nos. 1600, 1602 and 1609.

2. Anchorage for lighterage: The same as for waiting for berth.

3. Vessels are prohibited from anchoring in the areas near the Terminal piers, since these areas lie on the access channel for ships making for the Port of Angra dos Reis or leaving it through the Eastern bar.

4. There is no assigned anchorage for Port Authorities clearance (for the time being).

According to the Captain of the Port of Angra dos Reis, Free Pratique will be granted upon docking at the Terminal pier.

5. Display of quarantine signals on approach to Angra dos Reis must be continuously maintained until Free Pratique is granted. These signals are: sunrise to sunset: Quarantine Flag. Sunset to sunrise: Signal lights red over white.

6. In addition to quarantine signals, the Brazilian Flag must be flown from vessel's foremast throughout the vessel's stay in port.

7. The access channel from anchorage to the manoeuvring area (near the pier) is about 8.75 miles long, 350 m. wide and 25 m. deep in a S.W. – N.E.'ly direction, beaconed with 19 resilient beacons (nine exhibit Fl. W. 5 sec. 3M. and ten exhibit Fl. R. 5 sec. 3M.).

8. The manoeuvring area near the pier is 0.6 miles Northward and nearly 1.3 miles East-Westward and more than 30 m. (90 ft.) depth.

9. Signals for emergency: Series of 7 short blasts followed by 1 long blast of the ship's whistle or siren.

10. The Terminal operates around the clock.

11. There are two "open L" shaped piers for accommodating oil tankers, projecting from Ponta do Leme into the sea, about 1,318 m. long in an East-Westerly direction.

12. Pilotage is compulsory when making for the pier and commences near Ponta Acaia.

DOCUMENTS: The Captain of the Port of Angra dos Reis authorises ship's clearance upon berthing alongside the Terminal piers.

The following documents are required for immediate inspection by the boarding officials:

Any and every document issued or related to ship's clearance at the Last Port of Call.

5 copies Crew List.
2 copies Stores List.
2 copies Personnel Effects.
3 copies Passenger List.
3 copies Cargo Manifest.
3 copies Bill of Lading.

APPROACHES: A vessel making for DTSE/GEBIG approaching by the channel Westward of Ilha Grande should steer for Lage do Coronel light column (a truncated pyramidal concrete column painted in red and black horizontal bands 4 m. in height situated in the middle of the rock (Gp. Fl. (2) W. 10 sec. 10M.) (Lat. 23° 06′ S., Long. 44° 24′ W.), bearing more than 000° which will lead Westward of Lage do Pendao de Fora. When Lage Branca light-column bears 090°, course should be altered so as to make for the swept channel, beaconed with 18 resilient beacons (Fl. G. 5 sec. 3M. and Fl. R. 5 sec. 3M.) in a S.W. – N.E.'ly direction about 8.75 miles long, 350 m. wide and 25 m. deep, which leads to the manoeuvring area near the "L" shaped piers.

The "Terminal Gerencia da Baia da Ilha Grande – DTSE/GEBIG" facilities are situated on the mainland, in front of the central part of Baia da Ilha Grande.

Its "L" shaped piers extend about 1,318 m. from Ponta do Leme in an East-Westerly direction and have berthing space for tankers up to 500,000 d.w.t.

PILOTAGE: Pilotage is compulsory when making for the piers and commences near Ponta Acaia.

Pilots moor, unmoor and supervise the movement of all vessels in the vicinity of the piers. Compulsory pilotage starts near Ponta Acaia in position Lat. 23° 09′ 00″ S., Long. 44° 23′ 48″ W.

Pilot will board the ship at this point from a launch or tugboat. Vessels must be equipped with satisfactory mooring equipment, lines, gear, etc., and ballasted to the satisfaction of the Pilot.

It is the responsibility of the Master to notify the Pilot of any special conditions, difficulties or peculiarities such as engine or boiler deficiencies, defective navigational equipment, mooring lines, tackle, gear, or lack of necessary equipment which might impose hazards in connection with the handling, mooring, unmooring, discharging and loading of vessel.

At the piers, vessels must be moored to the entire satisfaction of both the Pilot and Terminal Operators.

If the Master or the Officer of the Watch is in any doubts as to the Pilot's actions or intentions, or if he does not agree with Pilot's actions considering the safe navigation or manoeuvre of his ship it is the responsibility of the Master to take the necessary steps according to his best judgement and to notify the Captain of the Port, in writing, through the ship's Agent.

ANCHORAGE: *Anchorage for tankers waiting for berth:* Anchorage for tankers waiting for berth is within a circle with 1 mile radius, its centre near Ponta Acaia, with Laje Branca lighthouse bearing 075° (true), and 2.8 miles away (Lat. 23° 09′ 00″ S., Long. 44° 23′ 48″ W.), shown on Brazilian Nautical Charts 1600, 1607, 1631, 1632 and 1636.

Anchorage for Lighterage: Anchorage for lighterage is the same as for tankers waiting for berth (see above).

Prohibited Anchorage: Vessels are prohibited from anchoring in the vicinity of the Terminal piers since the place lies on the access channel for ships making for Angra dos Reis or leaving it by the Eastern bar.

Anchorage for Clearance: There is no assigned anchorage for Port Authorities clearance (for the time being).

According to the Captain of the Port of Angra dos Reis, Free Pratique will be granted upon berthing at the Terminal pier.

RESTRICTIONS: *Access Channel:* The swept access channel from anchorage to the manoeuvring area (near the pier) is about 8.75 miles long, 350 m. wide and 25 m. depth, running in a Southwest-Northeasterly direction and beaconed with 19 light beacons (Fl.G. 5 sec. 3M. and Fl.R. 5 sec. 3M).

Manoeuvring Area: The manoeuvring area near the pier is approximately 0.6 miles Northward and 1.3 miles East-Westward and more than 30 m. (98 ft.) depth.

Tidal Amplitude and Streams: Local and diurnal tidal rise is approximately 1.20 m. (4 ft.) above MLWS at neaps and 1.70 m. (5.5 ft.) in HWS.

Tidal streams are West going during the in-going, tide, running nearly parallel to the pier, and East going during the out-going tide.

If the wind is fresh from N.E., South or S.W., the tidal stream follows the direction of the wind.

Tidal stream normally attains a rate from 1.0 to 2.2 knots.

There are no remarkable tidal streams in this whole area.

MAX. SIZE: Max. draft 25.0 m. (82 ft.).

HEALTH: Vessels entering are inspected by the Health and Customs Offices between 0700 hrs. and 1900 hrs.; but by previous application, a special visit may be granted outside this period on payment of an extra tax.

RADIO: Radio Messages prior to arrival: ETA must be radioed by all Petrobras chartered vessels bound for DTSE/GEBIG, 72 and 48 hours prior to arrival, to Petrobras as well as to Agent through PPR Radio Station (Official Angra Coastal Radio Station).

Confirmation as well as any changes in the time of arrival must be radioed 24 hours prior to arrival.

When within VHF range, ships must contact DTSE/GEBIG for instructions.

ETA radio messages must specify "local" or "GMT" time.

VHF: DTSE/GEBIG Central Radio Station is in the Control Room. Transceivers are monitored by Terminal Operators tuned to Channel 16 (Delta), 24 hours a day.

TUGS: *General:* DTSE/GEBIG operates 3×3,720 h.p. tugs.

Mooring and unmooring assistance is provided by these tugs which are fitted with fire pumps, water cannons and foam monitors to assist in fighting fires.

At least one tug is on duty at all times in order to provide assistance should necessity of emergency or additional services arise. Tugs join when passing Buoys 11 and 14.

Tug Requirements:

Vessels up to 100,000 d.w.t. – 2 tugs.
Vessels 100,000 d.w.t. to 200,000 d.w.t. – a minimum of 3 tugs.
Vessels over 200,000 d.w.t. – 4 tugs.

Tug/Ship Communications: The tugs are equipped with VHF radiotelephones so that continuous communications between ship and tugs may be maintained during docking and undocking manoeuvres.

A 24-hour-a-day listening watch is maintained in order to comply with ship's or operational personal requests even if the vessel is already berthed.

Should a radio failure occur when docking/undocking and manoeuvres are in progress, the following whistle signals must be used:

Calling: 4 long blasts followed by 1 or 2 short blasts. Short blasts are intended to number the tugs needed, that is, one blast one tug, two blasts two tugs, and so on.

Before towing line is made fast: 2 short blasts – stand by for pushing on the bow or picking up ship bow line. 3 short blasts – stand by for pushing on the stern or picking up ship stern line.

After towing line is made fast: 1 long blast – pull to starboard. 2 short blasts – pull to port side. 3 short blasts – stop pulling.

Manoeuvring alongside ship: 1 short blast – pull. 2 short blasts – push.

Other ship's whistle signals for the tender craft:

Calling: 2 long blasts followed by 1 short blast – calling pilot launch.
1 long blast followed by 2 short blasts – calling motor launch.

Tugs will acknowledge orders received by sounding a short blast; since tugboats are equipped with radio-telephone, orders may be given by radio.

Unless otherwise ascertained, the Pilot gives orders to the fore tug sounding a mouth whistle and to the aft tug sounding the ship's whistle.

Launches:

Launches for Crew Members: Launches can be rented.

Pilot's Launch: Pilots use either one of the manoeuvring tugs or pilot's station launch since DTSE/GEBIG operates no launches for pilotage service.

Small craft for assistance in manoeuvres: Assistance in handling mooring lines is rendered to DTSE/GEBIG by contract with specialised firm including operation of two small diesel powered launches.

BERTHING: DTSE/GEBIG operates around the clock. Vessels may moor and unmoor at any hour except in severe adverse weather conditions.

Pier Facilities: There is one "L" shaped pier for accommodating oil tankers up to 500,000 d.w.t., projecting from Ponta do Leme into the sea, about 1,318 m. (3,954 ft.) long in an East-Westerly direction.

	Outer Berth	Inner Berth
Name:	P-1	P-2
Location:	South Side	North Side
Length:	570 m. (1,869 ft.)	570 m. (1,869 ft.)
Depth:	30 m. (98 ft.)	36 m. (118 ft.)
Loading Arms:	4×20 in.for oil and ballast 1×12 in. for diesel oil and fuel oil	4×16 in. for oil and ballast 1×12 in. for diesel oil and fuel oil

Ship's manifold maximum heights above loading arms platform level:

Outer berth (P-1)	23.60 m. (77.5 ft.)
Inner berth (P-2)	20.60 m. (67.5 ft.)

Height of loading arm platform above MLWS: The height of the loading arm platform level referred to the MLWS is 7.20 m. (21.6 ft.).

Max. allowed d.w.t. for operating ships:

Outer berth (P-1)	Up to 500,000 d.w.t.
Inner berth (P-2)	Up to 350,000 d.w.t.

LOADING/UNLOADING: *Equipment:* The pier is equipped with the following lines for loading/unloading and/or bunkers (both berths):

3×42 in. oil lines about 9,500 m. long; 10.5 kg./sq.cm. (150 lb./sq.in.) maximum working pressure; 12,000 cu.m./h. maximum flow rate (each).

1×26 in. line for ballast, about 1,800 m. long; 10.5 kg./sq.cm. (150 lb./sq.in.) maximum working pressure and 4,000 cu.m./h. maximum flow rate.

2×20 in. lines for fuel oil, about 2,000 m. long; 10.5 kg./sq.cm. (150 lb./sq.in.) maximum pressure and 1,350 cu.m./hr. maximum flow rate (each) or 1,800 cu.m./hr. for 2 lines. Maximum working temperature for both lines: 75°C (167°F).

1×12 in. line for diesel oil, about 1,500 m. long; 10.5 kg./sq.cm. (150 lb./sq.in.) maximum working pressure and 1,050 cu.m./hr. maximum flow rate.

1×8 in. line for drinking water, 3.2 kg./sq.cm. (45 lb./sq.in.) working pressure and 70 cu.m./hr. maximum flow rate.

Auxiliary Facilities: Both berths are equipped with recording devices to measure continuously the ship's speed and her distance to the pier, referred to the pier longitudinal axis.

Both berths are also equipped with hydraulic powered accommodation ladders for easy access aboard ship.

Cargo/Ballast Operation:

General: The terminal is equipped with 2 slop tanks with a combined capacity of 40,000 cu.m. or 251,500 bbls. (20,000 cu.m. or 125,750 bbls. each).

Discharge into the sea of any amount of oil or oil based products, either alone or in combination with ballast water, is strictly forbidden and heavily fined.

DTSE/GEBIG is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth.

Simultaneous loading/deballasting or unloading/ballasting is allowed on properly equipped vessels. Ships will be held responsible for any consequences whatsoever which may result of such operating procedures.

Hose Handling: Hoses are in use for fresh water supply only. For loading/unloading operations the Terminal is equipped with 11 quick release flange connection loading arms of 150 lb./sq. in. capacity.

Nominal Flow Rates: The terminal lines allow oil discharging at a rate of 25,000 cu.m.p.h. and loading up to 12,900 cu.m.p.h.

Cleaning Tanks:

Discharging of oily water resulting from conventional tank cleaning is not allowed as a rule. Provided previously scheduled and accepted by Terminal, crude washing may be authorised.

MEDICAL: In emergencies or cases of serious injury, DTSE/GEBIG may assist with first aid. Medical treatment in case of serious illness must be requested by Masters to Agents.

Dental treatment is available in Angra dos Reis.

If the patient(s) cannot speak Portuguese or Spanish, an interpreter will be desirable for better understanding.

FRESH WATER: *Drinking Water:* DTSE/GEBIG is equipped for supplying drinking water through universal quick release 2.5 in. universal manifold from a 8 in. line with a 70 cu.m.p.h. flowing rate.

Boiler Water: DTSE/GEBIG auxiliary area is equipped 'with 2×1,550 cu.m.p.h. tanks (each) for own use as well as for supplying ships with boiler water through an 8 in. fresh water line.

FUEL: DTSE/GEBIG is equipped with blending machines for mixing fuel oil and diesel oil in order to supply berthed tankers with any type of bunkers e.g. bunker C, marine gas oil, marine diesel oil and marine fuel with any grade of viscosity, and charging international prices.

Orders for bunkers must be placed 48 hours in advance and addressed to:

Divisao de Abastecimento de Navios, Departamento Comercial, Av. Republica do Chile, 65 – ZC – 06, Rio de Janeiro 20.000 – RJ – Brasil. Cable Address: Petrobrasecope. Telex: 23335. Tel: 534-3291, 262-2277.

Departamento Comercial may also be contacted through Owner's Agent.

Lubricants: Orders for lubricants must be placed 15 days in advance and addressed to:

Petrobras Distribuidora, Rua General Canabarno 500, 13 Andar, Maracana, R.J., Brasil. Cables: Petroedipe. Telex: 36301, 21409. Tel: 021-5664477.

Petrobras Distribuidora may also be contacted through owner's Agent.

CONSULS: There are no Consular representatives available in Angra dos Reis. The nearest city where such representatives can be found is Rio de Janeiro, where most of the maritime nations maintain Consulates. Agents may be able to contact Consulates if duly notified in good time.

REPAIRS/DRY DOCKS: *Ship Repairs:* There is a shipbuilding yard, Verolme Estaleiros/I.V.I., in Baia de Jacuacanga (km. 83 Estrada Rio-Santos) which may be used by vessels to effect limited repairs only, since it main activity is shipbuilding.

There is no specialised personnel or well equipped workshops intended for ship repairs.

In case of emergency repair or those which cannot possibly be postponed and which Verolme yards cannot effect, the following workshops may be contacted for limited repairs.

Industria e Comercio Angrense Ltda. Rua do Comercio 495 – Loja 6.

Oficina Mecanica Tres Irmaos, Rua Arcebispo Santos 209 – Fundos.

Electronic Repairs: There are no workshops or specialised personnel for repairs in electronics available in Angra dos Reis.

Agents may be able to take the necessary steps in order to comply with orders placed for repairs in electronics if contacted in good time.

Compass and Radio Adjustments: Orders for compass and radio direction finder adjustments must be placed through Agents well in advance, considering that such services are not available in Angra dos Reis.

SURVEYORS: *Classification Societies:* There are no classification societies representatives in Angra dos Reis. However they may be called from Rio de Janeiro and/or Santos upon Agent's request. ABS, GL, LR and BV maintain offices and representatives in Rio de Janeiro.

Petroleum Inspection: No Petroleum Inspection Services are available in Angra dos Reis. They may be contacted in Rio de Janeiro or Santos at the following addresses:

Chas. Martin & Co., Praia do Flamengo, 66/610 Bc.B, 20.000, Rio de Janeiro – RJ – ZC – 00. Tel: 242-4219, 245-5636, 265-1535.

E. W. Saybolt & Co., Rua Bras Cubas, 3, 11100 – Santos – SP. Tel: 46638.

Sociedade Brasileira de Superintendencia S/A (Redwood), Av. Presidente Vargas 466, 13° andar, Rio de Janeiro, RJ, 20.000. Tel: (021) 233-3522.

Superinspect Supervisao Vistorias e Inspecoes S/C, Av. Rio Branco 18-7° andar, 20.000 – Rio de Janeiro – RJ. Tel: (021) 253-3939. Telex: (021) 22335 SUPER BR.

Caleb Brett do Brasil Ltda., Rua Antonio de Carvalho, 20/1105, 20071 Rio de Janeiro – RJ. Tel: (021) 240-7697. Telex: (021) 352259 CBRE.

SHORE LEAVE: Ship's personnel are not permitted ashore for any purpose whatsoever until Free Pratique has been granted. Luggage and packages are subject to Customs Officers and/or Terminal Watcher inspection. As a rule shore leave is permitted with the above stated restrictions. Vessels are not permitted to sail unless all crew members are onboard. In case of seamen left ashore for any reason whatsoever all expenses are for ship's account.

Passengers: Passengers will be permitted ashore if in possession of the required visas and documents.

WEATHER:

Winds: Easterly winds predominate but due to the Ilha Grande high mountains they may blow from several directions. S.S.W. winds due to cold fronts may cause heavy seas and swells in exposed areas. S.S.W. winds often blow in the afternoon period. N.N.E. winds are not infrequent. Wind speed ranges from 3 knots to 60 knots in the Terminal area.

In the Autumn and Winter, cold fresh winds are common on the coast from Rio de Janeiro to Santos. In daytime the breeze tends to increase the East component, and at nightime the West component predominates.

In protected areas (harbours, bays and channels in this area) S.S.W. winds starts about noon, when fresh to moderate winds cause the temperature to decrease; wind force decreases at night and an interval of calm follows, before the arrival of the sea breeze from N.N.E., about 2000 hrs. (local time) until 1000 hrs. (local time).

Rain: The average annual rainfall is about 2,000 mm. in the area.

Visibility: The visibility in this area is generally fair to good.

During Autumn and Winter fog is moderately frequent in the early morning. In Summer time, dry haze is comparatively frequent, causing the visibility to be reduced.

Temperature: Local average temperature ranges from 18°C (64.4°F), in June and July, to 35°C (95°F), in December and January.

Pressure: The pressure over the area is about 1,015 mb. in good weather.

Humidity: Humidities are comparatively high, ranging from 76% to 81%.

GENERAL: *Charts:* No charts or Pilot Publications are available either at the Terminal or Angra dos Reis. If necessary, Agents must be contacted for placing orders in Rio de Janeiro.

The "Diretoria de Hidrografia e Navegacao" (Brazilian Navy Hydrographic Service) issues the following navigational publications:

Chart Numbers: 1600, 1607, 1631, 1632 and 1636 (soundings in metres) covering the area.

A Brazil Pilot of the Brazilian Coast (Roteiro).

List of Lights (Lista de Farois).

Flags: Display of Quarantine signals on approach to Angra dos Reis and DTSE/GEBIG facilities must be maintained until Free Pratique is granted. These signals are: sunrise to sunset: quarantine flag ("Q"). Sunset to sunrise: Signal lights – red over white.

In addition to quarantine signals, the Brazilian Flag must be flown from vessel's foremast throughout the vessel's stay in port.

Vessels entering or leaving Brazilian ports must display their ensign when within 3 miles of the entrance to a port or anchorage and, by day, also display their call letters in flags of the International Code of Signals.

Cranes: Neither DTSE/GEBIG and Angra dos Reis Port operate floating cranes. Verome Yards may rent a floating crane with 80 tons capacity. DTSE/GEBIG does not operate barges or lighters.

Provisions and Stores: Orders for provisions and/or stores may be placed through Agents. Since some items are only obtainable in Rio de Janeiro, orders must be placed as soon as possible.

Laundry: No laundry facilities are available at DTSE/GEBIG. There are however laundry facilities in Angra dos Reis which may be used through Agent, which must be contacted as soon as possible for such purposes.

Mail Services: No Post Office Agency is available at DTSE/GEBIG. Mail must be sent care of Agent and posted in Angra dos Reis.

Cash Advances: DTSE/GEBIG is not authorised to effect cash advances. Master must contact either Owner's Agent or FRONAPE for such purpose (FRONAPE must be contacted in the case of ships chartered by PETROBRAS).

Customs Watches: Brazilian Customs Officials may be assigned on board according to Customs Regulations in order to enforce the said regulations. Meals must be supplied to these Officials at regular meal times.

Contraband: Brazilian law is very strict in every aspect concerning smuggling. Masters are requested to instruct their crews about restrictions concerning trafficking goods of any kind including cigarettes, cigars, tobacco, alcoholic beverages, souvenirs, firearms, playing cards, narcotics. Trafficking in these articles or any others, between ships or between ships and Terminal employees or representatives, or anybody else is strictly prohibited and failure to comply with the law may result in several penalties.

Items as above stated must be kept sealed under lock and key.

Visitors: No visitors are allowed aboard ships berthed alongside unless duly authorised by Master and Terminal Superintendent and local Maritime Police. Unauthorised visitors will have to be reported to the Maritime Police.

National Holidays: All ships in port must be fully dressed on the following National Holidays: September 7th and November 15th.

Machinery in Readiness: When berthed alongside PETROBRAS' Terminal vessels must keep engines and propulsion machinery in readiness to leave the berth under full power on short notice.

No repairs are allowed which would interfere with this requirement.

Violation of this rule will entail towage from the berth at the vessel's expense and PETROBRAS will not accept any kind of responsibility for the resulting delay to the vessel.

Refuse and Garbage: All deck scuppers must be kept plugged and, as far as possible, discharging of waste water from lavatories on terminal side must be prevented.

DTSE/GEBIG has no way to deal with ship's garbage or refuse. If absolutely necessary, Agent must be contacted for such a purpose.

Fishing and Painting: Use of pier for painting ship's hull is not allowed. It is also forbidden to fish on the terminal side of the ship.

General: Shore access to DTSE/GEBIG is by car or by bus along BR-101 Highway km. 81 Jacuacanga.

DTSE/GEBIG is 150 km. (about 93 statute miles) from Rio de Janeiro.

There is a regular bus service between these cities. There is international telephone service available (Long Distance Direct Dialling) DDD (0243 for Angra dos Reis). The piers are equipped with two hydraulic powered accommodation ladders which allow personnel to board the vessel safely.

At the ladder's end, a lifebuoy is fastened to a 27 m. (29 yd.) long safety line.

Telephone Numbers: Important telephone numbers of the Terminal:

General Manager of the Terminal	5201
Operations Manager	5203
Operations Supervisor (around the clock)	5211, 5287 and 5283
Operating Room (main) (around the clock)	5215 and 5287
Operating Room (auxiliary) (around the clock)	5244
Pier (around the clock)	5246 and 5275
Traffic and Facilities Section	5241
Program and Control Section	5240 and 5204
Safety Section	5260
Marine Section	5234
Medical Section	5221

*to be called in working hours only

**when needed out of working hours call 5211, 5287 and 5283.

SHIPMASTER'S REPORT: November 1981 (updated 1994).

Port Name: Although called "Terminal Gerencia da Baia da Ilha Grande" orders for this terminal are given for "Angra dos Reis". Terminal called DTSE/GEBIG.

Anchorage: Outside the port about 3 miles West of Laje Branca. Except in special cases officials will not board vessel in this anchorage as a result of difficulties experienced in the past with sudden changes of weather. In the approaches to the port, to South and North of the buoyed channel, anchorage is possible with a max. draft of 21 m. and port officials will board vessels here, shore leave being possible by shore launch for crew.

Pilotage: Pilots board off the seabuoy at the entrance to the buoyed channel to take vessel to terminal or inside anchorages. Outward bound the Pilot remains until the last pair of channel buoys. Pilots work ships for terminal only.

Channel Lights: These are neither very bright nor very reliable.

Pratique: There is no radio pratique and quarantine officials board with Customs and Immigration but ships should cable to Agents two days prior to arrival "Codicoes Sanitarias Abordo Satisfactorias".

Formalities: 2 each Crew Lists, showing vaccination dates; 2 each Store Lists and Personal Effects; 8 Crew Lists. Ship's Certificates taken ashore by Agent to effect Clearance.

Agents: Direct VHF communication from office to ships in anchorage or at terminal. Until recently weekend cables were erratic but telex is now installed.

Shore Leave: By minibus from berth to Angra dos Reis (30 minutes) – taxis not allowed inside terminal gate (30 minutes walk from berth). No passes required.

Crew Changes: Easily possible (via Rio de Janeiro, 3 hours by car) – sometimes difficulties with Customs for crew joining and leaving bringing/taking radio/cassette players, Customs escort sometimes being required or ambiguous fines imposed.

Fresh Water/Bunkers: Available at terminal. Lighter fuel oils are sometimes a mixture of heavier fuel and diesel oils.

Tugs: Three terminal tugs (2×3,720 h.p. and 1×3,170 h.p.) always available, fourth tug for larger ships (also 4,000 h.p.) berthing is sent from Mangaratiba. Two ship's lines are used to bow and stern tug (and care should be taken sending these as tugs inclined to steam off with them) and tug's lines from shoulder tugs.

Berth: Single long finger pier, South side taking ships up to 500,000 d.w.t and North side up to 350,000 d.w.t. Ships on North side feel current flow tending to push them off the berth and short "semi-breast" stern lines are preferable to ones with long drifts. Main deck springs are sometimes impractical to the shore as centre dolphin section of the pier is about 260 ft. in length and in many ship's springs would be too short. Otherwise plenty of mooring hooks and general pattern is 2 springs, three breast and four head/stern lines.

Terminal: Communication by VHF; crude oil washing permission should be sought prior to arrival; usual check lists; terminal schedules of berthing and discharge are very variable.

AUTHORITY: Dutos e Terminais do Sudeste – DTSE – GEBIG, BR-101 km. 81 – Jacuacanga, C.P. 73091, Angra dos Reis – RJ, CEP 23900, Brazil. *Tel:* 612255 PABX, Direct long distance dialling number DDD 0243 (for Angra dos Reis) followed by the telephone number (65-0358). *FAX:* 0243-612519 DDD. *Contact:* Paulo Penchina Cortines Pereira, General Manager.

Head Office: Petroleo Brasileiro S/A – Petrobras, Avenida Republica do Chile, 65-ZC-06-Centro, Rio de Janeiro 20.000, Brazil.

Divisao de Operacoes: Same address, as above, 12th Floor, (Operations Division).

Captain of The Port: Avenida Almirante Julio Cesar de Noronha No. 13, Angra Dos Reis, Brazil. *Tel:* 0243-650365. *FAX:* 0243-651854. *Contact:* Marcos Luiz Portela, Port Captain.

AGENT: See "Rio de Janeiro".

ANTONINA (Barao de Tefe): 25.26 S. 48.41 W.

(See Plan)

Also see "General" before first port and "Paranagua".

PORT LIMITS: The limits of the Port of Barao de Tefe extend from the Teixeira Point to the port quay.

DOCUMENTS: See "Paranagua".

Inspection carried out at Paranagua.

PILOTAGE: Compulsory in the port of Barao de Tefe and in the access channel. Also see "Paranagua".

ANCHORAGE: Only anchorage is in the vicinity of Teixeira Point (See DHN Chart No. 1823). See "Paranagua" for quarantine and explosives anchorages.

Anchoring in front of the quay is prohibited.

RESTRICTIONS: *Access Channel:* This is marked on Chart No. 1823 of the DHN (National Hydrographical Directorate), the channel is 120 m. wide, running in a S.E. – N.W. direction, starting at the Island of Teixeira and proceeding as far as the manoeuvring basin.

Critical Points: Itaucu de Baixo Rocks, Shallows of Fundao Grande and Joao Fernandes; average depth 5 m. Anchoring in the channel is forbidden, and to navigate it, it is necessary to have good visibility and daylight.

Tide: The average speed reaches 3 knots on the ebb tides, average height during Spring tides – 2.2 m., Neap tides – 1.7 m.

Berthing: Manoeuvring may only be effected in daylight and good visibility. Berthing always takes place on a rising tide.

TUGS: To be requested from Paranagua.

BERTHING: The area for manoeuvring is 280 m. wide in front of the quay, with a length of 700 m. Variable depth between 6.5 m. and 7.5 m.

Length of berth, Matarazzo Quay, length 200 m. (additional quay, length 150 m. planned, being 45 m. from Matarazzo Quay); depth alongside, 6.0 m. – 6.5 m.; Bollards 50 m. apart.

Facilities: 5 warehouses, 12,200 sq.m. without cold storage; 1 vertical silo at Matarazzo of 8,500 tons capacity (not in operation); open air areas, 7,500 sq.m.

Cranes: 1 of 6.5 tons on rails, 4 on tyred wheels of 9 and 3.5 tons, stacker trucks – 4 of 5 tons capacity, 4 of 2.5 tons and 5 of 2 tons. No rolling bridge, loaders or suction units available.

Railway lines extending 3,100 m. but no locomotives available; 6 wagons which are of the open type (28 ton capacity); 22 trucks on tyred wheels (3.5–7.0 tons capacity).

No Ro/Ro or container facilities. No barges, pontoons or lighters available.

STEVEDORES: See "Paranagua".

MEDICAL: Hospital available. Tel: 432-1244.

FRESH WATER: One hydrant at end of port quay, rate 30 cu.m.p.h. and 3 hydrants at Matarazzo Quay (100 m. apart), rate 30 cu.m.p.h.

No water boat available.

FUEL: Available to vessels alongside by road tanker.

REPAIRS: See "Paranagua".

AIRPORT: At Curitiba (Afonso Pena Airport) 65 km. away, or Paranagua for light aircraft 50 km. away.

HOLIDAYS: Local: 6th November (City Anniversary), 15th August (City's Patron Saint Day).

CUSTOMS: Tel: 432-1221.

POLICE/AMBULANCE/FIRE: Police, Tel: 355 or 432-1234; Fire Brigade from Paranagua is used.

TELEPHONES: Not available.

SERVICES: Foodstuffs available. Rubbish collection is the responsibility of the Agent.

GENERAL: Following received from a ship's Agent in 1980.

The Port of Antonina is situated in the inner recesses of Paranagua Bay, about 15 miles from this port. Vessels demanding that port receive Free Pratique at Paranagua and proceed on voyage 1 hour before HW. As the channel has no light-buoys, navigation is only possible during day time. There are only 2 berths available at Antonina, and should both of them be occupied, vessels await in Paranagua, because there is no safe anchorage there.

Vessels have to turn around before docking, and for this reason only small vessels should go there.

Official Maximum Drafts: Spring tide – HW: 21 ft.
Neap tide – HW: 18 ft LW: 15 ft.

Stevedoring – Labour:

(a) Number of gangs available: Not restricted.
Stevedores affiliated to their Union.

(b) Working hours:

Normal hours:	0700–1100	1300–1700
Night hours:	1900–2300	0000–0400
Overtime:	1100–1300	1700–1900
	2300–2400	0400–0700

(c) Number of men in regular gang:
Unitised cargo: 9 men.
Break-bulk cargo 11 men
Reefer cargo: 20 men

(d) Labour available all year round.

(e) Rigging and cleaning gangs available.

(f) Capable supervision is available. In addition to normal stevedore supervisors, agency employees give ample assistance to ships' operations.

(g) Average tons worked per hour per gang, loading: Bagged cargo: average of 40 t.p.h. General cargo: average of 10/20 t.p.h.

(h) Average tons worked per hour per gang, discharging:
Bagged cargo: average 20 t.p.h.
General cargo: average of 10/15 t.p.h.

Equipment/Gear:

Shore gear, hooks, slings, etc., available.

Heavy lift slings available to handle maximum 120 tons.

Shore cranes:
1 electric crane – capacity 25 tons – Outreach 25 m.
4 electric cranes – capacity 6.3 tons – Outreach 25 m.
4 electric cranes – capacity 3 tons – Outreach 15 m.
6 electric cranes – capacity 3.2 tons – Outreach 25 m.
4 electric cranes – capacity 2 tons – Outreach 25 m.
1 automotive crane on tyres – capacity 30 tons – Outreach 20 m.
1 floating crane available, capacity 110 tons.

Cargo is discharged onto railroad trucks and trailers. Export cargo is brought alongside by trucks, railway cars or trailers.

Sideloaders also available.

No container spreaders available.

No lighters available.

Warehouse/Transit Cargo Sheds:

(a) Within the port area there are 31 warehouses of concrete construction, with tile roofs, with a total of 87,310 sq.m. of storage.

(b) A small refrigerated storage shed is available, used mostly for meat, fish, shrimps and fruit; its capacity is for 2,900 cu.m., and there are 9 chambers.

Temperature: Range of 14°/15°F. One chamber can be brought down to −13°F.

(c) Free time period allowed on cargo discharged from vessels is 6 days.

(d) Storage always paid by importer/exporter.

AUTHORITY: Administracao dos Portos de Paranagua e Antonina, Av. Conde Francisco Matarazzo, Antonina, Brazil. *Tel:* 432-1027.

Port Captain, Rua Marques de Herval 216. *Tel:* 432-1384.

ARACAJU: 10.55 S. 37.03 W. (See Plan)

LOCATION: On the right hand bank of the Rio Sergipe, 3.24 nautical miles from the entrance. D.H.N. Charts 1000 to 1003 cover this area.

APPROACHES: The access channel is 100 m. long and 2.9 m. deep. Tidal variation 2.3 m.

PILOTAGE: Compulsory.

BERTHING: Manoeuvring basin is 600 m. long with a depth of 12 m.

The quay consists of 96 m. (concrete) and 80 m. (wood) berthing space, with depths of 6 m. and 7 m. available. Warehouse of 1,200 sq.m. and 50,000 sq.m. open storage available.

CRANES: One 9 ton mobile crane available.

BULK HANDLING FACILITIES: There are 3 silos, with a capacity of 5,800 tons and one mechanical wheat loader, capacity 20 ton. A 40 ton weighbridge is also available.

FRESH WATER: Available, delivery rate 25 t.p.h.

CONSULS: Portugal (vice-consul).

REPAIRS: Can be undertaken.

AIRPORT: Nearest at Santa Maria, 13 km. distant.

TIME: GMT minus 3 hours.

HOLIDAYS: National: January 1st, April 21st, May 1st, September 7th, November 15th and December 25th.

Regional: December 8th.

Movable: Monday and Tuesday of Carnival, Ash Wednesday, Good Friday and Corpus Christi.

Commemorative: August 28th, October 28th, October 30th and November 2nd.

AUTHORITY: Administracao do Porto de Aracaju, Av. Joao Rodrigues, s/no., 49000, Aracaju, SE. *Tel:* (0792) 22-3314. *Contact:* Engineer Militino Rodrigues Ferreira, Administrator. *Tel:* (0792) 22-3217.

ARATU: 12.47 S. 38.30 W. (See Plan)

LOCATION: The port facilities of Aratu are located on the Eastern side of All Saints Bay in the Enseada do Caboto, between Marinho and Pereira Points, to the North of the Bar of Cotegipe and the Naval Base of Aratu, facing the Mare Island.

Its areas of administration and jurisdiction correspond to the Bay of All Saints, limited to the South by parallel 12° 50′.

DOCUMENTS: See "General" before first port and "Salvador".

APPROACHES: *Access Channel:* The access channel starts at Lat. 12° 58′ S., Long. 38° 31′ 55″ W. with a minimum depth of 18 m. (see Chart 1108 of the NHD). The channel is marked by 8 light buoys, 4 to starboard with red lights and 4 to port with white lights and by the lighthouse at Areia Point. To the North of the Port of Aratu is the lighthouse of Cabrito Point which provides a good landmark day and night for vessels bound for the port of Aratu. The length of the channel is about 2 miles as far as the manoeuvring area, with a minimum width of 180 m.

The improvement of the nautical signalling arrangement in the access channel to the port is planned, based on a study carried out by a Dutch firm and under an agreement which will be signed with the SSN. The following points are fairly clear and serve for direction finding purposes:

(a) Furnaces of the Salvador Cement Company, at Sacopa Point, during the day;

(b) USIBA terminal which has a red light at its top, serving as a reference point both day and night.

(c) Construction at the top of the hill at Toque-Toque Point, during the day.

(d) Church of Nossa Senhora das Neves on the Southern part of the Island of Mare during the day;

(e) The lighthouses of Areia Point and Cabeto Point, both day and night.

Existing Dangers: The shoal to the West of Sacopa Point and the banks of the Island of Mare are being permanently dredged.

Manoeuvring Area: The area intended for berthing and unberthing of vessels is defined to the East and West by the 10 m. line, with variable width from 400 m. to 1,000 m., limited to the South by the 12° 46′ 09″ S. parallel. Minimum depth 12 m. Depth at Bar 20 m. Max. height of tide 2.8 m.

PILOTAGE: Compulsory. Requests for Pilots are to be made to the Bay of Todos os Santos Pilots' Association at Serra da Raiz Building, 5th Floor, Room 510 – Rua da Grecia 8, Tel: 242-2221 or by Channel 16 VHF-FM of the coastal radiotelephone network.

Requests must be made 2 hours in advance, specifying the time of the vessel's entry.

ANCHORAGE: The anchorage of Monte Serrat, must be used for visiting vessels and for manoeuvring. Anchorage is prohibited in the manoeuvring area and in the access channel (See chart).

The visiting areas of the Port Health Authorities, Federal Receipt and Maritime Police are those defined by a radius of one mile around the points of co-ordinates Lat. 12° 58′ 07″ S. and Long. 38° 32′ 18″ W. and Lat. 12° 55′ 56″ S. and Long. 38° 31′ 37″ W., as shown in Chart 1.102 of the National Directorate of Hydrography.

Vessels may only come alongside the berth after having been visited by the authorities. The anchorage for free pratique coincides with the waiting area for Pilots and the permitted anchorage area (i.e. the anchorage area of Monte Serrat).

MAX. SIZE: Solid Bulk Terminal: 65,000 d.w.t.

Liquid Bulk Terminal: 45,000 d.w.t.

Gas Products Terminal: 20,000 d.w.t.

HEALTH: See "Anchorage".

TUGS: Salvador tugs used.

BERTHING: To carry out operations of vessels going to the Port of Aratu and movement of their cargo and storage, the Port has specific Terminals, with an infrastructure capable of giving highly efficient operations as follows:

Cargo:

1. Solid Bulk Terminal – T.G.S.
2. Solid Bulk Terminal – T.G.S. – 2.
3. Liquid Bulk Terminal – T.G.L.
4. Gas Products Terminal – T.P.G.

Solid Bulk Cargo Terminal – T.G.S.:

Finished in 1976, commenced operations in 1977 and has a basic formation of:

A berthing pier; berthing dolphins (2) – South side; access bridge; a storage area; silos and warehouses (private); various equipments.

This terminal will also be equipped with a berth for solid bulk. Beginning of operations is expected in 1988. This dock will be equipped with a pier of approximately 175.05 m. in length; draft of 12 m. for vessels of up to 40,000 g.r.t. over which electric portico cranes and special private facilities will be installed.

The mooring dolphins will also be built with access by means of passageways from the pier. For storage and handling of bulk solids, which will be performed at this site, a complete infrastructure will be prepared on the re-fill, including highway/railway access.

Handling of aggressive and/or corrosive solid bulk products currently operated at TGS, such as sulphur and fertilizer as well as alumina, will be transferred to this pier. In addition to these products, all bulk currently handled at the Port of Salvador which, due to physical/chemical difficulties could not yet be handled at Aratu, will also be transferred to this dock.

Mooring Pier:

Constructed in reinforced concrete on pipes and with the following characteristics:

Level +4.50 m.; width 37.50 m.;, length on the North side 153.20 m., on the South side 202.60 m.; distance between dolphins 286.60 m. (on the South berth).

North Berth: Depth 10.00 m.; largest permissible vessel 100,000 g.r.t.; distance between mooring points 24 m.; max. load on mooring point 50 tons (9); cylindrical fenders, external diameter 0.80 m.×1.50 m. (12).

South Berth: Depth 11.00 m.; largest permissible vessel 100,000 g.r.t.; distance between mooring points 24 m.; max. load on mooring point 50 tons (9); cylindrical fenders, external diameter 1.20 m. × 1.50 m. (24).

Note: In a later phase, after extension, the depths will be increased as will be permitted loads.

Mooring Dolphins:

There are 2 berthing dolphins in reinforced concrete on pipes situated on the South side of the pier with the following characteristics:

Distance from axis to axis, 286.60 m.; mooring capacity 100 tons; dimensions 10 m. × 10 m.

Access Bridge:

Constructed in protected reinforced concrete with the following characteristics:

Level +4.5 m.; width 9 m., length 200 m.; load projected – Class 36.

This acts as support for the conveyor belts, pipes, electrical supply, passage of vehicles and service equipment, ambulances and fire fighting equipment.

Storage Open Area:

For storage of various solid bulk cargoes in the open air, destined for import and export, with the following characteristics:

Covered by asphalt concrete; total width 114 m.; total length 600 m.; total area 68,400 sq.m.; usable area 35,840 sq.m.; Permitted load 30 tons/sq.m.; max. static load 475,000 tons.

Note: By virtue of the diversification of solid bulk cargo moved and stored in the open air, the loads stated are subject to the action of wind and rain and special care is recommended with regard to positioning; protection and cleanliness at the storage area.

Silos and Warehouses (Private):

1. Alcan – Aluminio do Brasil Nordeste S.A.

Installations for receipt and storage of calcinated aluminium, connected to the T.G.S. transport system, and constituted basically by:

1 vertical metal Silo on a structure of reinforced concrete with top feed and discharge at the bottom through 9 outlets, capacity 10,000 cu.m.

1 conveyor belt "B10" width 48 in. and 141 m. long.

Note: Extension of these installations is planned by construction of more vertical silos.

2. Nitrofertil – Fertilizantes Nitrogenados do Nordeste S.A. Installations for receipt of urea by road vehicles and rail trucks, storage under cover and shipment connected to the transport systems of T.G.S.

and constituted basically: By a discharge station for road vehicles and railway trucks under cover and containing 4 silos and two 401–V–48 in. and 402–V–48 in. transporters, both with a capacity of 300 t.p.h.

One warehouse constructed from reinforced concrete, with 50 m. width and 200 m. long and 40,000 tons capacity, equipped with 10 dehumidifiers, 1 transporter (403–V–48 in. – 300 t.p.h.) with receipt from a moving handling unit with two outlets for stacking area, 1 Kratzer of 750 tons per hour for recovery and loading to the transporter 404–V–54 in. – 730 tons, for shipment.

One external transport complex for shipment, of 730 t.p.h., including 4 transfer points and 3 conveyor belts 405–V–54 in., 406–Va–48 in., 406–Vb–48 in.

1 weighbridge for flow purposes installed in the transporter 404–V; 1 administrative office; 1 sub-station.

3. Caraiba Metais S.A.

Installations for the receipt of copper concentrate, phosphate rock and coke, covered storage and delivery for metallurgy, through a direct duct silo and road and rail system, in the future railway silo with feed in the shed by loader and constituted basically by:

1 covered shed with 15,000 sq.m. area and storage area of 79,600 tons (concentrated copper 42,000 tons, phosphate rock 35,000 tons and coke 2,100 tons).

T.G.S. Equipment:

The installations and equipment of T.G.S. are constituted by a semi-automatic system for movement of solid bulk cargoes by three lines of operation, that is to say:

Import Line: 1. Situated on the pier there are the following installations:

1 vessel discharger unit which is mobile with a nominal capacity of 970 t.p.h. lifting capacity on the hook of 25 tons, its own weight 900 tons, maximum load in the self-carrying silo of 600 tons, which uses grabs of the 'clam shell' or 'trimmer' large capacity type, with cycles of less than 60 seconds under normal conditions and two vibratory feeders for the Bla transporter with 700 t.p.h. each. Currently there are 7 grabs ranging between 4 cu.m. and 13.5 cu.m.

2. Connecting the pier and the storage area:

1 reversible conveyor belt Blb–48 in. – 1,200 t.p.h. – 1.6 m/sec. – 442 m.

3. Situated in the storage area:

1 belt transporter B2–48 in. – 1,200 t.p.h. – 1.6 m/sec. – 247 m.

1 mobile stacker, for piling bulk solid up to a height of 10.0 m., with a capacity of 1,200 t.p.h.

The recuperation of stored merchandise for delivery to the user is performed by means of mechanical shovels with direct feeding to trucks.

Railway wagon feeding is planned for the near future.

Quantity control of bulk products is performed by means of vessel draft and/or highway scale, 60 tons capacity, installed at the Port entrance.

Average unloading capacity (production) under normal conditions is 500 t.p.h.

Factors which reduce average production:

Specific weight granulometrical and aggregation of bulk products.

Improper stowage.

Necessary clean-up of terminal between operations with different bulk products.

Improper vessels (non-bulk carrying vessels).

Export Line:

1. Situated in the storage area:

1 mobile loader fed by shovel with a capacity of 12 cu.m. with 2 vibratory feeders of 700 t.p.h. each; 1 belt transporter B3–48 in. – 1,200 t.p.h. – 1.6 m/sec. – 238 m.; 1 transfer tower B2/Blb.

2. Connecting the storage area and the pier: 1 reversible belt transporter Blb (See "Import").

3. Situated on the pier: 1 transfer tower Blb/B7; 1 belt loader B7–54 in. – 1,200 t.p.h. – 1.6 m/sec. – 19 m.; 1 transfer tower B7/BB; 1 belt transporter B8–48 in. – 1,200 t.p.h. – 1.6 m/sec. – 331 m.; 1 belt transporter B9–48 in. – 1,200 t.p.h. – 1.6 m/sec. – 81.0 m.

One mobile shiploader, with a nominal capacity of 1,200 t.p.h. and equipped with a telescopic arm which includes a lifting movement and a 54 in. belt. There is a second shiploader on the opposite side.

The recovery of cargo stored for feeding the hopper is performed by means of mechanical shovel, storage being performed either directly from dump trucks onto storage area, arranging the material by mechanical shovel for area reduction, or by means of wagon/truck unloading line which is described below.

Wagon/truck unloading line: Located in the storage area, consisting of:

1 underground wagon/truck unloading station, with 220 cu.m. silo and 2 vibratory feeders, capacity 700 t.p.h.

1 B6-48 in. conveyor belt – 1,200 t.p.h. – 1.6 m./sec. 54.0 m.

1 B2 conveyoy belt (See "Imports").

1 Stacker (See "Imports").

General comments on the T.G.S.:

Maximum specific load permitted 3.88 tons per. cu.m.

Maximum granulometry – 400 mm. diameter.

Total length of the 8 conveyors – 1,848.0 m.

Currently, the conveyor system is regulated to the primary phase, that is:

Belt velocity – 1.6 m./sec.

Maximum belt volume capacity – 1,000 cu.m. per ton.

Maximum load capacity – 1,200 t.p.h.

In addition to the equipment already mentioned, the T.G.S. has at its disposal 3 sub-stations, 1 system control house with synoptic panel and 1 control building in the storage area.

In order to perform operations, pre-established teams are assigned in advance, depending on the nature of the operation to be performed, which act within Codeba facilities.

It should be noted that in operations for private facilities (Alcan, Nitrofertil, Urea and Caraiba Metais) both the equipment and the staff from the corresponding companies should work in a synchronised manner with the Codeba equipment and staff. For this purpose, the Terminal has an interlock system for basic functions and its own telephone communications system, which reaches specific areas, using VHF radio for remaining areas.

Solid Bulk Cargo Terminal – T.G.S. – 2: Construction completed 1988. Operations commenced in 1989. The berth is equipped provisionally with a 16 ton electric portico crane. Length of berth 210 m., depth alongside 10.0 m. 2 berthing dolphins available.

Liquid Bulk Cargo Terminal – T.G.L.:

Completed in 1978, commenced operations in 1979, and is composed basically of: A berthing pier; 10 berthing dolphins; access bridge; platform; storage area (tanks); installations and equipment.

Berthing Pier: In this terminal, the berthing is defined by the dolphins which are located at the side of the operations platform.

North Berth: Depth 10.6 m.; largest cargo vessel permitted, 35,000 g.r.t./220 m. length; distance between fenders (2) 66 m.; maximum load – mooring heads – 50 tons (6); cylindrical fenders (2) – external diameter 1.20 m. × 1.50 m.

South Berth: Depth 11 m.; biggest cargo vessel permitted 25,000 g.r.t.; distance between fenders (2) 66 m.; maximum load – mooring heads – 50 tons (6); cylindrical fenders (2) – external diameter 1.20 m. × 1.50 m.

Note: Near the berth there is a slope which limits the operations there to the following:

(a) Maximum vessel length – 120 m. (394 ft.)

(b) Ships over 105 m. length must be equipped with bow thruster.

(c) Ships of more than 80 m. (262 ft.) length must be assisted by a minimum of 3 tug boats and operations must be performed under favourable sea and weather conditions.

(d) Time of manoeuvring is at the Pilot's discretion.

Mooring Dolphins:

There are 10 mooring dolphins made of concrete on pipes with the following characteristics

Dimensions 10 m. × 10 m.; maximum level +4.60 m.; mooring capacity 50 tons.

By virtue of the characteristics of the T.G.L. the dolphins are fitted with quick-release hooks to enable them, in case of necessity, to carry out prompt deberthing of the vessel.

Access Bridge:

Constructed of reinforced concrete on pipes with the following characteristics.

Level – variable +10 m.; width – 9 m.; length – 324.60 m.

Purpose – Access to the dolphins and platforms, passage for service vehicles, ambulance and fire fighting equipment.

Support – There are two series of concrete supports on the bridge, level +4.65 and +6.55 m. for support and passage of pipe-lines.

Platforms:

Platforms made of concrete on pipes.

Junction – On 3 levels with approximately 1,600 sq.m.

Pumping – On only one level with access by metal ladder with approx. 200 sq.m.

Operation – On two levels: upper level with 566 sq.m. and lower level with 2,068 sq.m.

For reasons of safety, vessels must not transmit forces to the operations platform of the T.G.L.

Storage Area (Tanks):

Due to contracts with pre-established duration, signed with companies specializing in movement and storage of liquid chemical products, tanks and miscellaneous facilities were built in addition to equipment and installations on the pier and TGL feedback, capable of guaranteeing full operation of transport and storage systems for chemical and petrochemical products from the area of their entrance, with a high degree of efficiency and operational flexibility.

Tank storage area operated by Tequimar – Terminal Quimico de Aratu S.A.

A complex of 40 tanks in carbon steel, carbon steel lined with stainless steel, some for multiple purposes and others for a specific product only which will be handled and stored within rigid guidelines of security, distributed in concrete construction ducts.

Installed capacity – with 40 tanks with 99,600 cu.m., thus:

2 tanks of 300 cu.m.; 12 tanks of 750 cu.m.; 12 tanks of 1,500 cu.m.; 8 tanks of 3,000 cu.m.; 2 tanks of 8,000 cu.m. and 4 tanks of 500 cu.m.

Dichloroethane: Pipeduct for Dichloroethane (EDC) with 35 km. length connecting the terminal to the Camacari Chemical Complex.

It is planned to increase the capacity by installation of more tanks in accordance with demand.

Tank accessories: Blanketing with N_2; heat installation with cooling serpentines; inlet and outlet valves motor-operated by remote tele-control; automatic level measuring with remote indicator; Automatic temperature measuring with remote indicator; central analogical computation system for control of stocks.

System of Loading and Unloading of Vessels:

Sleeves, 2 supports and 2 cranes for the movement of sleeves.

Pier lines with flanged connection valves.

10 pre-pumping tanks of 8 cu.m. on the pier – for sampling.

10 pre-pumping tanks of 8 cu.m. in the storage area – for sampling.

A complex of centrifugal ship-loading pumps with a nominal capacity of 250 t.p.h.

Simultaneous transfer operation in all the pier lines.

"Pig" device for internal cleansing and scraping of lines which handle various different products.

A complex of pumps, of the screw type of 60 cu.m/h. used for draining the lines, pumping of samples and other emergency operations. There are also two more pumps with a capacity of 120 cu.m./h. intended for services which require greater outlet, for example transfer of liquids from one storage tank to another.

Loading/unloading System for Truck Tankers:

The operations of loading and unloading trucks are performed on bases located on parallel lines on jetties, at the points near the tanks or group of tanks. These bases (12) compose the "islands" under which are installed the pumps which permit loading or unloading trucks on one side or the other of the bases, by means of loading arms.

All storage tanks are connected to the respective pumps.

Auxiliary Units:

There is in the port area a system of steam distribution, service air, drinking water, and nitrogen for all necessary operations and cleaning of pipe-lines in the terminal.

Drinking Water System:

A raised concrete storage tank with 15 cu.m. and one made of carbonic steel, with 500 cu.m. Feed is made by the distribution mains operated by Codeba with meters.

Steam System:

A tubular frame boiler, fed by diesel oil with a capacity of 2 t.p.h. of steam at a pressure of 6 kg./sq.cm.

The steam is intended for service stations and for cooling the Dutrex tanks and the lines with "steam-tracing".

One of the uses of steam is for the production of hot water for washing hoses. For this there are various water heating points distributed at the various points of consumption.

Compressed Air System:

The compressed air system consists of 2 (twc) compressors of the two stage type with a capacity of 160 cu.m./h. at a pressure of 7 kg./sq.cm.

It is intended for feeding service stations and its main function is the drying of hoses after washing.

Mask Air System:

The air system for breathing consists of various stations distributed within the loading areas for lorries and vessels.

Nitrogen System:

Nitrogen is stored in a pressurized tank of 17.6 kg./sq.cm. with a liquid capacity of 34 cu.m. The system with vaporiser was planned for a demand of 200 N cu.m/h., operating at a pressure of 5 kg./sq.cm.

Nitrogen is used to inert tanks which require "Blanketing". It is also used for cleaning lines and for moving the "Pigs".

Firefighting System:

The firefighting system is constituted by equipments and installations.

The water mains to combat fire using sea water through a ring of firefighting water which covers the tank area, the anchorage and those where work and administration is carried out. The capacity of the mains is 1,500 cu.m./h. being fed by 3 pumps of 500 cu.m./h. capacity each and a maximum pressure of 12 kg./sq.cm. Apart from the firefighting pumps, there is a "jockey" type pressurised pump of 50 cu.m./h. which maintains the mains continually pressurised at a pressure of 7 kg./sq.cm.

With a complex of extinguishers of CO_2 and chemical powder; a system for storage tank cooling; A system for foam firefighting; a system for fire alarm by means of local manually operated units; a system of communication of emergency by telephonic lines.

Port Services: In view of foreman type contracts signed for pre-determined durations with Codeba, Tequimar may perform foreman services on its connections and those of others. However, it is up to Codeba to inspect such services as well as to control access to berths and vessel mooring.

Installations and Equipment of Nordeste Terminais S.A.:

Nordeste Tank Storage Area:

A complex of 30 tanks in carbon steel, some for multi-purposes and others for specific products which will be operated and stored within rigid security guidelines and distributed in docks of containment made of concrete.

Installed Capacity: 16 tanks with 28,200 cu.m. and there are under construction another 14 similar tanks with a planned capacity of 6,600 cu.m.

Tanks under construction: 8 × 300 cu.m. and 6 × 700 cu.m.

The capacity planned should bring up, after all phases of construction the total storage capacity to 63,000 cu.m.

System of Loading and Unloading of Vessels:

Sleeves, 2 supports and auxiliary arms for movement of sleeves.

5 pre-pumping 1 cu.m. tanks – for sampling on the pier.

5 pre-pumping 1 cu.m. tanks in the storage area, – for sampling.

A complex of chemical centrifugal pumps for loading vessels with a nominal capacity of 204 cu.m./h.

Simultaneous transfer operation in all the pier lines.

"Pig" – device for cleaning the interior of lines which use different products.

System of Loading and Unloading Lorries:

The unloading operations of tanker vehicles are carried out in localized bases on the bridges which are nearest the tank or group of tanks in question. The bases are constituted by "islands", equipped with 80 cu.m./h. and 204 cu.m./h. pumps which enable simultaneous discharge.

The loading operations of tanker trucks is centralised in a platform for loading tanker road vehicle's point in which it will be possible to load 6 tanker lorries at a time by independent lines at each storage point.

Drinking Water System:

A raised tank made of concrete of 5 cu.m. and another one in carbon steel of 500 cu.m. Feed is made by the distribution network operated by Codeba with meters.

Steam System:

A flame-tubular boiler with a capacity of 1,000 kg./hr.

The boiler is fed by BPF, the steam is destined for heating tanks with serpentines and service stations.

Compressed Air System:

Constituted by an Atlas Copco air compressor, continuously operated and which is used for feeding the service stations, cleaning and drying sleeves and tubes.

Breathing Air System:

Consists of various stations distributed in the loading areas for lorries and vessels.

The stations are formed by batteries of fixed cylinders with hoses and individual masks.

Nitrogen System:

Nitrogen is stored in a pressurised tank 17.6 kg./sq.cm. with a liquid capacity of 27,800 litres. The nitrogen converts the inert atmosphere in the tanks which require "blanketting".

Firefighting System:

Water; foam; chemical powder.

System of Industrial Safety:

Cooling of tanks; system of alarms; systems of communication of incidents.

General Information and Recommendations:

Both the piers of T.G.L. and T.G.S. were planned so as to enable future dredging to adapt to 20 m. for berthing of large bulk carriers up to 100,000 g.r.t.

Safety in operation of vessels:

It is important that safety rules be observed during operations with ships at the terminal.

(a) Special attention must be given during berthing to ensure that the vessel is properly moored avoiding any collision with dolphins and platforms or the breaking of hoses.

(b) One bow cable and one stern cable must always be available in the event of any vessel needing to be removed in the event of fire on board or on shore.

(c) Any repairs which require cutting, welding or other services involving the usage of heat on board or on the pier must be avoided wherever possible.

Where such services are absolutely vital on board, a responsible person at the Terminal must be warned in advance so that the necessary precautions may be taken ashore.

(d) It is fairly common for bunkering to take place from barges on the offside of vessels moored at the Terminal. This practice requires certain security measures and must be avoided at all costs during the loading and discharge of the vessels.

(e) It is recommended that no movement of vessels takes place at T.G.S. whilst a tanker is mooring or unmooring at T.G.L.

(f) Both at T.G.L. and T.G.S., mooring and unmooring of vessels must only be effected with the aid of tugs in accordance with the instructions of the Port Captain.

(g) It is recommended that all vessels berth with the bow turned towards the Access Channel provided that this does not cause difficulties in ensuring a proper berthing and thus permitting a rapid departure in the case of emergencies.

(h) Deballasting operations are only possible by using the adequate installation as owned by the Terminal and which is in perfect condition for usage, together with the collection of residue and at all costs contamination and pollution of the area must be avoided.

Before commencing discharge or loading operations and after having drawn up a movement plan for the liquid product, it is obligatory to carry out a general safety inspection and of the conditions of installation including the system of communication between vessel and land and as proof of this a "Declaration of Inspection" must be drawn up on the appropriate form signed by a representative of the vessel and by the responsible person for the operation within the Terminal. One copy of this declaration must be sent to Codeba.

Gas Products Terminal – T.P.G.:

The works began in July 1980 and operations began in 1983. The terminal consists of a pier for handling of liquefied gases, including only one mooring berth. The terminal is basically composed of:

Operations platform
Landing and mooring dolphins (6)
Access bridge
Access jetty
Storage area/facilities and equipment

Operations Platform:

Platform is reinforced concrete supported by tubes of reinforced concrete supported by tubes of reinforced concrete of 100 cm. diameter connected to the coast on the one hand by a land connection and by a bridge. It is protected by impact from the vessels by mooring dolphins – one at each end.

The platform will support the structures for the loading arms, tubes, pumps, auxiliary crane, the foam storage tank, the emergency gangway and operation and control buildings.

Main characteristics: area – 33 m. × 20 m. = 660 sq.m.; level – +4.50 m.; depth of the project – 10.9 m.; permitted vessel size – 20,000 g.r.t. length 180 m.

Mooring Dolphins:

The two mooring dolphins consist of a block of reinforced concrete of 18 m. × 10 m. × 1.80 m. supported by 6 concrete tubes 120 cm. diameter.

Each one of the 4 dolphins consists of a block of concrete 10 m.×10 m.×1.5 m. supported by 4 tubes of 120 cm. diameter.

All the dolphins are equipped with 10 mooring hooks of 50 tons each of the quick release type.

Each of the mooring dolphins will be equipped with 3 fenders made of rubber and in a cylindrical shape with a diameter of 60 cm. × 150 cm.

The mooring dolphins will be accessible by 4 concrete gangways and 4 metal ladders on the sea side.

Access Bridge:

The access bridge consists of a superstructure made of reinforced concrete supported by reinforced tubes of 100 cm. diameter.

Access Dock:

The access dock is built of hard stone which is resistant to sea water. The land connection and the access bridge will carry the necessary ducts and piping and the access path arranged for 2 lines of traffic, thus admitting free access for vehicles. The control of access to the pier to persons and vehicles will be the responsibility of Codeba.

Tank Park and Facilities of Terminal de Gases Ltda. – TEGAL

Tanking Park:

1 cryogen tank destined to storing ethene at 106° Centigrade and 15,000 cu.m. capacity.

Refrigerated sphere tank for butadiene at – 45° Centigrade and 3,200 cu.m. capacity.

1 sphere tank for MVC at ambient temperature. Capacity for 3,200 cu.m.

System of pumps. Flow: 250 cu.m./hr.

4 "islands" for trucks loading/unloading.

Flanged nets to connect land pipeducts.

Crane to move nets.

4 additional tanks (total capacity 18,200 cu.m.) available.

Tank Accessories:

Automatic level measuring.

Automatic temperature measuring.

Thermal insulation of lines.

Tegal complementary facilities:

Nitrogen System

N_2 is stored in pressurized tanks at 17.6 kg/sq.cm., with net capacity of 34 cu.m. Compressed air, potable water and steam are supplied by Tequimar through interconnecting lines.

Fire Defense System:

Water supply is made by Tequimar.

Other Facilities:

Control Room. Room for JPG pier operators.

Fertilizantes Nitrogenados do Nordeste, SA – Nitrofertil

This company has at TPG, complete facilities for the operation with Ammonia, which includes a sphere/reservoir with 30,000 cu.m. capacity.

PORT EQUIPMENT: The port has 3 loading shovels of 3 cu.m., 1 mobile crane up to 20 tons, 1 front stacker of 3.2 tons, 1 agricultural tractor, 1 bob cat tractor, 2 fast action fire fighting trucks, 1 pump and tank truck for fire fighting.

FRESH WATER: Small quantities available.

FUEL: This is done by lighter and only at the solid bulk cargo terminal (T.G.S.).

CONSULS: See "Salvador".

REPAIRS: There is a workshop under construction.

DRY DOCK: There is a naval dry dock in Aratu capable of handling vessels up to 45,000 d.w.t. It has dimensions 230 m. by 30 m. wide. Depth 11.5 m. However, the access channel will only allow vessels of up to 10 m. draft, though this is expected to be increased shortly.

AIRPORT: 2nd of July Airport at Salvador, 43 km. from the port.

TIME: GMT minus 3 hours.

HOLIDAYS: *National:* 1st January, 21st April, 1st May, 7th September, 15th November, 25th December.

Municipal: Fixed: 2nd February, 14th August. Movable: Good Friday.

Traditional: Movable: Carnival – Tuesday (Mardi Gras) and Ash Wednesday – Corpus Christi.

Fixed: St. John (June 24th), July 2nd, November 2nd.

GENERAL: *Useful Addresses:*

1. Terminal of Madre de Deus – Temadre. Baia de Todos os Santos. Products handled: oil and derivatives. Tel: 801-1821.

2. Dow Chemical Terminal – Baia de Todos os Santos. Products handled: chemical products. Tel: 801-1011 and 801-2211.

3. Terminal of Usina Siderurgica da Bahia – Usiba. Baia de Todos os Santos. Products handled: bulk ore. Tel: 594-8311.

4. Terminal of Fabica de Cimento Aratu. Baia de Todos os Santos. Products handled: cement and limestone. Tel: 594-9488.

5. Terminal of Equipetrol. Baia de Todos os Santos. Products handled: pre-inspection of rig structures. Tel: 594-8811.

6. Sao Roque Terminal (Petrobras). Estuary of the Paraguassu River. Products handled: rig parts and structures for oil drilling. Tel: 242-7997 and 242-7797.

7. Terminal of IMBASA – Industria de Mamona da Bahia, S.A. Baia de Todos os Santos. Products handled: vegetable oil (castor oil). Tel: 594-9133 and 594-9386.

AUTHORITY: Cia. das Docas do Esta do da Bahia – CODEBA, Av: da Franca – S/No., Estacao Maritima, Municipio de Candeias, Estado da Bahia – Cep 43700 Brazil. *Tel:* (071) 243 – 5066. *Telex:* (071) 1110. *FAX:* (071) 241 6712. *Contact:* Dr. Osvaldo C. Magalhaes.

AREIA BRANCA (Salineiro Terminal):

04.50 S. 37.03 W. **(See Plan)**

LOCATION: In open sea 14 km. out from the continent, near to the town of Areia Branca.

CLEARANCE: The Health Authorities of the Port and the Federal Police do not have representatives in the town of Areia Branca. Therefore, in the event of there being a necessity, the ship's Agent must communicate, sufficiently in advance, with the Port Authorities of Natal, when representatives will be sent to Areia Branca, to carry out vessel inspections.

Addresses and telephones of Port Authorities:

Port Captaincy Agency – Rua Joao Felix, 12 – Areia Branca. Telephone: 332-2211.

Maritime Work Post – At the top of the CP-RN Agency Building at Areia Branca. An Advocate is employed with duties and representation at Areia Branca, in the Maritime Work Delegation – Telephone 332-2022.

Federal Customs in Areia Branca: Telephones: 332-2425 and 332-2426.

APPROACHES: Access to the Terminal: The access to the terminal for vessels of medium tonnage is made by a channel 13 m. depth (length 15 km., width 1.2 km.) at minimum level. This channel goes to the mooring point from Joao da Cunha Reef.

Manoeuvring Basin: Length 2 km., depth of water 11 m., at minimum water level.

Lighting and Buoys: The lighting and buoys are as follows: One light buoy at the beginning of the access channel; along this channel and in the manoeuvring basin are distributed a further 10 unlit buoys.

Tidal Variation: From 0.10 m. to 3.90 m.

PILOTAGE: Pilotage is obligatory, from the pilotage anchorage to any point in the Port area for vessels of more than 2,000 g.r.t. Pilots must be requested by radio, through the Agencia Maritima Ltd, Rua Cel. Aureliano, 37, P.O.Box 138, Tel: 222-1449 – or, at Rua Cel. Fausto No. 481, Tel: 332-2001 and 332-2011 at Areia Branca. Contacts must be maintained with the Marine Agency with regard to the taking on of Pilots and this must be done a minimum of 10 hours in advance of the arrival of the Pilot at the point of embarkation by virtue of the distance between the town and the point of embarkation and the dependency upon the tide.

ANCHORAGES:

(a) For vessels of any g.r.t., awaiting berthing orders or awaiting repairs – between parallels 04° 49′ 18″ S. – 04° 49′ 48″ S. and meridians 37° 02′ 54″ W. – 37° 03′ 48″ W.

(b) For vessels in quarantine – As above.

(c) For pleasure craft – between parallels 04°54′00″ S. – 04°54′18″ S. and meridians 37° 07′ 24″ W. – 37° 08′ 12″ W. (Inner Area).

(d) In the event that the Island Port is not working, due to damage to its equipment, the anchorages mentioned above will be used where the vessels will receive salt directly from barges.

(1) Inner Area – Limits mentioned in (c) can be used with safety by vessels drawing up to 12 ft. of water.

(2) Outside Area – between parallels 04° 51′ 12″ S. – 04° 52′ 00″ S. and meridians 37° 04′ 00″ W. – 37° 05′ 12″ W. can be used with safety by vessels drawing up to 22 ft. of water.

(e) Restrictions: Anchoring is not permitted in the access channel nor in the manoeuvring area.

Also see "Berthing".

RESTRICTIONS: No night navigation.

Vessels not directly concerned with port operations, must travel at a minimum distance of 1,000 yards off the Island Port berthing dolphins.

TUGS: 2×1,680 h.p., 20 tons bollard pull.

Normally there is no need for tugs for berthing or for unberthing except in the case of damage to machinery or when the action of the wind is sufficiently strong to throw the vessel against the dolphins (winds from the sector S.E. – S.W.), in which case the following regulations must be observed: vessels up to 10,000 g.r.t. must use 1 tug, in the event of the wind intensity being less than 25 knots, and 2 tugs if the wind intensity is greater than that level. Vessels over 10,000 g.r.t. must use 2 tugs, but it is not advisable to try to berth or unberth with winds greater than 25 knots.

BERTHING: *Manoeuvring Area:* This is a strip 400 m. long in front of the dolphins, between the meridians 37° 02′ 24″ W. – 37° 02′ 54″ W. Depth: from 12 m. to 23 m. It is expressly prohibited to anchor anywhere in this area which is reserved for berthing and unberthing operations.

Island Port Resources:

Berthing Quay

(1) For vessels:

Constituted by 3 dolphins, each with a mooring head and a hook. Distance between the end dolphins, 78.6 m. The system of berthing is completed by 3 buoys. Depth: 12 m.

Vessels berth port side to on 3 dolphins, using starboard anchor and moored to 3 buoys.

(2) For Barges:

Situated on the S.W. side of the artificial island there is a 195 m. long quay, for berthing barges. Depth: 6 m.

River Mossoro:

For vessels with less than 3.5 m. draft, dependent on the tide, entering or leaving the town of Areia Branca, there is a deviation due to the previously used channel being silted up, which makes it obligatory to have help from the local Pilots.

BULK CARGO FACILITIES: Cranes/Stackers/Rolling Bridges/Loaders/Suction Units:

The salt is transported from the storage area on the Island Port to the vessel's hold by means of a conveyor working at a speed of 1,500 t.p.h. At the end of the conveyor there is a rotary loader, supported on one side on a pivot on a metal transfer tower platform and on the other by a curved track structure. The loader permits only rotary movement (sector of 17°–22°) with also axial displacement and rise (with a range of 39 m.) which makes it possible to load two different vessel holds when necessary.

Transport Along the Quay:

The salt is unloaded from barges moored on the quay on the S.W. face of the island by 2 jib cranes, rolling bridge type, moving on a railway line and equipped with clam shell grabs, with nominal capacity each, of 350 t.p.h., connected with weighbridges, hoppers and mats for formation of piles. It is possible to discharge the salt directly in the piles (storage area) or into the equipment which forms them, or even directly into the loading mat which makes it possible in this case to effect direct transfer of the salt into the vessels.

The salt in the storage area is also moved by 2 loading shovels with a nominal capacity of 680 t.p.h. and 3 tractors.

Pontoons/Barges/Launches/Lighters:

The Rio Grande do Norte Docks Company (CODERN) has 5 self-propelled 452 h.p. barges with a capacity for transporting 520 tons of salt each, as well as 5 dumb barges with a capacity for transporting salt from Areia Branca and Macau to the Island Port.

The SOPORMAR (Maritime & Port Services Company) has 6 barges in operation between Macau, Areia Branca and the Island Port.

STEVEDORES: On working days, Sundays and holidays, the working timetable is as follows:

Day Period

0700 to 1100 – Normal Day
1100 to 1200 – Meal Break
1200 to 1600 – Normal Day
1600 to 1800 – Possible Overtime
1800 to 1900 – Meal Break

Night Period

1900 to 2300 – Normal Night
2300 to 0000 – Meal Break
0000 to 0400 – Possible Overtime
0400 to 0600 – Only to finish vessel
0600 to 0700 – Meal Break

Stevedores are carried out to the Island Port aboard launches which are hired by the ship's Agent. The journey from Areia Branca to the Island Port is made normally in a maximum of 2 hours. The time launches leave depends on the tide, by virtue of the limitations of the bar of the River Mossoro.

SPECIALISED CARGO HANDLING FACILITIES: No facilities for container or Ro/Ro traffic.

MEDICAL: In the Island Port, there is an infirmary for first aid treatment, where there is always a nurse on duty. There is no doctor on duty. Nearest hospital is at Mossmoro, 50 km. away.

FRESH WATER: In the Island Port there is an artesian well which permits a supply of water to berthed vessels via a pipe-line in the metallic structure at the berth. Capacity: 50,000 litres/hour. From the end of the pipe, supply is effected by means of 2.5 in. hoses.

FUEL: Supply of diesel oil to vessels is possible through the self-propelled barges of the Rio Grande do Norte Docks Company (CODERN). Supply will be made preferably with the vessel anchored. Each barge has a capacity to supply up to 20,000 litres of diesel oil. Orders must be made 48 hours minimum in advance in order that the Rio Grande do Norte Docks Company (CODERN) can take the necessary steps for topping up the tanks at the Island Port.

REPAIRS: Active shipyard authorised by SUNAMAM to construct vessels up to 1,000 tons gross carrying weight. They also carry out naval repairs and have workshops and underwater repair facilities.

The Salineiro Terminal has a workshop capable of carrying out small repairs.

EMERGENCY SERVICES: The Salineiro Terminal has 2 tugs used in port operations and which can be used in a situation of emergency in life saving and salvage operations. There is no organised service.

GANGWAY/DECK WATCHMEN: The Rio Grande do Norte Docks Company (CODERN) has a group of watchmen, 25 strong, which works between the Island Port and the office in Areia Branca, there always being a minimum of 6 at the Island Port.

AIRPORT: Nearest at Natal and Fortaleza, 300 km. distant, served by commercial flights.

TIME: GMT minus 3 hours.

HOLIDAYS: National: 19th January, 21st April, 1st May, 7th September, 12th October, 15th November and 25th December.

Movable Holidays: Monday and Tuesday of Carnival, Ash Wednesday, Good Friday and Corpus Christi.

Commemorative Days: 28th August (Banks), 28th October (Public Officials), 30th October (Business), 2nd November (All Saints), 28th January (Port Workers).

Municipal Holidays: 6th January (Foundation of the City), 21st November (City of Natal Celebration), 15th August (City of Areia Branca Celebration).

Local Holidays: 15th August – Our Lady of the Mariners; 8th December – Immaculate Conception.

POLICE: Tel: 332-2057.

TELEPHONES: No facilities exist for placing telephones on board vessels.

GENERAL: *Charts:* DHN Nos. 703 and 720 cover the port area.

AUTHORITY: Companhia Docas do Rio Grande do Norte, Rua Princesa Isabel 342, 59000, Natal, RN. *Tel:* (084) 222 3774 PABX. *Telex:* (084) 2114.

Local Office at Salineiro Terminal: Cais Tertuliano Fernandes 81, 59620, Areia Branca, RN. *Tel:* (084) 332 2121 PABX. *Contact:* Heinz Zech, Director.

BARRA DO RIACHO (Portocel): 19.50 S. 40.03 W.

(See Plan)

LOCATION: Situated in Praia das Conchas, Portocel, the specialised Terminal of Barra do Riacho, is part of the municipal district of Aracruz, in the North of the State of Espirito Santo, 30 nautical miles from the Port of Vitoria, whose jurisdiction it is under.

Position: Lat. 19° 50′ 15″ N., Long. 40° 03′ W.

Description: Portocel, a private terminal belonging to Aracruz Celulose SA and Celulose Nipo-Brasileira SA – CENIBRA, specialises in the handling of woodpulp and the discharge of salt, wood and sulphur to both mills.

The Terminal consists of the following components:

2 breakwaters for protection.
A berth of 230 m. length.
A closed warehouse with an area of 12,100 sq.m.
An open warehouse with an area of 3,000 sq.m.
Administrative offices.

PILOTAGE: As pilotage is compulsory to and from the Terminal, Pilots must be requested 6 hours in advance from Vitoria, where 12 Pilots are stationed. Pilots come to the Terminal by road, a journey time of 1 hour and 30 minutes.

Pilotage area extends from the pilot receiving place at Lat. 19° 50′ 30″ S., Long. 40° 02′ 00″ W. to the berthing area.

ANCHORAGE: *Outer Anchorage Area:* Ships must anchor in a circular diameter situated approximately 2 miles East of the port entrance. Its centre point is at the coordinates: Lat. 19° 50′ 30″ S., Long. 40° 02′ 00″ W., with a basically sandy bottom and a depth of 20 m.

Prohibited Anchorage: According to Nautical Chart No. 1420, anchorage is prohibited in the area near the South side breakwater and near Aracruz's submarine pipeline.

APPROACH: The Aracruz mill, which stands approximately 1 mile inland, is very prominent from seaward and can be seen from a distance of 20 miles, giving an excellent radar response.

The maritime access to the Terminal is shown on Nautical Chart No. 67-1420, issued by DHN.

Approach Channel: The approach channel to the Terminal is on a heading of 065°, and is approximately 150 m. wide and 670 m. long. This distance is measured from the buoys to the opening between the breakwaters.

The depth varies from a maximum of 13.5 m. to a minimum of 12.0 m. The channel is marked by light buoys No. 1 and No. 2 and breakwater lights.

Buoys: There are 2 buoys placed at the approach channel entrance, two lights on the breakwaters' heads, two light buoys installed along the turning basin contour, two lights along the berthing area border, two alignment lights located in Praia das Conchas and two lights on the quay extremity.

Breakwaters: The protection against wave action is provided by 2 breakwaters; one on the North side and the other on the South side.

The Northern breakwater was constructed with 160,000 cu.m. of rubble mound, distributed along 3 stretches with a total length of 850 m. This breakwater extends Easterly for 150 m. curving, Southward for 430 m. and finally stretching North-South for 270 m.

The Southern breakwater is also composed of 3 stretches extending Eastward for 685 m., then bending Northward for 288 m. The final stretch is inclined 4° Northward for 447 m. The Southern breakwater is 1,420 m. long and was constructed with 680,000 cu.m. of rubble mound.

The breakwater layout does not cause additional difficulties to the entry to or departure from the Terminal.

Turning Basin: The turning basin is placed in the protected area provided by the breakwaters. Its diameter is 360 m. with a depth of 11.8 m.

MAX. SIZE: *Agent's Advice to Master (December 1995):*

Drafts at Portocel are as follows:

Berthing	*Low Tide* (m.)	*High Tide* (m.)	*Max. LOA* (m.)
Turning Bay	09.00	10.00	200
No turning	09.00	10.40	190
No turning	09.00	10.40	190 – 200
Unberthing:			
Turning Bay	09.00	10.00	200
No turning	10.00	11.00	200

Depth along the quay is 11.80 m. (Master reports that vessel sounded around at L.W. and found a least depth of 11.2 m. Other soundings ranged from 11.5 m. to 12.0 m.).

VHF: Contact is made with Vitoria on Channel 11, and stand-by Channel 16 for calls on a 24 hour basis. The radio communication with Portocel can also be made on Channels 10 or 12.

TUGS: Tugs used in ship's manoeuvre must be requested from Vitoria, from where they will take 3.5 hours to arrive at the Terminal.

The tugs, 13 in all, are equipped with 1,500 h.p. – 2,800 h.p. engines. Requirements are shown below:

Turning after Ship Entrance:

Draft	No. of Tugs
under 30 ft.	2
over 30 ft.	3 (one being Schotell)

Turning or not before Leaving: 2 tugs required.

BERTHING: The Terminal offers one berth of 230 m. length. It is paved with 2 m. × 2 m. steel reinforced concrete squares of 0.12 cm. thickness, and can receive ships of up to 45,000 d.w.t. It is an open piled structure with a platform 22 m. wide, dredged at 11.8 m. (Also see "Max. Size").

Near the quay front face are 8 bollards with a capacity of 100 tons each, spaced at 25 m. and 32 m. alternately.

The quay front is also provided with pneumatic fenders placed at alternated distances of 12.5 m. and 16.3 m.

Storage: Warehouse No. 1: Located at the back of the quay, 168 m. long and 72 m. wide, with a storage capacity of 40,000 tons of woodpulp, in an area of 12,100 sq.m.

Warehouse No. 2: Situated between the entrance gate and Warehouse No. 1, a metal structure with an area of 3,000 sq.m. to store woodpulp from Cenibra.

Salt Stockyard: Located near the North side breakwater is the stockyard for the storage of Cenibra's salt. It has a capacity to store 10,000 tons of bulk salt.

Equipment: As the Terminal is not equipped for cargo transshipment, this operation is handled by the ship's gear.

The discharge and handling operations from Aracruz's woodpulp trucks and Cenibra's rail wagons, as well as the stocking and cargo transport to the ship's side, is done by forklifts. Presently, there are 25 Hyster and 2 Clark forklifts in operation.

CRANES: Not available.

MEDICAL: Hospitals in Vitoria and Aracruz.

FRESH WATER: A water supply of 100 cu.m. per day is provided by Aracruz Celulose SA, by means of a 3 in. diameter pipeline.

The water is stored in a cistern with a capacity of 200 cu.m., situated under the utility building. The water is then pumped to an elevated reservoir with a capacity of 110 cu.m. on the N.E. border of the same building.

2×6 in. diameter lines leave the elevated reservoir to supply water to the administrative area and the pressurised fire control system. A 6 in. diameter cold water line runs parallel, approximately 240 m. to the front face of the quay.

REPAIRS: No facilities.

AIRPORT: At Vitoria.

TIME: GMT minus 3 hours in Winter. GMT minus 2 hours in Summer from 20th November until 20th February.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: The seaman's club is situated in the town.

CURRENCY: Brazilian Cruzeiro.

WEATHER/WIND/TIDE: *Rainfall:* The mean annual rainfall is 1,400 mm. in the area of the Terminal.

During the rainy months of November to January, the monthly average is 200 mm., with December having the highest rainfall indicators.

June and July are dry months, with precipitation averaging 25 mm. – 45 mm./month, totalling approximately 10 rainy days during the two months.

Fog: The period in which fog can occur is September to January. The medium registers, however, for those months are below the value of 6 on a scale of 0 – 10, not causing any serious difficulty to navigation, the ship's access or port operations.

Winds: During the Summer, the predominant wind is Northeasterly, and in the Winter Southwesterly and Northwesterly. Velocities registered during the year seldom affect the ship's manoeuvring and operation.

Tides: Tides in Barra do Riacho have semi-diurnal characteristics, with the following values according to Diretoria de Hidrografia e Navegacao – DHN, from the Ministry of Naval Affairs.

MHWS (Mean High Water Spring): 148.36 cm.
MHWN (Mean High Water Neap): 103.73 cm.
MLWS (Mean Low Water Spring): 13.12 cm.
HWF&C (High Water Full and Change): 11 hours 59 minutes.

Flow: The tidal flow presents a low velocity pattern in the area, and according to measurements taken in Aracruz, do not exceed values above 0.1 m./sec. These measurements, however, indicate a corelation between wind × velocity and flow direction on the surface.

The flow velocity distribution, according to the measurements taken and the corelation between flow × wind, is:

0.25 m./sec.: exceeded velocity in 75 days/year.
0.40 m./sec.: exceeded velocity in 20 days/year.
0.50 m./sec.: exceeded velocity in 5 days/year.
0.60 m./sec.: exceeded veolcity in 1 day/year.

Due to this corelation, the Southerly flows predominate from December to March, and the Northerly flows from June to September.

The flow velocities at Portocel do not reach values that cause difficulty to shipping traffic in the area.

GENERAL: *Access:* By Road: The Terminal can be accessed by way of a paved road of 1.8 km., which also links the port to the mill of Aracruz Celulose.

This access intersects with the ES-010 highway, connecting the port to the municipal and federal transport system of the State of Espirito Santo. The Terminal is, therefore, linked to the State capital, Vitoria, and to the other economical centres of the country.

Travelling South from the Terminal, the ES-010 crosses the Summer resorts of Santa Cruz, Nova Almeida, Jacaraipe, Manguinhos and finally arriving in Vitoria, a total distance of 70 km.

Road access is also possible via the ES-257, which intersects with the BR-101, passing through the municipalities of Aracruz and Ibiracu, and on to Vitoria, 100 km. to the South.

By Rail: Rail access is available through a branch line of 46 km. from the Piraque-Acu Station, near Jooo Neiva. Here, the line connects with the main Vitoria/Itabira Estrada de Ferro Vitoria-Minas – EFVM – line, 75 km., from Vitoria, integrating it with the Companhia Vale do Rio Doce (CVRD) railway system.

Main manoeuvres take place at the marshalling yard located 4 km. from the Terminal.

Weather Station: The Terminal is equipped with a compact weather station (Davis Instruments – Weatherlink) which consists of a pluviometer, an anemometer and a thermometer, all of which are linked to a computer permitting the control of weather registers.

Security: Portocel offers complete 24 hour security service in and around the installation, as well as at main points of entry and exit.

Auxiliary Buildings: Situated 150 m. behind Warehouse No. 1 is the administrative area, the restaurant, garage and workshop, forming just one building. This internal service building is a single story building with a vaulted cover that extends over an area of 1,600 sq.m.

Administrative Buildings: The administrative section is situated in a reserved area of 600 sq.m., in the centre of the internal services building. This section houses 16 offices, WCs, dressing room, auditorium and a storehouse, as well as facilities for Customs Officers.

Restaurant: To serve port employees, a restaurant with an area of 54 sq.m., is situated on the North side of the internal services building. Adjacent to the restaurant is a snack bar of 20 sq.m.

Workshop and Garage: Next to the administrative section is a workshop and garage which is used exclusively for the maintenance and repair of port equipment.

DEVELOPMENTS:

The berth is to be dredged to 12.50 m.

The access channel is to be dredged to 13.50 m.

The quay is to be extended by 200 m.

A warehouse with capacity of 45,000 tonnes of cellulose bales is to be built on the quay extension.

AUTHORITY: Portocel-Terminal Especializado de Barra do Riacho s/a, Caminho de Barra do Riacho s/n, Barra do Riacho-Aracruz, Espirito Santo, Brazil CEP 29.197-000. *Tel:* (027) 270-4422. *Telex:* (027) 3244. *FAX:* (027) 270-4433. *Contact:* Osmar Luis Rebelo de Oliveira, Diretor-Superintendente. Mario Luis Martins de Almeida, Operations Manager.

AGENT: See "Vitoria".

BELEM: 01.28 S. 48.29 W. (See Plan)

PORT LIMITS: Subject to Charter Party Terms, vessel normally considered an "arrived ship" when at Val-de-Caes Anchorage, Icoaraci Anchorage, or alongside the quay.

DOCUMENTS: See "General" before first port.

APPROACHES: The port is located on the right-hand side of the Bay of Guajara, running North/South, limited to the left by the island of Oncas 19 km. long and other similar islands which are in front of the River Para, with 3 wide entry channels being provided i.e.

1. Between the bar and the island of Fortim used by deep sea vessels and large coasters.

2. Between the islands of Arapiranga and Cotijuba which is used by small coasters and the typical local river craft known as "gaiolas".

3. The Carnapijo Channel behind the island of Oncas which provides communication at high tide with the Bay of Marajo which measures from between 3,200 m. and 4,000 m. long in front of the island of Oncas with a shallow which divides it in the middle into two channels, one to the West with 12 m. to 20 m. depth at the foot of the above island and the other to the East next to the city and where the current port is located with 9 m. to 10 m. depth minimum water level when dredged. Comprehensive considerations make it that this latter channel to the East deserves special studies which allow the following details to be presented:

Length	6,000 m.
Width	90 m. to 180 m.
Depth	6 m.
Average annual siltation	600,000 cu.m.

The Turning Basin: The port has a wide turning basin 500 m. long, 500 m. wide with a depth of water between 5 m. – 6 m., an annual siltation of 400,000 cu.m., fully equipped with buoys and lights under the control of the Technical Council of the Directorate of Hydrography and Navigation of the Brazilian Navy.

PILOTAGE: Pilot usually ordered through vessel's Belem Agent, ETA at least 72 hours in advance and confirming not less than 24 hours prior to arrival. Vessels can apply direct to Pilot Station (on condition that local radio station is operating). Telegraphic address "Praticagem – Salinopolis", and call sign of Salinopolis (or Salinas) Radio Station is PPL. Pilot boards at a point 7 miles North of Salinas Lighthouse; a red motor-launch is used. Launch carries a red flag with a black P; it also has a black P painted on each side and on cabin roof. If pilot boat not in position on arrival of vessel, position 7 miles North of the light is a safe anchorage. Masters who do not know area should approach Salinas with caution. Also see "Radio".

ANCHORAGE: Vessels with a draft greater than 26 ft. anchor off Icoaraci, 7 miles from the port where they work cargo.

Vessels that are impounded anchor off Val-de-Caes.

Vessels undergoing repairs anchor off the Naval base dock at Val-de-Caes.

Vessels with a draft of less than 26 ft. anchor at Val-de-Caes. Co-ordinates: Lat. 01° 24′ 01″ S., Long. 48° 30′ W.; Lat. 01° 21′ 03″ S., Long. 48° 29′ 03″ W. and Lat. 01° 08′ 09″ S., Long. 48° 28′ 03″ W.

Between Icoaraci and Val-de-Caes, there is a shallow spot at Tapana, which ships should approach with caution, although bottom is soft mud and sand.

HEALTH: Maritime Police, Customs and Port Health board vessel on arrival at whichever anchorage is used, or alongside. Pratique granted on the presentation of documents. If port *not* first Brazilian port of call. Port Health Authorities not required, although Police and Customs will still board. After first Brazilian port, Port Health only required in cases of illness or death. The use of quarantine "Q" flag not necessary. Also see "General" before first port.

RADIO: Salinopolis Pilot Station on VHF Channel 16, working on Channel 11. Suggested that ship contacts Belem Agent through Barbados Radio, and this is also usual way that vessels are contacted by Belem. An alternative to Barbados Radio is the United States radio station at Chatham, Virginia.

TUGS: One tug, "Rio Acara", 700 h.p.

BERTHING: The quays are of cement and sand construction on a base of stones, which is, in turn, on a bed of hard clay. The quay height is a max. of +4.50 m. to accommodate the max. tidal rise of up to +3.20 m.

Soundings taken in 1979, for vessels alongside in relation to the hydrographic zero of the port are as follows:

Length of quay (m.)	*Depth* (m.)	*Location*
75	2.5	S. face and N. face of Marechal Hermes Dock
300	3.5 to 5.0	Quay wall – Mosqueiro & Soure Shed and Warehouses 1 and 2.
342	6.3 to 7.0	Quay wall – Warehouse 3, Maua Square and Warehouse 4.
385	6.7 to 7.5	Quay wall – Warehouses 5, 6 and 7.
100	8	Quay wall – Warehouse 8
261	7.5 to 8.5	Quay wall – Warehouses 11 and 12.
110	8.0 to 9.2	Quay wall – Ocrim Silo to the end of the Wall.

Quay Equipment: 25 electric cranes (3.2 – 12.5 tons), 4 mobile cranes on pneumatic tyres (5 – 25 tons) and 1 self propelled floating crane of 200 tons capacity. There are facilities for handling containers.

74 fork lifts (capacity 2,500 kg. – 25,000 kg.), 4 pick-ups, 3 trucks, 4 conveyor belts, 14 weighbridges (1.5 tons – 60 tons) and 4,000 pallets.

STEVEDORES: Stevedoring gangs for day shifts 0630 and 1230 hrs. and 1630 hrs. for night shift. Loading and discharging rates exceptionally good, particularly if vessel working at anchorages into lighters. Any delays to vessels alongside can usually be put down to the lack of official clearances in case of loading export cargo.

MEDICAL: Notice of required medical assistance should always be given in advance. There are a number of first-aid posts for minor complaints. Vaccination Certificates for smallpox are essential, and, although not required officially, yellow fever vaccinations recommended.

CARGO FACILITIES: 3 regular silos for grain, with a capacity of some 10,800 cu.m. 2 irregular silos with a capacity of 1,537 cu.m. Average hourly discharge rate 200 tons.

For grain suction there are 2 fixed towers, capacity 100 t.p.h. and 40 t.p.h. and 1 mobile tower with capacity 60 t.p.h.

The suction unit for 100 t.p.h. has the following characteristics: 1 mobile pneumatic suction tower for 100 t.p.h., 65 m. belt transporter of the elevated type with 200 t.p.h. capacity, including 2 end stations for drive of 40 h.p. each; 1 bucket-type elevator with 200 t.p.h. capacity, a height of 64 m., including an end drive station of 75 h.p.; 1 weighing tower with 200 t.p.h. capacity.

TANKERS: At oil terminal of Miramar (Val-de-Caes) 8 km. from Belem, vessels of 18,000 d.w.t. old "T" berth, length 76 m. may berth or unberth at any state of the tide, subject to draft. Max. depth alongside berth at LW 26 ft., the same as that of approach channel. Mooring at this berth is to buoys inside the line of the "T" jetty. 77 tanks for liquid fuel leased to Petrobras, Sabba, Texaco, Esso, Atlantic, Salgema, Tropigas and Paragas.

New Berth: Close South of "T" shaped berth. Length of platform 40 m. Vessels moor to 4 dolphins. Berth equipped with 5 ton s.w.l. hand operated winches.

DENSITY: Strong outflow of Amazon and its tributaries is such that water at Salinas is only semi-salt. In the river itself, the water becomes slightly brackish, and half way to Belem, is absolutely fresh.

FRESH WATER: Fresh water only obtainable alongside main quay, and not at oil berth. Delivery rate 25 t.p.h. (2.5 in. line). Boiler water may be taken direct from the river at a point named Capim, near the entrance to Marajo Bay.

FUEL: See "General" before first port. Available, but due to Brazilian Custom's Laws, as much advance notice as possible should be given in order to obtain correct documentation. A minimum of 1 weeks' notice recommended.

CONSULS: Argentina, Belgium, Bolivia, Colombia, Costa Rica, Denmark, Dominican Republic, France, Great Britain, Italy, Japan, Mexico, Netherlands, Norway, Peru, Portugal, Spain, Sweden, United States, Venezuela.

REPAIRS: Deck and engine repairs of all types can be carried out by the Brazilian Naval Dockyard.

DRY DOCKS: At Naval Base, there is a dry dock measuring 730 ft. by 74 ft. with a depth over the sill of 25 ft. There are also several small floating docks, but they are not adequate for sea-going vessels.

GANGWAY/DECK WATCHMEN: The employment of gangway watchmen recommended.

HATCHES: Hatches normally opened and closed by stevedores, but if it is raining they are inclined to shelter before closing.

CUSTOMS ALLOWANCES: Custom's Authorities do not normally search ship's crews, and reasonable quantity can remain in the possession of crew members. However, no attempt should be made to take more than a reasonable amount ashore.

REPATRIATION: There are 4 weekly international flights leaving for Miami, Caiena and Paramaribo, plus daily flights to Rio de Janeiro, Sao Paulo and other Brazilian cities, including Recife.

TIME: Local time GMT minus 3 hours. Summertime (1st December – 28th February) GMT minus 2 hours.

HOLIDAYS: New Year (January 1st); Carnival (variable Feb/March); Holy Friday (April 17th); Tiradentes (April 21st); Labour Day (May 1st); Corpus Christi (June 18th); Independance Day (September 7th); N.S. Aparecida (October 12th); All Saints (November 2nd); Proclamations of the Republic (November 15th); and Christmas (December 25th).

POLICE/AMBULANCE/FIRE: Maritime Police Tel: 234996; Ambulance Tel: 222523; Fire Brigade Tel: 23-3119.

TELEPHONES: Telephones can be put on board vessels alongside main quay.

IDENTITY CARDS: Foreign crew members not permitted to go ashore without presentation of identity card on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police who will return it to the crew member on re-embarkation.

GARBAGE DISPOSAL: The port administration provides for garbage collection.

WASTE OIL DISPOSAL: The shipowner's representative provides for waste oil collection.

SEAMAN'S CLUBS: There is no seaman's club operating at the port.

CURRENCY: Brazilian currency is "Cruzeiro Real" (CRS).

GENERAL: Tidal action in the Guajara Bay is extensive, with the "Pororoca" phenomenon which comprises the meeting of tidal water with masses of fresh water coming from the Brazilian Equatorial rivers. The tidal wave takes 3 hours 40 minutes to come from the Salinas Lighthouse to the South end of the port of Belem. Systematic measurements at times of spring tides show that the average height of water reaches 3.22 m. at high tide and in the quadratures 2.42 m. Maximum high and low water levels recorded are +4.21 m. and −0.37 m. respectively.

During the ebb, the waters coming up the Bay of Guajara are predominantly picked up by the Western channel current, with great speed, thus explaining the great depths at that point, and also in the Western channel the average ebb and flow speeds are 1.30 and 1.74 m. per second, respectively, and in the East channel they are respectively 1.19 and 2.10 m. per second. At the extreme Southern point of the berthing quays the average flow speed record was 2.77 m. per second.

SHIPMASTER'S REPORT: June 1992.

Charts: B.A. Charts No. 3959 and 397.

Approaches: The coastline is flat and featureless, except for buildings at Salinopolis. The town is a well known holiday resort for North Brazil. Salinopolis Town showed up at 27 miles on radar from the North. The light float "Amazonas No. 1" showed up at 30 miles and the Racon at 20 miles.

Depths shoal gradually.

Salinopolis Racon was seen at 17 miles.

The buoy marking Banco de Salinas (7 miles North of Salinopolis) showed up at 8 miles on the radar.

Navigation marks approaching and at Belem are as on the latest B.A. Charts No. 3959 and 397, and found to be reliable.

Pilot: Arranged through the Agent. 48 hours notice if possible in advance as per ALRS, followed by 24 hours and 8 hours notice.

Pilots travel to Salinopolis by outbound ships or by car, taking 2.5 hours from Belem.

At present, 12 pilots are employed on the Salinopolis to Belem area of the River.

Pilot office at Salinopolis listens throughout 24 hours on Channel 16, and works on Channel 11.

Pilot office called us when we were 40 miles N.W. of the port (pilots say VHF range in the area very good).

Pilot boards from old red coloured launch (standard Brazilian Pilot colour), just North of Banco de Salinas Buoy, and takes about 1.5 hours to come out from Salinopolis.

It is 102 miles from Salinopolis to Belem Miramar Tanker Berths. Vessels maintain full sea speed to Pta. Virado, about 20 miles North of Belem. Canal Dos Pocoes used, depending on draft. Racons on Espadarte Bank Wreck and Ilha Dos Guaras, either side of Canal Dos Pocoes, show up well. Same pilot berths vessel.

Anchorages: Numerous anchorages to seaward of Belem. Off Belem, the Immigration Anchorage near Miramar Tanker Berths has a depth of 26 ft. (F.W.) at L.W. at its North end. South end is shallower.

Tugs: No tugs at Belem.

Channel: From Pt. Mosqueiro to Belem, the Channel shoals rapidly. The shallowest section is 6.0 m. at L.W. about 3 miles North of the airport. This can only be navigated by deep-draft vessels 2 hours either side of H.W. Pilots report that no dredging is presently being undertaken at Belem alongside the berths or in the approaches.

Berthing: All berthing undertaken with the aid of the offshore anchor and tide. No berthing undertaken at slack water.

At Miramar Oil Berths, pilots like to berth on the flood tide, starboard side to, about 1 hour before H.W.

We berthed port side to with draft of 26 ft. (F.W.) on the start of the ebb, as we were too late for the flood.

Deep draft ships can leave 3 hours before H.W. to about 2.5 hours after H.W.

Berthing and unberthing very professionally undertaken. When berthing, let go offshore anchor off berth to about 1.5 shackles. Vessel pulled alongside by mooring lines which are run by a boat each end. Two head/stern lines to buoys, 4 springs each end split into two sets to different bollards on jetty.

Depths: For vessels proceeding from Ville De Conde Alumina Berth, about 15 miles above Belem, maximum draft is 40 ft. (F.W.).

Tanker Jetty at Pta. Do Rendentor has a depth of 35 ft. (F.W.) at H.W., and is out of use at present.

Tanker Anchorage off Pta. Do Rendentor has a depth of 29 ft. (F.W.) at L.W., and is used for lightening for ships proceeding to Miramar Berths.

Miramar Tanker Berths: 26 ft. (F.W.) at L.W.

Belem City Berths: 22 ft. (F.W.) at L.W.

Miramar Berths: Two berths available. The old jetty to the North was built in 1938 and modernised in 1956. This has a flat face length of 78 m. and handles all refined products, including LPG. Fendering poor.

Hoses (no Chicksans available) are handled by ship's derrick/crane. On the old berth, accommodation ladder can be easily landed amidships.

The new berth was completed in 1965, and has 2 sponsons for fenders and an effective length of 90 m. All refined products are handled, including LPG.

Hoses (no Chicksans) are handled by derrick or cranes, located on the jetty. At the new berth, it is difficult to land the gangway amidships.

LPG Cargo: 1×4 in. hose. Maximum back pressure 13 bar (+10°C at 135 tonnes p.h.). The tanks are 0.25 miles away, across main road.

Total capacity 5,000 tonnes.

The survey is long and tedious.

The Petrobras watchman is located in hut on the quay.

Facilities: Fresh water available from the jetty, and has to be arranged through Agent. Supply is metered and ship's hoses are used. The rate is about 20 tonnes p.h.

Gas oil and MDO available alongside by tanker truck.

Several ship chandlers available.

No telephones available. Nearest telephones are at the airport which is about 1 mile away.

Agents (Agencias Mundias Ltda.) are Lloyd's Agent and British Consul, and were very good.

Airport, with international flights to U.S.A., near by.

Authorities: Authorities board at anchorage off the berth, before ship comes alongside. This is the usual standard practice.

Immigration landing forms made out for each crew member, but not used.

6 Crew Lists, 6 Stores Lists (General items, does not have to be comprehensive), 6 Bond Lists, 1 Health Declaration and Vaccination List, 3 Cargo Manifests. All Passports are sighted.

General: Beware of robbers. We were warned that gangs strike at night, and go for the forward paint locker. Sure enough, at about 0300 hrs., they came aboard to be met by the crew with metal bars, which saw them off. We put a hawser around the forecastle housing door, and had extra watchmen on duty at night as well as shore watchmen.

"Visitors" can also be a nuisance. It is best to tell the Terminal that you do not want any visitors.

AUTHORITY: Companhia Docas do Para, Avenida Presidente Vargas, 41-2° Andar, Belem, Para, Brazil, CEP 66010-000. *Tel:* 223-0055. *Telex:* 0912320. *FAX:* (091) 241-1741. *Contact:* Carlos Acatauassu Nunes, Director-President.

AGENT: Wilson Sons Agencia Maritima Ltda., Av. Senador Lemos, 3135 Sacramenta, 66120-000 Belem PA, P.O. Box 312, Brazil. Tel: (091) 244-1766 (After hours: (091) 223-1754). Telex: (091) 1842/6920 WSON BR. Fax: (091) 233-3240. Cables: Anglicus.

CABEDELO: 06.58 S. 34.50 W. (See Plan)

DOCUMENTS: See "General" before first port.

PILOTAGE: Contact Pilot's Headquarters by radio via vessel's Agent located at Joao-Pessoa (18 km. from Cabedelo). The messages are relayed by Natal Radio PPN or Cabedelo Radio. All messages are delivered by National Telegraph – Telegrafo Nacional. Pilots' launches painted red with capital "P".

Pilots may be requested through VHF (Channels 06, 12, 14, and 16 – 156.30 MHz, 156.6 MHz, 156.70 MHz and 156.8 MHz).

ANCHORAGE: While waiting for the Pilot, vessels should anchor 0.8 miles E.N.E. of the light beacon. At the anchorage in the vicinity of the breakwater the depth of water is from 9.0 m. (29 ft. 06 in.) to 15 m. (49 ft.) at low tide, and at the anchorage located South of the docks the depth of water is 5.50 m. (18 ft. 09 in.) at low tide.

RESTRICTIONS: For Masters calling at Cabedelo for first time it is preferable not to enter during darkness.

MAX. SIZE: Max. length 210 m., draft spring tide 30 ft., neap tide 28 ft.

HEALTH: Also see "General" before first port. If Master suspects contagious disease aboard he must report to Agent who will contact Brazilian Health Authorities at Joao-Pessoa.

VHF: See "Pilotage".

TUGS: None available.

BERTHING: Berthing takes place in accordance with vessel's draft. Master must always give Agent vessel's draft arriving off Cabedelo. Length of quay, 602 m.

Berth Length (m.)	*Depth* (m.)	*Remarks*
125	9	Tankers, veg. oil, minerals, containers, general cargo
135	9	General cargo, minerals, containers, wheat
142	9	General cargo, minerals, containers, refrig.
110	7.5	General cargo, bulk cargo and containers
90	7.5	General cargo and bulk cargo.

CRANES: 5 Portal cranes. 1×1.5 tons, 2×3.2 tons, 1×5 tons Land 1×6.3 tons.

STEVEDORES: Advise Agent ETA at Cabedelo 48 hours prior to arrival to make arrangements with dock and stevedores for discharging or loading.

MEDICAL: For urgent cases recommended that vessel call at Joao Pessoa instead of Cabedelo as Joao Pessoa has better facilities.

TANKERS: Cabedelo not a loading port for petroleum products. Messrs. Esso-Brasileira de Petroleo and Petrobras Distribuidora S.A., have tanks for reception of gasoline, diesel and other petroleum products which are carried by Brazilian fleet of tankers "Fronape" – Frota Nacional de Petroleiros. At Cabedelo only Berth No. 1 is suitable for discharging petroleum products or to bunker vessels since pipeline is only connected to Berth No. 1. Tankers enter and sail during dark hours from Cabedelo. Length of berth 200 m. Depth alongside 9 m.

DENSITY: Varies from 1020 to 1025 at HW.

FRESH WATER: Supplied by pipeline alongside quays at rate of 50 cu.m.p.h.

FUEL: Available. Suppliers Messrs. Esso-Brasileira de Petroleo. Pipeline at Berth No. 1 where vessels can bunker alongside. Pipeline fuel oil, 8 in.; pipeline diesel, 8 in.

CONSULS:

France (083) 221.2010
U.K. (083) 224.7005

Other consulates at Recife 110 km. from Joao-Pessoa about 1.5 hours by road.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

GANGWAY/DECK WATCHMAN: Watchmen available. Masters have option to choose suitable times when their services are required.

OPENING/CLOSING HATCHES: By stevedores. Crew assist when stevedores not familiar with modern hatches.

CUSTOMS ALLOWANCES: 1 carton cigarettes per crew member at Customs discretion and 1 bottle of whisky or any other kind of spirit, subject to Customs discretion.

REPATRIATION: Repatriation can be arranged via Recife or direct from Joao-Pessoa to Rio de Janeiro, Sao Paulo and Brasilia.

AIRPORT: 9 km. from Joao-Pessoa. Utilised by National Lines whose planes make regular calls.

TIME: GMT minus 3 hours throughout the year.

IDENTITY CARDS: Foreign crew members not permitted to go ashore without presentation of identity card on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police who will return it to the crew member on re-embarkation.

HOLIDAYS: *National Holidays:* Fraternidade Universal (January 1st); Tiradentes (April 21st); Labour Day (May 1st); Brazil's Independence Day (September 7th); Nossa Senhora Aparecida (October 12th); Commemoration of the Republic (November 15th); Christmas Day (December 25th).

State Holidays: Nossa Senhora da Conceicao (December 8th); Sexta Feira da Paixao (Movable); Sagrado Coracao de Jesus (Movable); Emancipacao Politica de Cabedelo (December 12th).

Work is possible during holidays and Sundays, except on Good Friday, Labour Day and Independence Day.

POLICE/AMBULANCE/FIRE: Police (located at Joao-Pessoa) 190. Cabedelo has a small Police Station but no telephone available. Ambulance is available. Fire Brigade (locate at Joao-Pessoa).

TELEPHONES: Facilities for placing telephones on board.

AUTHORITY: Administracao do Porto de Cabedelo, Av. Presidente Joao Pessoa, Cabedelo, Paraiba, Brazil. *Contact:* Afonso Augusto de Toledo Navarro, Administrator.

DTBASA/SE (Carmopolis): 11.03 S. 37.01 W. (See Plan)

LOCATION: Dutos E Terminais da Bahia, Sergipe E Alagoas (DTBASA), operated by Petroleo Brasileiro SA, PETROBRAS, is located on the N.E coast of Brazil at the Atalaia Velha Beach, Lat. 11° 00′ 30″ S., Long. 37° 04′ 00″ W. about 9 km. South of Aracaju City, capital of the State of Sergipe.

The mooring site is an open roadstead seaberth. It is located about 3.8 miles from the beach and at the end of a submarine pipe-line marked by 1 lighted buoy, 4 miles Southwards from the bar entrance to the port of Aracaju. The geographical position of the berth is: Lat. 11° 02′ 53″ S., Long. 37° 00′ 47″ W.

DOCUMENTS: See "General" before first port.

ESSENTIAL REQUIREMENTS: *Most essential requirements to be met by vessels loading:*

1. The ocean terminal consists of a conventional berth, i.e., tankers are moored with the ship's two anchors ahead and the terminal's six mooring buoys round the stern (See "Plans").
2. The terminal is intended to load ships with crude produced in the nearby shore and sea oil fields.
3. Loading is effected by a 26 in. diameter submarine pipe-line with a length of 7,500 m. from the mainland. It divides into two strings of hoses (North and South) through a "T" reducing piece.
4. Ship's manifold should be preferably equipped with one 10 in. flange (ANSI).
5. Amidships, derrick or crane with a minimum capacity of 5 tons must be provided to hoist and connect the nominated string of hoses, normally on starboard side. Only one string is connected.
6. Ship's windlass (chain cables, brakes, windlasses, etc.) must be in perfect operational condition so that anchor and chains can be dropped, heaved in, adjusted, etc.
7. A forward winch must also be prepared for heaving in the pick-up wire of the hose.
8. Maximum permitted draft for the terminal is 15 m. so that a 3 m. bottom clearance is assured to face extreme operating sea conditions.
9. The mooring was designed to accommodate vessels up to 65,000 d.w.t. however, in special favourable circumstances a 115,000 d.w.t., tanker has been moored. Ship's LOA (300 m.) and longitudinal position of ship's manifold are also limiting factors.
10. By daylight a Mooring Master will board the vessel about 1 mile S.E. of the terminal sea buoys. He will advise on all manoeuvres relative to berthing, connecting and disconnecting hoses, etc. When arriving at night or for awaiting berth, Masters are requested to use the recommended anchorage. However, if weather conditions permit, ships may unmoor at night.
11. One terminal loading supervisor and 7 working men will stay aboard.
12. Vessels are requested to have a pilot ladder long enough to reach the terminal's launch, rigged alongside the accommodation ladder, in order that the shore personnel may transfer to it after 2 m. or 3 m.
13. Being an open roadstead, vessels must keep engines on standby during their stay in the mooring. Steam must be kept on deck in case adjustments to anchor cables or mooring lines are found necessary.
14. No ballast discharging facilities exist at the terminal. Vessels must arrive with necessary clean ballast. Brazilian laws are very strict with regard to the pollution of coastal waters and fines are heavy.
15. Any emergency should also be immediately transmitted by radio telephone on Channel 16. When operating the vessel's and the Terminal's radiotelephones will remain to Channel 12, set apart for such use.
16. Under no circumstances should vessels drop their anchors in the area between the sea buoys and the shore and the nearby submarine pipelines (North and South) from the oil production platforms.

REMARKS:

Non-compliance of just one of the above stated conditions (items 5, 6, 8 and 14) could result in rejection of the ship as being unsuitable for this terminal.

ARRIVAL:

Mooring Turn: Arrival time is considered to be the time the vessel reaches the anchorage or the time the Mooring Master boards the vessel, whichever occurs first. However, Notice of Readiness will not be considered as the time of arrival unless the vessel is in all respects ready to load. Tankers are loaded in turn except when the Terminal Manager grants priority to a particular vessel out of turn, in special circumstances only.

APPROACHES: As it is an open roadstead the access to the terminal can be easily and safely approached either from the N.N.E. or from the S.S.W.

The shore line runs of 035°/215°. Between the Sergipe and Vaza-Barris Rivers the coast is almost a straight dune-covered sand beach which offers a very few notable natural landmarks.

Tankers must be aware of the existence of 4 oil fields with fixed production platforms which constitute in themselves good marks. Marking the bar of the port of Aracaju, located about 5 miles N.W. of the terminal berth, is a light exhibited from a conical white frame- work tower enclosing a central cylinder, 41 m. high, with a range of 14 miles (international No. G0230). There is a radio-beacon at the local airport with signal letters AR (· – · – ·) transmitting continuously on 355 kHz. Its geographical co-ordinates are: Lat. 10° 59′ 27″ S., Long. 37° 04′ 22″ W. Near to the terminal offices are 4 steel towers and a chimney of a natural gas plant.

PILOTAGE: No Pilots exist in DTBASA/SE. All manoeuvres will be undertaken by the vessel's Master, with the help of a DTBASA/SE Mooring Master, who will board the vessel in the anchorage area and advise the Master on all operations such as mooring, connecting hoses, unmooring, loading, etc. It is important to emphasise that the services of the Mooring Master are afforded without charge and upon the express undertaking and condition that PETROBRAS shall not be liable for any damage or injury resulting from any advice, assistance or actions given or made by such Mooring Master. In the event it becomes necessary to disregard the Mooring Master's advice, in order to ensure safety of the vessel, the Master must forward a full written report of the circumstances for delivery to the Captain of the Port through the Terminal. It is the responsibility of the Master to notify the Mooring Master of any special conditions or peculiarities such as defective navigation equipment, tackle, gear or lack of necessary equipment which might impose hazards related to handling, mooring and loading the vessel.

Vessel must be moored to entire satisfaction of the Mooring Master. The Mooring Master may require the vessel to unmoor at anytime he deems necessary for the safety of the vessel or mooring or both or for an infringement of terminal or port regulations.

Unsatisfactory conditions will be reported to the Terminal Superintendent who is empowered to reject the ship unless the reported deficiencies have been remedied.

ANCHORAGE: The advisable anchorage site either for awaiting berth or daylight is determined by the following geographical co-ordinates: Lat. 11° 04.1′ S., Long. 36° 59.0′ W. Depth is 25 m. (82 ft.) MLWS.

Occasionally Mooring Master will board arriving tankers whilst still underway nearby the anchorage area. This anchorage provides vessels with ready access to the berth. Holding ground in this area is very good, as the bottom is varied in character (mud and fine sand). It is recommended that vessels should stay at anchor for periods of not longer than 24 hours with the anchor in the same place, otherwise it will be difficult to heave up anchor.

IMPORTANT:

Under no circumstances should vessels drop their anchors in the area between the berth and the shore due to submarine pipe-lines.

RESTRICTIONS: Mooring at the buoys will be effected in daytime only. Nevertheless loading and connecting hoses may sometimes be effected in night-time under certain conditions.

MAX. SIZE: The berth is designed to accommodate tankers up to 65,000 d.w.t., however, under favourable circumstances and vessel Master's discretion a 115,000 d.w.t. tanker has been moored. The ship's final draft is usually 15 m. (49 ft.). This draft will usually afford a safe bottom clearance 3 m. (10 ft.) even under the most severe sea conditions in which the loading operation is feasible. Depth is 18 m. (MLWS).

ETA: Vessels bound for Aracaju or DTBASA/SE should advise their ETA 48 hours prior to arrival to radio station "PPS" (Official Coastal Radio Station) as well as to their Agent in Aracaju-SE (Cruz Irmaos & Cia.) whose cable address is Cruzirmaos, via the following coastal radio stations: Amaralina Radio (PPA) in Salvador – BA; Olinda Radio (PPO) in Recife – PE; or Rio Radio (PPR) in Rio de Janeiro-RJ.

When vessel is within 50 miles of the terminal contact may also be made by VHF radiotelephone on Channel Delta/16 (156.8 MHz). The terminal keeps a 24 hour listening watch on this Channel.

VHF: The radio and communication centre is located in the Oil Control Building. There is a VHF set operating 24 hours a day on Channel 16. Portable sets are taken aboard for the sake of safety and controlling the loading. No signal lamp (Aldis lamp) exists.

TUGS: There are no tugs available to assist berthing and unberthing.

BERTHING: The berth is of a conventional type, i.e., vessels are moored with two anchors ahead and synthetic mooring lines to the 6 sea buoys round the ship.

Ships are loaded by means of a 26 in. diameter submarine pipe-line dividing into two strings of hoses (by a "T" piece) either of which will normally be picked up on the starboard side. The end of the submarine line is 3.8 miles off-shore in 18 m. of water. Both north and south strings are 10 in. and support a maximum pressure of 225 p.s.c. Only one string is connected to the ship The 10 in. hoses are connected to the ship's manifold, through a quick release connecting device, the flanges being of normal 10 in. ANSI pattern.

MOORING: Vessels moor using both anchors forward with 2 lines to each buoy.

Turnround: To promote the economical operation of the vessel, Masters are requested to co-operate with installation representative in minimising their in-port time. Any delays which are considered unnecessary or extensive should be reported to the loading Operating Supervisor so that corrective measures can be taken in due time.

HOSES: There is a submarine pipe-line from shore installations direct to the terminal, which are divided into 2 flexible hoses long enough to reach the ship's manifold. Usually, only 1 hose is connected, of 10 in. diameter. The nominal loading rate is about 3,000 cu.m.p.h. (18,870 bbls.p.h.). Shore labour used to connect hoses. Hoses are lifted on the starboard side.

The Mooring Master will guide the terminal's workmen in lifting, connecting and lowering the hose. As soon as the vessel is securely moored, one of the strings of hoses must be lifted to the rail by ship's gear (crane or boom). Sundry hose securing and connecting equipment (strops, gaskets, quick-release device, etc.) will be supplied by the terminal and put aboard the ship soon after arrival. Hose will normally be lifted and connected on the starboard side.

LOADING: At the beginning and during the loading operation tankers are requested to observe the following:

(a) Pumping will not start without the ship's and Mooring Master's permission.

(b) The max. allowed pressure established by the ship will be maintained.

(c) During operations a constant lookout by responsible men is required on the moorings and in the manifold area to keep watch on the connections.

Also see "Hoses".

MEDICAL: Medical treatment and/or hospitalisation, if required are provided at Aracaju private hospitals. Dentists are also available in Aracaju. Agent will make such arrangements.

For emergency cases (injury etc.), Petrobras first aid may be requested by the Master.

BALLAST: Vessels should arrive at DTBASA/SE with minimum clean ballast to enable manoeuvring under prevailing weather conditions. Masters are encouraged to take advantage of the favourable weather which prevails most of the time to minimise ballast. Early radio contact with the terminal must be established in order to obtain the latest weather information so that he can decide on appropriate ballast. The terminal is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels. Vessels requiring excessive time to complete the deballasting operation will be given Letters of Deficiency.

To avoid any possible pollution of the local waters, all tankers calling at the terminal to load must do necessary tank cleaning prior to arrival. Before arriving at the loading berth Masters must assure themselves that all tanks, pipe-lines, and pumps are free of oil. All tank cleaning should be preferably done 50 miles off the Brazilian coast. The terminal does not have facilities to receive any significant amount of oily ballast. If, after mooring a vessel is found to have oily ballast water aboard, it will be sent to sea to accomplish the necessary tank cleaning. A new Notice of Readiness to load must then be given.

CARGO: The cargoes are called Sergipano Crude Oil of an average API 33, temp. 90°F., Plataforma Crude Oil of an average API 40.3, temp. 90°F. or Carmopolis Crude Oil of an average API 23.4, temp. 90°F. No heating required.

FRESH WATER: No water available.

FUEL: No bunkers available at Aracaju Terminal.

SURVEYORS: *Petroleum Inspection:* Petroleum inspectors are not available in Aracaju, but may be requested.

Chas. Martin & Co., Rua da Lapa 200, conj. 906, 20.000 – Rio de Janeiro. Tel: 242-4219, 245-5636 and 225-3507.

E. W. Saybolt & Co., Rua XV de Novembro 70, P.O.Box 826, Santos. Tel: 341984. Telex: (013) 1004.

CUSTOMS ALLOWANCES: Brazilian Laws are strict with regard to smuggling, and Masters are requested to instruct their crew not to retain cigarettes in carton lots, cigars, tobacco, alcoholic drinks, drugs, souvenirs, etc.

By no means will any commercial transactions be tolerated be it either among terminal employees, crew members or anyone else.

AIRPORT: There is an airport at Aracaju.

TIME: GMT minus 3 hours.

GARBAGE DISPOSAL: There is no garbage collection service available at the port.

WASTE OIL DISPOSAL: There is no waste oil collection service available at the port.

SEAMAN'S CLUBS: None.

CURRENCY: Cruzeiro. Money can be changed at Banco do Brasil SA. Tel: (079) 211-1300.

WEATHER: *Weather conditions:* Local weather and sea conditions may be considered as fair for tanker operations.

Rain: The annual precipitation averages 1,103 mm. April, May and June are the rainy season.

Visibility: Usually the visibility condition in this area is fair, except during squalls.

Temperature: Actual temperatures ranging one year from a Low of 18.2°C in June to a high of 30.8°C in February.

Pressure: The annual average atmospheric pressure is 1013.2 mb.

Relative humidity: During most of the year the relative humidity of air is about 82%.

Remarks: Weather forecasts as well as Notice to Mariners are transmitted by PWZ and PPR coastal radio stations. For details refer to Brazilian Navy H.O. publication (Radio Aids) DH.8.

Winds and Waves: Winds blowing from shore to sea are practically non-existent. Those blowing from 040° to 160° counter-clockwise are not worth mentioning. From October to March Eastern winds will prevail (070° to 110°), and between May and August SE winds will prevail, i.e. (120° to 160°). In April and September, winds will blow either from the East or the S.E. 78% of wind force will be about 2 and 4 on the Beaufort Scale. i.e. slight to moderate breeze. Seldom fresh gales (Force 8) have been observed. 19.7% of periods of calm and the rest 2.3% is of light air occurences (Force 1 to 3).

Essentially all waves near the Aracaju area are caused by the prevailing local winds. However, the changeable periods in which they occur, when the waves will give the false impression to the swell. 60% of the recorded waves were between 0.5 m. to 0.9 m. high. During one full year period of observations the studies have demonstrated that only 1.4% of the operational time, the terminal will be closed for tanker loading, periods in which the waves are equal or higher than 2 m.

Currents: Currents recorded in the terminal area are made up of diversified and simultaneous causes acting in different grades of strength and combination. The causes were identified as being winds, tides, salinity and also temperatures, none of them was outstanding enough to be regarded as the final prevailing cause. The currents chiefly run parallel to the coast, but they do not vary greatly in set and drift. This lack of constancy affords evidence that it cannot be attributed to the Brazil current. Maximum recorded speed of current was one knot. It has been reported that upon N.E. winds and at ebb tides the current sets to S.S.W. with speeds higher than usual.

Tides: The mean HW interval is 4 hours 46 minutes. Tidal velocity rarely exceeds 2 knots and the tidal range varies from 1.99 m. at Spring to 1.05 m. At Neaps.

GENERAL:

Charts and Publications: (a) Brazilian Charts: 1003 and 1000 and 60 (Brazilian Navy Hydrographic Office).

(b) Foreign Charts: No. 24210 and 24211 of the US NOO and No. 1396, 3286 and 3977 of the H.D. (U.K.).

(c) Brazilian HO publications: Sailing Directions DH 1-9, List of Lights DH 2, Radio Aids DH 8.

No supply of charts, sailing directions or other publications are available in Aracaju, however if ordered in advance by Agent they may be obtained.

Bonded Stores: Cigarettes, beverages or other goods are not available in Aracaju.
Cash Advances: No cash advances are effected by the terminal. As a rule, the ship's agent will be able to handle this service when previously requested by radio.
Classification Societies: In Aracaju, there are no A.B.S. or L.R. surveyors, however, they may come from Rio de Janeiro upon Agent's request.
Consulates: No consular representatives exist in Aracaju.
Lubricating Oil: Supplies of lubricating oil are expensive and available only in emergencies and in very small quantities. Purchase and delivery are difficult.
Mail: There is regular Post Service in Aracaju. Letters should be sent care of the ship's Agent. In turn, the letters will be delivered to the ship upon arrival.
Provision and Stores: Limited. Provisions and stores are ordered through the ship's Agent or through shipchandlers in Aracaju.
Radio and Radar Repairs: Small radar and radio repairs may be effected in Aracaju provided that prior notice has been given to ship's Agents.
Agency: DTBASA/GESAL, Av. Melicio Machado, Km. 2, CEP 49037-440, Aracaju-SE, Brazil. Tel: (079) 243-1414 or 224-1451.
AUTHORITY: Petroleo Brasileiro S.A. – PETROBRAS, Avenida Republica do Chile 65, Centro – Rio de Janeiro – 20.031-170 – Brazil.

Divisao de Coordenacao e Programacao Operacional: Same address, as above, 12th Floor (Co-Ordination and Operations Programming Division).
Terminal: Dutos e Terminais da Bahia, Sergipe e Alagoas – DTBASA, Av. Melicio Machado, Km. 2, Aracaju, Sergipe, Brazil. CEP 49037-440. *Tel:* 079-243-2611. *Telex:* (0792) 127. *FAX:* (079) 243-1735 or 224-1451.

FORNO: 22.58 S. 42.01 W. **(See Plan)**

PORT LIMITS: The port is situated in Arraial do Cabo, on the North coast of the State of Rio de Janeiro, and its limits are comprised by: on the sea side, waters of the Anjos; the creek, and by the intersection of the mountain range with the foot of Fortaleza Hill. Its entrance is located in the alignment of the last point of Santa Cruz Street (Rua Santa Cruz), and on the opposite side, terminates at the shelter breakwater quay commencement point.
APPROACHES: The access channel is 700 m. wide, with a bar (minimum depth 12 m.) between Cabo Frio and Ilha dos Porcos.
PILOTAGE: Optional.
ANCHORAGES:

Forno Creek: Lat. 22° 58′ N., Long. 42° 01′ W. Depth 8.0 m. – 14.0 m.
Anjos Creek: Lat. 22° 58′ N., Long. 42° 01′ W. Depth 7.0 m. – 12.0 m.

TUGS: Available from Rio de Janeiro or Macae on request by agent.
BERTHING: Manoeuvring Basin: Depths of 12 m. – 13 m. available.

Quay: Length 220 m., depths up to 10 m. for vessels up to 30,000 d.w.t.

Also see "Tankers".
CRANES: 3 jib cranes with a capacity of 5 – 6.3 tons. Other equipment includes 1×7 ton stacker truck and 1 tanker truck with 10,000 litres capacity.
FRESH WATER: 3 tanks, 1×450 cu.m., 1×60 cu.m. and 1×100 cu.m. Rate of delivery 20 t.p.h.
FUEL: Available by road tanker.
TANKERS: *Caustic Soda:* One tank with a capacity for storage of 14,500 tons, used previously for molasses with a pipe system which extends up to the Dukes of Alba and which permits loading of vessels at the rate of 300 t.p.h.; there is a receiving bridge for the product when transported by lorries, and pumping houses. Not in use at present.
Liquid Bulk Cargo: Pipes located at the Dukes of Alba, used for receiving fuel oil for the Companhia Nacional de Alcalis, Esso Brasileira de Petroleo and Petrobras Distribuidora. The same berthing area is frequently used also for vessels carrying chemical products such as caustic soda intended for Dow Quimica S/A., whose bulk cargo is moved by pipe-line connected to the storage tank.
REPAIRS: No facilities available.
AIRPORT: Macae and Campos.
TIME: GMT minus 3 hours.
HOLIDAYS: 1st May and 2nd November. No work possible on these days.
GENERAL: *Charts:* Brazilian Charts No. 1503, 1505 and 1508.
AUTHORITY: Porto do Forno, Rua Santa Cruz No. 15, 28.910 – Arraial do Cabo – RJ. *Tel:* (0246) 22-1105 and 22-1185. *Contact:* Gustavo Gurgulino de Souza, Director.

FORTALEZA: (including Mucuripe), Ceara: 03.41 S. 38.33 W. **(See Plan)**

PORT LIMITS: From the end of the mole on a true bearing of 235° to the meridian of 38° 29.8′ W., thence to the coast.
DOCUMENTS: See "General" before first port.
PILOTAGE: By Associacao de Praticagem do Porto de Fortaleza. Address: Rua Dragao do Mar, 372. Tel: 212088. The Pilots board ships about 0.5 miles N.W. from the breakwater, call by International Code Signals.

Pilot may be ordered through the vessel's Agent or Fortaleza Radio (PPC). One hour before arrival specifying time of arrival and from which point the Pilot is required.
ANCHORAGE: Vessels awaiting Pilot may anchor W.N.W. of the breakwater head, distance 0.5 miles. Water depth 32 ft.
RESTRICTIONS: Access channel Length 1,000 m., width 100 m., depth 10 m.
MAX. SIZE: Up to 27 ft. draft depending on the tide.
HEALTH: The inspection area for Port Health and the other authorities is within 1,430 m. of position Lat. 03° 42′ 24″ S., Long. 38° 29′ 18″ W.

All ships must be visited by Port Health Inspector. If vessel has passengers in transit for another Brazilian port, another visit will be required at port where passengers disembark. If ship's health condition satisfactory, Inspector will give Free Pratique immediately. Radio pratique available if Master able to declare satisfactory health condition before arrival. Free Pratique is valid for subsequent ports in Brazil.

If there is a crew member to be hospitalised, the Health Inspector will issue pass to hospital on request of Master or Agent who will be made responsible for all expenses incurred.

Inoculations for International Certificates can only be given by an employee of the Port Health Authority.

Ships are inspected by Custom House and Health personnel at the anchorage.
VHF: Port Radio on Channels 9, 10, 13 and 16.
TUGS: One tug 1,680 h.p. available.
BERTHING: 1,054 m. of berthing length, depth 3.6 m. – 10.0 m. Berths for five vessels. One grain elevator, capacity 150 t.p.h. Four lighters available capacity up to 70 tons each.

Berth No. 1. 106 m. long, 18 ft. deep.
Berth No. 2. 150 m. long, 20 ft. deep.
Berth No. 3. 170 m. long, 22 ft. deep.
Berth No. 4. 530 m. long, 33 ft. deep.
Berth No. 5. 160 m. long, 33 ft. deep.

Vessels are advised to take a Pilot and use a tug if available due to the peculiar port variations.

Vegetable oils can be loaded in drums, 18/20 t.p.h. or ex-barge at 100/125 t.p.h.
CRANES: A 100 ton floating crane is on order. 7 diesel cranes 9 ton – 50 ton capacity. 5 electric cranes 3.5 tons – 12.5 tons capacity. No. 3 Berth has a travelling suction tower with 2 tubes, operating at 120 t.p.h.
TANKERS: *Petrobras:* Berthing platform length 90 m., width 28 m., depth 11.0 m. (1st phase), 12.0 m. (2nd phase). Capacity 34,000 g.r.t. (1st phase), 50,000 g.r.t. (2nd phase). Length of access bridge 853 m., width 3.7 m.

Loading Lines (planned): 1×18 in. (crude); 1×16 in. (fuel oil); 1×12 in. (asphalt); 1×10 in. (diesel oil and Naphtha); 1×12 in. (petrol/alcohol); 1×12 in. (aviation kerosene); 1×12 in. (kerosene/diesel oil); 1×8 in. (LPG); 1×6 in. (LPG vapour); 1×6 in. (drinking water); 1×10 in. (ballast); 3×12 in. (not designated) and 1×4 in. (steam).

Lines available (1st phase): 1×6 in. (drinking water); 1×8 in. (fire water line); 1×12 in. (diesel/kerosene); 1×12 in. (petrol/alcohol) and 1×16 in. (fuel oil/asphalt).
FRESH WATER: 20 hydrants on the quay spaced 50 m. to 80 m. apart. Connections 2 in. Rate 20/30 t.p.h.
FUEL: Boiler fuel available from 7 connections (6 in. and 8 in.), rate 45 t.p.h., spaced along the quay. Diesel oil is available by road tanker. Also see "General" before first port.
CONSULS: None at Fortaleza.
REPAIRS: Two workshops available for machinery repairs. No electronic repairs possible.
REPATRIATION: Can be arranged.
AIRPORT: Only internal services from local airport.
POLICE/AMBULANCE/FIRE: Maritime Police Tel: 24.14.94; Ambulance 21.34.34 and 21.22.22; Fire 23.13.81.
TELEPHONES: Available on board through the Ceara Dock Co.
SHORE LEAVE: Allowed under control of Maritime Police.
IDENTITY CARDS: Foreign crew members not permitted to go ashore without presentation of identity card, on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police who will return it to the crew member on re-embarkation.

SHIPMASTER'S REPORT: May 1992.
Vessel: L.P.G. vessel. 171 m. LOA.
Charts: B.A.Charts No. 3957 and 526.
Approach: Pta. Mucuripe shows up well on radar, and the City of Fortaleza is very prominent by day and night.

Fortaleza Light (Gp.Fl.2) is not easily visible, due to the backdrop of lights. The black and white lighthouse is prominent by day.

Two intense white flashing lights on TV Towers in approx. position Lat. 03° 45′ S., Long. 38° 30′ W., in the Southern part of the city are very conspicuous over 20 miles away, from the N.W.

The green (Fl.3) light on the breakwater head is not easily seen, due to the backdrop of lights from the shore.

Care should be taken when approaching Buoys No. 1 and 2 near the breakwater, as a very strong onshore set is experienced. We nearly got into difficulties and Pilots report this is usual with ships being set down onto the shoaling ground.

Buoy No. 7 on B.A.Chart No. 526 (03° 43′ S., 38° 28.3′ W.) is no longer in existence.
Pilot: Entry and departure throughout 24 hours for all ships in virtually any weather. Pilot on VHF Channels 16 and 10. Pilot speaks reasonable English and seems competent.

Pilot boards from small red launch 0.5 miles N.W. of breakwater. Notice required 2 hours prior to arrival and departure (by Agent).

We berthed at 0300 hrs. and managed to make contact on VHF when about 20 miles away.
Reporting: Brazilian Reporting System as detailed in ALRS Vol. 1 is mandatory. The Harbour Master requires copies of messages sent.
Anchorage: As per B.A.Chart No. 526 for deep-draft vessels. The anchorage was very exposed. We observed vessels anchored with S.E. winds at Force 5 with large ground swell.

Tugs: Two low powered tugs available. They are used for pushing at the oil pier.

On the general wharf they were observed using ship's lines to pull vessel off berth.

Entry: For all berths, enter between Buoys No. 1 and 2 as per B.A.Chart No. 526, and additionally for general cargo wharf, between Buoys No. 3 and 4.

Berths: For tankers, the Elbow Jetty is used, with 2 berths, East and West.

The Western berth takes vessels up to 250 m. in length with maximum draft of 10.5 m., although one pilot reported he had taken 11.0 m. draft alongside.

The Eastern berth is for small vessels only, due to less water and difficulty of leaving with low powered tugs.

The alongside loading platform is 90 m. in length, with mooring dolphins North and South.

Moorings: One mooring boat and pilot boat used for mooring. There are good fenders (large tractor tyres).

We moored with 4 lines and 2 springs each end.

Starboard anchor dropped to 2 shackles off the West berth.

Always berth head South (port side too on West berth).

Berthing tends to be slow due to wind and low tug power.

Wind generally from S.E. to South throughout year.

Cargo: Berth handles LPG for cooking fuel and refined products for local area. LPG spheres are about 3.5 km. away. Only heated discharge to 25 spheres. LPG, both butane and propane at +5°C with booster pump. We managed 120 t.p.h. at 10 bar back pressure which Petrobras said was very good. We used 4 in. flexi-hose suspended from gantry.

Very poor contact with Terminal once discharge commences.

No change over time between products.

Survey by SGS. They made many mistakes in figures inwards and outwards.

General: Authorities: No problems. We prepared just about every form. We did not require Currency List or full Stores List. Stores must contain general consumables like paint and videos. Documents required were as follows: 12 copies Personal Effects List, 6 copies Stores/Bond List, 11 copies Crew List, 1 copy 'Nil' Arms and Ammunition, 1 copy Drugs in Hospital (Dangerous only), 1 copy 'Nil' Passenger List, 1 copy Vaccination List, 6 copies Cargo Manifest, 1 photocopy of I.O.P.P. Certificate for Harbour Master, 3 copies Ship's Particulars, Copies of Messages to SISCONTRAMS Position System.

We proceeded to Recife after Fortaleza and Transit 'Rider' was issued.

Fresh water: Obtainable through meter from pier at 15 t.p.h. Ship's hoses used.

Stores: Shipchandler SERVMAR (ISSA) fair and prices reasonable, especially for meat. Imported items very expensive. Store truck allowed to corner of 'elbow' on oil pier, about 500 m. from ship's side.

Chandler has a gang of men and hand trucks to transport to ship's side.

Airfreight: We received AWB by DHL (large number of charts) in 3 days from U.K.

Medical: Comprehensive, but only Portuguese spoken and reports in Portuguese. Agent did his best to translate.

Shore Leave: Beware of contact with police. One young seaman wandered off on his own and lost U.S.$ 300 and was beaten up by police.

Gangway: Ship's amidships accommodation gangway can be landed on jetty.

AUTHORITY: Companhia Docas do Ceara, Praca Amigos da Marinha Esplanada do Mucuripe, C.P. 1099, 60.000 Forteleza-CE. *Tel:* 224.20.33. *Contact:* Livio Silva de France, Director/President.

AGENT: Wilson Sons Agencia Maritima Ltda., Av. Monsenhor Tabosa 111, Sala 35, 60165-010 Fortaleza CE, Brazil. Tel: (085) 226-4897 (After hours: (085) 224-4833 and 223-6682). Telex: (85) 2567 SBSV BR. Fax: (085) 226-6678.

GUAMARE: 04.52 S. 36.21 W. (See Plan)

LOCATION: GENEST II/SEGUAM, the onshore base of the Terminal, is located about 9 km. Southward from Guamare village in Rio Grande do Norte State.

The Offshore Terminal is situated in an open area about 11 miles Northward of Galinhos Lighthouse. Its coordinates are Lat. 04° 52' 25" S., Long. 36° 21' 30" W.

DHN Chart No. 700 covers the area.

PILOTAGE: There are no Pilots in Guamare. All manoeuvres are to be performed by the ship's Master, always assisted by a Mooring Master of the Terminal, who will come on board at the anchorage area and will advise the Master during all operational works, such a mooring, lifting of submarine hose, tanker rail hose connection, loading operations, unmooring operations, emergency stops, etc.

If the Master chooses not to follow and observe the instructions of the Mooring Master, in order to preserve the safety of his ship, the Master must send a written explanation to Capitao dos Portos do Estado do Rio Grande do Norte via the Terminal.

The ship's Master should notify the Mooring Master in advance whatever special conditions arise, if there is some deficiency in equipment, in mooring ropes, winches, rollers, mooring dolphins, derricks, main engine or auxiliary machinery.

The Mooring Master is a professional, and capable of guiding and helping the ship's Master and acts as Terminal's representative on board. It must be clear that the ship's Master will be solely responsible for manoeuvres, as the Mooring Master is his advisor and never being held liable, not even jointly responsible for whatever may happen due to decisions of any kind. Likewise, the acceptance of services and advices rendered by the Mooring Master will imply that the above mentioned conditions are also admitted.

Remarks: The Mooring Master will report any wrong operational condition to GENEST II, which may refuse the tanker for future loading operations, unless the indicated imperfections written in the Claim have been repaired before the return journey of the vessel to the Terminal.

The Mooring Master has a station at Guamare Industrial Zone, located about 9 km. S.W. from Guamare Port. His operational support boats stay at Guamare harbour.

APPROACHES: *Terminal Approach and Aids to Navigation:* As the Ubarana Multi-Buoy System is an offshore terminal, it can be accessed from almost any direction. As soon as vessel reaches Cabo Calcanhar, coming from South, safe radar positions can be obtained by using Racon-equipped fixed production platform of Agulha II (PAG-2), in position Lat. 04° 32' 29" S., Long. 36° 16' 12" W.

It is located 5 nautical miles East of the mooring system.

Vessels arriving from North may also obtain position from the Agulha II platform. However, they must take heed of Urca do Tubarao, a submarine coral plateau of 4.8 m. depth, siutated 5 miles West of the berth.

Some other fixed production platforms in the area can also be used to give good positions:

Plataforma de Ubarana II (PUB-2):
Lat. 04° 55' 46" S., Long. 36° 20' 21" W.
Plataforma de Ubarana III (PUB-3):
Lat. 04° 55' 22" W., Long. 34° 20' 23" W.
Plataforma de Ubarana IV (PUB-4):
Lat. 04° 54' 31" S., Long. 36° 24' 42" W.

Vessels should not sail in the area South of the mooring system, on account of submarine pipelines not shown in the DHN Nautical Chart No. 700. The light buoy displays yellow flashes of 0.3 second with 2.7 seconds eclipse.

ANCHORAGES: *Recommended Anchorage:* Within one mile radius of Lat. 04° 51' 05" S., Long. 36° 23' 00" W.

The area is 17.0 m. (MLWS) deep, the bottom is sand and gravel, providing good holding ground.

Tankers should not anchor to the South of this area or to the South of the buoy system.

RESTRICTIONS: Vessel cannot unmoor at night, except in an emergency.

MAX. SIZE: 116,000 d.w.t. Max. draft 14.0 m. – 15.0 m., depending on time of day. See "Loading – Loading No. 8".

RADIO: *Arrival Advice:* ETA must be advised by tanker 48 hours in advance through Coastal Stations National Network of Embratel to ship's Agent in Natal City.

BERTHING: *Berthing Preference:* Berthing preference will be given in accordance to ship's arrival sequence, unless otherwise stated by DETRAN/DICOP, or in case of peculiar situation having its priorities established by the Terminal.

Mooring Procedures: Mooring procedures are to be discussed in advance by the ship's Master and the Mooring Master, before approaching the berth.

Multi-Buoy Mooring System: The berth is a multi-buoy mooring system (CBM) of 5 mooring buoys, where ships can moor after dropping both anchors.

Synthetic mooring ropes or wire cables must be sent to the buoys. On average, 10 ropes will be sent to the mooring buoys from the stern.

The first lines to be dispatched must be shackled one to another, in order to ease the mooring work.

LOADING: *Hose Connection:* Vessels on arrival should have manifolds prepared to connect to tanker's rail hose. Hose handlers boarded by the Terminal will be under the orders of the Mooring Master regarding the lifting of the submarine hose line and its tight connection to the tanker's manifold.

As soon as all of the mooring lines are well secured on the buoys and ship's cargo tanks have been inspected, the submarine hose lines will be suspended. The hose connection will always be performed on the starboard side. Connection and hang-off devices, such as grommets, gaskets, quick couplers and Camlock ratchet, are to be furnished by Terminal.

Vessel Loading: Before and during loading, vessels are asked to comply with the following:

(a) Loading operation cannot be started without previous permission from the Terminal and the ship.
(b) The maximum pressure and receiving rate stated by the ship (if lower than the Terminal capacity) is to be maintained.
(c) While loading the vessel, the Terminal will assure the service of a watcher taking constant care of the manifold, in order to verify any abnormality.
That does not exclude the ship's own watchman service reporting any irregularity to the Mooring Master.
(d) The vessel shall inform the Terminal about cargo and rate every 2 hours.
(e) Topping-off signal is to be sounded by the vessel, it should notify Terminal personnel 5 minutes in advance.
(f) Mooring ropes and anchor cables shall be constantly inspected by a ship's officer and must be equally tightened.

Terminal Personnel: The Mooring Master and some Terminal employees come on board and stay throughout the whole operation. Therefore accommodation and food must be provided for Mooring Master/Loading Master and a 7 workmen team, as well as rations for 4 more crewmen from the support boat.

Loading:

1. The DTNEST/SEGUAM Offshore Terminal is a single berth of 5 mooring buoys named Quadro de Boias de Ubarana, where vessels up to 116,000 d.w.t. can moor after dropping both anchors.
2. The Terminal was constructed to load tankers with crude oil generated in the fields of Rio Grande do Norte State, including offshore production.
3. Loading operation is performed through a 26 in. submarine pipeline ranging 30 km. from land to berth in the multi-buoy system. At the pipeline end manifold is a yoke with a 26 in. reduction, to allow the

use of 2×16 in. submarine hose lines, each of them with a 16 in. to 10 in. reduction. The East line is composed of 8×16 in. submarine hoses, 1×16 in. to 10 in. reduction and 7×10 in. submarine hoses. The West line is composed of 15×16 in. submarine hoses.

The West line with 16 in. hoses is for loading vessels over 30,000 d.w.t. and the East line with both 16 in. and 10 in. hoses is for vessels of up to 30,000 d.w.t.

4. Tanker's manifold must be provided with 10 in. flange ANSI 150 forward, and 16 in. aft, to provide the simultaneous connection of both the 10 in. and 16 in. lines.
5. Vessel's derrick or crane must be ready on starboard side with a minimum safe working load of 10 tons, in order to lift and connect hoses and ancillary material.
6. Tanker's windlass must be kept in good condition, to permit easy anchor's dropping and easy adjustment.
7. Tanker must have a free starboard winch, in order to lift tanker rail hose by its hang-off chain or pick-up wire.
8. The deepest draft allowed is 14.0 m. (either forward or aft) for loaded vessels leaving the berth, no matter what tide, and 15.0 m. for vessels leaving with daily high water (from 0500 hrs. to 1600 hrs.). Vessels entering the berth with half load or in a heavy ballast condition, must have a deepest draft of 10.0 m. while arriving. In case of mooring, maximum draft for manoeuvre is 10.0 m. (stern to bow).
9. The multi-buoy mooring berth was designed to accommodate tankers of up to 135,000 d.w.t. in a loaded condition, with deepest draft of 14.0 m.
   When tanker sails from the berth, an initial course of between 000° and 030° is suggested, steaming in a natural channel with a depth of 16.0 m. at Spring tides.
10. The total capacity of storage at the Terminal is 172,000 cu.m.
11. If vessel arrives in the afternoon and manoeuvres are difficult to perform, she will anchor until the next morning.
    Unmooring by night-time is not allowed, except in emergency situations and with tug assistance.
12. Since vessels are at an offshore terminal, engines must be kept ready for sailing at any time.
13. No dirty ballast or slops can be received. Tankers must arrive with clean or segregated ballast.
    Any discharge of dirty ballast oil remains, or oil, into the sea is strictly prohibited. Heavy fines will be imposed on ships, furthermore indemnity of the disbursements originated by pollution and its effects on the environment.
14. Any emergency message can be sent on VHF Channel 16 or SSB emergency channel.

MEDICAL: Several physicians and dentists, health service and hospitals are available at any time, according to request sent by Agent. For emergency cases, first aid may be provided by Terminal.

BALLAST: Tankers must arrive on berth with clean or segregated ballast, in order to permit mooring with the best conditions. Cargo tank cleaning is not allowed. There is no provision to receive ballast water at the Terminal.

CONSULS: No consular representatives are reported in the area.

REPAIRS: Some repairs can be effected on request through the Agent, including engine, pumps, deck, electrical and electronic devices.

TIME: The local time is GMT minus 3 hours. Summertime is often used between October and February, changing the Zone to GMT minus 2 hours.

WEATHER: Most of the time in a year, local meteorological conditons are favourable for tanker's operations.

Rainy Days: The annual average precipitation is 408 mm. The periods starting from March and going to the middle of August is known as rainy season (Winter).

Visibility: 10 nautical miles by daylight, except in stormy weather.

Temperature: The medium annual temperature is 28°C, and varies from 22°C minimum to 34°C in the Summertime.

Atmospherical Pressure: The medium yearly atmospheric pressure is 1040 mb.

Relative Air Humidity: The relative humidity is high, its yearly average staying at about 87%.

Remarks: No meteorological station can be found in the area. However, navigators can get this kind of data by calling PPR (Radio) or PWZ (Brazilian Navy Radio) for details. Listas de Auxilios – Radio (DHN-8).

Wind and Waves: Main winds blow from S.E., East and N.E., depending on the season. From March to August, the prevailing wind comes from S.E. (Quadrant 130° – 160°). Its intensity is moderate to strong.

From August to mid-October, the Easterly moderate wind prevails. From October to March, the main winds blow from N.E. (Sector 050° – 070°) strong from noon to break of dawn, when it turns to East-S.E. and stays weak until the next day.

Waves in the area result from the prevailing wind. If the wind blows from S.E., the medium height of the waves is 2.5 m. East and N.E. winds lift surges of 4.0 m. height.

Currents: Because the tidal flow overbalances the ocean stream, currents in the multi-buoy mooring system area are almost fully born by the tidal motion, often reaching 3 knots.

Sometimes strong superficial currents make manoeuvring difficult.

Tides: High and low tides in Guamare Terminal occur 30 minutes – 40 minutes before they do in Macau Port, and can be obtained from the Tide Schedules.

GENERAL:

Engine Repairs: No repairs can be done after submission of Notice of Readiness.

Mail: There is a regular Post Office service in Guamare and Natal. Official mail is to be sent to Agent's care. The facility does not assume any responsibility for these services.

Provisions and Stores: No equipment or personnel are provided by the Terminal for handling supplies. In emergency cases, authorisation from Departamento de Transporte (DETRAN) or from Superintendent of the Terminal must be arranged through ship's Agent.

Chart Supply: No nautical charts, sailing guides or other publications are provided by the Terminal or available in Guamare or Natal. However, these periodicals can be obtained by the ship's Agent or FRONAPE, if requested in advance.

Nautical Charts and Publications: The following charts and publications are used to approach the Terminal and may prove helpful:

Brazilian Charts: DHN 700 and 720.
English Charts: B.A. No. 3955.
American Charts: USNDO 24.240.
Publications: North Coast Guide Book DHN-1.
Lighthouse List, DHN-2.
Radio Aids, DHN-8

Demurrage: Aiming at contributing to the vessel's operational economy, Masters are asked to cooperate with representatives of the Terminal in all attempts to lower demurrage.

Any delay considered as unnecessary or extensive must be reported to Mooring Master, who will contact the Shift Supervisor, in order to provide corrective measures in time. Ships will moor by preference in the morning, between 0600 hrs. and 1100 hrs., making good use of the atmospheric conditions and the favourable state of the sea, typical of that period, unless stormy weather is experienced.

Tankers, whose deballasting time exceeds the period fixed in the Charter Party, will be subject to Claim and to demurrage debt.

Flags: National flag and "Bravo" Jack (dangerous cargo) from international signal code must be flown from Brazilian and foreign vessel's foremast during the vessel's stay in port, from 0800 hrs. to sunset.

Visit by Port Authority: Vessels proceeding from abroad will be subject to Health and Customs Authorities and also Dispatcher Visit. The papers mentioned below will be asked for on ship's arrival:

(a) Port Clearance from last port.
(b) Crew List (3 copies).
(c) Crew Personal Effects List (3 copies).
(d) Stores List, engine, deck, cabin and Customs cleared goods (3 copies).

Cargo Manifest: Issued by FRONAPE Agent in Natal City.

Passengers: (If any). Due to transport difficulties as well as embarkation and disembarkation difficulties at the mooring buoys berth area, passengers are not allowed to land, except with the permission from the ship's Master and a boat provided by the Agent.

Personnel Left Ashore: In case any crewmen are left on shore for hospital attendance, repatriation or other reasons, all costs will be at Owner's expense, except if he who has been left behind is a FRONAPE vessel's sailor.

Sea Pollution: Brazilian laws are very strict regarding oil pollution in waters alongside the coast.

No dirty ballast, food remains or any kind of debris can be thrown into the sea.

Heavy fines will be imposed on ship, and indemnity of the disbursements caused by pollution and its effects to the environment.

All items of Operational Safety Control List are to be accomplished.

Remarks: The above mentioned fines will be imposed according to the ship's tonnage, that is, 2% of minimum salary running in the country by each deadweight ton (d.w.t.), no matter what the pollution extent and other legal penalties to be applied. Items of that list not able to be satisfied must be expressed in the Remarks space.

Public Visits: While the tanker is loading on berth, no visits will be allowed. Going on board will only be permitted to PETROBRAS employees whose job requires their presence, or to Port Authorities, experts, technicians, etc.; or in case of someone being authorised by the ship's Master.

Radio-Transmission While Vessel is Berthed: No radio-transmitters can be activated while the vessel is moored on the berth.

The infringement of this rule will lead to sending a Letter of Protest to vessel and being fined by the Port Authorities.

Use of Walkie-Talkies: Handy radios must be of the anti-detonation type (intrinsically safe). The Terminal will deliver some 464/1650 MHz UHF walkie-talkie radios for exclusive use in ship/shore operations. A VHF radio settled on CCC and within Terminal range is required whenever a tanker is at the facility for loading operations.

AUTHORITY: *Head Office:* Petroleo Brasileiro S.A. (PETROBRAS), Dutos e Terminais do Norte e Nordeste, Rodovia PE 60, Km. 10 s/n, Ipojuca, PE, CEP 54500-000, Brazil. *Tel:* (081) 527-1077.

In Rio Grande do Norte, the DTNEST has a representative in Natal: Gerencia do Nordeste II – GENEST II, Av. Interventor Mario Camara, 2783 – Bairro Nazare, Natal, RN, CEP 59074-600, Brazil. *Tel:* (084) 235-4120. *FAX:* (084) 235-3540.

ILHEUS (Malhado): 14.47 S. 39.02 W. **(See Plan)**

PORT LIMITS: The Port is limited by the line which goes from the estuary of the river Almada to the Ilheu Grande, and then as far as the Southern end of the Sororocas Parcel.

From there towards the Pernambuco Morro, and then going along the Pontal Coast towards the Airfield, and from this point to the Southern extremity of the Island of Frades, and then turning towards Pedra Point, and going from there following the left bank of the River Cachoeira, then continuing along the coast to the estuary of the River Almada.

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage is controlled by the Captaincy of the Port. It is compulsory for foreign vessels of any large tonnage; for oil tankers; for propane carriers; for vessels of any size carrying explosives and for chartered, oceangoing tug boats, whether Brazilian or foreign, that are not captained by a Brazilian officer or that do not include in their crew

a Brazilian officer of the category of Nautical Officer or Master of Short-haul Cabotage. The Pilotage zone goes from the Ilheu Grande anchorage ground, marked on Chart No. 1201 of the DHN, to final berthing place.
Request for Pilot: The request for a Pilot must be made with at least 4 hours' advance notice. Pilot service in Ilheus is provided by the Pilots Association of Ilheus, with offices in the Cidade de Ilheus Building – Room 705 – Tel: (073) 231-5711. Fax: (073) 231-8439.
ANCHORAGE: Marked on charts (DHN Chart No. 1201).
Normal Anchorage: At the beginning of the access channel, with a depth of 12 m. Anchoring in the 100 m. stretch along the Wharf and in the Access Channel is forbidden.
Quarantine Anchorage: An area of 500 yards radius with its central point located at Lat. 14° 45′ 30″ S., Long. 39° 01′ 00″ W.
RESTRICTIONS: *Access Channel:* Length 1,000 m., width 200 m., depth 10 m.
Manoeuvring Basin: Length 560 m., width 200 m., depth 10 m.
Navigation Dangers: The passage between the Itaipins reefs and the Ilhote de Itapitanga should be avoided. When sailing South of the Parcel das Sororocas, the Ilheus Lighthouse should no be sighted at less than 270° until the Ilhote de Ipitanga/Ilheu Grande line has been crossed.
HEALTH: Port doctor visits all ships on arrival and requires Maritime Declaration of Health, Derat Certificate, 2 Crew Lists. Vessels from another Brazilian port automatically receive Free Pratique and should not fly Quarantine Flag. If suspected disease or fever on board it is advisable to cable Agent before arrival. Vessels can receive Pratique at any time.
TUGS: Available.
BERTHING: There is a total of 432.5 m. of quay available (3 berths), depth alongside 10 m. The wharf extends 110 m. West from the breakwater. Loading rates for bagged cargo of cocoa and coffee approximately 30/45 t.p.h. per gang. Discharge of bulk wheat by grab. Tankers moor partially off the quay to a stern buoy.
PORT EQUIPMENT: 1×24 ton P & H mobile crane(not working); 1 bucket loader of 1.6 cu.m., 1 bucket loader of 1.25 cu.m., 2 portal cranes of 6.3 tons and 3 portal cranes of 3.2 tons; 25 fork-lift trucks of 2 tons – 3 tons capacity and 1 × 30 tons for full containers.
STEVEDORES: Arranged by Agent.
MEDICAL: All facilities available. If doctor needed on arrival or making emergency call to land sick persons, cable ETA 12 hours before arrival.
TANKERS: Almirante Jeronimo Goncalves Terminal owned by Frota National de Petroleiros. Buoy mooring. (Pipe-line 12 in. × 2,600 m.).
LPG/LNG handled at Berth No. 102 of the Commercial Wharf.
FRESH WATER: Available. Rate 8 cu.m.p.h.
FUEL: Supplied by Petrobras road tankers.
CONSULS: Portugal (others at Salvador).
REPAIRS: Workshop belonging to Port Administration. Minor repairs only.
WATCHMEN: Compulsory.
HATCHES: By stevedores.
CUSTOMS ALLOWANCES: Only sufficient tobacco for daily use. No alcohol to be taken ashore.
REPATRIATION: Can be arranged via Rio de Janeiro and Brasilia.
AIRPORT: Situated at Pontal, 3 km. from the port.
TIME: GMT minus 3 hours.
HOLIDAYS: *National:* 1st January, 21st April, 1st May, 7th September, 12th October, 15th November, 25th December.
Municipal: Fixed: 23rd April, 28th June, 2nd July, 15th August.
Movable: Good Friday and Corpus Christi.
Traditional: Movable: Carnival – Tuesday (Mardi Gras) and Ash Wednesday.
Fixed: 2nd November, 24th June.
POLICE/FIRE/AMBULANCE: Police tel. 2530; Ambulance 3274 (Regional Hospital).
TELEPHONES: No connection to vessels can be made.
SERVICES: Diving service available.
SHORE LEAVE: Allowed with identity card.
IDENTIFICATION CARDS: Necessary to go ashore.
GARBAGE DISPOSAL: Collection service is made by the local town hall. Two containers and some drums are available alongside the quay, where the garbage should be placed. There is no charge for this service, which may be used 24 hours a day.
WASTE OIL DISPOSAL: When service required Petrobras should be contacted. Tel: (073) 231-1058
SEAMAN'S CLUBS: All information is available at the Port Captain's office in Ilheus(Ba.) Rua Major Homem Del Rey, 216 Cidade Nova, Ilheus, Bahia, Brasil 45.660. Tel: (073) 231-2912.
CURRENCY: Cruzeiro (Cr$).

SHIPMASTER'S REPORT: December 1982
Pilotage: Pilot is ordered by vessel's Agent and can be confirmed by VHF on Channel 16.
Tugs: Two tugs available (one of 125 h.p. and the other 130 h.p.) assist when going alongside.
Berthing: The pilot boat also assists in bringing the lines ashore. There is a total of 432.5 m. of quay available. Tankers and also general cargo vessels sometimes moor partially off the quay to a stern buoy.

AUTHORITY: Port of Ilheus (PORTIL), Avenida Almirante Aurelio Linhares No. 432, Ilheus, Bahia, Brazil, Zip 4560 . *Tel:* (073) 231-3318, 231-3173. 231-1962 (Management). *Telex:* 732118. *FAX:* (073) 231-1300. *Contact:* Flavio Martins Pimentel, Port Manager.

IMBITUBA: 28.13 S. 48.38 W. (See Plan)

DOCUMENTS: See "General" before first port.
PILOTAGE: Compulsory. Pilot ordered by ship's Agent. The Pilots have a launch with VHF equipment which is normally moored within the port and can be contacted on VHF Channel 16. The point for awaiting the Pilot is in the anchorage, in the outer part of the port, (Chart 1.908 of the Directorate of Hydrography and Navigation).
ANCHORAGE: The anchorage, near the port, is on the alignment Silo-Ponta da Ribanceira, with a depth of 12 m., and sand bottom. It is sheltered from South, North and West winds, but not so from Easterly winds.
RESTRICTIONS: The port is situated in an open inlet, with a width of approximately 3,000 m., but presenting in its external area the shallow water characteristic of the Rocks of Imbituba, with the lowest depth of 8.7 m., and the Rocks of Aracaju, with the lowest depth of 6.9 m. The sea above the rocks is normally shallow, and it is dangerous to navigation, even for vessels of small draft.
MAX. SIZE: There is no major restriction with regard to the length of vessels. The manoeuvring basin, inside the port, is 315 m. long and more than 10 m. deep. Vessels of a length of 200 m. operate normally. Max. draft 31 ft.
HEALTH: See "Itajai".
RADIO: Messages from vessels for Agents or from the latter to vessels must be sent via the EMBRATEL, which has Coastal Stations at Laguna and Florianopolis.
VHF: Port Authority on Channel 16.
TUGS: One tug, "Mar de Espanha", length 28 m., beam 8.3 m., draft 3.7 m., displacement 276 tons and power 1,680 h.p. It has VHF equipment, and its use is advisable when berthing and unberthing.
BERTHING:

Berth (No.)	*Length* (m.)	*Depth alongside* (m.)	*Max. Length* (m.)	*Size of Vessel Beam* (m.)	*Draft* (m.)	*Approx. d.w.t* (Tons)
101	200	9.5	190	28.0	9.5	38,000
201	108	9.5	150	22.0	9.5	15,000
301	250	10.0	220	28.0	9.5	60,000
401	24	8.0	Ro–Ro Vessels particulars			

Berth 101 is used for shipment of coal.
Berth 201 for general cargo, is an extension of Berth 101.
Berth 301 for bulk cargo and general cargo.
Berth 401 is a Ro-Ro terminal.
CARGO HANDLING FACILITIES: Berth 101: A conveyor system with loading capacity of 350 t.p.h. and a shoot system (8,000 tons) with two grab cranes. This system has a capacity of loading of 500 t.p.h., giving a total nominal loading capacity of 850 t.p.h. of coal.
Berth 201: Uses derrick or ship's cranes, with the possibility of assistance from port cranes.
Installations for unloading and storage of bulk liquid caustic soda are available at Berths 101 and 201.
Berth 301: A continuous shiploader for coal at 1,000 t.p.h. and a multi-purpose crane with 16 tons capacity for bulk and general cargo handling. Installation for loading phosphoric acid at rate of 400 t.p.h. is available.
CRANES: 2×8 tons electric rail-mounted grab cranes, 2×8.2 ton diesel crawler grab cranes and 1×16 ton electric rail-mounted multi-purpose crane.
STEVEDORES: Stevedoring service is carried out by port employees, with the addition per shift of personnel of the Imbituba Union of Stevedores, Imbituba and Laguna loading and discharge tallymen, Imbituba trimmers and workers in the Port Services of Imbituba. Working is 24 hours a day every day in the port, with the following shift arrangement:
By Day: Common day work from 0730 hrs. to 1100 hrs., lunch from 1100 hrs. to 1230 hrs., common day work 1230 hrs. to 1630 hrs.; first extension from 1630 hrs. to 1830 hrs., 2nd extension from 1830 hrs. to 1900 hrs.
By Night: Common night work from 1900 hrs. to 2300 hrs., meal break from 2300 hrs. to 2400 hrs., common night work from 0000 hrs. to 0400 hrs., 1st extension from 0400 hrs. to 0600 hrs., 2nd extension from 0600 hrs. to 0700 hrs.
It is necessary to make a prior agreement between the Master of the vessel and the Agent to ensure the necessary number of shifts, and the availability of other resources for loading or unloading.
MEDICAL: The Agent must be advised in advance as to the need for medical assistance. Imbituba has a hospital with 100 beds. Specialised medical assistance is available in Tubarao (45 km.) Criciuma (100 km.) and Florianopolis (100 km.), from the port on national highway BR 101.
DENSITY: 1025.
FRESH WATER: Fresh water supplied from hydrants on quays. Rate of delivery is 10 t.p.h.
FUEL: Various grades of gas oil and diesel can be supplied by road vehicles.
CONSULS: At Florianopolis and Porto Alegre.
REPAIRS: Some types of deck and engine-room repairs are possible.
SURVEYORS: Ship Surveyors available locally.
WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Normally by ship's crew.
REFUSE COLLECTION: Drums on Berths No. 1 and 2. There is no refuse collection on Berths No. 3 and 4.
AIRPORT: At Florianopolis, 100 km. away from the port, where regular scheduled flights are handled.
TIME: GMT minus 3 hours.
HOLIDAYS: *National:* 1st January, 21st April, 1st May, 7th September, 12th October, 15th November, 25th December.
Municipal: 21st June, 2nd November, 8th December.
Movable: Good Friday and Corpus Christi.
POLICE/AMBULANCE/FIRE: Police call 550099, ambulance available in the harbour area and fire call 193.
EMERGENCY CO–ORDINATION CENTRE: Delemar Imbituba Tel. 550276. (Local station of Brazilian Navy).

SHIPMASTER'S REPORT: October 1992.
Ro/Ro Berth: The vessel was to load buses having the following dimensions: Length 13.0 m., width 3.75 m., under-clearance between road and body 0.60 m.

Owing to the height of the Ro/Ro berth being 0.50 m. at high water, and the position of the vessel's starboard stern ramp being at 10.85 m. from the keel, the vessel could not load the buses.

If the Master has an idea about the height of the quay, the vessel will lie at, then the planning about cargo operations becomes simpler.

AUTHORITY: Companhia Docas de Imbituba, Av. Graca Aranha, 226-8° Andar, Castelo, Rio de Janeiro, CEP 20030, Brazil. *Tel:* (021) 2404445. *Telex:* (021) 23568 EACB BR. *Cables:* Imbitubadocas.

At Imbituba: Av. Presidente Getulio Vargas S/N, Imbituba, Sta. Catarina, Brazil, CEP 88780. *Tel:* (0482) 550080. *Telex:* (0482) 421 DOIM BR. *FAX:* (0482) 55 0701. *Contact:* Port Manager.

AGENT: Wilson Sons Agencia Maritima Ltda., Rua Nereu Ramos 326, Centro 88780-000 SC. Tel: (0482) 55-0264 (After hours: (048) 255-1636). Telex: (48) 1085. Fax: (048) 255-1895.

ITAJAI: 26.54 S. 48.36 W. (See Plan)

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory. To await or to receive Pilot, anchor from 0.5 to 5 miles East of South Breakwater.

Pilot Station has VHF Radio; telegrams can also be addressed to Pilot Station in Itajai, but customary to send all advices to Pilot Station via Agents. Call Pilot on VHF Channel 14/16 on arrival.

Pilot Station has 2 launches painted red with a "P" on side and on funnel. Launches always anchored inside port. In case of bad weather, vessel must wait for instructions in Porto Belo Bay, South of this port, and in case of bad weather on sailing, if impossible to disembark Pilot in entrance of bar, must be done in Porto Belo Bay.

ANCHORAGE: Waiting anchorage situated in Enseada de Cabecudas, up to 2 miles distant from South Light, depth of 9 m. in position Lat. 26° 54′ 08″ S., Long. 48° 36′ W.

RESTRICTIONS: Vessels can enter or sail at any tide with a max. draft of 30 ft. Vessels with a length over 185 m. can enter and sail in daylight only.

Depths: Depth at Bar – 30 ft. Access Channel – width 100 m., depth 30 ft. Manoeuvring Basin – width 250 m., depth 30 ft.

Also see 'Shipmaster's Report' dated November 1993.

MAX. SIZE: Max. length 250 m. for dry cargo vessels.

HEALTH: When coming from abroad, vessel will be visited by Health Authorities, who issue Free Pratique after inspection. When coming from another Brazilian port, Free Pratique issued in previous port is sufficient. This document must stay on board, to be presented in subsequent ports. In case of sickness on board, after receiving Free Pratique, Master must contact Agent who notifies Health Service.

RADIO: For telegrams (radio) direct from vessel to Agent, or vice-versa, Departamento de Correios e Telegrafos radio station in Itajai, Santos or Florianopolis, with prefixes: Santos PPS, Florianopolis PTC, Itajai PCC.

TUGS: "Anapolis" (1,680 h.p.), "Afonso" (1,820 h.p.) and "Caribe" (1,820 h.p.).

BERTHING: Length at quay, 740 m., depth alongside 30 ft.
Berth 1: Priority is given to full container and Ro-Ro vessels.
Berth 2: Preference is given to full container, Ro-Ro and general cargo vessels.
Berth 3: Preference is given to reefer vessels, if there is no programming to sugar vessels for berthing.
Berth 4: Preference is given to reefer vessels.
Storage:

Warehouse 1	Capacity 33,500 cu.m.
Warehouse 2	Capacity 53,500 cu.m.
Warehouse 3	Capacity 33,500 cu.m.

Store Yard/Container: 46,000 cu.m.
Storage Outside:
Storehouse Reefer (Private Enterprise): 27,000 cu.m.
Storehouse/EADI: 31,000 cu.m.
Storage Yard/Container: 52,489 cu.m.
Storage Yard: 121,450 cu.m.

Oil Storage/Private Terminal: 23 tanks – 14,060 cu.m. (Petrol); 6,988 cu.m. (Diesel oil); 941 cu.m. (Paraffin); 6,686 cu.m. (Fuel oil). 28 gas tanks – 3,112 cu.m.

Chemical Products/Dow Chemicals Terminal: Caustic soda – 12,000 tons.

Equipment: Stacker Trucks (Top loaders): 4×1 tons, 13×1.8 tons, 44×3 tons, 4×3.5 tons, 2×5 tons, 8×7 tons, 1×12 tons and 5×37 tons.

Tractors: 3×90 h.p.

CRANES: 1×20 tons mobile crane for containers and 2×1.5 tons, 1×4 tons, 1×5 tons and 4×3.2 tons Portal cranes.

MEDICAL: In urgent cases, advise Agent requirements in advance. Hospital available (573 beds). Normally no special vaccination required, nor presentation of certificates.

DENSITY: During low tide whole port is influenced by fresh water of River Itajai – Acu, situation changing at high tides.

Mean density: River 0.999. Sea: 1016.7.

STEVEDORES: When vessel arrives in morning, advisable that Master advises in advance number of gangs he will need so that Agency can make arrangements.

When discharging dry bulk cargo (grain or salt) trucks with special equipment used.

Average for loading: *(a)* Timber 240 tons/gang day. *(b)* General Cargo 300 tons/gang day. *(c)* Bags and Tobacco 200 tons/gang day. *(d)* Reefer 150 tons/day gang. *(e)* Containers 15 TEU/gang hour.

For discharging: *(a)* General Cargo 220 tons/gang day. *(b)* Bulk 240 tons/gang day.

Hours as follows: 0700 to 1100 hrs.; 1230 to 1630 hrs.; 1900 to 0100 hrs., except container vessels and Ro-Ro, 1900 to 0600 hrs.

TANKERS: 5 private oil terminals where vessels 155 m. length and 22 ft. draft discharge.
Shell Terminal:
Fuel oil 10 in. for discharging 8 in. for loading.
Diesel 6 in. for discharging 4 in. for loading.
Gasoline 6 in. for discharging.
Kerosene 6 in. for discharging.
Esso Terminal:
Fuel oil 8 in. for discharging 4 in. for loading.
Diesel oil 6 in. for discharging 4 in. for loading.
Gasoline 6 in. for discharging.
Kerosene 4 in. for discharging.
Atlantic Terminal:
Diesel 6 in. for discharging.
Gasoline 6 in. for discharging.
Kerosene 6 in. for discharging.
Ipiranga Terminal:
Diesel 6 in. for discharging.
Gasoline 6 in. for discharging.
Kerosene 6 in. for discharging.
Heliogas Terminal:
Gas 6 in. for discharging liquid 4 in. for discharging vapour.

FRESH WATER: Available, supplied direct by hydrants (12×2 in.) along quay. Average supply 10 cu.m.p.h.

FUEL: No bunkering facilities in the port. Small quantities can be supplied by truck. See "General" before first port.

REPAIRS: Almost all repairs on engines or deck possible.

SURVEYORS: Det Norske Veritas, Lloyd's Register, Bureau Veritas and Germanischer Lloyd have local representatives. Independent marine surveyors are also available.

GANGWAY/DECK WATCHMEN: Not compulsory, but recommended.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Customs open bond every 5 days for issue.

REPATRIATION: Repatriation, normally made by Agents via Rio de Janeiro and/or Sao Paulo.

AIRPORT: Navegantes Airport is situated about 10 km. from port. Daily regular flights to Sao Paulo, Porto Alegre, and Rio de Janeiro by Varig and Rio Sul Airlines.

TIME: 2nd Mar. – 30th Nov. GMT minus 3 hours. 1st Dec. – 1st Mar. GMT minus 2 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Tiradentes (April 21st); Labour Day (May 1st); Foundation of Itajai (June 15th); Independence Day (September 7th); Aparecida Holy Lady (October 12th); Corpus Christi; Proclamation of the Republic (November 15th); Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Police 190; Ambulance 193; Fire Brigade 193.

TELEPHONES: There are no facilities for placing telephones on board.

IDENTITY CARDS: Foreign crew members not permitted to go ashore without presentation of identity card, on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police who will return it to the crew member on re-embarkation.

GARBAGE DISPOSAL: Collection service is available daily and is free. Service provided by City Hall.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Cruzeiro. There are no currency exchange restrictions for seafarers.

SHIPMASTER'S REPORT: November 1993 (Updated 1996).
Restrictions: Actual maximum draft allowed by Port Authority and Pilot is 30 ft. at any time.
Berthing: Depths at Manoeuvring Basin and at all berths are given as 30 ft.

Height of tide is sometimes very different from the Admiralty Tide Tables, and subject to variable and unpredictable rising and falling of the river. On this visit, I observed a difference of 0.6 m. between the 2 subsequent low tides when the Admiralty Tide Tables gave only 0.1 m.

AUTHORITY: Administradora Hidroviaria Docas Catarinense – ADHOC. Administracao do Porto de Itajai, Av. Cel. Eugenio Muller 622, P.O.Box 244, CEP 88301-090, Itajai – SC, Brazil. *Tel:* (047) 348-0722 (6 lines). *Telex:* (047) 3121. *FAX:* (047) 348-0512. *Contact:* Marcelo Werner Salles, Port Director.

Port Captain: Av. Cel. Eugenio Muller 106, CEP 88301-090, Itajai – SC, Brazil. *Tel:* (047) 348-0129.

LAGUNA: 28.30 S. 48.46 W. (See Plan)

LOCATION: The port is situated in the State of Santa Catarina on the left bank of the connecting channel of the Lake of Santo Antonio with the Atlantic Ocean.

APPROACHES: The area is covered by D.H.N. Chart No. 1901. The access channel is 1,300 m. long, 80 m. wide and 6.2 m. depth. Tidal range 0.84 m.

PILOTAGE: Compulsory. Tel: (0486) 440075.

ANCHORAGE: Recommended anchorage is at the entrance off the bar.

BERTHING: The manoeuvring basin measures 300 m. × 120 m., with a depth of 5.0 m. The quay is 300 m. long, depth alongside 5.0 m. Port used by fishing vessels only.

Freezer Installations: Ice Factory. Capacity 50 tons/day. Ice Garner capacity 100 tons. Freezing Tunnel (2) with capacity of 48 tons/day at −35°C. Freezer Capacity 800 tons at −30°C. Waiting Freezer. Capacity 160 tons at −2°C.
EQUIPMENT: 1 Electric Crane with capacity of 1.0 ton. 1 fish and ice separator machine.
FRESH WATER: 715,000 litres capacity reservoirs.
FUEL: Diesel oil available. 3 storage tanks.
REPAIRS: Workshop for repairs in the port area.
AIRPORT: Nearest commercial airport is at Florianopolis, 130 km. away.
HOLIDAYS: In addition to National holidays, local holidays are 2nd February, 13th June and 18th June.
GARBAGE DISPOSAL: There is a garbage collection service sponsored by the City Hall, and its cost is paid by the Port in the public taxes. The garbage is collected once a day.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
CURRENCY: Cruzeiro (CR.). The American dollar is also accepted almost everywhere, or can be exchanged at the local banks.
AUTHORITY: Administracao do Porto de Laguna, Avenida Getulio Vargas 728, P.O.Box 39, 88790 Laguna, Santa Catarina, Brazil. *Tel:* (0486) 440183. *FAX:* (0486) 440536. *Contact:* Eng.Marcelo Werner Salles, Port Administrator.

Port Captain: Avenida Brito Peixoto 72, Laguna. *Tel:* 440196.

MACEIO: 09.40 S. 35.44 W. (See Plan)

PORT LIMITS: Limited to the North by the shore, to the South by the mole, to the West by the Atlantic Ocean and to the East by the access mole (Lat. 09° 41′ S., Long. 35° 44′ W.). The Marine terminal of Salgema (Lat. 09° 41′ S., Long. 35° 46′ W.) is located between the beaches of Trapiche and Ouricuri where can be seen the distinctive cylindrical tanks for storage of the products of Salgema Industrias Quimicas S/A. There is a mole emerging from Trapiche beach extending seawards 145°, for about 1,000 m., and at the end of which is a quay. From the mole and extending Southwards is a submarine pipe-line for disposal of residues from the terminal.

The Sugar Institute (IAA) accepts Notice of Readiness only after having been signed by Surveyor to the effect that holds are in all respects ready to receive cargo.
DOCUMENTS: See "General" before first port.

Port Health, Customs and Maritime Police board vessels alongside. However vessels from Eastern bloc countries are boarded at the anchorage.
PILOTAGE: Compulsory. A request for a Pilot can be made via the ship's Agent, 12 hours in advance, specifying the time of entry of the vessel, and from which point pilotage is required, via radio station Amaralina (PPA) or Olinda (PPO). The Pilot boards and leaves vessels 0.5 miles to the West of the Peixe-Pau Buoy and 1 mile from the mole light.
Pilots' Association: Rua Sa e Albuquerque No.467-Room 17, Jaragua-Maceio-AL. Tel: 223-2203 and VHF radio on Channels 9, 13, 14 and 16. Listening Channel is 16. Vessels may anchor off Peixe-Pau Buoy in bad weather.
ANCHORAGES: Vessels anchor outside the area marked as "Anchoring forbidden" on the Chart 901 of the DHN.
Quarantine Anchorage: To the seaward of the Peixe-Pau Buoy.

Vessels are not permitted to anchor in the port basin.
RESTRICTIONS: Max. permitted speed between the Peixe-Pau Buoy and the port is 6 knots.

No restrictions on length. On approaching the port attention must be paid to the shallows existing to the N.W. of the Peixe-Pau. The average depth is from 10 m. to 15 m. Vessels may enter day and night. Pilot refuses to berth tankers after nightfall.
MAX. SIZE: Vessels have loaded up to 33 ft. draft.
HEALTH: No Health Authorities board vessel. In event of suspected disease or fever on board, advise Agent by cable so that Port Authority may take appropriate action.
RADIO: Radio Olinda (Recife), call sign PPO. Radio Salvador, call sign PPA.
TUGS: One tug available, bollard pull 20 tons.
BERTHING: 6 Berths (4 for general cargo and 2 for sugar) available day and night, weather permitting.

Sugar Terminal: Facilities for loading bulk molasses. Projected loading capacity 1,000 t.p.h. of bulk sugar, 300 t.p.h. molasses.

Sugar Wharf: 250 m. length. General cargo wharf 500 m. length. Depth alongside 33 ft.

One quay for loading the products of Salgema Industrias Quimicas S/A (Maritime Terminal of Salgema). This quay is located at the end of a mole some 1,000 m. long starting at Trapiche beach and extending seawards 140° (Lat. 09° 41′ S., Long. 35° 46′ W.).

The average depth of water in the port is 10 m., and at the Salgema Terminal 8.8 m.

In order to be admitted with safety into the port and terminal, vessel's length must not exceed 250 m. and 157 m., respectively.

The sugar quay has 10 bollards and the general cargo quay 16. At the Salgema Terminal Quay, only 1 vessel is berthed at a time.
Cargo Handling Facilities: There are 6 warehouses, 5 being 80 m.× 80 m. for general cargo and 1 of 200 m.×50 m. for Demerara sugar (200,000 tons).

There is a tank with a capacity of 4,000 cu.m. for alcohol and another for molasses with the same capacity. There is a refrigerated store with a capacity of 200 tonnes.

There is an open storage area covering the whole extension of the general cargo quay measuring 20,400 sq.m.

There are 5 stacker trucks, 4 with a capacity of 2 tons and 1 of 7 tons.

There are 2 mechanical sugar loaders with total capacity for shipment of 4,000 bags per hour, and 1 bulk sugar mechanical loader of 1,000 t.p.h. capacity.

There is 1 mechanical grain suction unit with capacity for unloading 100 t.p.h.. There is 1 bulk grain distributor with scales for loading lorries.
CRANES: 4×3.2 ton and 2×6.3 ton capacity electric cranes.
STEVEDORES: ETA required 24 hours before arrival to arrange gangs. When work required Saturdays and Sundays, ETA must be sent on Friday. Loading/discharge – General: 8 t.p.h. per gang. Sugar 20 t.p.h. per gang. Grain 60 t.p.h.
MEDICAL: No advance notice needed except if vessel due to arrive on Saturday/Sunday in order to arrange doctor and/or hospital. Hospital facilities available.
TANKERS: One tanker berth. Max. draft 33 ft. One pipeline 8 in. for gasoline and one 6 in. for diesel/kerosene.

Tanks: Petrobras, 9 tanks with total capacity of 38,929 cu.m.
Atlantic, 9 tanks with total capacity of 14,482 cu.m.
I.A.A., 1 tank for molasses with capacity of 7,000 tonnes.
FRESH WATER: Fresh water available. Pipeline from water tower by gravity. Rate about 5 t.p.h. 11 points at the general cargo wharf and 5 points at the sugar wharf.
FUEL: Diesel fuel oil and fuel oil 'A' (PPF) is supplied by Esso, Texaco, Shell, Atlantic and Petrobras, by gravity from tanker trucks. The availabilities are minimal, as the storage capacity is small, at times there being no products available. Orders must be placed 24 hours in advance. Also see "General" before first port.

CONSULS:				
	Norway	2276	Portugal	2449
	Italy	3302	France	2126
	Spain	2640		

REPAIRS: Small repairs only can be effected.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCES: One carton cigarettes to be declared. One bottle alcohol, open, to be declared.
REPATRIATION: Carried out by Recife Consulates.
AIRPORT: Airport at Palmares, distance 30 km. Served by Varig, Vasp and Transbrazil.
TIME: GMT minus 3 hours.
HOLIDAYS: Work prohibited on Labour Day only. Other days on which work is considered overtime and charged as such are: 1st January, Good Friday, 7th September, 15th November and 25th December.
Local Holidays: 16th September and 27th August.
POLICE/AMBULANCE/FIRE: Police 221-5348; Ambulance 241-2288 and 241-1488; Fire Brigade 223-2447 and 193.
TELEPHONES: Telephone on quayside. If telephone required onboard 48 hours notice required.
IDENTITY CARDS: Foreign Crew members not permitted to go ashore without presentation of Identity Card, on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The Identity Card must be delivered on disembarkation to the Federal Police who will return it to the Crew member on re-embarkation.
GENERAL: Prevailing winds: Summer months – N.E. Rainy season – S.E. with strong South winds during July/August/September and strong undertow during August/September.
DEVELOPMENTS: The Salgema marine terminal has been built across the bay. It consists of a jetty 1,300 m. long. The loading platform will allow 18,000 d.w.t. vessels to load in 7.6 m. depth.

Loading Caustic Soda	12 in. line	330/350 cu.m./hr.
Ethylene Chloride	10 in. line	330 cu.m./hr.
Ethylene Cryogenic	8 in. line	330 cu.m./hr.

AUTHORITY: Administracao do Porto de Maceio, Rua Sa de Albuquerque, Jaragua, 57000 Maceio, Alagoa, Brazil. *Tel:* (082) 231-1999. *Telex:* 822153. *Contact:* Lafayete Pacheco Neto, Administrator.

MANAUS: 03.08 S. 60.00 W. (See Plan)

DOCUMENTS: See "General" before first port.
PILOTAGE: Pilots join vessel at Belem and make the round voyage back to Belem. Vessels entering via North Channel take a Pilot at Santana. No Pilots from Barra Norte to Santana.
ANCHORAGES: Suitable places can be indicated by the Pilot.

Anchorage for vessels over 3,000 g.r.t. Lat. 03° 09′ 00″ S., Long. 60° 01′ 48″ W.

Anchorage for vessels of less than 3,000 g.r.t. Lat. 03° 09′ 00″ S., Long. 60° 02′ 12″ W.

Vessels impounded or requiring considerable repairs Lat. 03° 08′ 30″ S., Long. 60° 02′ 30″ W.

Vessels in quarantine Lat. 03° 08′ 48″ S. Long. 59° 55′ 48″ W.
RESTRICTIONS: Passage across Barra Norte to be made at HW only. Berthing and unberthing preferably takes place at Manaus in daylight.
MAX. SIZE: Entry to the Amazon via the North Channel; max. draft 30 ft. Via Belem; draft 29 ft. with a length up to 175 m. and draft 24 ft. with a length up to 210 m.
HEALTH: See "General" before first port. All ships must be visited by Port Health Inspector. If vessel has passengers in transit for another Brazilian port, another visit will be required at port where passengers disembark. If ship's health condition satisfactory, Inspector will give Free Pratique immediately. Radio Pratique available if Master able declare satisfactory health condition before arrival. Free Pratique is valid for subsequent ports in Brazil.

If there is a crew member to be hospitalised, the Health Inspector will issue pass to hospital on request of Master or Agent who will be made responsible for all expenses incurred.

Inoculations for International Certificates can only be given by an employee of the Port Health Authority.

RADIO: Salinopolis Radio or Rio Radio. There is also Barbados Radio Station at Belem.

TUGS: 1×210 h.p. and 1×1,680 h.p.

BERTHING: Arranged by Agent who asks permission from local Port Authorities to provide a berth. All berths suitable for vessels able to navigate the river.

Two floating stages in "T" jetty form.

Easterly stage 272 m. long. Floating roadway 252 m.

There are 3 cranes on this stage.

Westerly stage 275 m. long. Floating roadway. No cranes.

Water depth 35 m. – 45 m. at both stages.

Warping buoys must be used when leaving stages as there are no tugs.

A third stage is planned.

A stone jetty 500 m. long will shortly be available for year round operations, when it has been fitted with Portal cranes.

Moageria Berth: Used for the discharge of bulk grain, one tube, rate 30 t.p.h.

EQUIPMENT: *Electric Cranes:* 3×3.2 tons capacity (on rails).
Mobile Cranes: 3×10 tons capacity, 1×9 tons capacity, 1×15 tons capacity, 1×50 tons capacity.
Floating Cranes: 1×100 tons capacity (name – "Joao Pessoa"), 1×15 tons capacity.
Fork Lifts: 14×3 tons capacity, 6×5 tons capacity, 8×2.5 tons capacity, 3×25 tons capacity.

Additional fork lifts with 10 tons capacity available.

Trucks: 27 trucks for moving cargo. 2 heavy lift trucks with 45 tons payload. 2 trucks with 10 tons payload.

STEVEDORES: Available.

MEDICAL: Doctors and hospital facilities available.

TANKERS: *Copam Refinery Berth:* A floating pontoon with buoy moorings ahead and astern. Vessel berths starboard side to, using port anchor.

Facilities for crude discharge. Products only loaded. No dirty ballast facilities.

No. 1 Terminal: Vessel lies to 4 buoys, and picks up a floating line, normally attached to the bank. Available for products only.

Also see "Shipmaster's Report".

DENSITY: Fresh water.

FRESH WATER: Not suitable for drinking purposes.

FUEL: Bunker C and Diesel. Available ex-barge or at the terminals.

Petrobras Distribuidora S.A., Av. 7 de Setembro, 1251 s/511. Tel: 232-5482.

Shell do Brasil S.A., Rua Ferreira Pena 222. Tel: 232-5881.

Texaco do Brasil S.A., Av. Presidente Castelo Branco 720. Tel: (092) 234-2980.

Esso Brasileira de Petroleo S.A., Rue Recife, Adrianopolis. Tel: (092) 232-1886.

Also see "General" before first port.

CONSULS: Following countries are represented at Manaus:

Belgium
Bolivia
Colombia
Denmark
Ecuador
France
Germany
Great Britain
Italy
Japan
Panama
Peru
Portugal
U.S.A.

REPAIRS: Very limited facilities available.

GANGWAY/DECK WATCHMEN: Compulsory.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per man. Only normal daily consumption wine/spirits allowed.

REPATRIATION: Can be arranged.

AIRPORT: Regular daily international flights from Manaus Airport.

TIME: GMT minus 5 hours.

HOLIDAYS: *National Holidays:* 1st January, 21st April, 1st May, 7th September, 12th October, 15th November, 25th December.
Municipal Holidays: Good Friday, Corpus Christi, All Soul's Day, 8th December (Devotion to Our Lady the Patroness Saint of Manaus).

POLICE/FIRE/AMBULANCE: Civil Police Tel: 22113; Maritime Police 22315; Fire 21155; Ambulance 21112.

TELEPHONES: Arrangements can be made for telephone connections on board.

SHIP SUPPLY SERVICE: Contact: Helijet Aero Taxi Ltd., Km. 4, Estr. T. Tapajos. Tel: (092) 236-2150 and (092) 236-7611 for helicopter air-lift service.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

SHIPMASTER'S REPORT: June 1993.

Once orders for Manaus were received, the Agent contacted the ship almost immediately asking for ETA at Fazendinha Pilot Staton (off Macapa), and departure times last port. ETAs were required daily for Barra Norte and Fazendinha.

Vessel had been instructed to sail Suape after discharging sufficient cargo to give an arrival draft of 9.14 m. (30 ft.) fresh water at Manaus.

Once vessel had sailed from Suape, a comprehensive set of instructions were received from a sister agency at port of Macapa, giving positions of buoys in Bar and Curua Channel. These were substantially different to charted positions on B.A.Chart No. 2189, the channel being approximately 2 miles S.E. of that charted. Between Buoys 10 and 12, there was supposed to be an obstruction, we were advised to keep 6 cables North of these buoys, which meant passing within 1 cable of Buoys 9 and 11. There was an additional suggestion to cross Bar on a rising tide, early morning. We therefore anchored 1 mile North of Amazonas No. 1, charted as a light vessel, but is a Lanby buoy, radar picked this buoy up at 14.5 miles, light visible at 10 miles. There was an underkeel depth of 3.7 m. when anchored at approximate low water.

Tidal information for the area is confusing, the tide tables only have data for a position off Curua Island, although this is listed as Barra Norte, it is well South of the Bar and channel, at the mouth of the river. The Pilot Book describes how the tide is variable over the entire area, with times and heights being irregular and inconsistent. B.A.Chart No. 2189 has no tidal data, only a current diamond at a point in the middle of the Bar.

Vessel got underway at midnight (8th June) with echo sounder showing a rise in tide of about 0.7 m. Crossing the Bar took 2 hours with a strong adverse current (2-3 knots) throughout, reducing speed to less than 12 knots on sea going revs. The minimum depth encountered was 2.2 m. underkeel (11.1 m. actual). Buoy No. 2 was detected on radar at 14 miles, visually 9 miles, its position agreeing with that given by Agent. Approaching the buoy and clearing the shallow waters of the Bar, speed increased slightly, but set was still adverse. A few small fishing boats were active in the area between Buoy 2 and Curua Channel, none caused any problem.

There is a pilot boarding position marked on B.A.Chart No. 2189, recently entered as a correction, this is a total fabrication. No pilot service is officially available for the Bar area, although there is an unofficial service with the pilot boarding at Salinopolis at the Southern shore of the river. This was only learned later, the Agent having been contacted and asked for a pilot to board at the Bar, we were advised there was no pilot service at all, the pilot position was at Macapa, 174 miles from Amazonas Buoy No. 1.

Curua Channel: The channel buoys were detected from the safe water Buoy No. 3 without difficulty. One course from this buoy to No. 7/8 in the channel of 231° was sufficient. The strength of the current increased noticeably to about 5 knots running N.E.'ly, reducing the speed made good to about 9 knots in the channel. At Buoys No. 7/8, course was altered to 249°, this taking the ship to the North of the channel to pass the recommended 6 cables North of Buoys No. 9 and 11. On this course, the track passed over a tongue of the bank outside the channel to the N.W., with the minimum underkeel clearance of 2.1 m. recorded. Depths in general within the channel corresponded to those charted. All buoys were lit, although very poorly, and appeared in position advised by the Agent. The buoys are checked daily by the Brazilian Navy, as they are frequently swept out of position in the strong currents, any deficiencies are supposed to be advised by the Agents. The obstruction between Buoys No. 9/11 was doubted by the pilots when they boarded, and contrary to the advice we had received, they suggested we should have passed close to these buoys (i.e. keeping to the South of the channel, in order to avoid the shoals to the North, thus further adding to the confusion).

Clear of the channel is a straight forward, open water passage to the Canal do Norte, taking about 4 hours. Once this canal was reached, clumps of floating vegetation and logs were encountered, which according to the Pilot Book can cause severe damage to propellers, and if caught around the bow, seriously reduce the speed. The clumps show clearly on radar, avoiding action is not always possible due to restrictions in channel width. The current from here to the Pilot Station at Macapa was continuously adverse at about 6 knots, the ship making barely 9 knots through the water at full speed. There was very little traffic in the area, apart from a few small ferry boats which kept close to shore, out of the main current.

There is a choice of passage at the Canal do Norte, one to the South and the other to the North. The Southern one is wider with a long bend in the middle, at its end is a shallows/rock in the centre of the channel. The Northern passage is narrow (1.5 miles), with a single course alteration at the West end around Ilhas Predreira. The Northern route was taken, as a large, fully laden bulk carrier was already using the Southern channel, heading seawards. Position fixes were good, with plenty of recognisable features both sides, parallel indexing was used with index lines on features North and South. The Eastern end of Ilhas Predreira is shown on the chart as having a shallows stretching approximately 10 miles, this shallows had almost dried out in places, with a large sand island now existing in the middle of the "shallows." Soundings in the channel were confirmed with the chart and averaged between 17 m. and 30 m. The current set parallel to the channel at all times. The course alteration at the West end of Ilhas Predreira was made, the vessel being confirmed on track by radar, visually and by BPS. There was a shallows charted to the West, but generally the soundings just off the island indicated fairly deep water, the expected beam passing distance of the lighthouse was 1 mile, in water depth of 13.0 m. The vessel grounded 8 minutes after altering course, with positions showing the ship was still on track. The shallows were to port, that is from the island in the deep water, not extending from the shallows to starboard. The engine was put to stop, and then tested ahead and astern, movements were normal. The rudder was tested to port and starboard, full deflections were recorded. The vessel was swung to starboard and then back to port, movement to starboard was unrestricted, when turning to port the swing stopped with the heading 202°, the course in the channel was 198°. The vessel cleared the bank by turning to starboard and the engines at slow ahead, once fully clear, the vessel swung to port, in order to avoid the charted shallows on the starboard side. The indicated depths returned to normal almost immediately. The vessel regained the charted track, water depths were as expected from here on.

The route from Canal do Norte to Macapa was straight forward from this position. Navigation was mainly by radar, with visual fixes from 2 beacons on the portside on the approaches to Macapa. There was an increase in small traffic in the area, with fishing boats and ferries causing problems around the pilot boarding station at Fazendinha. Two pilots boarded from a small red hulled boat 0.8 miles off-shore at the charted pilot boarding position. One pilot took the con, the other went to the cabin.

Total time from Barra Norte Anchorage to Fazendinha was 16 hours 20 minutes, and total distance 174 miles.

Amazon River Pilotage: The total length of pilotage from Macapa to Manaus was 703 miles, time taken Westwards (1624 hrs. 8th June – 0638 hrs. 11th June) was 62 hours 14 minutes, at average speed 11.2 knots.

The speed was increased to full sea speed, current adverse throughout at between 3-6 knots. There were three areas where speed was reduced to half ahead to pass towns, with potentially large ferry traffic concentrations, at Obidos, Parintina and Itacoatiara. Obidos was potentially the area where most caution was required with a 110° blind left hand bend abeam of the town.

The pilots' approach was to keep to the outside bend on all curves, crossing from side to side as the river meandered very rapidly. The average distance off was 2 cables, with frequent closing distances of 1 cable or less. All navigation was by radar, the pilot setting the variable range marker at the chosen clearing distance on bends. We had managed to buy Brazilian charts for the Amazon (No. 4101-4105, Chart No. 4104 missing), the pilots paid no heed to these, their local knowledge being very impressive. The charts were of little practical navigational use anyway, the river was at almost full, 9.0 m. above minimum, and most coastal features were well submerged, making recognition of land very imprecise. The extra river height also rendered the soundings valueless. On numerous occasions the pilot was advised the course being steered was taking the vessel over shoals or banks, on every occasion he was proven correct in his estimations that the soundings were incorrect. The factor of error was in almost all cases greater than the rise in river level, therefore the quality of the orignal survey must be questioned.

As an example of this, the GPS plots frequently gave the vessel running well within the shore line, at one time almost 0.5 miles, this position was repeated on the Eastbound transit. The depths recorded during this "cross-country" were greater than 20.0 m. underkeel. Trying to fix the position accurately using coastal features was impossible due to the flooding as mentioned previously.

Prior to arrival, there had been much discussion as to likely channels and passages to be taken during the transit, those chosen by the pilots often seemed illogical. The narrowest passage used, 4 hours downstream from Manaus, had a total width of only 3 cables, with the vessel only 150 m. off the beach to starboard. The reason given for taking these narrows was the larger outside channels tend to have a concentration of logs and other floating vegetation, making navigation hazardous. The narrows were the lesser of two evils. Even in the very narrow channels no speed reduction was made. Water depths were at all times greater than 18.0 m. underkeel.

General: The vessel had been cleared from Suape to Manaus. If this had not been done, we would have had to anchor at Macapa for Inward Clearance by Customs and Immigration.

Tide affects the river for a distance up to 100 miles above the Pilot Station at Macapa.

Clocks were retarded 1 hour on passage, Macapa keeps GMT −3 and Manaus GMT −4.

River level varies by 10.0 m., dependent on the snow melt of the Andes. Maximum height is at end of June/early July, and minimum height is in November/December.

Brazilian charts were of little use, the B.A. Approach Chart for Macapa proved superior to its Brazilian counterpart. The chart that was unavailable was not available anywhere in the country, the mapping agency had no intention of having another print run, due to unprofitability of printing charts, according to the Agents in 2 ports. The Amazon charts we did have, were of little use other than to give an indication of our position.

Port Manaus: The Petrobras Terminal is situated approximately 4 miles downstream of the town, 2 miles above the confluence of the Negros and Solimoes rivers. The vessel anchored 1 mile S.E. of the terminal, abeam of a small naval berth, in 30.0 m. of water, awaiting tugs.

The vessel had loaded to 30 ft. FW draft at Charterer's instructions, the reason for this limitation was difficult to understand. The oil terminal consists of 3 berths, two for ocean-going ships with a draft up to 37 ft., the centre berth for smaller ships. They are pontoons attached to a pipeline system also on pontoons. The loading/discharge arms are Chicksan type fixed arms. Each berth has two unattached concrete dolphins 10 m. up/downstream of the central pontoon, and 4 mooring buoys, 2 each end. The concrete dolphins were protected by inflatable Yokohama type fenders. The pilot said that during the river low water season, the Easterly berth (No. 3, the one we were berthing on) dries out. This is very hard to believe as the underkeel clearance during our stay was 27.0 m., total depth 36.0 m. Berthing starboard side alongside would seem the norm.

The berth was approached from downstream, stemming the current, 2 small mooring boats and one old, very weak tug, were in attendance. First line was run from the port bow to the off-shore mooring buoy, which was used as a holding line. A starboard headline was run to the in-shore buoy, and aft a starboard sternline was run to the in-shore buoy, it being deemed unnecessary to place a sternline on the off-shore buoy aft. Lines were then run fore and aft to finish with 3 head/sternlines to the in-shore buoys and 2 springs to the dolphins fore and aft. The off-shore buoy headline was released when positioned. The tug served very little useful purpose, and only lay alongside in the closing stages of positioning to keep the bow from swinging off. The ship's gangway was used, room was cramped, with the end of the gangway hard against the pipelines of the pontoon.

Customs, Port Health and Ministry of Agriculture officials joined with the Agent by boat almost immediately berthing was complete. A total of 8 officials boarded. No Immigration Officers boarded, although it was suggested they might come at anytime during the ship's stay. Most formalities were routine, the two Agriculture officials did a very thorough inspection of the galley and store spaces.

1×8 in. Chicksan arm was connected. Cargo tanks were inspected by a surveyor, the survey being fairly cursory. Ship's figures, as generated by the IVMS, were accepted without question. Discharge was started using one pump, limited to 250 cu.m./hr. at 10 bar line pressure. This was maintained for almost 24 hours, until the ship on the next berth had sailed when another larger line was available. The rate was then increased to 1,200 cu.m./hr. at 10 bar, maintained using 2 main cargo pumps. Discharge was stopped at one stage for 13 minutes to adjust the moorings. As the vessel had come out of the water, the two Yokohama fenders had become "hung-up" between the dolphin and ship's side. Moorings were slackened to allow the fenders to fall back to the water. The discharge was otherwise uneventful. Surveying on completion was limited to a very quick glance down each tank. No soundings were taken to calculate R.O.B.'s.

Bunkers were loaded, 180 cst, the usual 380 cst were unavailable. The loading rate was very slow, approximately 90 tons/hr. Temperature of bunkers received 38°. Gasoil was also loaded, although only very small quantity, as the price was high, the loading rate was about 75 tons/hr.

Stores, mainly fresh fruit and vegetables were taken, the quality seemed quite good, but the price was high. Laundry was sent ashore, the quality of the wash was good, again though the price was quite high.

All contact with the shore was by launch, access to the shore via the pontoon was not permitted. A launch service was arranged for shore leave.

Unberthing: (Not usually carried out during the hours of darkness.) The vessel made the sailing in fast failing light. The same tug stood by, but did nothing to assist. The buoy lines were let go first, then the springs on the shore dolphins. The current taking the ship easily away from the jetty, the vessel turned short round to port.

Eastbound Transit: The routine was followed exactly as for the Westbound passage, only the current was favourable throughout, and speeds of 22 knots were obtained, with an average of close to 20 knots being attained overall. The vessel slowed only once for passing Obidos. Time taken from berth to Macapa Pilot Station was 38 hours.

SHIPMASTER'S REPORT: September 1994 (Received March 1995). Vessel: Tanker 40,000 d.w.t. Partly loaded 26,000 tonnes, max. draft 29 ft. (fresh water), LOA 176 m.

The Amazon River is to be entered through Canal do Norte. Pilot boards at Santana, Fazendinha Pilot Station in position Lat. 00° 04′ 06″ S., Long. 51° 06′ 45″ W. This passage is declared safe for navigation without Pilot by the Brazilian Navigation Administration.

There is no Pilot from Barra Norte to Santana, but according to Agent, it may be possible to arrange from Belem, but it would cost approx. U.S.$ 20,000. Anyhow, this part of the River Amazon is quite deep and wide in most places, and should not require a Pilot for navigators with some practice of coastal navigation. The distance from Barra Norte to Santana is about 170 nautical miles.

As the banks/depths are subject to frequent change, the river should not be entered unless information have been received on the current position of the buoys.

Brazilian charts to be used, as British charts are shown not to be adequate.

Received all Brazilian charts for the passage Barra Norte – Santana in previous port, and Manaus Agent faxed the present position of the buoys from Barra Norte to the last buoy of the entrance channel between Banco de Meio Norte and Banco Rio Branco. Agent also faxed Brazilian tide tables for Barra Norte – Ponta do Ceu. All this information, including Brazilian charts, is very important for a safe passage Barra Norte – Santana.

Due to strong tidal stream (5-6 knots) and missing or out of position channel buoys, vessel should be equipped with GPS Navigator for safe navigation in these waters.

Barra Norte (North Bar):

Note: The Brazilian tide tables "Barra Norte – Punta de Ceu" states High Water at Punta de Ceu (Lat. 00° 46′ N., Long. 50° 06′ W.). H.W. at Barra Norte is 3 hours 20 minutes before H.W. in Punta de Ceu.

Maximum draft is restricted by the North Bar (15 miles long), with charted depths of less than 10.0 m.

At date of passage, maximum draft at H.W. was stated to be 37 ft.

Passed North Bar 2 hours after H.W. and sounded minimum depth of 10.4 m. in the Western part.

Landfalls: The light vessel "Amazonas No. 01" racon could be seen very well from 15 nautical miles, and the light vessel was found in position according to charts and information from Agent.

Buoy Aguas seguras No. 01 in position Lat. 01° 25.40′ N., Long. 49° 22.20′ W. was missing.

Buoy Aguas seguras No. 02 in position Lat. 01° 17.55′ N., Long. 49° 27.72′ W. was in position/light o.k.

Buoy Aguas seguras No. 03 in position Lat. 01° 09.64′ N., Long. 49° 33.33′ W. was in position/light o.k.

Entrance Channel – Banco de Meio Nord / Banco Rio Branco: All buoys, including the Aguas securas No. 01 – 03, have a good height and are equipped with radar reflectors. They were all seen (except No. 11) on the radar within a distance of 8 nautical miles, and visually seen within a distance of 5 nautical miles. Buoy No. 11 was damaged and could not be seen as far as the others. We did not observe if the lights on the channel buoys were functioning as the passage was made during daylight.

Following information according to River Amazon Pilots:

H.W. in the channel occurs 1.5 hours before H.W. in Punta de Ceu.

The maximum N.E. current occurs between 2 hours after H.W. and 2 hours before L.W., and can then reach a peak of 6 knots.

The maximum S.W. current occurs between 1 hour after L.W. and 1 hour before H.W., and does not exceed more than 3 knots.

During passage North Bar to Entrance Channel (2 hours – 6 hours after H.W.), we encountered a steady N.E. current of 2-3 knots.

All the Channel Buoys No. 1 – 14 were found in position according to the Agent's information, but in both the Brazilian and B.A. charts the old wrong channel was marked.

Caution shall be taken when passing Buoy No. 14, as it is situated on a 9.0 m. shoal extending N.E. into the channel. At L.W., passage must be made between that shoal and the 8.0 m. shoal S.W. of Buoy No. 11

with a course of 270°/090°. Otherwise passage does not cause any problems and vessels with good radars should not have any problem with transit during the night. However, it might be better to make first time transit in daylight.

Vessels with poor radar should only transit during daylight, as missing or unlit buoys can cause problems.

All transitting vessels should be equipped with GPS satellite navigator.

Missing or damaged buoys shall be reported to Belem Radio.

From the entrance channel to Santana, the transit is safe for both day and night navigation, as the coast can be seen very clearly on the radar. The shore racons of Pta. do Guara and Pta. do Ceu were found functioning and could be seen on the radar at a distance of 10 nautical miles.

We passed close to Ilha Caviana de Dentro and South of Ilhas Pedreira.

We then passed to the Northern shore from Pta. do Pau Cavado to Santana.

All lighthouses, except "Igarape do Espirito Santo", could be seen very well on the radar, and the buoys were found to be in position.

We tried to contact Fazendinha Pilots on Channel 16 (6 hours and 4 hours prior to arrival), but did not get an answer. Two hours prior to arrival, Pilot contacted vessel on VHF Channel 16 and advised that he would be standing-by on arrival.

Santana (Fazendinha Pilot Station): Two Pilots board at Fazendinha Pilot Station, and if it is the first Brazilian port, local Port Authorities will also board.

A small launch comes out to the pilot station and the Pilot boards according to normal procedures. If authorities are to board the vessel and the current is S.W., the vessel will have to turn around and stem the current, or anchor within the area.

As no charts, except B.A. 2229, onboard for the passage Santana – Manaus, I asked Agent to ask Pilots to bring Brazilian charts onboard. The Pilots did not bring any charts and informed they did not need any. According to the Pilots, the river depth, banks and islands frequently change, and there is no chart fully up to date.

Both of the Pilots were very experienced and skillful. It also has to be mentioned that the River Amazon Pilots are working 9 full months a year on the river.

The passage Santana – Manaus is about 680 nautical miles, and vessels transit day and night.

The tidal influence from the sea is felt as far as to Obidos.

The downriver stream current is 1.5 knots – 5 knots and varies with the season. In January, which is the peak of the low water season, the current is only 1.5 knots – 2 knots. In July, which is the peak of the high water season, the current can reach 5 knots.

The range of the river level change in low/high water season is 6.0 m.

After passing Almeirim, drifting trees and small floating islands were encountered. These are numerous during the rainy season when the river level increases, and are a danger to propellers.

The passage is otherwise calm and all smaller rivercraft navigated safely and displayed good lights during the night.

There is no risk for pirates boarding during passage on the River Amazon, but if vessel anchors off Manaus or any other town, precautions should be taken, according to Pilots, who informed that ships at anchor outside Manaus have been "visited".

AUTHORITY: Administracao do Porto de Manaus, Rua Taqueirinha 25, Centro, Manaus, Amazonas, CEP 69.000 Brazil. *Tel:* 232-4250. *Telex:* (0922) 109. *Contact:* Nelson Pedro de Aguiar Falcao, Port Administrator.

AGENT: Wilson Sons Agencia Maritima Ltda., Avenida Djalma Batista 22, Bairro Chapada, 69050-010 Manaus AM. Tel: (092) 642-2626 (After hours: (092) 236-6571). Telex: (92) 1046 WSON BR. Fax: (092) 642-2755. Cables: Anglicus.

NATAL: 05.47 S. 35.12 W. (See Plan)

LOCATION: Port situated on East bank of Potengi River, 2 miles from sea.

PORT LIMITS: The port area is considered to be the estuary of the River Potengi between the parallels 05° 45′ 36″ S. and 05° 46′ 42″ S.

DOCUMENTS: See "General" before first.

Clearance: The visiting area for the Health Inspector of the Ports, Federal Customs & Maritime Police is close to the point of receipt of the Pilot (05° 45′ 06″ S. – 35° 11′ 18″ W.). In special cases, these Authorities may permit visits to be made with vessels already berthed. Also see "Health".

APPROACHES: *Access Channel:* This is shown on Nautical Chart 802 (DHN). Width 90 m. to 400 m. Minimum depth: 7 m. in relation to the Reduction Level of the Nautical Charts. Critical Points: The area between the entrance to the bar and the Manimbu Light.

Tides: Average speed on ebb: 3.5 knots at high tide and 1.3 knots at periods of low tides. Average speed of the rising tide: 1.5 knots coming up river.

PILOTAGE: Pilotage is obligatory from the point of receipt of the Pilot (05° 45′ 06″ S. – 35° 11′ 18″ W.) up to any point in the port area.

Request for the Pilot must be made to the Pilots' Association of the Rio Grande do Norte (Rua Silva Jardim, No. 1 – Ribeira Tel: 222-1613), with a minimum of 3 hours in advance of requirement. The Pilots' Association has VHF, working on Channels 6, 8, 10, 11, 12, 13 and Channel 16 (for calling up), throughout 24 hours. Normally the Pilot will be on board within 2 hours, when the request has been made on working days, during the period between 0800 hrs. and 1800 hrs. Normally Pilots go out to vessels in a red launch with the letter "P" painted in black. When very strong winds are blowing, it is recommended that Masters manoeuvre vessels in order to allow the Pilot's cutter to come alongside on the lee side.

ANCHORAGES:
- (a) For vessels of more than 3,000 g.r.t. – between the access channel and the right bank of the River Potengi, with effect from the parallel of 05° 45′ 30″ S. to parallel 05° 46′ 00″ S.
- (b) For vessels of up to 3,000 g.r.t. – between the access channel and the left bank of the River Potengi, with effect from parallel 05° 46′ 30″ S. to parallel 05° 46′ 48″ S. On anchoring, this must be done leaving a free area of a minimum of 80 m. in the access channel to the Almirante Ary Parreiras Base.
- (c) For quarantine vessels – the area between parallels 05° 45′ 24″ S. – 05° 45′ 36″ S. and meridians 35° 11′ 06″ W. and 35° 11′ 24″ W.
- (d) For pleasure craft – between the access channel and the right bank of the River Potengi, going from parallel 05° 45′ 48″ S. to the parallel of 05° 46′ 00″ S., near to the yacht club.

RESTRICTIONS:
- (a) The maximum speed permitted for navigation in the River Potengi for vessels of over 20 g.r.t. is 8 knots.
- (b) The access channel to the port in the area included between the bar and the Manimbu Light does not permit simultaneous traffic of vessels going in opposite directions.

Manoeuvring Area: Between the parallels of 05° 46′ 30″ S. – 05° 46′ 06″ S., in an area of 300 m. starting from the port quay and from the line which joins the North end of the quay to the North dolphin of the Terminal for PETROBRAS fuel. Depth: from 6 m. to 11 m. It is expressively prohibited to anchor any vessel in this area, which is reserved for the manoeuvres of berthing and unberthing.

MAX. SIZE: Length 520 ft., draft up to 23 ft. 6 in. at spring tides.

HEALTH: Official visit made on vessel's arrival if between 0700 hrs. and 1900 hrs. Visits can be arranged at other times.

The inspection area of the Port Health, Federal Receipt and Maritime Police authorities is 04° 45′ 06″ S. and 35° 11′ 15″ W.

TUGS: Not available.

BERTHING:
- (1) *Port Quay:* 400 m. long with 13 berthing bollards. Quay has a depth of 8 m. in front of warehouse A-2 and 7 m. in front of the rest of the quay, in relation to the reduction level of the Nautical Charts.
- (2) *The PETROBRAS Fuel Terminal:* Situated 200 m. downstream from the port quay, has a distance between dolphins of 100 m. and a depth of 8 m. in front of them (starting from a distance of 20 m. in the direction of the port quay, the depth decreases to 7 m.).

There are no special rules; however, the process will be most rapid and safe if berthing is made port side to on an ebb tide and unberthing being effected on a rising tide.

STORAGE FACILITIES:

(1) *Within the Port:*

Warehouses: 3 for general cargo. Usable total area: 3,945 sq.m. Total capacity: 18,200 cu.m.

Cold Store: 1 with a usable area of 925 sq.m. and a capacity of 140 tons. It is rented for operation to the Companhia de Produtos do Mar (PRODUMAR).

Open Storage Areas: 2 with a usable area of approx. 10,000 sq.m.

Covered Storage Areas: 2 with an area of 800 sq.m.

(2) *In the Vicinity of the Port:*

Warehouses: 3 belonging to the Firma Comercio e Industria de Fibras, situated in the Avenida Hildebrando de Gois, 117 to 137. Usable total area: 2,400 sq.m. Total capacity 12,000 cu.m.

Silos: 2 belonging to Natal Industrial S.A. and operated by the firm Moinho Natal. Total capacity: 4,800 tons.

PORT EQUIPMENT:

Cranes: 2 electric, jib type with a capacity for 2 tons.

2 on wheeled tyres, with a capacity for 8 to 9 tons (but these are out of operation).

Stackers: 16 Yale type, 8 of them in operation and 8 out of action.

Rolling bridges: None.

Loaders: None.

Suction Units: 2 mobile on tyred wheels, with a real capacity of 10 t.p.h. From the suction units, the wheat is carried out along a subterranean gallery and from this, by a cargo transfer unit, and a transport platform to the silos of Moinho Natal.

The Port Administration has 5 trucks, 3 tractors and 2 lorries.

STEVEDORES: On working days, Sundays and Public Holidays the following is the work timetable:

Day period	*Night Period*
0700 to 1100 – Common Day	1900 to 2300 – Common Night
1100 to 1300 – Meal Break	2300 to 2400 – Meal Break
1300 to 1700 – Common Day	0000 to 0400 – Common Night
1700 to 1900 – Possible Overtime	0400 to 0600 – Possible Overtime
	0600 to 0700 – Meal Break

LOADING: When loading sugar bags, only canvas-bottomed slings to be used. Shippers will not permit loading with ordinary rope slings. Suitable slings can be hired from shore. Six slings required for each working gang.

MEDICAL: Hospitals and doctors available.

TANKERS: Oil berth suitable for vessels up to 520 ft. length.

FRESH WATER:

(1) *On the Port Quay*

The supply of water is made by the Companhia de Aguas e Esgotos do Estado do Rio Grande do Norte (CAERN).

There are 12 hydrants spaced 22 m. apart with a discharge capacity of 6 t.p.h.

(2) *At the PETROBRAS Oil Terminal:*

The system of water supply is via one hydrant.

FUEL: There are no oil barges. Supply of diesel oil for vessels moored at the Port Quay is made by means of tanker lorries. Vessels can also be bunkered at the Fuel Terminal of PETROBRAS, which has a 4 in. pipe and capacity for supply of 30 to 40 t.p.h.

Orders can be made via the local ship's Agency, with a minimum of 48 hours' notice in advance.

CONSULS: France, Italy, Lebanon, Portugal and Spain.

REPAIRS: There is a Naval Base at Natal, which apart from providing service to naval vessels, also deals with merchant vessels requiring repairs. The Base has seven departments, Mechanical, Naval Carpentry, Electricity, Electronics, Sails, and Painting, and a Docking System comprising two floating docks and one office ship. The Goias Dock has a capacity for vessels up to 1,000 tons and 4.80 m. draft. There is a ballasting service.

The City of Natal Dock has a capacity for vessels up to 2,800 tons and 5.80 m. draft.

Apart from other facilities, the Base has maintenance, refrigeration and kitchen services, which can be placed at the disposal of vessels during repairs to their own installations.

CUSTOMS ALLOWANCES: One opened bottle spirits and 200 cigarettes per crew member per week.

AIRPORT: There is the Airport of "Augusto Severo" (20 km. distance from the port) situated in the Municipality of Eduardo Gomes. There are direct flights to Fortaleza, Recife and the rest of the country.

POLICE/AMBULANCE/FIRE: Police: Tel. 222-3656, Fire: Tel. 231-3581 or 193.

EMERGENCY CO-CORDINATION:

(a) 2 corvettes and 1 tug of the Grupamento Naval do Nordeste – These will be put into action by the command of the Third Naval District in cases of emergency on the request of the ship's Agent or his legal representative.

(b) Tugs of the concerns which operate in support to the PETROBRAS platforms, actioned by the Captaincy in accordance with the RTM, and on request of the interested party.

TELEPHONES: No facilities exist.

HOLIDAYS: *Local Holidays:* 6th January – Holy Kings; 21st November – Our Lady of Presentation (Padroeira).

GENERAL: *Garbage:* There is no collection of rubbish by the Port Administration. It is the responsibility of every vessel to deposit their rubbish in a container on the quay which is collected daily by a lorry of the Department of Urban Cleansing of the Prefecture of Natal.

SHIPMASTER'S REPORT: August 1994.
The Master received the following telex from Agent:
Quote:
Sanitary Health Inspection Natal:

We have just received information from Master on one of our vessels, that the Health Inspectors at Natal confiscated all provisions which were kept in deep-freezer or cool-store, according to following criterias:

All items with the expiry date overdue.
All items with the date "Best before" overdue.
All items without any expiry stamp.
All meat which is older than one month at the time of delivery, according to the stamp.
All buckled tins.

The Master succeeded in preventing the Authorities from taking the items ashore and burned everything in the vessel's incinerator. According to the local Agents, who tried their best to assist, everything was correct according to Brazilian Law.

Please be guided accordingly in order for you to take your own precautions before arrival.
Unquote.
Master's comment:

The Health Inspector, who had recently been sent up from Rio de Janeiro, did not board us as he was off-duty at that time. However, he is known to be strict, and it is well to be prepared.

AUTHORITY: Companhia Docas do Rio Grande do Norte (CODERN), Av. Hildebrando de Gois, Ribeira, Natal, Rio Grande do Norte, Brazil CEP – 59.000. *Contact:* Ivan Reis de Lima, Administrator.

NITEROI: 22.53 S. 42.08 W.

LOCATION: The Port of Niteroi is situated in the inlet of Sao Lourenco, on the East coast of the Bay of Guanabara. The area is covered by D.H.N. Chart Nos. 1510, 1511 and 1512.

APPROACHES: The access channel is 1,400 m. long, 70 m. wide and 6 m. deep.

PILOTAGE: Compulsory.

ANCHORAGE: See D.H.N. Chart Nos. 1510, 1511 and 1512.

MAX. SIZE: 20,000 d.w.t., previously lightened at Rio de Janeiro.

BERTHING: The manoeuvring basin is 430 m. long, 250 m. wide and 6 m. deep. The quay is 450 m. long, 7 m. depth with 20,000 sq.m. of open storage. There are 2 warehouses with a capacity of 3,300 sq.m.

CRANES: 1×1.5 tons electric jib crane and 1×20 tons mobile crane.

BULK HANDLING FACILITIES: At the S.W. extremity of the port, in the external quay area, there is a wheat silo which is the property of Moinho Atlantico and comprises of 13 cylindrical cells with a static capacity for storage of 15,000 tons. Its construction is of reinforced concrete. This silo is connected by a Radler type elevated transporter to a pneumatic suction unit of the "Buller", type with a nominal capacity of 70 t.p.h.

PORT EQUIPMENT: Stacker trucks: 5 with a capacity of 2 to 10 tons; winch: 1 of 60 tons; tractor on wheels: 1; rolling bridges: 4 of 1,500 kg.

FRESH WATER: Available ex-quay, 14 hydrants with 2.5 in. dia., rate 20 cu.m./h. Also there are 2 barges, each with 100,000 litres capacity.

FUEL: Available from Petrobras.

REPAIRS: Can be undertaken.

DRY DOCKS: "Almirante Guilhem" Floating Dock: Length 200 m. Inner width: 34 m. Clear width between fenders: 32.80 m. Moulded depth 15.60 m. Height of keel blocks: 1.75 m. Max. draft over keel blocks: 7.75 m. Lifting capacity: 15,000 tons. Cranes: 10 ton capacity.
Slipways: 1. 100 m. (length)×12.5 m. (width)×5,200 tons capacity. 2. 60 m.×9.5 m.×1,000 tons capacity. 3. 50 m.×8.3 m.×500 tons capacity.

Above facilities operated by ENAVI. Tel: 719-9292. Telex: (021) 32049 ENAV.

HOLIDAYS: National Holidays: 1st January; 21st April; 1st May; 7th September; 12th October; 15th November and 25th December.

Regional Holidays: 24th June and 22nd November.

Movable Holidays: Monday and Tuesday of Carnival, Ash Wednesday, Good Friday and Corpus Christi.

Commemorative Holidays: 28th January (port workers); 28th August, 28th October; 30th October; 2nd November (All Saints).

AIRPORT: Santos Dumont and the International Airport of Rio de Janeiro.

TIME: GMT minus 3 hours.

GENERAL: Niteroi Port Authority serves traditionally the specific areas of the Municipality of Niteroi, apart from acting as a support base for the oil rigs which operate in the Campos Basin. It is able to receive Roll-on/Roll-off type vessels and this port acts as an important alternative for vessels of this sort which are intended for the Rio de Janeiro region.

AUTHORITY: Porto de Niteroi, Av. Feliciano Sodre 215, 24.030 – Niteroi – RJ. *Tel:* (021) 718-3182, 719-5197, 717-2483. *Contact:* Engineer Antonio Manne, Manager.

OBIDOS: 01.51 S. 55.35 W.

LOCATION: Located on the left bank of the River Amazon in the town of Obidos, State of Para.

MAX. SIZE: 7,000 d.w.t.

BERTHING: Length of berth 35 m. Depth alongside 10.0 m. One warehouse of 420 sq.m. Open storage area of 600 sq.m. Floating pontoon of 39 m.×6.5 m. 1 mobile crane and 2 stacker trucks available.

Marginal quay available for small vessels.

AUTHORITY: Companhia Docas do Para, Avenida Presidente Vargas 41 – 20 Andar, Belem, Para, Brazil. *Tel:* 223-0056, 223-2066.

AGENT: See "Belem".

PARANAGUA: 25.30 S. 48.30 W. (See Plan)

(★) Indicates information received from a ship's Agent.

PORT LIMITS: The port is limited by co-ordinates Lat. 25° 29′ 45″ S. and 25° 30′ 12″ S. Long. 48° 32′ 06″ W. and 48° 30′ 00″ W. which also include commercial and inflammable berths.

DOCUMENTS: Also see "General" before first port.

The visiting areas for the Port Health, Federal Receipt and Maritime Police are those mentioned as areas 1, 2, and 3. See "Anchorages". Normally visits are made at the quay, after berthing.

Documents for clearance inwards of foreign vessels:

(a) Certificate of Registration.
(b) Classification document for the vessel in the port of registration.
(c) International Load Line Certificate.
(d) Safety Certificate for Passenger Vessels or Safety Construction Certificate for Cargo Vessels.
(e) Safety Equipment Certificate for Cargo Vessels.
(f) Safety Certificate for Radio-telegraphy or Radio-telephony on Cargo Vessels.
(g) Exemption Certificate, in respect of the foregoing certificates, where applicable.
(h) Safety Certificate for Nuclear Vessels.
(i) Certificate or other Financial Guarantee in respect of the International Convention governing Civil Responsibility in Damage caused by Oil Pollution, 1969.
Federal Receipt and Port Health Clearance.
Bill of Lading for postal purposes, where the vessel carries mail.
Copy of the payment docket in respect of the tariff for using lighthouses.
Crew List.
Written declaration from Master or Owner stating name and address of legal representative in the port.
Cargo Manifest.

National Vessels:

(1) Up to date equipment roll, accompanied by extra-roll licences and those for extra tonnage.
(2) List of Crew members in duplicate.
(3) Inscription and Registration Pass Book (CIR) or pass books of personal inscription (CIP), for verification as deemed necessary;
(4) List of passengers;
(5) Load Capacity Sheet, for checking the categories of Crew members taken on board and checking the functions effected corresponding to the upper category;
(6) Cargo Manifest;
(7) Terms of Inspection in dry dock and afloat or Certificate of Regularisation of the vessel;
(8) Provision of Register of the Maritime Tribunal, with statement of the name of the Master and his category or Document of Registration (CP-1);

(9) Ship's Log.
(10) Certificate of authorisation of the vessel's line or of extraordinary voyage, issued by the Superintendency of the National Mercantile Marine (SUNAMAM), except for "tramp" vessels.
(11) Certificate of Safety of Passenger vessels, for deep sea vessels and long distance coasting;
(12) Certificate of Safety of Construction of cargo vessels, for deep sea vessels and long distance coasting;
(13) Certificate of Safety Equipment on cargo vessels for deep sea vessels and coasters;
(14) Certificate of Safety of radio telegraphy and radio-telephony on cargo vessels, deep sea and coasting vessels;
(15) Certificate of Exemption, corresponding to the certificates mentioned above;
(16) Freeboard Certificate.
(17) Certificate or other financial guarantee corresponding to the International Convention covering Civil Responsibility for Damages caused by Oil Pollution, 1969;
(18) Passes issued by the Delegation of Federal Receipt (Customs), Port Health, Federal Police and Postal Authorities when the vessel carries mail bags (only for vessels destined for foreign countries);
(19) List of relatives of the Master and the Crew;
(20) Authentic Xerox copy of the last payment form of pension contributions to the INPS or FUNRURAL, paid by the Charterer or Owner
(21) Certificate of Tonnage or tonnage calculation notes.

(★) *Documents required on arrival and amount of each:*

Bill of Lading from each port where cargo loaded for Paranagua	–	–	1	–	1
Negative Cargo Manifest from each port of call where no cargo loaded for Paranagua	–	–	1	–	1

PILOTAGE: Pilotage is compulsory for foreign vessels and tankers, propane carriers and those carrying explosive cargo under the Brazilian flag, of any GRT, from the point at which the pilot boards, shown on DHN Chart No. 1821, approaching the port by the South East or Galheta channels as far as the berth.

Pilotage is optional for vessels of Brazilian flag of less than 500 GRT and for national or foreign support craft whilst they are operating in the Port of Paranagua with Brazilian crews or which have in their crew a Brazilian mariner of the category of Nautical Official or Master of Coasting.

Pilotage can be requested via the Ship's Agent, 4 hours in advance, stating time of entry or departure of vessel. Vessels approaching Paranagua should contact Paranagua Radio, Channel 16 VHF, two hours prior to arrival in the Pilot waiting area.

The Pilots' Association maintains permanent watch on Channel 16 VHF, passing traffic on VHF Channels 10 and 13. (Tel. 422-0530, 422-1560 and 422-1570). The greatest restriction for Pilots is the condition of the sea, which in Galheta Channel, with the sea above Force 4 – makes the passage of the pilot cutter difficult.

ANCHORAGE: Vessels must anchor in the areas circumscribed by the coordinate points mentioned below:

(a) Area "1" intended for vessels of less than 180 m. in length and a draft of less than 9.45 m. = 31 ft. Pricrity of anchorage is accorded in this area to vessels within these limits which have to be bunkered by TEFRAN-SEPAR, with fuel and lubricant oils for their own consumption.

Point	*Latitude South*	*Longitude West*
A	25° 29′ 32″	48° 31′ 28″
B	25° 29′ 51″	48° 31′ 28″
C	25° 30′ 01″	48° 33′ 31″
D	25° 29′ 40″	48° 33′ 31″

(b) Area "2" to the South of the Galheta Channel: Intended for vessels in one of the following situations, or of the types and sizes mentioned below, with the order of priority being observed for anchorage.:

1. Vessels of any size in quarantine;
2. Vessels of any size operating with explosives;
3. LASH type vessels;
4. Vessels which require to bunker with fuel oil and/or lubricants, for their own use; and
5. Vessels over more than 180 m. overall length.

Point	*Latitude South*	*Longitude West*
A	25° 29′ 45″	48° 26′ 14″
B	25° 30′ 10″	48° 26′ 14″
C	25° 29′ 46″	48° 27′ 10″
D	25° 30′ 07″	48° 27′ 10″

Area "2" to the North of the Galheta Channel: intended for vessels in one of the following situations, or of types and sizes mentioned below, observing the order of priority for anchoring in which they are located:

1. LASH type vessels.
2. Vessels requiring to bunker with fuel oil and/or lubricants for their own consumption; and
3. Vessels of more than 180 m. overall length.

Point	*Latitude South*	*Longitude West*
A	25° 29′ 08″	48° 26′ 17″
B	25° 29′ 30″	48° 26′ 17″
C	25° 29′ 34″	48° 29′ 43″
D	25° 29′ 10″	48° 29′ 43″

OBSERVATION: 1. Vessels which anchor in these areas must be positioned as closely as possible to the port of Paranagua, i.e. as close as possible to the Western limit of the area; and

2. Whilst a vessel with specific priority is in these areas, and another arrives with greater priority, it will go to another area, allowing the arriving vessel to take up position.

(c) Area "3" intended for vessels to be subjected to Health inspection by the Port Health Inspectorate or authorised body. The Ship's Agents, consigners of vessels involved in such cases, must, after obtaining from the pilot the estimated time of anchorage in this area, inform the corresponding authorities, sufficiently in advance, so that appropriate action may be taken.

Point	*Latitude South*	*Longitude West*
A	25° 29′ 46″	48° 27′ 10″
B	25° 30′ 07″	48° 27′ 10″
C	25° 29′ 48″	48° 28′ 00″
D	25° 30′ 03″	48° 28′ 00″

(d) Area "4" intended for vessels with an overall length less than 140 m., and a draft less than 6.1 m. (20 ft.).

Point	*Latitude South*	*Longitude West*
A	25° 29′ 16″	48° 30′ 19″
B	25° 29′ 30″	48° 30′ 19″
C	25° 29′ 16″	48° 31′ 28″
D	25° 29′ 32″	48° 31′ 28″

(e) Area "5" intended for vessels of overall length more than 180 m. and draft less than 9.14 m. (30 ft.).

Point	*Latitude South*	*Longitude West*
A	25° 29′ 45″	48° 26′ 14″
B	25° 30′ 12″	48° 26′ 14″
C	25° 30′ 05″	48° 24′ 45″
D	25° 30′ 26″	48° 24′ 45″
E	25° 30′ 20″	48° 24′ 20″
F	25° 30′ 30″	48° 24′ 46″

(f) Area "6" anchorage for the port of Antonina.

Point	*Latitude South*	*Longitude West*
A	25° 28′ 34″	48° 37′ 41″
B	25° 28′ 51″	48° 37′ 41″
C	25° 28′ 30″	48° 38′ 37″
D	25° 28′ 47″	48° 38′ 37″

(g) Area "7" intended, exclusively, for the anchorage and berthing of barges used in transport of "off-shore" platform structures.

Point	*Latitude South*	*Longitude West*
A	25° 32′ 28″	48° 22′ 09″
B	25° 32′ 42″	48° 22′ 14″
C	25° 32′ 28″	48° 22′ 35″
D	25° 32′ 43″	48° 22′ 16″
E	25° 32′ 54″	48° 22′ 10″

(h) Area "8" intended for vessels of overall length more than 180 m. and draft less than 8.20 m. (27 ft.)

A	25° 29′ 26″	48° 24′ 34″
B	25° 29′ 44″	48° 24′ 48″
C	25° 30′ 00″	48° 23′ 42″
D	25° 30′ 17″	48° 23′ 54″

(i) The anchorage for sport and recreation vessels must be effected, preferably, in area 1 or in the River Itibere, and Cotinga Point, in accordance with the buoy restrictions. More details are available from the Captaincy of Ports Regulations.

RESTRICTIONS: The access channels – Galheta and South East are marked on charts 1821 and 1822 of the National Brazilian Hydrographical Dept; the Galheta Channel, normally used, is dredged to a depth of 12.00 m. (39.37 ft.) with a width of 200 m., and a length of 12 miles. The official depth of the channel is 11.28 m. (37 ft.) at high Spring tides and 9.45 m. (31 ft.) at low tides. The critical points of the channel are between the pairs of buoys 3–4 and 7–8, where there are currents running across the channel, and with a heavy sea, waves break making the departure of pilot cutters difficult. In the S.E. Channel, the depth varies from 7.62 m. (25 ft.) to 6.4 m. (21 ft.)

Tides: There is a difference of approximately one hour between the tide in the port and at the bar. At the Galheta Bar, the current may reach a speed of 4 knots during Spring tides. Also see "Berthing".

MAX. SIZE: See "Berthing".

HEALTH: Authorities visit vessels at the anchorage. Port Health Service Tel: 422-0594.

(★) *Note:* Compulsory Sanitary Inspection, prior to docking, is carried out at special anchorage, for vessels proceeding direct from the following countries: U.S.A., Mexico, all Central America, Trinidad, Colombia, Venezuela, Guyana, Suriname, Guyane, all African countries, all Asiatic Countries, Australia, Polynesia.

Special areas are provided for vessels according to their lengths and drafts. Also for Sanitary Inspection special areas are provided in the vicinities of Ilha das Cobras (Cobras Island).

RADIO: Paranagua Radio, call sign PPG. VHF Channels 24, 25, 26 and 27 for vessels navigating close to the port.

TUGS: 6 tugs × 2,100 h.p. – 3,000 h.p.

BERTHING: Manoeuvring Area: **(A)** The areas for vessel manoeuvres have a width of 700 m. along the whole length of the quay with varying depths:

(1) Section "A"
10.06 m. = 33 ft., at low tide.
11.28 m. = 37 ft. at high tide

(2) Section "B"
In section "B", between the mooring heads, from Numbers 01 to 18:
11.28 m. = 37 ft., at full Spring tide
10.67 m. = 35 ft., at full Neap tide
7.62 m. = 31 ft., at low tide

(3) Sections "B" and "C"
In Section "B", from mooring head number 18 as far as Section "C", and all along that section
9.45 m. = 31 ft., at high tide
7.62 m. = 25 ft., at low tide

(4) Inflammables Quay
(a) Pier No. 2 – Internal berth
Max. drafts:
9.14 m. = 30 ft., at Spring high tides
8.23 m. = 27 ft., at Neap high tides
7.01 m. = 23 ft., at low tide
Max. vessel overall length = 176 m.
(b) Pier No. 2 – External berth
Max. drafts:
11.28 m. = 37 ft., at Spring high tides
10.67 m. = 35 ft., at Neap high tides
9.45 m. = 31 ft., at low tide
(c) Pier No. 1 – Propane berth
Max. drafts:
5.79 m. = 19 ft., at Spring high tides
5.18 m. = 17 ft., at Neap high tides
3.96 m. = 13 ft. at low tides
Max. overall length of vessels = 145 m.

At Section "B" berths, use of pontoons is obligatory for vessels of drafts greater than 27 ft. At the section "C" berths, it is convenient to use pontoons for vessels with drafts greater than 25 ft.

(B) *Restrictions:*
(i) Max. passage 50 m. = 164 ft.
(ii) Max. speed over the bottom = 9 knots
(iii) Vessels cannot move with trim or list when at the max. draft.
(iv) The max. depths at Spring and Neap tides shown above can only be used from 3 days before to 3 days after two days of full or new moon and two days of fourth crescent or waning moon, respectively. Nevertheless, the Tide Table must be consulted for the day in question in order to ensure a sheet of water over the keel of the ship greater than or equal to 8% of the depth at Spring tides or equal to 15% at Neap tides.
(v) Vessels with drafts between 35 ft. and 37 ft., inclusive, at Neap and Spring high tides, can only be moved with tugs, without using their propellers, along Section "B" of the channel (area facing Warehouses 01 and 02).
(vi) At the internal berth of Pier No. 2, night manoeuvres can only be effected with adequate illumination so that the whole berth and the area next to the deck and bridge are clearly visible, and at the discretion of the Master of the vessel.
(vii) At the internal berth of Pier No. 2, vessels can only manoeuvre during ebb tides and when the current is equal to or less than four tenths of a knot, i.e. the manoeuvres will be effected from commencement of ebb to a maximum of 2 hours afterwards; when the draft of the vessel is equal to or less than 22 ft., manoeuvres can be effected during 2 hours prior to ebb maximum until the completion of ebb.
(viii) In berthing manoeurvres at the internal berth of Pier No. 2, the minimum distance at which the end of the vessel (bow or stern) must be to the bridge is 10 m.

Traffic in port:
(a) No crossing or overtaking is permitted by vessels in the access channel if visibility is less than 2 miles.
(b) Crossing or overtaking is not permitted when one of the vessels has a draft exceeding 7.92 m. (26 ft.), between pairs of buoys 1-2 and 13-14. The vessel which has the current running at its stern, in this event, has preference in the manoeuvre, the other vessel being required to wait for it to pass.

Stay in Port:
After completion of operations, vessels must unberth within 1 hour, except where request has been made previously to the Port Administration and approval has been given.

BERTHING FACILITIES:
(a) Quays:
(1) Commercial Quay: Total length 2,106 m. with the following depths:
420 m. with a depth of 10 m.;
1,170 m. with a depth of 8 m.;
516 m. with a depth of 12.0 m.;
Mooring bollards every 25 m.
(2) Inflammables Quay – Secondary Pier (for Propane Carriers) berthable only on the outside, for vessels with max. length of 145 m. and draft up to 19 ft.
Principal Pier (Pier No. 2) – berthable on both sides, external and internal. Length of 184 m. and 174 m., bollards spaced 46 m., apart.
(b) Warehouses/Cold Stores/Silos/Open storage areas:
(1) Warehouses: 21 warehouses for general cargo, with total area of 56,400 sq.m. and total volume of 282,000 cu.m.
(2) Cold Stores: One cold store for 7,000 tons, operated by a private company on rental.
(3) Silos: Two vertical silos with total capacty of 110,000 tons.
Four horizontal silos with capacity of 68,000 tons.
Privately-operated silos:
One vertical of 10,000 tons.
Nine horizontal silos, total of 285,000 tons.
(4) Open areas: General cargo – 27,000 sq.m.
Heavy lifts 14,000 sq.m.
Containers 22,000 sq.m.
Fertilisers 3,000 sq.m.
Next to the port area are many warehouses, providing a rear-area with a capacity of 1,000,000 tons.
Also see "Bulk Handling Facilities".

CARGO HANDLING EQUIPMENT:
Cranes: 1×40 tons, 1×30 tons, 4×12.5 tons, 10×6.3 tons and 5×3 tons. 1×130 ton (Lorain) mobile crane. 1 bridge crane for 20 ft. – 40 ft. containers.
Port Authority heavy lift floating crane: 100 tons capacity.
Stacker Trucks: 8×7 tons, 8×5 tons, 15×3.5 tons, 18×2.5 tons and 1×2 tons.
Rolling Bridges: 3×1.5 t.p.h. (2 at Warehouse No. 8 and one at the cold store).
Grabs: 31×2 cu.m. – 3.8 cu.m.
Tractors: 42×45 h.p. – 105 h.p.
Ro/Ro: 1 Ro/Ro ramp but dredging is required.
Side Loaders: 2×36 tons (for containers).
Suction Units: 2 fixed in the vertical silo (Warehouse No. 1). Rate 75 t.p.h. each.
There are no barges, lighters, workboats or pontoons.

BULK HANDLING FACILITIES:
Cargill (Berth 12): One loading tower of 500 t.p.h., movable over a distance of 172 m., capacity 20,000 tons (horizontal silo). Also capacity for 3,000 tons of bulk oil with capacity of 150 t.p.h.
Sanbra (Berth 6): At Warehouses 6, 6a and 6b. 2 fixed loading towers, each 100 t.p.h., capacity 12,000 tons. Also two slightly movable elevators, with a total loading capacity of about 100 tons.
At the same berth there is a loading tower, movable over 180 m., with a loading capacity of 500 t.p.h. which is connected to a silo of 80,000 tons. Depth 9.45 m. Air draft 16.0 m.
Gransol (Berth 4): At warehouses 4 and 5. One loading tower, 400 t.p.h., movable over a distance of 150 m. and one fixed, loading rate 100 t.p.h. Storage capacity 10,000 tons. 2×12.5 ton portal cranes for containers at Shed 5.
Socopar (Berth 2): One loading tower, 300 t.p.h., movable over 110 m. Storage capacity 64,000 tons.
Port Silo (Berth 1): (Operated by the Port Administration) one loading tower, 300 t.p.h., movable over 150 m. Storage capacity 10,000 tons.
Cargill and Sanbra can handle vessels loading to 42 ft. by using pontoons. Other installations, even with the use of pontoons, can only handle vessels loading to 30 ft.
The new grain terminal at warehouse No. 13 with capacity of 164,000 tons and 2 loading towers, movable over 162 m., loading capacity 1,500 t.p.h. each. There are two additional vertical silos each with capacity of 110,000 tons.
Cold Store: Capacity 7,000 tons.
(★) *Liquid Bulk:* Liquid bulk cargoes consist mostly of soya bean, castor, peanut and cotton seed oil. Messrs. Cargill have their own storage tanks and a loading installation capable of delivering 200 t.p.h. All other shippers effect their shipments through portable pumps connected to tank-trucks. Loading capabilities of portable pumps: 30/50/80 and 100 t.p.h. Shippers provide the pumps and hoses and particulars are:
Hoses: Lengths 32 ft., 50 ft. and 100 ft. Diameters 2 in. and 4 in.
Also see "Developments".

STEVEDORES: *Working Hours:* Daywork: 0700–1100 and 1300–1700, overtime 1100–1300 and 1700–1900.
Nightwork: 1900–2300, 0000–0400. Overtime possible 2300–2400 and 0400–0600.
Same working hours are valid for Sundays and holidays with 20%–100% surcharge.

MEDICAL: All facilities available. Crew members should hold valid International inoculation certificates.

TANKERS: 2 berths, length 185 m. (outside) and 174 m. (inside). Depth alongside 9.0 m.–11.0 m. Bollards 46 m. apart. (★) Max. drafts 31 ft. and 26 ft. respectively).
Propane Quay: Length 142 m., depth 5.79 m. Bollards 46 m. apart.
Dirty Ballast: Petrobras Terminal has tanks (capacity 4,500 cu.m.) for dirty ballast and contaminated oil. At Commercial Quay collected free of charge by road tankers.
Also see "Report dated March 1993".

DENSITY: Salt water at entrance of the bar. Brackish water inside the Bay, which varies with the tides: At HW: between 1013 and 1024.
At LW: between 1012 and 1013.

FRESH WATER: 47 hydrants at 45 m. intervals available along the quays, rate up to 27 t.p.h. There is a water barge with capacity of 400 tons., pumping rate of 150 t.p.h. It is recommended that vessels advise Agent of their requirements prior to arrival, as the delivery rate is very low at some berths.

FUEL: Bunker C, fuel oil, diesel oil, Navy Special and all types of marine fuel available. Rate of supply for vessels at the Inflammables Quay: Diesel oil: 50 t.p.h. and fuel oil and mixtures: 200 t.p.h.
Bunkering of vessels in the roads or berthed at the Commercial Quay is by private barge – Empresa Transportadora "Estrela" Ltda., 1 self-propelled barge for diesel oil, capacity 185 tons, rate of supply 70 t.p.h., 1 dumb barge for fuel oil and mixtures, capacity 590 tons, delivery rate 140 t.p.h. Requests for bunkers must be made 96 hours minimum in advance through the Agencies.

FIRE PRECAUTIONS: *Fire fighting facilities:* 4 conventional fire-fighting tenders. 1 chemical spraying vehicle.

CONSULS: *In Paranagua:*
Denmark – Avenida Gabriel de Lara, 1471. Tel: 422-0605
Italy – Avenida Manoel Ribas, 317. Tel: 422-0045 and 422-0046
Norway – Avenida Gabriel de Lara, 1471. Tel: 422-0605

Peru – Rua do Rosario, 63. Tel: 24-2827
Poland – Rua Agostinho Leao Junior, 234. Tel: 22-2472
Portugal – Rua Marechal Deodoro, 126 – 8° andar. Tel: 22-4022
Syria – Rua Ebano Pereira, 28 – 2° andar. Tel: 23-3875 and 24-6691
Switzerland – Rua Marechal Floriano Peixoto, 228 – 8° andar Sala 807 Tel: 23-7553
Consulate General for the U.S.A. – Main office in Sao Paulo, Rua Padre Joao Manoel, 20. Tel: 37-5574.

REPAIRS: Small structural and machinery repairs possible in the port. 3 firms available.

DRY DOCKS: None.

SURVEYORS: Principal classification societies are represented in the town:

Lloyd's Register of Shipping;
American Bureau of Shipping;
Bureau Veritas;
Nippon Kaiji Kiokai;
Registro Italiano Navale;
Germanischer Lloyd;
Det Norske Veritas;
Brazil Salvage S.A.

Marine Surveyors: P & B – Consultoria Navel e Industrial Ltda.
Inspect Consultoria e Peritagens Ltda.

GANGWAY/DECK WATCHMEN: At least 1 watchman is compulsory on board every vessel alongside 24 hours per day.

OPENING/CLOSING HATCHES: By stevedores.

REPATRIATION: Possible.

AIRPORT: Curitiba, 80 km. from the port for national connections. Paranagua, for medium distance carriers. Air taxi service also available.

TIME: Local time 3 hours behind G.M.T.

HOLIDAYS: National: 1st January; 21st April; 1st May; 7th September; 2nd November; 15th November and 25th December. Local: 29th July and Corpus Christi (movable).

POLICE/AMBULANCE/FIRE: Civil Police 422-0101 and 422-0172. First aid 422-0111. Fire 193. Maritime Police 422-0382.

TELEPHONES: Request for installation should be made to the Traffic Section of the Port Administration.

SERVICES: Cleaning services available. Electronic repairs possible. Rubbish collected daily from drums on quay. Deratting service available. Divers available.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: I.D. Card, Seaman's Book or Passport sufficient.

DELAYS: Normally no delays.

GENERAL:

(★) *Preferential Docking:* Port Administration regulations for Preferential Docking are as follows:

1. Preferential docking is granted to vessels operating with cereals and meats in bulk at the following berths equipped with special mechanical installations:

Berth 1	– Vertical Silo, belonging to Port Administration
Berth 2	– Vertical Silo, belonging to Soceppar
Berth 4/5	– Horizontal Silo, belonging to Gransol
Berth 6	– Horizontal Silo, belonging to Sanbra
Berth 12	– Horizontal Silo, belonging to Cargill
Berth 13	– Horizontal Silo, belonging to Port Administration

2. Preferential docking is granted to vessels discharging solid bulk cargoes (fertilisers, salt, minerals) using shore cranes and grabs at Berth 11. Upon arrival of such vessels, should this berth be occupied, they may dock at any other berth, shifting to Berth 11 when it becomes available and only if Port Administration feel this necessary.

3. Preferential docking is granted to vessels operating exclusively with containers at Berth 14.

4. Preferential docking is granted to vessels operating exclusively with liquid gas and liquid bulk cargoes at the special inflammable berths.

5. For vessels operating general cargo, docking will be granted at any berth according to time of arrival and in compliance with above mentioned preferential dockings.

6. When a general cargo vessel docks at any preferential berth, this will be done on a conditional basis, having to vacate this berth upon arrival of any other vessel with preferential docking for that particular berth, provided there is another berth available. All expenses due to shifting will have to be paid by the interested party.

7. Any vessels operating bulk and general cargo and docked at preferential berth will have to vacate this berth upon completion of loading/discharging the cargo, giving right to a preferential docking, if and whenever another vessel with the same rights should be awaiting this berth but only according to Clause 6.
   (a) Vessels docked at a preferential berth for a specific cargo may load/discharge simultaneously any other cargo provided this does not interfere or prejudice the loading of that specific cargo.
   (b) All vessels have a right to a maximum of three loading berths being allowed to shift from one berth to another without losing their priority and will do so according to Clause 6.

8. All vessels are entitled to up to three dockings.
   (a) Only under special circumstances duly justified and only with the Port Administration consent may a vessel dock more than the times established in item 8.

9. A vessel may only dock when its cargo is ready for shipment and port dues (export/import) are duly paid for up to the following percentages:
   (a) General and bulk cargo:
      1. Up to 50% of declared general cargo.
      2. Up to 50% of cargo declared at each loading berth.
      3. For the specific case of coffee the following percentages will be observed, duly verified by I.B.C. (Brazilian Coffee Institute):

Up to 5,000 bags coffee declared	100%
Up to 10,000 bags coffee declared	50%
Up to 20,000 bags coffee declared	35%
Up to 30,000 bags coffee declared	30%
Up to 50,000 bags coffee declared	25%
Up to 100,000 bags coffee declared	20%
Over 100,000 bags coffee declared	15%

For vessels arriving and initiating operations on a Monday morning or the day following a holiday, docking will be granted on a conditional basis, providing she has a minimum of 2,000 bags of coffee ready for immediate operation and if by 1100 hrs. she did not fulfil above mentioned percentages she will have to undock having to cope with all expenses and placed at the end of the line of vessels awaiting a berth.

   (b) Above mentioned percentages may be altered by the Port Administration at any moment and at their discretion.
   (c) So as to be able to comply with mentioned rules, all agencies must declare, without forfeit, to the Port Administration when requesting normal docking or with priority, vessel's complete bookings.
   (d) Any vessels not maintaining normal loading/discharging rates will be forced to undock taking last place in line of vessels awaiting berth.

10. After load/discharge operations are completed, any auxiliary operations will have to be carried out at anchor unless duly authorised by Port Administration.

11. In order to provide proper service for vessel's discharge, all agencies are obliged to hand over to Port Administration vessel's cargo manifest and a non-negotiable copy of all bills of lading, as well as furnishing time of arrival and any alteration of same.

12. Any vessels undocking voluntarily due to lack of cargo will maintain first place in line of vessels awaiting berth.

DEVELOPMENTS: New quay with length 350 m. and depth 13.0 m. to be constructed. These new berths will provide one additional berth for bulk carriers and one berth for container vessels.

Terminal Maritima Cattalini: Under construction. Facilities consist of a private pier with berthing length of 280 m. and 15 tanks (36,000 cu.m.) for vegetable oil and chemicals. Loading/discharge rate of 400 t.p.h. – 700 t.p.h., depending on product and vessel. Depth 37 ft. Also see "Report" – dated March 1993.

A shiploader rated at 1,500 t.p.h. (heavy grain) with travel of 175 m. is available, and an additional 2 shiploaders (1,500 t.p.h.) are under construction.

REPORT: March 1993.

The following was received by a tanker operator from an Agent in Paranagua.

LPG Berth Name:	Petrobras Pier and/or Inflammables Terminal.
Length:	184 m. external side, and 174 m. internal side.
Berth Operator:	Petroleo Brasileiro S/A – Petrobras.
Vessel's Max. LOA:	196 m. external side, 176 m. internal side.
Maximum Beam:	There is no official beam restrictions, but it is recommended to limit this to 40 m.
Displacement:	Restricted to the size and draft allowed for the vessels.
Max. Draft allowed:	Approach Channel "Galheta": H.W. L.W. Daytime 11.00 m. (37 ft.) 9.45 m. (31 ft.) Night-time 9.45 m. (31 ft.) 8.23 m. (27 ft.) Petrobras Pier/Inflammables Terminal: Ext. side 9.90 m. (32.5 ft.) 8.83 m. (29 ft.) Int. side 8.53 m. (28 ft.) 7.01 m. (23 ft.) As the depths in the dredged channel, manoeuvring basin and alongside the Pier/Docks, vary from time to time, the Captain of the Port, periodically issues notices giving the maximum draft permitted for navigation.
Minimum Depth at Berth:	External side 10.04 m. (33 ft. 00 in.) U.K.C. 1.21 m. (4 ft. 00 in.) Max. Draft allowed 8.83 m. (29 ft. 00 in.)
Minimum Depth in Approaches:	10.66 m. (35 ft. 00 in.) U.K.C. 1.21 m. (4 ft. 00 in.) Max. Draft allowed 09.45 m. (31 ft. 00 in.)
Water Density in Approaches:	1016 (Brackish).
Manoeuvres:	Berthing/unberthing manoeuvres are allowed at night, but conditional on draft limitations and high tidal times.
Bunkering:	In a variety of grades (FO/IFO/MDO/GO), bunkering is carried out at the Inflammables Terminal, through the 12 in. pipelines of the oil companies, and at the rate of 30 t.p.h. Bunkers could also be supplied by a 500 ton dumb barge; at a loading rate of 170 tons or more per hour.
Fresh Water:	Obtainable from hydrants lined up in the pier at a loading rate of 10 t.p.h.
Distances:	Vertical distances from ship's manifold to water line: Minimum 20.00 m. Maximum 25.00 m.
Type of Berth:	Pier – Affording the simultaneous berthing of two oil tankers.
Minimum Size of a Vessel:	No official restrictions.
Distances:	Maximum distance ship's bow to centre manifold (SCM) 92 m. Maximum distance ship's stern to centre manifold (SCM) 92 m.
Grades of Cargo Handled:	FO/IFO/MDO/DO/GO/Nafta/Kerosene/LPG.

Lighterage: Not available for liquified gas.

Dirty Ballast: May be received. Storage with capacity of 5,000 cu.m.

Slops Acceptance: May be accepted, arrangements should be made in advance directly with Petrobras.

Towage: Presently Paranagua has 6 tugs, as listed below:

Name	*H.P.*	*Bollard Pull* (tons)
Centaurus	2,170	33.4
Pegasus	2,170	33.4
Galahad	3,000	35.4
Excalibur	3,000	35.4
Lagoa Gaucha	2,100	30.0
Lagoa Mineira	2,100	30.0

Air draft: No restrictions.

Pilotage: Pilotage is mandatory from the pilot buoy, which is a distance of some 18 miles from the harbour. The pilots are normally picked-up (or dropped) within a one-mile radius area, its centre corresponding to the coordinates 26° 37' 00" S., 48° 15' 30" W. (see Brazilian Nautical Charts No. 1820/1821/1822/1823).

The pilot boarding station is radioed through VHF Channels 12 and 16. Pilots are normally requested by the ship's Agents some 4 hours prior to the ship's arrival at the pilot buoy. It is therefore advisable that vessels send their ETA to the Agents at that area.

Storage: Storage available ashore:

LPG	7,317 tons	DO	19,000 cu.m.
MFO	5,886 tons	Av. Kero	28,000 cu.m.
Gas Oil	38,000 cu.m.	OC2A	23,923 cu.m.
Nafta	37,433 cu.m.		

The storage ashore for LPG is pressurised.

Arm Configuration: According to Petrobras, both arm configurations for loading/discharging are available.

Size of Connections: Liquid 8 in. and 10 in. Vapour 6 in.

Density at Berths: 1016.

Documentation: Usual cargo documents, as well as vessels certificates are required by Port Authorities.

Additional Information: We have been informed by Petrobras that there is no specific system for emergency shut down. Escape could only be made by walking along the quay extension (800 m.), or by sea with the assistance of tugs, which may be employed in firefighting and salvage operations.

Administracao dos Portos de Paranagua e Antonina, Av. Governador Manoel Ribas, S/No. Paranagua, Brazil. *Tel:* 422-3311, 422-0282.

AGENT: Wilson Sons Agencia Maritima Ltda., Avenida Arthur de Abreu 29, 5th Floor, 83203-480 Paranagua PR. Tel: (041) 423-1444 (After hours: (041) 423-3562 and 423-4294). Telex: (41) 4143 WSON BR. Fax: (041) 423-3020. Cables: Anglicus.

Curitiba: Wilson Sons Agencia Maritima Ltda., Rua Marechal Deodoro, 252 Conjunto 402, 80010-010 Curitiba PR. Tel: (041) 223-8044 (After hours: (041) 359-2546). Telex: (41) 35051. Fax: (041) 224-7969.

PELOTAS: 31.47 S. 52.20 W. (See Plan)

LOCATION: The port is located on the Northern edge of the Sao Goncalo channel.

APPROACHES: The access channel is 80 m. wide with depth 5.1 m.

PILOTAGE: Available through Associacao dos Praticos da Lagoa dos Patos – Rua General Bacelar, 444 Rio Grande – RS. Tel: 21349.

TUGS: Delegates Services Administration tugs are used.

BERTHING: Manoeuvring basin: 120 m. wide, depth 5.1 m.

Quay: 500 m. long, depth 2.5 m.

CRANES: 2 mobile cranes, with capacities of 50 tons each. Twelve stacker trucks with 1.8 tons capacity each.

BULK HANDLING FACILITIES: One Samrig type silo with a capacity of 6,880 tons.

STORAGE: 3 warehouses with an area of 7,160 sq.m., 6,000 sq.m. of covered storage and 1,160 sq.m. of open storage available.

FRESH WATER: 7 hydrants spaced 65 m. apart with a discharge rate of 18 t.p.h.

FUEL: Available.

CONSULS: Italy (Consular Agency) and Portugal (Vice-consul).

AIRPORT: 10 km. distant.

TIME: GMT minus 3 hours.

HOLIDAYS: National: 1st January, 21st April, 1st May, 7th September, 12th October, 15th November and 25th December.

Regional: 2nd February.

Movable: Monday and Tuesday of Carnival, Ash Wednesday, Good Friday and Corpus Christi.

Commemorative Days: 28th August (Banks), 28th October (Public Officials), 30th October (Commercial) and 2nd November (All Saints).

AUTHORITY: Porto do Pelotas, Rua Conde de Porto Alegre, 1. 96.100 – Pelotas – RS. *Tel:* (0532) 22.1125 and 22.1134. *Contact:* Engineer Jose Fernando Marques Ripoll, Harbour Manager.

PONTA DA MADEIRA: 02.34 S. 44.23 W. (See Plan)

LOCATION: Ponta da Madeira Port Complex (CPPM) is located on the Eastern shore of Sao Marcos Bay, on the island of Sao Luis. It comprises two piers in the following positions:

Pier I: Lat. 02° 34.0' S., Long. 44° 23.0' W.
Pier II: Lat. 02° 34.5' S., Long. 44° 22.3' W.

CPPM is about 8 km. South of Sao Luis City, capital of Maranhao State, to which it is linked by a roadway.

CPPM is the property of Companhia Vale do Rio Doce, and is operated and administered by them.

Pier I is a port installation for private general use, out of the area of the state owned Port of Itaqui.

Pier II is a port installation for private general use, in the area of the state owned Port of Itaqui.

Both piers provide infrastructure to stock and to ship the materials transported by Carajas Railway.

Vessels waiting in the Outer or Inner Anchorage Areas must send the Notice of Readiness, after dropping anchor, via telex to the Agent, who will contact CPPM. Vessels proceeding directly either to Pier I or Pier II shall tender Notice of Readiness as they cross parallel 02° 31.3' S.

DOCUMENTS: All vessels are boarded by the following Port Authorities in the waiting areas, or alternatively at the pier immediately after berthing:

Port Health Authority (Saude dos Portos).
Customs (Receita Federal).
Immigration (Policia Federal).

The Port Authorities clearance is carried out, every day of the week, at any time, day or night, Saturdays, Sundays and holidays included.

The following valid original documents must be presented to the Port Health Authorities, Customs and Immigration:

Port Health Authority:

Health Declaration, filled out according to the Sanitary Regulation No. 2 from World Health Organisation.
Ship's Medical Log.
Yellow Fever Vaccination Certificates of all crew members and passengers, as well as their Seaman's Book and Passports.
Crew List (Form 1-418).
Request for Free Pratique.
Passengers List, including transit and disembarking (Form CF-3171).

Customs:

Master's Oath (Form CF-1300).
Crew List (Form 1-418).
Stores List (Form CF-1303).
Crew's Personal Effects List (personal items and baggage) (Form CF-1304).
Passengers List, including in transit and disembarking (Form CF-3171).

Immigration:

Master's Oath (Form CF-1300).
General Declaration (Form CF-1301).
Crew List (Form 1-418).
Passengers List (Form CF-3171).
List of Guns and other kinds of weapons on board.
List of Narcotics on board.
List of Stowaways, if any.

Note: All forms should be fulfilled.

General:

Shore leave may be granted at Master's discretion, after clearance is given by Port Authorities.

The ship's Master must advise the crew that Brazilian Regulations concerning smuggling laws are strictly followed by the Agents and Customs. The crew must be assured that all items, cigarettes, tobacco, alcoholic beverages, should be kept in the locked store, which will be sealed by Customs Authorities during the stay of the vessel at CPPM. Only small consumable quantities of cigarettes, alcoholic beverages and personal effects can be kept in the cabin.

Passengers must have their passports in order to be able to disembark.

When ashore, crew members must have their identification documents with them.

Only persons duly authorised by CPPM will have access to the piers. Any person visiting ships must have authorisation from the Master and Port Authorities. The administration of CPPM will not be held responsible for any accident caused to or by persons visiting ships.

If any unauthorised person is found on board, loading must be stopped until the person leaves the ship, with all time and costs allocated to the ship.

Upon request, CPPM Security can arrange taxi for transportation from the Terminal to the outside area. CPPM Security is not responsible for payment of such transportation. Private vehicles are not allowed to enter the Terminal area.

The ship's Master must have ready to present, during inspection, the Derat Certificate or the Derat Exemption Certificate, as well as the Health Certificate from the last port of call.

Ships are requested to keep propeller totally immersed.

Degasification operations are not allowed when the vessel is berthed or in the vicinity of the piers, where CPPM authorities judge it to be dangerous.

After clearance by Port Health Authority, the holds of the vessel will be inspected by representatives of the Master and CPPM. The holds must be clean, free of water and ready to receive the cargo.

If the holds are suitable, the representatives of CPPM and the ship's Master will sign the Inspection Certificate. If not, the Notice of Readiness will be cancelled until all the requirements have been fulfilled.

Also see "Radio".

APPROACHES: *Access Channel:* The access channel to CPPM starts around 12 miles South of BF-3. It is 55 miles long and can be divided into the following sectors:

(a) From the pair of light Buoys No. 1 and 2 until abeam of Buoy No. 6; being 7.6 miles long, in the direction 208° – 028°.
(b) From light Buoy No. 6 until 1.8 miles after Buoy No. 14; being 11.6 miles long, in the direction 238° – 058°.
(c) From 1.8 miles after Buoy No. 14 until the pair of Buoys Nos. 19 and 24; being 33.6 miles long, in the direction 213° – 033°.

The width of the channel is 1,000 m., in almost all its extension, except in the following parts, where the width is a minimum of 500 m.:
(i) Between the pair of light Buoys No. 1 and 2, and the pair of light Buoys No. 3 and 4.
(ii) Between the pair of light Buoys No. 5 and 10, and the pair of light Buoys No. 9 and 14.
(iii) Between the pair of light Buoys No. 17 and 22.

The minimum depth of the channel is 23.0 m. in the narrowest sectors, except between light Buoys No. 17 and 22, where it was dredged to 25.0 m.

Turning Basin: The Turning Basin of Pier I is limited on its Eastern side by the docking alignment, on its Southern side by the 02° 34′ 30″ S. parallel and on its Western side by light Buoys No. 23 and 25. It is approximately 0.8 mile wide and 3 miles long. Depths range from 23.0 m. (by the docking alignment) to 35.0 m. (close to Buoy No. 25).

At Pier I, there are 2 breakwaters in order to weaken the tidal currents in the approaching and berthing areas.

The breakwaters were projected and built to lessen the effects of the tidal streams over the docking place, and also to maintain the cleaning power through the circulation of water between them. The Northern Breakwater starts at Boqueirao Beach. It is 980 m. long and at its end there is a 150 m. long appendix that was built 80° from its axle Northwards. Its appendix is more efficient during flood tides deflecting the current to the approximate direction of the centre line of the vessel, keeping it berthed. The Southern Breakwater is more efficient during ebb tides, since the lowering of its last 130 m. to the quote of −2.75 m. brings the flow of the main current to little more than 50 m. away from the breasting line, weakening considerably the effect of the whirls on the vessels and, consequently on the moorings. 200 m. out from the pier, the currents flow parallel to the pier.

Pier II: The Turning Basin of Pier II is an extension of that of Pier I. It is limited on its Southern side by light Buoy "Cardinal Norte", and on its Eastern side by the docking alignment. It has a crust instability, Guarapira Island, that forms on the Eastern side, the cove of state owned Port of Itaqui. The cove is 200 m. wide and 720 m. long.

Evaluations on the manoeuvres performed allowed the conception of two methods of performance:

The first one is to vessels up to 76,000 d.w.t., where the area for manoeuvring (200 m. wide and 720 m. long) is located between the pier of Itaqui Port and Guarapira Island, the manoeuvring is always oriented by turning round South of Guarapira Island. Depths range from 11.4 m. to 26.0 m.

The second one is to vessels larger than 76,000 d.w.t., according to which the manoeuvres are performed inside the Turning Basin of Pier I and in its extension, which adopts as a limit the contour of Buoy No. 25. Both extension and Western limit dimensions are about 0.8 miles. Depths range from 18.0 m. (by the berthing line) to 35.0 m. (near Buoy No. 25).

PILOTAGE: Pilotage is compulsory in Sao Marcos Bay, from the pilot station up to any mooring or docking point.

Schedules and forecasts for berthing or unberthing manoeuvres of vessels bound for the port installations of CPPM are scheduled by the Operational Control Centre of CPPM. Requests for Pilot must be made through this Administrative Centre.

For other necessities not mentioned above, the Pilot must be requested via Embratel Coastal Station (Estacao Costeira) through the ship's Agent, 48 hours in advance. The request will be confirmed 4 hours in advance on the following frequencies:

Channel 16, working Channels 13, 11 and 9.

Vessels with less than 11.0 m. draft must board the Pilot at the pilot station, which is shown on Nautical Chart No. 413, and the co-ordinates are the following:

Lat. 02° 28.9′ S., Long. 44° 22.2′ W.

Ships with part-cargo or in ballast, proceeding from Outer Anchorage or not, with draft over 11.0 m., must receive the Pilot between Buoys No. 17 and 22.

During the night, the pilot boat will show lights according to international regulations, that is, fixed white over a red light and the usual navigation lights.

In Sao Marcos Bay, the Pilot embarks and disembarks by boat. All vessels must have rigged a ladder in accordance with "International Maritime Organisation SOLAS Regulations", under SOLAS Chapter V, Regulation 17, amended in 1973 by IMO's Regulation A 263(VII) and in 1979 by Regulation A 426(XI).

In Sao Marcos Bay, there is a routine to embark and disembark the Pilot by starboard side.

Special care must be taken when the vessel is approaching the pilot station, in the period of 3 hours before high tide, when the ebb currents can reach a speed of 5 knots.

NAVIGATION AIDS: *Light Float:* Light Float BF-3 has a red painted framework tower that emits flashes of white light, 14.0 m. tall. The BF-3 is anchored at the following position:

Lat. 01° 34.9′ S., Long. 43° 50.8′ W., and with the following characteristics:

Length	17.00 m.
Breadth	6.70 m.
Spotlight focus height	14.00 m.
Painted	Red
Prefix	BF-3
Light	Fl. W(2), 15 seconds
Radar-Racon	Charlie

Nautical Charts: The access channel, the anchorage areas, the turning basins and the docking places are shown on the following nautical charts:

Charts No. 400, 410, 411, 412, 413 and 414, published by Diretoria de Hidrografia e Navegacao do Brasil (DHN).

Charts No. 24270 and 24271, published by the United States Hydrographic Service (HO).

Charts No. 3958 and 535 of the British Admiralty (BA).

In the charts published by DHN, the depths are indicated in meters and refer to the Tide Datum level adopted for the largest scale chart.

Radio Beacons: There are the following Radio Beacons in the area:

Sao Marcos –	Frequency: 300 kHz Signal: SM Position: Lat. 02° 29.0′ S., Long. 44° 18.0′ W.
Sao Joao –	Frequency: 320 kHz Signal: AI Position: Lat. 01° 18.0′ S., Long. 44° 54.0′ W.
Airport of Sao Luis –	Frequency: 280 kHz Signal: SL Position: Lat. 02° 35.0′ S., Long. 44° 14.0′ W.

Racons (Radar Beacons): At the entrance of Sao Marcos Bay and its surroundings, there are also Racons with the following characteristics:

Light Boat BF-3 – Racon operating in the X and S bands, signal "Charlie", active 18 sec. and inactive 12 sec.

Sao Joao Beacon Lighthouse – Racon in the X and S bands, signal "Oscar", active 8 sec. and inactive 12 sec.

Pirajuba Beacon Lighthouse – Racon in the X and S bands, signal "Zulu, active 18 sec. and inactive 12 sec.

Aracagi Beacon Lighthouse – Racon in the X and S bands, signal "Quebec", active 18 sec. and inactive 12 sec.

Lighthouses: In the area of Sao Marcos Bay and its surroundings, the following lighthouses are installed: Sao Joao, Mangunca, Pirajuba, Pirarema, Alcantara, Ilha do Medo, Ponta de Areia, Sao Marcos, Aracagi and Santana.

Their positions and characteristics are represented on the nautical charts and are also listed in the List of Lighthouses, published by DHN.

Lighted Buoys: The access channel to CPPM is beaconed by 22 light buoys equipped with active radar reflectors.

The Turning Basin of Pier I is beaconed by 7 light buoys equipped with active radar reflectors.

The Turning Basin of Pier II is beaconed by 4 light buoys equipped with active radar reflectors.

CPPM distribute a bulletin of "Occurrence Control and Buoys Status in the Channel" to ship's Agents weekly. This bulletin supplies detailed information about the status of each one of the buoys.

DGPS – CPPM holds a reference station to Differential Global Position System at Sao Marcos Radio Beacon Lighthouse that can be used by vessels. This station processes the correction of geographic co-ordinates referred to the same Datum (Corrego Alegre), of Nautical Chart No. 410, without damage to the radiogoniometry.

ANCHORAGES: *Outward Anchorage:* If occasionally all anchorage areas (Inner and Outer Anchorage Areas) are occupied and reserved for vessels bound for CPPM with part-cargo or in ballast that makes her draft over 11.0 m., vessels must anchor in the Outward Anchorage, located N.N.E. of Buoy No. 2, in the entrance of the channel.

Outer Anchorage: This area, called Area I, is between Buoys No. 6 and 10. It is reserved for vessels bound for CPPM with part-cargo with draft over 11.0 m. It is also for vessels waiting and for those doing repairs.

This area is limited by a rectangle marked by the following co-ordinates:

(A)	Lat. 01° 58.5′ S.	Long. 44° 07.0′ W.
(B)	Lat. 01° 55.5′ S.	Long. 44° 09.0′ W.
(C)	Lat. 01° 49.2′ S.	Long. 43° 58.4′ W.
(D)	Lat. 01° 51.8′ S.	Long. 43° 56.5′ W.

Anchorage Areas for Awaiting Tide Conditions:

Area 2: This area is away from the Eastern edge of the channel between Buoys No. 16 and 18. This area is for loaded ships with draft over 20.0 m. waiting for tidal conditions to pass Buoys No. 14 and 10, and also Buoys No. 4 and 2. It is limited by the polygon marked by the following co-ordinates:

(A)	Lat. 02° 02.9′ S.	Long. 44° 03.4′ W.
(B)	Lat. 02° 05.4′ S.	Long. 44° 03.4′ W.
(C)	Lat. 02° 06.0′ S.	Long. 44° 07.2′ W.
(D)	Lat. 02° 04.4′ S.	Long. 44° 06.1′ W.

Area 3: This area is located near the Eastern edge of the channel, between Buoys No. 18 and 15. This area is for loaded ships with draft over 20.0 m. waiting for tidal conditions to pass Buoys No. 14 and 10, and also Buoys No. 14 and 10, and also Buoys No. 4 and 2, when Area 2 is occupied. It is limited by the polygon marked by the following co-ordinates:

(A)	Lat. 02° 08.3′ S.	Long. 44° 08.7′ W.
(B)	Lat. 02° 10.9′ S.	Long. 44° 09.0′ W.
(C)	Lat. 02° 12.1′ S.	Long. 44° 10.0′ W.
(D)	Lat. 02° 12.1′ S.	Long. 44° 11.0′ W.

Inner Anchorages:

Area 4: This area is for ships with a maximum draft of 11.0 m. The area is away from the Eastern edge of the channel and located abeam of Buoys No. 20 and 22, and is limited by the following co-ordinates:

(A)	Lat. 02° 08.3′ S.	Long. 44° 08.7′ W.
(B)	Lat. 02° 10.9′ S.	Long. 44° 09.0′ W.
(C)	Lat. 02° 12.1′ S.	Long. 44° 10.0′ W.
(D)	Lat. 02° 12.1′ S.	Long. 44° 11.0′ W.

The bottom in this area is composed by mud and fine sand, with depths ranging from 11.3 m. to 16.0 m.

Area 5: This area is for vessels with a maximum draft of 11.0 m. It is located West of the channel next of Buoys No. 17 and 22, and is limited by the following co-ordinates:

(A)	Lat. 02° 22.2′ S.	Long. 44° 20.3′ W.
(B)	Lat. 02° 25.0′ S.	Long. 44° 21.3′ W.
(C)	Lat. 02° 24.4′ S.	Long. 44° 22.2′ W.
(D)	Lat. 02° 22.1′ S.	Long. 44° 20.4′ W.

The bottom in this area is composed by core and coarse sand with depths ranging from 14.5 m. to 34.0 m.

Area 6: This area is for vessels with a maximum draft of 11.0 m. It is located between Buoy No. 22 and the beacons of Sao Marcos and Aracagi. It is limited by the following co-ordinates:

(A)	Lat. 02° 24.1′ S.	Long. 44° 17.7′ W.
(B)	Lat. 02° 26.7′ S.	Long. 44° 15.8′ W.
(C)	Lat. 02° 27.4′ S.	Long. 44° 17.2′ W.
(D)	Lat. 02° 26.8′ S.	Long. 44° 19.4′ W.

The bottom in this area is composed by fine sand with depths ranging from 15.0 m. to 27.0 m.

Area 7: Located close to CPPM, this area is for vessels with a maximum draft of 11.0 m. The use of this anchorage area must be authorised by local Port Authorities and it is limited by the following co-ordinates:

(A)	Lat. 02° 33.6′ S.	Long. 44° 25.0′ W.
(B)	Lat. 02° 34.0′ S.	Long. 44° 23.6′ W.
(E)	Lat. 02° 35.5′ S.	Long. 44° 24.3′ W.
(F)	Lat. 02° 34.8′ S.	Long. 44° 25.7′ W.

The bottom in this area is covered by sand that varies from coarse to fine, with depths ranging from 14.0 m. to 22.0 m.

Area 7A: Located by the Western shore of the channel and near CPPM, this area is for vessels awaiting berthing at a maximum draft of 11.0 m. Its use must be authorised by local Port Authorities and it is limited by the following co-ordinates:

(A)	Lat. 02° 28.6′ S.	Long. 44° 24.5′ W.
(B)	Lat. 02° 29.2′ S.	Long. 44° 24.0′ W.
(C)	Lat. 02° 30.6′ S.	Long. 44° 25.4′ W.
(D)	Lat. 02° 29.9′ S.	Long. 44° 26.0′ W.

Area 8: It is an extension of Area 7, destinated for vessels in quarantine with maximum draft of 11.0 m. It can also be used for loading and unloading fuels and explosives. Its use must be authorised by local Port Authorities and it is limited by the following co-ordinates:

(F)	Lat. 02° 35.4′ S.	Long. 44° 26.0′ W.
(E)	Lat. 02° 34.8′ S.	Long. 44° 27.7′ W.
(D)	Lat. 02° 35.5′ S.	Long. 44° 24.3′ W.
(G)	Lat. 02° 36.8′ S.	Long. 44° 24.8′ W.
(H)	Lat. 02° 36.2′ S.	Long. 44° 26.0′ W.

RESTRICTIONS: All vessels proceeding to or leaving the anchorage areas must manoeuvre by crossing perpendicular to the axis of the channel, so as to leave the channel clear for those who are in the channel. Any vessel leaving the Access Channel to Sao Marcos Bay will have traffic priority. All those entering the channel must give way and wait in the anchorage areas.

All vessels sailing in the channel must thoroughly obey the rules of the International Regulations in order to avoid collisions (COLREG).

MAX. SIZE: *Pier I:* N.S. oriented and about 200 m. away from Ponta da Madeira, can accept vessels with a maximum of 420,000 d.w.t. Vessels of less than 20,000 d.w.t. require previous permission from CPPM Administration.

The vessel must be ballasted to allow loading at a maximum air draft of 22.4 m. Deballasting must be started after authorisation from the foreman and performed as the vessel is being loaded, at a rate that allows the loading operation to stay within the air draft limit.

Pier II: Located South of Ponta da Madeira. It was built in a N.N.E. direction and accepts vessels with a maximum of 155,000 d.w.t..

The vessel must have sufficient ballast to allow loading at a maximum air draft of 18.0 m.

Deballasting must be started after authorisation from the foreman and continue as the vessel is being loaded, at a rate that allows the loading operation, considering the air draft limit.

HEALTH: When the vessel is not considered in a satisfactory sanitary condition, the vessel must wait in the anchorage area, in Quarantine, indicated by the Port Authority. In this case, the crew are not allowed to disembark.

Also see "Documents".

RADIO: Long distance radio communication is via Embratel, by contacting one of the RENEC – National Coastal Station Networks, with priority and in the frequencies indicated below:

PPB (Belem), on 8, 12 and 16 MHz.
PPO (Olinda), on 8, 12 and 16 MHz.
PPR (Rio de Janeiro), on 8, 12, 16 and 22 MHz.

All vessels proceeding to or leaving the access channel to Sao Marcos Bay, when sailing through the channel or when anchored, must maintain communications with Port Authorities (Capitania dos Portos), from 0700 hrs. to 2200 hrs. through the Port Control, on VHF Channel 16 and 4146 kHz.

At least 4 hours before arrival, vessels must contact PPB (Sao Luis Radio) on frequency 4,125 kHz, in A3J, and CPPM, calling on Channels 16, working on Channels 12 and 13 with the Agent.

In the Estimated Time of Arrival (ETA), the legal time of Sao Luis must be used. The local legal time is the Greenwich Mean Time (GMT) less 3 hours.

Fax: (098) 218 4019, Port Operations Centre.

From October 16th to February 16th, all ports South of Sao Luis adopt Daylight Saving Time, which corresponds with GMT less 2 hours.

Arrival Advice: *The following Arrival Advice must be sent to CPPM and to the Agent:*

I. 15 days before vessel's ETA at CPPM or upon departure from the last port of call, whichever prevails:

1. Present name of the Vessel.
2. Previous name of the Vessel.
3. Master's name.
4. Estimated Time of Arrival (ETA).
5. Shipowner's name with full style.
6. Manager's/Operator's name and full style.
7. P&I Club, full name and style.
8. Hull and Machinery Insurance Company.
9. Classification Society.
10. Date of the last dry docking.
11. Date of the last Special Survey.
12. Date of expiry Continuous Hull Survey.
13. Date of expiry Continuous Machinery Survey.
14. Date of expiry Load Line Certificate, both annual an the full term.
15. Date of expiry Safety Construction Certificate, both annual and the full term.
16. Date of expiry Safety Equipment Certificate, both annual and the full term.
17. Date of expiry Internatioal Oil Pollution Prevention Certificate, both annual and the full term.
18. Date of expiry Safety Radio Certificate, annual.
19. Latest six voyages, reporting ports of calls, dates and cargoes.
20. Condition of class.

II. 8 days before vessel's ETA at CPPM:

(a) Day and time of vessel's arrival.
(b) Tropical d.w.t, in metric tons.
(c) LOA, in metres.
(d) Breadth, in metres.
(e) Tropical draft.
(f) Longitudinal distance from forwardmost superstructure bulkhead to bow.
(g) Expected arrival/departure drafts.
(h) Stowage plan and loading sequence. The cargo operations control form shall be completed after arrival.
(i) Air draft.
(j) Deballasting time.
(k) Fresh water required.
(l) Gas free condition. *O/O and OBO, vessels whose last oil loading was performed within last 12 months must present the "Gas Free Certificate", right after berthing. This Certificate must be issued by an authorised surveyor.*
(m) Number of stern and head lines, indicating the diameter and material of the ropes, if stowed on drums of the winches or on vertical bollards.
(n) Number of fore and aft springs, indicating the diameter and material of the ropes, if stowed on drums of the winches or on vertical bollards.
(o) Number of fore and aft breasts, indicating the diameter and material of the ropes if stowed on drums of the winches or on vertical bollards.
(p) Information about the winches, brakes and rope conditions.
(q) Availability of other ropes suitable for use, indicating the diameter and material of the ropes.

III. 48 hours before arrival, vessels must transit to Port Authorities (Capitania dos Portos) the following information:

(a) ETA.
(b) Request for Free Pratique or Quarantine.
(c) 1Request for instructions about anchorage place.
(d) Request for Pilot to the Agent.

At least 48 hours before arrival, to CPPM, the Master whose vessel is in satisfactory sanitary conditions must ask the Port Authorities (Capitania dos Portos) for Free Pratique.

The vessel whose Free Pratique has been granted will be boarded in the anchorage areas or at the pier.

IV. 24 hours before arrival:

(a) Day and time of vessel's arrival.
(b) Any changes in previous information.
(c) Confirmation of Gas Free Condition.

VHF: See "Radio" and "Tugs".

TUGS: The usage of tugs is compulsory for all berthing and unberthing manoeuvres of vessels bound for CPPM. Communications with tugs and the Pilot will be established preferably via VHF Channels 16, 9, 11 and 13.

The tug fleet of Sao Marcos Bay is composed of 1×52 tons bollard pull, 2×25 tons bollard pull and 2×54 tons bollard pull.

Tugs which operate at CPPM are equipped with firefighting cannons to fight fire on vessels.

In case of fire onboard, vessels must unberth for safety reasons. While berthed, all vessels must keep emergency towing wires on the opposite side of the pier, to allow vessels to be towed off in case of an emergency. The towing wires should be kept with the eye 2.0 m. from sea level and have 50 m. slacked on deck.

Fees: The pilotage fees are to be agreed between Shipowners/Agents and the Pilot Association. The fees concerning tugs and mooring boats are to be agreed between Shipowners/Agents and CPPM.

The mooring boats and tugs at CPPM are operated by Companhia Vale do Rio Doce (CVRD) or by other companies authorised by CVRD.

BERTHING: *Pier I:* The least depth in the docking alignment is 23.0 m. (75.5 ft.).

The breasting dolphins are numbered 4, 5, 6 and 7 from South to North. They are equipped with 2 sets of 3 quick release hooks of 80 tons each and a capstan to hoist the mooring lines. The mooring dolphins are numbered 1, 2 and 3 on the Southern side of the pier; and 8, 9 and 10 on the Northern side. They are equipped with a set of 4 quick release hooks of 100 tons each and a capstan. The quick release hooks are painted in different colours on each dolphin.

The breasting dolphins are equipped with fixed panel fenders. Dolphins No. 3 and 7 have 2 pairs of panels, and dolphins No. 5 and 6 have only one pair of panels.

Pier II: The least depth by the docking alignment is 18.0 m. (59 ft.). There are the following mooring devices on this pier:

One mooring dolphin, which is placed on the Northern side of the platform. There are 2 sets of 3 quick release hooks of 80 tons each and an auxiliary capstan to hoist the mooring lines.

On the platform, near vertical bollard 1, there is a set of 4 quick release hooks of 80 tons each and an auxiliary capstan.

Along the ship berthing dock there are 9 vertical mooring bollards, placed at every 26.5 m., with nominal traction capacity of 150 tons. There is also a double bollard in the position corresponding to vertical bollard 10.

At this pier, there are 9 fixed panel fenders corresponding to bollards No. 2 to 10.

Ladders of Access to the Vessel: Pier I: At breasting dolphin 4, there is a metallic tower with several levels reached by ladders. A telescopic footbridge is connected to the tower and it reaches the vessel. This allows access to the vessel at any tide condition.

Pier II: The access on board must be provided by the vessel's gangway.

Loading: CPPM has capable and available personnel to handle the mooring lines during berthing and unberthing operations. All work necessary during berthing, unberthing and loading operations, opening and closing of the hatches and deck cleaning must be performed by the crew of the vessel.

During the rainy season, only the hatch loading ore must be open. If heavy rain occurs, CPPM can decide to stop the loading operations, in which case the vessel shall close the hatch.

The responsibility for the distribution of the ore in the hatches is entirely held by the ship's Master, who must have a representative watching all the loading operation. CPPM will not accept any claim after loading has been completed.

The Master must be attentive to the drafts of the vessel, especially when the loading operation is ending. The total cargo loaded will be determined by the ship's displacement.

The loading will be performed 24 hours a day, Saturdays, Sundays and holidays included. When the loading is finished, and when all checkings being completed, the vessel must unberth. Staying without previous authorisation from CPPM is strictly prohibited.

Undocking: In order to reduce the stay of the vessel at the dock, before the end of the loading operations, the following events must have been already scheduled:

Pilot boarding.
Mooring personnel on stand-by.
Tugs on stand-by.
Mooring boats on stand-by.
Disconnect water hoses.
Complete all storing.
Removal of the gangway ladder (Pier II) or of the telescopic walkway (Pier I).
Slackening of the mooring lines.

As far as the departure draft is concerned, the articles of the Purchase Contract and the prescriptions of the ports must be fulfilled.

Sailing Clearance: The Sailing Clearance of vessels by the Port Authorities is ruled by Chapter XII of the Maritime Traffic Regulations, RTM, Decree No. 87648, of 24th September 1982. Portmainst No. 10-18 and Edict No. 032/76, from the Capitao dos Portos of Maranhao.

MOORING/UNMOORING: *Recommendations:* The approach manoeuvres for berthing and unberthing must be performed at low speed. The mooring ropes must be long enough to reach the furthest dolphins and bollards.

Special attention must be paid when passing the stern mooring lines to the mooring boats in order to avoid accidents with the propellers of the vessel and the boats.

The vessel must berth with the hatch covers opened, ready to start the loading operations. If it rains, the ship's Master must wait for instructions from CPPM before opening them. After mooring, rat guards must be placed on the mooring lines.

While berthed, vessel must keep the engines on stand-by and ready to operate. Any repairs that might interfere with this condition must be performed only after authorisation from the administration of CPPM.

The stowage plan and the loading sequence must be presented to the foreman immediately after berthing, with the cargo control operations form completed.

Repairs on deck and surrounds that might jeopardise the loading operations will not be allowed.

While vessel is berthed, *hot works* will not be allowed.

Mooring Recommendations: (See "Plan").

The mooring patterns are suggested taking into consideration the ship's d.w.t. and following recommendations:

(1) Ships shall always be kept against the berth fenders.
(2) Wires are required for spring lines.
(3) Wires are suggested for breast lines.
(4) All lines in the same service should be of same type, size, construction, length and issued from same position.
(5) Mooring lines should be arranged as symetrically as possible about the midship point of the ship.
(6) Breast lines should be oriented as perpendicular as possible to the longitudinal centre line of the ship and as far aft and forward as possible. Wires are suggested.
(7) Spring lines should be oriented as parallel as possible to the longitudinal centre line of the ship, and more than 40 m. long. Wires are required.
(8) The vertical angle of the lines should be kept to a minimum.
(9) All wire lines should be fitted with tails. All tails should be of same size, type, construction, about 11.0 m. long, and connected to the wire using a mandel shackle.
(10) The maximum allowable tension on any one line must be 55% of the maximum breaking strain (MBL) of the line.

Up to 75,000 d.w.t.:
6 head/stern lines of any type, maximum breaking strain (MBL) 50 tonnes.
6 fore/aft breast lines, wire suggested, maximum breaking strain (MBL) 50 tonnes.
4 fore/aft spring lines, wire of 38 mm. with tails.

75,000 d.w.t. up to 150,000 d.w.t.:
6 head/stern lines of any type, maximum breaking strain (MBL) 70 tonnes.
6 fore/aft breast lines, wire suggested, maximum breaking strain (MBL) 70 tonnes.
6 fore/aft spring lines, wire of 44 mm. with tails.

150,000 d.w.t. up to 225,000 d.w.t.:
6 head/stern lines of any type, maximum breaking strain (MBL) 80 tonnes.
6 fore/aft breast lines, wire suggested, maximum breaking strain (MBL) 80 tonnes.
6 fore/aft spring lines, wire of 42 mm. with tails.

225,000 d.w.t. up to 325,000 d.w.t.:
8 head/stern lines of any type, maximum breaking strain (MBL) 80 tonnes.
8 fore/aft breast line, wire suggested, maximum breaking strain (MBL) 80 tonnes.
6 fore/aft spring lines, wire of 44 mm. with tails.

Over 325,000 d.w.t.:
8 head/stern lines of any type, maximum breaking strain (MBL) 80 tonnes.
10 fore/aft breast lines, wire suggested, maximum breaking strain (MBL) 80 tonnes.
8 fore/aft spring lines, wire of 44 mm. with tails.

The vessel shall be moored according to Master's, Pilot's and Port's satisfaction.

The Pilot will board with the proposed mooring suggestion, which shall be analysed and approved by the Master.

Before berthing, Port Operations must receive from the vessel information about the availability of ropes and winches, so that the best mooring pattern can be suggested.

Special care must be taken with the breast and spring ropes in the period of 1.5 hours to 4.5 hours after high tide and low tide, mainly 1.5 hours after high tide when the fastest ebb currents start and all ropes must be tensioned.

If the vessel does not comply with the mooring requirements and recommendations, being considered unsafe to the terminal and to the ship, additional actions will be taken by the Port Operation:

(a) Written advice to the ship's Master.
(b) Keep the tugs on stand-by.
(c) Keep the Pilot on board.
(d) Unberth the vessel.

The costs resulting from these additional safety actions and time lost shall be allocated to the Shipowner, through his Agent.

BULK CARGO FACILITIES: *Pier I:* The structure of the Pier I is composed of concrete, supported by cast type metal tubes filled with concrete, and are distributed as follows:

4 breasting dolphins (4, 5, 6 and 7).
6 mooring dolphins (1, 2, 3, 8, 9 and 10).
Linear type shiploader.
Tug pier.
Access bridge, service road and walkways.

The breasting dolphins are located in front of the shiploader runway, covering a 170 m. length. The mooring dolphins, three in the North and three in the South of the pier are set back in relation to the breasting dolphins. The extreme dolphins are 490 m. from each other. The elevation of the breasting dolphins floor is +11.6 m. high and the elevation of the mooring dolphins floor is +11.0 m. high in relation to the Tidal Datum shown on Nautical Chart No. 413.

Pier II: The structure of the pier is composed of a concrete platform 280 m. long and 24.8 m. wide, supported by cast type metal tubes filled with concrete. There is a mooring dolphin on the Northern side which is 26 m. away from the platform and set back in relation to the docking dolphins.

Shiploaders: *Pier I:* The pier is equipped with a linear shiploader with the following specifications:

Loading capacity	16,000 t.p.h.
Conveyor belt width	2,200 mm.
Maximum reach from the docking alignment	46.3 m.
Transverse travel	244.0 m.
Slewing angle (each side)	47°
Vertical inclination angle	+21° and −22°
Maximum air draft	22.4 m.

Pier II: The pier is equipped with a linear shiploader with the following specifications:

Loading capacity	8,000 t.p.h.
Conveyor belt width	1,800 mm.
Maximum reach from the docking alignment	31.5 m.
Transverse travel	179.62 m.
Slewing angle (each side)	75° right and 90° left
Vertical inclination angle	+3° and −14°
Maximum air draft	18.0 m.

MEDICAL: Sao Luis has hospitals prepared for emergency treatment.

DENSITY: In the area of Ponta da Madeira, the density is as follows:

Rainy Season:	Low tide 1017.58.
	High tide 1019.32.
Dry Season:	Low tide 1009.51.
	High tide 1012.03.

FRESH WATER: CPPM can supply fresh water through orders from the Agent, by telex, at the limit of 200 tons per vessel, at a flow rate of 20 t.p.h. – 40 t.p.h.

FUEL: Lubricants and bunker supply – Pier I: There is no equipment to supply bunkers or luboil at the pier, but vessels can be supplied when undocked, by barges of private companies from Sao Luis. The Agent must make the order.

Pier II: There are connections along the pier to supply bunkers and luboil. The Agent must make order to an authorised company in the area of Itaqui Port. This operation must previously be authorised by the Administration of CPPM. All the safety rules for oil transferring must be followed. Bunkering is not allowed simultaneously with ore loading.

FIRE PRECAUTIONS: The Terminal has a Fire Brigade, duly equipped and trained for fire fighting. There are hydrants and fire fighting guns at the docks.

The tugs operating at the Terminal are equipped to fight ship's fires.

Should a fire occur on board, the ship must undock, for safety. Therefore, while moored, the ships must always have 2 towing cables lowered, one fore and one aft, on the offshore side, with the eyes about 3 m. above the water. Thus, during an emergency, tugs may undock the ship.

The fire brigade personnel are not trained to fight fires on board. The Terminal shall not be deemed responsible for any kind of loss and/or damage to the ship's equipment or injury to personel.

REPAIRS: Minor repairs possible at Sao Luis.

SURVEYORS: There are no classification society surveyors in Sao Luis.

REPATRIATION: Possible.

AIRPORT: Tirical Airport is 26 km. from the Terminal and provides regular jet connections to several Brazilian cities.

TIME: GMT minus 3 hours.

Note: From November 2nd to March 1st, daylight saving time (GMT minus 2 hours) may be adopted throughout Brazil.

EMERGENCY CO-ORDINATION CENTRE: The Brazilian government, complying with the 1979 Rescue and Salvage International Convention, and its corresponding duties, requests all foreign ships entering South Atlantic to send information concerning their navigation to COMCONTRAM (Command of the Merchant Ships Traffic Naval Control) through EMBRATEL's Coastal Station Network in accordance with PORTOMARINST No. 337801-A, dated January 3rd 1983, by Ports and Coasts Directorship.

Foreign ships in operation in Brazilian waters, as well as Brazilian ships, must report their course.

SHORE LEAVE: Possible. Also see "Documents – General".

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

Full facilities available in Sao Luis (10 km).

CURRENCY: The local currency is the Cruzeiro.

WEATHER/TIDES: *Meteorological Conditions:* Local climate, in accordance with the Koppen classification, is the Aw type, i.e., tropical with only one rainy season (from December to May).

Temperature varies throughout the year between 23°C. and 31°C. and is usually around 27°C.

The relative humidity is evenly high throughout the year. The monthly average varies from 75% to 85%.

The mean annual rainfall is 1,944 mm. During the rainy season, the monthly average is 325 mm., with 15 rainy days per month. In the dry season (April to November), the monthly average is 50 mm., with 5 rainy days per month.

Winds blow predominantly from the N.W., with a frequency of 25%. The velocity and freqency of the winds are as follows:

Beaufort Scale 2 (4 to 6 knots)	39%
3 (7 to 10 knots)	31%
4 (11 to 16 knots)	15%
5 (17 to 21 knots)	1%

Visibility is usually good in the Sao Marcos Bay area. The occurrence of fog is very rare. However, some mist may occur, which brings a slight reduction in visibility.

The Sao Marcos Bay area is not subject to hurricanes or tornadoes. Heavy but short rain storms, however, are common in the rainy season.

Weather forecasts are broadcast by Belem Radio – PPB – Coastal Station at the following times: GMT 0130, 0800 and 1900; The station's frequencies are 4,265.0 kHz, 8,502.0 kHz and 12,979.5 kHz, in A1.

The PPL station operates on 4,125 kHz in A3J (telephone communication).

Tides: The Sao Marcos Bay has semi-diurnal tides.

Tide tables (DG 16) published by Diretoria de Hidrografia e Navegacao (DHN) show forecasts of tidal levels and times for CPPM.

Based on observations held at Pier I, the following values were obtained:

HAT (Highest Astronomical Tide) 6.40 m.
MHWS (Mean High Water Springs) 5.94 m.
MHWN (Mean High Water Neaps) 5.03 m.
MSL (Mean Sea Level) 3.28 m.
MLWN (Mean Low Water Neaps) 1.50 m.
MLWS (Mean Low Water Springs) 0.45 m.
LAT (Lowest Astronomical Tide) −0.16 m.
HWF&C (High Water Full and Change) 7 h. 21 m.

Tides vary in phases and in amplitude along the access channel, according to remarks presented on Nautical Chart No. 410.

Tidal Streams: The circulation of water in Sao Marcos Bay is ruled by tide variations. Winds, which are mostly mild in the region, only cause small deviations on the circulation produced by tides.

The minimum values of the stream speed are near slack water and the maximum occurs 3 or 4 hours after high water, during the ebb tide, and 2 or 3 hours after low water, during flood tide. The currents are reversed and they flow in N.N.E. direction during the ebb tides and, after the slack water, reverse their direction to South and S.E. during flood tide.

In the access channel, the direction of the current ranges from 040° – 220° to 060° – 240°, and can reach a speed of 2.5 knots. In the Turning Basin and vicinity, the flood tide streams range vary from 4.3 knots at Spring tide to 3.7 knots at Neap tide. The ebb tide streams range from 5.1 knots at Spring tides to 4.2 knots at Neap tides. Nautical Chart No. 413 presents tables which enable the navigator to forecast the current direction and speed in the Turning Basin, according to the tide forecasts for CPPM.

Waves: Waves, in that area, are caused by local winds. In the Turning Basin Area, waves of 1.10 m. in periods of 6.0 seconds may occur.

GENERAL: *Power Supply:* Power will not be supplied to ships by the Terminal.

Supplies: The Agent must provide supplies for the ship. Supplies must be embarked before the end of shiploading or while the ship is undocked.

Dirty Ballast or Oily Residues: Terminal is not equipped to receive dirty ballast or oily residues.

Cleaning Tanks: The Terminal's personnel are not available to clean holds. This service is controlled by the Maritime Labour Office by means of qualified companies.

Crew, Passengers and Visitors on Board: Authorisation for shore leave shall be given by the Ship's Master, after clearance by Port Authorities.

Crew members must carry their personal identification documents whilst ashore.

Only those persons duly authorised by the Terminal Administration may have access to the docks.

Crew members leaving the Terminal may use taxis requested by means of the Terminal's Guard Service. Private cars may not circulate in the Terminal's area.

Regulations: The Diretoria dos Portos e Costa (Harbours and Coast Headquarters) through Ministerio da Marinha (Ministry of the Navy), published Edict No. 997 dated 9th March 1995; determining the performance of vessels' conditions survey by Classification Society acknowledged by the Brazilian Government in all bulk carriers over 18 years old. It also normalises the procedures to be followed by Shipowners or their representatives.

Brazilian laws are very strict when it comes to deeds that provoke, or that may provoke, pollution. Information about them must be obtained by Shipowners or their Agents. CPPM will not be held responsible for any environmental damage caused by the vessel or by its crew, and does not accept the use of any legal device to justify them.

The Master must obey the environmental laws of Brazil and MARPOL while in Brazilian Territorial Waters.

If infringements occur, the loading activities will be immediately interrupted and the Environmental and Port Authorities will be advised, making the vessel subject to suitable contractual and legal penalties.

Docking Time: Docking time is considered as the time when, after passing the cables, the gangway ladder is lowered to the dock.

Nautical Charts: The Access Channel, the Turning Basin, the anchorage area and the berthing dock are included on the following Nautical Charts:

Diretoria de Hidrografia e Navegacao (DHN) – Brasil, Charts Nos. 400, 410 411, 412 and 413;

United States Hydrographic Office – HO, Charts Nos. 24.270 and 24.271.

British Admiralty, Charts Nos. 3958 and 535.

On Nautical Charts issued by the Brazilian Navy, depths are indicated in metres and are referred to the Tide Datum level adopted for the chart of largest scale.

SHIPMASTER'S REPORT: January 1990.

Vessel: OBO 170,000 d.w.t.

Approaches: Buoys visible at about 6 nautical miles on 3 cm. and 10 cm. radars.

Light float was radar visible at 18.6 nautical miles on 'X' band and about 16 nautical miles on 'S' band.

Some of the buoy lights appear to be erratic and/or faint. This would appear to be caused by the swirling of the buoys in the strong current.

Pilotage: Pilot will board at anchorage if vessel is anchored at the South end of Bravo Anchorage.

Tugs/Berthing: Four tugs are used for berthing and unberthing a vessel of our size. Forward tug gives line through centre fairlead and ship's messenger required. After tug takes 2 ship's lines through centre fairlead. The other 2 tugs push and do not put up lines.

The moorings we used were different from those advised by agent (2-2-4-2 at each end). Moorings are supposed to be on quick release hooks but these did not appear to work too well as we had to slack down all lines when unmooring.

The mooring dolphins are all well numbered from 1 to 10 with No. 1 being at the South end.

Shore gangway was level with forward end of bridge which is 58.4 m. from stern on vessel with LOA 294.9 m.

Pilot, tugs and Berthing Supervisor all communicate on VHF Channel 13.

SHIPMASTER'S REPORT: March 1991.

Vessel: LOA 295 m., 169,000 Summer d.w.t.

Tugs: One tug forward with tug's line and one tug aft with 2 ship's lines.

Mooring: Shore dolphins are numbered 1 – 10 from South to North.

For this size of vessel, 4 lines to No. 2, 2 lines each to No. 1 and No. 2, 4 lines to No. 8 and 2 lines each to No. 9 and No. 10. Forward and after springs are sent to No. 7.

AUTHORITY: Complexo Portuario de Ponta da Madeira, P.O.Box 511, Av. dos Portugueses s/n, Praia do Boqueirao, Sao Luis, Maranhao, CEP 65085-580, Brazil. *Tel:* (098) 218-4263 (Port Operations Centre). *FAX:* (098) 218-4019. *Contact:* Alvaro de Oliveira Junior, Port Superintendent.

PONTA UBU: 20.47 S. 40.35 W. (See Plan)

LOCATION: The Port of Ponta Ubu is located on the coast of the State of Espirito Santo, approximately 40 nautical miles South of Vitoria. Geographic position of the Ponta Ubu Beacon:

Latitude: 20° 46' 48" S.
Longitude: 40° 34' 40" W.

DOCUMENTS: All ships are subject to routine arrival visits by the following port officials:

Health Officers
Customs Officers
Maritime Police Officers
Immigration Authorities
Also see "Shipmaster's Report".

APPROACHES: The Ponta Ubu area is under the jurisdiction of Diretoria de Hidrografia e Navegacao (DHN), an agency of Brazil's Ministry of the Navy. Ponta Ubu appears on DHN Charts Nos. 70, 1400 and 1402, and on Admiralty Chart No. 3972, U.S. Hydrographic Office Chart No. 24170 and Brazilian Coast Pilot (Roteiro)

Lights in the Vicinity:

Ilha Escalvada (Island)	Gp. Fl. (2) 27 metres Lat. 20° 42' S.	6.0 sec. 9 miles Long. 40° 24' W.
Ilha do Frances (Island)	Fl. 48 metres Lat. 20° 56' S.	3.0 sec. 12 miles Long. 40° 45' W.
Ilha Branca (Island)	Fl. 5 metres Lat. 21° 00' S.	10.0 sec. 9 miles Long. 40° 48' W.
Ponta Ubu	Lat. 20° 46' 48" S.	Long. 40° 34' 40" W.

Channel: See DHN Chart No. 1402 as amended by Aviso aos Navegantes (Notice to Shipmasters) No. 194/85, 71/86, 96/86 – 113/86 and E94/87. Maintained channel depth is 18.0 m. (59 ft.) referred to chart datum.

PILOTAGE: Pilotage is compulsory for all ships sailing through the channel, berthing and unberthing in Ponta Ubu. Pilots will board in the area of anchorage.

Pilots attending the Ponta Ubu area are members of the "Associacao dos Praticos do Porto e Barra do Espirito Santo".

All ships must provide an accommodation ladder and rope ladder, freeboard permitting. The landing platform of the accommodation ladder should be approximately 5.0 m. above the water. Boarding facilities should be adequately lighted.

Ships should request anchoring and/or berthing instructions from Ponta Ubu Marine Operations 4 hours prior to arrival at the pilot boarding area, or when within VHF range.

Ships must not proceed beyond specified boarding area or anchorage unless so instructed by Ponta Ubu Marine Operations.

ANCHORAGE: Anchorage instructions must be requested from Ponta Ubu Marine Operations. Anchorage area position is Lat. 20° 46' 24" S., Long. 40° 32' 33" W. Masters are advised to give due consideration to Brazilian antipollution regulations while in coastal waters.

Brazilian Government officials may board ships in anchorage for clearance formalities. A suitable and adequately secured accommodation ladder for this purpose must be provided soon after anchoring. Lifebuoy with line with a minimum length of 50 m. should be on hand and adequate lighting provided.

ARRIVAL: Ships arriving in ballast are requested to comply with the following recommended arrival drafts, observing indicated shiploading rates and shiploader clearance height limitations.

Deadweight Tons	*Recommended Arrival Draft* (m.)	(ft.)
30,000 to 40,000	6.1 – 6.7	20 – 22
40,000 to 60,000	6.7 – 7.3	22 – 24
60,000 to 75,000	7.3 – 7.9	24 – 26
75,000 to 100,000	7.9 – 9.1	26 – 30
100,000 to 170,000	9.1 – 10.0	30 – 33

Ships unable to meet these suggested drafts due to insufficient ballast capacity, anticipated deballasting problems, etc., should so advise in 48 hour ETA message, along with estimated deballasting time.

All ships must have secure bilge systems while at Ponta Ubu.

Combination ore/oil and ore/bulk oil carriers must insure that ballast tanks and piping system are free of oil contamination, prior to arrival. Gas-free condition of combination carriers must be confirmed prior to loading. Certification and inspection shall be arranged through the vessel's Agent. Vessel with inerted tanks shall be checked and monitored continuously during loading.

RESTRICTIONS/MAX. SIZE: *Access Channel:* 210 m. wide at the mouth, 300 m. at the widest stretch, 2,500 m. long and 18.0 m. deep. *Turning Basin:* Adjacent to the widest part of the access channel between Buoys 3 and 5. Minimum depth 13.4 m.

Pier: Max. LOA allowed for berthing manoeuvre is 308 m.

Max. LOA for night-time manoeuvre: Arriving, LOA max. 250 m. Sailing, LOA max. 280 m.

Max. Arrival Draft: 10.0 m. plus height of tide (0.6 m. – 1.6 m.) at moment of berthing.

Max. Departure Draft: 16.0 m. plus height of tide at moment of departure.

Report 1988: (Updated 1996).

Max. LOA	308 m.	
Max. Beam	54 m.	
Max. Airdraft	19.0 m.	
Max. Sailing Draft	16.0 m. (plus height of tide at moment of departure).	
Mean Depth Alongside	Berth – West	18.5 m.
	Berth – East	15.0 m.

HEALTH: Radio Pratique should be requested 72 hours prior to arrival, by forwarding quarantine message to Port Health Authorities through the ship's Agent. The information required is as follows:

Name and nationality of vessel; name of the last port of call; port of destination and name of Agent; nature of cargo, if any; date and place of last derating or exemption certificate; number of crew and passengers; health conditions of all on board; vaccination status of crew and passengers; ETA and any other information that may be required by the quarantine officers.

Radio Pratique alone does not constitute quarantine clearance, and the ship will require inspection upon arrival. Radio Pratique if granted, will enable ship to enter, berth, and commence loading prior to official quarantine clearance.

The Quarantine Flag must be flown until Free Pratique has been granted.

The following documents shall be submitted to the Port Health Authority boarding on arrival:

Maritime Declaration of Health, duly filled in as required by Sanitary Regulation No. 2 of the World Health Organization. Copy of up-to-date crew list. Vaccination Certificates of all Crew members as well as their seamen's books or passports.

Quarantine inspection will be carried out at the pier, or at anchorage if required, weather permitting.

Quarantine flag must be flown until Free Pratique is granted.

Masters are advised to have all Vaccination Certificates, Derat Certificate and Clearance from Last Port ready for inspection.

RADIO: Rio de Janeiro Coast Radio Station, call sign "PPR" (Telex 491) operates on a 24 hour basis on the following frequencies: 435 kHz, 8,634 kHz, 13,105 kHz.

The Master of an arriving vessel is required to cable his notice of ETA 15 days (or when departing prior port, if sailing distance is less than 15 days) then 5 days, 48 hours, and 24 hours prior to estimated time of arrival at Ponta Ubu.

Five day message shall contain ETA, cargo tonnage required by hatch number and whether vessel is O.B.O. or ore/oil carrier.

48 hours message shall provide the following information: ETA, arrival draft, ballast tonnage on board and deballasting time.

24 hours message: Cable your ETA, indicate if vessel is fitted with an inerted system and if compartments will be under control of said system during loading. Also include type, manufacturer's name and the society that approved the classification of the inert system.

When within VHF range, Master is to contact the Marine Manager's office for additional information on docking schedule, anchorage arrangements and cargo information.

VHF: Ponta Ubu Marine Operations is equipped with VHF radio monitored 24 hours a day.

Frequencies:

Calling Channel: 16 (156.800 MHz)
Working Channels: 156.375 MHz, 156.650 MHz, 156.700 MHz.

TUGS: Tug service is compulsory for all vessels at Ponta Ubu. Tugs will operate in accordance with Brazilian regulations covering this matter.

Available tugs: 3×1,680 h.p., 20 ton bollard pull. Additional tugs should be requested by the Agent.

All ships should be equipped with wire cable tow line with nylon pendant.

All communication between tugs and Pilots is via VHF.

Tugs will operate on the same Channel as the Marine Operations office.

BERTHING: Vessels are subject to the berthing/unberthing regulations exercised by Port Authority for night-time manoeuvres.

The Port of Ponta Ubu is owned and operated by Samarco Mineracao S.A., and is used solely for the purpose of handling and shipping iron ore.

The port consists of a breakwater protected pier, close to the shore with a dredged berth area and access channel.

Product stockpiling and transportation prior to loading: The stockpile has a total capacity of 1,000,000 metric tons of pellets and 500,000 metric tons of concentrates.

During normal operations, pellets and concentrates are stockpiled by a stacker- reclaimer, and 2 stackers. Both concentrates and pellets are reclaimed using the bucket wheel stacker-reclaimer. The reclaimed material is then conveyed to the shiploader for loading aboard bulk carriers, at rates of up to 6,500 metric t.p.h.

A sample station is provided to control the quality of the concentrates or pellets being loaded into a given ship. Samples are automatically obtained from the shiploading conveyor system at preset intervals, without interrupting the loading operation. Each sample is then reduced in size, and subjected to a complete range of quality control tests.

Two metal detectors are located on ship loading belts to detect scrap and other foreign objects.

Material reclaimed for shiploading by the stacker-reclaimer is conveyed to a rail-mounted travelling shiploader. The shiploader is designed to load vessels on either side of the pier. A loadout weigh scale located near the shiploader monitors the final product delivered for shipment.

Port facilities: Port facilities at Ponta Ubu are located in the open sea near the apex of a shallow indentation in the coastline where currents have provided 20 m. deep water within 2 km. of the shore.

The existing depth of water in the dredged channel is minus 18.2 m. The main berth area was dredged initially to minus 19 m.

Berthing: The breakwater protected pier consists of a 313 m. long by 22 m. wide concrete deck, extending in a 022° 30' direction. It projects from the Eastern portion of the breakwater to a distance of 685 m. from the shore.

The pier has berths on both East and West sides.

Shiploading: The mobile rail mounted pier shiploader has a 41.6 m. fixed length boom, with a 280° turning angle and a 18.5 m. air draft. Its nominal loading capacity is 9,000 metric t.p.h. Maximum outreach of loading boom from fender is 26.10 m.

Report 1988:
Tidal range: 0.3 – 1.6 m.
Max. outreach of boom from fender line: 26.1 m.
Clearance of loading at HWOST: 25.0 m.
Travel of loader: 173.0 m.
Working ranger of loader: 240°
Average loading rate to bulk carriers: 6,500 t.p.h.

LOADING: Vessels will be generally loaded in turn, in their order of arrival, provided that:
(i) They are in all respects ready to receive cargo;
(ii) All the cargo is available at the terminal;
(iii) It is in accordance with the instructions of the charterer/Agent. Vessel shall present a detailed loading plan immediately on arrival, including hatch quantities, with loading sequence and quantity of ore to be reserved for fore and aft trimming by hatches.

Loading hours, subject to change, are as follows: 24 hours operation, Sundays and holidays included.

All ships *must secure bilge systems* while at Ponta Ubu.

Combination ore/oil and ore/bulk/oil carriers must ensure that ballast tanks and piping systems are free of oil contamination, prior to arrival. Gas-free condition of combination carriers must be confirmed prior to loading. Certification and inspection shall be arranged through the vessel's Agent. Vessels with inerted tanks shall be checked and monitored continuously during loading.

MEDICAL: The medical facilities nearest to Ponta Ubu are located at Guarapari, 15 minutes away by car.

Vitoria has modern hospital facilities.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities.

AIRPORT: Guarapari (20 km.) for light aircraft (air taxi). Vitoria (70 km.) Airport Eurico Sales, connection to other Brazilian towns.

TIME: Local time is GMT minus 3 hours.

HOLIDAYS: *Local holidays:* Confraternizacao dos Povos – 1st January; Passion Friday – movable; Tiradentes – 21st April; Labour Day – 1st May; Sao Pedro – 29th June; Independence of Brazil – 7th September; All Saints – 2nd November; Proclamation of the Republic – 15th November; Day of the City and Day of Our Lady of the Conception – 8th December.

POLICE/AMBULANCE/FIRE: Police (Guarapari) Tel. 261-0151.

SERVICES: There are supermarkets at Guarapari.

TELEPHONES: No facilities for placing telephones onboard.

GENERAL: The Brazilian National flag shall be flown while in the Ponta Ubu area.

Line-handling port personnel will be available for handling ship's lines during berthing and unberthing. All shipboard work necessary for berthing, loading and unberthing, including, but not limited to, handling and tending moorings, opening and closing hatches and normal deck cleanup, shall be performed by the ship's crew.

Ships must have main engines ready and maintain watch while alongside the pier, unless specific permission to do otherwise has been granted by Marine Operations.

The nearest town is Guarapari, 15 minutes to the North by car. Vitoria, capital of the State of Espirito Santo, is about 80 minutes by car to the North. Daily flights, operated by major Brazilian airlines, connect the state capital with the rest of the country.

Ships causing oil pollution, dumping of waste, refuse, etc., in coastal waters will be liable for all resulting fines and cleanup costs. All ships must secure bilge systems while in the Ponta Ubu area, and combination ore/oil and ore/bulk/oil carriers must exercise all precautions necessary to insure that ballast tanks and/or piping systems are free of oil contamination prior to arrival. *Accidental and deliberate oil or oily mixture discharges in the area must be reported to Ponta Ubu Marine Operations IMMEDIATELY.*

There are no shore facilities available at the terminal for receiving slops, and dirty or contaminated ballast. Masters are cautioned that discharging of anything other than uncontaminated ballast will be subject to penalties as prescribed by Brazilian law.

Solid garbage and refuse disposal ashore can be arranged through Marine Operations.

Weather conditions and temperatures are moderate with year-round average highs of 27°C (80°F) and year-round average lows of 19°C (66°F).

Winds recorded are less than 30 knots more than 95% of the time and prevailing winds are East to N.E. Local winds may have a significant effect on the tide.

There are no significant currents noticed in the turning basin.

For general information about currents in the Ponta Ubu area, use South Atlantic Pilot Charts and Brazilian Coast Pilot (Roteiro).

Sea conditions are generally moderate.

Meteorological bulletins are available 24 hours a day through Rio de Janeiro coast radio station, Radio Arpoador, call sign PPR. 17,194 kHz.

SHIPMASTER'S REPORT: 1978 (Updated 1996).
Documents: Please refer to other Brazilian ports, vessel came from Rio de Janeiro so only the Agent and the Customs boarded and asked for 3 Crew Lists, 1 Custom Store List and 1 Personal Effect List. We were told that to go ashore every Crew member needed a pass with picture attached but crew went to the near town of Guarapari after showing passport or an identity card at the gate.
Pilotage: The Pilot boards about 2 to 3 miles outside the channel. He comes on board by Pilot boat based at Point Ubu and even though we were in very light condition wanted to use the pilot ladder. Pilots come from Tubarao and Vitoria.
Tugs: Three tugs are based at Point Ubu namely the "Curitiba", "Piracicaba" and "Aquidauana". They are all good and operate respectively on the bow and stern of the ship with 2 ship's nylon ropes. If vessel over 200 m. in length the Port Captain orders a fourth tug that must come from Tubarao (about 3 hours) and it is very helpful and powerful.
VHF: Marine Operations answered us about 2 hours from berth (30 miles).
Bulk Cargo Facilities: We were the sixth ship to load in this port, the loading rate is around 4,000/5,000 t.p.h. at present.
Medical: Ship's Agent can arrange to send people to the doctor at any time or to the hospital in the near town of Guarapari.
Density: Checked over 3 days and always found to be 1026.
Loading: The Bill of Lading figures are taken from the weightometer which is believed to be extremely correct, but it showed a difference of 1,000 long tons over 37,000 long tons loaded on the ship. A surveyor carried out a draft survey on arrival and it was said that it was a check on the weightometer, being normal check that was carried out for these early loadings but the real figures are taken from the weightometer. 2,000 long tons before completion of loading we stopped for trimming and the scale showed about 1,000 long tons more loaded than the ship's figures. Because of this, the Terminal considered the ship's figures (survey) and to these figures they added according to the scale the quantity we requested to complete loading.

SHIPMASTER'S REPORT: December 1990.
Pilotage: Pilot used pilot ladder even though freeboard was over 9.0 m.
Tugs: For berthing: One tug forward on the port bow with 2 ship's lines, 2 tugs aft with one line each and 2 tugs pushing.

OPERATORS: Samarco Mineracao S.A.
Ponta Ubu: Postal address: Rodovia do Sul S/No., Caixa Postal 720004, 29230-000 Anchieta – ES, Brazil. Tel. 361-9000. Area code* 027. Fax: 361-1710. Contact: Mauricio Borloth Monjardin, Port General Manager. Renato de Almeida Padilha, Marine Operations Supervisor.
Central Office: P.O.Box 1317. 1,122 Paraiba Street, 9th Floor, 30.130-918 Belo Horizonte, MG, Brazil. Tel: 239-8787, Area Code*031. Cable Address: Samarco. Telex: 313068. Fax: 2398800.
Rio de Janeiro office: 63 Almirante Barroso Avenue, Group 2817, 20036 Rio de Janeiro, Brazil. Tel: (021) 262-4620. Telex: 31262.

AUTHORITY: Capimar, 66 Mandel Silvino Monjardin Square, Vitoria, Espirito Santo, Brazil. *Tel:* (027) 222-4622. *Telex:* 0272102. *Cables:* Capimar Vit. *Contact:* Roberto Ferreira da Silva.

AGENT: See "Vitoria".

PORTO ABC NORTE: 02.48 S. 50.30 W.

SHIPMASTER'S REPORT: October 1985 (Updated 1994).

LOCATION: On the Rio Pacaja about 263 nautical miles from Belem.

VESSEL: 7,405 d.w.tonnes, LOA 116.44 m., beam 17.23 m., draft 7.52 m. 10×5 – 10 ton derricks and 1×60 ton derrick. Flush tweendecks. Vessel loaded logs and lumber.

PILOTAGE/CLEARANCE: Sea Pilot boards at Salinopolis Pilot Station. Clearance is made at Belem Anchorage with the usual formalities for Brazil.

Two River Pilots accompany the vessel to Porto ABC Norte and back to Belem. These Pilots are excellent. As no charts of the rivers exist, they draw their own charts.

Two checkers, 1 Custom's Officer and 1 representative of Banco do Brasil accompany the vessel. During the trip up and down and including the time at the loading berth the bonded store will be opened by the Custom's Officer when requested by the Master.

TUGS: No tugs available.

BERTH: Wooden berth about 80 m. length, depth alongside depends on season. In October we sounded 7 m. The vessel sailed with 5.80 m. draft and even keel.

CARGO: Logs with weight up to 8 tonnes and length 12 m. Lumber sawn in packets.

Average weight of logs and lumber about 1.4 tonnes/cu.m. All loading is done by ships own gear.

MEDICAL: First aid station at Sawmill, no doctor available.

GENERAL: *Stores:* Supplies not available.
Transport: There is 1 small private plane owned by ABC Norte.

AUTHORITY: ABC – Agropecuaria Brasil Norte S/A, Prod. E Exportacao, (Rua de Cruzeiro 1145, Belem), P.O.Box 1337, Belem, Para, Brazil, CEP 66.000. *Tel:* (091) 227-1655. *Telex:* (091) 1301 ABCA. *FAX:* (091) 227-2600. *Contact:* Mr. Arizenio Nazare de Almeida.

PORTO ALEGRE (Including Santa Clara): 30.05 S. 51.15 W. **(See Plan)**

This information does not apply to Tramandai Oil Terminal which is listed separately.

DOCUMENTS: See "General" before first port.

PILOTAGE: Porto Alegre is situated 164 miles up the Lagoa dos Patos, a large fresh water lake, and vessels must take on a Pilot after receiving Pratique at Rio Grande, which lies at sea entrance of lake. Pilot and authorities board after arrival at Rio Grande Inner Anchorage. Pilots arranged by Agent upon receipt of vessel's radioed ETA via Rio Grande Radio (PPJ). Since 40-mile channel between Rio Grande and Lagoa dos Patos is unlit, vessels should proceed from Rio Grande only by daylight, allowing 3 hours to negotiate channel. Vessels over 12 knots may leave Rio Grande for Porto Alegre not later than 1700 hrs. in Summer, or 1500 hrs. in Winter. Vessels under 12 knots not later than 1600 hrs. in Summer or 1400 hrs. in Winter. Entry must be made to Rio Grande at least 3 hours before these times to allow for clearance.

ANCHORAGES: Inner harbour. Not normally used unless port congested. If vessels are too late for transit they must anchor at either end of the lagoon overnight.

RESTRICTIONS: Vessels approaching Porto Alegre from the Lagoa should do so only by daylight since 30 miles access channel leading from the Lagoa to Porto Alegre poorly lit. If necessary, vessels should anchor off Itapoan Lighthouse at head of the Lagoa, to await daylight before proceeding. On arrival at Porto Alegre, Free Pratique must again be obtained, and Crew Lists, Store Lists, etc., again presented to authorities, who usually visit vessel in berth alongside or at anchor off Santa Clara.

MAX. SIZE: Not recommended that vessel of more than 215 m. LOA attempt to reach Porto Alegre. Max. safe draft is 17 ft. at any time.

Also see "Tankers".

HEALTH: Vessels receive clearance on passing Rio Grande. No yellow flag required. Also see "General" before first port.

RADIO: All messages should be routed via Rio Grande Radio (PPJ).

VHF: On arrival at Porto Alegre, vessel can use the VHF station Porto Alegre Radio (PPP). Tel: (0512) 210322 or (0512) 141. Also VHF Channels 16, 23, 24, 25, 26, 27 and 28.

Also, at short distances, when arriving at the port or manoeuvring within the port area, vessels are able to use the radio station (as yet without call sign) of the Porto Alegre Port Administration, Tel: (0512) 245733. Also transmitting on VHF with 1 Watt, on Channels 16, 9, 10, 11, 71, 12, 13 and 14.

TUGS: 1×1,680 h.p. and 4 small low-powered tugs 220, 250, 280 and 320 h.p.

BERTHING: The berths are on the East bank of the river, and the jetties stretch over a distance of 8 km.

Maua Quays: Berths "A", "A1" to "A7" and "B", "B1" to "B3". Length, 1,482 m. Depth 17 ft.

Navegante Docks: 2,433 m. long.

Between Maua and Navegante there are several small jetties but none capable of handling ocean-going vessels.

CRANES: *Maua Quays:* 7×3.2 ton portals (narrow gauge), 2×6.3 ton cranes (wide gauge), 1×12.5 ton (wide gauge), 4×3.2 ton portals (narrow gauge).

There are no cranes available at Navegante Docks.

BULK HANDLING FACILITIES:

Samrig (Bunge) Terminal: Max. LOA 235 m. Max. beam 35 m. Max. draft 17 ft. Air draft 15.0 m.

Storage capacity: 12,000 tons (meal) and 4,400 tons (vegetable oil).

Loading rates: Meal 200 t.p.h.; Beans 300 t.p.h.; Vegetable oil 200 t.p.h.

Span of conveyor: 120 m.

Bunge have main storage of 110,000 tons at a distance of 25 km. from the port.

C.E.S.A. Terminal: Max. LOA 235 m. Max. beam 35 m. Max. draft 17 ft. Air draft 13.0 m.

Storage capacity: 18,750 tons.

Loading rates: Meal 100 t.p.h.; Beans 200 t.p.h.

Span of conveyor: 90 m.

Ciagran (Fecotrigo) Terminal: Max. LOA 235 m. Max. beam 35 m. Max. draft 17 ft. Air draft 18.0 m.

Storage capacity: 35,000 tons (meal) or 50,000 tons (beans).

Loading rates: Meal 150 t.p.h. or Beans 250 t.p.h.

Span of conveyor: 80 m.

Fertiliser Discharge: Discharged by automatic grabs at a rate of 2,000 tons per day with 3 gangs. If buckets are used the rate is 250 t.p.h.-350 t.p.h. per gang per day. Max. recommended air draft is 14.0 m.

BRIDGES: Vessels proceeding up-river from Porto Alegre to oil berth must pass under bridge with lifting-span. Span is lifted when approaching vessel sounds prolonged blast on siren.

STEVEDORES: *Working Hours:* 0730 – 1130, 1300 – 1700. Overtime 1700 – 1900, 1900 – 2300 and 0000 – 0400 hrs.

MEDICAL: Full facilities available. Crew members should hold valid international inoculation certificates.

TANKERS: Proceed to oil and LPG berths on Gravatai River for discharge. These berths accessible only to small tankers of up to 1,600 d.w.t. Also see "Tramandai".

Santa Clara Terminal:

Location: 29° 53' 52" S., 51° 22' 23" W.

The port is on the Jacui River, 17 miles from Porto Alegre at Triunfo.

Documentation: All formalities completed at Porto Alegre inner roads anchorage.

Restrictions: Navigation during daylight only. Vessel has to pass under drawbridge with max. air draft of 34.0 m.

Access Channel: Length 7,500 m. Breadth at water level 90 m. Breadth at bottom level 50 m. Turning Basin 320 m.×520 m.

Max. Size: Max. LOA 140 m. Max. draft 17 ft. fresh water. This draft is required from Rio Grande onwards, including Lagoa dos Patos.

VHF: Copesul Terminal can be contacted on Channels 16 and 12. Call sign "Santa Clara".

Berthing: Pier No. 1: Length of pier 42 m. Berth for loading petrochemicals and ethylene.

Pier No. 2: For loading Butadiene, Toluene, Benzene, Xilene, Propylene and MTBE.

Pier No. 3: For discharging coal, and when possible, purging and loading of Propane and Butadiene.

Loading Rates/Storage:

	Approximate Rates (t.p.h.)	*Storage Capacity* (tons)
Benzene	300	6,000
Propylene	150	7,000
Toluene	300	4,000
Xilene	300	2,200
Ethylene	130	21,000
Butadiene	200	4,000
Propane	180	8,100
MTBE		2,500

4,000 tonnes of Methanol discharged monthly.

Nitrogen supply rate: 4,000 cu.m.p.h. (Price U.S.$ 90.00 per 1,000 cu.m.).

Fresh Water: Available. Rate 14 cu.m.p.h.

Ballast: Up to 450 cu.m. of dirty ballast can be received. All other ballast discharged must be fresh water.

Medical: Doctor and dentist in Porto Alegre.

Repatriation: Possible.

Also see "Shipmaster's Report".

DENSITY: Fresh water at all times, unaffected by tides.

FRESH WATER: Available from hydrants at all berths. Delivery rate up to 25 t.p.h.

FUEL: Available, delivered by road tanker. Also see "General" before first port.

CONSULS:

Argentina
Austria
Belgium
Bolivia
Chile
Germany
Italy
Japan
Norway
Poland
Portugal
Spain
U.K.
U.S.A.
Uruguay

REPAIRS: All light deck and engine-room repairs possible. No dry-docking facilities available except for small vessels of up to 300 ft. LOA.

SURVEYORS: ABS at Porto Alegre and Lloyd's at Rio Grande.

GANGWAY/DECK WATCHMEN: Vessels at anchor and alongside must have a watchman.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CUSTOMS ALLOWANCES: Each crew member allowed to keep out of bond 1 carton of cigarettes and 1 bottle of wine or spirits.

TELEPHONES: Connections available from warehouses A, A2, A4, A6, B, B2, O, O2 and D4 (U.S.$ 4.00 per minute to U.K.).

IDENTIFICATION CARDS: Not necessary.

DEVELOPMENTS: 2 new dredgers are being used to deepen the channels leading to Porto Alegre, permitting a working draft Rio Grande/Porto Alegre of 20 ft.

A new grain elevator with a capacity of 60,000 tons is expected to be ready shortly.

SHIPMASTER'S REPORT: May 1990.

Berth: Santa Clara, Berth No. 2.

Max. Draft: 17 ft. fresh water.

Tugs: 2 tugs of 350 h.p. available from Porto Alegre, ship's lines used. Mooring boat used.

Berthing: Vessels enter basin and turn around to berth starboard side alongside (See "Plan").

Moorings: 4 head lines, 2 forward springs, 2 after springs and 4 stern lines.

Agent's Circular: This information is offered with the aim of providing a general view about vessels' course from Rio Grande to Santa Clara – Copesul, including Terminal's main characteristics.

VESSELS' COURSE FROM RIO GRANDE TO SANTA CLARA – COPESUL: All ships destinated to Santa Clara Terminal pass by Rio Grande, where they anchor at the "Area Golf" to receive port authorities on board for clearance and also pilot changing.

Restrictions:

Maximum permitted draft: 17 ft. fresh water.

Maximum LOA: 140 m. (over this LOA it is advisable to have Port Authority and Pilot Association agreement prior to fixing the vessel).

Salt water deballasting: Not allowed under any circumstances during the whole passage from Rio Grande to Santa Clara.

Navigation in access channels: During daylight only.

The voyage to Copesul – Santa Clara, is made in four stages as follows:

(1) Forty mile channel passage.
(2) Lagoa dos Patos of 66 miles where, during the night, ships anchor to await daylight and have safer navigation.
(3) At dawn, vessel proceeds and enters Rio Guaiba Barr (Itapua), with a distance of 29 miles from Itapua to Porto Alegre, where they anchor again for clearance (Port Authorities), but no pilot changes.
(4) From Porto Alegre to Copesul, a distance of 17 miles, ships must pass under a drawbridge (crossing the Rio Guaiba). Pilot communicated with bridge operator by VHF.

The bridge has the following times for passage:

0800 hrs. – 1130 hrs.
1330 hrs. – 1700 hrs.

These times are fixed because of the intensity of road traffic.

Characteristics of the bridge:

When closed: 12 m. high.
When opened: 35.50 m. high (air draft).
Breadth: 51.50 m.
Water depth under bridge: 20 ft.

The bridge is also provided with VHF, telephone and signalling lights.

After passing the bridge, ships enter the Rio Jacui Channel, with 50 m. breadth, dredged to a depth of 6.75 m.

The narrowest passage is between Oliveira Island on the left, and Garcas Island on the right, where channels are of natural ground with a depth of 8.0 m. – 10.0 m.

The last stage of the dredged channels have the same characteristics as channels, and are provided with buoys, last buoys are No. 34 and No. 35, where there is the widest area named "Volta dos Caras", before entering the Santa Clara Channel.

Ships can anchor for waiting. However, there are cables of high voltage crossing at a height of 60 m.

On the passage from Porto Alegre to Copesul, there are 2 emergency anchorages, at Humaita and Volta dos Caras.

The bottoms of these anchorages are of sand and mud, the currents are always flowing outward and the East winds are not strong.

From June until September, during the morning, it is very common for fog to form. It is usually clear at about 1000 hrs. local time. During this period there is also the possibility of very strong wind from the West, which can delay navigation and passage through the bridge.

The terminal's access channel has the following characteristics:

Length: 7,500 m.
Breadth at water level: 90 m.
Breadth at ground level: 50 m.
Depth: 6.75 m.
Turning Basin: 320 m. × 520 m. (with an irregular form – similar to a letter "P").

Note: There are no official nautical charts from the bridge to Santa Clara Terminal, but only drawings showing the continuation of channel passage for this area.

MAIN INFORMATION OF SANTA CLARA TERMINAL – COPESUL:

Location: Triunfo, Rio Grande do Sul, Brazil. Lat. 29° 53' 55" S., Long. 51° 22' 35" W.

Maximum permitted draft: 17 ft. fresh water.

Piers: 3 piers available for loading petrochemicals, each of 40 m. length.

Pier No. 1: All products available.
Pier No. 2: Operates with all products, except ethylene.
Pier No. 3: Not possible to load ethylene, ethylbenzene and benzene.
This pier is principally for loading/discharging of pit-coal, (used for steam generators to supply electricity for their own internal consumption), and can eventually provide purging and loading/discharging of butadiene and propylene.

Dolphins: Two dolphins where vessels can berth when loading berths are occupied.

Note: Pilot and tugs are used for all manoeuvers. The only way to get ashore when the vessel is berthed at dolphins is by vessel's boats.

Main Products:	Loading Rate:
Benzene, Toluene and Xilene	about 300 t.p.h.
Ethylene	about 130 t.p.h.
Butadiene	about 200 t.p.h.
Propylene	about 150 t.p.h.
Ethylbenzene	about 300 t.p.h.

Slops: Up to 350 cu.m. of dirty ballast can be received by the terminal (except salt water).

Nautical Charts: If necessary, Agent can provide charts.

Nautical Charts from Rio Grande to Porto Alegre:

No. 2101 – Rio Grande Port; No. 2102 – Sao Jose do Norte and Setia Channel; No. 2103 – Sao Goncalo Channel Bar and Porteiras; No. 2104 – Pelotas and Surroundings; No. 2105 – Feitoria Channel; No. 2106 – Saco do Rincao; No. 2107 – Way out Porto Alegre Bar; No. 2108 – Itapua and Ponta do Arado Velho; No. 2109 – Ponta Grossa to Porto Alegre; No. 2110 – Rio Grande Port and Bar Surroundings; No. 2111 – Porto Alegre to Itapua; No. 2112 – Rio Grande to Feitoria.

AUTHORITY: Administracao do Porto de Porto Alegre, Av. Maua 1050, Porto Alegre, Rio Grande do Sul, Brazil CEP 90010. *Tel:* (0512) 24-5733. *Telex:* (051) 2540 *Contact:* Paulo Elizeu Ody, Port Administrator.

AGENT: Wilson Sons Agencia Maritima Ltda., Rua Tobias da Silva 267, Conjuntos 305/306, 90570-020 Porto Alegre RS. P.O.Box 215. Tel: (051) 222-1643 (After hours: (051) 249-4010). Telex: (51) 1058/1697 WSON BR. Fax: (051) 222-1291. Cables: Anglicus.

PORTO TROMBETAS: 01.28 S. 56.23 W. (See Plan)

LOCATION: The Porto Trombetas Bauxite Terminal is situated on the right bank of the Trombetas River, State of Para. The Trombetas River is a left hand affluent of the Amazon River.

Geographical location:

Lat. 01° 27' 31" S., Long. 56° 22' 48" W.

The shortest route through the fairway from the North Bar of the Amazon River (North Entrance) to Porto Trombetas is approximately 575 nautical miles.

The distance between the Port of Belem, capital of the State of Para, and Porto Trombetas is approximately 880 km. by air and 611 nautical miles down river.

The distance between the Terminal and Oriximina, the nearest town to Porto Trombetas, is 42 nautical miles.

DOCUMENTS

At Anchorage on Fazendinha Roads: At anchorage on Fazendinha Roads (See "Anchorage") Port Authorities will board vessel for clearance and the following documents should be delivered to the Agent, assisting Port Authorities and Master:

1 copy Health Maritime Declaration.
2 copies Vaccination List.
6 copies Crew List.
3 copies Store List.
3 copies Crew Personal Effects.
2 copies Narcotics List.
2 copies Arms and Ammunition List.
6 copies Passenger List (if any/wifes/children) (See "Note").
3 copies Bonded Stores List.
Last Port Clearance.

Documents to be Presented:

Derat or Exemption Certificate.

General Declaration Form, which the Agent will present to the Master (to be filled in during clearance).

After Customs and Health Inspections and granting of Free Pratique (which takes about 1.5 hours), the Agency will deliver to the Master the Fazendinha Clearance to be presented to Port Trombetas Authorities.

NOTE: Brazilian Federal Police – Immigration Department Laws now demand:

All officers and crew members on board or arriving in Brazil to join a vessel, must possess a valid Seaman's Book, and their Passport must state their profession as ship's Officer or Seaman. Accompanying wives and family members must not be entered on Crew List as Stewardess or Supernumary if they do not possess a valid Seaman's Book. They must be entered on a Passenger List, and they must have a Brazilian Visa in their passport if their nationality so requires.

At Porto Trombetas:

(a) Documents required:
3 copies Crew List.
3 copies Store List.
3 copies Crew Personal Effects List.
3 copies Passenger List or 1 copy "Nil" Passenger Declaration.
1 copy Ballast Declaration.
At hand to show:
Ship's Data.
Fuel, Diesel, MDO and Fresh Water Quantities on Arrival.
Dates of Issue and Expiry of all certificates of class.
Derat or Exemption Certificate.
Gas Free Certificate (if ore/oil vessel).

(b) Cargo papers: Master will receive copies of each of the documents listed below:
Notice of Readiness.
Bill of Lading (non-negotiable copy).
Documentation and Sample Receipt.
Stowage Plan.
Statement of Facts.
Draft Survey Results.
Manifest of Cargo.

Master shall approve and sign the Notice of Readiness, Bill of Lading, Draft Survey Result, Statement of Facts, Documentation and Sample Receipt, as required by the Shippers and Agents.

(c) Clearance: Ship's Agents will furnish clearance papers for sailing as well as the cargo manifest.

(d) From Trombetas the envelope of cargo documents destined to Ansanav Santana will be delivered to such Agents together with a Sailing Information Form (given to the vessel's Master by Santana Agent on the up river call at Fazendinha).

PILOTAGE: Pilot service is available between Porto de Santana and Porto Trombetas. They will board and disembark in the vicinity of Porto de Santana. The Pilots will stay on board at Porto Trombetas.

Report: February 1992.

Night pilotage for vessels up to 245 m. LOA is expected to commence in Mid-1992.

ANCHORAGE: *Anchorage at Fazendinha for Visit of Authorities and Embarkation/Disembarkation of Pilots:* In order to avoid any delay due to entrance to Porto de Santana, the Port Captaincy of the State of Para and Federal Territory of Amapa has officially determined the Fazendinha area for visit of Authorities and embarkation/disembarkation of Pilots.

Such area is located around Lat. 00° 04' 06" S., Long. 51° 06' 45" W.

Whenever passing by the Port of Macapa, vessels bound for Porto Trombetas are supposed to contact Messrs. "AMSANAV SANTANA", through VHF Channel 16.

Messrs. AMSANAV SANTANA will arrange the visit of Authorities and embarkation of Pilots.

RESTRICTIONS:

Draft Restrictions:

Amazon River North Bar:
37 ft. fresh water at high tide.
32 ft. fresh water at low tide.
Trombetas River:
37 ft. fresh water.

During the dry season (October/January), the draft may be reduced, according to the level of the river.

Remarks: These figures are subject to further confirmation with Shippers and vessel's Agent.

NAVIGATION: *Nautical Charts:*

(a) The Nautical Charts issued by the Hydrographic Navigation Offices (Brazilian Navy) and listed below are used to navigate from the Amazon River North Bar to Porto Trombetas:

200	Maraca to Machadinho Island.
210	Vicinities (approach) of the North Bar to the Amazon River.
220	From the North Bar to Porto de Santana.
201	North Bar of the Amazon River.
202	Bailique Island to Ponta do Capinal.
203	Ponta do Capinal to Pedreira Islands.
204	Pedreira Islands to Santana Island.
205	Macapa to Santana Island.
4101A	Macapa to Mangabal Island (Santana Island included).
4101B	Mangabal Island to Comandai Island.
4102A	Gurupa to Almeirim.
4102B	Almeirim to Prainha.
4103A	Prainha to Costa do Ituqui.
4103B	Costa do Ituqui to Meio Island (Santarem included).
4104A	Meio Island to Santa Rita Island (Obidos included).
4401A	Obidos to Paru Lake (entrance Trombetas River included).
4401B	Paru Lake to Caipuru Lake (Oriximina included).
4402A	Caipuru Lake to Bacabal.
4402B	Bacabal to Erepecu Lake (Narrow Channel of Bacabal and Porto Trombetas).

All charts and publications can be altered by Notice to Mariners (Brazilian Navy information service).

(b) All nautical charts are available through the vessel's sub-Agents if required in advance.

Navigation Inwards:

(a) Undoubtedly the greatest difficulty for navigators coming from the sea is to cross the Amazon River North Bar sand banks. Bulk carriers navigating to Porto Trombetas will be in ballast, for this reason there should be no need for them to await the high tide, in so far as at low tide, it is possible for them to cross the bar with 9.75 m. (32 ft.) draft.

(b) With adequate nautical charts, good radar and calibrated direction finder, an experienced navigator should be able to enter the North Bar of the Amazon River to Macapa without major difficulties.

Navigation Outwards:

(a) Navigation from Macapa to Ponta do Ceu offers no problem and it will not be necessary even to reduce speed.

(b) The critical section for navigation is from Ponta do Ceu to the open sea as, in addition to the 32 ft. draft, ships have to take advantage of the tide to cross banks of the North bar, where they are affected by the adverse action of a strong current.
Under such conditions ships have to be equipped with such facilities which will permit accurate positioning.

If it is necessary to wait for a suitable stage of the tide, the river provides good bottom to anchor at several places along the navigable routes.

Navigation Aids:

(a) Radio Beacon:

A radio beacon is installed at Ponta do Ceu.

The main details are:

Frequency:	290 kHz.
Signal Letters:	EH
Working Hours:	Continuous
Geographical Position:	Lat. 00° 45′ 40″ N. Long. 50° 06′ 58″ W.
Range:	300 miles.
Signal:	Ao and A^2 (1,020 H2)
Character of Signal:	(EH . . .), Twice in Ao during 10 seconds and A^2 (1,020 H2) during 5 seconds.

(b) Racon:

Racon (letter M – Morse Code) is located at Bailique Lights position (Lat. 00° 59′ 24″ N., Long. 49° 56′ 53″ W.) with a range of about 25 miles.

Mineracao Rio do Norte S.A. MRN is not responsible for the location and operation of the navigation aids.

Tidal Information: The Hydrographic Navigation Office of the Brazilian Navy based on data furnished by the National Astronomical Observatory publishes an Annual Tide Table for the majority of Brazilian ports, including the North Bar of the Amazon River – the Brigue Island, Lat. 00° 55′ N., Long. 50° 05′ W. and Porto de Santana.

(See DG 16 – 14 Tabuas de Mare (Tide Tables DG 16 – 14).

Outer Bar Tide: With reference to data published in the tide tables, Ilha do Brigue – Lat. 00° 55′ N., Long. 50° 05′ W., Charts 210, 202 and 201, the tidal time is local time (GMT minus 3 hours) and the tidal amplitude figures are shown in metres.

In position "E", Lat. 01° 34′ N., Long. 49° 09′ W., tidal time at and about this position is 4 hours earlier than shown in the tide tables for Ilha do Brigue. Tidal amplitude is 48% of the figures shown in the tide tables. In position Lat. 01° 09′ N., Long. 49° 36′ W., tidal time at and about this position is about 2 hours earlier than indicated in the tide tables for Ilha do Brigue. Tidal amplitude is 63% of the figures shown on the tide tables.

On Banco do Meio, tidal time at and about this position is 1 hour earlier than shown in the tide tables for Ilha do Brigue. Tidal amplitude is equal to the figures shown in the tide tables. Tidal currents in the area indicated as "Canal Grande do Curua", are reported to coincide with the direction of the axis of channel in that area.

Outer Bar Tide Current: On the Nautical Chart No. 210 information about tide current is furnished (see upper left side of the chart).

RADIO: *Arrival Advice:* For Agency purposes vessel proceeding to Porto Trombetas shall send ETA North Bar of the Amazon River to Messrs. "AMSANAV BELEM". For your guidance, one notice is required 72 hours prior to such arrival which means vessel's passage along Entrance Buoy located at Lat. 01° 14′ 30″ N., Long. 49° 37′ 16″ W. This procedure will allow sub-Agents at Belem to convey Pilots to Fazendinha Anchorage Area accordingly. After passing along the mentioned entrance buoy, vessel shall proceed via North Channel of the Amazon River up to Fazendinha Anchorage Area located at Lat. 00° 04′ 06″ S., Long. 51° 06′ 45″ W. During such sailing to Fazendinha Anchorage Area vessel will receive from Messrs. "AMSANAV BELEM" all information regarding eventual changes in position of buoys, operations of lights and other aids.

When passing along Macapa (about 8 miles before Fazendinha Anchorage Area) Master is expected to be in contact with Messrs. "AMSANAV SANTANA" through VHF Channel 16. At that time all instructions for vessel's anchorage at Fazendinha in order to receive visitation of Authorities will be forwarded by Messrs. "AMSANAV SANTANA".

When leaving Fazendinha Anchorage Area, Master will be requested to inform local sub-Agents of ETA at mouth of the Trombetas River to be re-transmitted to "DOCENAVE" Porto Trombetas.

Before entering the Trombetas River, Master must obtain "Confirmation for Entrance" from Shipper's Dock Master through VHF Channel 16.

TUGS: One tug of 25 tons bollard pull and 2 line handling boats are available for berthing and unberthing.

BERTHING:

Bauxite Loading Terminal: The bauxite loading terminal is designed to load ore carriers up to approximately the Panamax Size (LOA 245 m.). Prior permission is required from Port Authority to exceed this length.

The pier is 100 m. long and the maximum permissible air draft (the distance from the waterline to the top of the hatch coaming) is 13.50 m. at the high water period (July) and about 19.0 m. maximum in the dry period (December). The mooring system consists of four concrete dolphins upon metal piling and four mooring buoys.

Accommodation for Vessels:

(a) One vessel can be berthed at the loading dock. Two waiting vessels can be secured to lay-by buoys about 1.0 – 1.8 miles downstream from the berth. A secondary waiting area is located West of the mouth of the Trombetas River in the vicinity of Lat. 01° 54′ S. and Long. 55° 40′ W. There is good holding ground in this area and some protection from canaranas and other floating debris.

(b) The movement of all vessels within the Trombetas River system is under the control of MRN. Up-bound vessels are not permitted to enter the Trombetas River without prior clearance from MRN. Such approval can be obtained by contacting MRN or DOCENAVE on VHF. In case such permission has not been received, the vessel shall anchor at the secondary waiting area in the Amazon River until it is granted. This is necessary because there are two areas within the Trombetas River where vessels are not permitted to pass. Vessels will normally be loaded at Porto Trombetas in order of arrival, provided that they are within their lay-day period as previously agreed with MRN.

Berthing and Unberthing: For berthing and unberthing the width of the channel in front of the terminal is currently 300 m.

Manoeuvring of vessels should be performed at Master's and Pilot's discretion.

Fendering: No fenders are needed for docking. The terminal is equipped with permanent fenders.

Anchor: The use of vessel's anchor during manoeuvring is permitted at Master's and Pilot's discretion.

Loading Hours: 24 hours a day, Sundays and holidays included (except in rain).

Hold Condition: No cleaning crews are available.

Holds should be cleaned prior to arrival and they will be inspected before acceptance of vessel.

Loading Operation: The bauxite is transferred from the stockpile to the ship's holds through a conveyor belt system and automatic shiploader.

The shiploader boom moves horizontally around its hinge with an angle of 53° 24′ 44″ to each side.

The loading operation usually starts soon after the vessel is alongside and cleared by the Authorities.

The air draft (that is, the distance from the waterline to the top of the hatch coaming) is 13.5 m. (minimum) in July and 19.0 m. (maximum) in December.

The nominal rate capacity of the shiploader is 28,000 metric tons per day for dry bauxite, and 22,000 metric tons per day for wet bauxite.

The stowage factor for dried bauxite is 25 cu.ft. per ton up to 28 cu.ft. per ton depending on moisture content of the bauxite.

Careful check of vessel's draft and trim should be made by the ship's officers at all times during loading operations. Cargo is belt trimmed only.

The cargo weight should be determined by the "ship's displacement" method (light versus loaded draft survey).

Tonnage on the conveyor belt system between stockpile and ship is approximately 275 tons. This tonnage must be discharged into the holds to complete the loading.

MRN reserves the right to require any vessel to undock after loading and completing the necessary formalities in order to permit another vessel to berth or for any other reason.

GENERAL CARGO WHARF: MRN handles general cargo at a general cargo wharf 350 m. downstream from the shiploader.

MEDICAL: Medical service may be arranged at the MRN Hospital, in emergency. Health conditions in the region are good. No epidemics or tropical diseases are recorded in the region.

TANKERS: Tankers discharge bulk fuels at a floating pier situated about 400 m. upstream from the Terminal.

BALLAST: Vessels are not allowed to discharge salt ballast into the Trombetas River. Salt ballast can be discharged into the Amazon River up till Almeirim Island.

POLLUTION: No facilities are available at the terminal to receive slops, salt water or contaminated ballast.

Discharge of any material other than clean ballast will be subject to heavy penalties as prescribed by the Brazilian law. It is not permitted to discharge salt water ballast into the Trombetas River.

FRESH WATER: Available subject to prior consultation with MRN (Pressure very low at times).

FUEL: Not available.

CONSULS: None.

REPAIRS: Small repairs can be undertaken by MRN workshop in extreme emergency only.

SURVEYORS: There is no Classification Society surveyor at Porto Trombetas. Whenever needed a surveyor can be appointed, who will come from any other Brazilian port by plane.

P & I Club: Not available at Porto Trombetas. Administrative assistance and legal advice on matters concerning ship's civil liability to third parties can be obtained from a representative in another Brazilian port who will come by plane.

AIRPORT: The nearest international airport is Manaus (capital of the State of Amazon). There is a domestic airline service between Manaus and Santarem, Belem and Santarem, and Santarem-Porto Trombetas.

TIME: Local time is GMT minus 4 hours.

IDENTIFICATION CARDS: Crew and Passengers: There are no restrictions by the local authorities, but crew members and passengers should carry their identification papers when on shore. Visits to the industrial area require prior approval of MRN.

GENERAL:

Weather:

(a) Rain: during the rainy season precipitation is usually heavy but of short duration.

(b) Wind: from July to December, East and E.S.E. winds predominate and they are usually moderate with occasional strong gusts. From January to June calmness predominates followed by N.E. winds backing to S.W. with persistent showers. The predominant wind speed is 10 knots.

(c) Haze is rare in the Amazon River, but it is more frequent in the Trombetas River, particularly early in the morning.

Tide and Current: In the Porto Trombetas region, the current may reach 2 knots during high water season (January to July).

Temperature: An average of 30°C.

Mail: Ship's and crews' mail should be addressed to: Vale do Rio Doce Navegacao S/A – "DOCENAVE", Porto Trombetas, State of Para, CEP 68.275, Brazil.

Telephone: Telephone communication between Porto Trombetas and the rest of Brazil and also international calls are available.

Telegraph: There is no public station in Porto Trombetas. Telegrams from Porto Trombetas must be sent through the vessel's Agent.

Services:

Ship chandlers and laundry not available.
Derat and Fumigation not available.
Electricity not available for supplying vessels.

Porto Trombetas Port Captaincy: The Brazilian Navy has installed an Agency at Porto Trombetas with the purpose of controlling all vessels destined to the port.

MRN recommends that the Brazilian Pollution Regulations be carefully observed.

The Port Captaincy is located in the vicinity of the shiploader and for any communications, this Port Authority can be reached at the following Telex and Telephone numbers:

Telex: (091) 5458
Telephone: (091) 549-1283
(091) 549-2177

Agency:

All ships will be attended by Vale do Rio Doce Navegacao S.A. – DOCENAVE through its regional office in Porto Trombetas, and DOCENAVE's sub-Agents in Belem and Porto de Santana (Agencias Mundiais Ltda.):

DOCENAVE's head office:
Rua Voluntarios da Patria, 143
Rio de Janeiro, State of Rio de Janerio
22.270, Brasil
Telephone: (021) 286-8002
Telex: (021) 22142, 22249, 22730

SHIPMASTER'S REPORT: May 1986 (updated 1988).

Please see a comparison report over tidal predictions for Barra Norte (Rio Amazonas) for the 23rd May 1986. First method: Admiralty Tide Table Vol. 2/1986 NP 202/86.

Second method: Tabuas dos Mares De-16-21/1986.

There is an error of 3 hours 41 minutes between the two predictions, note also the difference in predicted heights.

Upon arrival at Barra Norte, we only had in our possession the Admiralty Tide Tables. Referring to the time of HW given by these tables and using the rose of currents printed on Brazil chart 210, we were expecting a current setting in direction 310° at about 1.2 knots (HW+5) then later 270° at about 1.8 knots and 238° at about 2.2 knots. The correct currents were for these times: 050° – 4.1 knots, 040° – 2.2 knots, 030° – 5.5 knots, using the HW times of Tabuas dos Mares.

The difference between the two predictions is, of course prejudical in order to perform a safe and good navigation, keeping in mind that the navigator has no landmark for several hours.

Tidal predictions for May 23rd 1986 at Barra Norte – Rio Amazonas: Admiralty tide tables:

	Time		*Height*		
Standard Port	HW	LW	HW	LW	
Georgetown	0433	1051	3.2	0.2	
Guyana	1709	2302	2.9	0.7	
Seasonal change	Standard port		–	–	negligible
Differences	+0245	+0251	−0.3	−0.1	
			−0.3	−0.2	
Seasonal change	Secondary port		–	–	
Secondary port	0718	1342	2.9	0.1	
	1954	0153	2.6	0.5	
	(24 May)				

Tabuas dos Mares: 23rd May 0546 – 0.8, 1059 – 5.8, 1812 – 0.5, 2344 – 5.6.

Loading: The loading rate of bauxite during my call was about 1,100-1,200 tonnes/hr. We loaded about 55,000 tonnes.

Agents Questionnaire to Master:

Fazendinha Anchorage, May 24th 1986.

To the Master
M.V.
Fazendinha

Re.: North Channel – Amazon River

Dear Captain:

Please kindly report your observations during your transit in North Channel – Amazon River, (Nautical Chart No. 201 – 6th ed.). Any other information will be of good advice.

North Bar Racon/Buoy Positions on February 29th 1988:

Sea Racon-white light about 15 miles		Lat. 01° 34.16′ N.,	Long. 49° 00.86′ W.
Sea Buoy-red/white/red	white light	Lat. 01° 24.37′ N.,	Long. 49° 02.65′ W.

Radio Beacon Ponta do Ceu: Good, but have given bearings totally erroneous during one hour (from 1400 to 1500 LT).

Racons: Guarah Light (range). First echo (weak) 31 nautical miles.

Bailique Light (range). First echo 24 nautical miles.

Lighthouses: Guarah Light; Bailique Light; Marinheiro Light; Ponta do Ceu; Santarem Light. Generally all good but probably too weak in case of restricted visibility due to rainfall.

Remarks: Regret absence of fairway buoys or pillars on each side of the North Bar. Buoy No. 2 and following are too small and difficult to find on the radar. Navigator on duty 5 hours between Barra Norte and Buoy No. 2 without a good fix.

It would be helpful if Agent sent by radio at least 2 days before arrival the following information concerning tides.

(1) Time of HW and LW at North Bar (we received it but at the time we were in North Bar (23rd May). The times given in the cable were for the 24th May).

(2) The direction and force of current following the current rose printed on chart 210 (Brazilian chart).

Cable should be in the following form: 23rd May HW . . . LT LW . . . LT. Current HW 070/3.6 HW+1 050/4.1, HW+2 040/5.5, etc.

It should be noted that the predicted times and heights in the Admiralty Tide Tables are erroneous.

It should also be noted that for deep draft vessel, the most difficult and narrow navigation is from Buoy No. 2 to Santana Anchorage, and without Pilot (especially between Buoy No. 2 Buoy No. 10).

SHIPMASTER'S REPORT: September 1988.

Vessel called at Porto Trombetas to load bauxite in bulk. This port is situated on the Amazon, approximately 60 miles from the mouth of Rio Trombetas and 590 miles from Amazonas No. 1 Light vessel.

Pilots embark and disembark at the anchorage off Santana, and remain on board during the vessel's stay at Porto Trombetas. Customs and other state officials visited vessel at Santana anchorage. The Pilot's English language is sufficient for navigational commands only. The two Pilots on board were very experienced.

Admiralty charts of the Amazon are not sufficient. All Brazilian nautical charts are available through the vessel's sub-agent in Santana if advance notice given. These charts were perfect for tidal height calculations.

Vessel should cable request buoy positions on Canal Norte prior to arrival as the positions of the buoys and sandbanks change.

High water at Barra Norte is 2 hours after Ilha do Curua or Canal Norte (buoyed channel, IALA Region B, seaward green buoy starboard hand). There are two Racons on the shore for fixing position, we could not find Amazonas No. 1 Light vessel, it may have drifted out of position.

Navigation from Canal Norte to Santana in ballast or with shallow draft is not difficult. Laden Bulk Carriers on Canal Norte and Barra Norte must carry out good tidal height calculations.

SHIPMASTER'S REPORT: March 1993.

The vessel called for loading a cargo of Bauxite.

Two Pilots boarded off Fazendinha (near Macapa) and though they disembarked at Trombetas, they returned for the pilotage on the outward passage. As another vessel was loading on the berth, we moored at the buoy with 2 lines aft and starboard anchor with 2 shackles in the water. We had Brazilian charts from a prevous trip. The Pilots insisted on the latest edition of the charts, which the Agent supplied in a full set.

The most important fact that I would like to emphasise here is the matter of tides at the "Barra Norte" or North Bar, which is a 18 mile stretch (least distance through the bar) with a minimum marked depth of 9.1 m. I was advised by telex by the local Agent of the latest buoy positions, along with the tide timings for my anticipated date of entry.

Though my maximum ballast draft was 7.8 m. (F.W.), I was advised to proceed inwards only on high tide. As can be seen from the telex below, the tide applicable to us was at H.W. 0328 (4.1 m.). We made our approach around 0400 hrs. local time, but to our surprise found the tide against us, though the depth below keel was maintained at a minimum of 2.8 m., we were expecting more, as the given height of tide was 4.1 m.

The passage through the bar and up to Fazendinha was uneventful and safe. At Fazendinha and on request, I was supplied with Brazilian tide tables. Our subsequent enquiries to the Pilots revealed that the tide timings given in the tables were for a point further inland called Ponta do Ceu and not for the bar. The actual tides at Barra Norte were earlier in time and had a amplitude of 78% to that published for Ponta do Ceu. Thus H.W. at the bar (in position 01° 30′ N., 49° 10′ W.) occured about 3 hours 20 minutes and L.W. about 4 hours 30 minutes *earlier* than the times at Ponta do Ceu. Thus the correct tides on our inward passage were actually 0008 hrs. (H.W.) and 0553 hrs. (L.W.), heights of tide calculated at 78% amplitude should have been 3.2 m. and 0.39 m. respectively. Hence at about 0400 hrs., the height of tide was only around 1.8 m., above the minimum charted depth of 9.1 m. Thus our experience of the under-keel clearance and falling tide agreed with these calculations.

On our outward passage, we based our tidal calculations on the above theory. Our maximum draft was 37 ft. (F.W.), hence any degree of error could be detrimental in touching bottom. H.W. at Ponta do Ceu was at 1251 hrs., thus we planned to be in the middle of the bar at 0831 hrs. L.W. with height worked out to 2.9 m. above expected 9.1 m. minimum depth. We successfully cleared the bar with a minimum under-keel clearance of about 0.5 m.

Telex: From Agent to vessel:

Tide for North Bar to 13.3.93 according to the tide tables for 1993.

H.W./h	L.W./h
0328 hrs. (4.1 m.)	1023 hrs. (0.5 m.)
1549 hrs. (4.4 m.)	2300 hrs. (0.5 m.)

Please wait H.W. to pass North Bar.

Please send your telex to us.

NOTE: Port Authorities only clear vessel from 0700 hrs. local time until 2300 hrs. local time.

We herewith transmit buoy positions for the Amazon – North Bar:

North Bar Racon/Buoys – new positions re Notices to Mariners Nos. 169 to 187, August 15th, 1991.

Sea Racon	White light	Lat. 01° 34.12′ N.,	Long. 49° 01.35′ W. (about 15 miles).
Sea Buoy	White light	Lat. 01° 25.40′ N.,	Long. 49° 22.20′ W.
Buoy No. 2	White light	Lat. 01° 17.55′ N.,	Long. 49° 27.72′ W.
Buoy No. 4	White light	Lat. 01° 09.64′ N.,	Long. 49° 33.33′ W.
Buoy No. 6	Green light	Lat. 01° 01.78′ N.,	Long. 49° 38.93′ W.
Buoy No. 8	Green light	Lat. 01° 00.29′ N.,	Long. 49° 40.52′ W.
Buoy No. 10	Green light	Lat. 00° 50.80′ N.,	Long. 49° 42.17′ W.
Buoy No. 12	Green light	Lat. 00° 57.35′ N.,	Long. 49° 44.00′ W.
Buoy No. 14	Green light	Lat. 00° 56.38′ N.,	Long. 49° 46.31′ W.
Buoy No. 16	Green light	Lat. 00° 55.41′ N.,	Long. 49° 48.58′ W.
Buoy No. 1	Red light	Lat. 01° 02.39′ N.,	Long. 49° 39.52′ W.
Buoy No. 3	Red light	Lat. 01° 00.94′ N.,	Long. 49° 41.12′ W.
Buoy No. 5	Red light	Lat. 00° 59.49′ N.,	Long. 49° 42.71′ W.
Buoy No. 7	Red light	Lat. 00° 58.12′ N.,	Long. 49° 44.41′ W.
Buoy No. 9	Red light	Lat. 00° 57.19′ N.,	Long. 49° 46.62′ W.
Buoy No. 11	Red light	Lat. 00° 56.23′ N.,	Long. 49° 48.86′ W.

According to the Brazilian Navy, all buoys are in position and working *(more or less correct).*

In position 00° 56′ N., 49° 47.68′ W., there is a minimum depth of 9.1 m. extending to the middle of the channel. Mariners in this area should take caution and navigate in channel at 0.6 miles from Buoys No. 10 and No. 12, *(unmarked even on latest edition chart).*

NOTE: Italic text is Master's comments.

SHIPMASTER'S REPORT: April 1994.

Report on Amazon River Navigation:

Vessel coming from Tenerife and bound for Porto Trombetas, which is situated about 590 miles up-river from Amazon Entrance Buoy.

Approaches to Amazon Entrance Buoy: Amazon Entrance Buoy fitted with Racon 'G' was picked-up on radar at 18 miles and ship's course was adjusted. Continuous bottom soundings check was maintained. It was noticed that water colour starts changing about 60 miles before Amazon Entrance Buoy. At about 30 miles before Amazon Buoy, water colour is totally muddy. Soundings of 8.0 m. – 10.0 m. below keel were observed. Shallow water area starts about 10 miles East of Amazon Entrance Buoy and further 20 miles until Amazon Buoy No. 1, thus total mileage of 30 miles over Amazon Bar.

It is most important that the buoys positions be checked well beforehand by local Agent, who obtains same from Brazilian Navy. Agents at Santana provided us with all latest positions of buoys. On plotting these positions on B.A. Chart No. 2189, it was found that the buoyed channel has shifted drastically and new channel buoys, especially Buoy No. 9 to Buoy No. 12, were going over sand bank. We requested Agent to re-check buoy position with Navy/Coast guards and advise correct positions of buoys. Agent came back with same positions. From sailing directions, it was clear that sand banks keep changing. B.A. Charts are not corrected by Admiralty itself, hence navigation on B.A. Charts should be done with great caution.

Position of buoys as received from Agents were plotted on chart and navigation was done with maximum caution. Vessel's bottom sounding were constantly checked. All the buoys were picked-up on radar at distance of 7-8 miles. Vessel's position plotted frequently and verified with soundings. Vessel experienced strong current. We were advised by the Agents that as per Brazilian Hydrographer/Navy, Amazon Bar has draft of 32 ft. (FW) at low water and 37 ft. (FW) at high water.

Vessel constantly got soundings of 4.0 m. – 5.0 m. below keel.

Channel Buoys were picked-up on radar at 6 miles.

In channel itself, which is wide, we observed soundings of 8.0 m. – 10.0 m. below keel. There are a total of 6 pairs of buoys in channel. During our transit only 1 buoy was not lit, otherwise channel is very clear.

After clearing the channel, depth of water increases and navigation becomes much easier. While inbound, total navigation until Fazendinha Anchorage was done on B.A. Chart No. 2189. One point to note here is that there is no mention of Fazendinha anywhere on chart. However, position of same obtained from Agents. The name of anchorage area given as there is a church named Fazendinha on North shore. After leaving buoyed channel, vessel steered course to keep in the middle of deep water. Ponta do Cue Racon was picked-up on radar at 16 miles. All lights were working.

When Southbound passing through Canal do Norte (Lat. 00° 35′ N., Long. 50° 25′ W.), vessel should keep close to Ilha Caviana de Dentro, and Banco Carolina Buoy (Fl.R.3) should be kept on starboard side. Then steer clear South of Ilhas Pedreira Island Lt., and from there steer South of Pta. do Pau Cavade Lt. with Racon 'X' and from this point steer in deep water up to Macapa. At this point, vessel starts meeting ships outbound. From Macapa to Fazendinha, steer in deep water, keeping Bancoda Cascalheria Lt. on your starboard side and Fl.G.5 sec. light on port side and steer to Fazendinha Anchorage. The safe position to anchor is by keeping Santana Leste Lt. bearing 270° × 1.3 miles. On B.A. Chart No. 2189, South side of Fazendinha Anchorage is not shown. However, as per Brazilian charts, there is enough water on South side.

Vessel anchored at Fazendinha at 0630 hrs. when it was already daylight. However, great care must be taken if anchoring during night hours, because Agent and Port officials do not board at night-time, and every ship has reported heavy thefts at anchorage and at Santana. Agent and Authorities boarded at 0830 hrs. It takes about 45 minutes to clear formalities as Quarantine undertake a thorough check of ship. Agent from Santana brought Brazilian charts and Tide Tables. However, two charts for Amazon River were not available.

Two Pilots boarded at Fazendinha. They were well experienced with river and spoke sufficient English, which is safe for navigation. Vessel picked-up anchor at 0900 hrs. and started heading towards Porto Trombetas. Amazon River itself is deep enough for safe navigation. Vessel was steaming at maximum possible safe RPM.

Amazon River is not marked. However, Pilots are very experienced and know the river well. Vessel must have good radar, as night navigation is totally done by radar only.

Porto Trombetas is situated in River Trombetas, and from entrance of river until Porto Trombetas, the river is well marked with buoys, and night navigation in clear weather is no problem. It took nearly 42 hours from Fazendinha to Porto Trombetas and vessel went straight alongside.

Pilots stay onboard as they bring the vessel back to Santana. Santana is nearest port to Fazendinha Anchorage.

Loading at Porto Trombetas is by one loader only and loading rate of 3,000 tonnes/hr. was given. Terminal operators are co-operative. To land ashore, ship has to use boat service as landing on Terminal is not allowed.

Departure from Porto Trombetas was at 1000 hrs., and vessel arrived at Fazendinha Pilot Station at 1400 hrs. next day. It took 28 hrs. downbound.

After dropping the Pilots, vessel's speed was adjusted so as to arrive 10 miles West of buoyed channel, 1 hour before low water at Ponta do Ceu. In Tide Tables, HW and LW timings are given for Ponta do Ceu. For Barra Norte, you have to calculate the tide for position 'H' (Lat. 01° 30′ N., Long. 49° 10′ W.), which has an amplitude of 78% and about 3 hours 20 minutes earlier for HW and 4 hours 30 minutes earlier for LW than the tide timings for Ponta do Ceu.

The tidal current at Barra Norte has a general direction of S.W. (flood tide) and N.W. (ebb tide) and runs at 3 knots (Neap) and 5.5 knots (Spring).

Vessel's speed was adjusted and vessel entered buoyed channel. Sometimes you might see vessels at anchor, as some vessels go at full speed and anchor off Ponta do Ceu and wait for tide. Some vessels clear buoyed channel and anchor North of channel and wait for high water at Point 'H'.

Vessel's position and soundings were constantly checked. After passing Amazon Buoy No. 1, vessel's speed was reduced to avoid heavy squatting. However, speed should be so maintained that the Bar is cleared in time. All over the Bar, soundings of 2.0 m. – 3.0 m. below keel were noted. After clearing Amazon Racon Buoy, vessel steered course so as to go through deep water. Soundings started increasing slowly. When soundings of 15.0 m. below keel were obtained, ship's speed was increased to sea speed, and before RPM could come to maximum, the soundings were more than 30.0 m. below keel.

OPERATORS: Mineracao Rio do Norte S.A. – MRN

Legal Domicile:

Rodovia Br. 316, Km 3
Ananindeua – Para.
CEP: 67.000
Telex: (91) 0977
Telephone: (091) 235-3844 Fax: (091) 235-3848

CEP 68.275
Telex: (91) 4036
Telephone: (091) 549-1335 Fax: (091) 549-1397
Cables: "RIONORTE".
Contact: Mr. Oscar Sampaio (Dock Master).

Main Office:

Praia do Flamengo, 200 – 6° andar
Rio de Janeiro
CEP 22.210
Telex: (021) 23352
Telephone: (021) 205-9112 Fax: (021) 245-5717
Cable: "RIONORTE".
Contact: Dr. Julio Bueno (Commercial Manager)

AGENT: See "Belem".

RECIFE (Pernambuco): 08.04 S. 34.52 W. (See Plan)

PORT LIMITS: West of Longitude 34° 50′ W. and between Latitudes 08° 00′ S. and 08° 07′ S.

DOCUMENTS: Most of the documents required by the local authorities are presented by the vessel's Agents after arrival.

Master must have on hand, on arrival, the following documents:
7 Crew Lists.
1 International Health Declaration completed and signed.
Clearance from last port of call.
Manifests of the cargo to be discharged.
Copies of Bills of Lading of the cargo to be discharged.

PILOTAGE: Compulsory. Pilots board the vessel at Southern end of Banco Ingles, at approximate position Lat. 08° 05′ S., Long. 34° 50′ W. Vessels must give accurate ETA to their Agents, not to the Pilot Association, however when within VHF range, vessel should communicate with the Pilot Association, if no instructions have been received from the Agents or the Pilot does not board upon arrival.

ANCHORAGES: Most favourable position for ships to await pilot boat is 1.5 miles in direction 303° from "Picao", also just outside the 6 fathom line. In fine weather ships can sail to a position 8 cables from "Picao" in same direction just South of buoy. Anchorage in fine weather between above-mentioned places; in bad weather more than 1.5 miles in direction 303° from "Picao" and North and South of line, in water of 7 fathoms and 8 fathoms depth.

RESTRICTIONS: Vessels only enter port at night in cases of necessity. 3 ft. under keel clearance required when heavy swell running.

The port is situated between 2 channels, 1 to the North, the other to the South, which are the main fairways of the port. The Southern Channel is 850 ft. wide by 32 ft. 6 in. deep and the Northern Channel is 32 ft. deep but with variable width.

Tankers: May enter and leave during daylight only (0500 – 1800 hrs.). Also see "Tankers".

MAX. SIZE: Vessels 220 m. in length can enter, max. draft 31 ft. Also see "Tankers".

HEALTH: Free Pratique is granted by radio at any time, day or night. Masters must radio to "Saporto Recife", informing sanitary conditions of the vessel, reporting any case of sickness and requesting Free Pratique.

RADIO: A very powerful radio station "PPO"-Olinda Radio now available, operating on radiotelephony and radiotelegraphy, with VHF and HF in all maritime frequencies.

RADAR: No facilities available.

TUGS: Pilot brings vessels to inner harbour where tugs available to help to go alongside; not practice for tugs to meet vessels on Outer Roads. 3 tugs available, largest 1,680 h.p. Vessels up to 5,000 g.r.t. require 1 tug. Vessels over 5,000 g.r.t. require 2 tugs.

BERTHING: Vessels arriving at Recife Roads with 26 ft. can enter port on low tide and can go alongside from Sugar Terminal to Warehouse No. 9, over 26 ft. it is better to wait for high tides to enter, 31 ft. being the max. draft for entering Recife.

Depth alongside wharves:

Berth Nos. 1 – 2	31 ft.
Berth Nos. 3 – 6	30 ft.
Berth Nos. 7 – 14	28 ft. – 30 ft.
Berth No. 15	27 ft.

At anchorage (pool) in port, max. draft is 31 ft. Depth between 32 ft. and 26 ft., the max. rise of tide being 5 ft. Distance from the quay side, 200 m. Manoeuvring space is 1,640 ft. or 500 m. with a depth of 28 – 30 ft. max.; 590 ft. or 180 m. with a depth of 26 ft.

SPECIAL CARGO FACILITIES: *Cereals:* Silos with unloaders. Silos capacity: 25,000 tons (CAGEP), 23,500 tons (Moinho Recife).

Capacity of unloaders: 400 t.p.h. (Berth No. 1), 150 t.p.h. (Berth No. 9), 150 t.p.h. (Berths No. 9 – 10).

Sugar: Sugar Terminal: Warehouse capacity 200,000 tons, capacity of loader 1,000 t.p.h.

Molasses: Tanks: Capacity to store 14,000 tons, capacity of loader 120 cu.m.p.h.

Cranes:
1 Crane with capacity of 25 tons (Berth No. 2).
4 Cranes with capacity of 3.2 tons
3 Cranes with capacity of 5 tons
15 Cranes with capacity of 1.5 tons
3 Automobile cranes with elevated cab capacity of 8 tons, with 2 clamshell and 2 graiffers.

Forklifts:
1 special forklift for containers with capacity of 40 tons.
63 forklifts with capacity of 2.5, 3, 4 and 7 tons.

Floating Crane: 1 floating crane, capacity 100 tons.

STEVEDORES: Advise Agents of ETA at least 48 hours prior to arrival to make necessary berthing arrangements and hire dock labourers and stevedores in time.

MEDICAL: In *urgent cases* communicate with Agents immediately by means of Radio at least 48 hours prior to vessel's arrival if possible. It is necessary for vessel to enter port to enable sick person to land because on outer roads there is too much swell. Not necessary to Dock. Port Doctor must be advised by Agents and will board to see sick person and grant permission to land in Recife temporarily. Hospitals available also First Aid Stations equipped with ambulances. Port Authority also equipped with ambulance. Crews should always have yellow fever inoculation certificates.

TANKERS: Oil companies who keep petroleum products here are: Petrobras, Esso, Texaco, Shell and Atlantic. To discharge petroleum products tankers utilise 1×10 in. at Berth No. 1; 4×8 in. and 4×6 in. at No. 2; 2×8 in. and 2×6 in. at No. 3 and 1×8 in. and 1×10 in. at No. 4. Max. safe draft for a tanker to enter Recife is 30 ft. and entry must take place on high tide.

DENSITY: Low water density in Summer time 1028. High water density in Summer time 1027.

FRESH WATER: Supplied by Port Administration by means of pipelines in the docks. Vessels can be supplied alongside any quay; water fit for human consumption.

The local Port Administration has 1 water barge, capacity 210 tons, for supply to vessels inside the breakwater.

There are 71 hydrants, diameter 2.5 in., rate 15 – 20 t.p.h.

FUEL: Fuel oil and diesel can be loaded from network along the quay.
Berth No. 4: 3×8 in. and 3×6 in.
Berth No. 5: 4×8 in. and 4×6 in.
Berth No. 6: 3×8 in. and 3×6 in.
All with capacity 150 t.p.h. (fuel – 8 in.) and 45 t.p.h. – 50 t.p.h. (diesel – 6 in.)

Fuel oil and diesel also available by road trucks with capacity 30 tons at Berth Nos. 7 – 15.
Also see "General" before first port.

CONSULS: The following countries are represented in Recife/Pernambuco:

Argentina
Belgium
Costa Rica
Denmark
El Salvador
Ecuador
France
Germany
Great Britain
Guatemala
Honduras
Italy
Japan
Lebanon
Mexico
Netherlands
Norway
Portugal
Spain
Sweden
Switzerland
United States

REPAIRS: Available but limited to small mechanical equipment.

SURVEYORS: 1. Supervise and Superinspect are companies available to do cargo surveys.

2. Lloyd's Register, A.B., B.V., Salvage Association and U.S. Salvage are available at the port.

GANGWAY/DECK WATCHMEN: Compulsory.

OPENING/CLOSING HATCHES: Normally by stevedores but crew helps when stevedores not familiar with hatches of modern vessels.

CUSTOMS ALLOWANCES: One carton cigarettes and one bottle of spirits allowed each man at Customs discretion.

REPATRIATION: Facilities by air available.

AIRPORT: Situated 9 miles from docks. 228 flights per week.

TIME: GMT minus 3 hours.

HOLIDAYS: *National Holidays:* Fraternidade Universal (January 1st); Tiradentes (April 21st); Labour Day (May 1st); Brazil's Independence Day (September 7th); Nossa Senhora Aparecida (October 12th); Commemoration of the Republic (November 15th); Christmas Day (December 25th).

State Holidays: Nossa Senhora da Conceicao (December 8th); Nossa Senhora do Carmo (July 16th); Good Friday, Sao Joao (June 24th).

POLICE/AMBULANCE/FIRE: Harbour Police Tel: 2241024. Port State Fire Brigade Tel: 193. Ambulance (First Aid) Tel: 192. State Police Tel: 190.

TELEPHONES: Can be connected on board if requested.

BANKS: City Bank – Av. Marques de Olinda, 126. Tel: 224.7922. Telex: (081) 1093.

Bank of London – Rua Estreita do Rosario, s/no. Tel: 224.3729. Telex: (081) 1173.

STORING: See "Prelims".

1. Vessel can be stored only by trucks.
2. Vessel cannot store from barges. Storing must be done directly onto/from wagons and warehouses.
3. Trucks can proceed alongside at the berth.
4. Fork-lift trucks can be used on the jetty to handle stores.
5. As a rule, when cargoes go to the warehouses they must pay in advance a fee corresponding to one month's rent, which costs 1% of the value of the cargo. If the cargo remains another month then 2% of its value must be paid as a fee. If the owner of the cargo doesn't clear it through Customs in 3 months it will be confiscated. Certain kinds of cargoes, such as, fertilizers, wheat, corn, oil derivated goods and rollers have an anticipated dispatch and there will be 6 days free-of-charge for them to take them out of the port.
6. Local Riggers can be employed to assist with storing.

IDENTITY CARDS: Foreign crew members not permitted to go ashore without presentation of identity card, on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police who will return it to the crew member on re-embarkation.

DEVELOPMENTS: Plans are underway to dredge the access channel to 11.5 m. It is also intended to construct new berths for general cargo and molasses tankers, and to modernise the existing berths.

AUTHORITY: Administracao do Porto do Recife – Portobras, P.O.Box 720, Praca Artur Oscar – s/no, Recife, PE, Brazil 50.000. *Tel:* 231.4044, 231.4144. *Telex:* 1018. *Contact:* Milton Pires de Souza, Administrator.

AGENT: Wilson Sons Agencia Maritima Ltda., Rua Mariz e Barros 71, Bairro do Recife, 50030-120 Recife PE. P.O. Box 116. Tel: (081) 224-9700 (After hours (081) 341-3785, (081) 441-4377). Telex: (81) 1298/4710 WSON BR. Fax: (081) 224-6161. Cables: Anglicus.

REGENCIA: 19.41 S. 39.41 W.

This terminal is located on the East coast of Brazil in the State of Espirito Santo, approximately 80 km. to the North of Vitoria. It consists of an oil storage area, a pipe-line both on land and underwater with a diameter of 16 in., 4 km. long and a set of buoys for mooring vessels. Its purpose is storage and passing to production of oil products from the fields of the State of Espirito Santo, principally the field of Lagoa Parda which is next to the terminal.

The set of buoys is designed to handle vessels up to 50,000 g.r.t., permitting a maximum draft of 13 m.

PILOTAGE: The area has Pilots to attend to the manoeuvring of vessels at the buoys.

TIME: GMT minus 3 hours.

AUTHORITY: Companhia Docas do Espirito Santo – CODESA, Av.Getulio Vargas No. 556, Vitoria, Espirito Santo, CEP 29000, Brazil. *Tel:* (027) 222-1311. *Telex:* (027) 2118. *FAX:* (027) 222-7360. *Contact:* Dirceu Cardoso, Director.

RIO DE JANEIRO: 22.54 S. 43.12 W. (See Plan)

(A) GENERAL CARGO SECTION.
(B) TANKER SECTION.

(A) GENERAL CARGO SECTION

LOCATION: The port of Rio de Janeiro is located geographically in the inlet on the coast (Western) of the Bay of Guanabara, in the city of Rio de Janeiro, capital of the state of Rio de Janeiro.

DOCUMENTS: See "General" before first port.

CLEARANCE: All clearance is taken care of at the Quarantine Anchorage (Pratique, Custom's, Immigration). Accommodation ladder must be rigged for this purpose.

Shipmaster's Report: Clearance also carried out alongside.

After clearance by the Customs a dark blue flag with a white five-pointed star in the middle must be shown day and night during vessels stay in port. Derat service is available. Inspection of the vessel will be made by inspectors to whom the valid derat or derat-exemption certificate must be shown.

PILOTAGE: The pilotage service is compulsory for national vessels of more than 42 ft. length and for foreign craft of more than 37 ft. length, in the following situation: From the Waiting Zone, in the anchorage (about 2 nautical miles to the North of Rasa Island), for any anchorage within the Bay of Guanabara.

Pilots board vessels at the following geographical point:

Lat. 23° 02′ S., Long. 43° 08′ W.

Requests for pilotage service may be made via the ship's Agent by telephone 24 hours ahead of the ship's arrival, or to Av. Rio Branco No. 4 – Room 1501, there being available a total of 33 Pilots.

Pilots may also be requested by radio, via Station PPR – Radio Rio, operating on frequencies 17,194; 13,105; and 8,364 kHz or via Channel 16 VHF for general call-up. For pilotage and other purposes, using Channels 14 and 12.

ANCHORAGE: The Bay of Guanabara is exceptionally sheltered from all winds encountered in the region. All vessels must pay maximum attention to the large number of areas and sectors where anchoring is prohibited, and which are shown on the nautical charts, and in particular on Brazilian Chart DHN No. 1501.

Permitted areas:

1. Inspection by Customs, Health and Maritime Police:
   Lat. 22° 53′ S., Long. 43° 09′ W.
2. For Warships:
   Lat. 22° 54′ S., Long. 43° 10′ W.
3. For loading and discharge:
   Lat. 22° 53′ S., Long. 43° 11′ W.
4. For LASH and container vessels:
   Lat. 22° 53′ S., Long. 43° 10′ W.
5. For LASH vessel barges:
   Lat. 22° 53′ S., Long. 43° 10′ W.
6. For vessels under repair or waiting for berths:
   Lat. 22° 51′ S., Long. 43° 10′ W. – 43° 11′ W.
7. Vessels carrying explosives:
   Lat. 22° 51′ S., Long. 43° 08′ W.

Prohibited Areas: Areas marked (DHN Chart No. 1501) where vessels must take special precautions:

(a) Anchoring prohibited: Pay attention to aircraft at low altitude during landing and take-off.

(b) Anchoring, fishing and the use of flames prohibited, due to the presence of pipe-lines, liquid gas storage areas, loading and discharge of inflammables.

(c) Anchoring prohibited: Access to the Almirante Tamandre Terminal, of Petrobras S.A.

(d) Prohibited area: No vessel, unless expressly authorised by the Commander in Chief of the Navy, may approach nearer than 200 m. during the day, the islands of Boqueirao, Rijo, Nhanqueta, Milho, Arueiras, Viraponga and Tipiti–acu.

Passage through the Boqueirao Channel is prohibited between sunset and sunrise.

The prohibited area of the Island of Boqueirao is marked by light buoys, painted yellow and orange.

(e) Anchoring is not permitted, due to the presence of various submarine cables, between the Island of Cotunduba and the Cagarras Islands, these cables coming ashore between the Copacabana and Leme Bridges.

(f) Presence of double poles, approximately 20 m. apart, running along the path of the canalisation, enable only small craft to pass.

(g) Anchoring prohibited: Presence of submarine cables and ducting.

(h) Traffic by vessels under the Presidente Costa e Silva Bridge is only permitted between the designated pillars.

Traffic under the main span is exclusively for vessels of more than 40 ft. draft or 50,000 d.w.t.

(i) Area prohibited to navigation, unless expressly authorised: The area including the islands of Flores, Carvalho, Ananas and Mexingueiro is marked by fixed buoys, topped by rectangles painted yellow and orange, containing warning notices.

(j) Area prohibited to navigation, unless expressly authorised.

RESTRICTIONS: Port is accessible to all vessels at all times and states of the tide. Attention must be paid to messages sent by Rio Radio about forbidden areas due to Marine exercises with live ammunition along the coast near entrance to the port.

Access Channel: Access to the port for large vessels is via a channel well dredged to a depth of 17 m., passing close to Copacabana Beach, and to the West of the island of Cotunduba. This channel goes as far as the port basin area, reaching also the oil terminals located inside the Bay of Guanabara. The safety depth located directly to the South of Leme Bridge is 20 m.

The Access Channels to Gamboa, Sao Cristovao, Caju and the Mineral and Coal Area are dredged, respectively, to depths of 10 m., 8.5 m., 6.0 m. and 12 m.

The total length of the main access channel is 18.5 km. There being a distance of 11.1 km. between the outer part of the Bay to the anchorages, and the other 7.4 km. in a Northerly direction, from the anchorages to the Almirante Tamandre Oil Terminal. Depths vary from 20 m. to 35 m.

Access Channel to the Quays:	*Length* (m.)	*Width* (m.)
1. Maua Pier Quay	—	—
2. Gamboa Quay	3,000	250
3. Sao Cristovao Quay	4,000	150
4. Caju Quay	5,000	80
5. PMC Quay (Oil Mineral & Coal)	3,000	150

Manoeuvring Basin: Such basins are located in the actual access channels to the quays. Normally, vessels manoeuvre off the quay and in front of their intended berth. The areas available at the various quays are as follows:

	Length (m.)	*Width* (m.)
1. Maua Pier Quay	400	200
2. Gamboa Quay	3,000	250
3. Sao Cristovao Quay	1,000	150
4. Caju Quay	1,000	80
5. PMC Quay	760	200

MAX. SIZE: No limits for entering port. Draft limited by berth depth.

HEALTH: Vessels from another Brazilian port automatically receive Free Pratique and should not fly quarantine flag. If suspected disease or fever on board it is advisable to cable Agent before arrival. Also see "General" before first port.

RADIO/VHF: Rio Radio, call sign PPR. Working frequencies 17,194; 13,105; and 8,364 kHz. VHF marine radiotelephone is available. Channel 16 for general call, Channels 14 and 12 for Pilot and harbour purposes.

TUGS: There is adequate tow-boat service at Rio de Janeiro varying from 220 h.p. to 1,200 h.p., tariff being divided into sections – 200 h.p. to 600 h.p. and 601 h.p. to 1,200 h.p. The number of tugs to be employed in a service depends on the tonnage of the vessel and/or nature of the berth and respective approaches, as determined by the naval authorities. Ship's lines usually employed.

Requirements: The assistance of tugs for mooring and departure operations is governed by the following rules:

(a) Manoeuvring at the Gamboa and Sao Cristovao Quays:
vessels up to 2,000 g.r.t. no tug.
2,001 to 5,000 g.r.t. 1 small tug.
5001 to 15,000 g.r.t. 1 large and 1 small tug.
15,001 to 30,000 g.r.t. 2 large and 1 small tug.
over 30,000 g.r.t. 2 large and 2 small tugs.

(b) Manoeuvring at the Caju Quay (Warehouses 31 to 33):
vessels up to 2,000 g.r.t. without tug.
2,001 to 5,000 g.r.t. 1 small tug.
5,001 to 15,000 g.r.t. 1 large tug and 1 small tug.
over 15,000 g.r.t. 1 large tug and 2 small tugs.

(c) Manoeuvring at the Mineral and Coal Quay:
vessels up to 2,000 g.r.t. without tug.
2,001 to 5,000 g.r.t. 2 small tugs.
5,001 to 15,000 g.r.t. 2 large and 1 small tug.
over 30,000 g.r.t. 3 large and 1 small tug.

(d) Manoeuvring at the Petroleum Terminals, Maua Pier and Docks:
vessels up to 4,000 g.r.t. 1 small tug.
4,001 to 15,000 g.r.t. 1 large and 1 small tug.
15,001 to 30,000 g.r.t. (loaded) 2 large and 1 small tug.
15,001 to 30,000 g.r.t. (in ballast) 2 large tugs.
over 30,000 g.r.t. (ballast) 3 large tugs.
over 30,000 g.r.t. (loaded) 3 large and 1 small tug.

The following must also be observed:

1. All vessels (tankers) manoeuvring at quays which are not terminals will be assisted by tugs as shown in section *(d)*.
2. The requirements in sections *(a)*, *(b)*, *(c)* and *(d)* will apply when the manoeuvre is effected under normal conditions.
3. In abnormal conditions, and according to the Pilot's judgement, other necessary measures will be adopted to ensure safety of the manoeuvre.

4. When a vessel is manoeuvring with the aid of a tug, the Pilot may call for a further tug with power compatible with the requirements of the manoeuvre.
5. A tug will be considered as large where its power is in excess of 600 h.p.

BERTHING: Berth usually accessible day and night. Ratguards obligatory.

For vessels loading iron ore, it is important that hatch coamings are not higher than 31 ft. above the water-line in order to pass under the loading belt.

Berth	*Length* (m.)	*Depth* (m.)	*Use*
1	150	9.1	General cargo, containers, steel
2	150	9.1	General, steel, chemical products, containers
3	150	8.3	General, steel, chemical products, containers
4	150	8.2	General, steel, containers
Maua 1	165	7.3	General cargo, containers
Maua 2	160	10.0	General cargo, steel, coal, minerals, containers, vehicles
Maua 3	160	9.2	General cargo, coal, chemical products, containers and new vehicles
Maua 4	160	8.3	General cargo, containers, steel, new vehicles
5	280	8.8	General cargo, steel, wheat, containers
7	150	9.1	General cargo, steel products, chemicals, containers
8	150	10.3	General cargo, steel, coal, containers
Frigorifico	150	8.5	General cargo, steel, containers
10	150	8.8	General cargo, steel, containers
11	150	9.1	General cargo, steel, containers
12	150	8.3	General cargo, steel, containers
Patio 8/9	150	9.2	General cargo, steel, fertiliser, coal, minerals, containers
13	150	7.4	General cargo, steel, containers
14	150	7.9	General cargo, steel, containers
15	140	9.0	General cargo, steel, lubricating oil, containers
16	140	8.8	General cargo, containers
17	140	8.2	General cargo, containers
18	140	7.2	General cargo, containers
22	240	7.1	General cargo, wheat, coal, minerals, salt, containers, Ro-Ro
Terminal de Sal	120	8.5	Coal, salt, containers
Parque de Carvao	790	8.0	General cargo, steel, fertiliser, chemical products, containers, Ro-Ro, new vehicles, coal, minerals, lube oil
30	100	7.0	General cargo, steel, containers, Ro-Ro
31	200	5.6	General cargo, containers
Parque de Inflamaveis	550	6.4	General cargo, steel, petroleum, vegetable oil, chemical products, containers
Parque de Minerio	480	12.0	General cargo, minerals, containers
Parque de Minerio	280	13.0	Steel products and minerals

Report: Companhia Docas do Rio de Janeiro advised the following in March 1990.

Quay	*Length* (m.)	*Depth* (m.)
Pier Maua	680	8.8–10.0
Cais da Gamboa	2,995	9.0–10.0
Cais de Sao Cristovao	1,275	6.0–8.5
Cais do Caju	873	5.0–6.5
Cais do PMC	285	11.0–12.0
Container Terminal	480	12.5

CARGO FACILITIES:

Passenger Station: 1 with an area of 2,035.5 sq.m.
Storage Areas: Covered (14) with an area of 14,215.95 sq.m.
Open – (20) with an area of 1,149,298.40 sq.m.
Warehouses: Internal – 22 with a total area of 93,600 sq.m.
External – 9 with a total area of 66,724 sq.m.
Refrigerated: area of 27,864 sq.m., volumetric capacity of 66,240 cu.m. or 15,200 tonnes.
Passenger Station – 1 with an area of 2,033 sq.m.
English Mill Area – 1 with an area of 2,033 sq.m.
Silos:
Rio de Janeiro Mill:
1 with 24 cells with 6,000 tons capacity
1 with 40 cells with 12,000 tons capacity
1 with 17 cells with 20,000 tons capacity.
Da Luz Mill:
1 with 42 cells with an individual capacity of 320 tons and a total of 15,000 tons.
Guanabara Mill:
10 with 1,500 tons capacity each.
2 with 380 tons capacity each.

Observation: There are 5 suction units for wheat discharge, with a nominal capacity of between 70 t.p.h. and 160 t.p.h.

Terminals:
Minerals:
Movement capacity: 60,000 tons per day.
Storage capacity: 250,000 tons
Normal removal rate: 6,000 t.p.h.
Length of transport conveyors: 2,129 m.
Salt:
An area of 2,157 sq.m.
Containers:

Container handling occurs as far as Caju Quay, and the areas adjacent to internal warehouse Nos. 30, 31, 32. Warehouse No. 32 (internal) is used for containerised cargo and has a total area of 50,000 sq.m.

Container discharge can be effected on all quays intended for deep sea and coastal vesels, i.e. from the Maua Pier as far as internal warehouse No. 18.

When a container is discharged on to the quay, this occurs onto trucks which go to the Terminal Area which can accommodate up to 2,673 units (including 270 reefer containers). The equipment used for container discharge and handling comprises 2×32 ton portainers, 2×32 ton transtainers on rails, 4×10 ton forklifts, 6×32 ton top loaders and various supporting equipment.

Also, the Caju Quay has facilities for loading and discharge operations of "LASH" type vessels. At the end of this quay, there was recently constructed a terminal for Ro/Ro vessels for intermodal purposes. Also, on the Caju Quay, there is an area for storage of heavy lifts, covering 29,272 sq.m.

EQUIPMENT:

Cranes: Jib – 96 with capacities from 3 tons to 40 tons.
On tyred wheels: 10, with capacities from 30 tons to 150 tons.
Railborne: 1 of 12 tons.
Stacker Trucks: 161 with capacities from 3.5 tons to 37 tons.
Winches and Floating Cranes: Winch "Piaui" with 250 tons capacity; Winch "Presidente Castelo Branco" with capacity of 200 tons.
Tractors: On tyred wheels: 10 with capacity of 50 tons to 100 tons traction
Track Mobile (Road/Rail): 6 with capacity of 700 tons to 1,500 tons traction.
Lorries: 40
Trucks: 19, from 20 tons to 40 tons.
Mechanical Shovels: 8, from 2.5 cu. yards to 4 cu. yards.
Grain Suction Units: 3×300 t.p.h., 2×70 t.p.h. (portable).
Rolling Bridges: 196, from 1.5 tons to 2 tons.
Launches: 4 with power from 35 h.p. to 150 h.p.
Locomotives: 17, with capacity from 550 tons to 1,500 tons traction
Underground Crushers: (for minerals): 1 for 2,000 t.p.h. (discharging 2 wagons at once); 1 for 4,000 t.p.h. (discharging up to 6 wagons at once).

STEVEDORES: Cable Agent ETA 36 hours before arrival in order to arrange gangs required. When arriving during week-ends or on Monday, Agent needs ETA on Friday afternoon. Loading/discharge rates:
General cargo cases 7 to 8 tons per gang/hour.
Bags 15 tons per gang/hour.
Grain in bulk 1,000 tons per eight hours.
Coal in bulk 7,000 tons per day.
Loading iron ore 25,000 tons per day.

MEDICAL: All facilities available. If doctor needed on arrival or making emergency call to land sick persons, cable ETA 12 hours before arrival.

TANKERS: See "Section – B".

DENSITY: Salt water at entrance to bay. Further inland water often brackish, and density varies with tide.

FRESH WATER: Available alongside from 87 points, loading rate 50 t.p.h. Also available by barge, capacity 450 tons, loading rate 100 – 200 t.p.h.

FUEL: Available by barge at anchorage. Rate for fuel oil 350 t.p.h. and gas oil 200 t.p.h. Also see "General" before first port.

CONSULS: Most countries have consuls in Rio.

REPAIRS: All types deck and engine repairs can be effected. Five dry docks. Largest dry dock, length 259 m., breadth 34 m., max. draft 14 m.

WATCHMEN: Gangway watchmen strongly recommended for any vessels working cargo with shore labour on board. Watchmen from shore not necessary for coal, iron ore, and oil cargoes.

PIRACY: Two crew members were killed when a vessel was raided in February 1992. The vessel was at anchor near the Petrobras Terminal. The pirates were armed with machine guns and pistols.

CUSTOMS ALLOWANCES: Each crew member allowed 2 cartons of cigarettes and one bottle wine or spirits.

AIRPORT: Santos Dumont, in the centre of the city, and Rio de Janeiro International, located on Governor's Island (Ilha do Governador).

POLICE/FIRE/AMBULANCE: Police 190; Maritime Police 263-3747; Ambulance 222-2121; Fire 232-1234.

HOLIDAYS: Requests for operational services for these days must be made in advance (minimum of 24 hours). The only holidays not worked are 1st May and 2nd November.

Fixed:

National:		Regional:
	1st January	20th January
	21st April	
	1st May	
	7th September	
	12th October	
	25th December	

Movable:

Monday and Tuesday of Carnival
Ash Wednesday
Good Friday
Corpus Christi

Commemorative Days:

28th January (Port Day)
2nd November (All Saints')

Federal and State Government Departments, as well as banks, do not work on Saturday.

TIME: GMT minus 3 hours.

TELEPHONES: Available at Warehouses 1–8 on request to the Brazilian Telephone Company.

SHORE LEAVE: Shore leave is permitted.

IDENTITY CARDS: Foreign crew members not permitted to go ashore without presentation of identity card, on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police who will return it to the crew member on re-embarkation.

GENERAL: Vessels to fly signal letters when manoeuvring in port and special Brazilian Customs flag after reception.

Charts: Brazilian Charts No. 1501, 1511, 1512 and 1531.

DEVELOPMENTS: Caju Quay is being widened and dredged to 12 m. to provide 2 Roll-on/Roll-off berths, 1 sulphur and salt berth, and 1 heavy lift general cargo berth.

SHIPMASTER'S REPORT: 1980.

Clearance: Clearance of vessels undertaken at quarantine anchorage and alongside.

Identification Cards: Identification Cards required for foreign crews but no picture necessary. Cards must be shown when leaving and entering the dock.

Visitors: No unauthorised persons are allowed on board. If unauthorised persons found on board, heavy fines are imposed.

Entering and Leaving: When entering and leaving at night, the full name of the vessel has to be flashed on the Aldis Lamp to the naval signal station. No VHF communications available.

Ratguards: Should be in place when alongside.

Flags: At all ports in Brazil the Authorities are very strict about flying of flags (no tangles). The "G" flag and "H" flag should be flown when Pilot required or on board.

AUTHORITY: Companhia Docas do Rio de Janeiro, Rua Acre No. 21, 4° Andar, CEP – 20.081 Centro Rio de Janeiro, R.J. Brazil. *Tel:* (021) 233-4522. *Telex:* (021) 22163 CDGB. *Contact:* Pedro Batouli, President.

(B) TANKER SECTION

All information refers to the "Petrobras Terminal – DTSE-GEGUA" *unless otherwise stated.*

LOCATION:

DTSE-GEGUD is an oil terminal consisting of 5 different mooring sites all of them located inside Guanabara Bay.

These 5 mooring sites are linked to Ilha d'Agua and then to the mainland (Duque de Caxias Refinery-Reduc) by submarine pipe-lines.

South Dock-Island (main)
Lat. 22° 49.2′ S. East Berth (PP1) or
Long. 43° 09.2′ W. West Berth (PP2)
North Dock-Island (secondary)
Lat. 22° 38.3′ S. East Berth (PS1) or
Long. 43° 09′ W. West Berth (PS2)
Ilha Redonda Pier
Lat. 22° 48.1′ S. West Berth (IR)
Long. 43° 07.2′ W.

IMPORTANT FEATURES:

1. Five mooring berths, in the vicinities of Ilha do Govenador (the largest of Guanabara Bay), are available for loading and discharging of crude oil, derivatives and LPG.
2. Pilotage is compulsory for any shifting inside the bay.
3. Safety Rules are strictly enforced.
4. Display of quarantine signal – "Quebec" flag – must be maintained until Free Pratique is granted.
5. Neither in port nor in Brazilian coastal waters may dirty ballast be pumped overboard.
6. Emergency signal consists of a series of short blasts followed by a long one on the ship's whistle or siren.
7. Tankers up to 135,000 d.w.t. operate at the terminal. Draft is 15.85 m. (52 ft.) or below at LW.

Remarks: Non-compliance of item 7 above stated will result in rejection of the ship as being unsuitable for this terminal.

DOCUMENTS:

Immigration and Maritime Police: The following documents have to be submitted to the boarding Maritime Police Officials:

1 copy Crew List.
1 copy General List.
3 copies Passengers List.
3 copies Passengers-In-Transit List.

Health: The following documents have to be submitted to the boarding Health Officials:

1 copy Vaccination List.
1 copy Certificate of Derat Exemption.
1 copy Maritime Health Declaration.
1 copy List of Drugs and Narcotics.
1 copy Passengers-in-Transit List.
1 copy Passenger List.

Customs: The following documents have to be submitted to the boarding Custom Officials:

3 copies Crew List.
3 copies Spare Parts List.
3 copies Stores List.
3 copies Provisions List.
3 copies Drugs and Narcotics List.
(if not included in the Stores List).
1 copy Cargo Manifest.
1 copy Bills of Lading.
2 copies Passengers List.
2 copies Passengers-In-Transit List.
3 copies Crew Personal Effects List.
3 Passengers Personal Effects List.

Note: Supplies, stores, cigarettes, cigars, tobacco, alcoholic beverages, arms, ammunitions, souvenirs, playing cards, drugs and narcotics, medicines (not in use) etc., must be kept under lock and key; the doors of the storage rooms will be sealed by the Customs Officials and the seal must be kept unbroken throughout the vessel's stay in port.

Any goods or personal effects omitted from the lists may be confiscated.

Extracts of Sea Protest drawn out from the Log Book must be submitted to the boarding Customs Officials in case of accident which has caused damage or loss of cargo or part of it.

Ship's Agent: The ship's Agent will need the following documents:

3 copies Passengers List.
3 copies Passengers-In-Transit List.
3 copies Crew List.

The Agent will take care of necessary steps in order to grant the Disembarkation Cards.

Leaving Clearance: Masters must appoint their ship's Agent at Rio de Janeiro and have their International Safety Certificates in force. It is also necessary for vessels Leaving Clearance:

Leaving Permit from Customs.
Leaving Permit from the Captain of the Port.
Leaving Permit from the Maritime Police.
Leaving Permit from Brazil Mail (Passe de E.C.T.).

General: The Customs flag (blue with a white star) must be flown from the vessel's mast or yard throughout the vessel's stay in port.

Special licence from the Captain of the Port must be granted for passengers bound for foreign countries and so their names must be given and their passports must be delivered to Agents at least 48 hours before they apply for the vessel's leaving permit.

The number of disembarking passengers must be radioed to Agents at least 24 hours before the vessel's expected time of arrival.

APPROACHES: The safe access to the Terminal is made through a main (deep but narrow) channel swept to 17 m. (55 ft. 9 in.) that begins between the Island of Cotunduba and the Point of Leme. It extends as far as the East neighbourhood of the South Dock-Island East Berth. As long as the ship does not exceed 11.3 m. (37 ft.) draft, the access can also be undertaken through the North – South axis passing by Ilha Cotunduba and the bar's entrance (secondary entry, larger but shallower).

A long bridge (Rio-Niteroi), linking Ponta do Caju (West) to Ilha do Mocangue Grande (East) it crosses the swept channel. Three navigable spaces: – the central one 270 m. (886 ft.) wide; 63 m. (206 ft.) high at MLWS, the side ones with 170 m. (557 ft.) in width – will maintain the safe access for ships.

A shoal (reef) in 11.5 m. (38 ft.) deep lies about 0.3 m. E.N.E. of Lage Is. just after the bar's narrow entrance (between Sao Joao and Santa Cruz Points).

A wreck marked by a green buoy (CS) lies sunk nearly 1.3 miles Eastward of Cotunduba Island.

When approaching the coast of Guanabara Bay entrance, vessels should keep a particularly sharp lookout for fishing boats and small craft.

ANCHORAGE: Vessels should anchor N.E. of Ilha Fiscal for port authorities clearance (Lat. 22° 53′ S., Long. 43° 09′ W.). After Pratique has been granted they should change anchorage site while awaiting for a berth alongside.

Vessels should anchor clear of the 17 m. (56 ft.) swept channel. They must take care to avoid dropping their anchors on the route of submarine cable near to a line joining the islands of Villegagnon and Boa Viagem.

For further information refer to Brazilian Charts No. 1501, 1511 and 1512 (DHN-Navy Hydrographic Office).

Prohibited Anchorage: Under no circumstances should ships drop anchor Westwards and between South and North platforms due to the existence of submarine pipe-lines connecting Ilha D'agua to the platforms and to Ilha Redonda.

Ships are also prohibited from anchoring in the fairway of the ferry boats plying between Rio and Niteroi.

Also see "Pilotage".

READINESS: The time of readiness, according to the contract, is usually considered the time the vessel reaches the anchorage area beyond the Rio-Niteroi Bridge or the time the vessel berths at the pier, as soon as the mooring work is finished. Notice of Readiness will be accepted at the time the tanker is in all respects ready to operate.

PILOTAGE: Pilotage is compulsory after the ship's Free Pratique has been granted.

Request for pilotage service may be made either to the Harbour Pilot's Working Co-operative (Pilot Station VHF Radiotelephone – Channels 16 and 12. Listening period from 0600 to 1800 hrs. local time) or, through ship's Agent, 24 hours beforehand.

For ships of any tonnage and draft of more than 37 ft. (11.30 m.) coming from South, pilot position is at Lat. 23° 00′ 00″ S., Long. 43° 08′ 48″ W. Coming from the North, the pilot position is Lat. 23° 00′ 00″ S., Long. 43° 06′ 12″ W.

For tankers less than 11.30 m. (37 ft.) draft, Pilot embarks beyond Sta. Cruz Point on the Villegagnon Lighthouse and Boa Viagem Island alignment.

A pilot ladder must be safely rigged for immediate use and be long enough to reach the Pilot's launch. At night adequate lighting must be rigged so as to enable the Pilot to approach and board the vessel. In addition, a boat rope should be led along the side, from well forward.

A lifebuoy with 27 m. (15 fathoms) of rope must be conveniently placed in the vicinity of gangway for use in emergency. Vessels should always make a lee.

Tankers of 40,000 d.w.t. or over are requested to have a pilot ladder (preferably with a centre gripping line) rigged alongside the accommodation ladder in order that the Pilot may transfer to it after about 2 m. to 3 m. (6 ft. to 10 ft.).

RESTRICTIONS: Ships usually moor and unmoor at any hour except when an unexpected event arises, such as breakdowns, gales, heavy squalls, etc.

See "Pilotage".

TIDES: *Tide and Tidal Currents:* The mean tide level at Rio de Janeiro is 0.69 m. (2.2 ft.), Spring range 1.38 m. (4.5 ft.). The usual rate of the tide is about 0.7 knots; Springs run at 1.5 knots. The ebb runs much longer than the flood, especially after heavy rains.

MAX. SIZE: Tankers up to 135,000 d.w.t. will operate in the terminal. Draft is 15.85 m. (52 ft.) at low water.

Berthing capacity is limited by structural resistance of installation, actual depth of the swept channel and weather conditions.

South Dock Island (Main)

East Berth (PP1) – Tankers up to 135,000 d.w.t. drawing up to 15.85 m. (52 ft.) draft can moor and unmoor at any time.

Structural resistance of pier was designed to handle tankers up to 105,000 d.w.t. but under special conditions this limit can be extended to 135,000 d.w.t.

West Berth (PP-2):

(a) During the daylight hours, berth can receive tankers up to 135,000 d.w.t. drawing up to 12.00 m. (39.37 ft.) at low water. Berthing is starboard side alongside.

(b) Tankers up to 90,000 d.w.t. will be unberthed at any time during the day or night. Max. draft 12.80 m. (42 ft.) at low water.

(c) Tankers up to 35,000 d.w.t., drawing 11.00 m. (36.08 ft.) maximum, will be berthed or unberthed during the night or the daytime, arriving or sailing from North or South of the pier.

(d) Tankers up to 35,000 d.w.t. with draft from 11.00 m. (36.08 ft.) up to 13.00 m. (42.65 ft.) will be berthed starboard side alongside during ebb tide.

Note: After sunset, the unberthing for sailing is limited to 11.30 m. (36.08 ft.) maximum draft for both berths, and is the access channel limitation.

Shifting ship from East to West Berth only by daylight, draft 12.8 m. (42 ft.), fair weather and wind speed up to 2 Beaufort.

North Dock-Island (Secondary)

East Berth (PS1) – Tankers up to 35,000 d.w.t. can moor either by day or night.

At low tide, the maximum draft permitted is 10.4 m. (34 ft.).

West Berth (PS-2):

(a) Same as PS-1, can receive tankers up to 35,000 d.w.t., but limited to 8.50 m. (27.87 ft.) draft.

(b) Tankers up to 10,500 d.w.t. and 8.50 m. maximum draft will be manoeuvred at any time of the day or night.

Ilha Redonda Pier (IR):

Pier suitable to receive tankers with refrigerated LPG, semi-refrigerated and pressurised plants.

(a) Pier can receive tankers up to 25,000 d.w.t. drawing 8.50 m. (27.89 ft.) maximum draft and 200 m. (656 ft.) LOA.

(b) Tankers up to 6,000 d.w.t. with 6.50 m. (21.33 ft.) maximum draft can unberth at night-time if it is moored port side alongside.

(c) Tankers of more than 190 m. (623.37 ft.) LOA shall berth during daylight hours only.

HEALTH: *Free Pratique:* Vessels must anchor N.E. from Ilha Fiscal for Port Authorities clearance. After Free Pratique is granted vessels must change anchorage for waiting.

Free Pratique must be requested 24 hours prior to arrival via the ship's Agent.

Vessels must remain at anchorage clear of the 17 m. (56 ft.) swept channel, and take good care not to drop anchor in the vicinity of the submarine cables along a line joining Pta. do Calabouco and Pta. Gragdata.

RADIO: *Arrival Advice:* Vessels chartered to Petrobras bound for Rio de Janeiro or vessels coming to operate in one ofthe three DTSE/GEGUA Terminals, shall advise ETA 72 hours, 48 hours and 24 hours before arrival, directly to ship's Agent via PPR-Radio Station, telex or fax.

Ship and Cargo Information List: The ship must send to the Terminal GEGUA/GINAV through the Agent 24 hours in advance of arrival, via telex or fax, the following information:

(a) Ship's name.
(b) Flag.
(c) Master's name.
(d) LOA.
(e) D.w.t.
(f) Beam.
(g) Depth.
(h) If vessel has IGS and if operational.
(i) Cargo on board, quantity and grade.
(j) Time requested and maximum rate for unloading.
(k) Cargo required and maximum rate for loading.
(l) Ballast or slops grade and quantity.
(m) Time for pumping ballast or slops.
(n) Loading/unloading can be concurrent with ballast/deballast.
(o) Arrival and sailing drafts, in metres.
(p) Bunker type and quantity requested.
(q) Fresh water quantity requested.

VHF: The terminal radio and communication centre is located in the Oil Handling Control Room situated at Ilha D'agua. There is a R/T set operating 24 hours a day, on Channel 16 (Delta) and manned by terminal operators.

It is strictly prohibited to use vessel's wireless transmitters in the port of Rio de Janeiro.

Non-compliance with this regulation may result in a fine being imposed on vessel by the authorities.

Transmitters: Radar and radio transmitting aerials must be switched off and grounded when ships are at berth. VHF communications with terminal and stand-by tug are permitted.

TUGS: Tugboat assistance is rendered by 3 Petrobras tugs. Private tugboats are also available. While rendering such assistance tugs act under the orders of the Harbour Pilot. All manoeuvring orders will normally be given by VHF telephone on Channel 13 (Alpha). However they usually keep watch on Channel 16.

The tugs are usually stationed either at the terminal dolphin or "L" pier on Ilha D'agua and also in the Port of Rio de Janeiro. The Pilot in consultation with the Master, will decide the number of tugs required for each berthing or unberthing operation. Safety of the Terminal installations demands, at least, two tugboats, even for bow thruster equipped ships. In any case, all recommendations of Port Authorities must be followed.

BERTHING: *Petrobras:* DTSE-GEGUA is an oil terminal consisting of five distinguished mooring sites located on different places inside the Guanabara Bay.

All these mooring sites are linked to Ilha D'agua and then to the mainland (Duque de Caxias Refinery – REDUC) by submarine pipelines. Three of them are dock-islands, i.e. island-type offshore platforms lying near to the Eastern edge (about half mile away) of Ilha D'agua (where storage tanks, operation controlling room and part of the administrative staff are placed). Two of these dock-islands are squared platforms (South and North) with two berths each (East and West). The South one is designed for larger tankers consisting of two mooring and two breasting dolphins on each side of the platform. It is normally used for the discharge of crude oil.

The North Dock-Island (smaller) has only two mooring dolphins on each side. Two berths (East and West) are also available. It is generally used for handling derivatives.

Besides these mooring berths, there is a berth located on Ilha Redonda (approx. 2 miles E.N.E. of Ilha D'agua). This installation comprises one single berth (West), head of a small pier. It handles LPG only. Four spherical storage tanks (7,000 tons) and 3 cylindrical (refrigerated) storage tanks (20,000 tons) can easily be seen from incoming vessels.

Recommended Mooring: Vessels, which moor at the berths of Petrobras Terminal DTSE/GEGUA, should adopt and follow the underlined standards for mooring, even though the adequate ship mooring is the Master's responsibility, also the interest of the Terminal to ensure that tankers are safety moored.

Main Pier:

Tankers more than 60,000 d.w.t.:
Forward: 4 head lines, 2 springs and 3 breast lines.
Aft: 4 stern lines, 2 springs and 3 breast lines.
Tankers less than 60,000 d.w.t.:
Forward: 3 head lines, 3 breast lines and 2 spring lines.
Aft: 3 stern lines, 3 breast lines and 2 spring lines.

Secondary Pier:

Tankers up to 35,000 d.w.t. are recommended to use the following moorings:
Outer and inner berths:
Forward: 3 head lines, 2 breast lines and 2 spring lines.
Aft: 3 stern lines, 2 breast lines and a spring line.

Ilha Redonda Pier:

Forward: 3 head lines, 1 breast line and 2 spring lines.
Aft: 3 stern lines, 1 breast line and 2 spring lines.

In special cases, when ship length is more than 200 m., it is recommended to double the breast line.

Standards:

(a) The ropes used in same direction should always be of same type, same standard and same material.

(b) If tails are used on wire ropes, the tails must be same size, same standard and same material.

(c) Moorings must be arranged symmetrically with regards to amidships.

Other Terminals: *Manguinhos Terminal* – Operators: Refineria de Petroleo de Manguinhos. At Manguinhos terminal a draft of 36 ft. is permissible. Conventional buoy berth in which two ship's anchors and four buoys are used, one on starboard forward of the bow and three buoys aft. Two ship's lines run to each buoy. The terminal is situated in the inner harbour of Rio de Janeiro and close to the quays. Three 8 in. hoses from an underwater pipe-line are connected to the ship's manifold. Maximum back pressure is 100 p.s.i., at the ship's rail. Discharge rate is about 1,000 t.p.h. Care is to be taken that the vessel shall not exceed a draft of 40 ft. during discharge. Bunkering is permitted when discharging cargo.

Riberia Terminal – depth alongside 30 ft.
Shell Terminal – " " 31 ft.
Texaco Terminal – " " 29 ft.

CARGO INFORMATION: *Terminal Facilities:*

South Dock-Island (PP): Loading/Discharging.

	Lines			*Hoses/Arms*		*Max.*

	1	8	300**	1	10	260
Butadieno	1	12	200***	1	10	260

* Refrigerated. **Pressurised. *** Semi-refrigerated.

LOADING: Before any loading commences, the Officer on watch may be invited to be present at the sample taking from the shore pipe-line that will be used for the oil handling. Likewise, after the first 150 cu.m. have been loaded (about 20 minutes) a new sample will be taken. From such a sample the ship will receive 2 sealed and tagged bottles containing the cargo.

At the beginning of diesel and kerosene loadings the vessel should concentrate the product in a single tank. As soon as the innage reaches 0.70 m. high, then other tank valves may be switched. From that part of the cargo a sample is obtained and tested in the laboratory, if the results stand between acceptable stated specification limits, loading will go on without any drawbacks. During the loading of this first tank, the ship is requested to flush her pipes with the same grade being handled.

Discharge of high pour point (HPP) oils will be regarded separately (as far as minimum pumping temperatures are concerned) in conformity with oil and ship characteristics.

A time sheet form will be given to the ship's Master upon arrival. The form is regarded as a receipt for information on operational procedures, oil to be loaded, etc.

Hose Connection: Pier crews are on duty continuously to handle oil hoses/arms and mooring lines. Mooring lines on board vessel will not be handled by Petrobras personnel.

Permitted Freeboard: Vessels are advised not to exceed the safety arm load limits, this should keep the freeboard such that the arms do not suffer any damage.

The maximum height when moored is:

Main Pier – 15.60 m. (51.16 ft.) at the ebb tide.

Secondary Pier – 14.0 m. (45.92 ft.) at the ebb tide.

Ilha Redonda Pier – the maximum height is 19.0 m. (62.32 ft.).

Manifolds Watchman: One ship's accredited crew member must at all times be near the manifold of the side that is operating, to ensure permanent communication with the Terminal operations.

MEDICAL: Medical treatment and/or hospitalisation, if required, is provided in local clinics. Dentists are also available. For emergency cases (serious illness or injury) first aid may be requested by the Master via VHF or internal telephone.

FRESH WATER: Facilities may be arranged to supply water in North and South platforms only. Water supplying barges are also available.

FUEL: The Terminal can supply any type of bunkers such as Bunker C, MGO, MDO and MF, with different viscosities at international prices.

The request should be sent 72 hours before ship's arrival, to PETROBRAS-DECOM (Commerical Dept.) and Dinav (Ship Bunker Division) through the Agent. Telegraphic address: Petrobunker. Telex: 021-23335 Petrobunker. Fax: 021-2628134. Tel: 021-5343292.

The supply rates are about 200 t.p.h. for fuel oil, 180 t.p.h. for diesel oil and 200 t.p.h. for intermediates.

Orders for bunkers should be placed, a minimum of 48 hrs. in advance, to: Marine Fuel Division, Commercial Department. Telegraphic Address: Petrobrasecope. Telex number: 031422 or 031423. Rio de Janeiro – Brazil.

Lubricating Oil: Marine lubricant orders should be placed a minimum of 3 days in advance for foreign vessels and 5 days in advance for national vessels, to: BR – Nucleo Maritimo, Praca 22 de Abril No. 39, 7th Floor, Centro, Rio de Janeiro, Brazil, Postal Code: 20.021-370. Telex: (021) 213-0853 BR-Nucleo Maritimo. Fax: (021) 217-8240. Tel: (021) 217-8139.

Note: Requests via Agent to be made 3 days before arrival.

BALLAST: All ballast should be pumped to the terminal slop tanks. Under no circumstances should it be pumped into the sea even if the ballast is said to be clean. As soon as the ship is moored, the Terminal Representative must be told of the quantity of ballast on board and the estimated time to pump it out. Right after discharging a sludge ballast of high pour point (HPP) oil, tankers are asked to flush the line with water from the main suction inlets. The Terminal Representative must be notified 30 minutes before the ship will be out of ballast.

There are two sludge tanks with a total capacity of about 17,000 cu.m. The terminal is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels.

REPAIRS: Repairs of all kinds can be effected in Rio de Janeiro. There are floating cranes with a capacity of 100 tons. Divers service may be obtained.

Repair and maintenance services for radar, radio, satellite navigator, gyro compass, echo-sounder, etc., are available. The repair man should be contacted through ship's Agent.

DRY DOCKS: Dry Docks to hold ships up to 33,000 d.w.t. are available.

SURVEYORS: Lloyd's Register of Shipping, DV Norske Veritas, American Bureau of Shipping and Bureau Veritas have representatives in Rio de Janeiro. Advance notice should be given in order to arrange for an appointment.

Cargo Inspectors: E.W. Saybolt & Co., Rua Bras Cubas, 3 11.100 – Santos – SP. Tel: 4-6638.

SGS do Brasil S.A., Av. Pres. Vargas 446, 13° Andar, 20.071 – Rio de Janeiro – RJ. Tel: 223-1252. Telex: (021) 23.588.

GANGWAY/DECK WATCHMEN: Port watchmen are compulsory on all vessels coming from overseas throughout the vessel's stay in port.

PIRACY: Two crew members were killed when a vessel was raided in February 1992. The vessel was at anchor near the Petrobras Terminal. The pirates were armed with machine guns and pistols.

TIME: GMT minus 3 hours. GMT minus 2 hours in Summer (October to February).

SERVICES: Compass adjustment or radio direction finder calibration can be effected by competent hydrographers and Extra-Masters. Contact Agents or Pilot's station.

SHORE LEAVE: Ship's Crew is not permitted ashore for any purpose whatsoever until Pratique has been granted. Luggage and packages are subject to Customs Official and/or Terminal Watcher's inspection. As a rule shore leave is permitted with the above stated restrictions. Vessels are not permitted to sail unless all crew members are aboard. In case of Seaman left ashore for any reason whatsoever all expenses are for ship's account.

GARBAGE DISPOSAL: Daily collection service by barge. Garbage service: Equiport, Tel: 296-4442.

WASTE OIL DISPOSAL: Waste oil disposal is available at Berths PP-1, PP-2, PS-1 and PS-2. Capacity 20,000 cu.m. Vessels can also deballast at anchorage by barge.

SEAMAN'S CLUBS: The Seaman's Club provides many services. Tel: 233-9691 (24 hours).

CURRENCY: Real. U.S.$ 1.00 = R$ 1.00.

GENERAL: *National Flag:* The Brazilian flag must be flown daily from 0800 hrs. until sunset and when arriving and leaving port.

Turnround: To promote the economical operation of their vessel, Masters are requested to co-operate with Terminal Representatives in minimising their in-port time. Vessels requiring excessive time to complete operations will be given Letters of Defficiency (Protest).

Gangway: All vessels using the port of Rio de Janeiro must provide a safe gangway. The use of rung ladders (sea ladders) is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder. A lifebuoy with 27 m. (15 fathoms) of rope must be conveniently placed in the vicinity of the gangway for use in emergency. It will be the responsibility of ship to provide and maintain this equipment.

At night, the gangway must be adequately lit. In addition, a boat rope should be led along the side, from well forward. A special safe gangway will be provided in the South and North Dock-Islands.

Stores: Provisions and stores are available. Requisitions should be conducted through the Agents. Ship chandlers are normally permitted to visit ships when specifically instructed by Agent.

Launches: Launch service for the transportation of personnel ashore must be arranged through ship's Agents.

Laundry: Laundry service is available each working day. Such service should be requested in the vessel's ETA message to Agents.

Photographing: The taking of photographs within the boundary of the terminal premises is prohibited.

Ratguards: Ratguards must be fitted to all mooring lines.

Sea Pollution: Brazilian law is very strict in regard to the pollution of harbour and coastal waters. Vessels should not discharge dirty ballast, ashes, refuse, etc., into the water. Heavy fines are imposed for violations. All overboard discharge valves from cargo tanks and bilges are to be conducted with the greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged to avoid harbour contamination should an oil spill occur.

Similarly, any hull leakages will be subject to equal restrictions. To offenders, fines will be charged (besides resulting delay) according to ship's tonnage, i.e. 2% of the largest country's minimum wage per each ship's (gross) ton.

Emergency Towing Wires: Two towing wire ropes (fore and aft) should be hung overboard to the water's edge in such way that tugs can easily make fast if an emergency situation arises.

Cleaning: Several contractors in the area provide labour for tank cleaning and mopping. Masters having need of this service should submit their requirements to ship's Agent who will contact and request a contractor to go on board to discuss details and estimate cost of work to be effected.

It must be pointed out that the Master of the vessel is solely responsible for the fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contaminations of the cargo after loading, due to inadequate tank cleaning. Therefore it is up to him to decide the degree of tank cleaning necessary. He may, of course, seek advice from petroleum inspectors in this respect, whenever there is any doubt.

Charts: Brazilian No. 1501, 1506, 1511 and 1512. U.S. No. 24161 and 24162; British Admiralty No. 541.

Customs Watches: Sometimes while vessel is in port, Brazilian Customs Officials are assigned on board to ensure compliance with Customs Regulations. Meals must be supplied to these Officials during regular meal hours.

Important Telephone Number (PABX): Terminal's Executive Assistant, Operation Manager, Operation Supervisor, Marine Section, Safety Section and Medical Section 396-1515 (24 hours)

DEVELOPMENTS: A new berth is being built on Pombeba Island and dredged to 12 m. This is intended to relieve Ilha de Braes Port.

AUTHORITY: Petroleo Brasileiro S.A. – Petrobras, Avenida Republica do Chile, 65 – 12 Andar, Rio de Janeiro, CEP 20.035, Brazil. *Contact:* Divisao de Operacoes (Operations Division), same address as above, 12th floor.

Terminal: Petroleo Brasileiro S.A. – Petrobras, Rua Chapot Prevost 200, Ilha do Governador, Rio de Janeiro, Brazil, CEP 21910-030. *Tel:* (021) 534-6971, 6910, 6917. *Telex:* 55-2123335. *FAX:* (021) 534-6913. *Contact:* The Manager.

AGENT: Wilson Sons Agencia Maritima Ltda., Avenida Rio Branco 25, 7th Floor, 20093-900 Rio de Janeiro RJ. Tel: (021) 296-4422 (After hours: (021) 433-6383). Telex: (21) 22300 SBSV. Fax: (021) 233-2389. Cables: Anglicus.

RIO GRANDE: 32.03 S. 52.05 W. (See Plan)

DOCUMENTS: See "General" before first port.

Shipmaster's Report: 1980.

Also required: 2 Arms and Ammunition Lists, 1 Narcotics List, 1 List of Loading Ports of the Last Voyage with dates of arrival and departure.

PILOTAGE: Compulsory for all vessels entering the Bar or requiring any shifting in the port area. Also compulsory for foreign fishing boats. The Pilot's boarding area outside the Bar is the circular area with one mile radius which centre is the Buoy No. 1 of the Approach Channel.

Requests for a Pilot to be made by Agent, normally 4 hours in advance. Vessels can contact Pilots by VHF Channel 16.

The Pilot's boat is easily identified as it is painted red and is well distinguished from the various boats used in the port.

Priority to enter the Bar: Priority to enter the Bar is established by the anchoring time or arrival time at the outer anchorage or the Pilot's boarding area and vessels should, when anchoring, inform the Port Captaincy, by the 500 kHz. frequency of the coastal station EMBRATEL "PPJ", the name of the vessel, port of registry, port of origin and date-hour of arrival.

When berth is not available and all the inner anchorage areas are occupied, vessels arriving at the Port of Rio Grande should stay outside the Bar.

Pilots: Associacao de Praticagem de Barra Estado R.S., Rua Carlos Gomes No. 742. Tel: (0536) 2-5615.

ANCHORAGE: The official anchorage for vessels arriving at Rio Grande or that have to wait outside the Bar is the circular area within one mile radius, of centre Lat. 32° 12′ S., Long. 52° 02′ W.

In order to increase the safety to navigation on the inner part of the channel, the Port of Rio Grande is divided into six areas as follows:

PERMITTED ANCHORAGE AREAS:

Area Alfa: Available for anchoring of up to maximum four vessels of 200 m. LOA, outside the channel. Vessels over 200 m. LOA have to wait outside the Bar to await berth. In special conditions the Harbour Master may grant permission for those vessels to anchor at that area, to load or discharge, using one floating elevator and one barge.

The area *ALFA* is limited by the following points:

A1 – Lat.: 32° 10′ 00″ S.
– Long.: 52° 05′ 27″ W.
A2 – Lat.: 32° 10′ 00″ S.
– Long.: 52° 05′ 03″ W.
A3 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 05′ 48″ W.
A4 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 06′ 06″ W.
A5 – Lat.: 32° 08′ 24″ S.
– Long.: 52° 06′ 06″ W.

Area Charlie: Available for the anchoring of a maximum of two vessels of up to 180 m. LOA, to load or discharge, using one non-self-propelled floating elevator, or two floating elevators of which one has to be necessarily self-propelled.

The area *CHARLIE* is limited by the following points:

C1 – Lat.: 32° 05′ 10″ S.
– Long.: 52° 05′ 30″ W.
C2 – Lat.: 32° 05′ 00″ S.
– Long.: 52° 05′ 48″ W.
C3 – Lat.: 32° 05′ 18″ S.
– Long.: 52° 05′ 33″ W.
C4 – Lat.: 32° 05′ 18″ S.
– Long.: 52° 05′ 50″ W.
C5 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 06′ 06″ W.
C6 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 05′ 45″ W.

Area Echo: Available for the anchoring of a maximum of 5 (five) liner vessels of up to 170 m. LOA.

The area *ECHO* is limited by the following points:

E1 – Lat.: 32° 04′ 37″ S.
– Long.: 52° 05′ 25″ W.
E2 – Lat.: 32° 04′ 51″ S.
– Long.: 52° 05′ 03″ W.
E3 – Lat.: 32° 04′ 15″ S.
– Long.: 52° 04′ 07″ W.
E4 – Lat.: 32° 04′ 00″ S.
– Long.: 52° 04′ 37″ W.

Area Golf: Available for the anchoring of vessels proceeding or coming from the Ports of Porto Alegre and Pelotas, inland vessels and vessels loading or discharging, using one non-self-propelled floating elevator, or two floating elevators of which one has to be necessarily self-propelled.

The area *GOLF* is limited by the following points:

G1 – Lat.: 32° 03′ 27″ S.
– Long.: 52° 02′ 30″ W.
G2 – Lat.: 32° 03′ 36″ S.
– Long.: 52° 03′ 13″ W.
G3 – Lat.: 32° 02′ 21″ S.
– Long.: 52° 02′ 24″ W.
G4 – Lat.: 32° 01′ 51″ S.
– Long.: 52° 02′ 24″ W.
G5 – Lat.: 32° 00′ 48″ S.
– Long.: 52° 02′ 40″ W.
G6 – Lat.: 32° 00′ 48″ S.
– Long.: 52° 03′ 06″ W.
G7 – Lat.: 32° 02′ 32″ S.
– Long.: 52° 02′ 52″ W.
G8 – Lat.: 32° 02′ 45″ S.
– Long.: 52° 02′ 57″ W.

PROHIBITED ANCHORAGE AREAS:

There are three areas where vessels cannot anchor, two located in front of the Terminals of the Super Port and used for manoeuvring of the vessels berthing or unberthing on those Terminals, and the third located on the fork of the main channel of approach to the New Port and channel of approach to Pelotas and Porto Alegre.

Area Bravo: Limited by the following points:

B1 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 06′ 06″ W.
B2 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 05′ 45″ W.
B3 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 06′ 06″ W.
B4 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 05′ 45″ W.

Area Delta: Limited by the following points:

D1 – Lat.: 32° 05′ 00″ S.
– Long.: 52° 05′ 46″ W.
D2 – Lat.: 32° 05′ 10″ S.
– Long.: 52° 05′ 30″ W.
D3 – Lat.: 32° 04′ 51″ S.
– Long.: 52° 05′ 03″ W.
D4 – Lat.: 32° 04′ 37″ S.
– Long.: 52° 05′ 25″ W.

Area Foxtrot: Limited by the following points:

F1 – Lat.: 32° 04′ 00″ S.
– Long.: 52° 04′ 30″ W.
F2 – Lat.: 32° 04′ 15″ S.
– Long.: 52° 04′ 00″ W.
F3 – Lat.: 32° 03′ 34″ S.
– Long.: 52° 03′ 27″ W.
F4 – Lat.: 32° 03′ 32″ S.
– Long.: 52° 03′ 35″ W.
F5 – Lat.: 32° 03′ 32″ S.
– Long.: 52° 04′ 30″ W.

RESTRICTIONS: According to the Brazilian legislation it is prohibited to spill oil or throw overboard any refuse on to the Port waters. The vessels that wish to de-ballast of throw overboard residues resulting from the washing or sweeping of holds should do so outside the Bar, in the circular area of 10 miles radius, with centre at the point 32° 00′ S. and 49° 00′ W., maintaining a course of 090° and speed of 10 knots. The Port Captaincy will grant permission to vessels that need to leave the Port and cross the Bar to do these operations.

Vessels with draft up to 29 ft. handled day and night. Vessels over 29 ft. in daylight only.

Mooring/unmooring 24 hours a day.

MAX. SIZE: The deepest allowable draft in the approach channel to the Port is 40 ft. up to Portobras Wheat and Soyabean Terminal (TTS); from there inwards there is a variable and progressive reduction to the depth along the remaining part of the channel, ending with a depth of 10 m. alongside the New Port.

Bar Entrance: Max. draft 40 ft. (36 ft. 06 in. in 1984 due to heavy silting).

HEALTH:

(a) Vessels arriving from a foreign port of call must receive a visit from Port Health Authority. Each passenger (whether to land or in-transit) and crew members must be in possession of valid international vaccination certificates. Also see "General" before the first port.

(b) Maritime Health Declaration has to be made out and handed to the doctor at the time of visit. When all papers have been examined and found in order, the doctor will authorise lowering of the yellow flag and hand over Free Pratique.

(c) In case of death, suspected disease, serious accident, etc., on board, before vessel arrives in port, Master should radio Agent giving full particulars so that necessary steps may be taken with Health/Police Authorities.

RADIO: The Port of Rio Grande has a coastal station of the EMBRATEL network, "Juncao Radio", operating on the international call sign "PPJ", on a wavelength of 600 m. (500 kHz). There is telephone communication between radio station and shipping offices, so that, normally, messages are relayed without any appreciable delay. According to government regulations, EMBRATEL is to monitor/control all maritime traffic through its coastal stations, therefore only the tugs and launches used in the Port traffic are allowed to have VHF sets for manoeuvring, therefore all VHF traffic between Agent/ships is channelled through "PPJ" as Agents are not allowed to have their own VHF sets.

TUGS: The Port of Rio Grande has 9 tugs (500 h.p. – 2,100 h.p.) used in the normal port operations and in refloating vessels. In order to discipline the requisition and employment, the tugs are grouped in accordance with their power: Small, Medium and Large.

The tugs are normally requested by the Agents and placed at the disposal of the Pilot, who should use the tugs in accordance with the size and draft of the vessel, as follows:

1. For berthing/unberthing manoeuvres (vessels in d.w.t.):
   up to 2,500 – optional
   from 2,501 to 5,000 – 1 small tugboat
   from 5,001 to 10,000 – 1 small and 1 medium
   from 10,001 to 20,000 – 1 medium and 1 large
   more than 20,000 – 2 large tugboats
2. To turn vessels or to come in/go out stern first (vessels in d.w.t.):
   up to 2,500 – 2 small tugboats
   from 2,501 to 5,000 – 3 tugboats (1 medium and 2 small)
   from 5,001 to 10,000 – 3 tugboats (1 large and 2 small)

BERTHING: *Old Port:* Used by fishing boats and tugs.

New Port: 1,890 m. of continuous quay with 10 m. depth. 3 rows of sheds for general cargo, plus a series of terminals along its length, mechanically equipped to facilitate loading and unloading operations.

Container Terminal: Max. draft 37 ft. – 40 ft. (depth 46 ft.). Length of berth 250 m. and 50 m. Terminal equipped with 2×30 tons cranes, 4×37 tons top loaders, 3×15 tons frontal top loaders, 6 tractors and 15 lorries. Open storage area of 40,000 sq.m. which can accommodate 3,000 TEUs.

General cargo vessels with draft over 29 ft. may use the terminal if container vessel not operating, but will have to vacate berth and return later if container vessel arrives.

BULK HANDLING FACILITIES: *Cesa Silo:* Terminal used for storage, loading and unloading of grain in bulk. Storage capacity of 50,000 tons. Equipped with two loading/unloading towers of the pneumatic suction type with loading rate of 300 t.p.h. (beans) and 150 t.p.h. (pellets) and a discharging rate of 150 t.p.h. (maize or wheat). Travel of conveyor 150 m. Air draft 20.0 m. Max. draft 29 ft.

D3/D4 Terminal: It has a receiving grid used both for trucks and railroad wagons. Storage capacity of 56,000 tons (beans) or 39,000 tons (meal). It is mainly used for storage and loading of soyabeans, however, it can also be used for storage and loading of soyabean meal. Loading is done through a conveyor belt, 800 t.p.h. (beans) or 400 t.p.h. (meal). Travel of belt 215 m. Air draft 19.0 m. Max. draft 29 ft.

Acos Finos Piratini: Terminal used for storage, loading and discharging of iron ore via conveyor belts. The discharging of vessels is performed at a rate of 600 – 800 t.p.h. and the loading of barges at a rate of 250 t.p.h. Storage capacity of 20,000 tons.

Fertilizantes do Sul S/A-Fertisul: Receives raw material (liquid and solid) used for manufacture of fertilisers. To receive solid fertiliser the conveyor belt of Acos Finos Piratini's installation is used, and, for liquid, there is a pipeline running from Fertisul's tanks to the New Port's Southernmost part. This pipeline is used for phosphoric and sulphuric acid, while ammonia is received through a pipeline running from the Bunker Pier to Fertisul's special ammonia tank, located in the Super Port area.

Discharging rate (approx.) as follows:

Ammonia	400 t.p.h.
Phosphoric acid	1,000 t.p.h.
Sulphuric acid	600 t.p.h.
Solids	400 t.p.h.

Vegoil Terminal: Used for the receiving of, storage and loading of crude soyabean oil. Three tanks with storage capacity of 14,000 tons total. The oil is normally received from trucks or barges. Barges have a discharging rate of about 150/250 t.p.h. The loading is performed via a pipeline running from the tanks to the New Port (Bomba Geral area) with a loading rate of 300 t.p.h. Max. draft 29 ft.

AGEF Grain Terminal: Storage of soyabean and soyabean meal. Belongs to the Federal Railroad Administration and is linked to the D3/D4 Terminal loading installations. Storage capacity of 24,000 tons (2 sheds). Max. draft 29 ft.

Meat Reefer Warehouse: Has a total storage capacity of 8,200 tons.

Barge Terminal: Basically it is an installation linked to Bianchini, SAMRIG, D3/D4 and AGEF Terminals, used for discharging of soyabean meal/soyabeans from barges. It uses cranes with grabs to discharge the barges. The cargo is transported by a conveyor belt to the Terminals.

The New Port has along its extension several cranes varying from 3 tons to 12 tons, used for operations with general cargo and containers.

Super Port: Port complex located at the 4th "Secao da Barra" on the West margin of the approach channel, with various terminals equipped with loading/discharging equipment conveniently suitable for the handling of bulk cargoes.

Luchsinger Madorin Fertiliser Terminal: Located South of the bunker pier, has a T-shaped pier, 180 m. in length and max. draft of 36 ft. It has facilities for discharging sulphuric acid, phosphoric acid, liquid anhydrous ammonia and two conveyor belts for discharging of raw material used in the manufacturing of fertiliser. The storage capacity of solid fertiliser is of 100,000 tons. On the inside part of the pier there are loading facilities for barges with a loading rate of 300 t.p.h.

Discharging rates are as follows:

Liquid ammonia	544 t.p.h.
Sulphuric acid	500 t.p.h.
Phosphoric acid	1,200 t.p.h.
Solid fertiliser	500 t.p.h.

Wheat & Soyabean Terminal: It is located South of Luchsinger Terminal with a solid pier 413 m. in length and draft of 40 ft., allowing for the berthing of vessels up to 80,000 d.w.t. Loading rate of about 1,200 t.p.h. (beans) and 800 t.p.h. (meal) and storage capacity of 400,000 tons. Can receive cargo simultaneously from trucks and railroad wagons, at a rate of 250 – 500 t.p.h. It is the biggest Grain Terminal in Latin America.

Cotrijui Grain Terminal: Located South of the new Portobras' Wheat & Soyabean Terminal, it has a "T"-shaped pier of 265 m. length and max. draft of 40 ft. It can receive vessels up to 60,000 d.w.t. It has 8 sheds of 25,000 tons capacity each and two tanks for storage of soyabean oil with capacity of 5,000 tons each. 8 tubes with air draft 11.5 m. and 2 conveyor belts with air draft 15.0 m. Loading rate as follows:

Soyabean	1,000 t.p.h.
Wheat	1,000 t.p.h.
Soyabean meal	400 t.p.h.
Soyabean oil	400 t.p.h.

Transhipment Dolphins: Located South of the Cotrijui Grain Terminal is used for transhipment of vessels over 200 m. LOA. Max. draft 37 ft.

Incobrasa Grain Terminal: Location: Superport area; Draft: 38 ft. (density 1002); Airdraft: 22 m.; Quay: 412 m.; Restrictions: No LOA/beam restrictions; Storage capacity: One shed for 80,000 tonnes meal, 3 sheds for 82,000 tonnes of beans. Terminal has 3 tanks for vegoil, soya bean oil, able to store 14,000 tonnes; Load rates: Meals 600 tonnes/hr., direct from silos, 300 tonnes/hr. from barges through shore, beans 600 tonnes/hr., soya bean oil 270 tonnes/hr. Terminal equipped with 2 fixed loading towers, each with horizontal movable spouts with 180° of turn and 24 m. of outreach. Terminal able to operate upto Capesize vessels. Vegoil tanks connected to pier through one duct of 6 in. Fresh water can be supplied at a rate of 7 tonnes/hr. at a cost of U.S.$2.00/ton. Terminal equipped with 3 shore cranes with grabs in order to be able to deal with discharge of bulk imports/loading vessels with cargo coming upriver ex-barges (loading can be performed simultaneously from shore silos and from barges. Load rate the same as mentioned above, 600 tonnes/hr. due to restrictions of conveyor belt).

Bianchini Grain Terminal: Location: Superport area; Draft: 38 ft. (density 1002); Airdraft: 22 m.; Quay: 274 m.; Restrictions: No LOA/beam restrictions; Storage capacity: Terminal has one shed located at new port area with total storage capacity of 50,000 tonnes, basis beans plus 2 sheds at crushing plant (Superport area) with total storage of 170,000 tonnes, basis beans. Terminal has 3 tanks for vegoil (soya bean oil) able to store 14,000 tonnes; Load rates: Beans 1,500 tonnes/hr., meals 800 tonnes/hr. Soya bean oil 300 tonnes/hr.; Terminal equipped with 3 fixed loading towers, each one with horizontal movable spouts with 180° of turn and 30 m. of outreach. Terminal able to operate up to Capesize vessels. Vegoil tanks connected to pier through one duct of 6 in.

Meat Terminal: Located South of the Transhipment Dolphins, has a solid quay of 300 m. in length and draft of 37 ft. It has a reefer warehouse with 4 cold chambers with a total storage capacity of 10,000 tons. The pier has 2 gantry cranes for the loading/unloading of containers.

EQUIPMENT:

32 Portal cranes on rails, capacity 3.2 tons – 40 tons.
2 Jib cranes, capacity 10 tons each.
2 Portainers, capacity 30 tons each.
1 Floating crane, capacity 100 tons.
70 Forklifts, capacity 2.5 tons – 15 tons.
4 Forklifts for containers, 3×20 tons and 1×37 tons capacity.
2 Floating elevators for transhipping, capacity 300 t.p.h. each.
1 Mobile crane, capacity 100 tons.
6 Tractors.
10 Trucks.
20 Trailers, capacity 10 tons – 50 tons.
8 Floating elevators with rates of 70 t.p.h. – 200 t.p.h.
Self-propelled barges with capacity 1,500 tons – 2,000 tons.

STEVEDORES: *Working Hours:* Straight time, 0730-1130/1300-1700 (weekdays). During weekdays, labour for morning shift which commences at 0730 hrs., may be ordered up to 0715 hrs.; at 1245 hrs. extra gangs may, if necessary, be engaged for afternoon shift commencing at 1300 hrs. For night work, longshoremen (i.e. dock labourers distinct from stevedores) must be ordered before 1600 hrs.; stevedores, tally-clerks, etc., for night work may be engaged up to 1845 hrs. for shift that starts at 1900 hrs.

Sunday/holiday work must be ordered previous day, up to 1600 hrs.

MEDICAL: Two hospitals available which have adequate facilities to deal with a majority of cases.

TANKERS: *Bunker Pier:* Located approximately one mile North from the place called "Ponta da Mangueira"; it is a pier 228 m. in length and draft alongside of 33 ft. Primarily used for the receiving of crude oil and for the loading of bunker barges. There also are located the connections of the Fertisul Ammonia Terminal, Manah and CRA Phosphoric Acid Terminals.

Copesul Terminal: Located North of the Petroleum Pier. Max. LOA 170 m. Max. draft 29 ft. Max. d.w.t. 32,000 tons. Storage capacity 32,000 tonnes. Loading rate for propylene 95 cu.m.p.h. – 190 cu.m.p.h. Length of berth 44 m. Distance between dolphins 203 m.

DENSITY: New Port 1000; Anchorage and Super Port 1016.

FRESH WATER: Along the New Port quay there are 28 connections for fresh water that is delivered at a rate of about 30 t.p.h. – 60 t.p.h., or less, depending on the number of vessels being supplied. Also available at the Wheat and Soyabean Terminals and the Liquid Bulk Terminal. The terminals in the Super Port area lack those facilities apart from the Bunker Pier which has 6 connections with a rate of 20 t.p.h. For ships anchored at the Inner Roads fresh water can be supplied by barges owned by the Port Administration, with capacities of 250 tonnes and 400 tonnes at a rate of 80 tonnes per hour. The barges require the assistance of tugs to tow them.

FUEL: Can be supplied by truck (diesel), at the Bunker Pier (diesel and fuel) and ex-barges (diesel and fuel). Most commonly bunkers are supplied ex-barge. Suppliers are Petrobras, Shell, B.P., Exxon and Texaco. Stem has to be made previously abroad and price charged is the one in force on the day of delivery, 96 hours' notice recommended.

CONSULS/VICE-CONSULS: Great Britain, Denmark, Germany, Italy, Netherlands, Norway, Paraguay, Portugal, Spain and Uruguay.

REPAIRS: Two small repair shops equipped to carry out minor repairs. No dry docks. Radio, radar and gyro technicians available, but expensive.

SURVEYORS: G.L. and N.V.; Lloyd's and A.B.S. in Porto Alegre.

GANGWAY/DECK WATCHMEN: Compulsory for all sea-going vessels to have a port gangway watchman, normally requested by the ship's Agents, to the Watchman Syndicate. Apart from the gangway watchman, it is advisable to employ a crew member as deck watchman to look after the ship's safety.

OPENING/CLOSING HATCHES: Opening and closing of conventional hatches normally done by stevedores, without any extra cost, advisable, however, for steel hatches to be handled by crew.

CUSTOMS ALLOWANCES: Each crew member allowed one carton of cigarettes (or the equivalent in pipe tobacco) and one bottle of spirits, per week. Ships that remain in port over a week may request customs, through their Agent, to open bond for another weekly issue.

REPATRIATION: Seamen being repatriated have to proceed to Porto Alegre, by bus or air-taxi, where arrangements can be made for travel by air.

TIME: GMT minus 3 hours.

HOLIDAYS: *National:* 1st January*, 21st April, 1st May*, 7th September, 12th October, 25th December*.

Municipal: 2nd February, 29th June.

Movable Feasts: Carnival (Monday and Tuesday), Ash Wednesday and Passion Friday.

Commemorative: 28th August (Bank Holiday), 28th October (Civil Servants' Day); 30th October (Commercial Employer's Day) and 1st November (All Souls' Day).

*No labour available.

POLICE/AMBULANCE/FIRE: Police 2.1695; Hospitals 2.3802; Ambulance 2.3801; Fire 2.1778.

TELEPHONES: There are no facilities for placing telephones on board.

IDENTITY CARDS: Foreign crew members are not allowed to go ashore without presentation of identity card, on which there are personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police, who will return it to the crew member on re-embarkation.

GARBAGE: Authorities are very strict with regard to throwing garbage overboard.

GENERAL: *Light and Power:* The supply to the New Port is done by the State Company of Electric Energy (CEEE) with 13.8 kV, 60 Hz. voltage that is lowered by 6 sub-stations along the quay, from 600 to 1,000 kVA to 380 to 220 V. Along the quay, every 25 m. there is a power plug to connect the power to the port cranes with 300 A. Those plugs can also connect the power to the vessels along the quay.

Flags to be flown.

(a) Brazilian flag at the top of the foremast. Do not allow it to get tangled.

(b) Yellow flag (to be hoisted until the doctor's clearance is given). Vessels arriving from a Brazilian port, with no disembarking passengers, must *not* hoist yellow flag unless there is sickness on board requiring presence of the Health Authorities.

(c) Pilot flag.

(d) Customs flag (to be hoisted after the vessel is cleared by Customs and flown during the vessel's stay in port).

SHIPMASTER'S REPORT: February, 1982.

Pilotage: There are anchorages for three vessels between a position some 3 cables South of No. 12 Light Buoy to the vicinity of No. 14 Light Buoy. Here vessels can be in ample depth but, owing to the narrow channel, a Pilot must be retained aboard for, despite the current being outward the effect of the wind is critical. Despite the channel depth, there is a restriction to 38 ft. max. draft due to the inability of the dredging to guarantee more over the bar.

Documentation: At least 10 Crew Lists are required but otherwise few formalities.

Radio: This is one of the most efficient along the coast and both H/F and VHF are handled with commendable speed while W/T is equally available.

Tugs: Depending upon weather and current conditions, at least one tug is required to turn a vessel at the anchorage to sail outwards.

Fresh Water: The barge that delivered up to 400 tonnes is now condemned hence the only facility is a maximum of 45 tonnes from a tug, an expensive facility.

Fuel: There are at least two bunkering barges, one a minor coaster, but the speed of delivery is low e.g. 100 t.p.h. The depth of water at the tanker berth is 33 ft., hence loaded vessels ex-Argentine ports must remain in the stream.

Remarks: The Agencies and Pilots appear to be well geared to the prospect of a steady use of the port for bunkering, water and stores, while the radio station helps in expediting all communications. Suggestions have been made for three dolphin type berths in place of the anchorages, use being made of the Eastern side of the channel.

SHIPMASTER'S REPORT: November 1982.

My vessel is 39,026 tonnes SDWT and was ordered to load a full cargo of Soya Bean Oil for discharge in Iran:

Contained in my voyage orders was the instruction to inform Agents and suppliers of ETA at daily intervals 20/15/10/5/3/2/1 (My departure port was Bandar Abbas and routing was via Cape Agulhas).

Documentation as per "Guide to Port Entry". A "Nil" statement of drugs (excepting medical), firearms and ammunition in three copies is required.

Courtesy flag from foremast at all times.

My vessel loaded part cargo in Porto Novo (General Pumping Berth). The draft alongside was quoted to me as 29 ft. by my Agent but he stipulated actual draft was about 27 ft. with soft mud. The soft mud I do not dispute but my own sounding with the hand leadline indicated 26 ft. 4 in. and I did not load beyond 26 ft.

Loading rate never exceeded 250 – 300 tonnes per hour. After loading to 26 ft. draft I shifted ship to a pontoon berth (un-named) in position Lat. 32° 07.22' S., Long. 52° 06.15' W. (Farol da Barra Lt.Ho. 084.8°×1.34 miles). At this berth I again checked depth of water by hand leadline and got around 14 m. which presented no difficulties; my Summer draft being 11 m.

Loading at this pontoon berth was carried out by barge which varied in size from 3,000 tonnes to 1,500 tonnes; apparently they load in Porto Alegre and average turnaround time is about 5 days thus I anticipate a further week here before completing cargo as barges are not plentiful. Loading rate approx. 200–300 tonnes max.

Passes complete with photographs are required by all ship's staff.

At this pontoon berth launches are available to take crew members ashore but they are expensive and I would advise Masters to abstain from being too generous.

SHIPMASTER'S REPORT: October 1983.

Anchorages: The anchor was dropped in the Outer Roads off Rio Grande do Sul. The holding ground proved to be poor and the ship dragged anchor in a force 4 wind with less than a 2 knot tide, though anchored in 12 m. with 4 shackles in the water, i.e.: 9 times the depth. The nature of the bottom was mud with some shell, though marked gravel on the chart. While entering port the Pilot advised that ships frequently drag there, even with 8 shackles out.

Berthing: From the anchorage to the No. 1 (sea) buoy was 2 miles thence 3 miles more to the berth. There was about 17.6 m. depth at Cotrijui, reducing to 14 m. in the dredged approach channel.

The ship berthed at dolphins, in the first instance, port side to, just below the silo at Cotrijui. The village of Macaceo is just to the West of the dolphins. One floating elevator was then employed to start loading from a series of barges, pending the ship's turn at the faster, silo berth.

The gross rate of loading from the floating elevator (there are several on the river; this one was owned by Corymar) was 77 t.p.h. At 0415 hrs. 13th October, having completed loading 5,000 tonnes from 3 barges, the ship awaited the availability of the silo berth. At 1720 hrs. 18th October we left the dolphins to allow the next ship to berth there before dark and, after anchoring just upstream from the silo while the previous ship completed paperwork, berthed at Cotrijui silo, port side to, at 2124 hrs. 18th October.

The berth and equipment are very worn and in a poor state of repair. It is hard to keep the ship alongside in the strong tides due to the configuration of the river bottom. A dilapidated shore gangway is used; there is nowhere to land a ship's gangway. There ought to be another bollard and fender amidships to square the ship on to the wharf, and place an after fore spring properly. However, the shore personnel were very helpful and co-operative. As the hatches finished they were actually trimmed, without having to be requested, by men equipped with shovels. The loading spouts, working 2 holds at a time, are heavy and less manoeuvrable than most silos. Therefore the cargo cannot be thrown sideways into the wings and ends of the hatches with any force, leading to a poorer stow. The loading rate was 372 t.p.h. Ships longer than 250 m. have to have a tug pushing onto the wharf while loading, rather like some of the Mississippi berths. Cargo was completed at 0845 hrs. 21st October, after which there was a relatively large amount of documentation to be done. The ship sailed at 1249 hrs.

There is a more modern complex called Portobras Wheat and Soyabean Terminal. Unfortunately, after only about 6 months in operation, there was a fire there and the Terminal no longer works.

Fresh Water: Fresh water can be obtained from some berths but not Cotrijui silo or at the dolphins. It comes by dumb barge, capacity 250 tonnes.

REPORT: August 1985.

Copesul Terminal: Copesul's Terminal at Rio Grande is partially ready to operate with a total of 6 chemical products planned.

Shore installations and jetty were inaugurated 11th August, 1985, by vessel 173 m. LOA, 25,000 d.w.t.

Vessel loaded 2,000 tonnes Toluene and 2,000 tonnes Benzene.

Jetty: 140 m. long, equipped with 2 mooring dolphins. Distance between dolphins 200 m.

Capacity – 1 vessel max. 31,000 d.w.t.

No air draft restrictions.

Draft 29 ft. brackish water (intention is to bring draft up to 30 ft. brackish water).

Vessels LOA – Harbour Master authorised berthing up to maximum 200 m. LOA, although this in reality is impracticable as distance between dolphins is 200 m. and there would be no lead on head/stern lines.

Shore installations have a storage capacity of 32,000 cu.m.

At present operating with following liquid products:

1. Xylene.
2. Toluene.
3. Propylene.
4. Methanol.
5. Benzene.
6. Ethyl-Benzene.

The jetty is connected with shore installations by 6×8 in. lines which are connected to 6 manifolds of 6 in. each.

There are 7 pumps one connected to each line which have a loading capacity of 350 cu.m.p.h. each.

Depending on vessels conditions, Copesul is able to load up to 5 products simultaneously.

The storage tanker 'Aristoteles' for Ethylene storage, is still docked at a shipyard in Porto Alegre, carrying out final surveys/repairs. It is expected ready at Rio Grande for the end of September, for the meantime Ethylene loading continues by transhipment at Inner Roads by m.t. 'Tacosul' (capacity for 450 tonnes) or from another ship.

According to Harbour Master, intention is to stop transhipment vessel to vessel at Inner Roads (Area Echo) (presently being used to carry out transhipments, two vessels at a time), however, it will be de-activated only after the 'Aristoteles' arrives Rio Grande for the loading of Ethylene. According to Copesul, they intend to ask Harbour Master to also keep 'Area Echo' option to carry out any eventual transhipment which may be necessary in the future in case of congestion at their shore terminal.

SHIPMASTER'S REPORT: August 1994.

Berth: Cotrijui Terminal.

Cargo: Soya Bean Oil.

Connection: Hoses.

General: An unsafe berth. 3 ships in the previous month parted all moorings and were swept into the river. Very few dolphins on the jetty restrict mooring options. Ships slightly larger than ours have to have a tug pushing the vessel alongside at all times.

The berth has 3 fenders. But the central fender is larger than the others, so the vessel only rests on 2 fenders (See "Plans").

There is a partial groyne beneath walkway and grain elevator. In times of heavy inland rain and strong current, the current is deflected by the groyne to laterally push the vessel off the berth. If mooring ropes are not tight at all times, this can cause the vessel to oscillate and pivot around the central fender, and many ships have parted mooring ropes at this berth. Insufficient bollards on the jetty give poor loads.

Poor access ladder.

Berth: Incobrasa.

Cargo: Degummed Soya Bean Oil.

Connection: Hoses.

General: Max. draft 37 ft. (F.W.).

There is a strong river current at all times.

3 tugs used for mooring and unmooring.

AUTHORITY: Superintendencia do Porto de Rio Grande, Av. Honorio Bicalho S/No., P.O.Box 198, 96.200 Rio Grande RS, Brazil. *Tel:* (0532) 32-3366, 32-3396. *Telex:* (0532) 423 Aprg. *Contact:* Eng. Thierry Jose da Silva Rios, Technical Director.

AGENT: Wilson Sons Agencia Maritima Ltda., Rua Riachuelo 201/205, 96200-390 Rio Grande RS. P.O. Box 103. Tel: (0532) 31-1166 (After hours: (0532) 32-6399). Telex: (53) 2177 WSON BR. Fax: (0532) 31-1246. Cables: Anglicus.

SALVADOR (Bahia): 13.01 S. 38.35 W. (See Plan)

LOCATION: Lat. 13° 00′ 37″ S., Long. 38° 35′ W.

PORT LIMITS: The Port is limited by the line East/West which passes through the Santo Antonio Lighthouse, bridging the frontier coast of the Island of Itaparica, and from there turning to enter the bay through the same line East/West which connects the Continent and that towards the coast Northwards as far as parallel 12° 50′ and then from there going Eastwards towards the Continent.

DOCUMENTS: (See "General" before first port.)

Agent also fills out the "Entrada & Saida Capitania do Porto" to be signed by Master. The particulars for this document are:

Name of Master – name of ship – flag – code signal letters – tonnage: gross and net – horsepower – engines: twin or single – type of ship, etc. – port of registry – tons of cargo to discharge – owners – Agents in port – last port of call – previous ports of call – next port of call – number of crew – number of disembarking passengers – number of transit passengers – speed of vessel – also specifications of nature and quantity of cargo in transit.

Documents to be Supplied to the Ship Before Departure:

1 "Clearing pass" from the Port Captain
1 " " " " Federal Police
1 " " " " Post Office
1 " " " " Custom House
1 Custom House negative cargo declaration for each following Brazilian port of call.

The Port Doctor will require the following information: Class, name and flag of ship – net register tonnage – name of Master and ship's Doctor – number of officers and crew – name of Agent – all ports called at during voyage – number of days from first to previous ports of call – number of passengers disembarking and in transit – tons of cargo to be discharged – whether any sick persons or deaths occurring on board.

The Customs will require the following information: Name of vessel – nationality – gross and net tonnage – H.P. of engines – name of Master – number of officers and crew – owner's name – name of Agent – all ports called at during voyage – ports of destination – days of voyage from first to previous ports of call – tons of cargo to be discharged – particulars of passengers.

The Federal Police require the following information: Vessel's name – nationality – gross and net tonnage – name of Master – number of officers and crew – name of Agent – port of departure and all ports of call – number of days from first and last ports of call – number of passengers disembarking and in transit – specification of embarking and disembarking ports of each transit passenger.

Ships calling at Salvador are normally boarded by the authorities at any time, day or night, when required. If there is no special urgency, however, the visit is effected the following morning at 0630 hrs.

The Inspection Area of the Port Health Authorities, Federal Receipt and Maritime Police is defined by a radius of 1 mile around the point of co-ordinates Lat. 12° 58′ 07″ S., Long. 38° 32′ 18″ W., the area around the point of co-ordinates Lat. 12° 55′ 56″ S., Long. 38° 31′ 37″ W., indicated in chart 1102 of the NHD.

Vessels may only come alongside after clearance by the Federal Receipt, Port Health Authorities and Federal Police. The free anchorage coincides with the pilotage waiting area and permitted anchorage (anchorage of Monte Serrat).

APPROACHES: The port has 2 access channels. The first, called the Inner Channel is on the city side with a minimum depth of 8 m.

The second, called the Outer Channel is on the side of Itaparica Island and its depth varies from 13 m. to 55 m.

Action of Tides: Tidal amplitude in the port of Salvador is 2.5 m. on average, during the tides at the full moon. The flood tide in the port of Salvador runs for 5 hours to the N.N.E. and the ebb for 7 hours to the S.S.W., with a speed of 1.5 knots. During Spring tides, these tides can reach 2 to 3 knots.

During ebb tides, it is suggested that the approach to the quay be made by the South Entrance, between the two breakwaters, so that there will be no need for a yaw action in the manoeuvring bay formed by the breakwaters. The ebb tide may cause the vessel to swing to the South, in the entrance between the breakwaters.

Manoeuvring Area: The area intended for the manoeuvring of vessels for mooring or unmooring has a length of 100 m. along the whole extension of the quay, with a draft of 27 ft. at any state of tide. In this area, and also in the access channel the anchorage of any vessel is expressly prohibited, except with the prior permission of the Port Captaincy.

PILOTAGE: Compulsory for all vessels entering Salvador and berthing/unberthing at general docks or proceeding to other marine terminals. The following areas are considered as pilotage zones for vessels bound for the port: Monte Serrat Anchorage, the S.W. Anchorage to the Panela Bank and waiting and disembarking point for Pilots, shown on NHD chart 1102.

Also considered as pilotage area is all the internal area of the Bay of Todos os Santos (All Saints) to the North of the parallel passing through Monte Serrat. The area of the port of Salvador, inside the breakwater, is considered to be a compulsory pilotage area for vessels over 4,500 d.w.t.

Also considered to be an area of compulsory pilotage is all the zone North of parallel 12° 55′ 05″ S., which passes through Monte Serrat, for vessels over 3,000 d.w.t., bound for the terminal ports and their access channels inside the Bay of Todos os Santos. Request for Pilot can be made through the ship's Agent, 2 hours in advance, specifying the time of entry of the vessel and from which point pilotage will be required.

The Salvador Pilots' Association has VHF-FM radio, at their office and on board the pilot launch, operating on Channels 16 and 11, listening out on Channel 16.

The address of the Pilots' Association is: Rua da Grecia No. 8, Tel: 242-2221, Edificio Serra da Raiz, 5th Floor, Room 510.

Vessels should use the signal "Hotel" to call up the Pilot at the Pilot Station (Chart 1102) and may use an audible signal for this purpose.

The Amaralina (ERA) Radio Station maintains coastal communication, and can also be used to call the Pilot by vessels bound for Salvador. Amaralina Radio Station communicates with the Pilots by telephone.

ANCHORAGES: There are 3 anchorages for waiting and inspection, see Chart 1102 of the NHD.

South: To the South of Panela Bank, in position Lat. 12° 58′ 00″ S., Long. 38° 32′ 33″ W. for waiting for the Pilot.

North: In the vicinity of position Lat. 12° 56′ 01″ S., Long. 38° 31′ 06″ W. In the vicinity of position Lat. 12° 57′ 01″ S., Long. 38° 41′ 01″ W.

There is a special anchorage for LASH vessels and for the operation of loading and unloading barges. It is located on the alignment of the North Light of the North Breakwater and the Monte Serrat Lighthouse, at a distance of 0.8 miles from this lighthouse, as shown on Chart 1102 of the NHD, in note (1).

Inside the breakwater and to the South of Fort Sao Marcelo there is an exclusive anchorage for the mooring of LASH vessel barges.

PROHIBITED ANCHORAGE: Locations prohibited for anchorage and movement of foreign and national pleasure craft. Mooring and anchorage locations:

(a) Bahia Yacht Club (Chart 1102)
Lat. 12° 59′ 49″ S., Long. 38° 32′ 00″ W.
(b) Aratu Yacht Club (Chart 1103)
Lat. 12° 48′ 36″ S., Long. 38° 28′ 49″ W.
(c) Area of the Bay of Itapagipe (Chart 1110).
(d) Section included between the prohibited anchorage area and the LASH barge anchorage (Chart 1102), unless duly authorised by the CPBA.

Areas where anchorage and navigation are prohibited.

(a) All the area in front of Inema beach (Chart 1104).
(b) Almirante Alves Camara Terminal (Chart 1105).
(c) Manoeuvring bay for the quay at the port of Salvador (Chart 1102), port of Aratu (Chart 1103), Terminal of USIBA (Chart 1103), Dow Chemicals (Chart 1103), (only navigation prohibited.)
(d) D. Joao Oilfield – location designation in Caution B of Chart 1110.

RESTRICTIONS: There is sufficient depth of water in the Outer Anchorage to accommodate the largest vessels afloat with safety, and the anchorage can, in addition, take a considerable number of vessels at any one time. The average depth of water in the channel leading to the dock warehouses is 33 ft. (10 m.) except opposite Shed No. 2 where 28 ft. (8.50 m.) is the max. depth. The dock quays are sheltered by two breakwaters, one running parallel with the shore for just over 0.5 miles. Because of the shallow draft opposite No. 2 Shed, all vessels entering or leaving the port with more than 28 ft. normally enter the Northern Channel.

MAX. SIZE: *Limit of Size of Vessels Navigating in the Channels:*

Access to Temadre: Length 250 m., draft 12.8 m., beam 40 m.; Access to Dow Chemicals: Length 170 m., beam 25 m., draft 10.3 m.; Access to USIBA: Length 170 m., beam 25 m., draft 10 m.; Access to the port of Salvador: Length 180 m., beam 30 m., draft 10 m.

Also see "Berthing" and "Tankers" and Port of Aratu.

ARRIVAL INFORMATION: Required before vessel's arrival:

(a) Vessel – ETA; deepest draft.
(b) Cargo – Quantity of cargo to be discharged and specification of hatch list.
(c) Passengers – Number of passengers disembarking.
(d) Bunkers – Quantity required.
(e) Water – Quantity required.
(f) Labour – Quantity required.
(g) Any other information – Number of mailbags to be landed, etc.

Specimen of telegram to be sent from previous port:

1. Vessel's name.
2. ETA Salvador.
3. Draft.
4. Number of passengers disembarking.
5. Number of mail bags to be landed.
6. Quantity of bunkers required.
7. Quantity of water required.
8. Number of gangs required.
9. Any other information.

FLAGS: On entering the port the vessel should fly the following flags:

1. Brazilian flag on fore mast top.
2. Quarantine flag when Salvador is first Brazilian port of call, or when there is a passenger for Salvador from a foreign port.
3. Customs flag (white star on blue background) after the vessel has been visited.
4. Flag "B" if dangerous cargo on board.
5. Pilot flag.

PRIORITY: Passenger vessels and wheat vessels have priority over cargo ships and the so-called "navios mixtos", i.e. cargo ships with a limited passenger accommodation. Passengers vessels are those that carry 60 or more passengers; except when loading 1,000 tons or over in which case they loose their priority.

HEALTH: The Doctor only boards the vessel when Salvador is first Brazilian port of call or when there are passengers from abroad to disembark, in which case Master should advise Agent who will then take the necessary steps required by Port Health. A yellow flag should be flown if Port Health Doctor is required on board.

RADIO: Master should always endeavour to contact Agent through Radio Amaralina Coastal Station, call sign ERA, and Agent will contact Master the same way. Since this station has a limited range, the Agent at Salvador may be contacted via Rio Radio when North-bound, or Olinda Radio/Fortaleza Radio when South-bound.

TUGS: Always used for berthing and unberthing. At other marine terminals tugs are supplied from Salvador. For container and cargo vessels berthing at 10 m. quay, a tug is usually supplied to help vessel moor and unmoor. When coming alongside tug joins vessel inside port. 8 tugs available 120 h.p. – 1,688 h.p.

Rules for using Tugs:

(i) At Temadre and Usiba.

All berthing and unberthing of vessels with tonnage between 2,000 g.r.t. and 10,000 g.r.t. must be with the aid of 2 tugs. Vessels with gross tonnage between 10,000 and 50,000 g.r.t. must be assisted by 2 tugs of power above 1,000 h.p. Vessels over 50,000 g.r.t. must be assisted by 3 tugs of power greater than 1,000 h.p.

(ii) In the Port of Salvador and other marine terminals.

All manoeuvres of berthing and unberthing of vessels with gross tonnage between 2,000 and 10,000 g.r.t. must be assisted by 2 port tugs. All manoeuvres of vessels of gross tonnage above 10,000 g.r.t. must be aided by 3 port tugs. Vessels of tonnage less than 2,000 g.r.t., according to the Pilot's judgment, may use a port tug, in special situations.

In special situations, with winds from the East, according to the judgement of the Pilot, the use of tugs can be dispensed with for unberthing.

BERTHING: No restrictions, but if draft over 28 ft. berthing and unberthing take place from 1 hour before HW until 1 hour after HW. Anchor used for berthing. Container and cargo vessels at 10 m. quay may unberth at any time.

The Port of Salvador is protected by 1 breakwater (Northern Breakwater) and 1 mole (South Mole). There are two channels for vessels entering and leaving. On the wharf there are 9 warehouses and between some of the sheds sheltered storage spaces.

Heavy lifts are left on the wharf until taken delivery, or discharged directly to trucks.

There are 4 quays in the port:

	Length (m.)	*Depth* (m.)		*Max. draft* (ft:)
Coastal Vessel Quay	683	7 – 8	Warehouse 5 & 6	23.5
Long Distance Quay	782	7 – 9	Warehouse 7 & Marine station	32.0
Connecting Quay	238	8 – 9		
10 Metre Quay	370	9 – 10		

All warehouses (excl. No. 9) are fitted with overhead internal cranes.

Explosives would be discharged into lighters at the proper anchorage for discharge of such cargo and taken to special deposits. Forewarning must be given for this cargo in order that arrangements may be made in advance.

One grain discharger × 150 t.p.h., and 2 wheeled suction plants × 60 t.p.h. each.

Grain silos – 20,500 tons (Salvador Mill), and 13,357 tons (Bahia Mill).

Industrial cold store of 2,300 cu.m. belonging to FRIUSA.

All other goods are loaded/discharged at the wharf.

Bulk Cargo Vessels: See "Aratu".

Containers: 1×30 ton crane for containers. 2×30 ton transtainers. 2×30 ton fork lifts. Roll-on/Roll-off facilities available. 22,000 sq.m. storage for containers and 10,000 sq.m. for containers ex-Roll-on/Roll-off.

Also see "Report" dated November 1982.

CRANES:

Jib Cranes:	1×30 tons (for containers), 4×3 tons, 2×5 tons, 15×3.2 tons, 3×6.3 tons, 2×12.5 tons.
Mobile Cranes:	1×13.5 tons, 1×75 tons.
Floating Cranes:	1×100 tons.

STEVEDORES: The Agents at Salvador act as stevedores.

The work at Salvador, especially loading, is considered amongst the best in Brazil, as a rule, sufficient gangs are available.

Masks, gloves are supplied by the stevedores. All other material such as slings, nets, etc., shall be supplied by the vessel.

The ordinary working hours are 0700 1100, 1300 – 1700 hrs., Monday to Friday inclusive. Saturday 0700 – 1100 hrs.

For overtime work notice must be given the previous day. As it would be difficult to obtain permission before each overtime period, a general permission covering ship's stay in port shall be obtained prior to arrival.

1100 – 1300 hrs. Special permission must be obtained from the Dock Company which is only given to passenger vessels, or for cargo vessels to finish the cargo, or under special circumstances.

1700 – 1900 hrs. Continuation period. Advice must be given to workmen at 1645 hrs.

1900 – 2300, 0000 – 0400 hrs. Considered as night work. Advice must be given to the Dock Company at 1645 hrs. and to the stevedores at 1700 hrs.

2300 – 2400 hrs. same as 1100 – 1300 period.

0400 – 0600 hrs. Continuation period. Advice must be given to workmen at 0345 hrs.

0600 – 0700 hrs. Second night continuation period. Can be worked under special circumstances to finish the cargo. Vessels discharging/loading bulk cargoes, or loading/discharging reefer cargo, are allowed to work round the clock.

To work on holidays, advice must be given to the Dock Co. before 1700 hrs. the previous working day. For Sunday work advice must be given before 1100 hrs. on Saturday. The same applies for stevedores/tally/coopers.

CARGO INFORMATION: *Inward Cargo:* When cargo is discharged from the vessel it is checked, weighed and weight noted by the shore tally-clerk (for account of the ship), by the Dock Company tally-clerk and by the Custom House. If there is a difference in weight, the ship is held responsible and has to pay double duty on same. Once the goods have been checked and weighed ship's responsibility ceases.

Goods are delivered to the consignees on presentation of the bill of lading to the Dock Warehouse.

Transhipment Cargo: Foreign cargo for transhipment at Salvador must be so declared on the manifest, and after it has been discharged the Agents have to obtain special Customs permission to tranship it to the port destination and also sign a guarantee that the goods are going to that port and that duty will be paid there. They will be held responsible for that duty until a declaration issued by the Custom House at the port of destination is received by them and handed over to the local Customs.

Transhipment charges vary considerably with the type of cargo and are very high compared with foreign freights.

Outward Cargo: Generally, cargo to be loaded is deposited in the dock shed prior to vessel's arrival.

Refrigerated Cargo: All reefer cargo is discharged directly to trucks, and vice versa.

Dangerous Cargo: Vessels with explosives and inflammables on board are not permitted to come alongside. All vessels carrying this kind of cargo must fly the "B" signal and remain at the proper anchorage. Advance notice must always be given of any vessel carrying explosives and inflammables. Under special circumstances it may be arranged for vessels to come alongside if they only have a minimum quantity of dangerous cargo on board, and the hatch in which it is stowed is not to be opened at Salvador.

When vessels are boarded by the Harbour Officials, the Master must hand to the Customs Officer and the Federal Police the Dangerous Cargo List.

Corpses as Cargo: Notice should be given to the Port Authorities of such cargo carried, if possible, before vessel's arrival.

Vegetable Oil in Bulk: Vegetable oil in bulk is loaded directly from lighters where the oil is deposited prior to vessel's arrival. Vessels are usually required to supply steam for pumping when they can.

Loading and Discharging Rate:

Average Daily Rates:

Breakbulk	500 tons
Iron Bars	1,400 tons
Dry bulk (with grabs)	1,000 tons
Containers	1,200 tons

Heavy Lifts: For heavy lifts a request shall be made to the Dock Co. to use the 100 ton capacity floating crane. Heavy lifts may also be discharged directly to the quay with the vessel's own gear when, due to a light draft (under 24 ft.), they can come directly alongside without the use of a pontoon. It is recommended that the Agent be consulted before booking any heavy lifts for Salvador as the heavy lift crane is sometimes out of working order.

Inflammables, Fuel and Diesel Oil, Etc., as Cargo: Bulk crude oil, diesel, fuel, inflammables, lubricants, etc., are discharged at the Madre de Deus Terminal, which belongs to the Government owned Petrobras.

Damaged Cargo: When cargo is discharged, damaged or pilfered, it is immediately checked and weighed by the Dock Co. and the Customs and separately stored.

The Insurance Co. makes a survey in the presence of the Dock Co. upon request of consignees.

Bulk wheat is discharged to two mills at Salvador, namely the "Moinho Salvador" and "Moinho da Bahia". Average discharging rates (23 hours work per day) are respectively 1,500 and 800 tons.

Handling of Mail: Timely notice should be given to the Agents in case there is mail to be landed, stating the number of bags.

As regards outgoing mail the Agents will be advised by the Post Office if there is any and issue the Post Office Pass. The bags shall be placed at the quayside, loading being for the account of the ship.

MEDICAL: When vessels arrive over week-ends or during holidays advisable that Master cable Agent giving advance notice of medical attention required if case is serious. For routine medical attention no previous advice required as medical and hospital facilities available.

TANKERS: All tankers loading/discharging inflammables, lubricants, etc., must do so at the Madre de Deus Terminal, which is privately owned by Petrobras, the Brazilian Government-run oil company.

The Madre de Deus Terminal is a T-fashioned quay situated within All Saint's Bay, 18 miles from Salvador. All vessels calling at Madre de Deus must be cleared at Salvador where Agent and authorities board the vessel before proceeding to Madre de Deus. This terminal is equipped only to handle tankers. Water, bunkers and deballasting facilities are available.

Max. drafts are 41 ft. for vessels loading and 37 ft. for discharging, and length 240 m.

Berth No.	*Max.Size* (d.w.t.)	*Depth* (ft.)	*Loading Arms/Products/ Remarks*
PP 1	120,000	41	1×10 in. LPG (liquid) 1× 8 in. LPG (vapour) 2×12 in. black oils 2× 8 in. white oils
PP 2	90,000	41	2×12 in. black oils 1×12 in. white oils 2× 8 in. white oils max. LOA 240 m.
PP 3	30,000	38	3× 8 in. white oils 1×10 in. white oils 1× 6 in. bunker line max. LOA 154 m.
PP 4	120,000	41	3×16 in. black oils 1× 8 in. fuel oil supply 1× 6 in. diesel
PS 1	10,000	26	1×10 in. semi-refrig. LPG (liquid) 1× 8 in. semi-refrig. LPG (vapour) 1× 6 in. pressurised LPG (liquid) 1× 4 in. pressurised LPG (vapour) 1× 6 in. bunker line max. LOA 145 m.
PS 2	2,000	14	

Also see "Shipmaster's Reports".

DENSITY: Salt water.

FRESH WATER: Advance information recommended. Rate 20 cu.m./h. If several vessels are in need of supply, pressure may not be enough to supply all at once. No water barges available in the port, and all vessels are replenished alongside.

FUEL: Diesel oil can be supplied alongside and at anchorage at Salvador, but fuel oil can only be supplied by Petrobras at the Madre de Deus Terminal, 18 miles up the bay.

Lubricants are supplied in drums. Also see "General" before first port.

CONSULS:

Austria
Belgium
Denmark
France
Germany
Great Britain
Italy
Netherlands
Nicaragua
Norway
Portugal
Spain
Sweden
Switzerland
Uruguay.

REPAIRS: The Navy operates a dry dock at Aratu with the following capacity: 35,000 tons; length 230 m.; width 30 m.; depth 8.5 m. Various small vessels can be attended at the same time. There are a number of workshops in Bahia fitted for repairing vessels, but it is recommended that large repairs be effected at the Aratu dry dock. When time allows, repairs may be made whilst the vessel is alongside the wharf. There is no time-limit but, as a rule, a vessel is not supposed to remain idle at the wharf if the berth is needed for another vessel which has to load/discharge.

SURVEYORS: *Lloyd's Agent:* Expresso Mercantile Agencia Maritima Ltd., 340 Avenida Estados Unidos, Salvador. Tel: 242-7011.

Bureau Veritas: 3 Rua Visconde Rosario, Salvador. Tel: 243-8222.

American Bureau of Shipping: H. Taxman, 18 Avenida Estados Unidos. Tel. 242-0447.

GANGWAY/DECK WATCHMEN: All foreign vessels must employ a gangway watchman by law. Hold watchmen are optional, depending on request by Masters/Agents.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: Customs officials will place cigarettes and "souvenirs" belonging to crew members under lock and seal. Excepting the Master, each crew member may keep in his possession only 1 carton of cigarettes and 1 bottle of spirits with seal broken. The Customs will periodically renew the seals for vessels staying in the port for a lengthy period thus enabling new issues to crew.

LIGHTERS: Soc. Alvarengagem de Ilheus are operating 4 lighters in the port with a combined capacity for about 670 tons.

REPATRIATION: Most crew changes are made via Rio de Janeiro but some are made via Recife and on direct flights Salvador/Lisbon.

AIRPORT: Dois de Julio Airport is 31 km. from centre of town (40 km. from the port). No direct flights to foreign countries but various daily connections available with Rio, Sao Paulo, etc.

TIME: GMT minus 3 hours.

HOLIDAYS: *National:* 1st January; 21st April; 1st May; 7th September; 12th October; 15th November; 25th December.

Municipal: Movable: Good Friday; Corpus Christi. Fixed: 24th June (Saint John); 8th December (Our Lady of Conception).

Traditional: Movable: Carnival – Tuesday (Mardi Gras) and Ash Wednesday. Fixed: 2nd November (All Souls); 2nd July (Independence of Bahia).

POLICE/AMBULANCE/FIRE: Fire Tel: 193; Police Tel: 190.

TELEPHONES: Facilities available for placing telephones on board.

REGULATIONS: Rat-guards must be used at all times, as the Port Health make periodic inspections on the quay.

STORES: Ship chandler can supply meat, vegetables, tropical fruits, canned goods, etc., but no bonded stores for foreign goods available.

SHIPMASTER'S REPORT: September 1981.

General: Salvador, capital of Bahia State is a large city combining the old with the modern. It is an important tourist resort for both Brazilian and overseas visitors.

The tanker terminal, owned and operated by 'Petrobras' at Madre De Deus Island, is some 14 miles N.N.W. of Salvador in Todos os Santos Bay.

The most unsettled weather occurs in March to May with heavy rain.

Approach: Salvador is easily picked up on radar at maximum range with its high rise buildings situated on an elevated point called Pt. De Sto Antonio.

Vivid flashing white lights from TV towers situated about 2 miles E.N.E. of Pta. De Sto Antonio can be seen long distances at night. BA. 540 and 546 refer to Salvador. For Madre De Deus the Brazilian chart 1105 is useful.

Although the entrance to Salvador Bay (Todos os Santos) has good depths strong currents are found on rising and falling tide setting N.N.E. and S.S.W. respectively.

Pilots: Pilots are embarked in the shelter of the Bay, 1 mile West of the Southern Breakwater. They use a small dark red launch. Pilots disembark in same position.

Pilotage time to Madre De Deus is about 1.25 hours.

VHF: Pilots: Call "Salvador Pilots" Channel 16, working 11, 13, 14. Range limited to about 6 miles South of Pt. Antonio.

Tugs: Channel 13.

Public Correspondence: 'Salvador Radio' Channel 16, working 24, 25, 26, 27 local and international (IDD) calls.

Arrival: Vessels proceeding to Madre De Deus Tanker Terminal will be required to anchor about 1.5 miles South of Pta. De Monte Serrat after embarking Pilot, for customs inspection, even if coming from another Brazilian port, generally takes about 1 hour.

If waiting for berth at Madre De Deus vessels anchor off Salvador.

Anchorage: South of Monte Serrat off Salvador in least depth of 13 m., plenty of sea room.

Madre De Deus Terminal: The large tanker terminal, operated by Petrobras, was completed 15 years ago to serve the refinery at Mataeipe 4 miles to N.E. Maximum draft is 42 ft. (12.8 m.) and maximum size up to 85,000 d.w.t.

Least depth on approach to berth was found near Beacon No. 7. 2.5 miles S.E. of "P1" Berth of 11 m. Chart Datum. The terminal is set amongst wooded islands, the principal being Ilha dos Frades which has an inviting sandy beach. By sea to Salvador takes about 1.5 hours by launch. The road which branches inland to join the main Rio De Janeiro Highway is about 50 miles in length and journey time of 1.25 hours. Tidal streams off the berth are very strong with a 3 m. range at times. Rates of 4 knots are common. Vessels calling regularly at Madre De Deus will find the Brazilian charts useful, plus Brazilian Tide Tables which list the Terminal and adjacent areas.

Berthing: Vessels are swung about 3 cables S.W. of the berths and use offshore anchor when berthing (about 3 shackles in water). At "P1" Berth Starboard anchor is used which is to assist in both berthing and unberthing. Also at "P1" Berth forward moorings go to a dolphin ahead of the Berth. At "P2" and "P3" Berths there is an off-lying dolphin astern of the berths (to West). Two powerful mooring launches are used, one each end. We used on "P1" Berth 4 head/stern lines, 2 breast and 2 springs each end. The forward breast lines to have any use should be brought down the deck to a lead about third of ship's length from forward.

There are 2 large flat sprung fenders proud of Jetty face.

Tugs: 2×1,200 h.p. permanently stationed at Terminal, 2×1,000 h.p. tugs come from Salvador as required.

For large vessels 3 tugs are used, generally pushing or tied up alongside with ship's lines.

Berths: Total of 5 berths on 2 jetties for sizes up to 85,000 d.w.t. and 42 ft. draft with following characteristics.

Berth No.	*Draft* ft.	*Size* d.w.t.	*Side to*	*Berthing*	*Product*
P1	42	85,000	Port	6 hrs. either side HW	Crude, Products, Refrig LPG
P2	42	33,000	Either depends on tide	Any time	Crude, Products
P3	36	33,000	Starboard	On flood tide	Crude, Products
S1/S2	24	15,000	Below 120 m. length any side to over 120 m. "S1" starboard side to and "S2" port side to.	Any time	Products, Heated LPG

Density: Density at "P1" Berth 1025 at all states of tide.

Discharge: Refrigerated LPG only at "P1" Berth.

2 Chicksans – 10 in. vapour, 12 in. liquid, 150 ASA, both of Brazilian manufacture, similar to Santos. These are not now used due to leaks and discharge is by flexible hose to manifold on jetty. Shore will supply hose although we used our own for part of distance as they were already rigged with lower discharge pipe from Santos. Plenty of reducers available. As the vessel is off the quay face for about 5 m. due to fenders, approx. 20 m. of hose are used.

No vapour return line at present.

Discharge to tanks situated about 1.5 miles inland, varies from 200 t.p.h to 400 t.p.h. with back pressure around 6 Bar. Communication with shore is poor with operator on quay speaking no English.

3 refrigerated holding tanks of 1×10,000, 2×5,000 tonnes nominal capacity plus 4×3,000 pressure spheres. The product is either heated into spheres and then transhipped into small coastwise tankers on berths "S1"/"S2" or pumped another 2 miles to a road tanker terminal near the refinery. Surveyor, SGS, has little knowledge of LPG calculations. 5 chicksans to West of LPG arms are for products plus numerous flange connections with rubber pipes on jetty.

Facilities: Fresh Water: On each berth, couplings American type. About 15 t.p.h. dependent on how many vessels taking water.

Fuel: On each berth both H.O. and D.O. available.

Access: A roadway to each berth with weight restriction of 16 tonnes and permission to discharge stores etc., within 20 m. of ship's side.

Repatriation: Salvador Airport 1 hour from terminal. Local flight to Rio International Airport.

Taxi: Costs £26 for round trip to Salvador.

Repairs: Basic repairs possible from Salvador.

Doctor: From Salvador will come very promptly, contact Agent.

Chandler: Principal chandler – Barbosa Costa, reasonable for basics.

Communications: Telex – International. Phone – Good Internal and International Direct Dialing (IDD). About £2 per minute to UK. There is a public call box in Jetty Operators Office which you can use to reverse charges overseas – very good and easy.

Consul: Salvador has an Honorary British Vice-Consul which comes under Rio de Janeiro and was very helpful.

Salvador: 241-3222.
Brasilia: 0612-25298, 252710, 252625.

Safety Equipment Certificate extended by 5 months through Brasilia and Salvador.

Lloyds: Non exclusive surveyor in Salvador – ABS, nearest exclusive is Rio de Janeiro.

Lifeboat: Can be lowered into water. A sandy beach on wooded island opposite terminal is popular with ships but watch tidal rise and fall.

REPORT: November 1982.

Butane/Propane at Petrobras Terminal (Temadre): Capacity 20,000 tonnes at minus 45°C. Discharge rate up to 500 tonnes per hour but dependant on vessel pumping rate. For daylight berthing vessels up to 50,000 d.w.t., max. draft 40 ft., vessels up to 118,000 d.w.t. max. draft 38 ft. Max. LOA 240 m.

Butane/propane vessels with over 20,000 tons to discharge may transfer excess across the Terminal to smaller gas tankers, sometimes unrefrigerated.

Larger vessels than limits shown have gone in. We had vessel (55,173 d.w.t./39 ft. 6 in. draft) earlier this month, which berthed by special dispensation of Port Captain, under considerable pressure from Petrobras. Vessel had less than 50,000 tons on board but limitation is on registered d.w.t., not cargo. Port Captain's Office now studying possible increase d.w.t. limit for 40 ft. draft vessels but not confirmed yet, so if you are working vessel over present limits please advise soonest and details.

Remember vessels proceeding to Santos to complete discharge must arrive there with 28 ft. draft or less. Usually there is no difficulty here with transferring propane to butane tanks on board to correct trim.

REPORT: May 1983.
Refrigerated LPG Discharge: Pipe-line length 3,000 m., liquid line diameter 18 in., vapour line diameter 8 in. Discharge using 3 liquid hose lines with 8 in. diameter and 1×8 in. diameter vapour hose line.

SHIPMASTER'S REPORT: July 1992.
Charts: B.A. Charts No. 540 and 545.
Approaches: The city of Salvador is very prominent, combining old and new tower buildings, and the bay cannot be mistaken.

Pta. de Santo Antonio, a black and white stripped tower lighthouse, is conspicuous.

Care should be exercised to stay South and West of Banco de Santo Antonio, which is marked at its Northern and Southern edges by light buoys. These buoys are not easily seen.

Salvador is the second most important naval base of the country, and as such, there are frequent warship movements in the approaches to the bay, which can create difficulties, as we found out on our visit.

When proceeding into the pilotage area, as marked on B.A. Chart No. 545, do not stray North of Banco de Panela light buoys, marking the shoal areas. With many ships at anchor in the vicinity, and confusion over the pilot launch, vessel can easily drift between the buoys.
Pilots: Pilots can be contacted on VHF Channel 16, working mainly on Channel 11. The range is poor. Pilot boards in area marked on B.A. Charts No. 540 and 545. Pilot Station is at the foot of Berth No. 1 in Salvador (12° 58.3′ S., 38° 30.9′ W.).

Pilot boards from fast red hulled cutter. Pilot cutter can easily be mistaken for service launches going to the anchorage, which also have red hulls.

Officially there is 24 hour pilotage to and from Petrobras Madre de Deus Terminal, although over 4 days, no ships were in fact berthed or unberthed overnight, most berthed around 0700 hrs. or 1800 hrs., depending on tide.

A pilot must be taken to anchor vessels off Salvador, either awaiting orders, berth or clearance before proceeding to Madre de Deus or Aratu.
Anchorage: The general anchorage is off Salvador City (See "Pilotage").

We anchored for clearance and to await a berth in position Lat. 12° 57′ S., Long. 38° 31.8′ W. Anchorage was fairly well sheltered but busy.

At Madre de Deus, an emergency anchorage can be found S.W. of Berth "P2". This area is also used as a swinging basin.
Tugs: Numerous tugs available.

At Madre de Deus Terminal, Petrobras have two of their own tugs of 1,500 h.p. on permanent stand-by. Extra tugs being called for large ships. Ship's lines are used.
Mooring: Tidal range is 1.5 m. at neaps and 3.0 m. at springs. There are strong currents off the berths. All ships for all berths are swung in the turning basin to S.W. of Berth "P2", and moored head-out or East. Therefore, for Berths "S1", "P1", "P2" and "P4", vessels berth port side to, and at Berths "S2" and 'P3", vessels berth starboard side to.

Berths were very busy during our 4 days stay.

Offshore anchor sometimes used, but as sufficient tug power per size of vessel readily available, anchor not used as often as in the past.

Moorings were 4 head/stern lines, 2 breast lines, 2 back springs, on all "P" Berths. Breast lines are very important, as they hold vessel onto jetty if there is a strong current.

Two powerful mooring boats used, and large mooring gang is also provided.

At old berths ("S1", "S2", "P1", "P2" and "P3"), moorings are onto bollards and fixed hooks. At Berth "P4" (new berth), moorings are onto quick release hooks with capstans.

Large fenders of cushioned rubber at each end of jetty berthing face. These keep vessels off jetty face by about 2.5 m., which can cause gangway difficulties. Due to strong currents and tidal range, moorings must be watched carefully.
Berths: Madre de Deus Terminal:

"S2" – 5.0 m. at L.W., hoses, coastal tankers – products.

"S1" – 7.0 m. at L.W., Chicksans, up to 10,000 d.w.t., products and LPG, discharging and loading.

"P1" – 12.0 m. at L.W., Chicksans, up to 75,000 cu.m. (LPG) or 100,000 d.w.t. (products) discharging and loading.

"P2" – 12.5 m. at L.W., Chicksans, up to 150,000 d.w.t., crude or products, discharging or loading. No LPG.

"P3" – 10.0 m. at L.W., Chicksans, up to 80,000 d.w.t., products, discharging and loading.

"P4" – 12.0 m. at L.W., hoses, up to 150,000 d.w.t., crude and products, discharging and loading.

LPG only handled at Berths "S1" and "P1". For Berth "P1", there are often long waits at Salvador Anchorage, as berth is very busy.

At Berth "P4", which was commissioned in March 1992, hoses only are used, lifted by ship's derrick/crane. There is a hydraulic gangway on the jetty.

At all other berths, ship's gangway has to be used, which can be difficult to land. We used midships accommodation ladder with painting stage between platform and jetty, with safety net and manropes.
Cargo: LPG imported and coastal loading at Berth "P1", liquid arm 10 in. and VRL 6 in.

LPG at Berth "S1" with 6 in. liquid arm and 4 in. VRL.

During our visit, the VRL Chicksan was out of action, and we used 6 in. shore hose connected at base of Chicksan. Again during our visit, the loading/discharging arm developed a leak, so ended up using a 8 in. shore hose connected to base of Chicksan.

Loading for coastal distribution: Propane product warm, between −28°C and −35°C, at a maximum rate of 400 t.p.h.

Butane product variable, between −3°C and +3°C.

If vessel is a fully refrigerated vessel, it will encounter great difficulties in loading warm Propane. Minimum rate can be controlled at ship's manifold, which is quite acceptable.

VRL: The use of the VRL does not seem to carry a charge. It is sometimes returned to the shore tanks and at other times it is flared. Little flow/return was found below 170 mbs. ship tank pressure. Above this, the flow rate is variable, depending on the degree of persuasion, ship can exert on Petrobras.

We found loading rate for Propane at average −30°C to be 55 m.t.p.h., and Butane rate up to 400 m.t.p.h.

Recirculating shore line between different products can be done up the vapour return line, but Petrobras will resist this if they can.

Discharging: From reports and previous experience, discharge is against a 6/8 Bar B.P. at rates around 400 m.t.p.h. There are a lot of shore stops.

Chicksans as for loading.

Tanks are about 2.0 km. away from berth, 20,000 tonnes refrigerated and spheres.

Normally large LPG ships up to 75,000 cu.m. will do a two port discharge (Salvador and Santos).

Little English is spoken by jetty personnel and Shift Managers. Each shift does a different thing.

Difficult to get hold of any one in authority.
General: Fresh water available on all berths at rate of 25 m.t.p.h. Ship's hoses and meter were used. Fresh water is also available at Salvador Anchorage at a rate of U.S.$ 10.00 per tonne by barge.

All grades of fuel are available at all berths. Gas oil and MDO is also available by barge at Salvador Anchorage, but not fuel oil (IFO).

Stores: There are a number of chandlers in Salvador, who call vessel on VHF when vessel first enters bay. They can deliver to within 20 m. of ship. Jetty can take weights up to 18 tonnes, and all traffic seems to be allowed on jetty roadway (trucks/vans/cars – diesel or petrol).
Note: Chandlers are to be paid by owners and not by Agent or Master (New Central Bank Regulation).

Repairs: We used EMS – Engenharia Manutencao E Servicos Ltda. Telex: 713780. Fax: 71 3129579. Tel: 71 3129715. They made a good job of both mechanical and electrical repairs.

No spares available at Salvador. Prices are very very high.

Telephone: IDD telephone in box at Control Cabin at Jetty, elbow about 100 m. from Berth "P1".
Authorities: Vessel cleared at Salvador Anchorage, even if coastwise. Usual volumes of paperwork. We were coastwise and the following were required: 'Rider' from Fortaleza, 6 Crew Lists, 2 Crew Effects Lists, 2 Stores Lists, 2 Vaccination Lists, 1 Port Rotation List, 1 'Nil' Passenger List, 1 'Nil' Firearms List and 1 Dangerous Drugs List.

No foreign exchange (U.S.Dollars) can be advanced to Master. This applies to all Brazilian ports.

SHIPMASTER'S REPORT: May 1996.
Pilotage: Compulsory. Pilot comes on board about 1 mile to the North and abeam of Point S.Maria for piloting ship and dropping anchor in Salvador roadstead. Ships stay awaiting berth and Port Authorities about 1 mile from the port breakwater. Usualiy drop one anchor with 4 shackles in water. Ground is very good holding. Pilot station "Salvador Pilot" on VHF Channel 16, working on Channel 13. Pilot comes by launch, which has an orange hull and white cabin with word "Pilot" on side.
Documents:

Clearance from the last Port.
Register (photocopy).
International Tonnage Certificate.
Cargo Ship Safety Equipment Certificate.
Safety Radio Certificate.
Cargo Ship Safety Construction Certificate.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
Derat Certificate.
Minimum Safe Manning Certificate.
International Pollution Prevention Certificate for the carriage of obnoxious liquids in bulk (if any).
Fitness for the Carriage of dangerous chemicals in bulk (if any).
8 copies Crew List.
8 copies Passenger List (or nil).
6 copies Personal Effects List.
4 copies Arms and Ammunition List.
4 copies Narcotics List (or nil).
1 copy Health Declaration.
1 copy Vaccination List against Yellow Fever.
1 copy List of Ports of Call.
6 copies Stores List.

Photocopies of all Certificates of Competence of all crew members from the Master to the last member onboard on arrival, for vessels clearance for sailing. If the member of the crew has no Certificate of Competence, a copy of his Seaman's Book where his rank is shown.

2 copies Bill of Lading.
2 copies Cargo Manifest.

A statement, including Master's full name, port of registry, official registered number, maximum draft on sailing, next port of call.
Watchmen: Compulsory, but his working hours are stevedores' working hours.
Fresh Water: Available, from barge (minimum order 85 tonnes) or from berth. Order through ship's Agent. From barge price is U.S.$11.00/tonne.
Ballast: Deballasting prohibited.
Currency: Local currency is the Real. U.S.$1.00 = 0.986 Reals.
Fuel: Available from barge. Agent requires advance notice.
Garbage Disposal: No service available.
Master's Remarks:

1. In Brazilian waters, NAVTEX system is not working.
2. For sailing near coast in darkness and in bad visibility, it is very difficult, as small wooden fishing boats do not show on radar.
3. Comcontromar – No answer to messages as radiotelex not working.

4. Weather forecast by radio only, no fax charts.
5. At any Brazilian port on roadstead, according to information from Port Authorities, ship and crew may be exposed to piracy attack by men with guns, particularly at night and in bad visibility. Recommended arrival in daylight.
6. Men and women without permission are prohibited to visit the ship. Very heavy fines of about U.S.$2,000 may be imposed upon the Master, watch officer or crew watchman, and vessel may be delayed.

Additional Information: Six days prior to arrival, ship's Agent constantly informs Master about berthing prospects.

Price of one trip on ferry boat or in Agent's car costs about U.S.$.100.00.

AUTHORITY: Companhia Das Docas Do Estado Da Bahia (CODEBA), Estacao Maritima De Passageiros, Avenida Da Franca, S/N, CEP 40.000, Salvador, Bahia, Brazil. *Tel:* (071) 243-5066, 243-5165, 243-5965, 243-5765. *Telex:* 071-1110. *Fax:* (071) 241-6712.

Porto De Salvador – Porsal, Avenida Da Franca 1551, CEP 40000, Salvador, Bahia, Brazil. *Tel:* (071) 243-5066, 243-5165, 243-5965, 243-5765. Port Control: 242-1341. Port Administration: 242-4570. Traffic: 242-5998. Port Guard: 242-3497. Telex: 071-1110. *FAX:* (071) 2416712. *Contact:* A. Barreto, Port Manager.

AGENT: Wilson Sons Agencia Maritima Ltda., Avenida da Franca 164, Edificio Futuros, 8th Floor, Rooms 801/805 to 811, 40010-000 Salvador BA. Tel: (071) 241-4411, 241-4186, 241-4105, 241-4389, 241-4421 (After hours: (071) 379-2910, (071) 367-2744). Telex: (71) 1941 SCSA BR. Fax: (071) 241-8709. Cables: Saveiros.

SANTANA (Macapa): 00.03 S. 51.11 W. (See Plan)

DOCUMENTS: Also see "General" before first port.
6 Crew Lists.
3 Crew Personal Effects Lists.
7 Transit Passengers List or Negative Passengers List.
3 (each) Stores Lists (engine, deck and bonded).
5 Cargo Manifest or Ballast Declaration.
7 Disembarking Passengers List (if any).
3 Maritime Health Certificate.
3 Vaccination Lists.
Derat Certificate.
Maritime Police Pass (when proceeding from Brazilian Ports).
Clearance Certificate.

PILOTAGE: No Pilots available either for the North Channel entrance and/or for docking and casting off operations.

ANCHORAGE: In front of the port, protected anchorage between mainland and Santana Island, where vessels can safely anchor at any location. Bottom is mud.

RIVER NAVIGATION: Outer bar transit restricted to 32 ft. at LW and 37 ft. at HW. When loaded and outward bound, the Master should study carefully the tides and direction of currents.

RESTRICTIONS: Vessels can depart at any stage of tide. Night transit in North channel is at Master's discretion.

Channel transit restricted to 32 ft. in low water. Due to shifting of mud banks it is recommended that a set of up-to-date Brazilian nautical charts, covering from outer bar to Santana Port, should be used.

The Hydrographic Office of The Brazilian Navy, based on date furnished by the Brazilian National Astronomical Observatory, publishes an annual tide table for the majority of Brazilian ports, including Barra Norte do Rio Amazonas-Ilha do Brigue – Lat. 00° 55′ N., Long. 50° 05′ W. and Porto de Santana.

Nautical charts and tide tables are available through the vessel's Belem (Para) Agent.

Shipmaster's Report: The above is correct but we would advise you to add: "The charts and books are delivered by pilot launch off Salinopolis (the Pilot Station for the port of Belem), if ordered well in advance via Belem's Agent. The meeting point, anchorage, can easily be reached on B.A. Chart No. 520 and is described in South America Pilot Volume 1 (eleventh edition 1975), page 53, line R 41 – 45".

In certain periods, but mainly from April to August, there are large logs, trees, etc., drifting down river.

MAX. SIZE: On East side of floating ore pier, general cargo pier has a depth alongside of 29 ft. Along floating ore pier depth ranges from 35 ft. to 90 ft. (at LW). 35 ft. on East end of pier. Tidal range about 9 ft. to 11 ft. Tidal current at middle of river ranges from 2 to 3 knots, while close inshore along ore dock it runs approximately 1 – 1.5 knots. Amazon river water at Santana is fresh in spite of tides.

Port of Santana: Alongside the floating ore pier, the tidal current continues to run for 60 minutes beyond the time computed from the table. In mid-stream, the delay in the change of current is 90 minutes, depending on the river flow.

Report: September 1986.
Max. LOA 707 ft. 08 in.
Max. beam 95 ft. 02 in.
Max. air draft 40 ft.
Max. sailing draft 32 ft. LWOST. 37 ft. HWOST.

HEALTH: Health authorities visit vessel arriving from abroad. Authorities require regular ship's gangway to be lowered. Jacob's ladders not accepted. Also see "General" before first port.

RADIO: Vessels scheduled to load ore at Santana must radio Belem (Para) Agents (preferably via Chatham, Amagansett or Belem Radio) at least 48 hours prior to ETA North Channel. Other means of communication not satisfactory and result in delay.

TUGS: No tugs available.

BERTHING: *Private Floating Pier:* Length 247 m. Depth of water 10.6 m. A retractable loading arm loads Manganese at an effective average loading rate of 1,000 long tons per hour for each hatch loaded.

Also see "Shipmaster's Report".

Macapa Pierhead: Length 18 m. Depth of water 8.8 m. Fitted with a 65 ton crane, and used for general cargo handling.

Recommended that amidship hatches be used for Santana cargo. Vessels berth according to direction of tidal current. Berthing operations assisted by a motor craft to place lines on shore, East of pier. On West side, lines moored to the bitts on floating fender. Linesmen available to assist berthing and shifting. Ore carriers have preference when docking.

When berthing, use of the anchor must be avoided except in an emergency.

Cais Portobras: Woodchip Berth – See "Shipmaster's Report" dated April 1993.

STEVEDORES: Stevedores are available at Macapa about 25 km. by road from the port. Rates and other pertinent details must be arranged through the ship's Agents. Conveyor belt for ore loading fixed, consequently vessels must be shifted by own winches to load various hatches. Effective average loading rate 1,000 t.p.h. Special caution must be taken not to pump all ship's ballast before loading starts, since the height of boom is 40 ft. above water level. Cargo belt trimmed only.

MEDICAL: Medical attention may be arranged at Macapa through ship's Agent.

TANKERS: Discharge at the Dolphins Pier, about 150 m. West of floating pier. Depth 8.0 m. Pipe-lines lead to tanks ashore (distance from pier 1,000 m.). Storage tanks have capacities for 35,000 barrels of diesel oil, 9,500 barrels of gasoline and 60,000 barrels of fuel oil. There are no shore facilities available at the terminal for receiving slops, dirty or contaminated ballast. Masters are cautioned that discharging of anything other than uncontaminated ballast will be subject to penalties as prescribed by Brazilian law.

(See Pollution Regulations in "General" before first port).

DENSITY: The Amazon river water at Santana Port is fresh water at any stage of tide. Checking density during load operations is recommended.

FRESH WATER: No drinking water available.

FUEL: There is no suitable installation for fuel supply. See "General" before first port.

CONSULS: None. Documents which are to be visaed by a Consul must be sent to Belem.

REPAIRS: Only in cases of extreme emergency and then only minor repairs.

GANGWAY/DECK WATCHMEN: Gangway watchman compulsory.

OPENING/CLOSING HATCHES: Ore carriers: Service carried out by crew. General cargo vessels: Service executed by stevedores.

CUSTOMS ALLOWANCES: Limited quantity for use during ship's stay.

CARGO GEAR: No additional requirements as to gear. A heavy-lift stiff leg derrick mounted on the pier. Boom: 60 ft., Mast: 37 ft. 6 in., Capacity: 65 tonnes. Mobile crane (maximum lift 40 tonnes) available for discharge of general cargo from small vessels.

REPATRIATION: Effected by ship's Agent. No Immigration Authorities at Macapa.

AIRPORT: Macapa Airport 25 km. from Santana near city of Macapa. Scheduled domestic flights from Belem to Macapa, a trip of 25 minutes.

TIME: GMT minus 3 hours.

HOLIDAYS: New Year's Day (January 1st); Tiradentes (April 21st); Martyr of Independence; Labour Day (May 1st); Independence Day (September 7th); All Saints' Day (November 2nd); Proclamation of the Republic (November 15th); Christmas Day (December 25th).

TELEPHONES: No facilities for placing telephones on board.

GENERAL:

Aids to Navigation – Radio Beacon – A radio beacon is installed at Ponta do Ceu, marking the entrance from the open sea to the river proper. It is operated by the Brazilian Hydrographic Office and the main details are:

Frequency	– 290 kHz
Signal letter	– EH
Working hours	– Continuous
Geographical position	– Lat. 00° 45′ 40″ N. Long. 50° 06′ 58″ W.
Range	– 300 miles.
Signal	– A0 and A2 (1020 H2)
Character of signal	– (EH.....) Twice in A0 during 10 secs. and A2 (1020 H2) during 5 secs.

Vessels have reported that certain times the beam may stray as much as 15°/20°. This straying is most noticeable during early evening and at dawn, less so during the night, and least during the daytime hours.

Industria e Comercio de Minerios S.A. – ICOMI is not responsible for the location and operation of the various aids to navigation (lights, radio beacon, buoys, etc.).

COMMUNICATION: *Notices* – Vessels scheduled to load ore at Porto de Santana, must send radio to Belem (Para) Agents (preferably via Chatham, Amagansett or Belem Radio) at least 48 hours prior to their ETA North channel. Agents forward this information via telephone to their representative in Macapa who notify the shippers.

Telephone: Telephone communications between Porto de Santana and all Brazilian cities and also international calls, via Embratel (Brazilian Telecommunication Company) are possible every day, Sundays and holidays included.

Telegraph: There is a public telegraph service in Macapa, operated by the Brazilian Post Office and Telegraph Department.

Cable: International Cables are speeded by phoning them to the Agents in Belem (Para) who file them in the local cable offices there.

Mail: Ship's or crew's mail should be addressed in care of the ship Agents in Belem (Para). Mail should not be addressed to Macapa or to Santana.

POLLUTION REGULATIONS: Brazilian Legislation contains several sanctions and penalties applicable to those who cause pollution of any kind. The prohibition against the execution of acts which cause pollution and the respective penalties, both administrative and pecuniary, are principally contained in The Federal Law No. 5318, dated 26/9/67, and in the National Policy for Sanitation, in the Decree No. 221, dated 20/2/67 – Fishing Code, in the Federal Decree 5798, dated 11/6/40, on Rulings for Maritime Traffic, and in the State Law (State of Rio de Janeiro) No. 6753, dated 10/12/71.

The sanctions and penalties can be applied cumulatively against infractors, and among those, special attention is called to the penalties foreseen in Federal Law No. 5357, 17/11/67, of which the first article reads:

"Article 1 – Vessels or maritime or river terminals of any kind, foreign or national, which discharge debris or oil in waters which are within a strip of 6 (six) nautical miles from the Brazilian coast, or in rivers, lakes or other stretches of water, will be subject to the following penalties:

(a) Vessels, to the fine of 2% (two per cent) of the greatest minimum salary in force in the national territory, per gross register ton or fraction thereof:

(b) maritime or river terminals, to a fine of 200 (two hundred) times the greatest minimum salary in force in the national territory.

Sole paragraph – in the case of repetition the fine will be applicable in double".

In addition to the administrative and pecuniary penalties, under the new Brazilian Criminal Code, (Decree-Law No. 1004 of October 21, 1969, which was put in effect as of January 1, 1974, according to Law 5857/72, acts causing pollution constitute a violation punishable with imprisonment as follows:

"Article 303 – Pollute lakes and rivers or, in inhabited places, the shores and the atmosphere, thus breaching provisions of federal laws or regulations:

Penalty – Imprisonment up to 3 (three) years and payment of a 5 to 25 day fine.

Sole paragraph – If the crime is not wilful the penalty shall be imprisonment from 2 months to 1 (one) year".

IDENTITY CARDS: Foreign Crew members not permitted to go ashore without presentation of identity card, on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on dis-embarkation to the Federal Police who will return it to the crew member on re-embarkation.

SHIPMASTER'S REPORT: July 1982.

The following concerns our recent visit to Santana to load bulk manganese ore, destined for Canada. The following should be read together with "The Pilot Book" and "Guide to Port Entry".

Communications: We were provided, by Charterers, with Agent's address, including cable address, in Santana. However cables sent here could not be delivered. All communications then sent to Agent in Belem. They responded with berthing instructions. Agent assured me that mail to Europe takes 5 to 6 days only. Incoming mail must be addressed to the Belem Agent and not direct to Santana. Agent has a VHF set but it is currently out of order. Contacted Macapa Radio on VHF Channel 16 when passing but they did not pass the message on to Santana.

D/F: When some 200 miles from the beacon at Pta. do Ceu, a clear sharp signal was obtained. However, when crossing the Barra Norte, the signal was poor with a spread of 10 to 12 degrees. Generally showing the correct bearing though and it is the only aid to navigation.

Pilots: There are no Pilots available for the passage from sea to Santana. A competent Pilot boarded at the anchorage and aided the berthing operation. This same Pilot should have aided the sailing but he arrived late and vessel was already leaving the pier. I understand that vessels proceeding further up the River Amazon embark Pilot at Santana. A mooring boat and line handlers are provided.

Charts: I found Admiralty charts adequate for the in-bound, light ship, passage. Purchased seven Brazilian charts from the Agent and these were invaluable for the outbound passage. Large important sections have been surveyed 1980. Similar detail to Admiralty charts but much better scale.

Navigational Marks: Found all buoys and beacons as charted inbound. They are well laid out and are about adequate. Outbound found Barra Norte No. 2 Buoy missing. This fact was reported to Belem Agent. Inbound and outbound passages were mostly in daylight so I cannot vouch for the lights.

Landfall: No. 2 Buoy was sighted at 14 miles on radar and visually at 10 miles. All buoys showed well on radar. Pta. do Guara Lighthouse well defined on radar at 24 miles. The coast line Northward of Rio Araguari was clearly visible on radar at 24 miles.

Tide Tables: Used Admiralty tables inbound. Predictions are based on Georgetown, Guyana. Crossing Barra Norte, inbound, could not make tidal streams conform with predictions. After berthing purchased Brazilian Tide Tables from Agent. The predictions for Santana were found to be similar in both sets of tables. However for Barra Norte found High Water some 4.5 hours and 2.2 m. difference between the tables. Sailed on basis of Brazilian predictions and found that tidal streams conformed much better. Inbound, light ship, the height of tide is not so important. Santana direction of tidal stream, which dictates berthing, is correct. Outbound use Brazilian tables and charts. The chart has a good tidal rose.

Santana Anchorage: As another vessel was already alongside I passed the berth and anchored about 1 mile above the berth in a deep pool at the confluence of three creeks. Stayed here for some 36 hours and noted that the flow of tide continues for some 60 to 90 minutes after the Admiralty predicted High and Low Waters.

Customs: Conscientious and efficient. A search of store rooms, cabins, lockers and cargo spaces was carried out. This took 1.5 hours and Agent assured me that this is normal. Two Customs Officers lived onboard throughout our stay. They come complete with spare seal should you wish to visit bonded stores.

Immigration: All matters taken care of by the Agent.

Port Health: Most thorough and meticulous. All medical books checked. The Brazilian Government is sponsoring a massive drive against Yellow Fever. Next morning Port Health Doctor returned to the vessel and vaccinated all who did not have proper documentation. International 10 year certificates issued.

Extended Derat Exemption for 6 months on proper form.

Watchman: A shore watchman was provided. Very useful for keeping the canoe people off the vessel. Also useful as a runner to the Agent.

Pier: The pier is 247 m. long, lies along 100°/280° and has a freeboard of about 4 ft. It floats on pontoons and is connected to the shore by 2 arms. It has a wood faced rubbing strip. Adequate rams horn bollards are provided. There are 2 mooring buoys at the Western end of the pier. See "Plan" for moorings and soundings.

Cargo: Vessel alongside for 48 hours and loaded 25,408.6 tonnes. Cargo pours out at a rate of some 800 tonnes per hour. Some time is lost shifting vessel up and down the quay to locate hatches under the chute. Our seven shifts accounted for 4.5 hours. When the tide is "kind" these shifts are easy enough, other times not so easy. Before the final pour into the last hatch operations were halted for 3 hours while samples were analysed. The belt weight was found to be accurate when compared to draft. There is no trimming. It lies where it falls.

Chute: The loading chute floats on a separate pontoon. The air draft is 40 ft. and of course is not affected by tide. The chute can be adjusted to pour across the ship thus taking care of vessels with varying beams.

Language: Few shore people had any knowledge of English. No personnel aboard could speak their particular brand of Portuguese. Final documentation all completed in perfect English.

Provisions: Fresh provisions were puchased and prices were reasonable. Used American dollars from Master's safe.

Fresh Water: Fresh water is not available. The loading rig has a system of pouring water to keep the belt wet, but this is just river water.

SHIPMASTER'S REPORT: April 1988.

The passage to Santana is through the Amazon River and North entrance is declared safe for navigation without pilot. The distance from North Bar to Fazendinha Anchorage (boarding place for Immigration and Pilot) is about 172 nautical miles. The Buoy "BF-2" in position 01° 34.2′ N., 49° 00.9′ W. is equipped with Racon (G) and marks the entrance of the river and North Bar. Vessels in ballast should not have any problem except for tidal stream, missing or out of position channel buoys, etc. The depth at the river mouth is subject to change to some extent and it is advisable to obtain latest position of buoys from Belem or Santana Agent. River transit in the night is risky due to unlit buoys. Otherwise the river is quite deep and wide. The shore Racons at Pta. do Guara and Ilha do Bailique were found functioning. The D/F bearings of Pointa do Ceu and Salinopolis Stations can be relied upon to some extent.

There is no berthing at night and the vessel is taken alongside from Santana Anchorage during floodtide. There is a fixed loader and frequent warping of the vessel can be avoided by keeping loading changes to a minimum.

On the outward passage in the river, the vessel anchored off Pointa do Ceu and the current was found to be quite strong. The North Bar (charted depth less than 10.0 m.) is about 15 miles long and it is advisable to enter one hour before High Water. The vessel procured Brazilian charts and tide tables which were of great assistance. The tides at the North Bar are about 4 hours 4 minutes ahead of tide timings for Ilha do Brigue.

SHIPMASTER'S REPORT: April 1993.

Port of Cais Portobras – Macapa:

River Transit: The passage to Cais Portobras (Macapa) (Chipwood Berth) is through the Amazon River via the North Bar entrance which was declared safe for navigation without the Pilot. The distance from the North entrance to the Pilot Station is about 171 miles, the distance to Cais Portobras is about 3 miles, and the position of the Woodchip Berth is about one mile East of Port of Santana. We were the second vessel to load this type of cargo in this port. The position of the Entrance Buoy on North Bar (the "Amazonas 1" with Racon signal (G)) was 01° 34.2′ N., 49° 01.6′ W. Vessels in ballast condition should not have any problems, except for strong tidal currents and out of position channel buoys at Curua Channels.

The depth in the channel is subject to frequent changes. It is advisable to obtain the latest information from your Agent in Belem. River navigation at night is risky, due to some buoys being unlit and some large floating logs can be encountered, specially during rainy seasons. Global positioning system (GPS) was used as an aid during river navigation and it rendered great assistance for river transit and back-up to ARPA Radar.

On the outbound transit in the North Bar, the vessel can anchor East of Pta. do Ceu or 2.0 miles West of Buoy No. 11 and with 15.0 m. charted depth for waiting high water. Vessels with draft of 35 ft. (10.67 m.) will not have any problems crossing the North entrance on high water. Prudent mariners should be alert for the strong currents in this area.

The charted depth at the North Bar was less than 10.0 m., and it is advisable to enter the channel 4 hours and 20 minutes before high tide, to obtain the maximum depth. The vessel utilised Brazilian tide tables which were of great assistance. Charts used in the river were American charts, which we compared with Brazilian charts, and there was quite a difference, especially the charted depth of 9.1 m. in between Buoys No. 11 and 12, that was not corrected on Brazilian charts. Also the changes in light tower in Ilhas Pedreiras was not updated on Brazilian chart. It is also advisable to check with latest American Notice to Mariners, Charts Corrections and Sailing Directions Publications for this area.

Docking/Undocking: The docking and undocking of the vessel is only done at daytime and only during flood tide, which the competent Pilot used to advantage. There will be no tugs to assist the vessel to dock alongside the berth. Vessels always come alongside port side to. However, due to favourable conditions of the river in the vicinity of the berth, difficulties are not excpected during manoeuvring of vessels.

Loading: There is a movable chiploader in this berth that can be spotted in the centre of every hold and loaded by gravity through spout loader that can rotate 360°. The average capacity of loader is 500 t.p.h. – 600 t.p.h. The length of the berth is approximately 200 m.

Stevedores: The longshoremen here are not very familiar with loading procedures, probably because this is the first chipberth in Macapa area. Stevedores require constant guidance to attain the maximum load required for the vessel.

The trimming is done with a 9 ton bulldozer which makes loading time longer.

Message: P&I Club to P&I Club, dated October 1992.

Please note following information obtained by our agency department about the loading of chips at Macapa:

1. There is a Japanese company's building facilities for production/ export of woodchips at Santana (Macapa).
2. The facilities include a loading terminal at Santana, which will be approximately 200 m. long, allowing vessels up to 220 m. long to berth, and a draft of about 37 ft. (11.28 m.), which is the maximum allowed at the estuary of Amazon River at H.W.
3. There will be no tugs to assist vessel to dock alongside the terminal. However, due to favourable conditions of the river at the site of the terminal, difficulties are not expected for vessel's manoeuvring.
4. Dredging of the terminal and approaching area will start soon, and it is expected that by beginning of 1993 the terminal will be operative.
5. Pilot boards vessels at Fazendinha, not at mouth of river. Navigation from river mouth to Fazendinha presents no problems, and vessels of 60,000 d.w.t. – 65,000 d.w.t. usually transit there when going to Port Trombetas to load bauxite.

AUTHORITY: Companhia Docas do Para, Porto de Macapa, Av. Felinto Muller, Santana, PA, Brazil. *Contact:* Agostinho Raiol da Cunha, Manager.

AGENT: See "Belem".

SANTAREM: 02.25 S. 54.43 W. (See Plan)

LOCATION: Also see "General" before first port.

Santarem is located on the right bank of the Tapajos River which joins the Amazon River.

APPROACHES: *Bar:* Width 1,100 m. depth 17.0 m. – 25.0 m.

Access Channel: Length 2,590 m. width 1,500 m. minimum depth 15.0 m.

Manoeuvring Basin: Minimum width 1,500 m. minimum depth 15.0 m.

MAX. SIZE: Max. draft 10.0 m.

BERTHING: 520 m. of quay of which 380 m. is a pier, 2 warehouses with an area of 3,000 cu.m., open air area of 10,000 sq.m.; mechanical workshop, 60 ton weighbridge, administrative building, water tower and residence for the Port Administrator.

2 deep sea vessels or larger coasters can come alongside, with a minimum of 10 m. depth of water, and at the same time, 2 vessels of lesser draft can be berthed in the inner area where the depth is 6 m.

To handle river vessels, there is a marginal quay, with a minimum depth of 3 m.

There are at present 2×6.3 ton cranes, with plans to install a further 4.

1 mobile crane, capacity 9.1 tons

The principal export is meat which is delivered by road. A cold store is to be built.

FUEL: Fuel oil available at Petroleo Sabba private wharf. Also see "General" before first port.

AUTHORITY: Companhia Docas do Para, Avenida Presidente Vargas 41 – 20 Andar, Belem, Para, Brazil. *Tel:* 223-0056, 223-2066.

AGENT: See "Belem".

SANTOS: 23.56 S. 46.19 W. (See Plan)

PORT LIMITS: The Port of Santos is situated in the centre of the State of Sao Paulo, and the port installations spread over an estuary bounded by the islands of Sao Vicente and Santo Amaro.

The port limits are:

(a) Parallel alignment of 24° 02.7′ S., in the limits Morro do Munduba (Munduba Hill) and Ponta do Itaipu (Itaipu Point).
(b) Mar Pequeno.
(c) Channel of the Port of Santos.
(d) Piacaguera Channel.

DOCUMENTS: The following documents, etc., are required to be presented to the Authorities upon ship's arrival.

Port Health Authorities: (Saude dos Portos – SAPORTOS):

1 Crew List
1 Free Pratique Certificate from the first Brazilian port of call, if any.
1 Maritime Declaration of Health (only at the first Brazilian port).
Derat Certificate.
1 Vaccination List.

To Custom House: (Delegalia da Receita Federal - D.R.F.):

3 Crew Lists.
3 Store Lists (Deck, Engines, Cabin, etc.)
3 Lists of Crew's Personal Effects.
1 copy of each of the above Lists duly visaed by the Customs House of the previous Brazilian port of call, if any.
1 copy each Cargo Manifest plus 1 copy of each Bill of Lading covering cargo loaded at foreign ports for Santos, duly signed/ stamped by the Master.
1 Customs House Sailing Pass from the last Brazilian port of call (if any).
3 List (Master's Declaration) covering empty containers to be discharged at Santos (if any).

Maritime Police/Immigration Authorities: (Delegacia da Policia Federal – D.P.F.):

5 Crew Lists
3 Stowaway Lists, if any.

All valid Passports/Seamen's Books to be verified on vessel's arrival. Immigration Sailing Pass from the last Brazilian port of call, if any.

Port Captaincy – (Capitania dos Portos do Estado de Sao Paulo):

Master must fill out an Arrival Declaration giving all data concerning his vessel as well as the number of crew, passengers on board, ports of call, cargo loaded at this port, Agents, etc., which will be supplied by the Agents on vessel's berthing.

The following Ship's Certificates must also be presented on vessel's berthing:

Certificate of Registry of the Vessel
Cargo Safety Equipment Certificate
Cargo Radio Safety Certificate
Cargo Ship Safety Construction Certificate
International Load Line Certificate
Derat Certificate
Port Captaincy Sailing Pass from the last Brazilian port of call, if any, must be presented on arrival.

PASSENGERS: Whenever there are passengers on board, the following additional documents are required:

(a) *Passengers in Transit:*
1 Passenger List (Port Health Authorities)
5 Passenger Lists together with the respective valid passport (Immigration)
3 Passenger Lists (Customs House)
1 Passenger List duly visaed by the Customs House of the previous Brazilian port of call, if any (Customs House).

(b) *Passengers Disembarking:*
5 Passenger Disembarking Lists to the Immigration Authorities
2 copies of Luggage Declaration duly signed/stamped by Master for the Customs.
The valid passport to be verified on vessel's arrival by Immigration.
3 copies of Passenger Disembarking Lists for the Customs House.

NOTE: All items missing from Stores Lists (deck, engine, radio, tools, etc.) and found during Customs inspection willl be confiscated.

APPROACHES: *Santos Approach:* Santos Approach Fairway is marked on Chart No. 1701 of the DHN (Hydrographic Office), displaying all necessary information concerning beacons, buoys (buoyage system IALA "B"), depths, leading lines.

As projected depths appearing in Chart No. 1701 are still not available in certain sections, vessels shall observe "Notice to Mariners" or call the Pilot Station for actual depth. Mean depth is 12 m. for Section A, 11.5 m. for Sections B and C and 12 m. for Piacaguera Channel (Section D). Along the general cargo quay depth does not exceed 36 ft. at HW and may get as low as 32 ft. at LW. (Also see "Developments").

PILOTAGE: Pilot Station for Santos District is at Avenida Saldanha da Gama 64, Santos. Tel: 36-8036. Cables: Praticagem – Santos. VHF Stand-by on Channel 16 (24 hours).

Pilotage is compulsory for all vessels carrying dangerous cargoes, all foreign vessels and Brazilian vessels of more than 500 g.r.t., when entering the Santos Fairway Area and Santos Port Inner Anchorage. Vessels shifting berth, changing anchorage and other special manoeuvres must have a Pilot on board. Local pilotage services include pilot boats for transporting the Pilots and mooring boats. Pilot boats are red and shall fly, exhibit, display, hoist and sound:

(a) By day the pilot flag, being a red flag with a black letter "P", displayed from the main top mast;

(b) By night the lights as prescribed by Rule 29 of the Regulations for Preventing Collisions at Sea in respect of mechanically propelled pilot vessels;

(c) During fog, mist, heavy rainstorms or any other weather conditions which in like manner causes visibility to deteriorate, the fog signal as prescribed by Rule 35 of the Regulations for Preventing Collisions at Sea in respect of mechanically propelled vessels.

Incoming Vessels: In order to avoid possible delay ships bound for Santos Port should act as follows: at least 2 hours in advance the inward vessel is to report by radio-telephony on VHF Channel 16, stating her ETA, draft and further information. Berthing instructions available at Pilot Station will be sent immediately after first contact.

Vessels on Arrival: Arriving vessels awaiting berth may enter within Outer Anchorage without pilot assistance, taking care not to cross the buoyed channel and keeping clear of leading line "A" (021.5° True bearing) and maintaining continuous listening watch on VHF Channel 16.

Port Pilotage: In general, Pilots shall be picked up and dropped abreast of Palmas Island (near Parallel 24° 00′ 33″ S.) about 0.6 miles off. Deep draft incoming vessels shall embark Pilot abreast of Ponta Grossa about 0.9 miles off or as advised by Pilot Station. When unfavourable weather conditions prevail in the Santos Fairway area preventing Pilot boarding, vessels shall remain at anchor. In case of emergency, however, vessels shall follow the pilot boat as far as conditions allow Pilot to be safely picked up. If the Pilot is unable to disembark from an outward bound vessel, he shall be landed at the nearest port.

Requesting a Pilot: According to the Brazilian Pilotage Agreement vessels requiring a Pilot shall make an application for a Pilot not less than 4 hours in advance by telephone, VHF or any other suitable means of communication (provided later confirmation in writing is furnished), also indicating the exact time the Pilot is wanted on board. Nevertheless, a prompt service can be provided under special arrangement.

Pilot Ladders: Vessels engaging pilot services shall comply with the requirements respecting pilot ladders pursuant to SOLAS Rule 17.

"H" Flag: Vessels carrying a Pilot on board shall hoist the international code signal "H" otherwise they will be subject to a fine by the Harbour Master.

Note to Masters: Pilot shall be supplied with meals when rendering services at their respective regular times. The Master shall give the Pilot all requested information concerning vessel's condition and characteristics and shall, on the completetion of the pilotage service, sign the Pilotage Certificate on the form submitted by the Pilot. Masters are advised to have the vessel's engines ready to work at their maximum output if necessary.

Dangerous Goods: Ships carrying explosives and other dangerous cargoes shall give notice at least 2 hours before arrival and 1 hour before departure via cable, telex or VHF to Pilot Station stating:

1. Name and call-sign.
2. Nationality.
3. Draft and gross tonnage.
4. Nature and quantity of dangerous cargo.
5. Berth.
6. ETA/ETD.
7. Agent.

ANCHORAGE: The following anchorages shall be observed in the Port of Santos area as indicated on Chart No. 1701 of DHN (Hydrographic Office) and permission to lie at anchor outside these areas shall be obtained in case of force majeure through the Harbour Master. Vessels are requested to note submarine cables near Anchorages No. 3 and 4 and ocean outfall near Anchorage No. 4.

(a) Anchorage No. 1 (Inner): Accessible for 3 vessels up to 180 m. LOA and with a maximum draft of 8.23 m. (27 ft.).
(b) Anchorage No. 2 (Inner): 50 m. off beach, accessible for small and pleasure crafts.
(c) Anchorage No. 3: For warships only.
(d) Anchorage No. 4: For vessels up to 100 m. LOA and maximum draft of 5.79 m. (19 ft.).
(e) Anchorage No. 5: For vessels up to 180 m. LOA and maximum draft of 9.75 m. (32 ft.).
(f) Anchorage No. 6: For vessels up to 180 m. LOA and maximum draft of 9.75 m. (32 ft.).
(g) Anchorage No. 7: For deep draft vessels.

Restrictions: Anchoring in Anchorage No. 1 is allowed only for 24 hours, but an extension of stay may be obtained from Harbour Master's Office in special cases. Due to strong Northwesterly winds, common in this area, Masters are advised to have vessel's engines and crew on standby.

Navigating and anchoring near military fortresses of Itaipu ("Itaipu") and Guaruja ("Andradas") is prohibited. All craft are requested to keep clear of the areas of Morro do Itaipu (Itaipu Hill) and Morro do Munduba (Munduba Hill) within a range of 100 m.

RESTRICTIONS/MAX. SIZE: Vessels drawing 36 ft., but not exceeding 38 ft., shall only be piloted at H.W. Night manoeuvring in such cases are under study; meanwhile maximum draft at night is 34 ft. at HW for Sections B and C. (Note: Max. draft at Alemoa No. 2 is 35 ft. 6 in. and at Alemoa No. 1 it is 31 ft. 6 in.)

In the Piacaguera Channel (Section D) vessels shall observe following limitations due to same reduced width and basin dimensions according to the latest dredging (1984):

Maximum breadth	33 m.
Length overall	228 m. (day), 215 m. (night)
Maximum draft	35 ft. 6 in. (salt water) 36 ft. (fresh water)

(a) Berthing at outer side of Cosipa's Pier:

Length	228 m.
Breadth	33 m.
Draft	36 ft.

(b) Berthing at inner side of Cosipa's Pier:

Length	228 m.
Breadth	33 m.
Draft	36 ft.

(c) Berthing at Ultrafertil's Pier:

Length	200 m.
Breadth	33 m.
Draft	31 ft.

Note: Vessels negotiating the Piacaguera Channel shall employ 2 tugs, 1 at least to be made fast. But vessels drawing more than 36 ft. shall navigate only by daylight assisted by 4 tugs within Saboo/Alemoa area and 3 tugs within Alemoa/Cosipa area (only 1 vessel at a time can pass through this channel).

Tidal Information: Mean rise and fall is about 1.5 m.; spring tide stream may reach up to 1 knot at the flood and about 1.4 knots at the ebb. Exact figures are shown on the tide tables and tidal stream tables for the Port of Santos published by the DNH (Hydrographic Office).

Speed Regulations: The allowed maximum speed in the channel is 8 knots in order to secure safe navigation. Moored vessels must be passed in such a way that no hindrance or inconvenience from suction and backwash may be caused.

HEALTH: Port Health Authorities consisting of 1 doctor and 2 assistants will check all vaccination certificates (cholera and yellow fever) and issue a Free Pratique Pass, which shall remain on board for presentation at subsequent Brazilian ports of call. Masters can obtain Free Pratique by radio, which does not mean that the doctor will not come on board, but only that other Authorities can board the ship before his arrival.

Free Pratique by Radio: Master should radio to Agent (in Portuguese) as follows:

Quote:
Para Saportos Santos
c/o Agents (Cable Address)
Navio Bandeira (vessel's flag) (vessel's name)
Procedente (Last Port of Call) com (number of crew) tripulantes abordo stop Condicoes sanitarias abordo satisfatorias na conduzindo nenhuma pessoa com doenca infecto contagiosa stop
Solicito livre pratica
Comandante (Master's name) Unquote.

RADIO: Santos Coastal Station, VHF Channel 16. Working 24, 25, 26 and 27. S.S.B. facilities will be available at a later date.

VHF: *Ship Reporting System:* Compulsory system in effect for vessels over 20 g.r.t. Call sign: PWS 88. Channels: 16, 11, 12, 13, 14, 68, 69, 71 and 74.

Procedure:

1. Vessels should report:
   (a) On anchoring.
   (b) On leaving an anchorage.
   (c) Abreast of Ilha das Palmas (inward-bound).
   (d) Immediately before leaving berth (outward-bound).
2. Reports should include:
   (i) Vessel's name.
   (ii) Call sign.
   (iii) Flag.
   (iv) Port of departure (inward-bound).
   Destination (outward-bound).
   (v) Type of vessel.
   (vi) Anchorage or berth (inward-bound).
   Estimated date of arrival at destination (outward-bound).
   (vii) Estimated date of departure (inward-bound).
   Cruising speed (outward-bound).

Vessels shifting anchorage or berth report vessel's name, call sign, and previous and present position.

3. Reports are to be Portuguese (request assistance in transmission from Pilot, Pilot Station or Santos (PPS) Channel 16, as necessary).

4. Vessels unable to contact the Control Post inform the Captaincy of the Ports of the State of Sao Paulo stating vessel's name, date, time (GMT) and reason for not reporting.

TUGS: 14 tugs available, equipped with radios (VHF Channels 10, 13 and 16) horse-power range from 1,010 h.p. – 2,360 h.p. 2 small tugs available, 505 h.p. – 545 h.p.

The use of 2 tugs or more is compulsory in the Piacaguera Channel – see "Approaches".

Vessels should dock, preferably against the tide.

The assistance of at least 2 tugs will be obligatory in the following places:

Saboo Quay – Points 1, 2 and 3.

Warehouses 13, 26 and 9, where the pneumatic wheat unloaders are located;

Piacaguera Channel: Cosipa, Alamoa, Ultrafertil and Dow Quimica Terminals and Barnabe Island.

Alemoa Terminal – For vessels of 7,000 to 15,000 d.w.t. a third tug boat should be used as pusher.

Outside the above mentioned areas, when employing tugs, the following minimum requisites should be observed:

Vessels up to 4,000 d.w.t.	optional
Vessels from 4,001 to 7,000 d.w.t.	1 tug up to 1,000 h.p.
Vessels from 7,001 to 10,000 d.w.t.	2 tugs of up to 1,000 h.p. each.
Vessels from 10,001 to 20,000 d.w.t.	2 tugs more than 1,000 h.p. each.
Vessels from 20,001 to 40,000 d.w.t.	2 tugs more than 1,500 h.p. each.
Vessels over 40,000 d.w.t.	3 tugs more than 1,500 h.p. each.

Note: Should no tug of the indicated power be available, tugs of immediately superior power should be requisitioned.

Vessels with bow-thrusters may employ 1 tug instead of 2 in certain operating areas. (Not those mentioned above).

Piacaguera Channel:

	Number of Tug Boats	
Ship's Gross Tonnage	*Minimum*	*Maximum*
Up to 4,000	Optional	
From 4,001 to 10,000	2 large	2 large
From 10,001 to 15,000	2 large	3 large
From 15,001 to 30,000	3 large	3 large
From 30,001 upwards	3 large	4 large

Until such time as a fresh dredging is carried out at the turning basin at Alemoa, in the passage or ships drawing over 34 ft., destined to or proceeding from Cosipa, 1 tug should be standing by in order to push, if necessary, vessels operating at Piers No. 1 and 2.

BERTHING: Berthing quays have 435 bollards with an average distance of 25 m. between them.

Port Administration: Linear quays 9,562 m. Dolphin berths and jetties: 1,918 m.

Private Berths: 1,386 m.

	Length (m.)	*Depth* (m.)
Continuous Quay:		
Single Use:		
General Cargo – ocean-going vessels	4,193	7 – 13
General Cargo – Coastal vessels	246	7
Bulk Solids	990	8 – 11
Bulk Liquids	631	10
Double Use:		
Bulk Solids and Liquids	200	10
Bulk Solids and General Cargo	2,267	7 – 13
General Cargo and Passengers	373	11
Diversified Use:		
Maritime Department	363	5 – 8
Lighters and small craft	159	
Terminals:		
Port Administration:		
Bulk Solids – Conceicaozinha	567	13.5
Bulk Liquids – Alemoa	841	7 – 12
Containers	510	13.5
Private:		
Bulk Solids – Cosipa	300	12
Bulk Solids – Ultrafertil	294	10
Bulk Liquids – Dow Quimica	253	10
Bulk Orange Juice – Cutrale	286	9
Bulk Solids – Cargill	250	13

Wharves: Total length 6,013 m. Inner Harbour (Saboo New Quay) 800 m. (depth 11 m.). Barnabe Island Pier 300 m. (depth 10 m.).

Special Cargo Handling Facilities – Refrigerated Cargo: Refrigerated cargo after discharge is deposited in the cold storage with capacity of 4,000 tons. The Receiver is usually responsible for cartage and storage arrangements as well as for the required temperature to be maintained in cold chambers.

Bulk Cargo – Grain Elevators: There are 3 elevators in Santos from which wheat can be discharged direct into freight cars, owned by: Cia. Docas (with external silos) between Sheds 25 and 26; Moinho Paulista between Sheds 12A and 13; Moinho Santista between Sheds 8 and 9.

Cosipa Terminal, depth 12 m.; Ultrafertil Terminal, depth 10 m.

Fertiliser, Sulphur, etc, in Bulk: Can be discharged at any point along the quay where 6 ton cranes equipped with automatic motor-driven grabs or shovels are in operation. Alternatively, cranes with ordinary hand-filled buckets are used. The usual place for handling this type of cargo is by the Saboo Bend.

Silos: *Cargo*	*No.*	*Capacity (tons)*
Cereals	1	30,000
Soya/Maize	2	80,000
Salt	3	103,000
Fertiliser	6	180,000
Pelletised Veg. Products	7	125,000

Special/Valuable Cargo: Special or valuable cargo, objects of art, precious metals, etc., are discharged without special formalities and may be kept in Shed 12A, where there is a special safe.

CONTAINER HANDLING FACILITIES:

Container Terminal: On left bank of Santos Estuary, opened September 1981, with the following characteristics; 510 m. long wharf, depth 13 m., equipped with 5 portainers with the following main characteristics:

Hoist capacity below spreader: 35 ft

Rate (40 ft. containers): 20 containers per hour.

Size of containers to be handled (ISO): 20 ft., 30 ft. and 40 ft.

Handling capacity 140,000 per year.

2 transtainers on tyres for 30.5 tons, 2 transtainers on rails for 35 tons, and 9×37.5 ton forklifts.

BULK HANDLING FACILITIES: The Ultrafertil Terminal is situated East of the Cosipa Terminal and both make use of the same manoeuvring basin with depth of 10 m., connected with the Port of Santos by a dredged channel 8 km. long, 10 m. in depth and 60 m. in width.

Cosipa Terminal: Consists of a pier 150 m. in length and 22 m. in width, built on concrete tubing, with a depth of 10 m., allowing for the berthing of vessels of up to 22,000 d.w.t. Future plans foresee the lengthening of the pier to 250 m. and a depth of 13 m., enabling it to receive vessels of 45,000 d.w.t.

Equipment for the discharge of coal and ore is installed at the pier, capable of handling 600 t.p.h., as well as equipment for the loading of steel plates produced at the plant.

Ultrafertil Terminal: An open dock in the form of an "L" built on concrete tubing, 240 m. in length and 15 m. in width. At its main point, vessels of 23,000 d.w.t. and drawing 10 m. may berth. The secondary point permits the berthing of vessels of up to 3,000 d.w.t. (liquid gas carriers).

The terminal is especially equipped for the discharge of bulk solids at a rate of 500 t.p.h. and is likewise equipped with pumps and adequate pipes for the discharge of liquified gas.

Macuco Novo Quay: Export terminal for cereals. Length 280 m. Max. draft for vessels is 13 m. Storage capacity 60,000 tons. Loading rate 3,000 t.p.h.

Conveyor Belts:

(a) 2 conveyor belts for salt, in front Warehouse No. 23, receiving product from the ship by means of grabs and transporting it to the mill of SALMAC S/A with capacity for 500 t.p.h.

(b) 8 conveyor belts for fertilisers at Conceicaozinha Island with variable capacity from 500 to 2,000 t.p.h., depending on the product.

Pellets: Length of quay 280 m., depth 13 m. with 3 warehouses, capacity 80,000 tonnes. Connected by belts and loaders, capacity 2 × 1,500 t.p.h. each, with automatic weighing machines. 2 hoppers with capacity of 500 t.p.h. and 800 t.p.h. each, permit simultaneous receival from wagons and trucks.

Pellets and Fertilisers: Stretch of quay from Warehouse 17 to Warehouse 20. 5 loaders (4 × 600 t.p.h. and 1 × 150 t.p.h.). Stocks held in Warehouses 19 and 20, and Warehouses V, VI, X, XV and XXIII.

Salt: Stretch of quay in front of Warehouses 22 and 23. Electric cranes and belts provide capacity of 600 t.p.h. Stocks discharged to Warehouses XII and XVII, and a special wooden warehouse.

Grain: 3 terminals with unloaders and conveyor belts.

(i) 3 unloaders (2× 150 t.p.h. and 1 × 60 t.p.h.) between Warehouses 12-A and 13. Discharge to Paulista Mill.

(ii) 3 unloaders (2×150 t.p.h. and 1×120 t.p.h.) in front of Warehouse 26. Discharge to Codesp's silo.

Silo capacities: Codesp – 30,000 tonnes, Santista – 34,800 tonnes, Paulista – 20,000 tonnes.

Fertilisers: A quay, at Conceicaozinha, length 567 m. with 2 piers. Each pier is 283.5 m. long with a depth 13.5 m. minimum tide. Warehouse capacity 180,000 tonnes. 12 electric portico cranes, with grabs, and conveyor belts (7,000 m. and 300 t.p.h.).

Coal: At Saboo, capacity 50,000 tonnes, serviced by electric cranes, grabs and conveyor belts. Rate 1,000 t.p.h.

Roll-on/Roll-off: 6 Ro/Ro berths in operation. For vessels with straight ramps – at Saboo Quay (Warehouse 29) and Conceicaozinha.

For vessels with angled/side ramps – at Saboo Quay (Warehouse 35).

Frozen Fruit Juice/Pellets: Terminal da Sucocitrico Cutrale S.A., used for the shipment of frozen fruit juice and "pellets" in general, which entered into operation in 1985:

Depth of water: 13.3 m.

Length of quay: 195 m.

Length of quay including two dolphins: 257 m.

Length of quay, from axis to each dolphin: 250 m.

2 warehouses with capacity of 50,000 tons each,
for storage of "pellets"

1 shiploader with a capacity of 1,000 t.p.h.

16 tanks for storage of concentrated juce with
capacity of 11,000 tons each

Installation for loading juice on to vessels at rate of 500 t.p.h.

CRANES: *Heavy Lifts:* Cia Docas operates 2 floating cranes – 1×100 ton, and 1×150 ton. The 150 ton crane reaches 22 m. in height and can handle lifts within a radius of 10 m.

Type	*No.*	*Capacity*
Cranes		
Electric portico	179	1.5 to 30.0 tonnes
On tyres	30	4.5 to 250.0 tonnes
On belts	2	6.5 to 11.0 tonnes
Conveyors/Piling up of containers	2	30.0 tonnes
Portainers	5	20 units/hr. – 35 tonnes
Transtainer	2	20 units/hr – 35 tonnes.
Transtainers on tyres	2	30.5 tonnes

EQUIPMENT:

Forklifts		
Common	167	3.0 to 23.6 tonnes
For rolls of paper	20	1.8 to 2.0 tonnes
For containers	15	30 – 37.0 tonnes
For inside containers	34	2.0 – 3.0 tonnes
Floating cranes	2	150 and 250 tonnes
Water barges	2	30 and 450 tonnes

STEVEDORES: All longshoremen are in employ of Cia. Docas, which holds charter for general operations at Santos Docks. Their services can be requisitioned up to 1500 hrs. for vessels at berth/expected to berth next day. Stevedores ordered but not used shall be paid full day or night. Therefore, if the men should be kept standing by (inactive) at 0700 hrs., their period runs up to 1700 hrs., and at 1900 hrs., their period runs up to 0400 hrs.

Working Hours: 0700 – 1300, 1300 – 1900 and 1900 – 0400.

Overtime: Sundays, holidays and meal hours.

Port Workers: In Brazilian ports there are 2 categories of workers engaged in handling cargoes in loading and/or unloading ships, namely:

Longshoreman: In the employ of Dock Company, to work ashore operating the cargo from the ship's tackles to the warehouse or to wagons, lorries, etc. as well as in the reverse operation.

Stevedores: They are called "autonomous" because they have no ties of fixed employment and they are engaged by Shipowners or their Agents to work on board the ships in loading and/or unloading operations. They are professional and qualified workers grouped in their respective syndicates or trade union.

MEDICAL: Hospitals and Nursing Homes available.

TANKERS: Discharge terminals at Saboo Quay, Alemoa and Ilha Barnabe.

Alemoa Terminal: Allows simultaneous mooring of 2 tankers with capacity of up to 60,000 d.w.t. (80,000 tons displacement). Length of wharf 630 m. Depth of 12 m. at LW. Sixteen "Chicksan" arms available. Unloading rate 500 – 2,000 t.p.h. Distance between manifolds 180 – 260 in. Connections 6 in. and 8 in.

Report: May 1983 – Refrigerated LPG discharge is carried out through hydraulic arms, 1×16 in. diameter for liquid and 1×10 in. diameter for vapour. Pipeline length 1,000 m.

Also see "Shipmaster's Report" – dated September 1981.

Ilha do Barnabe: Length of dock 301 m., depth 10 m. The dock is used for loading, unloading and storage of liquid fuel.

Saboo Quay: Connections – 6 in., 8 in. and 12 in.

FRESH WATER: Adequate supply of fresh water is always available from hydrants (rate 40 t.p.h. – connections 7 threads per inch in 2 in. and 1.5 in.) along the quay (day and night) or from water-barges (440 tons). Water barges (3) cannot supply more than 2 ships per day, their capacity being only 250 tons, which can be pumped into the ship's tanks at the rate of 80 t.p.h. Cia. Docas should be advised 24 hours in advance, priority being given to passenger vessels.

FUEL: MFO, MDF, and gas oil can be supplied at Vallongo by Shed No. 1 or at the Saboo New Quay Extension, or by barge, if up to 300 tons. Applications for supplies should be made a few days in advance to avoid delay in delivery.

CONSULS: The following countries are represented in Santos:

Argentina
Belgium
Bolivia
Chile
Denmark
El Salvador
Finland
France
Germany
Greece
Italy
Netherlands
Norway
Panama
Paraguay
Portugal
Sweden
U.K.
Uruguay

REPAIRS/DRY DOCKS:

Shipyards: Santos Dock Company, Wilson Sons S/A, and various others for small size craft.

Repair Shops: Santos Dock Company, Wilson Sons S/A and various others for maintenance services and marine repairs such as: mechanical, boiler, electrical, electronic and refrigeration.

Drydocks: Wilson Sons S/A. With capacity for vessels of 65 m. in length, 12 m. breadth and maximum drafts of 4.20 m. aft and 3.90 m. forward.

Slipways: Santos Dock Company, with two cradles and capacity up to 300 tons with a maximum of 45 m. in length and 11 m. breadth; there also exist innumerous slipways for small size craft.

Many other repair shops and slipways of lesser capacity are available.

All the main engine manufacturers (B & W, MAN, Sulzer, MaK, amongst others) have service representatives in Santos and many major repairs, including re-engining of ships, have been effected in this port.

Metalock do Brasil, S.A.: General voyage repairs, including all usual mechanical services, machining, foundry, engine repairs and electrical services.

Also specialised Metalock repairs, crank shaft *in situ* machining and chocking of engines and machinery.

SURVEYORS: Practically all the Classification Societies are represented in Santos. Hold and derrick inspections as well as cargo surveys, are executed expertly, among others, by Perimar Ltd. a surveying firm which also performs testing, sampling and technical research. Its address is: Rua Amador Bueno, No. 38, conj. 91, 9th Floor, P.O.B. 624, 11.100 Santos. Tel: 35.2677. Telex 013-1213. Cables: Perima Santos.

P & I Clubs: Most associations, British, Scandinavian, Polish, Japanese and Greek are represented by Pandibra Ltda. at the following address: Rua XV de Novembro 65, 8th Floor, P.O.B. 550, 11013 Santos. Telephone Exchange No: 34.7228. Telex: 013-1248. Cables: Pandibra Santos. Also Proinde Ltd., Rua Visconde Do Rio Branco 2, 11013 Santos. Tel: 33.1230.

WATCHMEN: It is compulsory to have 1 shore watchman at the gangway. 3 additional deck watchmen are recommended.

PIRACY: Cases of piracy (Master held at knife point) are becoming common, especially at Alemoa Terminal. Also cases of armed pirates boarding have occurred.

OPENING/CLOSING HATCHES: May be performed by ship's crew or by stevedores.

AIRPORT: Situated at Sao Paulo, about 60 km. from Santos. Full international services.

TIME: GMT minus 3 hours.

HOLIDAYS: No work is accepted on the following days: Christmas Day; New Year's Day; Independence Day; Proclamation of the Republic Day; Easter; Good Friday; May 1st.

On Christmas Day, no work available except on passengers' luggage. Working overtime on holidays is possible provided application is made not later than 1500 hrs. on the preceding day. On Sundays work stops at 1900 hrs. for freighters, and is allowed to continue for passenger vessels when only handling luggage.

Local Holidays: January 26th (City Anniversary) and September 8th (City's Patron Saint) and Corpus Christi.

POLICE/AMBULANCE/FIRE: Emergency Tel: 2170. Police (Warehouses 1-7), Tel: 31.5544. Police (Warehouses 8-28), Tel: 32.5497. Police (Warehouses 29-43), Tel: 36.9979.

TELEPHONES: Every vessel berthing between Sheds 1 to 39 will have a telephone on board, available only for local calls.

IDENTITY CARDS: I.D. cards not required.

GENERAL: Flags to be shown by incoming/outgoing vessels: *(a)* National flag. *(b)* Brazilian flag. *(c)* Yellow flag – "Q" (whenever doctor's clearance is required and up to obtainment). *(d)* Customs flag (blue with a white star – to be flown 24 hours a day, after clearance is granted.)

The following circular letter was handed to a Master by his Agent (May 1980).

Re.: PORT REGULATIONS

We kindly request your attention to the following regulations in force at this port, to which you should strictly adhere, otherwise, it will result to heavy fines being imposed by the local Port Captaincy:

1. (a) *Gala Flag:* The gala flag is obligatory on the following dates, considered as official national holidays:
   September 7th (Independence Day)
   November 15th (Proclamation of the Republic)

   (b) *Half Gala Flag:* The half gala flag must be used on the following dates:
   January 1st (New Year's Day)
   April 21st (Tiradentes' Day)
   May 1st (Labour Day)
   December 25th (Christmas Day)

   (c) *Mourning Flag:* On November 2nd (All Saints Day), the vessel should dress the flag in mourning.

   The regulations mentioned above should be followed whenever the dates are coincident.
2. *Brazilian Flag:* The Brazilian flag is to be hoisted by the vessels in port, daily at sunrise and accordingly lowered at sunset. It must be hoisted in the correct position and must be double-faced, i.e., not printed and not painted on one side only. The two sides of the flag must be absolutely identical.
3. *Pilot Flag:* The moment that a Pilot boards the vessel, his indicative flag must be hoisted immediately and should only be lowered at the time he leaves the vessel. The local Port Captaincy is imposing heavy fines on infringers.
4. *Pilot Rope:* Whenever the use of this equipment becomes necessary, same should be immediately removed as soon as the Pilot leaves the vessel, otherwise, the Port Captaincy will impose heavy fines.
5. *Gangway:* All vessels should arrange a net to be placed under the gangway in order to prevent accidents. Violators may be fined according to the Brazilian law, in the event a worker or a crew member falls from the gangway, for not having placed the said net as required.
6. *Bulbous Bow:* In accordance with the port regulations, during night time, from 1800 hrs. to 0600 hrs., a light should be placed at the bulbous bow, otherwise, the Port Captaincy will heavily fine the vessel.
7. *Refuse/Garbage:*

   (a) Vessels when berthed alongside the quay or at anchor in the areas foreseen in the "Norms for Traffic and Permanency at Ports" *must not leave* hanging from the sides of the vessel containers or any other type of recipient for collecting refuse or garbage.

   (b) Refuse/garbage originating from aboard the vessel during the ship's stay in port must be placed in containers or in drums or in any other type of collecting recipient, which must be kept with a lid or cover, on deck, until the time they are withdrawn from the ship.

   (c) The vessel not being in operation (loading or discharge), the deck must be clean and all dunnage wood should be properly stowed or lashed.

   (d) Refuse/garbage of any nature, specially in the case of solids which float, resulting from loading or unloading operations, must be discharged before the ship sails.

   (e) In order that the regulation in item (d) may be controlled, Masters of vessels should enter or record in their logbooks, item 26, the following:
   - (i) Dumping of oil or refuse/garbage into the sea, date, hour, position, distance from the coast or island/s where same occured, kind of polluting substance dumped, approximate quantity dumped and reason why the material was not transferred to shore; and
   - (ii) Register the transfer to terminals, barges alongside or lorries, with details of tugs, destination and approximate quantity which was transferred.

   (f) Refuse/garbage which are not polluting, as well as the results of the cleaning of reservoirs used for by-products of petroleum and holds where chemical products were used, *must not be dumped into the sea.*

The above-mentioned regulations should be observed and seriously noted, since the Port Captaincy keeps day and night watch on the sea and shore, photographs are taken as evidence, and heavy fines are imposed, reasons why we are asking for your kind co-operation.

Observation: In addition to regulations cited above, the Brazilian flag, as well as the flags signifying the "Call Sign" of the vessel – *properly and correctly hoisted* – must be flown on the arrival/entrance of the ship.

PORT CIRCULAR: (See "Shipmaster's Report" dated July 1983.)

1 – *Watch the Ship and the Cargo*

It is the duty of every ship's Master to look after the cargo and take the precautionary steps to ensure the full safety of the ship. The controlling of access to the vessel, as well as the activities performed on board should be exercised also by members of the crew under risk of infraction of article 141 of the RTM (Maritime Traffic Regulations), sections vii and ix.

2 – *Illuminate the Ship and its Sides*

Bad visibility makes difficult the controlling actions thus giving favourable chance to illicit activities. Keep your ship illuminated, particularly the side on the sea side all along the ship's length.

3 – *Establish Communications for External Support*

The Port Authorities maintain a permanent service for fighting criminality. Install, whenever possible, a telephone line within easy reach to the ship's watchman or ship's officer on duty. Ask for assistance over telephones 33-3238 and 33-3239 of the Federal Police Guard on duty.

Remember that the Santos Radio Station is permanently listening on Channel 16 (VHF) and it can also pass on your request for assistance.

4 – *Control the Access Leading to the Accommodation*

The cabins and other habitable compartments should be kept locked whenever their occupants are absent. Endeavour to also maintain locked the passage ways to the inner areas thus guaranteeing the entry and exit control of persons by the gangway watchman.

5 – *Maintain the Portholes Closed*

Open portholes may give easy access to undesirables.

Close the portholes with the clamps properly secured whenever leaving the cabin or any other habitable compartment.

6 – *Do not Leave Valuable Objects Exposed*

Valuable objects exposed invite robbery or "opportunity". Keep your valuable objects, money and jewellery, in a locked and safe place.

7 – *Maintain the Ladders Raised*

At the Inner Anchorage or at the Bar, make difficult the access to strangers by maintaining the accommodation and jacob's ladders raised.

In port leave only the accommodation ladder lowered.

8 – *In case of Assault Set in Motion the Alarms*

In cases of threat of assault, do not hesitate in setting in motion the ship's alarm signals. This measure, in addition to warning the ship's crew members will discourage the infractor in the felonious practice.

9 – *Maintain the Contracted Watchman Under Control of the Ship's Officer on Duty*

Demand a good service from the watchman. Make him identify every person entering or leaving the ship. Facilitate his task by recommending the ship's crew to cooperate in the controlling.

Do not permit the watchman to abandon the gangway, unless he is substituted by another watchman or crew member.

10 – *Advise the Ship's Agent Regarding any Occurrence Relative to Pilferage, Robbery or Assault*

Besides the measures taken for immediate support, the occurrences relative to robbery or assault both in respect to the cargo as well as to valuables and objects belonging to the ship or members of the crew should be reported to the ship's agents for divulgement to the competent authorities. The authorities will use such information in order to guide themselves in regard to the adoption of other steps which may contribute to guarantee the safety of the ship and crew.

SERVICES: Pollution control and tank cleaning services available.

REGULATIONS: Should vessel use any type of small craft for embarking or disembarking, the landing on shore should take place within a Customs area.

Vessels at anchor may not lower their accommodation ladder and vessels alongside may not lower the offshore gangway.

Whilst in port, at anchor or berthed alongside the quay, vessels should collect garbage in adequate containers fitted with covers whilst those lying in open spaces should be kept with their covers on.

Drainage of holds or tanks containing chemical products, oils or polluting substances which may affect the flora and fauna, is prohibited.

Painting and treatment of ship's sides and decks is authorised, the lowering of planks and craft for this purpose being permitted independently of licence from the Port Captaincy.

DEVELOPMENTS: Dredging operations being carried out in order that vessels up to 45,000 tons with a draft of 12.3 m. can come into the port and go alongside Conceicaozinha. As a second phase, this dredging will be extended to the estuary to attain a depth of about 14 m. From this locality up to the Cosipa Channel, the dredging should reach a depth of 12 m.

For the prolongation of the Macuco Quay, a depth of about 13 m. is contemplated. A section of another 375 m. with a depth of 11 m. and another of 230 m. with a depth of 13 m. will be made in an extension of 605 m.

The following development goals are for the medium and long term:

Enlargement from the Valongo Quay to Paqueta 1 and dredging to 11.0 m.

Enlargement of the Container Terminal (510 m.) by 310 m. Container forklift of 37 tons on order.

Construction of a Terminal destined for Roll-on/Roll-off operations.

Pneumatic Discharger of 300 t.p.h. to be acquired for Warehouse 26. Crane of 32 tons – 40 tons capacity to be acquired for handling containers and heavy goods at Warehouse 37.

SHIPMASTER'S REPORT: July 1980.

Officers and crew should be very alert with regard to stealing. It is not uncommon for armed robbery to take place at the anchorage. Cargo has at times been stolen from containers. Also crew's effects have been stolen and on occasions the Master's safe has been robbed.

Prior to departure, an inspection is made by the officer from the Harbour Master's Office. He will check the lashings of the deck cargo, the cleanliness of the deck and will ensure that the decks are clean with no garbage in bags, containers or cartons as it is feared that once the vessel is at sea the garbage will be dumped. There is a good garbage collection service in the port.

SHIPMASTER'S REPORT: September 1981.

General: The Port Limits are a line from Ponta Itaipu in the West to Ponta Munduba in the East.

In terms of trade the largest port in South America and the principal port of Brazil handling most of the Coffee exports. Situated on the confluence of several small rivers which have been canalised. The total length, including the extension of Canal de Piacaguera to the industrial complex at its Northern end, is 10 miles.

General cargo wharves are continuous on the S.W. side for 5.5 miles. New container and dry bulk berths on N.E. side with recently completed rail link from Barnabe Island.

Petroleum berths at Barnabe Island 5.5 miles from the port entrance on N.E. side and at Alemoa on South bank 7 miles from entrance.

Brazilian Charts of Santos seem to be very difficult to obtain, after trying in Santos itself and Rio. B.A. 19 refers.

Arrival: Vessels up to 32 ft. can leave/arrive 24 hours a day any time. Over 32 ft. depends on tide. Generally arrive and berth 2 hours before HW.

Standard Quarantine message to be cabled through Agent 24 hours beforehand.

Anchorage: Outer: The general area is to East and West of Channel. The various designated areas on B.A. 19 seem to have little relevance and vessel's position depends on draft. The closer in, the more the ground swell is apparent. Large vessels seem to favour 1.5 miles South of Ponta Grossa, with plenty of cable.

Inner: Various river anchorages are used, all fairly to very full and require engines to keep clear of other vessels when swinging to tide. One anchor. Tugs used to swing vessel on heaving up.

Approach: The coast being hilly with cliffs provides good positions. Bottom is gently shelving to 50 ft. at Outer Buoy, 4.5 miles from port entrance.

Large ground swells are often encountered.

Pilot: Pilot joins and leaves from dull red cutter between Buoys No. 7 and 8, about 1.75 miles from Pt. Fortaleza the port entrance. He will not come outside as indicated on B.A. 19. Reasonable English spoken. About 1.5 hours from No. 7 Buoy (Pilot) to Alemoa Berths. Drafts quoted in feet and inches.

For night-time sailing/arrival Pilot must be ordered before 1730 hrs. to move up to 0700 hrs. next morning.

Channel: From No. 1 Buoy to No. 7 Buoy dredged to 48 ft. No. 1 to No. 6. Buoy sufficient water outside channel for all vessels liable to use port.

No. 6 Buoy inwards max. draft 36 ft. 6 in. to Industrial Complex at North end of Canal de Piacaguera. Not all berths of this depth.

Buoyage South of No. 7 to No. 1 very liable to shift position and have lights extinguished. Not to be relied on at all.

In Southerly winds the ground swell is very large and in deep draft vessels can make steering very difficult.

We entered at 34 ft., 2 hours before HW and to negotiate the channel to No. 8 Buoy was a bit difficult.

VHF: Pilot: Call "Santos Pilot", Channel 16. Works 10 and 11.

Bunkers: Call "Estrela", Channel 12.

Repairs: Work Channel 6.

Public Correspondence: "Santos Radio", call Channel 16, works Channels 25, 26 and 27. Local and international calls. Good and efficient. English good.

Tugs: 15 ship-handling tugs in port, with power from 505 – 2,236 h.p. Large vessels generally have 4. Two ships lines used. Most vessels proceeding above Itapema Point, at new container berth take tugs 1 ahead and astern 2 alongside. Down river tugs depart at Itapema Point.

Berth – Alemoa: Alemoa Berths about 7.5 miles from sea on South bank comprise 2 concrete pile jetties at end of pier. The berths are owned by the Port Authority and leased to 'Petrobras' the state oil company for product and LPG transfers.

Length of vessel depends on Turning Basin just off berths. Max. length is 300 m.

Max. draft is 34 ft. Although at LW there is only about 32 ft. alongside berth face. Very soft mud.

Large vessels berth portside to. Small coastwise vessels berth either way. Both berths capable of same product range.

Density 1011 to 1015.

Moorings – Alemoa: 3,3,2 each end. There is a small mooring launch which takes one line at a time.

Fenders: 3 large timber faced flat fenders on rubber shock absorbers.

Gangway: Difficult to land accommodation ladder. We used B.O.T. type which was very steep at completion, to after dolphin.

Lines – Alemoa: Each berth has 2 refrigerated Chicksans, at the Western end, one vapour 10 in. and one liquid 12 in. (Western most), both 150 ASA couplings. Unfortunately both sets have severe leaks on all joints.

After trying liquid arms at both Berth Nos. 1 and 2 we ended up by using our low discharge pipe with both our flexible hoses plus 2 shore hoses giving approximately 24 m. length from ship side rail. The connection on shore main line (16 in.) to Chicksan was uncoupled and flexible hoses with reducer coupled up to main line.

The Terminal say they are now going to construct a 'Tee' piece in line below Chicksan to by-pass same and take flexible hoses.

At the Eastern end of both berths are liquid and vapour Butadiene Chicksans (8 in. and 6 in. respectively). These will be converted for 'VCM' use next year (1982).

There are 2 sets of pressure/semi-refrigerated LPG Chicksans (liquid 12 in. and 10 in., vapour 10 in. and 8 in.) situated between Butadiene and refrigerated Chicksans.

Plus 4 'AVGAS' Chicksans on each berth.

Max. air draft of LPG Chicksans is 20 m. HW.

Discharge: Varies greatly from 100 t.p.h. to 600 t.p.h. depending on shore tank pressures. VRL always coupled to ship.

Terminal say fastest discharge has been 1,200 cm. per hour on butane. We were only second refrigerated ship with import cargo to berth at jetty.

Shore tank pressure problems seem to occur frequently and the VRL is often required for return to ship.

Two points to watch are incompatible product being returned and liquid in vapour line arm which occurs when liquid/vapour cross-over valve on quay does not seat properly. This is a small auto valve about 5 m. inboard of Chicksan arms and should be checked before shore require VRL used.

Reasonable co-operation, if the Manager or Assistant Manager can be contacted they are very helpful.

On completion the terminal will blow hot vapour back.

General: Fresh Water: From meter on jetty – both piers. Port Authority connect/disconnect and arrange in advance. About 10 tonnes per hour at £1.50 per tonne (9/81).

Bunkers: By barge both heavy and diesel. Barges maximum capacity about 500 tonnes, pump at 150 t.p.h. Prices very competitive (9/81).

Repairs: Several repair firms in area covering most types of work. We used 'Metalock' for motors and pipework. Collected and returned by launch. Very quick and competitive service.

Lub. Oils: All obtainable but only by drums from barges at Alemoa. On dry cargo/non inflammable berths large quantities can be pumped from tank truck.

All international oil companies have to use 'Petrobras'.

Transport: Agent advises from Alemoa use mini-bus at night due to 'muggings', etc. We used a bus to town and everyone used their own taxi back.

Mini-bus 8 seater, £5.50 per trip.

Agent: All tankers have to use Petrobras Agent – 'L. Figeireido' S.A. (cable 'Doralice'). Seemed very efficient and was extremely attentive and helpful.

Communications: Telex: International.

Phone: S.T.D. (and works) very clear to U.K.

Cables: Rio de Janeiro Radio, "PPR" – efficient.

Brazilian Flag: Very particular. Must be lowered at sunset and hoisted again at sunrise and be in good condition.

Pollution/Garbage: Very strict. Garbage drums to be inboard with lids on them. Nothing to go overboard. Collection service available.

Holidays: Difficult to get services on weekends and public holidays, so arrange well in advance.

Formalities: Shore Passes: Some form of identification is required when going ashore. For this purpose an Official Brazilian Shore Pass is obtainable which should have crew members photograph and particulars on it.

Personnel stopped by police and showing this pass seem to be in better position than those having no pass or foreign I.D. Card.

Forms: Have large quantity of following ready: Crew Lists, Personal Declaration, Store List, Ship Information, Bond List, Vaccination, Personnel for Repatriation and Effects. Sight Ships Certificates.

Generally no difficulties as long as everything ready. Bond will be visited.

Repatriation: Through Sao Paulo Airport – a 2 hour drive from Santos.

Customs have to check baggage on ship or baggage has to be landed before departure with full list of electronic equipment (Radios, etc. and cameras).

Agent requires details of flight and passport numbers 3 days prior to departure.

ALEMOA LPG STORAGE PLANT – SANTOS, BRAZIL

General: The plant was opened in 1979.

Basic design is by Technigaz of France and construction by a Brazilian company. Most of the equipment is of U.S. design made in Brazil under licence. This causes problems over maintenance and spares.

The plant is a shipping terminal drawing LPG from refineries in the South of the country and from around Sao Paulo and re-shipping it to localities up and down the coast.

Every so often there is a requirement for import feedstock, about 10,000 tonnes every 2 months to boost local supplies.

LPG can be pumped under pressure to Sao Paulo.

Tanks: 4×10,000 tonnes nominal capacity refrigerated LPG tanks with polystyrene insulation built by Chicago Bridge and Iron Co. in 1978.

2 for Butane and 2 for Propane.

2 pressure spheres of 2,500 tonnes nominal capacity.

4 semi-refrigerated spheres of 3,000 tonnes nominal capacity. These will be converted for use to V.C.M. in 1982 a fact which considerably worries the maintenance staff.

Plant: Each refrigerated tank has own Boil Off unit – total 4.

2 Flash Gas Units can be connected to any tank to back up Boil Off units.

3 units convert pressure LPG from spheres to fully refrigerated LPG each with an output of 80 t.p.h. of condensate.

The refrigerant used on all units is Propylene which is quite successful. Freon R22 used to be used but considerable losses were being experienced plus it was more expensive.

All units work on the cascade principle. The sea water cooling being derived from a pump house on the pier. 2 electric pumps backed up by 2 diesel driven pumps all designed by Worthington.

All compressors are of the piston type designed by Ingersoll Rand U.S.A. and constructed in Brazil under licence.

Heaters, etc.: For transfer of refrigerated LPG to pressure spheres, 3 sea water heaters are employed.

Two dessicant drying towers are employed from spheres to refrigerated storage.

For refrigerated LPG transfer 8 Worthington deepwell pumps of 300 cu.m.p.h. are available.

All anti-freeze used in the plant is alcohol derived from sugar cane which Brazil has pioneered for use in car engines.

SHIPMASTER'S REPORT: July 1983 (Updated 1988).
Documents: As per "Guide to Port Entry".
Pilotage: Compulsory, Pilot usually boards at No. 3 Buoy, but boarded this vessel at No. 9. One hour's notice required, given through Agent.
Anchorages: As given on Chart, depths 10 m. – 13 m. To avoid pirates, anchor about 1 mile S.E. of Sea Buoy.
Restrictions: Berthing possible 24 hours a day, at any stage of tide.
Max. Size: Deepest draft with which vessels can safely enter port is 36 ft.
Health: Notice required by Quarantine is arranged by Agent.
Radio: Santos Pilots, telephone numbers 104 and 312988.
VHF: Pilots on Channels 16 and 11, Port Control on Channel 16.
Tugs: Available.
Berthing: Vessels berthed at Warehouse No. 37, Berth No. 2, 6 miles from entrance to port. Berthing possible 24 hours a day, at any stage of tide.

Depth of water in channel to berth 42 ft.

Nature of bottom at berth – mud.

Cranes: Ample on quay, varying from 1 ton to 40 tons SWL. Vessel used Salens equipment to handle palletised cargo.

2 floating cranes available – 1×150 tons, 1×250 tons.

Specialised Cargo Handling Facilities: 3 berths available for Ro/Ro vessels.

Facilities for handling and storage of 20 ft./40 ft. containers.

Stevedores: Ample union controlled labour. No private stevedores.
Fresh Water: Available.
Consuls: U.K. and others.
Repairs: Can be undertaken.
Dry Docks: None.
Surveyors: Lloyd's and salvage surveyors are available.
Gangway/Deck Watchmen: Pilfering was a very serious problem – suggest vessels take all precautions to prevent this.
Airport: At Sao Paulo.
General: Fresh provisions and ships' laundry service available.

SHIPMASTER'S REPORT: August 1994.
The Master received the following telexes from Agent prior to arrival:
"*Santos Anchorage – Pirates:* We have consulted Bimco and our Sao Paolo Office, who both confirm your information concerning Santos Anchorage being high risk area for piracy.

Thus Bimco suggest to keep at least 20 nautical miles off the coast as a safety margin, meaning that drifting will be required in order to delay your arrival time outside Santos. However, please keep Agents informed of arrival, also concerning drifting outside Santos, as congestion is expected – and first in first served."

"Have confirmed with Pilots possibility for a vessel to anchor 15/20 miles away from Santos Roads, and they have replied no problem since vessel can communicate via VHF with Pilot Station and Santos Radio (in case of any telephone call from Santos). As such go ahead anchoring at the position that you most prefer. Furthermore bear in mind (1) on your arrival/dropping anchor to report to Pilots over VHF Channel 16 the exact arrival time at Santos. (2) When vessel is supposed to dock, Pilots may get in touch with vessel only 1.0 – 1.5 hours before boarding time.

Fresh Water:
"Regarding fresh water, can say that we have one of the most expensive water in the world which costs U.S.$ 10.65/tonne (by barge) and U.S.$ 20.70/tonne at the quay. Kindly confirm your acceptance for such prices, as well as the quantity intended to be supplied."

"*Reporting/Documents:*
Please inform last port of call and arrival drafts. On arrival at Santos Roads please contact Pilot Station on VHF Channel 16 and inform exact arrival time, also contact "PWS 88 N Concomtram" – see your "Guide to Port Entry".

Upon berthing, local Authorities will require following documents:
10 copies Crew List.
10 copies Passenger List (if any).
2 copies Vaccination List.
1 copy Maritime Declaration of Health.
1 copy Ports of Call List.
3 copies Spare Parts List, no special form required for engine/deck/radio department – Inventory books are not allowed for presentation – Minimum 100 items inserted.
3 copies Personal Effects List with marks/Serial No./Model No. and exact quantity of objects.
3 copies Bonded Stores List.
3 copies Narcotics List.
3 copies Ammunitions List.
3 copies Animals List.

Spares and personal effects undeclared are confiscated by Customs. Please send us message addressed to Santos Port Health, requiring Free Pratique 72 hours before arrival at Santos. For your guidance, Port is not equipped with fenders alongside. A private company has them to hire for U.S.$10.00 per day/fender. In case needed, kindly ask same to Agent or to your Boarding Pilot in order to arrange accordingly. Please advise if any requirement needed upon berth.

Master's Comments on above:
Concerning Piracy: We did in fact anchor 19 miles from the Pilot Station and had no problems with communication with the Pilot Station or with unwanted visitors.

Fresh Water: We had to pay that price. The price has come into being since the Government changed the Brazilian currency.

Declaration of Spares/Stores at Santos: They are strict and have been known to remove liners, cylinder heads, etc., that have not been declared after a rummage gang visited the ship on her third call to Santos (P&I Rep and local solicitors were able to retrieve the goods, but at what cost I do not know).

In Cabedelo and Natal, the Customs were not bothered, even though I presented the same Customs papers on arrival at both ports.

Fenders: The fenders, we were given, were car tyres inserted on a solid wooden pole, which were hung-off a bollard by a wire.

Brazilian Ship Reporting System: In the ALRS Vol. 1, the system is quoted as being voluntary. However, fines have been levied on vessels not complying, so really it is mandatory to comply. I sent our telex to: Comcontram, Rio – Telex: 2153180+.

AUTHORITY: Companhia Docas do Estado de Sao Paulo – CODESP – (Portobras), (Caixa Postal 27), Avenue Conselheiro Rodrigues Alves, Bairro Estuario, Santos, (SP) – CEP 11.015. *Tel:* (0132) 33-6565. *Contact:* Eduardo G. Figueiredo, Port Administration - Managing Director.

Capitania dos Portos do Estado de Sao Paulo, Avenida Conselheiro Nebias No. 448, Encruzilhada, Santos, CEP 11.045. *Contact:* Captain Paulo Alfredo Bourguy Caetano Da Silva, Captain of the Port.

AGENT: Wilson Sons Agencia Maritima Ltda., Rua Tuiuti 58, 11010-220 Santos SP. P.O. Box 61. Tel: (013) 222-4622 (After hours: (013) 231-7106). Telex: (13) 1013 WSON BR. Fax: (013) 235-5262. Cables: Anglicus.

SAO FRANCISCO DO SUL: 26.10 S. 48.34 W.

(See Plan)

(A) GENERAL CARGO PORT.
(B) OIL TERMINAL (DTSUL).

(A) GENERAL CARGO PORT.

DOCUMENTS: See "General" before first port.
PILOTAGE: Not compulsory. Pilots join vessel at the Island Ilha da Paz about 5 km. East of bar, Pilot comes from inside with boat. Cables informing ETA to Agent. Pilot Station may be contacted on VHF Channel 16.
ANCHORAGES: Channel low tide 30 ft., high tide 35 ft. Port: low tide 20 ft., high tide 30 ft.
RESTRICTIONS: Bar draft: Max. 30 ft. Bottom: bar, channel and port: sand and mud. Speed of current: channel LW 4 knots, HW 5 knots.

Reports received in August 1976 indicate that the bar has now been dredged to a depth of 8.50 m.

HEALTH: Vessel must present Free Pratique issued at first call-port. Port's doctor will visit vessel.
RADIO: Call Agent. Sao Francisco do Sul, via Florianopolis Radio.
TUGS: Three tugboats for shifting ships and barges, 1×1,680 h.p., 1×1,010 h.p. and 1×250 h.p.
BERTHING:

Quay	*Length* (m.)	*Depth* (m.)	*Remarks*
1	225	9.75	Grain
2	150	8.50	General Cargo
3	150	7.00	General Cargo
4	150	4.25	General Cargo

CRANES: 2 cranes × 7 tons.

Neither the oil terminal or Sao Francisco do Sul Port Services operate either floating cranes, barges or lighters.

BULK HANDLING FACILITIES: Located at Berth No. 1.
Cocar Terminal:
Meals/Pellets.

Air draft:	15 m.
Storage capacity:	110,000 tonnes.
Loading rate:	800 t.p.h.
Conveyor belt:	Span: 200 m. Reach: 18 m.
Spouts:	2

Loading is performed by means of 2 movable spouts; fed by conveyor belts from the silos.

Loading operations usually performed around the clock.

Vegoil:

Storage capacity:	23,500 tonnes.
Loading rate:	500 t.p.h.

Loading is performed with a pipeline direct to the quay.

Loading operations usually performed around the clock.

STEVEDORES: Sufficient working force available, working hours 0700 – 1100 hrs., 1300 – 1700 hrs. normal period; 1700 – 1900 hrs. days-overtime; 1900 – 2300 hrs., 2400 – 0400 hrs. overtime.
MEDICAL: Medical attendance available, 2 hospitals, all medical care available.
FRESH WATER: 13 hydrants on Quays 1 and 2, American type thread 2 in., capable of supplying 14 t.p.h. to 30 t.p.h. Also a private water barge of 100 tons capacity.
FUEL: Oil for boilers, diesel engines, and gasoline are distributed by a private firm, Distribuidora Maritime Porto de Sao Francisco Ltda. by tanker trucks, coming from Itajai, where orders must be placed 12 hours in advance.

CONSULS: Chile.
REPAIRS: Minor deck and engine repairs possible, workshop in town.
WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: By stevedores.
CUSTOMS ALLOWANCES: 1 package of 200 cigarettes, and 1 bottle of spirits each man.
REPATRIATION: No facilities for changing crews.
AIRPORT: None, nearest in Joinville, with regular traffic, about 40 miles distant.
TIME: GMT minus 3 hours.
HOLIDAYS: 1st January; 15th April; 21st April; 1st May; 7th September; 15th September; 15th November; 25th December; Holy Friday; Corpus Christi; 8th September; 8th December.
TELEPHONES: Available at dock entrance.
DEVELOPMENTS: The bar is expected to be dredged to a depth of 9 m.

SHIPMASTER'S REPORT: January 1988.
Location: The Port is situated on the Northernmost extreme part of the State of Santa Catarina, near the border of the State of Parana.
Documents:
3 copies Voyage Memorandum.
1 copy Health Declaration.
1 copy Vaccination List.
8 copies Crew List.
8 copies Passenger List.
4 copies Personal Effects List.
2 copies Narcotics List.
2 copies Firearms and Ammunition List.
2 copies Manifest.
2 copies Clearance from Brazilian Port, including Free Pratique.
Pilotage: Pilot Station is situated in position Lat. 26° 11′ 30″ S., Long. 48° 29′ 20″ W. Pilots can be contacted on VHF Channel 16 or 11. There are presently 4 pilots who board at any time, weather permitting. Distance from the Pilot Station to the Port is 12 miles.
Anchorage: Good anchorage inside the Bay.
Communications: The city is linked to the rest of the Country/World with direct dialling telephone system and telex service.
Tugs: Presently there are 2 tugs available to assist in docking/undocking/shifting. "Rio Preto" 1,680 h.p. belonging to Petrobras and "Lupus" 1,100 h.p. belonging to Saveiros.
Boat Services: Available for vessels anchored in the Bay.
Berthing: The Port installations are situated on the section of the Sao Francisco River which provides a natural Bay which is considered a safe anchorage as it is surrounded by hills and no strong currents exist.

There are 675 m. of quays, but 225 m. are for bulk carriers and tankers (Pier No. 1).

Pier No. 1: Length 200 m. Depth alongside 32 ft. Vessels handling soya meal/oil receive priority. Pier No. 2: Length 175 m. Depth 26 ft. Pier No. 3: Length 150 m. Depth 23 ft. Pier No. 4: Length 150 m. Depth 13 ft.

There are no restrictions on length or beam.
Mean tidal range 1.6 m.
General cargoes handled at Piers 1, 2 and 3.

Cranes: 2×7 tons, 2×40 tons (container handling). Most cargoes handled by ship's gear.
Stevedores: Working hours: 0700–1100 and 1300–1700. Overtime: 1700–1900, 1900–2300 and 0000–0400. Work can be extended to 0600 hrs. in order to finish vessel.
Bulk Handling Facilities:
COCAR Terminal: (Meal, pellets, beans).
Location: Berth No. 1.
Draft: 32 ft. (Brackish).
Airdraft: 15 m.
Storage capacity: 110,000 tonnes.
Loading rate: 600 t.p.h.
Conveyor belt: Span 200 m. Reach 25 m.
Spouts: 2.
Loading: With two spouts (movable) direct from silos/conveyor belt, loading around the clock.
COCAR Terminal: (Vegoil).
Location: Berth No. 1.
Draft: 32 ft. (Brackish).
Storage capacity: 23,500 tonnes.
Loading rate: 400 t.p.h. loading by pipeline direct from quay, loading around the clock.
MAFOR: (Grain discharge).

Normally use "Redlers" which are hung from ship's derricks. Two types of Redlers used, one weighing 4,800 kilos and the other 7,500 kilos. Also operating inside holds, one tractor weighing 10,600 kilos and a bobcat weighing 2,300 kilos.

Density: Salt water at the entrance of the Bar, brackish water inside the Bay varying during tides, 1016–1018 at H.W. and 1018–1020 at L.W.
Medical: Medical assistance available at local hospital.
Fresh Water: Supplied ex-hydrants, about 8–10 t.p.h.
Fuel: Not available locally, however it can be arranged by trucks.
Consuls: None.
Repairs: Minor repairs can be performed by two local workshops. Divers available.
Repatriation: Embarking and disembarking will be cleared by the Federal Police Authorities. Ship's Agents should be notified in advance of full flight details of arriving crew members. Crew will be met at Joinville Airport (2 flights daily from Sao Paolo). It is important to note that arriving crew must always carry Owner's letter stating Port, name of vessel and Agent's full style.
Holidays: Public holidays: September 8th, Patron Saint of the City.
General:
Provisions: Several Ship chandlers can provide fresh vegetables. Bonded stores, etc. can also be supplied (all of Brazilian origin).
Marine Note of Sea Protest: There is no Notary Public in Sao Francisco do Sul.
Fines: Heavy fines are imposed by the Port Authorities (based on the tonnage of the vessel) for the following: Spillage of oil, slops, dumping garbage or any waste into the water; water spilled on to the quay; gangway net missing; ratguards missing; unauthorised persons on board; painting ship's sides/ship's draft without Port Authority's permission; bad condition of Brazilian flag; improper hoisting/lowering of Brazilian flag.
Roads: Sao Francisco do Sul is linked with Joinville by good road, distance 45 km.

AUTHORITY: Administracao do Porto de Sao Francisco do Sul, Avenida Engenheiro Leite Rebeiro 782, CEP-89230 San Francisco do Sul, Santa Catarina, Brazil. *Contact:* Clemintino Nascimento Moura, Superintendent.

(B) DUTOS E TERMINAIS DO SUL (DTSUL)

LOCATION: Dutos e Terminais do Sul (DTSUL), operated by Petroleo Brasileiro S/A – PETROBRAS, consists of an SBM whose body is 11 m. in diameter, weighing 143 tons and exhibits a light beacon Iso. Y. Fl. 0.3 sec. ecl 2.7 sec. 6 m. 5 M. It is situated about 4 miles Eastward of Sao Francisco do Sul Island, its co-ordinates are: Lat. 26° 13′ 52″ S., Long. 48° 25′ 03″ W. Onshore base is located 18 km. from the town of Sao Francisco do Sul, which is 48 km. from Joinville City, both in Santa Catarina State. The main scope of DTSUL is to receive, store and transfer oil to Refinaria Presidente Getulio Vargas – REPAR, a refinery in Araucaria, a town in the state of Parana.
DOCUMENTS: See "General" before first port.

Any and every document issued or otherwise related to ship's clearance at the last port of call is required for immediate inspection by the boarding officials.

Immigration and Maritime Police:
1 copy Crew List.
1 copy General List.
3 copies Passenger List.
3 copies Passengers in Transit List.
Health:
1 copy Vaccination List.
1 copy Certificate of Derat Exemption.
1 copy Maritime Health Declaration.
1 copy List of Drugs and Narcotics.
1 copy Passengers in Transit List.
1 copy Passengers List.
Customs:
3 copies Crew List.
3 copies Spare Parts List.
3 copies Stores List.
3 copies Provisions List.
3 copies Drugs and Narcotics List (if not included in the Stores List).
1 copy Cargo Manifest.
1 copy Bills of Lading.
2 copies Passengers List.
2 copies Passengers in Transit List.
3 copies Crew Personal Effects List.
3 copies Passengers Personal Effects List.

NOTE: Supplies, stores, cigarettes, cigars, tobacco, alcoholic beverages, arms, ammunition, souvenirs, playing cards, drugs and narcotics, medicines (not in use) etc., must be kept under lock and key; the doors of the storage rooms will be sealed by the Customs Officials and the seal must be kept unbroken throughout the vessel's stay in port.

Any goods or personal effects omitted from the list may be confiscated.

Extracts of Sea Protest drawn out from the Log Book must be submitted to the boarding Customs Officials in case of accident which has caused damage or loss of the cargo or part of it.

Leaving Clearance:

Masters must appoint their ship's Agent at Sao Francisco do Sul and have their International Safety Certificates in force. It is also necessary for vessels Leaving Clearance:

Leaving Permit from Customs.
Leaving Permit from the Captain of the Port.
Leaving Permit from the Maritime Police.
Leaving Permit from Brazil Mail (Passe da E.C.T.).

Anchorage for Clearance: The anchorage for Port Authorities clearance is the same as for vessels waiting for mooring. Port Authorities clearance is effected during office hours only (0730 hrs. – 1900 hrs.).

Display of quarantine signals must be continuously maintained until Free Pratique is granted. These signals are: sunrise to sunset – quarantine flag "Quebec". Sunset to sunrise – signal light red over white light.

In addition to quarantine signals, the Brazilian Flag must be flown from foreign vessel's foremast throughout the vessel's stay in port.

Also see "Restrictions".

APPROACHES: Refer to Brazilian Hydrographic Office Nautical Charts No. 1800, 1830 and 1840.

Vessels approaching the port of Sao Francisco do Sul or the SBM from the North, will first see Mounts Joao Dias, Grande and do Barbosa, which are hills Northward of the port of Sao Francisco do Sul. Morro do Barbosa is the highest peak of the region, 280 m. (918 ft.) high, and near it, in the S.E. direction, the SBM is situated.

Vessels approaching the SBM will first discern Ilha da Paz Lighthouse (International number 1437 – Lat. 26° 11′ 00″ S., Long. 48° 29′ 00″ W. – Light Fl.W. 20 sec. 84 m. 23 miles – No radio signal), Mount Joao Dias, Mount Pao de Acucar and Mount Ubatuba. A hill little lower than mount Pao de Acucar is Mount Monao de Trigo, possibly seen Eastward of the first, which shows on its top a conspicuous cross.

Vessels approaching by night-time, while yet 15 miles from shore, as Ponta Caioba Lighthouse is vanishing in the dark, will find Ilha da Paz

Lighthouse which is the most prominent landmark for tankers bound for Sao Francisco do Sul and its SBM Terminal.

Vessels approaching the SBM from the East, will sight the same above mentioned landmarks when near Sao Francisco do Sul. In the night-time, Ilha da Paz Light will be first seen since its range is 23 miles. Ilha da Paz Light is the only landmark at night-time, except for the glare of the town of Sao Francisco do Sul lights which can be seen from a distance of 30 miles.

Vessels approaching the SBM from the South, in daytime, when less than 10 miles away from shore, may use Remedios and Tamboretes Islets as an indication of the nearness of the SBM; when nearer, will sight Morro Pao de Acucar, Morro Montao de Trigo, Morro Ubatuba and Morro Joao Dias, which are hills and can steer to Ilha da Paz Light.

At night-time, after loosing sight of Ponta do Vigia Light (Fl. W. 6 sec. 50 m. 15 M.) near Itapocoroia, vessels will sight no long range lights until sighting Ilha da Paz Light. These vessels, in order to navigate safely, must keep away from Remedios and Tamboretes Islets which can be accomplished by keeping Eastward of the 20 m. line, 6 miles seaward. Eastward of this line there are no dangers.

Vessels approaching Sao Francisco do Sul and the SBM will sight Ilha da Paz Lighthouse and the SBM light, with 5 miles radius range.

PILOTAGE: Pilotage is not compulsory in the area of the SBM, either when making for it, mooring at it or clearing the SBM. DTSUL provides a duly trained Mooring Master for assistance to Masters of vessels operating at SBM. His services are presently rendered without charge.

Mooring Master will advise vessel where to anchor.

For approaching manoeuvres, and after mooring to the SBM, the Master of the vessel will be assisted by the Mooring Master who boarded the vessel in the proper site and will help the Master of the vessel as far as the operational activities in the area are concerned, such as: mooring, hose connections, discharge, hose disconnection and unmooring, as well as control of small crafts which render assistance to the vessel.

It is the responsibility of the Master of the vessel to notify the Mooring Master of any special conditions, difficulties or peculiarities of the vessel such as defective navigational equipment, mooring lines, tackle, gear, helm, engine or boiler deficiencies or lack of necessary equipment which might impose hazards in connection with handling, mooring, unmooring and actually operating the vessel.

The Mooring Master must be immediately advised about any acts or facts which may jeopardise the safety of the vessel or the system, as well as operational events which may possibly alter the existing conditions.

The vessel must be moored to the entire satisfaction of both the Master and the Mooring Master.

The Mooring Master will remain on board the vessel throughout the vessel's stay at the SBM and will notify the Terminal Superintendent about any operational failures; and the vessel may be ordered off the SBM and refused to be accepted in future, unless corrective action by the ship is immediately taken.

The Mooring Master will notify the Master of the vessel, in writing, about disregard of the operational requirements established upon arrival of the ship.

For boarding the Berthing Master prefers a pilot ladder and on disembarkation a combination of pilot ladder and accommodation ladder.

ANCHORAGE: For vessels waiting either for Port Authorities Clearance or mooring or under repair, the advisable anchorage site is 1.3 miles North of the SBM, in the following position: Lat. 26° 12′ 30″ S., Long. 48° 25′ 00″ W. The seabed is fine sand and mud. The depth is 22 m. Mooring Master will board arriving tankers in this position.

In no case must vessels drop anchor near the SBM (within a circle 1 mile in radius, centered on the SBM) within the area between the SBM and the coast or in the access channel to Sao Francisco do Sul River, due to existance of submarine pipe-lines and anchor chains on the seabed.

RESTRICTIONS: The buoy is designed for tankers up to 200,000 d.w.t. but due to the depths in the area, the maximum draft allowable is 18 m. (59 ft.). Sometimes, due to bad weather, tankers have to wait for favourable weather conditions, so that mooring may safely be started. Mooring should be undertaken at daylight only.

Vessels arriving at anchorage sites 2 hours prior to sunset in clear weather can moor. If vessel arrives later berthing takes place the next morning.

MAX. SIZE: 200,000 d.w.t. Draft 18.0 m.

HEALTH: Vessels bound for DTSUL are inspected at the SBM by Health, Customs and Maritime Police Officials. Ship's Agent must apply beforehand for these visits.

RADIO: Vessels bound for DTSUL, should advise their ETA 72 hours prior to arrival directly to vessel's Agent through a Coastal Station. This arrival message will be passed by the Agent to the Terminal.

Time chartered vessels must keep updated ETA messages radioed to Frota Nacional de Petroleiros – FRONAPE.

Tankers must have their VHF radios tuned to Channel 16 (VHF) or 4125 kHz (SSB), around the clock when nearing the anchorage position, and send updated ETA messages until Mooring Master boards. Weather forecast and/or Sinoptic charts, if available aboard, must be shown to the Mooring Master when he boards.

VHF: Vessels bound for DTSUL must contact the Terminal, through Itajai Radio and Paranagua Radio via Channel 16 or directly to Terminal by Channel 14, a minimum of 2 hours prior to arrival.

During mooring and unmooring operations, and ship's staying at the SBM, the launches will keep in contact with Mooring Master through Channel 14.

TUGS: No tugs are available at the Terminal for assistance in mooring vessels.

Launches: Launches under direction of the Mooring Master will assist Terminal and the vessel when mooring, unmooring, connecting and disconnecting hoses. They will also assist in personnel transportation, that is to say, crew members, agents, Port Authorities, suppliers, and authorised persons.

Whenever a tanker is about to arrive, the 2 Terminal launches will put out to sea. One will be standing-by near the SBM, waiting for the tanker to arrive. The other will carry out a survey of the floating equipment.

The launch standing-by will go alongside the tanker, so that the Mooring Master and mooring equipment can be passed to the tanker.

This task may take place while the vessel approaches the SBM, according to the Mooring Master's guidance.

BERTHING: The Dutos E Terminais Do Sul (DTSUL) consists of facilities for receiving, storage and transfer of oil.

Discharge System: The discharge system consists of an SBM connected to 2 parallel 20 in. diameter × 271 m. long (888.5 ft.) floating hoses.

At the ship's tail end of the hoses there are 2 special 16 in. hoses – "Tanker Tail Hoses" or "Ship Tail Hoses" – to be connected to the ship's manifold, provided with a butterfly valve and a blank flange (each flange is 16 in. in diameter Standard PSI-ANSI B.16.5).

Two 16 in. × 53 m. (173 ft.) in length nylon hawsers are fastened to the SBM turntable for mooring of the vessels.

On the upper part of the SBM there are 3 turning arms for securing the mooring hawsers and the hoses, as well as to balance the system.

From the bottom of the buoy start 2 submarine hoses 20 in. in diameter, connected to the underwater manifolds of the submarine pipe-lines.

Two × 11 km. long × 34 in. diameter submarine steel pipe-lines laid on the sea bottom following the general West-Easterly direction, connect the submarine manifold to the Terminal storage tanks.

Under normal conditions discharge system allows a 10,000 cu.m./h., 10 kg./cu.cm. (150 p.s.i.) pumping rate measured at the ship's gauge.

At the site where the pipe-lines reach the mainland there is a beacon showing an intermittent blue light indicating the general direction of the lines.

The above described discharge system is shown on the Brazilian Nautical Chart No. 1804 issued by the Diretoria de Hidrografia e Navegacao da Marinha do Brasil (Brazilian Navy Hydrographic Office-DHN).

Note: It is forbidden to navigate and to drop anchor within the area limited by two parallel lines 1 mile away from each side of the submarine pipe-lines, between the SBM and the mainland as well as within a circle 1 mile in radius centered on the SBM.

Storage System: The storage system consists of 7 tanks which are able to receive crude oil directly discharged from the tankers moored at the SBM.

The 5 tanks have the following main features:

Type: Cylindrical vertical (floating roof).
Diameter: 86.56 m.
Height: 14.63 m.
Nominal Volume: 86,114 cu.m.
Operational Volume: 77,000 cu.m.
Receiving Line: 36 in. diameter.

Two tanks have the following main features:

Type: Cylindrical vertical (floating roof).
Diameter: 45.72 m.
Height: 14.63 m.
Nominal Volume: 23,850 cu.m.
Operational Volume: 21,500 cu.m.
Receiving Line: 36 in. diameter.

The tanks are equipped with remote control valves and readings, monitored from the Operations Control Room.

Neither the tanks nor the lines are heated.

Ballast System: No conventional tank cleaning procedures are allowed. The SBM is not provided with ballast line.

Arrival: Arrival time will be considered either the one in which the ship arrives at the anchorage or when the Mooring Master boards the vessel, whichever occurs first.

As a rule, if mooring has to be postponed due to bad weather, tankers will moor according to their turn, considering the time of arrival.

The Superintendent of the Terminal, however, has authority to grant priority to a ship out of her turn.

Fully or partially loaded vessels may have to be diverted to other ports or terminals. Orders about this matter will come from Charterers and/or Agents, and will be conveyed through the Terminal.

To avoid delays the following items must be observed by the tanker: keep the Terminal advised about any change in ETA; arrive with the port side derrick and an ordinary pilot ladder on lee side rigged, as well as the 2 manifold flanges to be used ready for connection of the hoses, i.e. without blind flanges, reducers fitted if necessary, etc.; 2 good eye-spliced (9 in. circumference at least) nylon ropes on forecastle head; anchor well at home and secured with stoppers and brakes. If the ship's manifold flanges are not standard 150 p.s.i., ANSI-B.16.5-16 in. in diameter, the vessel must advise Terminal through the Agent before arriving.

Mooring: Mooring Master will advise on the way of securing the ship. Tankers are moored by 2 bow nylon hawsers of 16 in. circumference and 53 m. in length. Vessel's messenger lines are shackled, one at a time, to the pick-up wires of the hawsers by the launch crew and hove in by the vessel's windlass until the lengths of the chafing chains are brought over the roller chocks/fairleads and shackled to the wire strops secured to the bollards.

Hoses Connection: The Mooring Master will direct the Terminal's working men in lifting, connecting and lowering the hoses. After the vessel is securely moored, the 16 in. floating hoses must be individually lifted to the rail by the ship's gear. Sundry hose securing and connecting equipment (strops, gaskets, nuts, bolts, wrenches, etc.) will be supplied by the Terminal and put aboard the tanker just after arriving. Hoses will be lifted by the ship's derrick on the PORT SIDE. Minimum lift of 8 tons capacity is required. Winds reaching about 8 Beaufort Scale and waves, 3.0 m. high, may determine the operation to be interrupted and the hoses disconnected, according to the Mooring Master's judgement.

The minimum distance between the fairlead rollers (or minimum fairlead diameter) must be 0.28 m. (11.0 in.), in order to allow the shackle, which connects the mooring buoy hawsers, to go through.

The distance between the ship's bow and the discharging manifold amidship must be 160 m. (525 ft.) or less.

The ship's discharging manifold flanges must be standard 150 PSI-ANSI/B.16.5 – 16 in. in diameter.

The two manifold flanges to be used must be at least 2.0 m. away from each other, 2.0 m. above deck level and 4.5 m. away from the ship's rail, in order to allow proper room for hose connections.

The ship's rail or bulwark in front of the manifold must be 900 mm. below the manifold flanges and shaped with a minimum 100 mm. radius.

The vessel is required to give proper treatment to the Terminal personnel assigned to work on board, including accommodation and meals. As a rule, seven people are assigned on duty on board the vessel.

Should the ship not comply with the above stated requirements, she may be considered unsuitable for mooring at the SBM Terminal.

Discharging: Pumping must not be started without permission of the Mooring Master. The maximum allowable pressure is 10 kg./sq.cm. (150 p.s.i.). While the vessel is moored, the vertical angle formed by the hawsers and the sea surface should not exceed 30° degrees, for safety of the SBM. If necessary the Terminal will require the ship to pump sea water through the hose lines in order to displace the remaining oil.

Ballasting: When necessary, due either to excessive pitching or by being trimmed too much by the stern, pumping of ballast must be concentrated in the fore tanks, even though interruption of discharging becomes mandatory.

As a rule, the vessel must be ballasted at the same time the discharge is being carried out. Vessels which fail to do so, will be notified in writing and will be held responsible for the extra time spent at the SBM after the disconnection of the hoses.

No dirty ballast or any oily residues must be pumped overboard, otherwise the vessel may incur a heavy fine from the Brazilian Authorities.

Terminal Personnel On Board: The vessel is required to give proper treatment to the Terminal personnel assigned to work on board, including lodging and meals. As a rule, 7 people (1 Mooring Master and 6 workmen) are assigned to duty onboard the vessel.

Machinery in Readiness: When moored at the SBM, vessels must keep engines and propulsion machinery in readiness to unmoor and proceed under full power at short notice or to prevent riding upon the SBM. An Officer must also be on duty on the bridge. Should the ship not comply with above stated requirements, she may be considered unsuitable for mooring at the SBM.

MEDICAL: Medical and hospital as well as dental care facilities are available in Sao Francisco do Sul. In case of emergency or serious injury, the patients are, as a rule, sent either to Joinville or Curitiba.

FRESH WATER: Neither DTSUL nor Sao Francisco do Sul are able to supply either drinking or boiler water to vessels either moored or at anchor.

FUEL: Neither DTSUL nor Sao Francisco do Sul port can supply bunkers for vessels.

Lubricants: DTSUL has no way of supplying lubricants to vessels, either moored or at anchor. Nevertheless in urgent cases, Agents must be contacted in order to place orders for lubricants, 15 days in advance. Even then, lubricants can only be supplied in very limited quantities, due to the natural difficulties of transportation to moored ships.

CONSULS: There are no consular representatives in Sao Francisco do Sul and Joinville.

REPAIRS: Limited repairs may be effected by private workshops. Agents must be contacted 72 hours in advance in order to make the necessary arrangements to assist vessels needing repairs (including radar, radio equipment, radio direction finder and compass).

SURVEYORS: *Classification Societies:* There are no marine surveyor representatives in Sao Francisco do Sul. If necessary, they may be called, upon Agent's request, from Rio de Janeiro, where there are representatives of the American Bureau of Shipping, Lloyd's Register of Shipping, Bureau Veritas and others.

Petroleum Inspectors: There are no petroleum inspectors available in Sao Francisco do Sul. If necessary, they can be contacted through Agents in Paranagua-PR.

Engineer Sergio Luiz Ribeiro Martins, Av. Arthur de Abreu, 29-10 andar, conj.01/02 Centro, CEP 83.203-480 Paranagua, PR. Tel: (041) 4221814. Contact: Engineer Heron Lullez.

Administracao do Porto de Paranagua, BR-227 s/n Antonina, Predio Silao, CEP 82.300-000 Paranagua, PR. Tel: (041) 4231133.

WATCHMEN: Port watchmen have to be compulsorily assigned to duty onboard all vessels coming from overseas throughout the vessel's stay in port.

CUSTOMS: Brazilian laws are strict with regard to smuggling and Masters are requested to instruct their crew not to retain cigarettes in carton lots, cigars, tobacco, alcoholic drinks, drugs, souvenirs, etc. These should be collected prior to arrival, listed with the items in the Customs Locker to be sealed by the Customs Officials and placed in the custody of the Master throughout the vessel's stay. No commercial transactions will be tolerated, be it among Terminal employees, crew members or anyone else.

TIME: Local time is GMT minus 3 hours.

HOLIDAYS: *National Holidays:* All ships in port must be fully dressed on the following National Holidays: September 7th and November 15th.

BANKS: Bank of Brazil, Rua Hercilio Luz 53, Sao Francisco do Sul, S.C. Tel: 0474-44-0202, 0474-44-0187.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

GENERAL:

Flags: In accordance with international practice, quarantine signals must be displayed by vessels when approaching Brazilian ports. These signals shall be displayed continuously until Free Pratique is granted and are: Sunrise to sunset – Quarantine flag "Quebec"; sunset to sunrise signal lights red over white.

Tankers will display the red flag "Bravo" during the day and a red light during the night throughout their stay in port, indicating inflammable or explosive cargo.

Charts/Publications: The Diretoria de Hidrografia e Navegacao da Marinha do Brasil (Brazilian Navy Hydrographic Office) has issued the following nautical charts of this area: DHN 1800, 1830, 1804, as well as Roteiro DH 1.8 (Brazil Pilot), Lista de Farois DH 2.11 (List of Lights) and Lista de Auxilio Radio DH 8.8 (Radio Aids List).

No charts or navigational publications are available at DTSUL or Sao Francisco do Sul. When necessary, Masters must contact ship's Agent, in advance, for placing orders for such items in Rio de Janeiro.

Provisions and Stores: Orders for provisions and stores may be placed through the Agents or directly to shipchandlers. Most of the items are obtainable in Joinville but some may be found in Sao Francisco do Sul.

Laundry: There are limited laundry facilities in Sao Francisco do Sul. Orders for such services must be placed in advance through Agents.

Tidal Amplitudes: The tides in the area of the SBM present the same characteristics as those of the port of Sao Francisco do Sul. (Please refer to the Tide Tables issued by Diretoria de Hydrografia e Navegacao da Marinha do Brasil - Brazilian Navy Hydrographic Office - DG - 16 - 15).

High and low tides occur nearly 40 minutes before they occur in the port of Sao Francisco do Sul and the tidal amplitude at the SBM area is a little below the ones of the said port.

Weather Conditions: As a rule, the conditions in the area of the SBM may be considered fair, as far as operating conditions for the vessels are concerned, except in the occurrence of gales from the South, which sometimes blow for more than 48 hours in Winter time.

Winds: The strong winds recorded in the area originate from the South, caused by cold fronts or instability lines. One of the strongest recorded winds blew on May 18th, 1982, from N.W. reaching an intensity of 130 km. per hour, for a short period of time. It was observed that at the same time the isobathic wind at the sea, blew from the South with an intensity of 40 km. per hour.

Rain: The average annual rainfall is about 980 mm.

Visibility: The visibility in the area is generally fair all year round, except in Winter time when sometimes fog may occur.

Temperature: The local average temperature ranges from 8°C (46°F) in June, July and August, to 32°C (90°F) in January and February.

Humidity: The relative humidity of the air is nearly 80% in the region.

Currents: Currents in the area are not related to the local winds since the set, as well as swells result, as a rule, from deep sea winds which are not always in correspondence with local winds.

According to the variation of the intensity of the high sea winds, it is possible to forecast the variations of the intensity of the currents in the area of the SBM.

In the vicinity of the SBM, when there is no wind or there are only winds of low intensity, the currents of the area are strongly influenced by the tidal set of the bar of the port of Sao Francisco do Sul.

Waves: Southerly winds are originated, as a rule by cold fronts. The waves caused by them are very seldom higher than 3.5 m. (11.4 ft.).

The waves are, usually, 2.5 m. in height and have an 11 second period when Southerly winds blow during the Winter time, from June to October.

The maximum wave height allowable for operating vessels moored at the SBM is 3 m. (9.8 ft.), depending on the conditions of the mooring lines and the tensions over them.

AUTHORITY: Petroleo Brasileiro S.A.-PETROBRAS, Avenida Republica do Chile, 65 Centro, 20035 Rio de Janeiro – RJ. *Tel:* (021) 534-3886. *Telex:* 212-3355. *FAX:* (021) 262-6656. *Contact:* Chief of Operations Division.

SAO LUIS (Including Itaqui), Maranhao: 02.30 S. 44.07 W. (See Plan)

LOCATION: *Itaqui:* The Port of Itaqui is located in the bay of Sao Marcos, in the Municipality of Sao Luis, Capital of the State of Maranhao, almost at the edge of the N.E. region of Brazil, and 9 km. to the S.W. of the city, with which it is connected via a breakwater extending over the River Bacanga.

The location, fairly sheltered, encompasses Itaqui Point and extends to the North as far as Madeira Point, where a Terminal is to be constructed for handling iron ore on behalf of Serra Dos Carajas, and to the South, reaches close to the Island of Tauamirim: it is formed by a re-entrance into the coast where the contours (depths) of 0 m., 5 m., 10 m., and 15 m., are almost parallel and are between 30 and 40 m. apart. In front of Itaqui, at a distance of 400 m. from the quay, is the Island of Guarapira with maximum dimensions of 100 m. × 300 m. and stretching in a N.S. direction.

The Area of Administration of the "Maranhao Docks Company" includes the Bay of Sao Marcos and the Islands located within it, being limited by a line which joins Tatinga Point on the mainland, to Sao Marcos Point on the Island of Sao Luis.

(a) The Port of Itaqui is confined between the parallels of 02° 34' S., and 02° 36' S. and meridians 44° 21' W. and 44° 24' W.

(b) The "Administrative Area" is confined by the following co-ordinates:

Meridians of 44° 24' W. and 44° 19' W.
Parallels of 02° 37' S. and 02° 29' S.

(c) The Area of Jurisdiction encompasses the whole of the coast of the State of Maranhao, from the border with the State of Piaui as far as the frontier with the State of Para.

DOCUMENTS: See "General" before first port.

PILOTAGE: Approaching coast, the Master must inform Agent via Coast Station Sao Luis – PPB (VHF Channels 16, 24, 25, 26 and 27) or Radio Marinha de Sao Luis – PWM (HF). Pilot launch painted red and provided with conventional lights. Launch awaits at Ponta da Madeira or other places requested in limit by Brazilian Chart DHN–412.

Vessel to notify Pilot service of ETA 6 hours before arrival.

ANCHORAGE: *Sao Luis:* The following areas are reserved for the anchorage of vessels awaiting to enter port.

(a) Location No. 1 for vessels of more than 2,000 g.r.t., up to 21 ft. draft and 135 m. overall (this is the nearest anchorage to the town).

Location No. 2 for vessels up to 18 ft. draft (and that which follows No. 2).

Location No. 3 for vessels up to 18 ft. draft (the nearest to the bar).

These anchorages are situated between the parallels of 02° 30′ 5″ S. and 02° 31′ 5″ S.

(b) Vessels impounded or requiring extensive repairs:

Vessels up to 10 ft. – Lat. 02° 31′ 9″ S., Long. 44° 18′ 7″ W.

Larger vessels: Lat. 02° 30′ 0″ S., Long. 44° 20′ 0″ W.

(c) Anchorage for vessels of less than 2,000 g.r.t. To the South of the partly submerged hull of the *Maria Celeste* between the State Warehouse and the Customs Warehouse.

(d) Vessels in quarantine: Lat. 02° 29′ 5″ S., Long. 44° 20′ 5″ W.

Vessels may not anchor in the approach channel or the turning basin.

Itaqui: The following anchorage zones for vessels arriving at Itaqui:

(a) Vessels over 5,000 g.r.t.: Lat. 02° 35′ 5″ S., Long. 44° 22′ 4″ W.

(b) Vessels impounded or requiring extensive repairs:
Lat. 02° 35′ 1″ S., Long. 44° 22′ 3″ W.

(c) Vessels in quarantine: Lat. 02° 35′ 4″ S., Long. 44° 23′ 3″ W.

(d) Inspection anchorage: Lat. 02° 35′ 2″ S., Long. 44° 22′ 4″ W.

RESTRICTIONS:

Sao Luis: May only be entered during daylight hours and near HW.

Itaqui: Cargo vessels may moor any time during the day or night depending on the state of the tide. Vessels bound for the oil terminal may only berth on the rising tide during the day. Berthing should commence 1 hour before HW.

MAX. SIZE: For port of Itaqui, max. draft at LW is 34 ft. At HW, depth of 45 ft. to 48 ft. available depending on height of tide.

Also see Ponta da Madeira and Alumar.

HEALTH: (See "General" before first port.) Health Authorities visit compulsory, due to disinfection by Yellow Fever Service.

Tankers bound for the oil terminal will be inspected at the terminal after mooring is completed.

Vessels awaiting berths will be inspected at the inspection anchorages.

RADIO: Radio Marinha, code PWM, may be used for any message to the Agent.

TUGS: *Sao Luis:* Several tugs available. *Itaqui:* None.

BERTHING: *Sao Luis:* See "Anchorage".

Itaqui: Administration Quay – Length 164 m., depth 12 m.
Warehouse Quay – Length 164 m., depth 12 m.
North Quay – Length 164 m., depth 12 m.
South Quay – Length 164 m., depth 12 m.

The 80 m. quay will be provided with a ramp for car ferries.

Also see "Ponta da Madeira" and "Alumar".

CRANES: *Sao Luis:* 8 portal cranes (2×6 tons, 6×3 tons) 1×50 tons, 2×3 tons, 1×6 ton on order.

Itaqui: 6×3.2 ton (gantry), 2×6.3 ton (gantry)
3×2.5 ton (mobile), 1×4.0 ton (mobile).
1×9.1 ton (mobile), 2×4 ton (tracked mobile).

BARGES: *Sao Luis:* 11 barges of 60 tons, 5 barges of 80 tons and 1 barge of 150 tons capacity. There are also 5 oil barges with a total capacity of 1,090 tons.

BULK HANDLING FACILITIES: 2 mobile grain elevators at Warehouse Quay serving Maranhao Wheat Mill, rate 150 t.p.h. The Maranhao Wheat Mill has silos with 12 cells, capacity 6,000 tons. Additional silos with 2,000 tons capacity available. The rated capacity of the elevators will be doubled in the near future.

STEVEDORES: On receipt of vessel's ETA Agent provides the necessary gangs. Master to mention in his ETA cable the distribution in cargo hold enabling Agent to arrange for number of gangs required. When loading or discharging bagged cargo an average of 4,000 bags per 8 hours work per gang handled.

MEDICAL: Advance notice by radio preferred, since medical assistance in Sao Luis is limited to 1 general clinic and 3 hospitals.

FRESH WATER: *Sao Luis:* Fresh water available by barge, rate 60 tons per day. There is also an outlet at warehouse No. 4 on the quay.

Itaqui: Available ex-wharf, rate 18 t.p.h.

FUEL: *Sao Luis:* Fuel oil available alongside, delivery by road tanker. *Itaqui:* Diesel oil available to vessels alongside the Warehouse Quay and South Quay.

CONSULS:

France	Tel. 1117		Spain	Tel. 2664
Portugal	" 1689		Norway	" 1888
Denmark	" 1507		Bolivia, no telephone	

Italian Consul at Itaqui. Tel: 2-04-08.

REPAIRS: Shop for small repairs available.

GANGWAY/DECK WATCHMEN: Normally done by the crew.

OPENING/CLOSING HATCHES: Done by stevedores.

CUSTOMS ALLOWANCES: No limit or restrictions.

REPATRIATION: Possible. Last Port Clearance and Crew List required by Maritime Police.

AIRPORT: 13 km. from centre of town (18 km. from Itaqui), with daily flights to North and South of country.

TIME: GMT minus 3 hours.

HOLIDAYS: January 1st; April 21st; May 1st; September 7th; November 15th; December 25th (National holidays). July 28th; September 8th, December 8th, June 29th (local holidays); Maundy Thursday; Good Friday (Church holidays). On all holidays, except Good Friday, work permitted.

POLICE/AMBULANCE/FIRE: Police Tel: 1150; First Aid Ambulance 1943; Fire Brigade 1753.

TELEPHONES: No facilities for placing telephones on board.

IDENTITY CARDS: Foreign Crew members not permitted to go ashore without presentation of Identity Card, on which is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The Identity Card must be given on disembarkation to the Federal Police who will return it to the Crew member on re-embarkation.

GENERAL: Itaqui is rail-connected with the whole of Brazil, with the exceptions of the States of Para (Belem) and Amazonas (Manaus).

DEVELOPMENTS: Wharf at Itaqui to be extended to 1,068 m. Depth will vary from 30 ft. to 40 ft.

The existing petroleum berth will be replaced by the final extension of the wharf, although plans indicate the intended construction of a new Petroleum Berth on Guapira Island.

New unloader for bauxite, coke and iron ore under construction, rate 1,500 tonnes per hour.

A 16,000 t.p.h. linear shiploader has been ordered for Itaqui.

Also see "Ponta da Madeira" and "Alumar".

SHIPMASTER'S REPORT: June 1992.

Charts: B.A. Charts No. 535 and 543.

Approaches: Light float on shoal (Recife Mancel Luis), when coming from the West, shows up at 15 miles on radar. Racon "BF-3" showed up at 20 miles.

Buoys, commencing with No. 1 and 2, were found to be in approximate charted positions. But pilots warned, they cannot be relied upon.

Buoy No. 6 (Lat. 01° 53.8′ S., Long. 43° 54′ W.) and No. 7 (Lat. 01° 52.6′ S., Long. 44° 0.8′ W.) have disappeared.

Tidal streams can be strong, especially during October to April, when rates up to 8 knots can be encountered in Baia de Sao Marcos.

No shore features were prominent on radar until about Buoys No. 9 and 14.

Pilot: Available throughout 24 hours, depending on tide. Pilot can be contacted on VHF Channel 16 and 14 throughout 24 hours, call sign "Sao Luis Pilot". Pilot office at Pta. de S.Francisco (Lat. 02° 31.2′ S., Long. 44° 18.3′ W.), near Sao Luis City. Boarding positions as per B.A. Chart No. 535. Pilot cutter is based at Itaqui General Wharf.

Berthing and unberthing at Itaqui Wharf is usually from 2 hours after L.W. to H.W., and vessels normally berth starboard side to.

Depending on draft, the above is variable with port side berthing possible.

Two fast red hulled cutters are based at Itaqui.

Pilot arranged through Agent, and notice of 24 hours, 12 hours and 6 hours, when inbound, and 2 hours, when outbound, is required. Pilot is difficult to contact until in the vicinity of Buoys No. 5 – 10.

Anchorages: As marked on B.A. Charts No. 535 and 543. For vessels awaiting pilot/tide, the general anchorage (as per B.A. 535) centred on Lat. 02° 25′ S., Long. 44° 15′ W. is used. As per B.A. 535, various other anchorages for various berths.

Holding is not good in river anchorages, due to strong tidal streams and soft bottom.

The outer anchorage near Buoy No. 6 is not normally used.

Tidal Range: About 5.0 m., which makes for strong tidal streams. Brazilian Tide Tables are most useful.

LPG Berth: Located at Southern end of Itaqui General Wharf (Lat. 02° 34.9′ S., Long. 44° 22.15′ W.). Two stand-pipes on wharf as per "Plan".

Wharf is stone/concrete and has large tractor tyre fenders. Midships gangway can be landed.

Moorings: 4 head/stern lines, 2 springs each end. No mooring boat used.

Gangway and moorings to be tended frequently, due to tidal range.

Tugs: For Itaqui Wharf, 2 modern tugs of 750 h.p. are used. Tugs push when berthing and use tugs lines. When leaving, tugs tow using ship's lines.

TANKERS: Discharge at Port of Itaqui.

Tank Capacities:

	Esso		*Sabba*		*Texaco*		*Petrobras*		*Gas Butano*	
Products	*No. of Tanks*	*Volume (cu.m.)*	*No. of Tanks*	*Volume (cu.m.)*	*No. of Tanks*	*Volume (cu.m.)*	*No. of Tanks*	*Volume (cu.m.)*	*No. of Tanks*	*Volume (cu.m.)*

B.P.F.							1	4,032		

The iron ore berth at Ponta da Madeira has 5 powerful tugs available, 4×3,000 h.p. and 1×5,000 h.p.

Berths: Ponta da Madeira can take ore carriers up to 23.0 m. draft at L.W.

Work is progressing on a tanker pier at Itaqui, an extension of the General Cargo Wharf, with 2 berths of 21.0 m. draft, completion expected in 1993.

The General Cargo Wharf has 3 berths for moderate sized vessels. Depths at Berths No. 1 and 3 is quoted as 30 ft. at L.W., and Berth No. 2 (centre) 25 ft. at L.W.

The General Cargo Wharf has 8 electric luffing cranes of 3.5 tonnes to 7 tonnes capacity and 3 suction elevators for grain.

Coal and coke are handled at the Southern Berth (No. 3) by 2 mobile loading elevators.

Cargo: As previously mentioned, LPG is discharged at the Southern Berth via one of two underground stand-pipes at the wharf face.

2 flexi-hoses from the stand-pipe to a 'Y' piece of 6 in. coupling.

We found an average back pressure of 6 Bar (+12°C and 200 tonnes p.h.).

Butane or Mix is pumped into Petrobras tanks 2.5 km. away, capacity 700 tonnes. From here the terminal transfers by own pumps to the Northern Storage Depot 5 km. away and has 1,400 tonnes capacity.

Services: Fresh water is available from the wharf. 24 hours notice required through Agent.

A number of ship chandlers are available. Price of local produce is good. Laundry service also available.

No telephones near at hand. There is a disconnected telephone at guard hut 1 km. away.

Sao Luis is a holiday resort, 15 minutes away by taxi.

Authorities: Even though we were coastwise, full entry procedure required (6 Crew Lists, 3 Stores Lists, 2 Personnel Effects Lists). Sanitary inspection took place.

Security: There is a lack of security, and vessel was inundated with "visitors". The ferry terminal close by did not help matters.

AUTHORITY: Companhia Docas do Maranhao, Rua da Paz 561, Sao Luis, Maranhao, Brazil. *Contact:* Washington de Oliveira Viegas, President.

AGENT: Wilson Sons Agencia Maritima Ltda., Av. Castelo Branco 333, Sala 207, 65076-090 Sao Luis MA. Tel: (098) 235-4729, 235-2529 (After hours: (098) 321-4191). Telex: (98) 1032 WSON BR. Fax: (098) 235-4269. Cables: Angelicus

SAO SEBASTIAO: 23.48 S. 45.24 W. (See Plan)

LOCATION: Terminal Maritimo Almirante Barroso (TEBAR) is located on the West edge of the Sao Sebastiao Channel. Safe access is made through the South Entrance. The geographical position of berths is Lat. 23° 48' 12" S., Long. 45° 23' 18" W.

PORT LIMITS: *North Bar:* Latitude 23° 42' S. – from Longitude 45° 19' W. Westward to the coast and to the South as far as Sebastiao Island.

South Bar: Latitude 23° 54' S. – from Longitude 45° 31' W. to the North to Pta. do Toque-Toque and East to Sebastiao Island.

DOCUMENTS: The visiting area of the Port Health Authorities, Federal Revenue and others, is designated by the alignment: Ponta do Araca-Ilha das Cabras (South) and South limit of the zone of submarine cables (North).

Inward clearance is effected on board immediately after docking by Government Port Officials and Agent's Representative. It is necessary that the following documents be ready on arrival.

Any document regarding outward clearance of the ship at last port of call.

5 copies Crew List.
2 copies Store List.
2 copies Personal Effects List.
3 copies Passenger List.
3 copies Cargo Manifest, (or more if available).
3 copies Bill of Lading, (or more if available).
2 copies Maritime Declaration of Health.
Notice of Readiness (Addressed to Petrobras)
List of vessel's particulars: call sign, n.r.t., g.r.t., d.w.t., speed, engine b.h.p., draft, total crew, officers, time of arrival, loading ports and dates of sailing, quantity of cargo for Sao Sebastiao, quantity of cargo in transit for other ports, etc.

APPROACHES: *Approaching Channel:* The channel of the port of Sao Sebastiao is 12.3 miles long. The South Bar Channel, dredged to 25 m. is 300 m. wide at its narrowest part, allowing entrance and sailing of vessels drawing up to 23 m. The North Bar Channel sounded to 18 m. is 550 m. wide at its narrowest part, allowing entrance and sailing of vessels drawing up to 10 m.

Special attention should be paid by vessels drawing over 18 m. when navigating in the Sao Sebastiao Channel; Chart DHN Nos. 1614, 1644 and 1643 show several cautions with depths of 20 m. and less in the proximities of the limits of the channel.

South Entrance: It is the safest way to reach Sao Sebastiao.

There is a lighthouse whose name is Ponta da Sela at the S.W. border of Sao Sebastiao island which marks the South Bar Channel, showing a white light on white painted red striped tower, numbered G0480 by international code.

Lage dos Moleques is a levelling rock near the N.W. channel edge, marked by a green painted quadrilateral masonry lighthouse, showing green flash lights and numbered G0478 by international code.

Farolete da Pontinha, located on the S.E. channel edge, displays red fixed lights on a white painted metal quadrangular structure, numbered as G0477 by international code.

The South of the channel of the port of Sao Sebastiao, being 300 m. wide in its narrowest part and dredged to 25 m., is marked by 4 beacons:

Beacons 1 and 3 – Painted red and fixed on S.E. edge.
Beacons 2 and 4 – Coloured green and fixed on the N.W. ege.

Also see DHN Nautical Charts No. 1643 and 1644.

Speed limit for merchant vessels in and near Sao Sebastiao port is 4 knots.

Remarks: Both lights and colours of the beacons of the South Bar are in accordance with the IALA system (International Association of Lighthouse Authorities).

North Entrance: The lighthouse Ponta das Canoas, situated on North border of Sao Sebastiao Island marks the North Bar Channel, showing white light on white painted red striped tower, numbered G0470 by international code.

The Farolete Sao Sebastiao, located on the West channel edge, displays red lights on a red painted quadrangular masonry structure, numbered G0472 by international code.

The Farolete da Ponta do Viana, located on the East channel edge (Sao Sebastiao island), displays white flashing lights on a metal structure over a white quadrangular masonry base.

The Farolete Ilhabela, situated on the East channel edge (Sao Sebastiao island), shows red flash lights on red quadrangular masonry tower.

The North Entrance Channel is 18 m. deep, dredged in a 550 m. wide stretch in its narrowest band. DHN Nautical Charts No. 1614 and 1643 can assist vessels calling at Sao Sebastiao. Access is limited to 10 m. maximum draft. Safe access is made through the South Entrance.

The channel of the port of Sao Sebastiao is 12.3 m. long.

Special attention should be paid by vessels drawing over 18 m. When navigating in the Sao Sebastiao channel, DHN Charts No. 1614, 1643 and 1644 show several cautions with depths of 20 m. and less in the proximities of the limits of the channel.

Cautions on DHN Charts No. 1614 and 1644 showing the existence of submarine cable should be strictly observed. It is forbidden to anchor within the marked area.

While moving in the channel, all ships must keep their anchors secure above the sea level.

Four light beacons, exhibiting yellow flashes, visible 5 miles, are fixed on the Terminal, two of them on wharf's edge, one on the N.E. edge of the pier and another on the S.W. edge.

Remarks: For details, such as height of lights, periods, positions, range of light, descriptions, etc., consult List of Lights Brazilian Hydrographic Publication, DH-2 Lista de Farois.

Tidal Stream: The height of the tide in the port of Sao Sebastiao varies from (−) 0.2 m. at LW and 1.5 m. HW, having an average level of 0.66 m. The tide runs either Northerly into the channel or Southerly with characteristics of permanent flowing as if it was a river following the orientation as given by the channel. The current attains considerable speeds which might prejudice the manoeuvring of vessels in the channel, specially at times of entrance of a cold front when winds also attain a significant force.

Whistling: Vessels approaching the port, prior to coming to Araca Point, must give a long blast on the whistle as a warning.

PILOTAGE: Pilotage is compulsory within the port limits for all vessels over 500 d.w.t.

The request for Pilots for entering should be made through the ship's Agents 24 hours in advance via Santos Radio Station (PPS) or Sao Sebastiao Radio (PTS) when the vessel's ETA is given. The ETA should be confirmed 3 hours in advance through Channels 13 or 16 (VHF) to the Pilot's Association of the Port of Sao Sebastiao.

The positions for boarding and disembarking of the Pilot – are defined by the areas of the circles of 0.5 miles radius whose centres are the following coordinates (Chart DHN No. 1614):

(a) North Bar: Lat. 23° 42' 30" S., Long. 45° 21' W.
(b) South Bar: Lat. 23° 53' 30" S., Long. 45° 29' 30" W.

The Pilot's Association functions at Rua Duque de Caxias No. 474, Sao Sebastiao. Tel: (0124) 52-1332. Fax: (0124) 52-1762.

ANCHORAGE:

(a) North Bar – Limited by alignments: Sao Sebastiao Lighthouse – Ponta das Canas Lighthouse – Ponta da Cruz – Quay of Ilhabela. Capacity of anchorage for 4 ships.
Priority is given for vessels over 100,000 d.w.t., for those needing emergency repair, waiting sailing program or those in need of shelter from storms.

(b) South Bar – Limited by alignments Ponta do Araca – Ilha das Cabras – Ilha Toque – Toque – Ponta da Sela Lighthouse. Capacity of anchorage for 5 ships, with preference given to vessels awaiting berth.

All ships can obtain permission to anchor in the maritime areas from the North of Lat. 23° 42' S., and South of Lat. 23° 54' S., by asking Delegacia da Capitania dos Portos do Estado de Sao Paulo in Sao Sebastiao.

Recreation and sport boats must anchor outside the dredged channel.

Anchorage areas have a sand and mud bottom, providing good holding ground for the vessel's anchor. However, special care must be taken when strong winds blow in the area, mostly from S.W., when the stream can reach a high rate which causes the ship to drift.

Manoeuvering Area: Limited by alignments: Ponta do Araca – Ilha das Cabras and Pontal da Cruz – Quay of Ilhabela. Anchorage prohibited in this area.

RESTRICTIONS: The terminal normally operates around the clock. Ships are moored and unmoored at any hour except when an unexpected event arises, such as breakdowns, gales, heavy squalls, and so on.

Safe draft for passing along the dredged channel is 23 m. (75.5 ft.), no matter what existing conditions are, such as day or night, current set and drift, wind, tide or swell. However, at the discretion of Pilot, according to the prevailing above conditions vessels can use the channel with drafts up 24 m. (78.7 ft.) These figures are not final as they may change in time without previous notice.

Remarks: The limitations mentioned above could result in rejection of the ship as being unsuitable for this Terminal.

Speed: Max. speed in port limits is 4 knots.

MAX. SIZE: *Draft in Access Channel:*

South Bar Channel, allowing entrance and sailing of vessels drawing up to 23 m.

North Bar Channel, allowing entrance and sailing of vessels drawing up to 10 m.

Ship's Drafts at Terminal:

South Pier:	PP1 Berth – 23.00 m. (76 ft.).	
	PP2 Berth – 18.00 m. (59 ft.).	
North Pier:	PP3 Berth – 19.00 m. (62 ft.).	
	PP4 Berth – 13.00 m. (42 ft.) any tide.	

HEALTH: Port doctor visits all ships on arrival and requires Maritime Declaration of Health, Derat Certificate, 2 Crew Lists. Vessels from another Brazilian port automatically receive Free Pratique and should not fly Quarantine Flag. If suspected disease or fever on board it is advisable to cable Agent before arrival.

RADIO: Vessels bound for Sao Sebastiao should advise their ETA 72 hours, 48 hours and 24 hours prior to arrival to Agent via PDR (Rio), PPS (Santos) or PTS (Sao Sebastiao).

Communication with Agent can also be performed by SSB radiotelephone through coastal stations of the area: Rio Radio, Santos Radio and Sao Sebastiao Radio.

Once within VHF range, all vessels will also call Terminal or Pilot Control, in order to receive instructions.

When sending ETA, message should specify whether it is local time or GMT.

TUGS: *Owned by Petrobras:*

1×3,170 b.h.p. – Bollard pull 40 tons (twin motors equipped with controlled pitch propellers – Seize).

2×3,720 b.h.p. – Bollard pull 40 tons (twin motors equipped with Voith Schneider system).

Privately Owned:

1×2,170 b.h.p. – Bollard pull 32 tons (twin motors equipped with Schottel system).

While rendering such assistance, the tugboats act under orders of Harbour Pilot. These tugs are fitted with fire pumps and monitors (including mechanical foam to assist in fighting fires. The following ship's whistle signals code is used for tugs communications:

Calling:

4 long blasts followed by 1 or 2 short blasts.	The number of short blasts will call 1 or 2 tugs respectively.

Before Towing Line is Made Fast:

2 short blasts	Prepare to push on the bow or to pick up line from ship's bow.
3 short blasts	Prepare to push on the stern or to pick up line from ship's stern.

After Towing Line is Made Fast:

1 long blast	Pull to starboard
2 short blasts	Pull to port
3 short blasts	Stop pulling

Manoeuvring Alongside Ship's Hull:

1 short blast	To pull
2 short blasts	To push

Other ship's whistle signals are used for auxiliaries boats.

Calling:

2 long blasts followed by 1 short blast	To call small craft or Pilot (launch)
1 long blast followed by 1 short blast	To call motor-boat (launch)

All orders received by tug will be acknowledged with a distinct short blast.

As tugboats are provided with VHF, manoeuvring orders may be given by radio.

Usually orders to fore tug are given by a mouth whistle and to aft tug by ship's whistle.

Tugs are fitted with flashing signal lamps.

Instructions for Tug Service at Terminal Maritimo Almirante Barroso (TEBAR), published by Capitania dos Portos do Estado de Sao Paulo: All docking and undocking manoeuvres in normal conditions must be accomplished with at least the number of tugs mentioned in the subsequent list.

Corresponding Table between deadweight, total bollard pull and number of tugs required for mooring and unmooring manoeuvres during pilotage operations in Sao Sebastiao Channel – SP:

D.w.t. (tons)	*Total Bollard Pull* tonnes	*Minimum Number of Tugs*
Up to 2,000	2.5	2
From 2,001 to 2,500	3.0	2
From 2,501 to 5,000	7.0	2
From 5,001 to 7,500	9.0	2
From 7,501 to 10,000	11.0	2
From 10,001 to 12,500	14.0	2
From 12,501 to 15,000	17.0	2
From 15,001 to 17,500	19.0	2
From 17,501 to 20,000	21.0	2
From 20,001 to 25,000	25.0	2
From 25,001 to 30,000	28.0	2
From 30,001 to 35,000	32.0	2
From 35,001 to 40,000	36.0	2
From 40,001 to 45,000	39.0	2
From 45,001 to 50,000	42.0	2
From 50,001 to 60,000	46.0	2
From 60,001 to 70,000	51.0	2
From 70,001 to 80,000	53.0	2
From 80,001 to 90,000	55.0	2 – 3
From 90,001 to 100,000	56.0	2 – 3
From 100,001 to 110,000	58.0	2 – 3
From 110,001 to 120,000	60.0	2 – 3
From 120,001 to 130,000	62.0	2 – 3
From 130,001 to 140,000	64.0	2 – 3
From 140,001 to 150,000	66.0	2 – 3
From 150,001 to 160,000	81.0	2 – 3
From 160,001 to 170,000	83.0	2 – 3
From 170,001 to 180,000	86.0	2 – 3
From 180,001 to 190,000	87.0	2 – 3
From 190,001 to 200,000	89.0	2 – 3
From 200,001 to 210,000	90.0	4
From 210,001 to 220,000	91.0	4
From 220,001 to 230,000	93.0	4
From 230,001 to 240,000	95.0	4
From 240,001 to 250,000	96.0	4
From 250,001 to 270,000	98.0	4
From 270,001 to 290,000	101.0	4
From 290,001 to 310,000	106.0	4
From 310,001 to 330,000	110.0	4 – 6
From 330,001 to 350,000	114.0	4 – 6
From 350,001 to 370,000	118.0	4 – 6
From 370,001 to 390,000	121.0	4 – 6

Remarks: The bollard pull data shows the minimum value necessary for manoeuvres taking into account the non-existence of unfavourable currents.

Notes:

1. When for the sake of safety the Pilot may consider necessary a number of tugs beyond the number mentioned, he may act accordingly, justifying same, shortly thereafter, in writing to the Delegate of the Captaincy in Sao Sebastiao.
2. When the condition of the sea, intensity of the wind or the visibility stops operations, the Pilot's Association should officially inform the Delegacy in Sao Sebastiao, accordingly.
3. If a tug is not able to operate with all its bollard pull, the responsible Agent must report that incapability to the Delegate of the Captaincy in Sao Sebastiao and the Pilot's Association, keeping the tug out of operation.

In case of non-agreement between the Master of the ship and the Pilot about the number of tugs to be employed, the Master's decision should prevail. Anyway the Master is asked to justify his decision in writing to the Delegate of the Sao Sebastiao, Port Captaincy, as soon as the manoeuvres end.

Orders for tug services are to be placed by shipowners or its representative Agent, according to Pilot's request, but with the agreement of the ship's Master.

GENERAL CARGO WHARF: *Commercial Quay:* Length 150 m., depth 8.2 m. 6 bollards for berthing, spaced 30 m. apart. Fresh water available, 3 hydrants, capacity 10 cu.m.p.h. each. Fuel available by road tanker in small quantities.

Warehouses/Open Storage Areas: The covered storage area, available in the port area is 2,000 sq.m. and has a capacity of 12,000 cu.m. The open storage area for containers in the port area is 20,000 sq.m. and for heavy lifts 24,000 sq.m.

The storage area outside the port area, covered and open, is 10,000 sq.m. and belongs to the Companhia Nacional de Armazens Gerais Alfandegados (National Bonded General Warehousing Company).

There are no cold stores or silos on the port quay.

Cranes: 1×25 ton (private), 1×50 ton, 1×22 ton, 1×16 ton, 1×12 ton and 4×4.5 ton.

Stackers: 21×2 ton – 13.5 ton.

MEDICAL: Medical treatment and/or hospitalisation, if required, is provided in the private local hospital. Dentists are available in the area. For emergency cases (serious illness or injury), first medical aid may be requested by the Master. Internal telephone number is 232. If patient does not speak Spanish or Portuguese, an interpreter should accompany him.

TANKERS: The Terminal is located on the Western edge of the channel between the shore and Sao Sebastiao Island. Safe access for large tankers is possible through the South Entrance but smaller tanker of draft 35 ft. or less may enter through the North Entrance.

The head of the jetty which is "T" shaped is 1,690 m. (5,544 ft.) from the shore, in position Lat. 23° 48.2′ S., Long. 45° 23.3′ W.

The Terminal has 2 piers with 4 mooring berths.

North Pier:

	East Berth	*West Berth*
Name:	PP-3	PP-4
Location:	External side	Internal side
Length:	395 m.	395 m.
Depth:	19.0 m. (62 ft.)	13.0 m. (42.6 ft.)
Marine hoses:	Crude 2×10 in. D.O. (2×8 in.)	Crude 1×10 in. D.O. (2×8 in.)
D.w.t.:	150,000	65,000
Ship's manifold maximum heights above wharf's platform:	16.0 m. (52 ft.)	16.0 m. (52 ft.)

South Pier:

	East Berth	*West Berth*
Name:	PP-1	PP-2
Location:	External side	Internal side
Length:	510 m.	510 m.
Depth:	23 m. (75 ft.)	18 m. (59 ft.)
Loading arms:	Crude 4×16 in. D.O. (1×8 in.) Bunkers 1×10 in.	Crude 3×16 in. D.O. (1×8 in.) Bunkers 1×10 in.
D.w.t.:	300,000	155,000
Ship's manifold maximum heights above wharf's platform:	21.5 m. (71 ft.)	17.8 m. (58 ft.)

Pipelines: 2×34 in. diameter pipe-lines, 2,300 m. (7,500 ft.) link the South Pier to the shore tanks. 2×24 in. diameter pipelines, 2,000 m. (6,500 ft.) link the North Pier with the shore tanks.

Information required on Arrival:

Name and vessel's call sign.

Country of Register.

Cargo type and exact technical name.

Cargo layout on board indicating which one will be discharged and which will stay on board.

In case of ships equipped with inert gas system, inform its operational condition.

Any damage to engine, machinery or hull able to cause prejudice to manoeuvres and safety of other ships, or put in danger the environment, people or land properties.

Draft on arrival.

Draft after finishing loading/discharging.

Any leaks in hull, bulkhead, valves or lines prone to provoke pollution or to affect operations.

Any repair which may result in delay of the start of loading/unloading.

Whether or not there will be crude oil washing.

Manifold details, including type, diameter and connection material to be used.

Quantity and type of slops and dirty ballast to be discharged into shore tanks.

The time to issue Notice of Readiness is considered the time the vessel reaches Ponta do Araca. The Notice of Readiness will be presented at the time the tanker is in all respects moored and ready to operate.

LOADING: *Maximum Permissible Pressure:* Both piers 10 kg./sq.cm. (150 p.s.i.).

Receiving Capacity:

Product	Line No.	Pier	Rate (cu.m./hr.)	Line Size (in.)
Clean Products	01 (14)	North Pier – P.4	4,000	24
Crude	02	North Pier – P.3	4,000	24
Crude	07	South Pier – P.1	9,000	34
Crude	08	South Pier – P.2	9,000	34
Diesel (Supply)	1301	North Pier/South Pier	500	8
Bunkers	1201	North Pier/South Pier	500	12
Bunkers	1202	North Pier/South Pier	500	12
Ballast		North Pier/South Pier	1,600	16

BALLAST: Brazilian laws are very strict in regard to the pollution of harbour and coastal waters. Vessels should not discharge dirty ballast, ashes, refuse, etc., into the water. Heavy fines are imposed for violations. All overboard discharge valves from cargo tanks and bilges are to be secured before any loading or discharging commences. All deck scuppers should be plugged to avoid harbour contamination should an oil spill occur. To offenders, fines will be charged (besides resulting delays) according to the ship's tonnage. Facilities for receiving dirty ballast are available. However, amount is dependent on space in shore tanks at the time. Capacity of tanks 12,000 cu.m. (75,000 bbls).

The Terminal is particularly interested in having vessels complete the deballasting operation promptly in order to minimise time at berth. Simultaneous discharging/loading and deballasting/ballasting is encouraged on properly equipped vessels.

FRESH WATER: Fresh water can be supplied if necessary; however, supplies are limited to essential requirements (up to 400 tons). Rates: Minimum 90 t.p.h. Maximum 148 t.p.h.

FUEL: The Terminal is equipped with blending valves and is able to deliver bunker "C", fuel oil, marine gas oil, marine diesel oil and intermediates of any grade.

The supply rates are about 300 t.p.h. for bunker "C", 180 t.p.h. for M.G.O. and 450 t.p.h. for intermediates.

Orders for bunkers should be placed, with a minimum of 48 hours notice to:

Divisao de Abastercimento a Navios – Departamento Comercial, Av. Republica do Chile 65, 19.° andar, Rio de Janeiro – Brazil. Telegraphic Address: Petrobrasecope. Telex: 031422 and 031423.

Lubricating Oils: Orders for marine lubricants should be placed at least 15 days in advance and subject to confirmation to: Petrobras Distributidora, Praca 22 de Abril, 36, 4.° andar, Rio de Janeiro – Brazil. Telegraphic address: Petroedipe Telex: 031422, 031423 and 031424. Tel: 242-9381 and 242-4901.

Simultaneous Bunkering and Discharging Operations: Considering that the loading/discharging hoses cannot be crossed with bunkering hoses, the simultaneous bunkering and discharging operations will depend on the position of the ship's bunkering manifold. If the ship has 2 bunkering manifolds – 1 on each side of cargo manifold – the bunkering and the discharging may be effected at the same time. However, if a tanker has only 1 bunkering manifold at each board (located to the aft part in relation to cargo manifolds), this simultaneous operation will only be possible if the ship, is berthed port side at position 3 or starboard side at positions 1, 2 and 4. Alternatively, upon completion of loading/discharging the ship will have to be shifted a few metres forward to receive bunkers.

CONSULS: No consular representatives are reported to exist in the area.

REPAIRS: Some repairs of minor nature can be effected in Sao Sebastiao. When alongside pier, vessels must maintain engines and propulsion machinery in readiness to leave the berth under full power on short notice. No repairs are permitted which would interfere with this requirement. The ship repairing firms usually have branch offices in Sao Sebastiao which are able to undertake many kinds of small repairs. If necessary they can avail themselves of personnel of Santos or Rio de Janeiro branches.

SURVEYORS: *Petroleum Inspectors:* None available in Sao Sebastiao. If required, arrangements should be made well in advance. A representative of Chas. Martin and Co. is based in Rio de Janeiro and E. W. Saybolt & Co. in Santos.

Classification Societies: Located in Rio de Janeiro.

GANGWAY/DECK WATCHMEN: Compulsory.

CUSTOMS ALLOWANCES: For each Crew member, 2 packets of cigarettes and 1 bottle of wine or spirits. While the vessel is in port, Brazilian Custom's Officials are assigned on board to ensure compliance with Customs Regulations. Meals must be supplied to these Officials during regular meal hours. Brazilian laws are strict in regard to smuggling and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, alcoholic drinks, souvenirs, etc., should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port. By no means will any commercial transactions be tolerated, be it either among terminal employees, crew members or anyone else. Cigarettes or other stores in bond can be obtainable in Sao Sebastiao.

REPATRIATION: Possible, but involves lengthy car ride to Sao Paulo or Rio de Janeiro.

AIRPORT: At Sao Jose dos Campos and Sao Paulo.

TIME: Local time is GMT minus 3 hours.

HOLIDAYS: 20th January (Sao Sebastiao Day).

National Holidays: By order of the local Port Authorities it is requested that all ships in port must be fully dressed on the following National Holidays: 7th September and 15th November.

POLICE/AMBULANCE/FIRE: Police Tel: 521-400. Fire (Petrobras) Tel: 522-711 or VHF Channel 16 to Tebar.

TELEPHONES: No service at the Commercial Quay. At Tanker Terminal there are telephones in the control room.

SHORE LEAVE: The access pier is 1,600 m. long. The crew can use it to get ashore, but special passes are required for this purpose. There is, however, a launch service provided by Agent.

GARBAGE DISPOSAL: Collection service is available; drums and plastic bags should be provided by vessel. Garbage services are contracted by Petrobras. Charge not relevant. Collections possible all days, must be required through ship's agent.

WASTE OIL DISPOSAL: Petrobras Terminal receives waste oil from slop tanks of ships. Shore tank capacity 11,000 cu.m. Barges and tanker trucks not available in Sao Sebastiao, but in special circumstances can be arranged through ship's agent.

SEAMAN'S CLUBS: No seaman's clubs in the port.

Shops, international telephone, church services, football matches, dances and other facilities are available in the city.

CURRENCY: Local currency is the Cruzeiro (CR$). No currency restrictions placed upon seafarers.

REGULATIONS: *General Safety Rules:*

(1) Anchorage in the basin is prohibited.

(2) Vessels going to anchorage in the proper area can stay there only for 15 days. Exceptional cases are to be analysed by Delegacia da Capitania dos Portos.

(3) Merchant ships not bound for the Terminal or commercial port of Sao Sebastiao are forbidden to sail in the channel.

(4) The simultaneous sailing of two or more merchant ships in the channel is prohibited.

(5) Vessels moving in the channel are not allowed to cross the bow of anchored vessels closer than 500 yards.

(6) The access to the maritime port area by night is forbidden, except in crucial situations. In these cases, both Master and Pilot must send written notification to Delegacia da Capitania dos Portos, 24 hours in advance of moving, informing reason for the emergency.

(7) Any manoeuvring by unloaded ships without the ballast conditions specified in the design is forbidden.

(8) Any manoeuvre is liable to interruption, including loading and unloading operations, if the mooring ropes, valves, pipe system and equipment are said to be defective. In that case, the occurrence must be reported to Delegacia da Capitania dos Portos.

(9) No berthing manoeuvre to moor any vessel at Terminal will be allowed if the canal current equals or exceeds 3 knots, or in case of stormy weather.

GENERAL:

Charts: Diretoria de Hidrografia e Navegacao (Brazilian Hydrographic Office) has published Charts No. 081, 1600, 1614, 1643 and 1644, recommended for approaching the Terminal.

Also fully up-to-dated U.S.H.O. and British charts for the area may be used.

Brazilian Flag and Others: In accordance with international practice, quarantine signals must be displayed by vessels when approaching Brazilian ports. These signals shall be displayed continuously until Free Pratique is granted and are: sunrise to sunset – quarantine flag "Quebec"; sunset to sunrise-signal lights red over white.

Tankers will display the red flag "Bravo" during the day and a red light during the night throughout their stay in port indicating inflammable or explosive cargo.

In addition to quarantine signals which are to be shown until Free Pratique is granted, the Brazilian Flag must be flown from foreign vessel's foremast throughout the vessel's stay in port.

Vessels must provide themselves with this flag before arrival but if circumstances render this impossible, the flag may be supplied by ship's Agent.

The Brazilian Flag must be of proper size, according to the d.w.t. of the vessel.

While approaching or leaving harbour, vessel's call sign flags must also be flown.

Watches: An efficient watch must be maintained on board the ship, deck and engine room and a sufficient number of crew members should always remain on board to cope with emergency or port operation situations.

Ratguards: Ratguards must be placed on all mooring lines.

Visit of Authorities: In case the ship enters and berths directly, the official visit of Authorities together with the Agents will take place as soon as she is tied up and the gangway is lowered. However, if the ship is not berthed immediately upon arrival (e.g. in view of the pier being occupied, or any other reason), the visiting party will proceed to the ship by motorboat as soon as she drops anchor. If the ship arrives after 2100 hrs. it is possible that Authorities will decide to visit the ship next morning at 0800 hrs.; however, the ship is authorised to operate normally and crew members are allowed to go ashore.

Seamen Left Ashore: Ships are not permitted to sail until all crew members are on board. Should, however, a crew member definitely not be found, his passport (or seaman card) and his international vaccination certificates must be given to the Agents, together with a letter requesting him to be repatriated.

Weather and Tide Conditions: The weather at Sao Sebastiao is generally very favourable; however, strong winds and currents are frequent mostly during winter. 128 km.p.h. wind was registered in 1982. Swell is not observed in the channel. The winds are unpredictable for more than a few hours in advance; usually it blows from N.N.W. or S.S.W. As regards rain, the annual precipitation averages 2,000 mm. The visibility is mostly fair, although in Autumn and Winter it may become rather poor in the early morning. The temperature ranges from 15°C (59°F) in July to 39°C (104°F) in January. The relative humidity of the air is usually high, often exceeding 85%. The normal range of tides is around 1.2 m. (4 ft.). Although higher ranges of 2 m. (6.5 ft.) have been noticed during Spring. The currents are irregular but usually follow the direction of the wind; according to the intensity and the duration of the wind, the drift may range from 1 to 4 knots.

Safety Precautions in Case Imminent Bad Weather:

(a) Wind speed in excess of 30 knots and/or currents more than 3 knots.
  Permanent inspection of mooring system.
  Pilot, tugboats and longshoremen in readiness.
  1 tug to be alongside ship berthed in PP-1 and another alongside ship berthed PP-3.
  Engine room-ready.
  Steam fed to winches.
  Reduce surface exposed to wind.
  Discontinue unloading and disconnect loading arms.

(b) Wind speed in excess of 50 knots and current of more than 4 knots.
  Do not loosen winch brakes to try to run cables.
  Man manoeuvring station.
  Call Pilot, tugboats and longshoreman. Discontinue loading/unloading operation.
  Increase torque on brakes.
  Pass extra mooring lines.
  Disconnect loading arms.
  Remove gangways.

Derat Certificate: In case the Derat Certificate has expired and needs to be renewed, a radio message should be sent to the Agent a few days before arrival, so that they are able to make the necessary arrangements with the Sao Sebastiao Port Health Inspector.

Renewal of Vaccination Certificates: For the same reason mentioned above, the Master should send, beforehand, a radio message stating how many vaccinations of each kind will be required. The vaccinator has to come from Santos.

Passengers: Passengers will be permitted to disembark if in possession of the required visa and documents for identification.

Visitors: Only the personnel duly authorised by Port Authorities may come on board the ships; this excludes all visitors. Relatives of crew members may obtain from Port Authorities a licence to go on board.

Constant Readiness: During the time the ship is berthed alongside, her engine and propulsion machinery should be in readiness to leave the berth on short notice. No repairs are permitted which would interfere with this requirement.

Smoking: Smoking in open areas of the ship and on the pier, is strictly forbidden. The crew are not to throw lighted cigar or cigarette ends overboard.

Photography: The taking of photographs within the terminal is prohibited.

Emergency Towing Wires: 2 towing wire ropes should be always hanging to the water's surface so that the tugs can easily make fast should an emergency arise.

Gangways: All ships calling at Sao Sebastiao must provide a safe gangway. Authorities may refuse to board the ship if a safe gangway or accommodation ladder is not provided. At night, the pilot ladder must be adequately lit. The terminal is not equipped with platform ladder. The ship's ladder must be used.

Lifebuoy: A lifebuoy with 15 fathoms (27 m.) of rope should be kept nearby the gangway for use in case of emergency.

Ship's Fire-fighting Equipment: At least 2 fire hoses should be connected to hydrants on main deck: 1 forward and the other abaft the cargo valves manifolds. A third hose with an NPU nozzle and 2 mechanical foam containers should be kept nearby the pump-room. The ship's main fire-extinguishing system should be kept under constant pressure.

Minimum Draft for Safe Manoeuvring: Although the amount of ballast carried on vessels is at the Master's discretion, the table below is recommended as a guide:

Vessels of 30 – 40,000 d.w.t. draft for'd 16 ft. aft 20 ft.
Vessels of 40 – 50,000 d.w.t. draft for'd 18 ft. aft 24 ft.
Vessels of 50 – 70,000 d.w.t. draft for'd 20 ft. aft 28 ft.
Vessels of 70 – 100,000 d.w.t. draft for'd 24 ft. aft 32 ft.

Vessels over 100,000 tons should be ballasted to approximately one third of the vessel's deadweight.

Bond Wire: Before the connection of shore hoses, the bonding wire will be connected, by a terminal employee, to ensure a good grounding electric contact.

Boiler Tubes and Sparks: Whilst alongside the pier, no boiler soot blowers may be used. The use of derricks is also forbidden (excepting the poop derrick, when lifting stores, provisions, etc.). Likewise, the use of objects and/or tools which may cause sparks is also forbidden.

Fire Signal: Should fire break out in any part of the ship, the fire alarm should be given: a continuous sounding of 7 short blasts on the whistle, followed by a long one.

Transportation of Stores, etc., from Shore to Ship: The terminal does not permit the carriage of items through the jetty. Consequently, the ship has to use the services of a motorboat, or a tugboat or of a floating craft (which is towed to the ship's side). The motorboat or the tugboat may only approach the ship by the sea side. No derricks may be used, although the terminal has no objection to the use of the poop derrick or crane (sea side). Depending on the nature and the weight of items involved, they may be taken on board using the gangway (sea side).

Provisions and Stores: Provisions and stores are supplied by shipchandlers contracted directly by Owners or Masters or through the Agents. Usually they have to be brought from Santos, which requires a radio advance request, in view of the distance involved. It is hoped that in the near future provisions and stores in large quantities may be easily obtainable in Sao Sebastiao. Some items may be obtained in Caraguatatuba.

Radio Equipment: When the tanker is berthed, its main transmitting aerials should be earthed.

Laundry Facilities: Available at Sao Sebastiao.

Communications: Telex and telephone available at the Agencies and at the terminal.

Rubbish: Garbage bins are available at the Commercial Quay for berthed tankers and anchored vessels, garbage bins are available through boat acquired by Agent. Dry garbage facilities available for anchored and berthed vessels using boat acquired through Agent.

Oil Pollution: The terminal is equipped with a system for oil pollution fighting in the sea.

Compensation for oil pollution damage caused by tankers and cost of fighting pollution performed by terminal are owner's liability.

SHIPMASTER'S REPORT:

Pilotage: Vessels normally sail and arrive by the Southern Entrance.

Anchorages: The holding ground for VLCCs is not very good, but appears good for smaller vessels. (We had 3 cases of ships dragging during our two and a half weeks stay, all VLCCs.) The current runs Northerly or Southerly depending on the wind.

Tugs: 5 tugs normally used for berthing and unberthing irrespective of vessel's size.

Medical: Dental and routine medical matters available. Specialists are available some miles away. For inoculations the doctor comes from Santos.

Fresh Water: Rates are dependent on number of vessels watering and can be as low as 10 t.p.h.

Customs Allowance: 2 cartons cigarettes per man. Customs no longer stay on board the vessel.

Repatriation: Is possible, but involves lengthy car ride to Santos or Rio de Janeiro. The best and nearest airport is outside Sao Paulo, where international flights are available. This is quicker than going to Rio.

Telephone: Available in jetty control rooms.

Shore Leave: When berthed the Agent can arrange a minibus service from the T-head of the jetty.

Port Regulations: Vessels throwing or discharging anything into Brazilian waters are subject to a fine equalling 2% of the minimum Brazilian basic wage multiplied by the vessel's gross tonnage. Garbage disposal is difficult to arrange and they will only accept dry garbage.

General: Communications are poor, no telex and messages have to be telephoned to Santos. Best method is to use ship's equipment when at anchor.

AUTHORITY: Petroleo Brasileiro S.A. – PETROBRAS.

Head Office: Av. Republica do Chile, 65, 23°, Andar, ZC-06, Caixa Postal 809, 20000 Rio De Janeiro – RJ, Brazil. *Tel:* 221-5577. *Telex:* 31.422.

Transportation Department: Av. Republica do Chile, 65, 12°, Andar, 20035 Rio De Janeiro – RJ. *Tel:* 221-5577 – Ramal 2401

Terminal Maritimo Almirante Barroso: Av. Guarda-Mor Lobo Vianna 1111, C.P. 187, Sao Sebastiao, Sao Paulo, CEP 11.600, Brazil. *Tel:* (0124) 522.711. *Telex:* 124756. *Cables:* Tebar – Petrobras. *FAX:* (0124) 522279. *Contact:* Jose Daniel Brossi, General Manager. AGENT: See "Santos".

SEPETIBA BAY, (Guaiba Island and Ilha Madeira): 22.56 S. 43.50 W. (See Plan)

See "General" before first port.

LOCATION: About 50 miles West of Rio de Janeiro, is the site of a bulk iron ore terminal located off the S.E. end of Ilha Guaiba about 7 miles due North of the bay entrance.

APPROACHES: *Access Channel:* The distance from the entrance at the bar to the port is 22 km. The Access Channel is dredged to 22.5 m. as far as the Manoeuvring Basin in front of the quay, where the depth is 12.2 m.

PILOTAGE: Compulsory for all ships entering the bay and berthing and unberthing at the ore facility. Pilots board in the vicinity of Lat. 23° 08′ 39″ S., Long. 44° 04′ 36″ W. A pilot ladder, boat rope, and gangway must be properly rigged with the landing platform of the gangway lowered to within 5 m. (16.5 ft.) of the water. Adequate lighting should be provided at night.

ARRIVAL INFORMATION: Vessels bound for Baia de Sepetiba should send an ETA to their Rio Agents, via Rio Radio, six days, 48 hours, and 24 hours prior to arrival. Any significant change in this ETA should be corrected as soon as possible but not less than 8 hours prior to arrival. Also see "VHF".

ANCHORAGE: In the vicinity of the Pilot boarding area. Ships should not proceed beyond this point unless a Pilot is aboard and instructions have been received from Sepetiba Marine Operations to proceed.

MAX. SIZE: *Ore:* Max. draft 21.98 m. Max. air draft 21.6 m. Max. beam 54 m.

HEALTH: Radio Pratique should be requested 72 hours prior to arrival by transmitting a quarantine message to the Port Health Authorities through the the ship's Agent. This message should contain the following information: name and nationality of vessel; last port of call; number of crew and passengers; general conditions of health on board. Also see "General" before first port.

VHF: Vessels are requested to contact Sepetiba Marine Operations directly when within VHF radio-telephone range. Channel 16 is the calling channel and 11, 12 and 13 are the working channels. Anchoring or berthing instructions should be requested 4 hours prior to arrival or when within VHF radio-telephone range.

TUGS: Tug assistance is compulsory for all manoeuvring in the vicinity of the pier and 3 powerful twin screw tugs (4,000 h.p.) are available for this purpose. All ships should be equipped with a wire cable tow line with a nylon pendant. Radio-telephone communication is maintained between the tugs and the Pilots on Channel 6.

BERTHING: Ore: Guaiba Island facilities consist of a deep-water pier located about 400 m. (1,312 ft.) South of the island. The South Berth has a depth of 24 m. (78.75 ft.) alongside and the North Berth has a depth of 19 m. (62 ft.). A mooring dolphin at the West end of the pier provides an overall mooring length of 470 m. (1,541 ft.) alongside the South Berth. Bollards are spaced along both pier faces and quick release hooks and capstans are fitted for breast, bow and stern lines.

Also see "Shipmaster's Report" – dated May 1980.

Coal: Madeira Island – Terminal completed and fully operational.

Operator: Companhia Docas do Rio de Janeiro.

Berth: All bulk cargoes are handled at the single pier, length 540 m., width 39.25 m. This pier permits the berthing of the following vessel arrangement options:

(1) 1×90,000 d.w.t. on the North side and 1×65,000 d.w.t. on the South side.

(2) 2×45,000 d.w.t. at North side and 2×65,000 d.w.t. on the South side.

Depth of water is 15.0 m. on South side and 12.0 m. on North side.

Cranes: 2×1,500 tonnes/hr. and 2×800 tonnes/hr. grab unloaders for coal and 1×300 tonnes/hr. sucker for alumina.

Conveyor Belt: 2×4,500 tonnes/hr. for coal and 1×300 tonnes/hr. for alumina.

Piling Equipment: 2 stackers × 4,500 tonnes/hr. each, 2 reclaimers × 3,000 tonnes/hr. each, 1 train loading silo × 2,000 tonnes/hr.

Centralised Control: Equipment is controlled by an automated main Control Centre which supervises operations.

Storage and Warehousing: 360,000 tonnes of material can be stored on a 2.5 million sq.m. storage yard.

Rear Stacking Area: Reserved for cargo (coal, ore, solid and liquid bulks) – 5,050,000 sq.m. Reserved for the administration, maintenance and services – 800,000 sq.m. Reserved for small industries associated with the port activities – 1,200,000 sq.m.

General: Sepetiba operational system enables coal handling capacity in the order of 5.4 million tonnes/year and 160,000 tonnes/year for alumina. Sepetiba is also prepared to handle coke, scrap iron, zinc as well as other solids.

Also see "Report" – dated August 1984.

BULK HANDLING FACILITIES: Ore: One travelling shiploader serves both berths and has a boom clearance of 22 m. (72 ft.) at shipside and max. outreach of 29.9 m. from fender line. Travel of loader 250 m. Ore is stacked in a storage area and is delivered to the shiploader by conveyor belt which is loaded by either of 2 stackers having an average capacity of about 7,000 tonnes per hour each.

Coal: See "Berthing" and "Reports".

MEDICAL: Nearest hospital at Itaguai.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Supply is planned.

AIRPORT: Santa Cruz.

TIME: GMT minus 3 hours.

HOLIDAYS: No port work on 1st May and 2nd November.

TELEPHONES: Connection possible on request.

GENERAL: *Charts:* Brazilian: 1601, 1602, 1603, 1608, 1610 and 1623. British: 1683 and 3970. American: H.O. 24155, 24160 and 24164.

SHIPMASTER'S REPORT: Ore Berth: May 1980.

Agents:

(a) Mineracoes Brasileiras Reunidas, (the operators and loaders). Av. Graca Aranha, 26, 17th Floor, Rio de Janeiro. Tel: 222-5171. Cables: "Brasilore".

(b) Buarque & Cia, (ship's Agent appointed by the Solmer contract), Rua de Rosario, 113, P.O. Box 1542, Rio de Janeiro. Telex: 2121300 BUCL. Cable: "Joarce". Tel: 221-2210, 221-9961.

Arrival Telegrams: According to the charter party, telegraph "Brasilore" and "Joarce" when leaving the previous port of call, and repeat 72 hours and 24 hours prior to arrival. During the last 24 hours, a change of one hour or more in ETA must be reported.

Radio clearance is requested through the intermediary of BUARQUE to whom it is necessary to quote in the 72 hours telegram the following: last port of call, number of crew members, passengers, state of health, date of Derat Certificate, name of Master.

BUARQUE replies to the first ETA telegram indicating the possibilities of direct entry or waiting. As MBR remains silent, it is advisable to ask BUARQUE to confirm the tonnage to be loaded and the quantity, more or less, of each type of ore involved. Olinda/PPO (Recife) and Rio/PPR stations are normally used. Good easy connections and no delay. Olinda is particularly well placed for communications with vessels approaching from the North.

If the crew members have no Brazilian pass (even if made out in another port) ask for a photographer.

General Information:

The Port of Sepetiba, opened to ore traffic in 1974, belongs to Mineracoes Brasileiras Reunidas (MBR). It is the maritime outlet for a group of mines located some 1,200 km. inland.

Situation: The terminal is located at the S.E. end of the island of Guaiba, in the East part of the Bay of Ilha Grande (Large Island), some 50 miles to the West of Rio de Janeiro.

The island is connected to the mainland by a railway bridge which brings the ore for shipment.

The terminal administrative office is on Sai beach, 5 miles to the N.E. (and 120 km. from Rio by road).

Local Time: GMT minus 3 hours.

Pollution: Deballasting at sea only. The Authorities make pressing recommendations to avoid pollution, warning that fines are heavy and not alterable.

Monetary Exchange: Only at the Agency can cruzeiros be obtained, but dollars are much sought after on land, even by small traders. Advantageous exchange rate.

Navigation:

Charts: Brazilian – 1601, 1602, 1603, 1608, 1610.
British – 3970, 1683, 3970
American – HO 24155, 24164, 24160.

Landfall: No difficulties, using the mountains which are around the entrance: Ilha Grande to the West (1,037 m.) and Ilha de Marambaia to the East (620 m.).

Access: The approach channel, is in two straight parts, and is 7.6 miles long. Buoys are not very visible either by day or by night, but perfectly detectable on radar.

The width of the channel varies from 280 m. up to Buoy No. 7; 580 m. at Buoy No. 9 (bend); 330 m. up to Buoy No. 13; and then widens out into a manoeuvring basin 1.8 miles long and 0.5 miles wide.

Draft: The channel has been dredged to 22.5 m., and the manoeuvring basin to 24.5 m. Vessels drawing 21.5 m. have used it on sailing. The Pilots recommend drafts forward of 30 ft. and aft of 36 ft. for the entry for a vessel of the tonnage 122,000 d.w.t.

Currents: Along the coast, coming from the East, weak and counterclockwise. Inside, tidal currents may reach 1.5 knots.

Tides: Twice a day but not equal every day. Tidal rise about 1 m.

Times of entry and sailing: Night and day.

Maximum vessel dimensions: Within the limit of the practicable draft of 21.5 m. No length restriction.

Pilotage: Compulsory. The Pilot boards between 1 and 2 miles from the channel entrance. On sailing, he leaves the vessel between Buoy No. 8 and No. 6.

The pilot vessel has a white hull, a red roof and shows an alternating red light by night. Max. speed 9 knots.

Call up on VHF Channel 16, work on Channel 13.

For embarkation, lower the accommodation ladder to 5 m. above the water, and the pilot ladder to 1 m. above the water. On leaving the vessel, he only uses the pilot's ladder (if the vessel is fully loaded).

Anchoring: When awaiting the Pilot, vessels can anchor in 24 m. of water, 2 miles to the South or S.S.W. of the channel entrance (unmarked wreck, at a depth of 19 m. 1.5 miles to the S.E. of the entrance).

Whilst waiting to berth, the Pilot anchors the vessel, either to the North of the second part of the channel between Guaiba Island and Mangaratiba Lagoon, in 15 m. to 18 m. of water. (Four vessels of 150,000 tons would be able to lie there with ease). Or, to the East of Guaiba Island, outside the manoeuvring basin, in 25 m. to 30 m. of water.

Holding is good in all these anchorages, but vessel exposed to the swell.

Tugs: Three tugs of 4,000 h.p. available (MBR 1, 2 and 3).

The tugs are taken at the entrance near Buoy No. 11. They are released on sailing, before Buoy No. 13.

On entry and sailing, 1 tug forward and 1 astern, each taking 2 lines from the vessel. The third comes alongside amidships and passes 2 lines to the vessel. Communication with the Pilot is by walkie-talkie.

Berths: The pier is 400 m. long and orientated 238°/058°. It is connected to the Island by a bridge approximately 300 m. long carrying the conveyor belt. Vessels can come alongside on the inside (N.N.W.) but for large ships only the outside (S.S.E.) is used.

Berthing: Inside – starboard to quay

Outside – starboard to quay after manoeuvring, or portside to the quay (according to the current).

or any other reason), the visiting party will proceed to the ship by motorboat as soon as she drops anchor. If the ship arrives after 2100 hrs. it is possible that Authorities will decide to visit the ship next morning at 0800 hrs.; however, the ship is authorised to operate normally and crew members are allowed to go ashore.

Seamen Left Ashore: Ships are not permitted to sail until all crew members are on board. Should, however, a crew member definitely not be found, his passport (or seaman card) and his international vaccination certificates must be given to the Agents, together with a letter requesting him to be repatriated.

Weather and Tide Conditions: The weather at Sao Sebastiao is generally very favourable; however, strong winds and currents are frequent mostly during winter. 128 km.p.h. wind was registered in 1982. Swell is not observed in the channel. The winds are unpredictable for more than a few hours in advance; usually it blows from N.N.W. or S.S.W. As regards rain, the annual precipitation averages 2,000 mm. The visibility is mostly fair, although in Autumn and Winter it may become rather poor in the early morning. The temperature ranges from 15°C (59°F) in July to 39°C (104°F) in January. The relative humidity of the air is usually high, often exceeding 85%. The normal range of tides is around 1.2 m. (4 ft.). Although higher ranges of 2 m. (6.5 ft.) have been noticed during Spring. The currents are irregular but usually follow the direction of the wind; according to the intensity and the duration of the wind, the drift may range from 1 to 4 knots.

Safety Precautions in Case Imminent Bad Weather:

(a) Wind speed in excess of 30 knots and/or currents more than 3 knots.
   Permanent inspection of mooring system.
   Pilot, tugboats and longshoremen in readiness.
   1 tug to be alongside ship berthed in PP-1 and another alongside ship berthed PP-3.
   Engine room-ready.
   Steam fed to winches.
   Reduce surface exposed to wind.
   Discontinue unloading and disconnect loading arms.

(b) Wind speed in excess of 50 knots and current of more than 4 knots.
   Do not loosen winch brakes to try to run cables.
   Man manoeuvring station.
   Call Pilot, tugboats and longshoreman. Discontinue loading/unloading operation.
   Increase torque on brakes.
   Pass extra mooring lines.
   Disconnect loading arms.
   Remove gangways.

Derat Certificate: In case the Derat Certificate has expired and needs to be renewed, a radio message should be sent to the Agent a few days before arrival, so that they are able to make the necessary arrangements with the Sao Sebastiao Port Health Inspector.

Renewal of Vaccination Certificates: For the same reason mentioned above, the Master should send, beforehand, a radio message stating how many vaccinations of each kind will be required. The vaccinator has to come from Santos.

Passengers: Passengers will be permitted to disembark if in possession of the required visa and documents for identification.

Visitors: Only the personnel duly authorised by Port Authorities may come on board the ships; this excludes all visitors. Relatives of crew members may obtain from Port Authorities a licence to go on board.

Constant Readiness: During the time the ship is berthed alongside, her engine and propulsion machinery should be in readiness to leave the berth on short notice. No repairs are permitted which would interfere with this requirement.

Smoking: Smoking in open areas of the ship and on the pier, is strictly forbidden. The crew are not to throw lighted cigar or cigarette ends overboard.

Photography: The taking of photographs within the terminal is prohibited.

Emergency Towing Wires: 2 towing wire ropes should be always hanging to the water's surface so that the tugs can easily make fast should an emergency arise.

Gangways: All ships calling at Sao Sebastiao must provide a safe gangway. Authorities may refuse to board the ship if a safe gangway or accommodation ladder is not provided. At night, the pilot ladder must be adequately lit. The terminal is not equipped with platform ladder. The ship's ladder must be used.

Lifebuoy: A lifebuoy with 15 fathoms (27 m.) of rope should be kept nearby the gangway for use in case of emergency.

Ship's Fire-fighting Equipment: At least 2 fire hoses should be connected to hydrants on main deck: 1 forward and the other abaft the cargo valves manifolds. A third hose with an NPU nozzle and 2 mechanical foam containers should be kept nearby the pump-room. The ship's main fire-extinguishing system should be kept under constant pressure.

Minimum Draft for Safe Manoeuvring: Although the amount of ballast carried on vessels is at the Master's discretion, the table below is recommended as a guide:

Vessels of 30 – 40,000 d.w.t.	draft for'd 16 ft.	aft 20 ft.
Vessels of 40 – 50,000 d.w.t.	draft for'd 18 ft.	aft 24 ft.
Vessels of 50 – 70,000 d.w.t.	draft for'd 20 ft.	aft 28 ft.
Vessels of 70 – 100,000 d.w.t.	draft for'd 24 ft.	aft 32 ft.

Vessels over 100,000 tons should be ballasted to approximately one third of the vessel's deadweight.

Bond Wire: Before the connection of shore hoses, the bonding wire will be connected, by a terminal employee, to ensure a good grounding electric contact.

Boiler Tubes and Sparks: Whilst alongside the pier, no boiler soot blowers may be used. The use of derricks is also forbidden (excepting the poop derrick, when lifting stores, provisions, etc.). Likewise, the use of objects and/or tools which may cause sparks is also forbidden.

Fire Signal: Should fire break out in any part of the ship, the fire alarm should be given: a continuous sounding of 7 short blasts on the whistle, followed by a long one.

Transportation of Stores, etc., from Shore to Ship: The terminal does not permit the carriage of items through the jetty. Consequently, the ship has to use the services of a motorboat, or a tugboat or of a floating craft (which is towed to the ship's side). The motorboat or the tugboat may only approach the ship by the sea side. No derricks may be used, although the terminal has no objection to the use of the poop derrick or crane (sea side). Depending on the nature and the weight of items involved, they may be taken on board using the gangway (sea side).

Provisions and Stores: Provisions and stores are supplied by shipchandlers contracted directly by Owners or Masters or through the Agents. Usually they have to be brought from Santos, which requires a radio advance request, in view of the distance involved. It is hoped that in the near future provisions and stores in large quantities may be easily obtainable in Sao Sebastiao. Some items may be obtained in Caraguatatuba.

Radio Equipment: When the tanker is berthed, its main transmitting aerials should be earthed.

Laundry Facilities: Available at Sao Sebastiao.

Communications: Telex and telephone available at the Agencies and at the terminal.

Rubbish: Garbage bins are available at the Commercial Quay for berthed tankers and anchored vessels, garbage bins are available through boat acquired by Agent. Dry garbage facilities available for anchored and berthed vessels using boat acquired through Agent.

Oil Pollution: The terminal is equipped with a system for oil pollution fighting in the sea.

Compensation for oil pollution damage caused by tankers and cost of fighting pollution performed by terminal are owner's liability.

SHIPMASTER'S REPORT:

Pilotage: Vessels normally sail and arrive by the Southern Entrance.

Anchorages: The holding ground for VLCCs is not very good, but appears good for smaller vessels. (We had 3 cases of ships dragging during our two and a half weeks stay, all VLCCs.) The current runs Northerly or Southerly depending on the wind.

Tugs: 5 tugs normally used for berthing and unberthing irrespective of vessel's size.

Medical: Dental and routine medical matters available. Specialists are available some miles away. For inoculations the doctor comes from Santos.

Fresh Water: Rates are dependent on number of vessels watering and can be as low as 10 t.p.h.

Customs Allowance: 2 cartons cigarettes per man. Customs no longer stay on board the vessel.

Repatriation: Is possible, but involves lengthy car ride to Santos or Rio de Janeiro. The best and nearest airport is outside Sao Paulo, where international flights are available. This is quicker than going to Rio.

Telephone: Available in jetty control rooms.

Shore Leave: When berthed the Agent can arrange a minibus service from the T-head of the jetty.

Port Regulations: Vessels throwing or discharging anything into Brazilian waters are subject to a fine equalling 2% of the minimum Brazilian basic wage multiplied by the vessel's gross tonnage. Garbage disposal is difficult to arrange and they will only accept dry garbage.

General: Communications are poor, no telex and messages have to be telephoned to Santos. Best method is to use ship's equipment when at anchor.

AUTHORITY: Petroleo Brasileiro S.A. – PETROBRAS.

Head Office: Av. Republica do Chile, 65, 23°, Andar, ZC-06, Caixa Postal 809, 20000 Rio De Janeiro – RJ, Brazil. *Tel:* 221-5577. *Telex:* 31.422.

AGENT: See "Santos".

SEPETIBA BAY, (Guaiba Island and Ilha Madeira): 22.56 S. 43.50 W. (See Plan)

See "General" before first port.

LOCATION: About 50 miles West of Rio de Janeiro, is the site of a bulk iron ore terminal located off the S.E. end of Ilha Guaiba about 7 miles due North of the bay entrance.

APPROACHES: *Access Channel:* The distance from the entrance at the bar to the port is 22 km. The Access Channel is dredged to 22.5 m. as far as the Manoeuvring Basin in front of the quay, where the depth is 12.2 m.

PILOTAGE: Compulsory for all ships entering the bay and berthing and unberthing at the ore facility. Pilots board in the vicinity of Lat. 23° 08′ 39″ S., Long. 44° 04′ 36″ W. A pilot ladder, boat rope, and gangway must be properly rigged with the landing platform of the gangway lowered to within 5 m. (16.5 ft.) of the water. Adequate lighting should be provided at night.

ARRIVAL INFORMATION: Vessels bound for Baia de Sepetiba should send an ETA to their Rio Agents, via Rio Radio, six days, 48 hours, and 24 hours prior to arrival. Any significant change in this ETA should be corrected as soon as possible but not less than 8 hours prior to arrival. Also see "VHF".

ANCHORAGE: In the vicinity of the Pilot boarding area. Ships should not proceed beyond this point unless a Pilot is aboard and instructions have been received from Sepetiba Marine Operations to proceed.

MAX. SIZE: *Ore:* Max. draft 21.98 m. Max. air draft 21.6 m. Max. beam 54 m.

HEALTH: Radio Pratique should be requested 72 hours prior to arrival by transmitting a quarantine message to the Port Health Authorities through the the ship's Agent. This message should contain the following information: name and nationality of vessel; last port of call; number of crew and passengers; general conditions of health on board. Also see "General" before first port.

VHF: Vessels are requested to contact Sepetiba Marine Operations directly when within VHF radio-telephone range. Channel 16 is the calling channel and 11, 12 and 13 are the working channels. Anchoring or berthing instructions should be requested 4 hours prior to arrival or when within VHF radio-telephone range.

TUGS: Tug assistance is compulsory for all manoeuvring in the vicinity of the pier and 3 powerful twin screw tugs (4,000 h.p.) are available for this purpose. All ships should be equipped with a wire cable tow line with a nylon pendant. Radio-telephone communication is maintained between the tugs and the Pilots on Channel 6.

BERTHING: Ore: Guaiba Island facilities consist of a deep-water pier located about 400 m. (1,312 ft.) South of the island. The South Berth has a depth of 24 m. (78.75 ft.) alongside and the North Berth has a depth of 19 m. (62 ft.). A mooring dolphin at the West end of the pier provides an overall mooring length of 470 m. (1,541 ft.) alongside the South Berth. Bollards are spaced along both pier faces and quick release hooks and capstans are fitted for breast, bow and stern lines.

Also see "Shipmaster's Report" – dated May 1980.

Coal: Madeira Island – Terminal completed and fully operational.

Operator: Companhia Docas do Rio de Janeiro.

Berth: All bulk cargoes are handled at the single pier, length 540 m., width 39.25 m. This pier permits the berthing of the following vessel arrangement options:

(1) 1×90,000 d.w.t. on the North side and 1×65,000 d.w.t. on the South side.

(2) 2×45,000 d.w.t. at North side and 2×65,000 d.w.t. on the South side.

Depth of water is 15.0 m. on South side and 12.0 m. on North side.

Cranes: 2×1,500 tonnes/hr. and 2×800 tonnes/hr. grab unloaders for coal and 1×300 tonnes/hr. sucker for alumina.

Conveyor Belt: 2×4,500 tonnes/hr. for coal and 1×300 tonnes/hr. for alumina.

Piling Equipment: 2 stackers × 4,500 tonnes/hr. each, 2 reclaimers × 3,000 tonnes/hr. each, 1 train loading silo × 2,000 tonnes/hr.

Centralised Control: Equipment is controlled by an automated main Control Centre which supervises operations.

Storage and Warehousing: 360,000 tonnes of material can be stored on a 2.5 million sq.m. storage yard.

Rear Stacking Area: Reserved for cargo (coal, ore, solid and liquid bulks) – 5,050,000 sq.m. Reserved for the administration, maintenance and services – 800,000 sq.m. Reserved for small industries associated with the port activities – 1,200,000 sq.m.

General: Sepetiba operational system enables coal handling capacity in the order of 5.4 million tonnes/year and 160,000 tonnes/year for alumina. Sepetiba is also prepared to handle coke, scrap iron, zinc as well as other solids.

Also see "Report" – dated August 1984.

BULK HANDLING FACILITIES: Ore: One travelling shiploader serves both berths and has a boom clearance of 22 m. (72 ft.) at shipside and max. outreach of 29.9 m. from fender line. Travel of loader 250 m. Ore is stacked in a storage area and is delivered to the shiploader by conveyor belt which is loaded by either of 2 stackers having an average capacity of about 7,000 tonnes per hour each.

Coal: See "Berthing" and "Reports".

MEDICAL: Nearest hospital at Itaguai.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Supply is planned.

AIRPORT: Santa Cruz.

TIME: GMT minus 3 hours.

HOLIDAYS: No port work on 1st May and 2nd November.

TELEPHONES: Connection possible on request.

GENERAL: *Charts:* Brazilian: 1601, 1602, 1603, 1608, 1610 and 1623. British: 1683 and 3970. American: H.O. 24155, 24160 and 24164.

SHIPMASTER'S REPORT: Ore Berth: May 1980.

Agents:

(a) Mineracoes Brasileiras Reunidas, (the operators and loaders). Av. Graca Aranha, 26, 17th Floor, Rio de Janeiro. Tel: 222-5171. Cables: "Brasilore".

(b) Buarque & Cia, (ship's Agent appointed by the Solmer contract), Rua de Rosario, 113, P.O. Box 1542, Rio de Janeiro. Telex: 2121300 BUCL. Cable: "Joarce". Tel: 221-2210, 221-9961.

Arrival Telegrams: According to the charter party, telegraph "Brasilore" and "Joarce" when leaving the previous port of call, and repeat 72 hours and 24 hours prior to arrival. During the last 24 hours, a change of one hour or more in ETA must be reported.

Radio clearance is requested through the intermediary of BUARQUE to whom it is necessary to quote in the 72 hours telegram the following: last port of call, number of crew members, passengers, state of health, date of Derat Certificate, name of Master.

BUARQUE replies to the first ETA telegram indicating the possibilities of direct entry or waiting. As MBR remains silent, it is advisable to ask BUARQUE to confirm the tonnage to be loaded and the quantity, more or less, of each type of ore involved. Olinda/PPO (Recife) and Rio/PPR stations are normally used. Good easy connections and no delay. Olinda is particularly well placed for communications with vessels approaching from the North.

If the crew members have no Brazilian pass (even if made out in another port) ask for a photographer.

General Information:

The Port of Sepetiba, opened to ore traffic in 1974, belongs to Mineracoes Brasileiras Reunidas (MBR). It is the maritime outlet for a group of mines located some 1,200 km. inland.

Situation: The terminal is located at the S.E. end of the island of Guaiba, in the East part of the Bay of Ilha Grande (Large Island), some 50 miles to the West of Rio de Janeiro.

The island is connected to the mainland by a railway bridge which brings the ore for shipment.

The terminal administrative office is on Sai beach, 5 miles to the N.E. (and 120 km. from Rio by road).

Local Time: GMT minus 3 hours.

Pollution: Deballasting at sea only. The Authorities make pressing recommendations to avoid pollution, warning that fines are heavy and not alterable.

Monetary Exchange: Only at the Agency can cruzeiros be obtained, but dollars are much sought after on land, even by small traders. Advantageous exchange rate.

Navigation:

Charts: Brazilian – 1601, 1602, 1603, 1608, 1610.
British – 3970, 1683, 3970
American – HO 24155, 24164, 24160.

Landfall: No difficulties, using the mountains which are around the entrance: Ilha Grande to the West (1,037 m.) and Ilha de Marambaia to the East (620 m.).

Access: The approach channel, is in two straight parts, and is 7.6 miles long. Buoys are not very visible either by day or by night, but perfectly detectable on radar.

The width of the channel varies from 280 m. up to Buoy No. 7; 580 m. at Buoy No. 9 (bend); 330 m. up to Buoy No. 13; and then widens out into a manoeuvring basin 1.8 miles long and 0.5 miles wide.

Draft: The channel has been dredged to 22.5 m., and the manoeuvring basin to 24.5 m. Vessels drawing 21.5 m. have used it on sailing. The Pilots recommend drafts forward of 30 ft. and aft of 36 ft. for the entry for a vessel of the tonnage 122,000 d.w.t.

Currents: Along the coast, coming from the East, weak and counterclockwise. Inside, tidal currents may reach 1.5 knots.

Tides: Twice a day but not equal every day. Tidal rise about 1 m.

Times of entry and sailing: Night and day.

Maximum vessel dimensions: Within the limit of the practicable draft of 21.5 m. No length restriction.

Pilotage: Compulsory. The Pilot boards between 1 and 2 miles from the channel entrance. On sailing, he leaves the vessel between Buoy No. 8 and No. 6.

The pilot vessel has a white hull, a red roof and shows an alternating red light by night. Max. speed 9 knots.

Call up on VHF Channel 16, work on Channel 13.

For embarkation, lower the accommodation ladder to 5 m. above the water, and the pilot ladder to 1 m. above the water. On leaving the vessel, he only uses the pilot's ladder (if the vessel is fully loaded).

Anchoring: When awaiting the Pilot, vessels can anchor in 24 m. of water, 2 miles to the South or S.S.W. of the channel entrance (unmarked wreck, at a depth of 19 m. 1.5 miles to the S.E. of the entrance).

Whilst waiting to berth, the Pilot anchors the vessel, either to the North of the second part of the channel between Guaiba Island and Mangaratiba Lagoon, in 15 m. to 18 m. of water. (Four vessels of 150,000 tons would be able to lie there with ease). Or, to the East of Guaiba Island, outside the manoeuvring basin, in 25 m. to 30 m. of water.

Holding is good in all these anchorages, but vessel exposed to the swell.

Tugs: Three tugs of 4,000 h.p. available (MBR 1, 2 and 3).

The tugs are taken at the entrance near Buoy No. 11. They are released on sailing, before Buoy No. 13.

On entry and sailing, 1 tug forward and 1 astern, each taking 2 lines from the vessel. The third comes alongside amidships and passes 2 lines to the vessel. Communication with the Pilot is by walkie-talkie.

Berths: The pier is 400 m. long and orientated 238°/058°. It is connected to the Island by a bridge approximately 300 m. long carrying the conveyor belt. Vessels can come alongside on the inside (N.N.W.) but for large ships only the outside (S.S.E.) is used.

Berthing: Inside – starboard to quay
Outside – starboard to quay after manoeuvring, or portside to the quay (according to the current).

Fenders: Inside – two thicknesses of large tyres. Outside – metal panels fitted on thick rubber supports and shock absorbers. When heaving off, it is recommended not to slide against these fenders so as to avoid damaging them.

Mooring lines: A strong swell is experienced at the quay, therefore good moorings are necessary. 4 lines at the bow, 2 to 4 amidships and 2 astern. Two launches assist in passing lines. There are windlasses on the quay. The wire lines are positioned afterwards.

Height of Quay: 5 to 7 m. above the water, dependent upon the state of the tide.

Gangway: This is only used after the vessel is fairly well loaded.

Handling:

Equipment: A single conveyor belt, movable through 360°, 22 m. above water level. Personnel, installation and equipment belong to MBR.

Advance Arrangements: Come alongside the quay with holds clean and open. Opening of hatches can be carried out during the approach manoeuvre. Inspection of tanks and slops takes place as soon as the vessel is alongside, and a gas-free certificate is issued.

Working hours: 24 hours.

Holidays: None.

Capacity: The gear can supply 7,000 t.p.h. In reality, the nett capacity, with stops deducted was 3,100 t.p.h., and more than 40 hours had to be worked, stops and weighing included, to ship 120,000 tons.

Weighing: As the weighbridge was not operating the only check therefore was reading the draft marks, fairly approximate as there was a swell, carried out by the Master and the draft surveyor (the latter issues the gas-free certificate). It appears that it is necessary to watch calculations closely, particularly as far as the incidence of sag on the deadweight (application on the MBR leaflets of the "Means of means" rule which is less favourable than the "two-thirds rule" generally applied elsewhere).

Formalities:

On arrival: The Agent comes on board with Customs, Health and Immigration. Whilst the photographer is working, and the inspector checks the holds, the following documents are handed over to the different authorities represented:

1 Manifest of Ballast.
9 Crew Lists.
2 Passenger Lists.
5 Stores Lists.
4 Individual Declarations.
1 Health Declaration.
4 Notices of Readiness.

Photographs for passes are brought back within 2 hours and the next morning where a night arrival is concerned. (May 1980 – done on the spot using a Polaroid).

Customs: Seals placed on alcohol and tobacco. No individual limitations.

On sailing the Agent delivers on board:

2 Gas-free Certificates
2 Visaed Notices of Readiness, ship's copy
2 Notices of Readiness, Agency copy
1 Sailing Pass
1 Embarkation Pass
2 Vessel Sailing Passes
1 Draft Survey Results
1 Weight Certificate per type of Ore Loaded
2 Cargo Manifests
2 Cargo Loading Statements
2 Cargo Distribution Plans.

Facilities:

Shore access: The nearest town is Mangaratiba (7,000 inhabitants). To reach it, show your pass at the gatekeeper's office on leaving the port, take a bus (a few minutes) to the landing stage at the foot of the bridge between the island and the mainland.

Take the launch (45 minutes) to Mangaratiba.

From there, another bus goes to Rio (the bus company is EVAL) which takes about 3 hours, leaving every 2 hours. The first bus is at 0800 hrs. Price 18 cruzeiros. Last departure from Rio at 1800 hrs. (Bus station at the corner of the port, at the end of Avenida Francisco Bicalho).

The Agent arranges the times of departure of the launches with vessels' officers.

Medical care: At Mangaratiba for urgent attention and minor treatment. More serious cases must be handled in Rio.

Repairs: Small repairs possible using local personnel. For repairs of some importance, it is necessary to call in Verolme at Angra dos Reis or a shipyard in Rio.

Stores: Some direct purchases possible in Mangaratiba. Limited choice. An order can be sent by telegram to the Agent who will make the necessary purchases in Rio, which will involve the cost of transport, and therefore high prices, particularly for small quantities.

Bunkers: None available.

Fresh Water: Available on the quay, but not drinkable. Output 60 t.p.h.

Telephones: Connection possible on request to the land network.

Lifeboat practice: After prior agreement of Port Captain.

SHIP'S OFFICER'S REPORT: August 1984. Coal Berth.

Anchorage: There are 3 main anchorages used by vessels awaiting berthing at Ilha de Madeira Terminal, Sepetiba Bay.

The first is the main waiting anchorage which serves the Pta. do Leme Oil Terminal, Ilha Guaiba Ore Terminal and Sepetiba Bay. This is situated in the vicinity of Lat. 23° 08.8′ S., Long. 44° 04.5′ W. as marked on Chart No. 1683. Pilots will board here.

The second anchorage is that which the Pilots prefer you to use as the waiting anchorage and is situated in the vicinity of Lat. 23° 03.7′ S., Long. 44° 03.0′ W. This area is also the preferred boarding station for the Pilot as vessels proceeding to Sepetiba Bay do not have the draft to require them to use the approach channel to Ilha Guaiba Ore Terminal.

The third anchorage area is the main waiting area for vessels bound for Ilha de Madeira Terminal and lies to the South of Ilha Jurubaiba, North of the main channel, as marked on Brazilian Chart No. 1623, from the vicinity of No. 4 Buoy to the vicinity of the corner to the North of No. 5 Buoy Northwards to the Latitude of 22° 58.0′ S. (Approx.).

Pilotage: Pilotage is provided by the Rio de Janeiro Pilotage Authority who should be given the usual long-range ETA's etc., "Sepetiba Pilot" should be called on VHF Channel 16/13 from about 4 hours before arrival off Pta. de Castelhanos (Lat. 23° 10.2′ S., Long. 44° 05.5′ W.) for instructions. Pilots will not move vessels in Sepetiba Bay after dark and, if there is a ship on the berth at Ilha de Madeira ready to sail they prefer to make one operation of it by sailing the outward bound vessel before taking in the arriving vessel. Should they require an arriving vessel to anchor they prefer it to use the second anchorage mentioned above so that they may leave the outward vessel and transfer to the inward ship around that area. Pilotage is compulsory for all ships using the deep water channel in Sepetiba Bay.

Tugs: There are three powerful twin-screw tugs which serve the ports in and around Sepetiba Bay. They are "MBR I", "MBR II" and "MBR III". They are apparently based at Itacurca. At Ilha de Madeira Terminal they tie up one on the bow, one on the stern and the third assisting as required amidships, using ship's ropes.

Berthing: Ilha de Madeira Terminal is situated on Ilha de Madeira (Lat. 22° 56.15′ S., Long. 43° 50.2′ W.) and consists of a single long jetty lying approx. 086°/266° T. with a connected dolphin each end. The Eastern dolphin is also connected to the shore by a bridge in the direction 357° T. (approx.) which carries the coal and Bauxite belts, service lines and the approach roadway.

The main part of the jetty is 610 m. (approx.) long and can berth two ships on the outside which is protected by large pneumatic rubber fenders. These berths are served by 4 discharging gantries and two belts for the discharge of coal. At present only two of the gantries are operational but work proceeds on the other two and they should be ready in the near future. Ships berth port side at this jetty. There is a berth on the inboard side of the jetty at the Eastern end which handles Bauxite. The rest of the inboard side has bollards at the usual intervals but has no machinery serving it at present.

The jetty was opened for use in February 1983 and development continues. Further development of the port is projected.

The present limiting draft for arrival is considered to be 37 ft. with a limiting draft alongside of 41 ft. Further dredging etc. is projected to improve the approaches.

Stevedores: Stevedoring appears to be under the control of: Servicos Maritimos e Portuarios Ltda., Matriz: Rua de Quitanda 191-5e andar, Rio de Janeiro – RJ. Tel: 253 8899 Geral. Telex. 21214915 SMP BR.

Repairs: All repair firms etc. are located in Rio de Janeiro, hence all major work must be done there. Minor work may be carried out in Sepetiba Bay. Divers, etc. would come from Rio if required.

Supplies: All fuel must be obtained at Rio de Janeiro. Fresh water is supposed to be available on the berth but the berth is most unwilling to supply and only then in very limited quantities. The available hydrant is well forward and the shore will provide only sufficient hose to reach the deck. This hose is in extremely poor condition.

Provisions are supplied by road from Rio and appear to be of good variety and quality. Bonded stores are available also.

Services: All services are supplied through or at Rio de Janeiro.

Communications: There is a good road to Rio de Janeiro and there is a rail link. The nearest airfield for international flights is at Rio de Janeiro.

AUTHORITY: Madeira Island – Cia. Docas do Rio de Janeiro, Porto de Sepetiba, Ilha da Madeira, Itaquai, 23.825.400 RJ Brazil. *Tel:* 55-21-688 1424. *Telex:* (021) 36338 CDRJ. *FAX:* 55-21-688 1287. *Contact:* Marco Aurelio Braga, Port Manager.

Guaiba Island – Mineracoes Brasileiras Reunidas S.A., Av. Graca Aranha 26, 17th Floor, Rio de Janeiro. *Tel:* 222-5171. *Cables:* "Brasilore".

Mineracoes Brasileiras Reunidas SA (MBR), Sepetiba Terminal de Minerios, Ilha de Guaiba, Mangaratiba, Rio de Janeiro State, Brazil. Tel: 021 789 1400, Telex: 21 21051, FAX: 021 789 1274.

SUAPE: 08.24 S. 34.57 W. (See Plan)

SHIPMASTER'S REPORT: June 1991.

Vessel: LPG Vessel, LOA 210 m.

Port: Suape is a relatively new port constructed in the late 1980's, mainly for petroleum products, LPG, containers and Roll-on/Roll-off vessels. It is situated approximately 50 km. South of Recife.

As such there are no British Admiralty Charts of the port, although the breakwater arm is shown on B.A. Chart No. 3978 as a correction. The Brazilian Hydrographic Office do publish a chart of the port, however, during our visit it was out of stock in Recife.

Communications: The vessel had good and early communications with the agent in Recife. At our request the agent forwarded details of the port, pilotage and anchorage, as well as information gleaned from Petrobras regarding the installation and Receiver's requirements.

Approach: See B.A. Chart No. 3978.

The plan was to approach the port from the N.E. on a course of 214° to pass Cabo St. Agostinho at a distance of 4 miles, then to alter course to 255° with Agostinho light bearing 285° by 4.5 miles to take us to the pilot boarding ground, 1.5 miles E.N.E. of the breakwater head.

Position fixing on the approach was easily achieved by radar, Ponta de Pedros headland, North of Recife, was positively identified at 30 miles and Olinde Lt. sighted at 24 miles. Fixing continued by radar down the coast past Recife. Cabo Agostinho was picked up at 24 miles range and the light was clearly seen at 18 miles.

Whilst passing Recife the vessel was called by Recife Pilot Station, on VHF Channel 16, requesting confirmation of ETA. Berthing at Suape is carried out by Recife pilots who travel down to the port by road then use the local pilot boat to board the ship.

The breakwater arm at Suape was easily identified at 12 miles on the radar and no problems existed in making our alteration of course to approach the port.

Our echo sounder confirmed the soundings on the chart.

Approximately 5 miles from the entrance we were able to contact the pilot on VHF Channel 16, shortly after which he left the port to rendezvous with us, 1.9 miles E.N.E. of the breakwater.

The pilot cutter is red hulled, approximately 10 m. in length and well found. It was able to come alongside in a moderate Easterly swell at a speed of 5 knots.

Once onboard the pilot discussed the intended berthing, in reasonable English, then continued into the port on a course of 255° at 6 knots, passing 4 cables North of the harbour arm.

Berthing: Once inside the harbour entrance, the course was rapidly altered to port, the reef, which forms the Western part of the port, being only 1,100 m. ahead as the vessel enters the harbour. When on a course of 203°, the engines were put full astern and the vessel stopped in the water to enable the tugs to make fast.

Three tugs (2 from Suape and 1 from Recife) were employed for berthing. "Mercurius", 1,200 s.h.p., made fast forward on the port bow with one ship's line. "Pegasus", 2,000 s.h.p., made fast aft through the centre lead with 2 ship's lines. "Zeus", (from Recife) 2,000 s.h.p., pushed on the port side amidships.

The vessel was then brought, using tugs and engines, towards the jetty to berth on the East side, starboard side alongside.

When the bow was approximately abeam of the Chicksan arms, the port anchor was dropped and the cable paid out as the vessel came alongside. The anchor is used to assist with the unmooring operation.

It soon became apparent that the vessel was longer than the extreme distance between the mooring bollards on the jetty and that the mooring arrangement to secure the ship would be somewhat unorthodox.

Despite it being a new port, the shore mooring facilities were not modern. They consisted of standard bollards, no quick release hooks and no winches to heave lines ashore. However, the fendering on the main platform of the jetty was good, comprising 4 large sprung fenders.

First lines were the spoolers to the furthest bollards fore and aft. Once these were ashore, the pilot competently brought the vessel alongside mainly using the tugs. Speed of approach to the jetty being controlled by paying out on the port anchor chain.

Mooring took a long time due to the mooring gang, comprising 4 men, having great difficulty in manually lifting our mooring wires onto the jetty. The problem was resolved by the ship heaving its own lines ashore, using messengers, led around the bollards and back to our winches.

Due to the size of the ship, head and stern lines had to be sent from our main deck and crossed with the springs, and breast lines led from the forecastle and poop (See "Plan").

The reason for the second from aft shore bollard not being used is that it was utilised by a product tanker on the opposite side of the jetty. This meant that 5 lines had to be placed on the aftermost bollard, causing handling problems.

Once secure, the vessel's accommodation ladder was lowered onto the jetty for access. There being no shore gangway and no place on which to land our D.O.T. gangway.

Formalities: Immediately the gangway was down, a large number of officials boarded (Customs, Immigration, Health, Agriculture, etc.). The official papers required, corresponded very closely to the list given in "Guide to Port Entry" under Brazil ("General").

Very little English was spoken by the officials, however, the agent's runner spoke excellent English and was extremely helpful in ensuring that all went smoothly.

No problems were experienced and after usual customs were observed, the officials left for the return journey to Recife.

The agents's runner then assisted the Chief Officer in his dealings with the officials from the Receivers (Petrobras), and the surveyors. All of whom spoke very little English.

No problems were experienced during these discussions and the computer generated Custody Transfer Report was readily accepted.

Once all the usual safety documents and check lists had been completed pipeline connection began.

No samples were taken by the shore personnel onboard prior to discharge, in-line sampling being conducted ashore during the discharge. It appeared that the receivers greatest concern was whether the cargo contained a smell additive, which is a legal requirement in Brazil.

Discharge: 6,500 tonnes of Butane were consigned to Petrobras at this port. Information received prior to arrival was that the cargo be discharged heated, at a minimum temperature of +5°C and at a minimum pressure of 8 bar.

At the berth there is one LPG Chicksan of 6 in. diameter with an 8 in. ASA 300 connection. This was coupled to the Booster Module discharge line, utilising our 6 in. to 8 in. 300 ASA reducer.

Discharge was planned to pump first to 30×52 tonne cylindrical shore tanks owned by Novogas, NOB and CIA. Once these were full the remainder was to be pumped to 3 spheres, each of 2,000 tonnes capacity, owned by Petrobras, situated at the termination of a 1.5 km.×10 in. shore line.

Pumping was from one ship tank utilising 2 pumps, each of 450 cu.m./hr. supplying 2 booster pumps in parallel and the booster salt water heater. Maximum pressure permitted on the shore system being 21 bar.

Once the temperatures and pressures had been stabalised the discharge proceeded very smoothly with no stoppages or delays. The average discharge rate achieved being 212 tonnes per hour at a back pressure of 14 bar.

Due to the many destinations of the cargo, rates fluctuated from 150 tonnes/hr. to 260 tonnes/hr. and pressures from 8 bar to 19 bar.

Communications with the terminal was via ship's VHF on Channel 9. However, this proved somewhat difficult until it was established that both parties were fluent in pigeon Spanish.

Petrobras representatives boarded to check rates, quantities, temperatures and pressures every 4 hours.

The two Caleb Brett surveyors, one from Recife and one from Santos, proved pleasant and helpful. Both lived ashore during discharge.

On completion of discharge, the Chicksan was drained back to the tank onboard and to the sea at the shore end.

Paperwork on completion, was finished within 75 minutes.

Sailing: It is normal practice at this port to order the pilot for 3 hours after completion of cargo. As the paperwork was completed quickly, this resulted in the vessel waiting for almost 2 hours before the pilot arrived.

Unmooring went very smoothly once sufficient labour was organised ashore to lift the mooring wires off the bollards. Two tugs were employed, one secured each end as for arrival.

When all lines were let go the tugs pulled the vessel astern off the jetty, assisted by heaving on the port anchor chain which was laid out on berthing.

Once clear of the berth the stern was pulled to starboard, towards the reef, and the bow swung to port to line up for departure from the harbour.

The pilot disembarked as the ship passed the breakwater head and course was set for Santos, avoiding the isolated rock, least depth 11.5 m., marked by a buoy, 3 cables East of the breakwater.

Other Points of Interest: LPG ships of greater than 35,000 tonnes displacement normally berth at the container jetty which is approximately 100 m. longer than the product jetty. A discharge line, contained within the jetty, and flexible hoses to the ship's manifold are used. This line was out of use on the vessel's visit. The fendering on the container jetty only comprises of truck tyres.

The depth on this berth is 15 m. at M.L.W. as opposed to 12.5 m. on the products jetty.

The prevailing winds at the port are S.E. throughout the year, however, on this occasion winds were N.E. Force 6 which caused a moderate swell to enter the harbour, causing minor ranging problems on the products jetty. This would not have been a problem had the vessel berthed at the container jetty with a proper mooring configuration.

The ship took no stores or provisions at Suape although we were visited by a ship chandlers representative from Recife. The Chandler, Exportadora Star Ltda., Rua Do Apolo, 43 Recife., telex: (38) 811352, purports to belong to ISSA and is also a representative for Unitor. The agent suggested that they are reasonable.

During our stay the agency was available during office hours direct on VHF Channel 13.

SHIPMASTER'S REPORT: May 1992.

Vessel: L.P.G. vessel. LOA 171 m.

Chart: Brazilian Chart No. 906.

Location: About 22 miles South of Recife. Development during 1987 and opened early in 1988 to handle mainly hydrocarbon products for the Pernambuco area.

Protected by breakwater constructed of rough rock which is radar conspicuous.

From the North, Recife is prominent and Cabo de S.Agostinho Lighthouse is conspicuous about 3 miles to the North of Suape Breakwater.

Cabeco Sitiba Bank about half mile to East of breakwater is marked by a buoy.

About 30 ships a month call at the port, of which half are foreign flag.

Pilot: Pilot comes from Recife. Berthing and unberthing possible throughout 24 hours. Minimum notice of 3 hours for arriving and departing is required. Order pilot through Agents.

When pilot is not on station, call Recife Pilot Station on Channel 16, working Channel 13.

Pilot boards from small red launch about 0.5 miles N.E. of breakwater and departs inside breakwater.

Pilotage is not particularly difficult.

Pilot launch remains at Suape.

We used the same pilot inward and outward, and he spoke good English.

Tugs: Two moderate powered tugs on station at Suape, and seem to be permanently manned. Ship's lines used. Both tugs were used inward and outward.

The tugs berth on the S.W. corner of the Hydrocarbon Jetty.

Anchorage: N.W. of breakwater head. Exposed as are all Brazilian East Coast Anchorages.

Small vessels can safely anchor inside breakwater.

Jetties: Two jetties available, one is used for petroleum products, to the East, and the other for dry cargo and containers (no cranes) to the West. Maximum draft is 9.0 m.

The dry cargo pier has a Ro/Ro facility on its Eastern base.

The petroleum jetty can take vessels up to 200 m. length, draft 12.0 m. maximum on the Eastern side and 11.0 m. on the Western side. Vessels can berth either side too, both sides of jetty, depending on their connection requirements.

Ship's amidships accommodation gangway can be landed on jetty, either side. The effective berthing flat face is 95 m. both sides. Fenders are good, rubber shock type. Moorings are fair. For maximum length ships, the leads will have little angle ahead and astern.

Moorings handled by pilot boat. We used 3,2,2 each end.

Both berths handle same products.

Some swell inside harbour and open to S.E. wind.

Pilot reported that weather rarely stops berthing/unberthing.

Cargo: Petroleum Jetty handles LPG at +5°C through 6 in. Chicksan and 4 in. Vapour Return Chicksan. Numerous storage tanks in different facilities about 1 mile away.

Bunker C heavy fuel for power stations handled through 12 in. Chicksan, aviation gasolene handled through 2×8 in. Chicksans and gas oil handled through 8 in. Chicksan (same Chicksan also handles gas alcohol outwards and for export).

Jetty also sends fresh water outwards to other Brazilian areas, through manifold just inshore of Chicksans, through hoses.

LPG surveys are long and tedious, take about 2 to 3 hours inwards and outwards with many surveyors from the different receivers. Use 20°C with own SG. Pumping rate for LPG about 250 t.p.h. at 10 to 12 bar back pressure. Frequent stops due to full storage tanks.

Terminal representative in control cabin on North end of jetty. Communication not very good. Difficult to find out pumping requirements.

General: Fresh water: Through meter for both berths on jetty. Ship's hoses used. Good rate.

Agent: Difficult to contact other than through local Radio Station (ALRS), or if you have Brazilian coins for pay phone.

Telephone: Public pay phone at base of jetty near gate. It is possible to dial direct (UK Operator 0008044). The line was clear.

Stores: Available from several ship chandlers in Recife. We used Adriatico, who were fair. If payment is U.S. Dollars cash, Brazilian produce is good value, especially meat. Nearest that stores truck is allowed is about 200 m. from ship's side. Chandlers provide some labour, but still awkward.

Repairs: We had compressor shaft repaired with stainless steel and new bearings by Metalurgica Industrial Recife. A good job was done within 24 hours at reasonable price for U.S. Dollars (cash). Through invoicing, it would have cost 30% more.

Authorities: Ship came coastwise from Fortaleza, so had 'Riding' papers. Even so, Immigration, Customs and Harbour Master boarded. In addition to coastwise papers, they required:

6 copies Crew List.
1 copy Personal Effects List.
1 copy Stores List.

Harbour Master sighted SISCONTRAM report messages and all ships papers. He also complained about Brazilian flag being wrapped around halyard.

Shore Leave: No passes issued. No restrictions. Port is a long way from anywhere, and it is difficult to get a taxi.

TRAMANDAI (Rio Grande do Sul): 29.59 S. 50.08 W.

(See Plan)

LOCATION: *Access to the Terminal:* Tramandai SPM Terminal (DTSUL/GERIG) is located 6 km. from the tourist seaside resort Tramandai, which is 113 km. from Porto Alegre, capital of the state of Rio Grande do Sul. The road is good. Airport is available for small aircraft only (35 minutes by air cabs from Porto Alegre to Osorio).

Buoy Positions: The Buoys (SBMs) are positioned 1.9 miles and 3.7 miles from the shore, and their geographical co-ordinates are:

Buoy 1 (West): Lat. 30° 00′ 40″ S., Long. 50° 05′ 42″ W.
Buoy 2 (East): Lat. 30° 01′ 52″ S., Long. 50° 04′ 36″ W.

IMPORTANT FEATURES:

1. The Terminal consists of 2 berths (Single Point Moorings) designed for unloading crude oil and/or naphtha, in order to supply Alberto Pasqualini Refinery (REFAP), located at Canoas, near Porto Alegre, in the state capital.

   Unloading of vessels is effected by 2 submarine pipelines, whose total lengths and diameters are:

   Buoy 1 (West): 3.8 km. – 2 lines of 28 in.
   Buoy 2 (East): 6.3 km. – 2 lines of 34 in.
2. Mooring Masters moor, unmoor and supervise hose lifting, connecting and the movements of all craft in the vicinity of the SPMs.
3. Ship's windlass (warping heads, brakes, wildcats, etc.) must be in perfect operational condition, so that ship's haul-in line/messenger can be heaved.
4. Maximum permitted draft for the Terminal is 16.0 m. at Buoy 1 and 19.0 m. at Buoy 2, in order to ensure a safe U.K.C., even under extreme operating sea conditions.
5. Amidships, derrick or crane effective capacity must be not less than 5 tonnes, so that hose can be hoisted and connected.
6. Minimum free distances between forward roller/fairlead sheaves must be 0.28 m., in order to allow the pass of the triangular plate and chafing chain.
7. The distance from bow to centre manifold must not be larger than 140 m. for mooring to Buoy 1 (West), or 180 m. for mooring to Buoy 2 (East).
8. Ship's manifold should be equipped with flanges ANSI B 16.5 150 p.s.i.
9. Any emergency signal should also be immediately transmitted by radio on VHF Channel 16 or on 2182 kHz (AM or SSB).

Notes:

(a) Non-compliance of just one of the above stated conditions (Items 3, 4, 5, 6 or 7) could result in rejection of the ship as being unsuitable for the SPMs in Tramandai.

(b) SPM Terminal is an offshore Single Point Mooring for tankers, connected to shore by a submarine pipeline.

DOCUMENTS:

Health: The following documents have to be submitted to the boarding Health Officials:

1 copy Vaccination List.
1 copy Certificate of Derat Exemption.
1 copy Maritime Health Declaration.
1 copy List of Drugs and Narcotics.
1 copy Passengers in Transit List.
1 copy Passenger List.

Immigration and Maritime Police: The following documents have to be submitted to the boarding Maritime Police Officials:

3 copies Crew List.
1 copy General List.
3 copies Passenger List.
3 copies Passengers in Transit List.

Customs: The following documents have to be submitted to the boarding Customs Officials:

1 copy Crew List.
3 copies Spare Parts List.
3 copies Stores List.
3 copies Provisions List.
1 copy Cargo Manifest.
1 copy Bills of Lading.
2 copies Passenger List.
2 copies Passengers in Transit List.
3 copies Crew Personal Effects List.
3 copies Passengers Personal Effects List.

NOTE: Supplies, stores, cigarettes, cigars, tobacco, alcoholic beverages, arms, ammunitions, souvenirs, playing cards, drugs and narcotics, medicines (not in use), etc., must be kept under lock and key. The doors of the storage rooms will be sealed by the Customs Officials, and the seal must be kept unbroken throughout the vessel's stay in port.

Any goods or personal effects omitted from the lists may be confiscated.

Extracts of Sea Protest drawn out from the Log Book must be submitted to the boarding Customs Officials, in case of accidents which have caused damage or loss of the cargo or part of it.

Ship's Agent: The ship's Agent will need the following documents:

3 copies Passenger List.
3 copies Passengers in Transit List.
3 copies Crew List.

The Agent will take care of necessary steps in order to grant the Disembarkation Cards.

Leaving Clearance: Masters must appoint their ship's Agent at Porto Alegre and have their International Safety Certificates in force. It is also necessary for vessels Leaving Clearance:

Leaving Permit from Customs.
Leaving Permit from the Captain of the Port.
Leaving Permit from the Maritime Police.
Leaving Permit from Brazil Mail (Passe da ECT).

Notes:

1. The Customs flag (blue with a white star) must be flown from the vessel's mast or yard upon the visit throughout the vessel's stay in port.
2. Special licence from the Captain of the Port must be granted for passengers bound for foreign countries. Therefore their names must be given and their Passports delivered to Agents at least 48 hours before application for the vessel's Leaving Permit.
3. The number of disembarking passengers must be radioed to Agents at least 24 hours before the vessel's expected time of arrival.

PILOTAGE:

(a) There are no Pilots services available at Tramandai.

(b) Pilotage is not compulsory in the area of the SPM, either when making for it, mooring at it or clearing the SPM.

DTSUL/GERIG provides a duly trained Mooring Master to assist Masters of vessels operating at the SPM. His services are presently rendered without charge.

Upon arriving at one of the anchorage sites appointed by the Mooring Master, the Master of the vessel starts being duly guided by the Mooring Master.

For approaching manoeuvres, and after mooring to the SBM, the Master of the vessel will be assisted by the Mooring Master who boarded the vessel in the proper site and will help the Master of the vessel as far as the operational activities in the area are concerned, such as mooring, hose connection, discharge, hose disconnection and unmooring, as well as control of small craft that render assistance to the vessel.

It is the responsibility of the Master of the vessel to notify the Mooring Master of any special conditions, difficulties or peculiarities of the vessel, such as defective navigational equipment, mooring lines, tackle gear, helm, engine or boiler deficiencies or lack of necessary equipment which might impose hazards in connection with handling, mooring, unmooring and actually operating the vessel.

The Mooring Master must immediately be advised about any acts or facts which may jeopardise the safety of the vessel or the system, as well as operational events which may possibly alter the existing conditions.

The vessel must be moored to the entire satisfaction of both the Master and the Mooring Master.

The Mooring Master will remain on board the vessel throughout the vessel's stay at the SPM and will notify the Terminal Superintendent about any operational failures; and the vessel may be ordered off the SPM and refuse to be accepted in future, unless corrective action by the ship is immediately taken.

The Mooring Master will notify the Master of the vessel, in writing, about disregard of the operational requirements established upon arrival of the ship.

Mooring Master's Station and Launch Pier: The Mooring Master's station and the Launch Pier are located on the left edge of the Tramandai River – PETROBRAS concessionary area – 400 m. up from the bar's entrance.

The bar is shallow and narrow; only small, powerful craft handled by an experienced crew are able to enter the mouth of the river safely. No outer breakwater exists to serve as an immediate refuge harbour for small craft in heavy weather (seas).

The general lay-out of the Terminal is shown on Brazilian Navy Hydrographic Office Chart No. DHN 2010.

APPROACHES:

Evolution Basin: It extends to the East of the buoys in the open sea. Water depths range from 20 m. – 25 m. in the area of the SPMs. Isobatic lines run parallel to the coast.

50 m., at about 20 miles.
25 m., at about 5 miles and
20 m., at about 2 miles from shore.

Note: Manoeuvring within the Evolution Basin is safe, even at night-time.

Charts and Publications:

(a) Brazilian Charts: 2.000 and 2.010 (Brazilian Navy Hydrographic Office).

(b) Foreign Charts: No. 24.110 of the U.S. NOO (Old No. 2.495) and No. 3969 of the B.A. (UK).

(c) Brazilian HO Publications: Sailing Directions DH 1-8.
List of Lights DH 2-11.
Radio Aids DH 8-8.

Landing Approaches: There are 3 conspicuous water towers: Tourist, Agrimer and Tramandai. There is also a small radar and meteorological watch steel tower, near the pier positioned at Lat. 29° 58′ 32″ S., Long. 50° 07′ 18″ W.

Navigational Aids:

(a) South of Tramandai there is a light – International No. G 0607,4.

Position:	Lat. 30° 00′ 27″ S., Long. 50° 08′ 04″ W.
Characteristics:	Gr. Fl. (3) W. 12 sec.
Height of Light:	25 m.
Range:	15 miles.
Description:	Cylindrical brick tower painted in white and black squares – Radar reflectors are also provided.
Reference:	List of Lights (Brazilian Navy HO publication DH 2 – Lista de Farois).

(b) Radio Beacon:

Signal letters:	FB (Fox Bravo)
Frequency:	300 kHz.
Range:	300 miles.
Position:	Lat. 30° 00′ 34″ S., Long. 50° 08′ 08″ W.

(c) SPMs Lights:

Characteristics:	Buoy 1 – SBM:	1 period 3 sec. 1 flash 0.3 sec. 1 eclipse 2.7 sec.
	Buoy 2 – SBM:	1 period 3 sec. 1 flash 0.3 sec. 1 eclipse 2.7 sec.

(d) Conspicuous Landmarks:
3 water towers (Tourist, Agrimer and Tramandai) and one watch tower.

ANCHORAGE:

(a) The advisable anchorage site is 2 miles N.E. of the Buoy 2 (East).
Geographical position: Lat. 29° 59′ 39″ S., Long. 50° 03′ 34″ W.
Depth: 21 m.
Seabed: Fine sand and mud.

(b) Mooring Master will board arriving tankers in this area.

(c) Due to the peculiar conditions of the Terminal, mooring should be undertaken only at daylight.

(d) Sometimes the leaving of launches seawards depends on the height of tide and the strength of the waves upon the shore. Thus, tankers will have to wait for favourable weather conditions so that mooring may safely be started.

Important: Under no circumstances are tankers to drop anchor in the stretch of the area between the buoy and the shore, due to the existence of submarine pipelines.

MAX. SIZE: The SBM system is suitable for following tanker's sizes and drafts:

Buoy 1 (West): Designed for 200,000 d.w.t. tankers, maximum draft 16.0 m. (52 ft.).

Buoy 2 (East): Designed for 200,000 d.w.t. tankers, maximum draft 19.0 m. (62 ft.).

NOTE: The size of the vessel is limited by the structural resistance of the buoys. However, Tramandai local depths are ultimately the actual limitation.

HEALTH: Display of quarantine signal "Quebec" flag on approach to Tramandai must be maintained until Free Pratique is granted. The national Brazilian flag should remain hoisted throughout vessel's stay in the Terminal.

Also see "Documents".

Free Pratique: Vessels bound for DTSUL/GERIG, when entering the SPM or anchorage area, are inspected by Health, Customs and Maritime Police Officials.

Ship's Agent must apply beforehand for these visits.

Special visits may sometimes be granted at DTSUL/GERIG ground facilities.

Any and every document issued or otherwise related to ship's clearance at the last port of call is required for immediate inspection by the boarding Officials.

RADIO: *Pre-Arrival Radio Procedures:* Vessels bound for Tramandai should advise their ETA 48 hours prior to arrival to their Agent (through "PPR" Rio Radio). In turn that station will send messages to the Terminal. Confirmation or change of ETA should be cabled 24 hours before arrival. Vessels may also contact DTSUL/GERIG radio telephony station, either in AM or SSB on the following channels and frequencies:

VHF conventional frequencies: Channels 11, 13, 14 and 16 on 156.55/165.65/165.70/156.80 MHz respectively.

SSB frequencies: 2,182/2,815/4,383.38/8,770.8 and 2,647/ 4,078.8/8,120.8 kHz for listening.

Note: All ETAs should indicate whether it is Local Time or GMT.

VHF: See "Radio".

TUGS: *Launches:* Mooring, unmooring and connection operations are assisted by the Terminal's launches. While rendering such assistance the boats act under orders of the Mooring Master. Usually 2 service boats are at his disposition. Besides operational assistance, they undertake transportation of Mooring Masters, personnel, Agents, ship chandlers and Port Authorities.

BERTHING: *Buoy (SPM):* Both SBMs are equipped with lights and radar reflectors.

Mooring System: The mooring system consists of:

(a) Two berths (single point mooring: sea buoy with turntable).

(b) Two nylon floating hawsers for each buoy for bow mooring, which are permanently attached to the buoys.
Each 16 in. and 53 m. long hawser (braided or twisted strings 3×3).
This set is kept from sinking by the sustaining buoy.

(c) Two main floating unloading hoses 16 in. for dirty petroleum products and 12 in. for clear petroleum products at each buoy.

Average Operations Times:

(a) Approaching the SPM: 1 hour.
(b) Placing mooring and connection equipment aboard ship: 20 minutes.
(c) Mooring: 20 minutes.
(d) Hose lifting: 5 minutes.
(e) Hose connecting: 90 minutes.
(f) Hose disconnecting: 60 minutes.
(g) Unmooring: 5 minutes.
(h) Removal of personnel: 10 minutes.
(i) Ballast of the vessel is performed during unloading.

Mooring Turn (Arrival): Arrival time is considered to be the instant the vessel reaches the anchorage area or the time the Mooring Master boards the vessel, whichever occurs first. However, Notice of Readiness will not be considered as the time of arrival unless the vessel is in all respects ready to discharge. In the event berthing is delayed by weather conditions, tankers will be unloaded in turn. If however, the weather is so bad that the port is closed and vessels awaiting discharge have to go out to sea, GERIG may discharge another vessel bound for the Terminal if it arrives before the return of the delayed vessel. More rarely, the Terminal Superintendent may grant priority to a particular vessel out of turn, in special circumstances only. Exceptionally, and at the discretion of the Terminal Superintendent, two tankers will discharge at the same time. Occasionally, on account of weather or operational conveniences, tankers are diverted to other ports either fully or partially loaded. These orders usually come from Charterers or Agents.

The Terminal only conveys these instructions.

Mooring: The Mooring Master will advise on the method of securing the ship. Tankers are usually moored by 2 bow nylon hawsers with 16 in. × 53 m. length and 2 chafing chains which are permanently fastened to the buoy's turntable.

Vessel's haul-in/messengers nylon lines are then shackled, one at a time, to the pick-up wires of the chafing chains by the launch crew and hove in (through the vessel's windlass warping bollard) until the length of the chafing chains are brought over the vessel's roller chocks/fairleads.

Eventually, ship's engine will help the lead-in ropes (vessel's messenger) in coming up to the SPM.

The following items must be observed:

(a) Anchors must be well at home and secured with stoppers and brakes.

(b) Tankers must have steam on deck and crew ready at stations (6 men on the forecastle head, at least).

For pulling the ship near the SPM, 2 good eye-spliced (3 in. at least) nylon haul-in lines must be ready, at each side, on the forecastle head, to be given to the launch which in turn will shackle them to the hawser's pick-up wires (marked by small spar buoys).

On the near approach to the SPM and after the vessel's haul-in line is shackled to the pick-up wire, that line will be heaved aboard.

When the chafing chain is brought over the vessel's roller chock fairlead (the triangular plate being on the forecastle deck), this plate will be secured, by means of a 2 in. joining shackle, to a set of chain stoppers with Senhouse slip which, by that time, must have been tied to the vessel's bitts through a wire strop. After the joining shackle is properly attached, the weight of the vessel can be fully taken on chain stopper/Senhouse slip/wire strop set by slacking off the haul-in line around the warping bollard of windlass.

Note: As a member of the SPM FORUM, PETROBRAS has been attending to the meeting of improving and standardising gear, mooring arrangements, self-mooring, etc. In future time, when fitted, Smit's mooring/towing bracket will be utilised.

Unmooring: The Mooring Master will convey a message to the Launch Station stating the estimated time for the completion of discharge and asking the launches to unmoor the vessel.

Then, hose disconnecting is undertaken aboard ship.

For unmooring, the vessel must wait for the arrival of the launch that will leave her station as long as weather conditions permit, and if there is enough light, so that the ship can safely unmoor.

After unmooring takes place, the launch comes alongside ship so that all material and personnel (Terminal and Agent's representatives, Port Officials) can be transferred.

The vessel is then ready to leave the Terminal.

Remarks: Whenever the previously established limits (wind and wave) are reached, the vessel will be instructed to interrupt pumping cargo and let go lines as soon as possible, during all the time the vessel is moored to the SPM she must be ready to clear berth under her own power immediately (stand-by).

LOADING/UNLOADING: *Floating and Submarine Hoses:* Two lines of floating hoses for discharge provide the oil flow connection between the tanker and each SPM. Also 2 lines of submarine hoses connect the bottom of the buoy to the pipeline ending manifold. The outer floating line of Buoy 1 consists of 16 sections of 16 in. hose and 5 sections of 12 in. hose. Its inner floating line consists of 15 sections of 20 in. hose and 5 sections of 12 in. hose.

The outer floating line of the Buoy 2 consists of 21 sections of 20 in. hose, and its inner line consists of 20 sections of 20 in. hose and 5 sections of 16 in. hose.

The total length at Buoy 1 is 220 m. and at Buoy 2 is 240 m. Both lines can support a working pressure of 7 kg./sq.cm.

Pumping flow rates for oil viscosity 60 SSU are 5,500 cu.m./hr. (34,500 bbl./hr.) at Buoy 1 with 2×28 in. pipelines and 2×12 in. floating lines. At Buoy 2, pumping flow rates are of 7,660 cu.m./hr. (48,100 bbl./hr.), with 2×16 in. floating lines and 2×34 in. pipelines.

Hose Connection: The Mooring Master will guide the Terminal's workmen in lifting, connecting and lowering the hoses.

Immediately after the vessel is securely moored, the 16 in. and 12 in. floating hoses (derived from the main 20 in. hose by means of a "Y" piece) must be individually lifted to the rail by the ship's gear (5 ton minimum). Sundry hose securing and connecting equipment (strops, gaskets, nuts, bolts, wrenches, etc.) will be supplied by the Terminal and put aboard the ship just after arrival.

Hoses will be lifted by ship's derrick preferably on the port side.

Note: When wind force reaches about 8 on the Beaufort Scale, and waves are 3.5 m. high, emergency disconnecting operation will take place, even at night-time.

Unloading: At the beginning of and during the unloading operation, tankers are requested to observe the following:

(a) Pumping must not be started without permission of the Mooring Master.

(b) The maximum allowable pressure is 7 kg./sq.cm.

(c) While the vessel is moored, the vertical angle formed by the nylon hawsers and the sea level should not exceed 30°, for safety of the SBM's turntable. When due either to excessive pitching or for being trimmed too much by the stern (uneven keel condition) because of oil that has been discharged from the fore tanks, pumping of ballast must be concentrated in these tanks, even if interruption of unloading becomes mandatory. So the Mooring Master may require cargo to be discharged, in certain stages, either from aft or for'd compartments.

(d) As a rule, when unloading is over, the ship should have on board at least 40% of her total d.w.t. tonnage.

(e) A lookout by a responsible crewman on the forecastle head and at the manifold area to keep watch on the mooring and connections.

(f) Besides the Mooring Master himself, some Terminal workmen stay aboard ship during the whole operation time. Therefore, rooms and meals for one officer and 6 crewmen should be supplied.

(g) During inclement weather conditions, unloading must be stopped according to Mooring Master.

(h) Upon completion of discharge, the Mooring Master will require the ship to pump sea water through the submarine pipelines to displace the remaining oil.

BALLAST: No slop facilities are available for dirty ballast. Brazilian laws are very strict with regard to the pollution of coastal waters. Vessels are not allowed to discharge dirty ballast into the water. Heavy fines are imposed for violations.

Tramandai is the largest Rio Grande do Sul seaside resort and any pollution of the sea in this area will cause damage to the beaches. Hence, no dirty ballast or any oily residues must be pumped overboard within a range of over 50 miles, if no safer alternative exists.

MEDICAL: Medical treatment and/or hospitalisation, if required, are provided at Tramandai or Osorio private hospitals. Serious illness will usually be treated in Porto Alegre. Dentists are also available in Tramandai. For emergency cases (injury, etc.) GERIG first medical aid may be requested by the Master. As usual, Agent will make such arrangements.

FUEL: Not available.

FRESH WATER: Not available.

CONSULS: No consular representatives are reported to exist in the area; however, there are consulates of most maritime nations in Porto Alegre.

SURVEYORS: There are no Classification Societies surveyors in Tramandai.

Petroleum Inspectors: Petroleum inspectors are not available in Tramandai. Nevertheless, if arranged in sufficient time, they may be requested from the foregoing addresses:

SGS (Rio Grande), Av. Atalaia 1822, Rio Grande – RS, CEP 96203-000. Tel: (0532) 302200. Fax: (0532) 302236.

SGS (Poa), Rua Largo Visconde do Cairu, 12-14 andar, Porto Alegre – RS, CEP 90030-110. Tel: 227-5711. Fax: 226-0033.

Caleb Brett (Pelotas), Av. Duque de Caxias 726, Pelotas – RS, CEP 96030-002. Tel: (0532) 71-2098.

CUSTOMS REQUIREMENTS: Brazilian laws are strict with regard to smuggling and Masters are requested to instruct their crews not to retain cigarettes in carton lots, cigars, tobacco, alcoholic drinks, drugs, souvenirs, etc. These should be collected prior to arrival, listed with the items in the slop chest and placed in the custody of the Master for deposit in the chest or closet which will then be sealed for the duration of the vessel's stay at the mooring.

By no means will any commercial transactions be tolerated, be it either among terminal employees, crew members or anyone else.

TIME: GMT minus 3 hours. GMT minus 2 hours in Summer.

SHORE LEAVE: Not allowed.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL:

Provisions and Stores: Provisions and stores are ordered through the ship's Agent or direct through ship chandlers; the majority of items come from Porto Alegre, but some of them may be obtained in Tramandai or Osorio.

Lubricating Oil: Supplies of lub oil are expensive and available in emergencies and in very small quantities only.

Purchase and delivery are difficult. Ship's Agent should be advised by radio as soon as possible.

Cash Advance: No cash advances are effected by the Terminal. As a rule, the Agent will be able to handle this service when previously requested by radio.

Mail: There is a post office in Tramandai. Letters should be sent care of the ship's Agent. In turn, he will deliver the letters to the ship upon arrival.

Radio and Radar Repairs: Minor radar and radio repairs may be undertaken in Tramandai, provided that prior notice has been given to the ship's Agent.

Laundry: Laundry facilities are available in Tramandai.

Bonded Stores: Cigarettes, beverages or other goods are not available in Tramandai.

Charts and Sailing Directions: No supply of charts, sailing directions or other publications are available in Tramandai. However, if orderd in advance to Agent, they may be obtained through him.

Visitors: Visitors to ships are prohibited, except for Company's employees, Port Officials, Surveyors, etc., whose duties require their presence on board.

Watches: An efficient watch must be maintained on deck and in the engine room; a sufficient and qualified number of men must be able to move the moored vessel in emergency situations.

Seamen Left Ashore: In case of seamen left ashore for hospitalisation, repatriation or other reason, all expenses are for the ship's account.

General Information: Although vessels can safely discharge and disconnect hoses by night, so far the same does apply to mooring and connecting operations which may only be commenced at daylight. Nevertheless, exceptions may be made at the discretion of the Terminal Superintendent.

Constant Readiness: Since moorings are in open roadstead, vessel's engines and gear must be ready with full power for immediate use through the period the vessel is moored and the ship must be able to clear the mooring immediately on the advice of the Mooring Master or Superintendent of the Terminal.

Whenever necessary, vessels may use their own power to prevent riding upon the SBM.

SHIPMASTER'S REPORT: July 1994.
Berth: Petrobras/DT Sul – SBM.
Cargo: Discharging naphtha.
Connection: Hoses.
General: SBM very open to weather, and vessel may be delayed in berthing or may have to vacate berth (2 SBM's operational).

AUTHORITY: Petrobras/Detran/Dicop, Av. Republica do Chile 65, Sala 1255, Centro, Rio de Janeiro, R.J., CEP 20035-900, Brazil. *Tel:* (021) 534-1068. *FAX:* (021) 534-2404. *Contact:* Elizio Araujo Neto, Chief of Coordination, Planning and Operations.

Terminal: Petroleo Brasileiro, S.A. – PETROBRAS, Caixa Postal 19, 95590 Tramandai-RS, Brazil. *Tel:* (051) 661 1942, 661 1342, 661 1088. (0512) 212888, 212846. *Telex:* Petr 052 3003. *FAX:* (051) 661 1088, 661 1342 (ext. 218). *Contact:* Superintendent.

TUBARAO (Including Praia Mole): 20.17 S. 40.15 W. (See Plan)

APPROACHES: The access channel is 280 m. wide and dredged to 22.5 m. and runs in a 345°-165° direction. The beginning of the channel is marked by a red light buoy in position Lat. 20° 19′ 36″ S., Long. 40° 14′ 22.5″ W. and a white light buoy in position Lat. 20° 19′ 41.5″ S., Long. 40° 14′ 34.5″ W. (See NHD chart 1401).

Tides: Tidal variation is small, on average, there being 2 high tides and 2 low tides each day. The coastal current generally runs to the South with an average speed of 1 km./hour. The current is less constant in May and June. The maximum size waves, are 1.5 m. with wind coming from N.E. and 2.5 m. with S.W. wind.

Manoeuvring Area: The manoeuvring area for berthing and unberthing has a width of 150 m. along the whole length of the quay, the manoeuvring basin has a diameter of 500 m. and depth of 18.0 m. Anchoring is prohibited in the access channel and the manoeuvring area except with prior permission of the Port Captain.

Access Channel: Vessels destined for the Coal Terminal, located on the Northern edge of the access channel to the port of Tubarao, use this channel as far as slightly ahead of Buoy No. 5 (LF. ev. 3 secs.) turning to the N.E. to enter the terminal manoeuvring basin.

PILOTAGE: Pilotage is compulsory between the anchorage and the berth. Request for the Pilot is made by port operators (CVRD) 4 hours in advance (minimum). The vessel should indicate the time of arrival of the vessel at the entrance and from which point pilotage is required. Pilot may be contacted on the following VHF Channels: 16 for constant listening and 10, 12 and 14 for conversations.

Compulsory pilotage area is from the anchorage area where the Pilot embarks, the access channel, the manoeuvring basin and the existing piers in the port. After a Pilot receives advice of vessels arrival it takes 50 minutes for the Pilot to embark, this is done by a launch of the Vitoria Pilot Service. No difficulties are encountered when embarking except when the sea is very rough and there are strong winds.

Pilotage Area: The inner maritime area is limited by the circumference of 2.5 miles radius, centered on the Tubarao South Light in the sector included between 340° and the island Boi, as far as the berth.

ANCHORAGE: The anchorage area for vessels awaiting berths is Lat. 20° 19.3′ S., Long. 40° 15.1′ W. Vessels in quarantine must anchor in an optional area indicated on chart 1401.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Free Pratique may be obtained by radio, the message being sent to the ship's Agent by radio via PPO (Olinda), PPJ (Juncao), PPR (Rio) or PPL (Belem), at least 72 hours prior to the vessels arrival. Declaration of Health must be prepared and typed in order that it may be delivered to the doctor when he comes on board.

RADIO/VHF: Vitoria Radio Station on VHF Channels 16, 12 and 13.

TUGS: Two tugs of at least 1,500 h.p. are used when proceeding from the entrance to the manoeuvring area off the berth. When berthing 4 tugs and 1 launch assist.

Name	*H.P.*	*Bollard Pull*
Helio Ferrzaz	3,000	31.7
Tubarao	1,900	29
Itabira	1,530	16
Carajas	2,540	39.4

Name	*H.P.*	*Bollard Pull*
Trombetas	2,540	37.6
B. Horizonte	1,680	20
Guaiba	1,680	21.5
Titan	2,170	36.6
Arcturus	2,160	25
Servemar 10	1,070	7.5
Jamie	600	6
Affonso	1,640	16.4

BERTHING: Should a vessel be departing at the same time as another vessel is entering, the vessel which is leaving has priority and the vessel which is waiting to enter is to wait outside the entrance channel. Vessels are not permitted to pass each other in the channel or the manoeuvring basin. Should the weather conditions be poor, visibility restricted or too dark for the vessel to berth or unberth the decision to manoeuvre will be taken by the Pilot who may decide to change the operations to a more convenient time.

Vale Do Rio Doce Co.:

Pier 1: Length 390 m. usable berthing length 350 m., depth on North Side and on South Side 16.0 m. Berthing is possible on both sides. Ship Loaders No. 1 and 2 can load vessels on both sides of the pier.

Ship Loader No. 1: Max. height of hatch coaming above sea level 12.50 m. Max. outreach of loading boom 24 m. Nominal capacity of loader 6,000 t.p.h. Vessels max. LOA 330 m. Max. sailing draft 15.20 m. plus height of tide (average 1.3 m.).

Ship Loader No. 2 (Seaward side of pier): Max. height of hatch coaming above sea level 17 m. Max. outreach of loading boom 33.50 m. Nominal capacity of loader 8,000 t.p.h. Max. length 330 m. Max. sailing draft 15.20 m. plus height of tide (average 1.3 m.).

Pier 2: Max. LOA permissible 350 m., depth alongside 24 m. There are 4 dolphins each with 2 hooks and 4 dolphins each with 3 hooks.

Storage Area: Old area 2 million tons, new area 4 million tons, factory area 1.7 million tons.

This is a new pier now completed parallel and inshore of the existing pier for vessels of 250,000 d.w.t. Max. sailing draft 20.0 m. plus tide (average 1.3 m.). Vessels berth at seaward side only to avoid ranging. 2 shiploaders, swivelling (20 m. airdraft). Load rate 12/16,000 t.p.h. No dirty ballast facilities. Heavy fines for pollution.

Should Pilot wish to berth a bulk carrier on Pier No.1, South side, (Vale Do Rio Doce Co.) and there is a vessel at the Petrobras Terminal, the vessel at Petrobras Terminal will be removed prior to berthing of the bulk carrier.

Praia Mole: The port is situated on the North side of the Bay of Espirito Santo in the approximate position Lat. 20° 17′ S., Long. 40° 14′ E., close to the Port of Tubarao. It is 12 km. from the centre of the town of Vitoria, capital of the State of Espirito Santo, connected by an ashphalted road.

It is an artificial port in the open sea, functioning mainly to receive metallurigal and power generation coal and the shipment of metal products for export.

The Port of Praia Mole consists of a terminal with coal receiving equipment and a terminal with equipment for export of metal products.

Coal Terminal: Built for the movement of 8 million tons/year in its first stage and 12 millions of tons/year in its second stage.

The pier is 730 m. long (operating on one side only) and the civil engineering work is finished. It should be able to receive vessels of 15,000 d.w.t. to 170,000 d.w.t. at Berth No. 1, depth 17.0 m. and vessels up to 250,000 d.w.t. at Berth No. 2 after dredging this berth to 21 m. Present depth 18.0 m. Berth No. 1 length 330 m. Berth No. 2 length 400 m. Manoeuvring basin – diameter 500 m. depth 18.0 m.

The pier is fitted with 3 discharge units with a capacity of 1,800 t.p.h. each. The discharged coal is transported via three lines of conveyor belts (1 line already functioning) for storage in the Coal Storage Area of the port or taken directly to CST or CVRD. The Coal Storage Area will have a capacity of 11 million tons, with 520,000 tons at present. In the Coal Storage Area, for stocking and recovery of coal are planned 3 stackers and 2 recovery units, with capacities per machine of 2,200 t.p.h. and 4,400 t.p.h. respectively. (Currently, 1 stacker is undergoing operational tests, 1 recovery unit is being installed.) The coal recovered from the area will be sent to the cellulos/cement industries for pelletisation by CVRD, to CST or for Usiminas/Acominas by means of a system of loading wagons on the railway system, with a capacity of 2,000 t.p.h. in the phase of current installation.

Metal Product Terminal: Built for moving 3 million tons/year in its first stage and 4.5 million tons/year in its second stage. It comprises a 638 m. long quay with depth of 14.5 m. for taking vessels from 15,000 d.w.t. to 70,000 d.w.t.

On the quay 4 loaders for metallurgical products for vessels with 40 tonnes capacity each. In the rear part of the quay will be formed an area for storage and handling products, with an area of 30,000 sq.m. in its first stage, and 100,000 sq.m. in its second stage (currently 60,000 sq.m. has been finished). This storage and handling area will have 10 rolling bridges with a capacity of 35 tons each and will be served by 5 railway lines along the quay. The railway lines are interconnecting CVRD to the quay.

STEVEDORES: Services of stevedores not normally required. Crew open hatches.

MEDICAL: Four hospitals available.

TANKERS: *Petrobras Terminal:* The berth consists of 2 mooring dolphins which enable vessels of 160 m. LOA and draft of 7.9 m. to berth.

FRESH WATER: Available at all quays of the terminal, maximum quantity per vessel 150 tons. Requests for water must be made by Ships Officers immediately on berthing. If quantity greater than 150 tons is required 48 hours notice must be given in order to establish whether or not the additional quantity is available.

FUEL: Diesel oil in quantities up to 100 tons can be supplied by Petrobras in road tankers at the berths, also vessels with Max. draft of 8 m. and Max. LOA 160 m. can berth at the Petrobras Oil Terminal inside the breakwater to take bunkers and diesel. Vessels at Praia Mole bunkered by barge.

Terminal Rates:

Diesel oil	– 100 t.p.h.
Fuel oil	– 150 t.p.h.
Mixture	– 80 t.p.h.
Crude oil	– 700 t.p.h.

REPAIRS: There is a naval repair shop in the area able to carry out normal repairs.

AIRPORT: 8 km. from the port with connections to other cities within the country.

HOLIDAYS: Confraternizacao dos Povos, January 1st; Passion Friday movable; Nossa Senhore da Penha, movable; Tiradentes, April 21st; Labour Day, May 1st; Independence of Brazil, September 7th; Our Lady of Vitoria, September 8th; All Saints, November 2nd; Proclamation of the Republic, November 15th; Christmas, December 25th.

POLICE/AMBULANCE/FIRE: Police Tel: 227-0057. Fire Tel: 228-5193.

TELEPHONES: Not available for placing on board.

BANKS: The following banks have correspondents in other countries:

Banco Frances e Brasileiro S/A: Credit Lionaise (France), Praca Presidente Vargas, 35 – Vitoria – ES. Telex: 2249.

Banco Sudameris Brasil S/A: Sudameris Paris; Comerciale Italiani; Banque de Paris et Pais Bas; Dresden Bank, Rua Treze de Maio, 48 – Vitoria – ES. Telex: 2265.

Banco Lar Brasileiro S/A: Chase Manhattan, Av. Governador Bley, 137-145. Telex: 2.2174.

Banco de Credito Nacional: Barclay's Bank – England; Av. Princesa Isabel, 53 – Vitoria – ES.

Bradesco-Banco Brasileiro de Descontos S/A (Correspondente): Av. Jeronimo Monteiro, 400 – Vitoria – ES. Telex: 132.

GENERAL:

Smoking: Smoking on tankers and OBO vessels may only take place in compartments specified and as indicated by the Master of the vessel.

Readiness: Vessels must be able to unmoor immediately in cases of emergency. Unmooring is done with the aid of tugs.

Repairs: No repairs undertaken to the vessels engines or any other repairs which may impeed emergency unmooring. Should any repairs at all be necessary these can only be done with the authority of the Terminal.

Deballasting: Discharge of dirty ballast is strictly prohibited. Failure to comply with this rule will result in fines.

Fire Fighting: The ship's fire fighting equipment must be kept in readiness at all times.

Rubbish: There is no collection service.

Deratting Service: Not available.

Stores: Specialising firms in the district, orders must be placed 24 hours in advance.

Degassing and Unloading:

(a) All ore/oil and oil/bulk/ore vessels must have their holds and tanks gas free.

(b) Ore/oil vessels carrying inert gas must have their holds inerted to receive ore cargo and be free of explosive gas and/or rendered inert.

(c) The terminal Inspector must receive, prior to loading, a certificate stating that the vessel on berthing is free of explosive gases and has been rendered/or is inert.

(d) The operation of gas freeing is not permitted when the vessel is berthed or in areas deemed to be dangerous by the Terminal authority.

SHIPMASTER'S REPORT: July 1987.

The vessel shifted from Paul Quay at Vitoria on High Water, to complete loading of pig iron at No. 1 Pier (South Side) at Tubarao.

The South Side of the Pier No. 1 has been modified for the shipment of Pig Iron, using the No. 1 loader, from pre-stacked cargo close by the pier. Front-end loaders carry wetted down cargo to the conveyor belts. There are no pre-load shaking griddles to remove the rust and residue, The ship's deck was covered in a heavy sludge, that had to be cut with a hose or shovelled up.

The No. 1 loader has no spout but could accurately place the cargo in the after, outboard and forward sides of the hold. However, for the near side, it could only drop a baffle plate in front of the cargo stream. This created a rough fan spray of cargo dropping nearly vertically close to the nearside hatch coaming. Only by rolling down the slope of the cargo could this pig iron be persuaded to the ship's side.

Thus it is not possible to load the cargo level across the hold. The loader is, however, much superior to the equipment in Vitoria for airdraft, reach and flexibility. The duty officer supervised the loading throughout to obtain the most level stow that could be managed. 3,600 tonnes were loaded in 2 hours into the one hatch.

Notes: It is understood that:-

1. There is a surcharge of U.S.$ 2.00 per tonne loaded at Tubarao, over and above the charges of Vitoria. The manufacturers, selling their goods F.O.B., refuse to pay this surcharge. They insist on shipping from Vitoria's limited berths.
2. Only 3 draft surveys are allowed by the terminal operators while the ship is alongside the pier. Thus reducing delays and the number of parcels that can be loaded.
3. The Pier is unsuitable for bringing bulldozers to the ship, and it is not possible to trim the cargo into the void spaces left by the boom. The terminal does not believe that trimming is necessary, and might not allow the time. There is a widespread disbelief that pig iron shifts.
4. At all berths in Tuburao, the swell is such that draft surveys can be greatly affected.

SHIPMASTER'S REPORT: February 1991.

Documents:

8 copies Crew List.
8 copies Passenger List.
1 copy Crew Effects Declaration.
1 copy Stores List (including Bonded Stores).
1 copy Maritime Declaration of Health.
1 copy Vaccination List.

At all Brazilian ports, wives and children have to be on Passenger List. Indian wives and children require visaes to go ashore.

Gangway: Piers No. 1 and 2 do not have shore gangways. If ship's accommodation ladder does not reach one of the dolphins at Pier No. 2, then shore boat has to be used. Call "El Cinco" on VHF Channel 16.

AUTHORITY: Companhia Vale do Rio Doce, Superintendencia do Porto-Tubarao, C.P. 1078, Vitoria, Espirito Santo, CEP 29000, Brazil. *Tel:* (027) 238-5544, 238-5945. *Telex:* (027) 2517. *FAX:* (027) 228-0612. *Contact:* Roberto W. Kenski, Port Superintendent.

AGENT: See "Vitoria".

VILA DO CONDE: 01.33 S. 48.45 W. (See Plan)

LOCATION: Situated on the right bank of the river Para, in the district known as Ponta Grossa, Municipality of Barcarena/Pa., about 40 km. from Belem. The port is an integral part of the industrial port complex built in the region of Barcarena, in conjuction with the two aluminium companies, Albras and Alunorte.

APPROACHES: The access channel to the port is the same as for the port of Belem, as far as the front of the Island of Mosqueiro from there onwards, vessels proceed to the Port of Vila do Conde via the Bay of Marajo, no restrictions of depth in this stretch. They pass to the side of the islands of Cotijuba, Arapiranga and Carnapijo.

BERTHING: Length of pier 251 m. width 45 m. Location: 01° 32′ 42″ S., 48° 45′ W.

The external berth for solid bulk cargo has a depth of 20.0 m. at low tide; the internal berth for general cargo has a depth of 18.0 m. at low tide. The quay can take vessels up to 45,000 d.w.t.

Equipment: 3 stackers and 1 mobile crane. Conveyor belt 4,500 m. long for moving alumina, copra, pitch and bauxite. Suction plant with 2 tubes and a capacity of 250 t.p.h. per tube.

One covered warehouse measuring 50 m.×150 m.

GARBAGE DISPOSAL: Not available, but in an emergency contact Port Authority.

WASTE OIL DISPOSAL: Available at Belem (50 miles away).

SEAMAN'S CLUBS: None.

SHIPMASTER'S REPORT: November 1986 (Updated 1992).

Vessel: 38,100 d.w.tonnes.

Berth: Albras Terminal.

Location: Lat. 01° 32′ S., Long. 48° 45′ W.

Pilotage: Call Salinopolis Pilots on VHF Channel 16. Pilots available 24 hours and board on arrival. River Pilot will berth vessel. Same river pilotage for Belem and Vila do Conde.

Approaches: Best approach to Salinopolis Pilot Station (Lat. 00° 31′ S., Long. 47° 22.5′ W.) is a course 167° heading for lighthouse.

Pilot will board on bearing 167° and 8 miles from the lighthouse. A strong current sets in a Westerly direction.

Radio: PPL (Belem Radio) provides reliable services.

Berthing: One berth for Alumina-in-bulk discharge. Length about 210 m. It is not possible to berth if wind greater than Force 4 as no tugs available. Whilst waiting to berth, vessel can anchor about 1 mile off the berth. There is sufficient sea room for turning around. Customs, Immigration and Health officials may board while at anchor. Berthing usually starboard side alongside, using one anchor. Jetty well fendered, but standby with fenders aft.

Discharging: Cargo work possible throughout 24 hours. Two evacuators for discharging, can reach all hatches. Total capacity 600 t.p.h. For the last 800 tons in each hold rate is 150 t.p.h.

Density: About 995 alongside berth.

Fresh Water: Available at berth.

Fuel: Available at Belem.

Watchmen: Two port watchmen compulsory, to be accommodated on board.

Repatriation: Belem Airport well connected with Recife and Rio de Janeiro, for international flights direct to Europe and U.S.A.

Time: Local time is GMT minus 3 hours. (Summer time no longer kept).

Shore Leave: No restrictions. Nearest small towns are San Francisco (20 minutes) and Vila do Conde (30 minutes) by car. Port Agent Transnav provides mini-bus. Belem in one hour from San Francisco by speed boat and two hours by regular boats.

Provisions: All fresh provisions and bonded stores available from Belem ship chandlers only, can be ordered by telephone. The transportation costs added to the provisions bill.

AUTHORITY: Companhia Docas do Para, P.O.Box 131, CEP 68447-000, Vila dos Cabanos, Barcarena, Para, Brazil. *Tel:* 091-754-1176. *FAX:* 091-744-1026. *Contact:* Mr. Kleber Menezes, General Manager (Tel: 091-754-1343).

AGENT: See "Belem".

VITORIA: 20.19 S. 40.17 W. (See Plan)

DOCUMENTS: See "General" before first port.

APPROACHES: Length of access channel 3.5 miles, width 120 m., depth 10.6 m. Maximum speed allowed 5 knots.

PILOTAGE: Compulsory. Vessel approaching port should communicate with Agent through local radio station, giving date and hour of arrival at Pilot Station so that they can arrange for a Pilot to be at the roads on arrival. Communicate direct to Pilot Association through VHF Channel 16. Pilots maintain 24 hour watch.

ANCHORAGE: The official limits of the port are:

Arc of a circle of 1 mile radius, seaward, with centre at Santa Luzia Lighthouse. There is a 8.9 m. patch which will be removed in the near future.

Notice of Readiness is accepted as at time the Master radios advising vessel has anchored, SHINC, lay time starting 3 hours afterwards (subject to C/P).

No draft limitations at anchorages.

RESTRICTIONS: All sailings are to take place on a rising tide. Vessels of up to 205 m. can enter day or night.

Vessels from 205 m. to 242 m. can enter during daylight hours, weather permitting. Vessels of this length must be assisted by 3 tugs, 2 of which must be of at least 1,000 h.p. and the other of at least 400 h.p.

For turning in the manoeuvring basin, 2 tugs are required, one to be of at least 1,000 h.p. and the other at least 400 h.p.

MAX. SIZE: 35 ft. draft at HW and 32 ft. at LW. Also see "Tankers".

HEALTH: Free Pratique obtained by radio to Agents, addressed for "Saportos Vitoria" followed by ship's name, last port, ETA, and the letters ZT (meaning "my replies to the 6 questions on the port health declaration are negative") and ZS (meaning "the sanitary condition of my ship is satisfactory"). Pratique is granted when this message is delivered by Agent to the port doctor. Also see "General" before first port.

The Agent may send a reply containing the group ZY, meaning "You have Free Pratique". In any case the time of Pratique is registered as time that the ship's cable was received by the Health Authorities. This Pratique does not allow the crew to go ashore until after Customs clearance.

Crew vaccinations are done free.

The Port Doctor usually arrives onboard some time after the visit of Authorities and it is important to have the Health Declaration ready for handing to him by a responsible person (to avoid a fine).

RADIO: Local radio station, Vitoria Radio, call sign PPT. This radio station normally used by Agents when cabling vessels.

Operating Frequencies:

2 MHz band on transmission frequencies 2086 and 2096.5 kHz and on the emergency frequency of 2182 kHz.

4 MHz band – transmission frequency 4403, 4382.2, 4403.9 and 4143.6 kHz.

8 MHz band on the transmission frequencies of 8291.1, 8780.9, 8802.6 and 8774.7 kHz and reception 8278.8 kHz and 8257 kHz.

VHF: Request Pilot on Channel 16 and 12 one hour before arrival. Upon notice it then takes Pilot 40 minutes to reach vessel.

TUGS: Tugs join vessels at anchorage. Ship's lines used. Tugs have no lines on board. The lines given to tugs should be without wire as the swell usually prevailing causes severe sudden stresses on the tow lines.

2 tugs of 1,680 h.p., (20 tons) and 4 tugs of 1,600 h.p. (22 tons).

Vessels up to 2,000 g.r.t. require 1 tug, up to 10,000 g.r.t. require 2 tugs and over 10,000 g.r.t. require 3 tugs for berthing.

Vessels up to 2,000 g.r.t. require 1 tug and vessels over 2,000 g.r.t. require 2 tugs for unberthing.

BERTHING:

Commercial Quay: No restrictions for vessels berthing at Nos. 4 and 5 Warehouse, entrance and sailing at any stage of tide. Max. drafts are:

No. 5 Warehouse – 23 ft. 08 in. (with pontoons 26 ft. 06 in. – 30 ft. 02 in.), max. length 582 ft.

No. 4 Warehouse – 23 ft. 08 in. (with pontoons 27 ft. 02 in. – 30 ft.), max. length 572 ft.

No. 3 Warehouse – 25 ft. 08 in. (with pontoons 25 ft. – 29 ft.), max. length 396 ft.

– 25 ft., max. length 297 ft.

No. 2 Warehouse – 15 ft. 04 in., max. length 402 ft.

Vessels at Nos. 2 and 3 restricted to sail on flood tide only.

Paul Quay: Mineral and other solid bulk discharge: Max.draft 35 ft. 06 in. (with pontoons 39 ft. 09 in., for discharge limited to 32 ft. at next ebb tide), max.length 853 ft., limited to entry only at beginning of ebb tide; sailing at any stage of tide. Discharge by 3 mechanical grabs, daily unloading rate 15,000 long tons.

Capuaba Quay: Length of quay: 2,145 ft. Depth: 30 ft. – 35 ft.

General cargo warehouse of 4,000 sq.m.

Open storage area of 120,000 sq.m.

Road and rail access:

Length of roadway: 10,236 ft.

Width of platform: 52 ft.

Length of bridge over River Aribiri: 413 ft.

Length of railway: 2,165 ft.

Vertical silo with capacity 30,000 tons in the first phase and 90,000 tons in the final phase, and the horizontal silo of 40,000 tons. Export cereals (soya, maize, etc.), Ro-Ro, Various products, importation of wheat and containers.

Operational speed: 2 towers of 600 t.p.h. (loading) and 300 t.p.h. (discharging).

Cells: 28 ft. diameter and 115 ft. high.

Tower elevator: 276 ft. high.

Belt transport: 2,625 ft.

Cranes: 2 electric gantry cranes 6.3 tons capacity.
2 electric gantry cranes 12.5 tons capacity.
2 electric gantry cranes 32 tons – 40 tons capacity.

Transtainer: 1 electric gantry transtainer 30.5 tons capacity.

Atalaia Quay: The Quay is an extension of the grain berth at the Capuaba Quay. Max. draft 33 ft. (35 ft. with pontoons). Max. length 364 ft. Vessels berth and sail on flood tide.

Dolphins: Max. draft 31 ft. 09 in. Max. length 394 ft.

Flexibras: Max. draft 22 ft. Max. length 426 ft.

Ro-Ro: Max. draft 30 ft. Max. length 485 ft.

Iron Ore Berths:

Paul Quay: (Also see "Shipmaster's Report" – February 1986). Max. draft 35 ft. length 524 ft. There is one loading area with a capacity of 600/900 t.p.h. depending on type of ore. Max. reach beyond quay edge, 49 ft. Width of pontoon, 14 ft.

CRANES: 13 electric gantry cranes 1.5 – 12.5 tons capacity, 2 mobile cranes 15 – 27 tons capacity and 1 heavy lift crane 200 ton capacity.
BRIDGES: Bridge under construction in position Lat. 20° 19′ S., Long. 40° 17′ W.
STEVEDORES: On ETA cable general cargo ships should include number of gangs required.
MEDICAL: No advance notice of required medical attention. Hospital facilities available.
TANKERS: *Esso and Shell Terminal:* Berthing and unberthing can take place during day or night period, provided vessels draft does not exceed 22 ft. Max. length permitted 531 ft. 5 in. with max. draft of 27 ft. Vessels must enter on ebb tide and sail at high tide.
DENSITY: Average density at Vitoria 1025, but lower during rainy season.
FRESH WATER: Fresh water available at Commercial Quay, Vitoria Iron Ore Berths, Paul Quay and Esso Terminal. Rate of delivery 30 t.p.h.

A barge with capacity of 50 tons may be adapted to carry water.
FUEL: *Esso Berth:* Bunkers can be taken here, supplied under gravity only.

Max. draft 27 ft., and length restricted to 531 ft. Due to various factors, the taking of bunkers in Vitoria is not recommended, however, fuel is available by road tanker at the Commercial Quay. Rate 10,000 litres/hour.

Esso and Petrobras can supply Bunker "C", fuel oil and diesel oil, the last two being available by truck.
CONSULS: Consular representatives available in Vitoria
REPAIRS: Deck and engine repairs available.
WATCHMEN: Compulsory at Commercial Quay in Vitoria. Not available at Vitoria Ore Terminals.
OPENING/CLOSING HATCHES: Normally done by stevedores except in cases of modern vessels using MacGregor hatch covers, when crew asked to close hatches.
CUSTOMS ALLOWANCES: Each Crew member allowed 200 cigarettes out of the bond. One bottle, wine or spirits opened, for each crew member.
REPATRIATION: There are flights daily from Rio de Janeiro to Vitoria.
AIRPORT: Airport located 8 km. from centre of town and is served by daily flights to principle cities in Brazil.
TIME: Local time GMT minus 3 hours.
HOLIDAYS: January 1st; April 21st; May 1st; September 7th and 8th; October 12th; November 2nd and 15th; December 25th; Good Friday; Nossa Senhora da Penha and Corpus Christi. Only holiday when no stevedore work is possible is Good Friday; exception made to iron-ore loading.
POLICE/AMBULANCE/FIRE: Police Tel: 190. Maritime Police Tel: 223-5000. Radio Patrol Tel: 227-2111. Ambulance Tel: 222-4646. Emergency Hospital Tel: 223-0203. Fire Brigade Tel: 193.
TELEPHONES: No facilities for placing telephones on board.
IDENTIFICATION CARDS: Required with photographs to enable officers and crew members to go ashore. Agents supply forms.

SHIPMASTER'S REPORT: February 1986.
Vessel: 40,000 d.w.t. Length 625 ft. 5-hold bulk carrier.
Berth: Paul Quay.
Cargo: Loading pig iron.

The following information was obtained during loading at Vitoria.

Question: What is the draft alongside the loading berth at low tide?
Answer: 32 ft. brackish water. This is not true all the way along the berth, as for a length of about 50 m., by way of where No.2 hold was, there is a mound of mud, which is at a depth of 26 ft. at LW. This mud is very soft.
Question: What is the minimum air draft?
Answer: 39 ft. This also can be more as the loading arm can be raised a further 6 ft., but of course then will not over reach the centre of the hold. There is no need to have ballast in No. 3 hold.
Question: What is the loading rate per hour?
Answer: If the cargo is available and if the machinery does not break down 800 t.p.h. is possible.
Question: What is the water density at low and high tide?
Answer: Low tide 1010, high tide 1024.
Question: How is the quantity of the cargo determined?
Answer: The cargo arrives by train loads and the weight is known but there is no shore scale at the loading equipment and the weight is determined by draft survey.
Question: What is the storage factor of the pig iron?
Answer: 10.80 cu.ft. per long ton.
Question: Which side alongside?
Answer: Always starboard side alongside and ship's gangway used.
Question: Availabilty of fresh water?
Answer: Yes, available at the berth. The vessel must use its own hoses. Unlimited amount.
Question: When are draft surveys taken?
Answer: By Charterer's Surveyors, prior commencement of loading and on completion of loading. The Charterer's Surveyors must be advised prior to commencement of loading of the quantity of bunkers and fresh water that the vessel intends to load. Draft survey determines the Bill of Lading.
Question: What are the working hours?
Answer: 0600 – 2200 hrs. each and every day.
Question: How many loaders?
Answer: One which moves on rails to which ever hold is to be loaded into.
Details of the loader's dimensions.
Height of loader arm from the jetty, 9.25 m.
Height from the water level at LW to the quay 3.10 m. (Neap tides).
Length of loader outreach 20.7 m. However, distance from loader on its rails to edge of the quay 6.25 m. and further deduction of 3.25 m. for thickness of fender.
Question: What are the facilities for bunkering?
Answer: All bunkers are supplied in Brazil by Petrobras and at Victoria are supplied when the vessel is alongside and are ex-barge. Bunkering can be carried out during loading.

Additional Information: Soundings taken on the starboard side of the vessel indicate an area of mud by way of No. 2 hold.

The vessel moors starboard side alongside and two floating pontoons are placed between the ship and the jetty. These pontoons are 5.0 m. long and 3.5 m. wide. As already stated there is 26 ft. of water only at low tide at No. 2 hold. Therefore once the loading has reached almost that stage, for the vessel to remain afloat, it is neccessary to move the vessel further from the quay forward. The floating pontoons are placed one forward and one aft. If the vessel is hove in aft using the breast lines and the head lines slackened then the bow will come off the quay and an additional floating fender can be placed forward thus the vessel will lie against 2 fenders. There is then enough water to load to 9.75 m. forward at low tide.

Local information says that some ships just ignore the mud (it is very soft) and just load to 9.5 m. without placing the additional fender in place. Once the vessel is lying alongside 2 fenders forward the loader arm can still deposit the cargo into No. 2 hold in the centre of the hold but for No. 1 hold this would not be possible. Therefore, if possible, ensure that the cargo to be loaded into No. 1 hold is completed before moving the vessel off the quay and placing the second fender.

SHIPMASTER'S REPORT: July 1987.

Vessel reported Time, Latitude and Longitude of anchoring position to Vitoria Pilots, Vitoria Port Control and Vitoria Radio (PPV). A telegram was sent to the Agent's telex number via PPR, giving some details and Notice of Readiness. Notice of Readiness was accepted next morning after an evening arrival. Initial advice was a wait of 10 days, and an airdraft of 11.5 m. at high water.

Vessel was ordered to Atalia Quay, by primary Charterers/Exporters after 6 days. This berth found to have 8.55 m. when using 2.5 m. stand-off fenders and only 7.47 m. on 1.0 m. tyres. The stern overhung by 35 m. – 60 m. and a shore gangway was used amidships.

The berth was originally built for iron ore shipment, with a row of bins along the cliff face. 3 loaders, the middle out of order, have a range of about 110 m. travel. The loader couples to the door of the bin, and cannot move while cargo is running. The boom has limited slew and could only reach 10.8 m. on to the ship when using the stand-off fenders (12.3 m. on the rubber tyres). The spout is manually guyed by ropes, which are then tied for the run of the bin. 4 wooden gratings were put on the tank top with a fifth grating on their junction, to break the fall of the first pieces of pig iron.

The pig iron piled up to a height of 7 m. without covering the whole tank top, despite all efforts with the spout, and listed readily towards the quay.

This vessel (45,000 d.w.t.) berthed with No. 3 hold ballasted to obtain the airdraft, and was obliged to load Holds No. 1 and No. 5 alternately while deballasting 10,500 tonnes. This created very high bending moments even on the harbour condition figure. The ship was warped some 25 m. up and down the quay in order for the loaders to reach the hatches.

The vessel finally ceased loading with a list towards the quay and waited for a bulldozer to be provided to trim the cargo. This is an extra charge, fiercely resisted by the shippers, and causes delay. While waiting, the list increased by 1° and pieces of pig iron would break away and roll down the pile dislodging other pieces on the way until some 5 to 8 pieces would hit the shell plating with a loud clang.

The tractor was used for 24 hours, concurrently with loading in other holds, to finish on the rising tide.

All parcels of cargo were measured by Draft Surveyor, with some 5 surveys for the 26,000 tonnes shipped. A claim was made for dead-freight on the shortage.

The vessel returned to sea anchorage to await the secondary Charterer/Exporter's cargo. After a total delay of 8 days the vessel was ordered to Paul Quay, said to be 160 m. long. When berthed on 3.6 m. fenders a depth of 10.0 m. was found at zero tide. The stern overhung by 35 m., and access was by pilot gangway used with small shore brow. The after lines were all abreast on to hooks set into the ground.

The single travelling loader is fed by conveyor belt, and can move while the cargo is running. The boom can also be slewed and luffed, while the spout is operated by hydraulic ram, maximum reach on board the vessel is 11.0 m. The operating range along the quay is about 120 m. and it was necessary to warp ship for No. 5 hold.

The cargo was wetted in the wagon and then shaken on a tray before loading. The pig iron piled up to a height of 5 m. and 6 m. above its sides, in a partly loaded hold. The shipper was required to hire another bulldozer to level out the pile, at a stated cost of U.S.$ 1,100 for 24 hours. The bulldozer also helped to list the ship away from the quay.

The loader is prone to breakdowns, and schedules may slip. The main stockyard for pig iron is said to be 20 km. away, making difficulties in positioning.

Final loading is done on a rising tide to a draft of 10.66 m. All measurements by draft surveys with multiple surveyors frequently in disagreement. Vessel sailed one hour before high water.

The design of both berths is said to be for vessels of 28 m. maximum beam, so it is very frustrating for vessels of 31.5 m. beam. The Inspection party for Port Clearance totalled 7 persons.
Radio: Local radio station now PPV, working only on VHF, with satellite relay further North.
Tugs: Require 2 ship's lines from same fairlead, exactly even, when near Penedo. Tugs sometimes use their own very heavy rope for alongside work.
Bridge: Span over navigation channel in position, said to be 55 m. clearance.
Density: Ranges from 1006 to 1026, according to season, position and tide. The average range for finishing loading 1018 to 1023. Pig iron cargoes require very many draft surveys.

Trimming: Bulldozers available for trimming pig iron inboard at extra cost.

Swinging Circle: Off Cupuaba Quay, said to be limited to 30 ft., with a 6.7 m. rock on the North side.

Berths: South side from West to East:

Tanker pier with dolphins.

Paul Quay – For export of pig iron. 10.0 m. depth at zero tide on pontoon fenders. Vessels load to 10.66 m. on rising tide to sail immediately. Airdraft said to 11.5 m. One loader with 11.0 m. reach inboard.

Usiminas – For import of coal cargoes. 3 grabbing cranes, depth said to be 10.6 m. on pontoon fenders.

Alcohol & Molasses Dolphins – largely unused.

Atalaia Quay – For export of pig iron, 8.55 m. depth at zero tide on metal fenders 2.5 m. from quay. Airdraft 11.5 m. 3 loaders, (one out of order) reach 10.8 m. Vessels load to 9.14 m. on rising tide to sail immediately.

Capuaba Quay – Extension of the grain berth at Atalaia Quay. Silo plant at Western end, open quay with Ro-Ro berth at Eastern end. Ro-Ro vessels berth against dolphins and cliff face.

SHIPMASTER'S REPORT: June 1988.

Documents: We received telex from Agent prior to arrival requesting the following documents on arrival:

13 copies Crew List.

3 copies Personal Effects List.

3 copies Bonded Stores List.

1 copy Health Declaration.

1 copy Vaccination List.

3 copies Spares List (Deck, Engine Room, nautical spares, e.g. Main Gyro – 1 – no spare parts; Gyro Repeaters – 3 – no spare parts; Radar – 2 – no spare parts).

Bridge: New bridge will soon be open to traffic – verticle clearance 55 m.

Agent's Advice: Prior to arrival and on sailing advise "Concontramar Rio de Janeiro" the following: Vessel's name, Nationality, Call Sign, Port of Origin, Type of Vessel, Location and ETD.

Do not leave garbage drums overboard.

Do not leave Pilot Ladder over side.

Keep Brazilian flag in good order – request new flag if necessary.

Beware of thieves boarding at anchorage and on the offside when alongside berth.

Contact Pilot Station on VHF Channel 16 on arrival to guarantee berthing position.

AUTHORITY: Companhia Docas do Espirito Santo – CODESA, Av. Getulio Vargas No. 556, Vitoria, Espirito Santo, CEP 29000. *Tel:* (027) 222-1311. *Telex:* (027) 2118. *FAX:* (027) 222-7360.

Contact: Dirceu Cardoso, Director-Presidente.

AGENT: Wilson Sons Agencia Maritima Ltda., Avenida Princesa Isabel 599, 9th Floor, 29010-361 Vitoria ES. P.O. Box 222. Tel: (027) 223-9422 (After hours: (027) 225-6182, (027) 227-4947). Telex: (27) 2151/3054 WSON BR. Fax: (027) 222-1297. Cables: Anglicus.

NOTES

Please also advise Shipping Guides Ltd.

Brunei Darussalam

LUMUT: 04.43 N. 114.26 E. (See Plan)

PORT LIMITS: Lumut is included in the Government Kuala Belait Port area. The boundary is parallel to Latitude 4° 47' N.

DOCUMENTS:

6 copies Crew List.
2 copies International Maritime Declaration of Health.
2 copies Vaccination List.
1 copy Last Port Clearance.
2 copies Cargo Declaration.
2 copies Crews Effects Declaration.
2 copies Passenger List.
2 copies Ship's Certificates.
2 copies Ship's Stores Declaration.

The Agent will board the vessel either at the anchorage or in the berth, and arranges Customs and Immigration Clearance. Port Authorities do not normally board vessels at Lumut, but may do so. Cargo documentation is handled by the BLNG Berthing Master.

APPROACHES: Caution must be taken when approaching Brunei Coastal waters because of the numerous number of platforms and drilling rigs in the oil fields. The area is serviced by numerous support craft, and barges under tow may be encountered. Latest Notices to Mariners should be consulted for details of Safety Zones.

PILOTAGE: Pilots are provided by Brunei Shell Petroleum Co.Sdn.Bhd. at the request of BLNG. The Pilot will board the vessel 2 miles North of the Terminal from a 20 m. pilot and mooring line handling launch. Masters must ensure that the pilot access is rigged as per current regulations, and a good lee is provided. A clean heaving line is necessary. The pilot launch will work on VHF Channel 71, call sign "Lumut Pilot".

The Pilot remains on board the vessel during the time it is moored and is the BLNG Berthing Master and representative on board.

ANCHORAGE: The anchorage area (Anchorage "C") is for vessels calling at Lumut and is located 3.0 miles North of the berth. The area is contained within the following limits:

Latitudes: 04° 45' N. and 04° 46' N.
Longitudes: 114° 26' E. and 114° 28' E.

RESTRICTIONS/MAX. SIZE: Lumut currently has 2 berths for LNG loading. The original berth may be used for the loading of dedicated Brunei Shell tankers with a stern loading facility, and is not available to vessels without this stern loading arrangement. Draft restrictions apply in this berth, which are advised to the vessels prior to arrival.

The new berth is of the conventional side loading design.

Maximum arrival draft	10.0 m.
Maximum arrival displacement	94,700 tonnes
Maximum departure draft	11.3 m.
Maximum length overall	290 m.
Minimum length overall	260 m.
Minimum length parallel body (centre at manifold)	90 m.
Minimum manifold elevation above still water	16.0 m.
Maximum manifold elevation above still water	23.6 m.
Maximum manifold offset from midships	10.0 m.

Detailed design restrictions of vessel's mooring, manifold and cargo equipment apply. All prospective vessel's details must be vetted by BLNG and BSP Marine Department before vessel may be accepted to the side loading berth at Lumut.

Lumut is an open sea berth without breakwaters of any kind. Therefore sea conditions may restrict the berthing and mooring of vessels in both berths. Conditions exceeding 25 knots wind and 2.0 m. seas will make berthing unlikely.

HEALTH: A detailed shipping report has to be completed for the Brunei Government Marine Department. The Agent will provide the forms for completion.

If the vessel comes from an infected port or its state of health is suspect, the Medical Officer may board in order to inspect crew and relevant Medical Certificates.

RADIO: *Arrival Advice:* Confirm ETA at least 72 hours in advance, also declaring Bill of Health and estimated cooldown time required. Communications with Brunei Liquified Natural Gas (BLNG) LPS/1/4 and Agents (Jasra Harrison) is by Telex via Inmarsat. 72 hours and 24 hours from Lumut the Master should advise his ETA to BLNG and Agents. In addition, Brunei Shell Radio (Call Sign VSL–1) maintains a listening watch for LNG carriers at 0945, 1345 and 1745 local time (GMT + 8 hours) daily, on 8354 – 8374 kHz, transmitting on 8558 kHz.

Vessels should contact "Lumut Control" on Channel 71 when within VHF range and confirm ETA.

VHF: A VHF station at Seria (call sign "Brunei Shell Radio – VSL-1") maintains a continuous watch on Channel 16 with Channel 19 as a working channel.

A VHF Station (Port Control) at Lumut (call sign "Lumut Control") maintains a watch from 12 hours before vessel's ETA on Channel 71. Channel 71 is normally used as a working channel, Channel 73 as alternative.

TUGS: Berthing at both berths is with the aid of 2×39 m. long (4,800 h.p.) tractor tugs. For larger vessels on the side berth (up to 135,000 cu.m.), 3 tugs will be utilised. Tugs will utilise tug's tow lines and connect to side shell bitts when fitted and weather conditions allow, or tow-off the deck in other cases.

One tug performs the function of emergency stand-by with the other available at longer notice during the period the vessel is alongside. The tugs are equipped with half-FF1 equipment with additionally 2 tonnes of dry powder for LNG fires.

BERTHING: The stern loading berth is restricted to Brunei Shell Tankers uniquely equipped to load from a stern loading crane. It is not suitable for other vessels.

The side loading berth (See "Plan") is designed for LNG carriers from 75,000 cu.m. up to 135,000 cu.m. with loading connections close to the midships point. The berth is at the end of a 450 m. long Westerly spur from the original 4.5 km. long jetty extending from the shore. A dredged berth pocket of 13.2 m. below C.D. allows vessels to load to a maximum draft of 11.3 m. with 1.9 m. under-keel clearance (this is subject to manifold height and loading arm restrictions).

The vessel will generally follow a Westerly track (See "Plan"), and the final approach will be from the West with tugs connected on the port side. The vessel is turned to the North and moves stern first into the berth. Moorings are run by two mooring launches.

The vessel lies alongside 4 low-friction face fenders and moors with 4 breast lines and 2 springs for smaller vessels, and 4 breast lines and 3 springs for larger vessels, fore and aft. Moorings must be minimum 44 mm. diameter wires with 11 m. nylon pendants attached by Mandel shackles or similar. All wires must be fitted to self-stow winches with minimum heave capability of 20 tonnes on the springs and 30 tonnes on the breasts. A mooring load monitoring system is incorporated in the hooks ashore, and minimum tensions on moorings must be maintained throughout the vessel's stay in the berth.

The gangway is lowered temporarily for access by BLNG personnel for connecting and disconnecting the loading arms, and is approximately 14.0 m. aft of the vapour manifold connection.

CARGO HANDLING: The side loading berth has 2×16 in. ASA liquid loading arms and one vapour return in the liquid-vapour-liquid configuration. Vessel's manifolds must conform to OCIMF and have a maximum flat face flange thickness of 39.8 mm. to accept the loading arm hydraulic couplers.

Emergency shut-down systems are effected by a fibre optic link between ship and shore, based on the Japanese Furukawa system.

Liaison with the shore is via the Berthing Master on board, utilising the telephone link via the fibre optics with VHF Channel 71 as back-up.

Vessels must have a compressor capacity of minimum 20,000 cu.m./hr. for vapour return to shore.

Maximum loading rate is 5,400 cu.m./hr.

MEDICAL: Emergency treatment only can be arranged via the Agent. There are 2 Government hospitals in the country, and one private hospital for Shell employees. All serious cases are handled by the hospital in Bandar Seri Begawan (the capital).

DENSITY: 1020 – 1025.

FRESH WATER: Not available.

FUEL: Not available. Bunkers can be obtained at Lutong (Miri).

REPAIRS: No repair facilities available.

TIME: Local time is GMT plus 8 hours.

SHORE LEAVE: Not permitted.

GENERAL: *Special Regulations:* The Brunei national flag should be flown during hours of daylight.

The ship's main radio transmitters must not be used whilst the vessel is moored at Lumut.

Immobilisation of Engines: Vessels are not permitted to immobilise main engines whilst at the berth.

Stores and Laundry Facilities: Not available.

Tank Cleaning and Dirty Ballast Facilities: Not available.

AGENCY: Agent for all Shell Owned and Chartered vessels calling at Lumut is Jasra Harrison, Jalan Sungei, P.O.Box 16, Kuala Belait, Brunei. Telex: BU 3315. Cable Address: Crosfield Kualabelait.

AUTHORITY: Brunei Shell Petroleum Company Sdn. Bhd., Seria 7082, Negara Brunei Darussalam. *Tel:* (673) (03) 78443. *Telex:* BU 3133. *Cables:* Brunshell Seria. *FAX:* 78428. *Contact:* SMR/2, Head of Marine Operations.

MUARA PORT: 05.01 N. 115.04 E. (See Plan)

PORT LIMITS: The sea area within Lat. 4° 58' N. and 5° 05' N. and Long. 115° 03' E. and 115° 10' E.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Dangerous Goods Lists.
2 Manifests (plus 1 additional copy for Port Department).
1 Health Document.

PILOTAGE: Pilotage and tug services are under the jurisdiction of the Marine Department. Application for Pilot 24 hours in advance by telegraph through ship's Agents. Pilot boat awaits at Beacon No. 1, Lat. 5° 03' 39.9" N., Long. 115° 06' 06.3" E. Pilot boat is painted white. If on arrival No. 1 Beacon pilot boat not visible then ships should call "Muara Harbour" on VHF Channel 16. Pilotage compulsory and available from 0700 hrs. to 2200 hrs. Vessel should anchor in vicinity of No. 1 Beacon when awaiting Pilot.

ANCHORAGES: Safe anchorages available vicinity No. 1 Beacon, S.E. of Tanjong Sapo Light (Lat. 4° 59.7' N., Long. 115° 07.6' E.) and in Muara Harbour 4 cables S.S.W. of the wharf.

RESTRICTIONS/MAX. SIZE: Vessels with max. draft of 8.5 m. and maximum length overall (LOA) of 180 m. may enter the port between 0700 hrs. to 2200 hrs. without restriction.

Vessels exceeding abovementioned dimensions are to apply in writing, through their Agent, to the Director of Marine for permission to enter well in advance to their arrival.

Minimum depth in dredged channel is 10.0 m. ACD.

VHF: Ports Department VHF Channels 11, 12, 13, 14 and 16 in operation Mondays to Thursdays and Saturdays from 0745 to 1630 hrs. local time. Call sign "Muara Port".

RADAR: No port radar service available.

TUGS: Two Government owned tugs with firefighting capabilities are available at Muara Port. Normally one tug is used to assist vessels in berthing/unberthing. However, if vessel requires two tugs, then at least 24 hours notice *must* be given to the Marine Department to ensure availability. Tugs are of 1,650 b.h.p. and 1,248 b.h.p. each.
BERTHING: The main commercial berth is 611 m. in length with a maximum draft of 10.0 m. An additional berth of 87 m. with a maximum draft of 5.2 m. is also available for smaller craft. Mobile shore cranes available upto 35 tonnes capacity.
STEVEDORES: Provided by ship's Agents. Major commodities are general cargo and cement, oil well cement, tubulars, machinery and vehicles.
MEDICAL: Hospital available 16 miles from port. Port Health Clinic outside port main gate.
DENSITY: Salt water.
FRESH WATER: Readily available at wharf, cost Brunei $4 per 1,000 gallons.
FUEL: High speed diesel available in small quantities.
CONSULS: There are several Consulates, Embassies and High Commissions in Bandar Seri Begawan.
REPAIRS: Minor deck and engine room repairs possible.
DRY DOCKS: None.
SURVEYORS: Lloyd's and American Bureau are represented.
GANGWAY/DECK WATCHMEN: Not compulsory but available through Agents on request.
HATCHES: Opening and closing by crew or stevedores at ship's option.
CARGO GEAR: Loading/discharging normally effected by ship's gear but 30 tonne capacity mobile crane available from Ports Department on request. Slings, nets, tarpaulins, 30 ton capacity low loader and container platform trailer available from Ports Department.
REPATRIATION: Shipping Office is located at the Marine Department, Serasa, Muara, and branch offices are located at the Port's Department Building in Muara and the Customs' Building in Bandar Seri Begawan.
AIRPORT: International airport 12 miles from port. Regular services to Singapore, Hong Kong, Manila, Kuala Lumpur, Bangkok, Sydney and direct flights once weekly to United Kingdom.
TIME: Local time is GMT plus 8 hours. No alterations in clocks throughout year.
HOLIDAYS: Hari Raya Puasa, Hari Raya Haji, Chinese New Year (all dates moveable) Christmas Day. Work can usually be arranged on all holidays with exception of Chinese New Year when direct delivery to vehicles only available.
POLICE/AMBULANCE/FIRE: Police 772333. Ambulance 222366. Fire 772255.
EMERGENCY CO-ORDINATION CENTRE: National Search and Rescue Co-Ordination Centre is located at the Department of Civil Aviation, Berakas. Tel: 332600/01/02, 330142, 330454, 330896.
TELEPHONES: Available onboard with prior arrangement with Telecoms Dept.
SERVICES: Diver available, cold store facilities available.
BANKS: Several commercial banks operate in Bandar Seri Begawan. Additionally, Standard Chartered Bank and Hongkong Bank operate branches in Muara Town.
STORING: See "Prelims".
1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Ports transit sheds and warehouses, or depending on nature, quantity and weight, may be stored outside in the open yard. Dangerous goods are not to be stored in warehouse except with Customs approval.

Export cargo to have Customs Declaration approved before storing onboard ship.

6. Yes, but requires supervision.

SHORE LEAVE/IDENTIFICATION CARDS: After clearance inwards Crew members are allowed ashore if in possession of discharge book, identity card or passport.
GARBAGE DISPOSAL: Truck available at Muara Port at cost of B$ 40 per trip.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Brunei Dollar (B$). U.S.$1.00 = B$1.39 (March 1996).
AUTHORITY: *Land Side:* Director of Ports, Ports Department, Muara Port 4020, Brunei Darussalam. *Tel:* 02-770222/23/24/25. *Telex:* BU 2748. *Cables:* Ports Brunei. *FAX:* 02-770283.

Marine Side: Director of Marine, Marine Department, Muara 4053, Brunei Darussalam. *Tel:* 02-771347 to 771356. *Telex:* BU 2650. *FAX:* 02-771357.

SERIA (Kuala Belait): 04.43 N. 114.19 E. (See Plan)

LOCATION: Seria is an open sea berth port. At present 2 SBM's are in operation located approximately 5.4 miles off the coast in the following positions:

SBM 1: Lat. 4° 42′ 50″ N. Long. 114° 18′ 54″ E.
SBM 2: Lat. 4° 42′ 50″ N. Long. 114° 19′ 44″ E.

Both SBMs are operated by Brunei Shell Petroleum Co. Sdn. Bhd.
WARNING: Masters are requested to give the numerous drilling structures in this area a wide berth.

A safe approach can be made from 5° 02′ N., 114° 10′E. on a course of 160° but caution remains necessary.

Waiting tankers should only anchor in "Bravo" Anchorage. See BA. Chart No. 2109.
FLAGS: The Brunei National Flag should be flown during hours of daylight.

DOCUMENTS: *Papers Required On Arrival:*
6 copies of the Crew List. If the vessel is stemmed for Japan, 6 extra copies are required from non Japanese flag vessels.
2 copies of International Maritime Declaration of Health.
2 Vaccination Lists on the first visit and subsequently an updated List.
1 copy of Last Port Clearance.
3 copies of Ship's Stores Declaration.
3 copies Crews Effects Declaration.
2 copies Cargo Declaration.
3 copies Passenger List (if applicable).
2 copies of all Ship's Certificates (Certificate of Registry, Load Line Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Derat Certificate and Civil Liability Certificate).

The boarding clerk will supply and prepare the following documents for the Master's appraisal and signature:

Marine Shipping Report. The form will be completed by the boarding clerk who will need to see the ship's papers.

Quarantine Entry Declaration Form.

Inward Manifest.

Departure: Bills of Lading will be completed by the Berthing Master before the vessel sails. Generally 2 – 3 hours after completion of loading.

No advance Outward Port Clearance for vessels at the SBM or anchorage will be issued prior to the receipt of Inward Port Clearance and copies of ship's Certificates by the Marine/Customs Departments (This requirement may be waived depending upon vessel's arrival time, etc.).
APPROACHES: *Approaches to the Berth and Anchorages:*

There are many oil field production structures off the coasts of Sarawak, Brunei and Sabah coupled with a large amount of exploration and drilling activity. These field structures both surface and subsurface pose a hazard to navigation and Masters are advised that they should give all these activities and fields a good wide berth.

Safety zones have been declared around the major oilfields. No vessel may pass through or approach within 500 m. of single platforms.
PILOTAGE: The Berthing Master and Mooring Assistant board incoming vessels 2 miles North of the SBM. The pilot launch leaves from the Kuala Belait river mouth. Low tides may restrict the launch in crossing the river bar for up to 6 hours.

Masters are requested to provide a good lee for the launch to facilitate the boarding and lifting of radio sets and mooring equipment.

The pilot ladder must be in good condition, fitted with spreaders, be properly rigged and secured, adequately lit at night and well clear of the ship's propellers. When the accommodation ladder is used it must be rigged well clear of the water with a pilot ladder below to gain access to the main ladder.

Crew members must be in attendance at the ladder head where a lifebuoy and clean heaving line should be sited.

The Pilot should be met at the ladder and will check the oxygen content of the ship's inert gas in the cargo tanks on boarding. This must be less than 8% or the vessel will be delayed berthing.

The Berthing Master and Mooring Assistant remain on board throughout and will require accommodation during the vessels stay. A Cargo Surveyor may also remain on board.
ANCHORAGE: A tanker anchorage is located approximately 3 miles North of the SBM berths in the area contained within the following limits:

Lat. 4° 45′ N. and 4° 47′ N.
Long. 114° 17′ E. and 114° 19′ E.

Tankers should not anchor in any other locations due to the presence of many submarine pipelines throughout the oil field and adjoining areas.
RESTRICTIONS: No port restrictions.
MAX. SIZE: SBM 1: 320,000 tonnes d.w.t., max. draft: 17.40 m.
Length between bow and manifold max. 168 m.
SBM 2: 200,000 tonnes d.w.t., max draft: 15.85 m.
Length between bow and manifold max. 168 m.

An allowance of 1.5 m. may also be made for 'Loading over the tide', at the discretion of the Pilot and Terminal and dependent upon prevailing weather conditions.
HEALTH: *Customs and Health Requirements:*

A detailed shipping report has to be completed for the Government Marine Department. Agent will provide the forms for completion.

If the vessel comes from an infected port or its state of health is suspect, the Medical Officer may board in order to inspect the crew and relevant International Medical Certificates. Customs Officers do not normally board incoming vessels but may do so with the Agent.
RADIO: *Information Required Prior to Arrival:*

Radio Advice: Confirm ETA at least 48 hours in advance also declaring state of Health, Master's name, number of crew, destination, advice of C.L.C./TOVALOP Certificate and quantity of cargo required.

This data is used to obtain the vessel's "Seria Port Clearance," in advance.

W/T Traffic should be passed through Singapore Radio, and addressed to your Agent; vessels using the service of Jasra Harrisons can contact them directly by telex or facsimile.

The Agent will pass ETA's to the BSP Marine Department and to Seria Oil Terminal.

Vessels making their first call at Seria will receive a message from the Agent describing the location of the anchorage and information on pilotage, radio stations and papers required on arrival.

When within range, vessels are requested to make direct W/T contact with Brunei Shell Petroleum Company (Call sign "VSL-1" or Brunei Shell Radio) at the following local times (GMT + 8 hrs.) 0945 hrs. to 1030 hrs.; 1345 hrs. to 1430 hrs.; and 1745 hrs. to 1830 hrs.

BSP will transmit on 8558 kHz, call sign Brunei Shell Radio, and listen out on 8354 to 8374 kHz. When contact is made on this frequency a standard information cable describing necessary derrick and mooring arrangements will be transmitted to the ship by BRUNSHELL.

Telex messages may be passed to Brunei Shell Petroleum Co. on BU3313, attention SMR/2, OPD/112, FTR/2.

The Jasra Harrison's launch is equipped with VHF radio and a single side band radio transmitting on 4400 kHz and 5923.5 kHz.

The ship's radio station must not be used whilst the tanker is moored to the SBM.

Agent: Agent boards arriving vessels from 0600 hrs. to about 2100 hrs.

VHF: A continuous watch on Channel 16 is maintained both by Brunei Shell Radio and by Seria Terminal. Vessels should contact either of these stations as soon as practicable, passing her latest ETA at Seria Pilot Station. While berthing, Channel 13 is normally used to communicate between bridge, mooring boat and forecastle.

Brunei Shell Radio uses Channel 19 as working Channel and can link the ship with the Agents through the Government telephone system.

TUGS: Available in emergency only.

BERTHING: Berthing and unberthing is carried out night and day.

Mooring can usually be safely carried out in sea/swell heights of between 2.0 m. and 2.5 m., operations are normally suspended if heights are in excess of 2.5 m. The operation however is governed by the mooring boat performance in the sea conditions prevailing at the time.

Wind speeds in excess of 20 knots make it difficult to prevent the "bow falling off" when on final approach. Berthing operations are as a rule suspended when wind speeds exceed 25 knots. Again this is governed by the mooring boat performance and the ship's handling characteristics.

Tanker Moorings: Tanker moorings from the buoys comprise of two 400 mm. circumference two-in-one braided nylon endless grommet type mooring ropes complete with floating sleeves. They have a soft eye to each end, both ropes being 45.7 m. long and have a breaking load of 340 tons when new. Fairlead chafing chains with triangle connecting plates are attached to the tanker end of the moorings. Each chain is 7.6 m.× 76 mm. diameter stud link chain constructed of special quality U2 grade steel. Incorporated within the chain is a further connecting triangle plate for larger tankers.

A 254 mm. circumference × 12 m. polypropylene pick-up rope is shackled to the end connecting triangle plate, the free eye of the rope being buoyed off for easy recovery by the mooring launch.

The SBM end of the 400 mm. circumference nylon mooring ropes are pinned into a twin triangle plate which in turn is secured to lugs on the revolving turntable by short lengths of chain and connecting shackles.

Only vessels with mooring arrangements as recommended by the O.C.I.M.F. Standards for Equipment Employed in the Mooring of Ships at Single Point Moorings will be accepted at Seria. Vessels not so equipped will not be berthed at the S.B.M.

Vessels above 150,000 tonnes S.D.W.T. are moored with both mooring ropes using 2 chain stoppers. Should a visiting tanker have only one bow stopper (i.e. 150,000 tonnes or less) only one mooring line is secured and the other is hung-off.

Mooring Equipment: Two portable UHF radios for ship/shore communications during loading are passed to the tanker when the Berthing Master boards approximately 2 miles North of the buoy.

A ship's mooring rope messenger of at least 254 mm. circumference should be prepared ready on the forecastle before the vessel's arrival. This will be shackled to the SBM pick-up rope by the mooring boat.

LOADING: *Load-on-Top:* Unless the vessel has other instructions then the "Load-on-Top" system applies.

Dirty ballast and slops *cannot* be accepted ashore.

Position of Hose Connections: Starboard side amidships.

Hose derrick should be rigged to lift at least 10 tonnes and the vessel to have the appropriate reducers fitted to take standard 400 mm. (16 in.) manifold hoses 150 ASA. Hose connection and disconnection by ship's crew.

Pipelines and Floating Hose Strings

Pipelines: 2 submarine sea lines are laid from the terminal to the buoys. A 800 mm. line, 10,180 m. long to SBM No. 1 and a 600 mm. line 9,845 m. long to SBM No. 2.

A 600 mm. crossover line 1,676 m. long joins the "T" piece connection situated 1,250 m. from SBM No. 1 PLEM to the Western PLEM valve on No. 2 SBM. All lines are concrete coated and cathodically protected with aluminium anodes.

The main sea lines terminate at "T" piece manifold PLEMs. 23 m. and 20 m. from the vertical axis of the buoy on SBM No. 1 and No. 2 respectively.

Two underwater hose strings in "Lazy S" configuration connect the manifolds to the underbuoy flanges. No buoyancy tanks are fitted on these strings.

Connected to the SBM-1 are 2×400 mm. hose strings, 245 m. long, and to SBM-2 1×400 mm. hose string, 245 m. long.

Floating hose strings are electrically continuous except the tail end hoses, which isolate the cathodic protection of the SBM from the tanker.

Either floating hose string can be isolated to allow loading through 1 hose, by closing the butterfly valves sited on the buoy turntable.

CARGO PARTICULARS: Crude Oil and Condensate only.

Approximate loading temperature is 87°F.

Approximate API:

SLEB (Seria Light Export Blend)	36	CE (Champion Export)	25
BL (Brunei Light)	40	BC (Brunei Condensate)	65

Crude oil is loaded at SBM-1 and Condensate at SBM-2.

Approximate loading rate at SBM-1 is 4,300 cu.m.p.h. and at SBM-2 (Condensate only) it is 2,500 cu.m.p.h.

Ships are required to load cargo as rapidly as possible in accordance with the terms in their Charter Parties. They are expected to load as fast as Seria Terminal can supply or they can safely receive. The question of how fast a ship may load is the responsibility of the Master having regard to his Owner's instructions and Charter Party and experience of his crew.

Loading is controlled by portable UHF radio sets taken on board with the Berthing Master. Incorporated in these sets is an emergency shut down button which when activated stops all the shore pumps. During loading, four hourly figure comparison checks in metric tons are required to ensure no subsea leaks develop undetected.

DIRTY BALLAST: There are no tank cleaning or dirty ballast facilities. All ships must arrive with clean ballast, pumps and lines. Pollution in any form is strictly prohibited.

MEDICAL: In cases where medical attention is required then the Agent will arrange for the patient to be taken by launch and car to the hospital.

The patient must be taken to Kuala Belait (1 hour 10 minutes by launch) where there is a possibility of delays due to tidal and weather restrictions. Unless absolutely necessary this option is not recommended.

In cases of emergency involving serious injury or illness the Berthing Master or Brunei Shell Radio can initiate Brunei Shell Petroleum Company "Medivac Procedure". Representation of the patients, remains with the Agent, who should be informed to immediately contact customs and immigration authorities.

DENSITY: Varies 1020 – 1025 depending on season and rainfall.

FRESH WATER: Not available.

FUEL: Bunkers are not available at Seria but may be obtained at Miri (Sarawak) with 3 days prior notice.

REPAIRS: Small emergency repairs to Shell owned and chartered vessels only may be undertaken at the Brunei Shell Petroleum Company workshops. There is a small yard at Kuala Belait which also undertakes repairs.

REPATRIATION/JOINING: Crew members leaving or joining at Seria require a valid Passport and Visa (Nationals from Great Britain, Switzerland, South Korea, Japan and ASEAN countries only require a transit visa). For crew joining a vessel who do require visas, these must be obtained before entering the country. A Passport is the only acceptable travel document. A Seaman's Book or similar is not recognised by the Immigration Department.

Crew to be repatriated from Seria have their travel documents endorsed in Kuala Belait before travelling to Bandar Seri Begawan International Airport. The Immigration Office in Kuala Belait is open during normal office hours on Monday to Thursday and Saturday. From Bandar Seri Begawan International Airport flights depart regularly to Singapore, Manila, Bangkok, Hong Kong, Jakarta and Darwin. Crew arriving ashore on Friday and Sunday stay overnight in Kuala Belait.

AIRPORT: At Bandar Seri Begawan; 1.5 hours by car from Kuala Belait.

There are regular daily flights to Singapore, and less frequently flights to Bangkok, Darwin, Dubai, Frankfurt, Hong Kong, Jakarta, Kota Kinabalu, Kuala Lumpur, Kuching, Manila and Taipei.

TIME: Brunei keeps local time of GMT plus 8 hours.

SHORE LEAVE: No shore leave is allowed.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Brunei Dollar. B$1.00 = Singapore $1.00.

WEATHER: There are two distinct seasons, the N.E. Monsoon (from November to March) and the S.W. Monsoon (from May to September). The transition months, April and October, experience fairly light winds and favourable conditions. The N.E. Monsoon period generally sees a predominant N.E. wind direction of 15 knots – 20 knots. The S.W. Monsoon sees lighter S.W. winds but experiences squalls with violent wind gusts exceeding 50 knots and torrential rain. Squalls generally last for an hour with an average wind speed of 30 knots – 40 knots.

SAFETY: *Safety Regulations:* As per International Safety Guide for Oil Tanker and Terminal (IOTTSG).

Smoking is only permitted in two places jointly approved by the Master and Berthing Master.

The position of the vessel relative to the SBM must be closely monitored by th Ship's crew, advising the Loading Master if vessel approaches the buoy.

Engines must be kept available at all times. Immobilisation of main engines not permitted.

Brunei Shell Petroleum Company reserves the right in the event of flagrant and continued disregard of safety requirements by any ship to stop all operations and order the vessel off the berth for appropriate action to be taken by Charterers and/Owners concerned.

GENERAL: *Refuse:* No garbage, rubbish or refuse may be thrown overboard while the vessel is in Brunei Waters in accordance with Marpol V.

Stores and Laundry Facilities: None.

AUTHORITY: Brunei Shell Petroleum Co. Ltd., Seria 7082, Negara Brunei Darussalam. *Tel:* (673) (03) 78443. *Telex:* Bu 3313. *Cables:* "Brunshell" Seria. *FAX:* (03) 78428. *Contact:* SMR 2, Head of Marine Offshore Operations. M.J. Whickelow, Marine Superintendent.

TANJONG SALIRONG: 04.53 N. 115.06 E.

The log-loading anchorage at Tanjong Salirong is situated 12 miles above the Outer Bar at the mouth of the Brunei River. Vessels of up to 6.5 m. draft may cross the bar at HW.

DOCUMENTS: *(a)* To be produced on arrival:

Marine Department

Boarding Report.
1 Crew List.
1 Passenger List.

Customs Department

2 Inward Manifests.
1 Crew List.
1 Passenger List.
1 Port Clearance.
1 Stores List.
1 Arms List.

Agents
2 Inward Manifests.
1 Crew List.
1 Passenger List.
2 Hatch Lists.
1 Arms List.
(b) To be supplied before ship's departure:
Customs Department
1 Outward Manifest.
1 Passenger List.
1 Crew List.
1 Export Declaration.
Immigration Department
1 Passenger List.
2 Crew Lists.
Vessels
2 Outward Manifests.
Port Clearance.

PILOTAGE: Pilotage is not compulsory. If a Pilot is required for vessels loading logs at Tanjong Salirong then application must be made 24 hours in advance of arrival stating position where it is required for Pilot to embark (i.e. at Outer Bar or Sapo Point). A Customs Officer and Agent's clerk will proceed to Tanjong Salirong from Muara Harbour or Bandar Seri Begawan and will remain on board whilst vessel is loading, accommodation and food provided by ship. Stevedores and tally clerks provide their own food.

HEALTH: *(a)* Immigration: Immigration Officer will board vessel and clear her inward after pratique granted by Port Health Authority. Immigration will require 2 copies of passenger lists and 2 copies of crew list. Vessels inward are cleared up to 2000 hrs. only.

(b) Quarantine: For vessels coming from outside State of Brunei, Port Health Authority will board on arrival at wharf or anchorage. Port Health Authority requires complete copy of Entry Declaration of Health and copies of Passenger and Crew Lists.

RADIO/VHF: See "Muara Port".

BERTHING: Tanjong Salirong is not a port but an anchorage area where vessels are anchored to load timber logs from Limbang in Malaysia.

For all intents and purposes, Tanjong Salirong is under the jurisdiction and control of the Director of Port, Brunei. Therefore, all the relevant information required with regard to port requirements are similar to that required for vessels calling at Muara Port (which see).

STEVEDORES: Stevedoring is in the hands of contractors who supply gangs as required. Working hours are 0730 hrs. to 1215 hrs., 1315 hrs. to 1600 hrs., 1900 to 2300 hrs. (overtime). Overtime is usually worked from 1900 to 2300 hrs., permission to work overtime is required from the Customs Department. No tally clerks available. All tallies to be made by ship's own tally clerks.

MEDICAL: Government General Hospital is situated in Bandar Seri Begawan 16 miles from Muara Port. General Hospital is well equipped with facilities to carry out normal surgery. Inoculations and vaccinations given free of charge.

FRESH WATER: Can be supplied from the wharf at Muara Port and Bandar Seri Begawan. No fresh water is supplied at Tanjong Salirong. No water-boat in State.

FIRE PRECAUTIONS: Fire-floats are stationed at Fire Brigade substation near Customs sub-station in Bandar Seri Begawan.

CONSULS: There are several Embassies, Consulates and High Commissions in Bandar Seri Begawan.

HOLIDAYS: See "Muara Port".

AUTHORITY: *Waterside:* The Director of Marine, Marine Department, Muara 4053, Brunei Darussalam. *Tel:* 771347 to 771356. *Telex:* BU 2650. *FAX:* 771357.
Seaside: Director of Ports, Muara 4020, Brunei Darussalam. *Tel:* 770222-5, 770240. *FAX:* 770283.

NOTES

Please also advise Shipping Guides Ltd.

Bulgaria

BOURGAS: 42.30 N. 27.29 E. (See Plan)

Well protected port at inner end of Bourgas Bay, with good roads, anchorage.

DOCUMENTS:

Master's Declaration.
Cargo Plan.
Custom's Manifest.
Charter Party.
Derat Certificate.
Health Condition Certificate for Crew Members.
Manifest and Consignment of Cargo.
Provision List.
Crew Lists.
Passenger List.
Crew Passports.

APPROACHES: Through fairway, depth of channel 37 ft. 8 in. (11.5 m.).

PILOTAGE: Pilotage in Inner Roads compulsory for vessels above 100 g.r.t. Application for Inner Roads Pilot must be made to Agents at least 2 hours prior to arrival (if incorrect ETA given – pilotage fee is doubled). Pilot Radio on VHF Channel 14.

Outer Roads pilotage not compulsory. Vessels requiring Outer Roads pilotage must advise Agents at least 8 hours before time required and give position of required pick-up point.

Applications for Pilot should include Nationality and call letters; gross tonnage; date (2 figures); time (4 figures) when Pilot required; draft in metres (4 figures).

ANCHORAGE: Outer Roads. Vessels anchored must keep close watch on Roads Signal Station for orders given by flag or signal lamp. Vessel ordered by Authorities to proceed to position Lat. 42° 39′ N., Long. 27° 56′ E., for clearance and Pilot.

RESTRICTIONS: Arrival and sailing from Western Port and Fish Port day and night.

MAX. SIZE: See "Berthing".

RADIO/VHF: Bourgas 500 kHz and VHF Channels 16 and 28. Port Control VHF Channels 16 and 11. Pilots VHF Channel 14.

TUGS: 10×600 h.p. – 2,400 h.p. Compulsory for vessels over 1,000 g.r.t. Tugs join vessels in the Roads. Tugs lines used.

BERTHING:

Harbour	*No. of Berths*	*Length (m.)*	*Depth (ft.)*	*Max. d.w.t. (tons)*
East Harbour	10	1,990	24 – 33	25,000
Bulk Cargo Harbour	5	750	36	60,000
West Harbour	6	900	36	40,000
Oil Harbour	4	265	24 – 45	100,000

No specialised berth for passenger vessels, conventional berth can be provided with 5 days notice.

CRANES: Berths are equipped with electrical portal cranes with capacity from 3 tons to 40 tons. 100 ton capacity floating crane available.

STEVEDORES: Available. Liner ships and chartered vessels on liner terms are obliged to use stevedore and tallyman service.

MEDICAL: All facilities available.

TANKERS: Oil port Drujba. Height of quay 2 m.

Berthing: At the S.W. corner of the Bay there are 2 "T" shaped berths, max. depth 41 ft. 6 in. There are mooring dolphins for vessels length 250 m.

There is an additional tanker berth for vessels loading only, to the South of the "T" shaped berths, depth 30 ft.

Discharging: 2 × 8 in. hoses are connected to the pipe-line on the catwalk. Discharge rate 1,800 to 2,000 t.p.h. depending on the back pressure. The height limit of the hoses is about 54 ft. above sea level. The berth is protected from the prevailing N.E. wind.

Report received 1977 states that the max. draft is 39 ft. – no length limitation. Max. draft at the Product Berth (gas oil) is 23 ft.

Also see "Shipmaster's Report".

DENSITY: 1012 – 1014.

FRESH WATER: Available through hose hydrants or ex-barge. 24 hours notice required.

FUEL: From VTO "Transimpex" Tel: 45751. 72 hours notice required, diesel and gas oil available, also Shell and Castrol lubricants.

FIRE PRECAUTIONS: Constant day and night duty, and direct telephone connection with port fire service.

CONSULS: Turkey.

REPAIRS: Small repairs only.

DRYDOCKS: Floating dock with capacity 3,000 d.w.t. available.

GANGWAY/DECK WATCHMEN: Vessels in Roads not permitted to have gangways down. Vessels alongside quay with lowered gangway must have manropes, safety net, life-buoys with rope of at least 30 m. length attached, an Officer on duty at the gangway and must be lit at night.

OPENING/CLOSING HATCHES: According to charter party.

CERTIFICATES:

Construction
Safety Radio
Classification
Hull and Machinery
Load Line
Cargo gear

CUSTOMS ALLOWANCES: Tobacco – 2 packets per crew member per day. Wines/spirits – for Master, as required, for crew – 1 opened bottle. No limits on board, no seals, crew are allowed to take 1 or 2 packets of cigarettes ashore.

REPATRIATION: Can be fulfilled if necessary. Replacement of crew by Bulgarian nationals is possible.

AIRPORT: Internal and international flights.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year (1st January); May Day (1st May); Day of Slavonic written language (24th May); 24th December (1400 hrs.); 25th and 26th December (Christmas). Time from 1300 hrs. on day before Sundays and Holidays until 0800 hrs. day after is non-working time, but loading and discharging carried out at overtime rates.

TELEPHONES: Port Director Tel: 42293; Pilots Tel: 48324; Customs House Tel: 42301; Bulgarian Shipping Register Tel: 47132; Shipping Agency "Inflot" Tel: 41884, 40379.

SERVICES: Tank cleaning and removal of sludge.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required. Crew members are given shore passes.

REGULATIONS: *Immigration Regulations of Port Bourgas:*

1. The crew of foreign vessels are allowed to stay overnight in town from 0900 hrs. until 0400 hrs. the next day.
2. On going downtown and back to the ship, the crew has to pass by the Immigration Duty Office for receiving and giving back the shore passes.
3. Visits to other popular areas in the country besides Bourgas prohibited.
4. Permission for spending the night at a hotel is granted by the Immigration Authorities, and the crew's address should be registered at the hotel.
5. Embarking on board by persons without permanent or occasional permission issued by the Immigration Authorities is forbidden.
6. It is Master's responsibility to arrange crew on watch at gangway, according to the international practice.
7. It is the Immigration Authorities' right to control and check how the Immigration regulations are being complied with at any time round-the-clock.
8. Those who violate the Immigration regulations of Bourgas will be sanctioned according to the laws of Bulgaria.

Important Customs Declaration: The crews of the vessels arriving at the Port of Bourgas must be acquainted with the following:

1. After the accomplishment of Customs Control and berthing, all sailors are obliged to pass through the Customs Hall.
2. If they have received Bulgarian Lova from the Master through the Agent of the vessel, a list of the sailors and the amounts received must be presented at the Customs.
3. If they exchange currency at the Exchange Bureaux in town, they must request and keep the slip for the exchanged currency. Illegal exchange of currency is strictly forbidden and is subject to confiscation in accordance with the Customs Law.
4. If they purchase goods at the shops, they are obliged to present a shop invoice with the value of the goods and a document for exchange currency, obeying the prohibitions for export of foodstuffs and non-edible goods, in accordance with the Appendix (see below).
   Prohibitions are void if executed by official ship chandler.
5. Eligible to accomplish ship chandler activities are VTO "Transimplex" firms and private traders, in the area of the Port of Bourgas, registered at the Court and at the Customs. The suppliers issue an official document (invoice), signed and stamped by themselves, the Customs and the Master of the vessel.
6. The purchases at the two duty free shops in the port are done after certifying of the invoice by the Customs Officer on duty.
   The Customs reserve the right to carry out checks for the availability of newly bought goods on board the vessel.
7. The import and export of Bulgarian Lova is strictly prohibited.
8. Actions of the crew during their stay at the Port of Bourgas and liability against the Customs are born by the Master of the ship.

Appendix: List of the goods forbidden to be exported from Bulgaria:

Foodstuffs:

1. Meat and meat products.
2. Milk and dairy goods.
3. Beans and lentils.
4. Flour, lentils and semolina (all types).
5. Sugar.
6. Cooking oil and other vegetable oils.
7. Children's food.
8. Rice.
9. Imported products and herbs (including coffee and cocoa).
10. Red pepper (ground).
11. Cereals and products made from cereals.
12. Sugar products.
13. Canned food.
14. Margarine.
15. Potatoes.
16. Sunflower seeds and food for birds.
17. Live farm animals.

Non-edible goods:

1. Clothes and shoes for babies and children.
2. Vacuum cleaners.
3. Clocks for double-tariffed electric motors.
4. Cables and conductors (wires).
5. Water pumps.
6. Linen (all kinds).
7. Towels.
8. Paints and varnishes (all kinds).
9. Wool and woolen yarn.
10. Detergents and soap powders.
11. Natural fur and products made from it.
12. Brass appliances.
13. Jar covers.
14. Liquid fuel in excess of that normal for ship's tanks.
15. Medicines and medical products.
16. Art works of national value.

DELAYS: Possible while waiting for Pilot owing to bad weather or waiting turn for berth.

SHIPMASTER'S REPORT: March 1988.
Vessel: 40,000 d.w.t. tanker.
Documents:
7 copies Crew List.
1 copy Vaccination List.
1 copy Stores List.
1 copy Crew Declaration
Maritime Declaration of Health (including list of ports called in last 21 days.
Ship's Register.
Safety Equipment Certificate.
Safety Radio Certificate.
Certificate of Financial Security.

The vessel's certificates are retained ashore by the authorities until outward clearance is received.

7 officials boarded for inward clearance and 4 officials boarded for outward clearance.

All ship's personnel are to be sighted by Immigration officials, inward and outward.

Pilotage: The Pilot boards from a tug at the Inner Anchorage.

Tugs: 2 tugs used for berthing. Tugs lines used.

Berthing: Vessel berthed at Berth No. 1. 2 mooring boats assist and run the backsprings first.

Moorings forward: 2 headlines, 2 breast lines and 2 spring lines.
Mooring aft: 2 spring lines and 3 stern lines.
No shore gangway.

Cargo Handling: Slop facilities available. We discharged 450 tonnes.

The Safety Inspector who boarded to sight the Oil Record Book also asked to see the slop discharge receipts.

2×8 in. hoses used for loading.

On completion of loading, paperwork takes about 1.5 hours.

Pilot requires 30 minutes notice by VHF Channels 16, 14 or 11.

Shore Leave: No shore passes issued. Seaman's Book or Passport are stamped by Immigration and used as shore passes.

General: Vessel is allowed to take out sufficient meat for 2 days, remainder sealed.

Overside painting permitted, except for ship's name, draft marks and load line.

SHIPMASTER'S REPORT: March 1993.
Chart: B.A. 2399.
Certificates:
Ship's Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
I.O.P.P. Certificate.
Safe Manning Certificate.
Documents:
1 copy Health Declaration.
1 copy Vaccination List.
7 copies Crew List.
3 copies Stores List, including Bonded Stores.
2 copies Personal Effects List.
2 copies Currency Declaration.
1 copy Cargo Manifest.

Pilotage: Not compulsory for approaching the anchorage, but Port Control should be informed by VHF Channel 16 and thereafter Channel 11.

Anchorage: There are several safe and well protected anchorages with good holding ground just off the harbour and South of the Fairway Channel.

Berthing: This vessel was loaded with 10,000 tonnes of wheat in bulk, and berthed at No. 22 (West Port) with a max. draft of 8.0 m.

The cargo was discharged by shore cranes with grabs into hoppers and trucks. Rate of discharge was low (about 1,000 tonnes/day), because cargo was direct delivery and had to be taken some several hundreds of kilometres before trucks returned to be loaded again.

Density: Between 1006 and 1010, because of narrow small river outlet close to the berth.

Fresh Water: Fresh water can be obtained by barge in the roads at a cost of U.S.$ 6.00/ton, or by shore line at a cost of U.S.$ 5.00/ton at a rate of 12 ton/hr.

Shore Leave: Shore passes, filled out on arrival, are being issued and seamen are asked to pass Immigration to hand in the shore passes, and to keep passports on the way out, and to collect same when returning into the port again. Shore leave is granted from 0900 hrs. until 0400 hrs. the following day. Heavy penalties may be imposed by Immigration Authorities if regulations not complied with.

Garbage: Garbage removal is compulsory for ships with stay longer than 3 days in port. Costs per garbage drum of about 200 ltr. is U.S.$ 32.90, plus hire of barge U.S.$ 31.00.

Telephones: Customs Tel: 45398.

Agent: Dekka Shipping Agency-Burgas, 20 Slavyanska Street, P.O.Box 198, Bourgas. Tel: 42334, 43256, 48511. Telex: 83201 Dekka Bg. Fax: 42305.

AUTHORITY: Port of Bourgas Joint Stock Co., 1 Knyaz Al.Batenberg Street, 8000 Bourgas, Bulgaria. *Tel:* (35956) 42293, 42475. *Telex:* 83520. *FAX:* (35956) 42156. *Contact:* D. Alexiev, General Director.

AGENT: Naviagent, 2 Geo. Milev Street, 8000 Bourgas, Bulgaria. Tel: 52 235569, 56 46728. Fax: 56 41738. Telex: 83343, 83556. Cables: Naviagent Bourgas, also via Naviagent Varna.

PORTS IN THE AREA OF PORT BOURGAS

Port Nessebar: Situated on 18 miles North-eastern of Bourgas in the Bourgas Bay. Available 2 berths for passenger and other small ships with draft up to 19 ft.

VARNA: 43.12 N. 27.57 E. (See Plan)

Well protected port at inner end of Varna Bay.

DOCUMENTS:
General Declaration.
Cargo Plan.
Customs Manifest.
Charter Party.
Derat Certificate.
Health Condition Certificate for Crew Members.
Manifest and Consignment of Cargo.
Provision List.
Crew List.
Passenger List.
Crew Passports.

APPROACHES: Through fairway, depth of channel 39 ft.

PILOTAGE: Compulsory for vessels over 100 g.r.t. Vessels requiring pilotage at Outer Roads must radio Agents 24 and 12 hours prior to arrival giving position of required pick-up point, also: name of vessel; nationality and call letters; g.r.t.; length; draft in metres (4 figures); date (2 figures); time (4 figures).

Pilot comes from Inner Port of Varna. In bad weather impossible for pilot boat to reach Outer Roads and vessel will be so informed by Agents "Inflot" and instructed to proceed to anchorage in Varna Bay.

Pilot boat is a patrol boat with yellow funnel and letter "P" on a blue strip and carries international recognition signals by day and night.

ANCHORAGES: There are 2 anchorage areas.

Summer: Compulsory for all types of ships through the Summer, and for tankers all year round. The anchorage is situated South of the Galata Cape, not less than 6 cables offshore.

Winter: The anchorage is situated 2 miles East of "Varna" Lighthouse and North of the Separation Zone, not less than 1 mile offshore.

RESTRICTIONS/MAX. SIZE: New restrictions in force from 30th June 1995:

Varna East:

Berth No.	*LOA* (m.)	*Draft* (ft.)
1	177	23
2	129	21
3		21
4	507	21

12	240	23
13	220	21

Varna West:
Berths No. 0, 2, 6, 11, 12, 13, 14, 15, 16 and 17 – Draft 29 ft.
Berths No. 1, 3, 4, 5, 7, 8, 9 and 10 – Draft 32 ft.
Also see "Canal Road – Varna West".

Petroleum Terminal:
Berth No. 1: LOA 220 m., draft 29 ft.
Berth No. 2: LOA 180 m., draft 28 ft. (Presently out of order).
Berth No. 3: LOA 100 m., draft 18 ft.

Canal Road – Varna West:
Air draft: 41 m.
Max. draft: 29 ft. 6 in.
Vessels over 200 m. LOA, 26 m. beam and 20,000 gross tons pass through canal in daytime only.

Channel Proceeding to Shiprepair and Shipbuilding Yard:
Vessels over 12,000 gross tons pass through channel in daytime only.
Max. draft: 5.3 m.
Trim: 0.5 m. or less.
Wind speed: 5.0 m./sec. or less.

RADIO: Radio Varna LZW 500 kHz. LZW 42 – 8532 kHz. VHF Channels 26 and 16. Port Control VHF Channels 16 and 11; Pilots VHF Channel 14.

TUGS: 11 tugs available. Compulsory for vessels over 1,000 g.r.t. Ship's lines used.

BERTHING:

Port of Varna-West: Situated 14 nautical miles from Port Varna. 7 berths available for bulk carriers, 3 berths for containers and 5 berths for general cargo vessels. Ships of max. 32 ft. draft proceed in one direction only, through 2 deep channels with Varna Lake between them, with limitation in speed up to 6 knots. A container platform for loading and discharging of 20 ft. containers and specialized loading/discharging equipment available.

Port of Varna-East: Total wharf length 2,072 m. Max. depth 36 ft. Suited and used for handling general cargoes, machinery, technical equipment, metals, fertilisers and grain. Container Terminal in operation.

Ferry-boat Complex: Situated 13 nautical miles from Port Varna, next before Port Varna-West. Two specialised berths for ferries with max. draft 26 ft. available.

Port Balchik: Situated 18 nautical miles North of Port Varna, for ships with max. draft 24 ft. One berth of 150 m. for grain and cattle available. Entering and leaving the port with a Pilot commencing from the Outer Roads of Port Varna.

Lesport (Port Topolly): Specialised port for wood materials. Situated on the Northern part of Varna lake, 8 nautical miles from Port Varna. 3 berths for ships with max. draft 26 ft., 21 ft. and 15 ft. available.

Port of the Thermo-Electrical Station Varna: Specialised port for coal, situated on the West part of Varna Lake, 8.5 nautical miles from Port Varna. 2 berths (total length 610 m.) for ships with max. draft 32 ft. available.

CRANES: Bridge cranes of 5 tons – 40 tons and mobile cranes of 7 tons – 40 tons, also 100 ton floating crane is available.

Container Terminal: Loading and discharging of 20 ft. and 40 ft. containers. The necessary specialized loading and discharging equipment is available.

BULK HANDLING FACILITIES: Conveyor for bulk cargoes, capacity for 24 hours is 3,000 tons.

Automated loading station for chemical products – 3,000 tons per day for bulk cargoes and 3,000 – 6,000 tons per day for bagged cargoes.

Suction facilities for bulk cement.

Liquid cargoes handled at 300 t.p.h. – 1,000 t.p.h.

BRIDGES: When proceeding to and from Varna Lake, vessels pass under the new Asparuhov Bridge (41.72 m. above the water level).

STEVEDORES: Available. Liner ships and chartered vessels on liner terms are obliged to use stevedore and tallyman service.

MEDICAL: All facilities available.

TANKERS: 3 berths, draft 29 ft., 28 ft. and 18 ft.

Also see "Restrictions/Max. Size".

DENSITY: 1013.

FRESH WATER: Available through shore hydrants or ex-barge. 24 hours notice required.

FUEL: From VTO "Transimpex", 22 Sofia Street. Tel: 230475. Telex: 77509. 72 hours notice required. Bunker "C", diesel and gas oil available. Lubricants: Shell and Castrol – 48 hours notice required.

FIRE PRECAUTIONS: Constant day and night duty and direct telephone connection with port fire service.

CONSULS: Russia and Poland.

REPAIRS: All kinds of repairs possible in ship-repair yard.

DRY DOCKS: Suitable for vessels up to 30,000 d.w.t.

Floating Docks: 2 floating docks with lifting capacity of 4,500 tons and 12,500 tons respectively.

GANGWAY/DECK WATCHMEN: Vessels in roads not permitted to have gangway down. Vessels alongside quay with lowered gangway must have manropes, safety-net, life-buoys with rope of at least 30 m. length attached, an officer duty at the gangway and must be lit at night.

OPENING/CLOSING HATCHES: In accordance with charter party.

CERTIFICATES: Construction, Hull and Machinery, Safety Radio, Load-Line, Classification, Cargo Gear, Safety Equipment, International Oil Pollution Prevention Certificate, Tonnage, Certificate of Registry/Act of Nationality, Certificates of Competency of Master, Chief Officer, Chief Engineer, 2nd Engineer, Radio Officer and seamen.

CUSTOMS ALLOWANCES: Tobacco: 2 packets per crew member per day. Wines/spirits: For Master, as required, for crew – 1 opened bottle. No limits on board, no seals, crew are allowed to take 1 or 2 packets of cigarettes ashore.

REPATRIATION: Can be fulfilled if necessary.

AIRPORT: Internal and International Flights.

TIME: GMT plus 2 hours (1st October – 1st April). GMT plus 3 hours (1st April – 1st October).

HOLIDAYS: New Year (1st January), Day of Liberation of Bulgaria from Ottoman domination, Pasche (2 days in April), May Day (1st May), Day of Slavonic written language (24th May), 24th December (1400 hrs.), 25th and 26th December (Christmas). Time from 1300 hrs. on day before Sundays and holidays until 0800 hrs. day after is non-working time, but loading and discharging carried out at overtime rates.

TELEPHONES: Port Director 223479; Pilots 227023; Custom House 225532; Lloyd's representative 227167; Soviet Register 222651; Bulgarian Shipping Register 226122; State Shipping Agency "Inflot" 222669. State Shipping Inspectorate 225409.

SERVICES: Tank cleaning and removal of sludge. Compass adjusting.

SHORE LEAVE: Allowed.

REGULATIONS: Given to Master on arrival.

IDENTIFICATION CARDS: Required. Crew members are given shore passes.

DELAYS: Possible while waiting for Pilot owing to bad weather or waiting turn for berth.

Cambodia

SIHANOUKVILLE: 10.38 N. 103.29 E. (See Plan)

PORT LIMITS: The seaward boundaries are fixed by the Buoys "SV" to the South, and Buoy "A" to the North for cargo ships and Buoy "T" 2 miles to N.W. of Rocher Carre for tankers.

DOCUMENTS:
Entry form to be completed on arrival:

16 Manifests of Cargo for Discharge.
1 Manifest of Cargo in Transit.
3 copies Bill of Lading.
7 Crew Lists.
7 Passenger Lists.
3 Lists of Provisions.
3 Lists of Crew Personal Effects.
1 copy Maritime Declaration of Health on Arrival.
1 copy Vaccination List.
3 copies Lists of Drugs and Narcotics.
1 copy First Aid Declaration.
1 copy List of Animals.
1 copy Place of Origin of Fresh Water Onboard.
3 copies Cargo Plan.
1 copy Clearance from Last Port.
Valid originals of ship's documents (See "Certificates").
Derat Exemption Certificate.

PILOTAGE: Compulsory for all vessels of more than 150 n.r.t. Contact "Sihport" giving ship's particulars, cargo tonnage and ETA, 24 hours and 12 hours before arrival. Pilot boat carries international pilot signal by day and 2 lights (white over red) at night. Pilot boards cargo vessels at "SV" Buoy or "A" Buoy, and tankers at "T" Buoy situated 2 miles N.W. of Rocher Carre. All vessels can communicate with Pilot Station by international sound signal at any time and by VHF Channel 16 during working hours. Pilot refuses to board vessels which do not have a safe method of boarding.

ANCHORAGES: South Anchorage in the depth of 10 m. – 11 m. (in the vicinity of "SV" Buoy) for all ships.

Northern Anchorage in the depth of 10 m., situated West of the line 030°/210° passing Rocher Eiffel, and North of Lat. 10° 39′ N. for ships of 2,000 g.r.t. and draft less than 7.0 m.

Tanker Anchorage in the depth of 14 m. – 15 m., situated 2 miles N.W. of Rocher Carre, for all types of tankers.

RESTRICTIONS: Berthing daylight only, and unberthing day and night, but delays may occur in bad weather during S.W. monsoon. Special berthing at night-time can be arranged with Harbour Master's Office and Pilot. Draft is limited at 8.5 m.

MAX. SIZE: For ships with draft over 8.5 m., the draft must not be over 7.6 m. plus height of tide. For Tanker Wharf, draft is limited at 4.20 m. and length not more than 80 m.

HEALTH: Authorities board all vessels on arrival at the quay or in the outer harbour. Quarantine flag to be flown by all vessels. In case of suspected disease on board, contact "Sante Sihanoukville" by radio before arrival.

TUGS: Two tugs are available to assist in manoeuvring. The largest tug is 1,600 h.p. Tug joins vessel in immediate vicinity of the berth. Vessel's lines used. A minimum of one tug is required for berthing and unberthing.

BERTHING: Commercial Dock (290 m.): West side, 2 berths for vessels up to 8.50 m. draft. East side, 2 berths for vessels up to 7.00 m. draft.

New wharf (350 m.): One berth for vessel up to 7.0 m. draft and 2 berths for vessel up to 6.5 m. draft.

CRANES: Mobile cranes up to 80 tonnes capacity available.

STEVEDORES: Working times from 0600 hrs. – 1100 hrs., 1300 hrs. – 1800 hrs. and 1800 hrs. – 2300 hrs. 24 hour working can be arranged in some cases.

MEDICAL: Advance notice required of serious cases to arrange transportation to Phnom Penh. Local doctors and hospital available. Crew require cholera and yellow fever certificates.

TANKERS: One berth (length 53 m.) for vessels up to 80 m. LOA and draft 4.2 m.

DENSITY: 1022 in February; 1012 in July.

FRESH WATER: Available at dock and by truck.

FUEL: Not available.

CONSULS: Russia and Vietnam. All other consuls at Phnom Penh.

REPAIRS: Small repairs can be undertaken on board.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Performed by stevedores.

CERTIFICATES:

Ship's Register.
International Tonnage Certificate.
Passenger Safety Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Load Line Certificate.
International Oil Prevention Certificate.

CUSTOMS ALLOWANCES: Each crew member allowed 1 carton cigarettes and 1 bottle alcohol for 5 days. Master not included in this restriction.

REPATRIATION: Can be arranged.

AIRPORT: Ream Airport, 18 km. from Sihanoukville City, domestic flights only. Pochentong Airport at Phnom Penh 226 km. from Sihanoukville City, with international services.

TIME: GMT plus 7 hours all the year round.

HOLIDAYS: Work can usually be arranged on all days except at New Year, 13th, 14th and 15th April, and for 2 days near the end of September (Buddist Soul Day).

POLICE/AMBULANCE/FIRE: Contact Port Control.

SHORE LEAVE: Allowed, if requested by Master. Passports or Seamen's Books are taken by Immigration in exchange for a shore pass, which is to be surrendered when vessel departs.

GARBAGE DISPOSAL: Collection service is available. Dustmen come on board on the first day of the ship's stay at wharf, and every 5 days or on request from Master or Agent.

DEVELOPMENTS: New wharf extension (300 m.) will be started in 1997.

Tanker mooring buoys for tankers of 7.0 m. draft will be established in near future.

AUTHORITY: Sihanoukville Port Authority, Sihanoukville Port, Kingdom of Cambodia. *Tel:* (015) 343499. *FAX:* (015) 53693. *Contact:* Port Director.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Cameroon

CAMPO: 02.21 N. 09.49 E.

SHIPMASTER'S REPORT: March 1996.

DOCUMENTS: See "Douala".

Agent brings all documents on board and completes them onshore for Health, Immigration and Customs Authorities. Sometimes, one Customs Agent comes onboard.

APPROACHES: *Navigation Aids:* Punta Campo and the coast up to the mouth of the River Campo give a good target on the radar. There are no difficulties in approach and anchoring by night, but care must be taken to avoid wrecks in the vicinity of the anchorage position as shown on the British Admiralty Chart No. 1888. There are no lights available.

ANCHORAGE: With a draft of 7.0 m., a good and safe anchorage can be found in position 342° from Punta Campo at 2.3 miles.

VHF: The shipper of logs keeps a continuous watch on VHF, when a ship is in the roads.

SPECIALISED CARGO HANDLING FACILITIES: *Timber in Logs:* 2 lighters of 250/250 tons and 2 lighters of 120/150 tons are available with 2 tugs. Loading rate is about 900 to 1500 cu.m. per day with 2 gangs.

General Rules of Work: On arrival and before start of loading, Master has to accept and sign the "General Rules of Work for Loading of Logs", tendered by stevedores. The integral text is reproduced here under, and it is also valid for the roads at Kribi.

1. Owners of ships loading logs at the open sea anchorages of Kribi or Campo are deemed to be aware of all particularities of loading logs (either drift-logs, raft-logs or logs on floating lighter) on these roads, which are assimilable to open sea. As a consequence, the resulting risks for the ship's hull, as well as for the rigging of hatch-covering gear, hatch coamings and any inside equipment of tweendecks and holds are fully accepted by shipowners.
   No responsibility shall attach to the stevedore in case loss of/or damage to the ship and/or logs occur during loading operations, unless if due to the established fault, error or negligence of the stevedore.
2. Ships to provide upon request, convenient mooring for rafts or lighters:
   For rafts: Steel wires and shackles in good condition for mooring on ropes (wire excluded) for securing alongside the ship.
   For lighters: The mooring is to be made according to the requirements expressed by the ship's stevedores and/or agent. Generally, the heaviest available ropes (wire or copra excluded) of a minimum length of 30 yards are fixed from fastening point onboard the ship to the fastening point on lighter, fore and aft of the lighter, fastened on the ship's side of the lighter. The mooring ropes of the ship (if no wires) are generally convenient, either Manila or nylon. This mooring, when conveniently made, allows the lighters to go fore and aft with the swell, with the minimum of shocks to the ship. Should the ship refuse to provide the correct mooring, the stevedore/agent could refuse to start loading.
3. Ships to provide a gangway or pilot's ladder in good condition to allow boarding from lighters by labour, clerks or shore staff, ladders with round rungs always excluded.
4. Ships to point out fresh drinking water tap to foreman, for free use by the labour during (or unloading if any) operations.
5. Ships to assume liability of logs when slung (with of course the possibility of involving stevedore's liability if this latter's fault is established).
6. Ships to point out to labour the eyepads, cleats and more generally all strong points available for the use of blocks, capable to stand sufficient stresses for the trimming (in fact strong points able to stand the double of the winches traction). Should such strong points not be conveniently placed on board the ship, or be absent from the ship, the stevedore would proceed with loading without any liability whatsoever on his part and under full liability of the ship in respect of any loss or damage which could result from those inconvenient and/or missing strong points.
7. Ships never to give direct orders to labour, but through the foreman.
8. No responsibility shall attach to the stevedore/agent in respect of loss or damage which would not have given rise to a statement of facts duly established and signed by the Master on one side and the stevedore/agent (whichever is the party concerned) on the other side before the ship's sailing, it being understood it would belong to the Master to call immediately and before sailing for a joint survey in case the stevedore/agent (whichever is concerned), would reject liability upon presentation by the Master of the statement(s) of facts. In so far as damage to the ship is concerned, and whenever some responsibility attaches to the stevedore/agent (whichever is concerned), all repairs are subject to a 6 day telex notice prior to work starting date, stating place, date and time of repairs to enable the stevedore/agent (whichever is concerned) to have a surveyor appointed in agreement with its insurers.
9. Whenever a Supercargo is on board the ship, the ship is to make clear who between the Master and the Supercargo is concerned in respect of any matter or event arising during call. In case of doubt, both the Master and the Supercargo are deemed to be concerned and, therefore, are both to sign the document which the ship has to sign.
10. Master and/or Supercargo are deemed to be fully aware of the above rules (1 to 9), and accept them as soon as they have allowed the tugs and lighters or rafts to come alongside.

Swell: A S.W. to S.S.W. small or moderate swell exists all the time. Due to the general direction of the current (from South) and variable direction and strength of the wind, the rolling of the vessel can be strong enough during some periods to stop the loading for safety reasons.

STEVEDORES: They are ordered by agent taking into account the opinion of the Master. They come from Kribi. According to the quantity of lighters available, the time necessary for loading the lighters ashore and the transit time of the lighters from shore to ship by towing, 2 gangs seem to be the optimum number.

Normal working hours are during daytime, but in case of completion of loading, work during night is possible.

MEDICAL: In case of emergency, some facilities are available at Kribi, about 6 to 8 hours by road from Campo.

FUEL: No facilities.

REPAIRS: No facilities.

SERVICES: None.

DOUALA: 04.03 N. 09.42 E. (See Plan)
TIKO: 04.00 N. 09.24 E.
LIMBE (Formerly Victoria): 04.01 N. 09.13 E.
KRIBI: 02.56 N. 09.54 E.

DOCUMENTS:

5 Crew Lists.
5 Lists of Port of Call.
5 Passengers' Lists.
2 Crew Customs Declarations.
2 Declaration of Provisions on Board.
1 Arms and Ammunition.
2 Stores Lists
2 Manifests or Bills of Lading

PILOTAGE: (With the exception of Kribi and Limbe (formerly Victoria) where ships work cargo at anchorage); Compulsory at Douala and Limbe Oil Terminal (SBM). Ship's arrival must be notified at least 24 hours in advance, together with draft (F.W.) forward and aft. This must be confirmed.

At Cape Limboh (Limbe) where ships can proceed alongside, pilotage is compulsory.

For Douala, waiting anchorage at Base Buoy (Lat. 3° 54' 12.3" N., Long. 9° 32' 19.8" E.). Pilot called by VHF (16 – 14).

For entry of Tiko, waiting is at Limbe Anchorage.

ANCHORAGE: Base Buoy for entry at Douala (See "Pilotage") 8 m. depth approx. For Limbe Anchorage on Roads in Ambas Bay about 9 m. depth. Anchorage for Tiko on the Bimbia. Kribi Anchorage by red conical buoy (Lat. 02° 56' 36" N., Long. 09° 53' E.) depth 6.30 m. – 7 m.

RESTRICTIONS: Draft only, for ports of Douala and Tiko. Official level of Wouri Channel is 5.80 m.

MAX. SIZE: At Kribi and Limbe Anchorage, no restrictions.

Douala, max. length 200 m., max. draft 5.50 m. plus tide.

HEALTH: Free Pratique granted after compulsory checking of vaccination certificates against yellow fever. Health Officials hand the Master a special Health form to fill in.

RADIO: (See "Pilotage"). Douala Radio limited to broadcasting for private individuals. VHF Channels 16 and 14 and R/T 2182 kHz.

For vessels arriving at Douala, Masters should send a message to their Agent at least 48 hours prior to arrival, giving the following information:

(1) ETA at Base Buoy (given in local time).
(2) Cargo tonnage for discharge, and hatch distribution, including dangerous cargo.
(3) Number of gangs required.
(4) Vessel's draft in fresh water.
(5) Any other requirements, e.g. money, medical attendance alongside, etc.
(6) Overall length.

For vessels arriving on a Sunday or on a Public Holiday, Agents must be informed by 1100 hrs., the day before arrival. If overtime or night work is required by vessel, the Agent must be informed by 1700 hrs. the day before arrival. It is also possible to telex information from the last port of call as Douala Radio Station can sometimes be difficult to contact.

VHF: Channels 16 and 14.

RADAR: No radar.

TUGS: Three tugs: 2,000 h.p., 1,100 h.p. and 900 h.p. are available on request to Cameroon National Ports Authority, Operations Head Office. Towage is compulsory for ships of 600 d.w.t. and more, and subject to Pilot's advice.

One tug is available at Cape Limboh, obtainable from the National Ports Authority.

BERTHING: For Douala, there are 13 berths of 2,330 m. approx. Two of these berths have priority berthing for alumina carriers and occasionally tankers. Two other berths downstream from the port have priority berthing for container carriers. One of these berths has Ro/Ro accommodation with 2 dolphins 70 m. apart. One banana berth and one berth of 200 m. length for flour in bulk.

There is a berth consisting of 2 dolphins and 4 buoys used for oil discharging. Tankers moor with 3 head and stern lines to the other outer mooring buoys – 2 breast lines to the inner mooring buoys and spring lines on the dolphins.

At Douala, 9 berths have a depth of 9.50 m. approx. at LW. The tanker berths have a depth of 9.5 m. at LW (tidal range 2.20 m.).

At the right bank (Bonaberi): There are two berths equal to 300 m. in length. One is for butane tankers, length 140 m. The other berth is equipped with a Goliath crane used by mineral carriers. These berths have a depth of 13 m. at LW (Also see "Shipmaster's Report" dated November 1993).

Channel from Base Buoy to Douala Port, minimum depth (dredged) 5.5 m. Pilot boards at Base Buoy. Pilot can board at any time and vessel's sailing time depends not only on flood tide, but also on which side alongside, L.O.A. and permitted draft. Ship's watchman required, compulsory to use gendarmes and policemen. Agents submit written request to feed men twice a day during loading. Loading intermittent from both rail trucks and lorries.

Vessels have to shift alongside quay with their ropes if required. Decisions are taken every day after the Port Meeting which takes place at 1000 hrs. and 1600 hrs. in order to use optimal quay length.

Limbe: At Cape Limboh (Limbe) one berth available admitting ships of 130 m. in length. Length of quay 150 m. and depth alongside at LW is 10 m. 3 quay cranes available. One mooring buoy (SBM) for ships loading Fuel Oil, max. draft 18 m. and max. tonnage is 90,000 tons. (Also see "Shipmaster's Report").

Kribi: One quay of 250 m. for export of timber, cocoa, coffee, flour, salt and palm products by barge. One crane available.

CRANES: No berths alongside. Loading and discharging is carried out by ship's gear at anchorage. However, there are 2 cranes, one of 100 tons and the other 25 tons for barges.

BULK CARGO FACILITIES: Douala: There is a rolling gantry at the right bank to transport cement to the cement site. Max. height of loading/discharging gear above HW is 2 m. Max. loading/discharging rates – 1,000 tons per day, length 150 m., depth 8.5 m.

No. 2 Berth at right bank is equipped with a rolling gantry to transport aluminium. Max. height of discharging gear above HW level is 2 m., length 280 m., depth 9.5 m.

SPECIALISED CARGO HANDLING FACILITIES: *Containers:* A modern container and Ro/Ro terminal has been created with a frontage of 600 m., dredged to 11.50 m. Facilities include 3 berths, the first 2 of which, with a total length of 400 m., are designed for full container ships and the last for Ro/Ro ships with side ramps. Additional facilities comprise 2 dolphins and 1 Ro/Ro ramp. The adjacent yard has a surface area of 23 hectares and a width varying between 400 m. and 500 m.

At the back of this yard, there exists a stuffing and stripping container warehouse of 7,500 sq.m.

Timber: The annual capacity of the Timber Port is 2,000,000 tons. There are 2 gantry cranes.

The equipment includes:

- timber yard of 20 hectares served by road and rail,
- a water surface of 20 hectares with 3 m. draft in the area next to the quay and 9.50 m. in the rest of the dock. This dock is capable of receiving 4 ships,
- 150 m. quay frontage designed for the handling of floating timber.

Also see "Developments".

STEVEDORES: The number of stevedore gangs is requested from Charterer's Agents, taking into account size of cargo.

MEDICAL: An appropriate Medical Service can be provided on request in case of an emergency, such as an epidemic on board.

TANKERS: At Douala harbour, a berth of 180 m. can accommodate oil tankers of 12,000 tons when the tanker berth has a breakdown. No slops discharge. The depth at LW is 8.00 m. The tanker berth in the river can accommodate tankers of less than 180 m.

At the tanker berth are found 3 connections of 8 in. for white products, discharge rate of about 250 t.p.h. to 300 t.p.h. Bunkers can be supplied but are not always available.

Sailing from the tanker berth: Subject to draft, any tide between 2 hours before HW and LW; sailing/mooring, day and night. 1 or 2 tugs (optional) assist in mooring and sailing proceedings. A permanent tug assists during discharging.

Also see "Berthing" and "Shipmaster's Report" – dated 1982.

DENSITY: 1012 in dry season; 0.985 average in rainy season.

FRESH WATER: Available at berth; supplied by hoses at 50 t.p.h. Available at Cape Limboh (Limbe, formerly Victoria).

FUEL: Supplies arranged by Charterer's Agent who have their particular suppliers. Available at Cape Limboh (Limbe).

FIRE PRECAUTIONS: In addition to the usual measures, the quay station for oil tankers is isolated during discharging, and there is also a permanent watch by tugs.

CONSULS: At Douala.

REPAIRS: There is a ship repair unit having a 200 m. long quay for afloat repairs (capacity 10,000 tons).

DRY DOCKS: 3 floating docks of 10,000, 1,000 and 500 tons handling capacities are available.

SURVEYORS: Lloyd's Register; Bureau Veritas; Germanischer Lloyd's; A.B.S. and Det Norske Veritas.

GANGWAY/DECK WATCHMEN: Ship's crew or arranged by Charterer's Agents at Master's option. A watch by armed elements of the police has been instituted.

Piracy: Acts of piracy have taken place at the ports by armed pirates.

OPENING/CLOSING HATCHES: By ship's crew.

CERTIFICATES: Safety, Radio, Sea-worthiness, Freeboard, Derricks, etc.

CUSTOMS ALLOWANCES: 100 cigarettes per person, not more than 2 bottles of spirits per person in cabin.

CARGO GEAR: Loading and discharging affected by ship's gear.

REPATRIATION: Repatriation as well as crew changes can be arranged after consultation with the responsible Consuls.

AIRPORT: International airport is situated about 12 km. from Douala Port. Regular airline flights to Europe daily during whole year.

HOLIDAYS: *Official Holidays:* New Year's Day, 1st January; Youth Day, 11th February; Labour Day, 1st May; National Day, 20th May; Christmas Day, 25th December. Any other Day declared by Presidential Decree. *Variable Holidays:* Easter Day; Festival of the Sheep; End of Ramadan; Assumption Day; Ascension Day.

Even though there are public holidays, cargo work may be carried out by arrangements.

TIME: Local time GMT plus 1 hour. No change during year.

3. Yes.
4. wno jetty.
5. No Customs regulations in force.
6. Subject to arrangement.

SHIP SUPPLY SERVICE: For details contact: Syndicat des Compagnies de Navigation et Consignataires de Navires au Cameroun, B.P. 73, Douala.

SERVICES: Derat and fumigation.

Stores: Fresh provisions of good quality, beer and soft drinks.

SHORE LEAVE: Permitted.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: Collection service available by tanker trucks at no charge.

Contact: Transports Blat et Cie., B.P. 896, Douala. Tel: 42-16-59, 42-09-08. Telex: 5950 KN.

Sotradhy, B.P. 3610, Douala. Tel: 42-97-13. Telex: 5099 KN.

SEAMAN'S CLUB: German Seaman's Mission, Foyer du Marin, Douala. Tel: 42-27-94. Services: Meals, snacks, beds, bar, swimming pool, money exchange, international telephone and mini-bus service.

CURRENCY: C.F.A. Francs.

IDENTIFICATION CARD: Seaman's Book and shore pass are sufficient.

REGULATIONS: Normal Port Regulations in force.

DELAYS: No unusual delays.

DEVELOPMENTS: A new fruit terminal, length 200 m., accepts vessels with draft 9.5 m.

SHIPMASTER'S REPORT: March 1982.

Sonara Refinery SBM at Cape Limboh Oil Terminal.

The new refinery is situated at Cape Limboh (Limboh Point). The exact position of the SBM is Lat. 03° 59′ 16″ N., Long. 09° 07′ 36″ E. (B.A. Chart 1455).

Type of Hose (Loading Hose): 16 in. ASA Serial 150 type barbell.

Manifold Derrick: Should be of minimum SWL 10 tons. Connection is made on port side.

VHF: Sonara Refinery keeps watch on Channel 14, make contact 2 hours before arrival.

Pilot: Pilot boards 1 mile South of SBM.

Pipeline: Submarine line is always kept filled with crude oil therefore if loading fuel oil, the vessel should be in position to receive about 1,500 cu.m. of line contents inside the ship's slop tanks and on

completion of loading fuel oil, the line contents must be pumped back into submarine line.
Depth: Depth of water at berth is 21 m.

CARGO SUPERINTENDENT'S REPORT: October 1993.
Vessels can safely proceed to the Base Buoy (Pilot Station). The two beacons give good radar position, and the outer buoy is in place.

Port Control is on 24 hours duty on VHF Channel 16 (English – French). Port Control inform Agents promptly.

Pilots are English speaking and very good.

The buoys in the channel have recently been painted and renumbered.

The channel is dredged to 5.5 m. at low tide (add tide tables figure). Maximum draft 8.0 m.

Length of vessel no restriction. Vessels entering on upcoming tide, swing in front of berth on their anchor and berth with assistance of 2 tugs (compulsory). Moorings are 4 and 2 fore and aft. Regular shifting along wharves on Port Authority's instructions.
Inward Clearance: Ensure safety net secured under gangway before allowing any boarding. Normal clearance procedure with Port Health (Yellow Fever), Immigration, Customs, Police.
Outward Clearance: Agent pre-arranges clearance and brings Port Clearance (stamped Manifest) one hour before departure. No problems and no delays.
Agents: Socopao contactable from the anchorage at Base Buoy on VHF Channel 73. They contacted us very late (10 hours after arrival) regarding berthing prospects. Agents have all the communications well arranged. The office is outside the gate, close to the port. Taxis not allowed in port, so must rely on Agents transport, which is hard to get. The Boarding Clerk we had, visited twice a day. The Agent's office also has an inhouse travel agency that can arrange all necessary tickets, but no service for visa, etc.
Stevedoring: Socopao inhouse stevedoring. The Manager is English speaking, and has an office opposite Berth No. 11. All faxes and telephone calls were made from this office without any problem or significant delays. The stevedores on board are quite good and disciplined. The stowage of the logs is not bad. The crane-drivers are a bit careless.

Two watchmen are compulsory day and night

Socopao Stevedoring run the tugs in the port for the rafts and the barges. They also own equipment for bulk, container, general and timber cargo handling. Plenty of stevedoring materials (slings and hooks, etc.) available. Vessel must supply lines/wires to fasten rafts and barges. One tug is on stand-by alongside at all times. As stevedores work in 12 hour shifts, it is advisable to feed the foreman, talley clerks and watchmen on board (to prevent delays and for smooth cooperation).
Loading Rates: With 4 gangs and sufficient cargo alongside, this vessel can load 2,500 cu.m. logs per 24 hours. There is little cooperation between shippers – logpond – stevedores, as all act independently.
General: Cameroon is basically French speaking (a necessity for supercargo), but quite a few people (locals) speak English, Douala is very expensive in every way. Many countries have Consulates in Douala. The international airport has daily flights to Europe (Air France, Sabena, Lufthansa and Air Cameroun are most regular). Various international banks, the best I found for cashing traveller cheques was Standard Chartered Bank.

Douala is unsafe for crew to go ashore at night. Robberies (armed) are aplenty, even in daylight. Only the Seaman's Mission bus at 1900 hrs. and return at 2200 hrs. is safe. But Seaman's Mission is expensive.
Stowage: We loaded a great deal of logs over 10.0 m. length, this gives a bad stowage factor. Also of the hardwood, many over 15 tons.

SHIPMASTER'S REPORT: November 1993.
Vessel's Particulars:
Length: 146.68 m.
Breadth: 22.86 m.
Depth: 12.20 m.
Summer Draft: 9.05 m.
Deadweight: 17,635 metric tonnes.
Berth: Cement berth at Bonaberi.
Pilotage: Pilot called by VHF Channels 16 – 12.
Health: Maritime Declaration of Health to be filled in and handed over to the boarding officers, along with List of Ports of Call and Cholera/ Yellow Fever Vaccination List.
Radio: Not operational.
VHF: Channels 16 – 14.
Tugs: Only 2 tugs were seen to be operational.
Berthing: At the right bank (Bonaberi): Only the berth with a gantry is being used for discharging clinker/gypsum for the cement plant. This berth has no fenders (the berth is not being used for banana or butane carriers).

It is advisable to employ watchmen at all berths, more so at this berth. As the berth is remote, it is not advisable to venture out at night, even for taking drafts.
Bulk Cargo Facilities: Bonaberi: Gantry crane – Max. height of discharging gear above HW is 15.0 m. Discharging rate 3,500 tonnes per day.

Berth No. 2 on the left bank is also equipped with a rolling gantry for discharging Alumina, but only the evacuators are being used. Max. height of discharging gear above HW is about 15.0 m.
Specialised Cargo Handling Facilities: Timber: The timber dock does not accommodate any ships as mentioned. Timber/logs can be loaded alongside any of the berths or at the dolphins, depending on the vessel's draft.
Density: Annual average 1012, rainy season 997.
Dry Dock: Only one floating dock (Chantier Naval et Industriel du Cameroun S.A.) of about 10,000 tons is in port.
Customs Allowances: 200 cigarettes and one bottle of spirits per person.

AUTHORITY: Cameroon National Ports Authority, B.P. 4020 – Douala, Republic of Cameroon. *Tel:* 42.01.33, 42.73.22. *Telex:* 5270KN. *FAX:* (237) 426797. *Contact:* Tchouta Moussa, Port Director. Mboum Mono Markous, Harbour Master.

AGENT: *Douala:* Socopao, B.P. 215 Douala. Tel: (237) 42.64.64. Telex: (Shipping) Freight 5319; (Direction) Freight 5252/5214. Fax: (237) 43.11.58. Cables: Freight Douala.
Kribi: Socopao, B.P. 38 Kribi. Tel: 46.11.25. Telex: 5688 (in case of difficulties please contact Douala).

KOLE: 04.13 N. 08.33 E. (See Plan)

LOCATION: The loading point is located at Lat. 04° 13′ 21″ N., Long. 08° 33′ 31″ E. (approx. 285° – 26 miles from Cape Debuncha).
DOCUMENTS:
3 copies Crew List.
3 copies List of Ports of Call.
3 copies Arms and Ammunitions List.
3 copies Animals List.
3 copies Store List.
3 copies List of the Passengers Landing or in Transit.
Ship's Manifest.
PILOTAGE: Compulsory. Piloting shall be carried out by the Pilots of the Cameroon National Port Authority. Call signals for a Pilot are those provided for by the International Code. The Pilot may be contacted on VHF Channels 11 or 12.

The Pilot will board 2 miles S.W. of loading point "KLB-2" in position Lat. 04° 12′ N., Long. 08° 32′ E.
ANCHORAGE: Vessels loading at Kole may anchor inside an area enclosed by the following coordinates:

A	04° 12.3′ N., 08° 33′ E.
B	04° 12.3′ N., 08° 34′ E.
C	04° 11.3′ N., 08° 33′ E.
D	04° 11.3′ N., 08° 34′ E.

Anchoring within the Prohibited Zone and less than one mile from the Kole loading point is prohibited.
NAVIGATION AIDS: The Elf-Serepca operating facilities located in the Rio Del Rey are protected by a zone where navigation is prohibited. Permission to enter this zone can only be obtained from Elf-Serepca. Elf-Serepca prohibited zone is enclosed by following coordinates:
Lat. 04° 13′ N., Long. 08° 22′ 36″ E.
Lat. 04° 13′ N., Long. 08° 29′ E.
Lat. 04° 13′ N., Long. 08° 36′ E.
Lat. 04° 18′ N., Long. 08° 41′ E.
Lat. 04° 26′ N., Long. 08° 34′ E.
Lat. 04° 26′ N., Long. 08° 25′ E.
Lat. 04° 19′ N., Long. 08° 22′ E.

In addition, all platforms and the floating storage facility "Serepca 1" within this zone are equipped with white lights which flash the letter "U" every 15 seconds.

The main loading point "KLB 2", is located at Lat. 04° 13′ 21″ N., Long. 08° 33′ 31″ E. It is a yellow buoy with a white light which flashes the letter "U" every 15 seconds (Range: 6 miles – radar reflector).

The emergency loading point, "KLB 1", is located at Lat. 04° 14′ 57″ N., Long. 08° 33′ 07″ E. and its markings are identical to those for "KLB 2". "KLB 1" Loading Point is presently not in use.

A floating hose which can float around each buoy over a radius of 260 m. is marked by small white intermittent lights.
Fog Signals Inside of the Prohibited Area:

Fog horns with a range of 2 nautical miles send the letter "U" every 30 seconds when the horizontal visibility is below 1 mile at the following positions:

Oil production platform "Ekoundou"	Lat. 04° 16′ 28″ N. Long. 08° 25′ 10″ E.
Oil production platform "Kole"	Lat. 04° 16′ 56″ N. Long. 08° 34′ 03″ E.
Floating storage "Serepca 1"	Lat. 04° 15′ 42″ N. Long. 08° 33′ 28″ E.
KLB 1 Loading buoy	Lat. 04° 14′ 57″ N. Long. 08° 33′ 07″ E.
KLB 2 Loading buoy	Lat. 04° 13′ 21″ N. Long. 08° 33′ 31″ E.

RADIO: The vessels should send their ETA to Elf Serepca, B.P. 2214/ 2215. Tel: 42.13.66/42.17.85/40.76.20/40.10.28 Douala. Telex: 5299 KN Elferap.

Via Coastal Station – Douala Radio.
Call signal: "TJC 5", "TJC 6" or "TJC 8".
The Coastal Station works on 500 kHz and 8718 kHz.
Transmitter Power: 1 kw.

Listening Hours: Permanent watch from 0500 – 2000 hrs. GMT on 500 kHz, 15 minutes transmission at 0600 – 0700 – 0800 – 0900 – 1100 – 1300 – 1500 – 1600 – 1700 – 1800 – 1900 hrs. GMT on the 8 MHz band.
Kole Terminal – "Serepca 1" Floating Storage Facility:
"Serepca 1" – Call sign: "TJAR" – "Kole Oil Terminal".

Continuous VHF watch on Channel 16 and working on Channels 11 and 12.
Arrival Advice: Advise "Elf Serepca" 72 hours, 48 hours and 24 hours before arrival, also advise any changes.
MAX. SIZE: Maximum permissible draft is 22 m. (72 ft.) at "KLB 2" and 16 m. (53 ft.) at "KLB 1". However, Elf Serepca may reduce these drafts should meteorological conditions be unfavourable.

Minimum underkeel clearance 4.5 m. (15 ft.).

HEALTH: Health inspection carried out by doctor or the Pilot. Master to have ready for inspection the following:

Maritime Declaration of Health
Derat Certificate
Vaccination Certificate of the Crew

In case of infectious disease on board, contact the Head Doctor or the Douala Border Health Police B.P. 1115 – Tel: 42.36.33, through the Harbour Master.

TUGS: A supply vessel is provided to assist with mooring.

BERTHING: The Elf-Serepca Kole loading points are SPMs.

The bow of the vessel is moored to a buoy consisting of a square (KLB 2) or cylindrical (KLB 1) float. The buoys are anchored by chains with 6 drilled piles. Moorings extend for a radius of 240 m. around the buoys.

Buoys "KLB 1" and "KLB 2" and the floating storage facility "Serepca 1" are respectively connected by 3,000 m. long (36 in. diameter) and 4,600 m. long (24 in. diameter) sealines. Each buoy is connected to the sealine (PLEM) by 2 underwater 20 in. hoses.

For loading, a 24 in. floating hose with 2×16 in. lines at its end connects the buoys to the tanker.

The "KLB 2" loading point is designed for the mooring and loading of tankers from 50,000 to 250,000 tonnes D.W.; "KLB 1" is limited to 150,000 tonnes D.W. maximum. Given the useful storage capacity, the quantity which may be loaded at Kole is limited to approximately 120,000 tonnes.

Water depth at Buoys "KLB 1" and "KLB 2" is 23.5 m. and 30.5 m. respectively at chart datum.

Mooring: Mooring ropes shall be supplied by Elf Serepca. The vessel shall be ready to embark 2 mooring ropes, one on the starboard side, and the other on the port side. Each rope consists of 46 m. of nylon of 13 in. circumference and a 8 m. chain, diameter 64 mm. Each rope is equipped with a polypropylene inhaul of 10 in. circumference and 150 m. long for one and 80 m. for the other.

Messengers are passed to the vessel by a motor-boat. The vessel shall prepare 2 ropes at the bow for taking the messengers onboard.

Mooring is carried out by day only (between 0600 hrs. and 1800 hrs.). In the afternoon, vessel must arrive not later than 1600 hrs. for immediate berthing.

Sailing is carried out immediately after completion of loading, day and night.

The ship's manifold shall be prepared on the port side for connection with the 2×16 in. flexible hoses.

BALLAST/POLLUTION:

Ballast on Arrival: Ship must arrive with sufficient ballast and correct trim to be able to manoeuvre in complete safety:

The ballast must not be less than 30% of the deadweight. Deballasting will not be allowed without the agreement of the Pilot.

The storage installation is not equipped to receive dirty ballast. The vessel shall, therefore, arrive with clean ballast.

Any vessel approaching with dirty ballast may be forced to leave the loading point and delays arising therefrom shall be to the vessel's account. Acceptance of Notice of Readiness would be rectified accordingly.

It is forbidden to throw into the sea any cinders, burning materials, objects and waste of any kind.

The ship's Master shall be responsible for any spills or pollution and any other difficulties which may involve discharge of oil. The terminal is equipped with an anti-pollution first aid device.

Scuppers shall be plugged during the whole loading time.

LOADING: *Notice:* Notice of Readiness shall be sent to Elf Serepca.

Connection of Flexible Hoses: Loading of the vessel shall be carried out through 1 line of 220 m. of 24 in. flexible floating hoses, terminating in 2×36 m. lengths of 16 in. flexible hose.

Connection with the ship's manifold shall be by 16 in. 150 ASA flanges. Elf Serepca can supply 16 in./10 in. and 16 in./12 in. reducers.

The tanker's derrick shall be rigged before mooring on the port side. The safe working load of the derrick hook shall be 10 tons minimum.

During connection and disconnection of the flexible hoses, assistance of the crew is essential, in particular for the working of winches and derricks. During the whole stay of the vessel at the loading point, the Pilot shall ensure that a safety watch is maintained onboard. The Elf Serepca Representative carries out the duties of Head of Loading and remains in contact with the terminal.

During the entire loading operation, the Elf-Serepca service vessel shall remain available to the tanker; after the loading hoses have been taken aboard the tanker, the service vessel can be used to move the tanker away from the buoy. A hawser shall be located at the stern of the tanker to be used for towing.

A ladder must be kept permanently ready alongside the vessel so as to permit access by the team in charge of the flexible hoses.

Loading: Loading may be carried out with a maximum flow of 4,400 tonnes per hour. The maximum capacity of each part loading is approximately 120,000 tons.

Inspection of tanks after deballasting and ullages after loading shall be taken in the presence of the Loading Supervisor representing Elf Serepca.

The terminal shall place on board the vessel sealed samples of the cargo.

Twenty minutes before the end of loading, the vessel shall notify the terminal by VHF so that pumping may be stopped accordingly.

During Loading: All the hull valves shall be closed except those required for water circulation.

The scuppers of the main deck shall be plugged.

Two fire hoses shall be connected and placed, one at the bow, the other at the stern of the vessel. The fire pump shall be maintained under pressure.

In case of electrical storms, loading may be stopped if necessary.

In case of fire on board a vessel moored at the loading point the Master shall give the alarm by means of short whistle blasts at short intervals. He shall be responsible for the implementation of technical means of fire fighting, maintenance of stability and safety on his vessel. He shall take the required steps to leave should he be required to do so.

MEDICAL: Hospitals, clinics and doctors in Douala. Transportation carried out by Elf at vessels expense.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: At Douala: Denmark, France, Germany, Lebanon, Monaco, Netherlands, Norway, Sweden and U.S.A.

REPAIRS: There are well-equipped repair workshops at Douala.

AIRPORT: 4 km. from Douala. 1 or 2 flights daily to Europe. Several flights weekly to U.S.A.

TIME: GMT plus 1 hour.

GENERAL: *Charts:* French Chart No. 5380 and British Chart No. 1860.

Safety: During the vessel's stay at the loading point the Master shall:

Maintain on board sufficient crew for handling of the vessel and moorings and fire fighting.

Maintain the engines ready for manoeuvring.

Ensure that the moorings function properly without any undue stress or wear.

Ensure that the floating hoses do not wear out or rub, thus causing deterioration.

Ensure that the vessel does not make contact with the buoy either by change in current or change in the direction of the wind or for any other reason. The service vessel moored at the stern of the tanker ensures correct positioning upon instructions from the Pilot, if necessary.

Fire Fighting: It is forbidden to:

Smoke, utilise naked lights or tools liable to give rise to sparks outside the areas normally authorized on a tanker.

Leave the anchors outside the hawse pipe.

Make any repairs or carry out maintenance on deck.

Turn the propellers.

Utilise in the areas classified as dangerous any equipment or tools of a type not recognised for this use by a competent organization. Elf Serepca reserves the right to take any steps it may deem necessary in case of danger and in particular stop loading.

Stores: Two ship chandlers at Douala can supply the vessel with any foodstuffs they need. But the distance between the Kole Terminal and Douala makes the process very difficult.

Elf Serepca can, in no way, be in charge of the orders and the transportation of foodstuffs.

Territorial Waters: The sovereignty of the Republic of Cameroon extends to 50 nautical miles from the lowest sea watermark along the coast.

Currency: Legal currency is CFA Francs. 1 CFA Franc = 0.01 French Francs.

Meteorology: The rainy season (monsoon) extends from May to September. The dry season extends over a period of 2 to 3 months that is to say from December to February.

Air Temperature: The air temperature varies on an average from 22° C to 30° C.

Sea Temperature: On the surface, the sea temperature varies from 29° C at the beginning of the year to 25° C in July, August and September.

Visibility: Owing to the Harmattan, a hot wind blowing from the Sahara, visibility can be reduced to 1 or 2 miles from December to February. During the rainy season, and especially in June, July and September, visibility can be reduced to 0.5 miles due to rain.

Tides: The tides are of a semi-daily type and the Kole cycle is 15 minutes in advance of Bonny Town. Maximum amplitude is 2.30 m., mean amplitude is: Spring tides 1.80 m. Neap tides 0.90 m.

Wind: Generally from the South and usually less than 15 knots.

Strong winds last for a short period and blow from the East or the S.S.E. in connection with tornadoes.

Current: In the Kole area currents may be of a very changeable speed and direction. However, the ruling currents are the tidal currents.

Slack tide is S.S.E. and flood tide N.N.W. On the surface its speed can reach 3 knots.

Swell: The direction of the swell is S.S.W. (210°). The average height is 2.5 m., period 8 seconds. The waves generated by the local winds are scarcely higher than 2 m.

AUTHORITY: Elf Serepca, B.P. 2214 and B.P. 2215, Douala, United Republic of Cameroon. *Tel:* 421366, 421785, 407620, 401028. *Telex:* 5299 Kn Elferap. *FAX:* 400020 (Attn: Terminal). *Contact:* Chief of Terminal Operations.

AGENT: See "Douala".

MOUDI MARINE TERMINAL: 04.07 N. 08.29 E.

(See Plan)

LOCATION: The Moudi Field, of which Kelt Cameroon is the operator, is situated in the Gulf of Guinea about 50 nautical miles West of the town of Limbe (Victoria) in Cameroon, in depths of 50 m. to 58 m.

The Moudi Field comprises the following units:

2 well platforms: VA (Lat. 4° 08′ 11″ N., Long. 8° 27′ 24″ E.) and VB (Lat. 4° 09′ 22″ N., Long. 8° 25′ 55″ E.)
1 production platform; VT (Lat. 4° 08′ 09″ N., Long. 8° 27′ 25″ E.)
1 loading terminal consisting of: 1 floating storage unit (F.S.U.), the "Moudi" (Lat. 4° 08′ 09″ N., Long. 8° 28′ 49″ E.). 1 Single Point Mooring berth (S.P.M.) (Lat. 4° 07′ 00″ N., Long. 8° 29′ 11″ E.)

DOCUMENTS:
Maritime Declaration of Health.
Derat or Exemption Certificate.
Vaccination Certificates for crew and passengers.

After ship's arrival at Moudi Marine Terminal, the Kelt Cameroon Representative boards and the Master signs the following documents:
Notice of Readiness.
Acknowledgement of receipt by the Master of Terminal Regulations.
Safety check list before loading.

Following commercial documents are filled out by Terminal and presented to the Master:
Bill of Lading.
Certificate of Quality and Quantity.
Certificate of Origin.
Cargo Manifest.
Time Sheet and Loading Report.
Ullage Report.
Receipt for Samples.
Receipt for Documents.

The Kelt Cameroon Representatives on board the ship shall assist with the inspection of tanks after deballasting and ullage measurements after loading.

PILOTAGE: Pilotage is mandatory and carried out by the Pilots of the National Port Bureau of Cameroon.

The Pilot, the Terminal Representative, the Mooring Master, the Cargo Inspector and the Customs Officer must come on board the vessel before the vessel starts mooring to the buoy.

On board the ship, the Pilot acts as a nautical adviser to the Master for handling the ship at the entry and exit of the pilot zone or for movements within this zone.

His advice shall commit neither his responsibility nor that of Kelt Cameroon.

Any ship mooring to the loading buoy is required to take the Terminal Pilot on board in the pilot zone extending from anchorage zone to the S.P.M.

The Pilot call signals are those in the International Code. The Pilot may be contacted by VHF Channel 16.

Pilot Boat:

The assistance boat insures the pilotage functions (transport of Pilot and Kelt Cameroon employees, transport of equipment required for mooring and hose connections).

It is at the ship's disposal under Pilot's instruction during the whole stay of the ship at the loading buoy for:
Tug assistance (bollard pull 100 tons).
Approach/Mooring assistance/launching of an inflatable dinghy, clearance of hoses.

Exceptionally:
Fire-fighting (2 guns, total delivery 600 cu.m./hr.)
Anti-pollution Assistance (Dispersant and Anti-pollution Spray-ramp, 25 cu.m./hr.)

During operations, the assistance boat monitors permanently the operating VHF frequency and Channel 13.

NAVIGATION AIDS:

Fixed Platforms: The 3 fixed platforms, VA, VB and VT are all equipped with the following:
4 white lights at the 4 corners, range 8 miles, flashing the letter U(· · –) operated by sun switch,
2 fixed white boat landing lights, range 3.5 miles.
2 foghorns, range 1.5 miles, emitting the letter "U", operated manually (visibility less than 1.5 miles).
1 identification panel fixed to the South side displaying "Victoria VA", "Victoria VB", "Victoria VT", respectively in black letters 1 m. high on a yellow background.

Platform VT is also equipped with a fixed red light on the crane, and fixed yellow and blue lights on the helideck.

VA/VT catwalks and flare are equipped with 3 and 4 fixed equidistant white lights respectively.

Floating Storage Unit (Moudi): The Moudi, a converted 220,000 ton tanker, carries the lights of a ship at anchor, 2×360° white lights, 1 in the bow and 1 in the stern. It is equipped with a foghorn, range 1.5 miles emitting the letter "U". It carries the inscription "Moudi" painted in white letters 1.5 m. high on the black hull at port and starboard in the bow and at the stern.

SPM (buoy/hoses): The buoy, painted orange, is equipped with the following:
1 fixed white light, range 5 miles, flashing the letter "U" every 15 secs,
a hand-operated foghorn, range 2 miles, emitting the letter "U" every 30 secs,
a radar reflector.

The floating hoses are equipped with 3 white winker lights (60 flashes per minute).

The ship shall provide adequate and safe means to take the Pilot on board on the most sheltered side.

Pilot Ladders:

1. In all ships where the distance from sea level to the point of access to, or from, the ship exceeds 5 m. (O.N.P.C. requirements), the ship must be provided to embark and disembark Pilots by means of the accommodation ladder in conjunction with a pilot ladder. The ship should carry an accommodation ladder on each side, unless such ladder is capable of being transferred.

2. The ladder should be sited leading aft. When in use, the lower end of the ladder should rest firmly against the ship's side within the parallel body length of the ship and within the mid-ship half section and clear of all discharges. Equally safe arrangements which might be more suitable for special types of ships should be acceptable.

3. The length of the accommodation ladder should be sufficient to ensure that its degree of slope does not exceed 55 degrees.

4. The lower platform of the accommodation ladder should be in a horizontal position when in use.

5. Intermediate platforms, if fitted, should be self-levelling. Treads and steps of the accommodation ladder should be so designed that an adequate and safe foothold is given at the operative angles.

6. The ladder and platforms should be equipped on both sides with stanchions and rigid handrails, but if handropes are used they should be tight and properly secured. The vertical space between the handrail or handrope and the stringers of the ladder should be securely fenced.

7. The pilot ladder should be rigged immediately adjacent to the lower platform of the accommodation ladder and the upper end should extend at least 2 metres above the lower platform.

8. Lighting should be provided at night such that the full length of the ladder is adequately lit.

9. If a trap door is fitted in lower platform to allow access from and to the pilot ladder, the aperture should be not less than 750 mm.×750 mm. In this case the after part of the lower platform should also be fenced as in paragraph 6, and the pilot ladder should extend above the lower platform to the height of the handrail.

10. The accommodation ladder(s), together with any suspension arrangements or attachments, fitted and intended for use in accordance with this Recommendation should be the satisfaction of the Administration.

ANCHORAGES: The anchorage zone is a circle 1 mile in radius centred about 2 miles E.N.E. from the SPM, at the point with coordinates: Lat. 4° 07' 33" N., Long. 8° 31' 04" E.

Approach to the anchorage should be made from the East. With the S.P.M. as the centre, vessels should steer a course of between 210° and 330°. (See "Plan").

RESTRICTIONS: The danger zone in which routine navigation and fishing activities are prohibited is defined by the four points AA, BB, CC and DD, of which the coordinates are given below. The field installations are situated about half a mile inside the limits.
AA: Lat. 4° 09' 10" N., Long. 8° 29' 43" E.
BB: Lat. 4° 06' 28" N., Long. 8° 29' 43" E.
CC: Lat. 4° 06' 28" N., Long. 8° 25' 24" E.
DD: Lat. 4° 09' 58" N., Long. 8° 25' 24" E.

Ship moorings and connections take place from 0600 hrs. to 1800 hrs. weather and sea permitting. They may be performed by night, on Kelt Cameroon preliminary agreement conditions. Departures from berth take place day and night.

MAX. SIZE: The loading station is designed for the mooring and loading of ships from 50,000 d.w.t. to 280,000 d.w.t.

The water depth at the buoy is 57 m. to hydrographic zero.

HEALTH: Sanitary boarding is carried out by the Doctor in Chief of the Border Health Police. Pilots are entitled to carry out this inspection. In case of infectious disease on board, contact the Doctor in Chief of the Border Health Police through the Harbour Master before ship's arrival at the terminal. For the application of Health Regulations, the ship shall use the signals in the International Code of Signals.

RADIO: Ships shall announce their arrival by telegram sent 72 hours before their planned arrival. This telegram, addressed to Kelt Cameroon shall be sent via Douala Radio and shall announce its ETA in GMT, as well as all information concerning the planned loading:
Arrival ballast.
Deballasting time.
Max. loading rate.
Cargo quantity.
Derrick lifting capacity.
Dimensions of manifold flanges.
Forward anchoring system characteristics.
Sanitary conditions.

The ship shall repeat contact 48 hours and 24 hours before its arrival and correct its ETA if necessary.

Communications between ship and base through Douala Radio should be in decameter or hectometer wave.

Douala Radio works on frequencies 500 kHz, 8449 kHz and 13,069 kHz. Call sign TJC 5, TJC 6 and TJC 8.

During radio contacts preceding the arrival of the ship at the site, the ship shall receive instructions from the Terminal Superintendent for direct mooring or, on the contrary, standby anchorage in the zone defined.

VHF: When 60 miles from the Terminal, the ship shall make contact by VHF on Channels 16 or 13 and then switch to the operating frequencies as indicated below.

The ship shall then receive the instructions required for its mooring to the loading buoy.

Port regulations are communicated as soon as possible to the Master, who shall acknowledge receipt by letter.

Monitoring as well as safety frequency are provided on Channel 16. Also see "Pilotage".

Communications between the ship and the Terminal are provided on:
VHF Marine Total, Channel 69 (156.475 MHz)
VHF (land) between base and Douala headquarters:
Tx: 75.550 MHz Rx 80.550 MHz
Tx: 75.650 MHz Rx 80.650 MHz
Tx: 75.700 MHz Rx 80.700 MHz
VHF Total field communication:
Tx: 159.725 MHz Rx 155.125 MHz

TUGS: See "Pilotage – Pilot Boat".

BERTHING: The Moudi Loading Buoy is of the CALM type (Catenary Anchor Leg Mooring) with a single mooring point.

It consists essentially of a cylindrical body 12 m. in diameter and 4.7 m. high, equipped at the bottom with a skirt projecting 1.7 m., and with a turn-table. The buoy is anchored by means of 6 chains extending in a radius of 380 m. around it.

A 255 m. long line of 24 in. floating hoses terminates in 2×37 m. long extensions of 16 in. hoses equipped with 16 in. Camlock type quick couplings at the ends for buoy/ship connection.

A mooring line and its accessories are used to moor the ship to the turn-table.

The mooring personnel carrying out the polypropylene connection from the buoy to the "Messenger Line" of the ship are provided by the Terminal.

Head of Loading: Representative of Kelt Cameroon co-ordinates all the following operations:

Mooring
Connection
Loading.

He is responsible for ensuring compliance with Port Regulations at the Terminal. His instructions shall not be questioned or disputed and he will not check the Pilot's action, who is the Harbour Master's representative at the Terminal.

He may refuse or prohibit, after Pilot's advice, the entry of the ship in cases such as but not limited to:

unfavourable weather conditions,
ship insufficiently equipped or possessing defective equipment,
insufficient or dirty ballast.

He is in charge of obtaining the agreement to start loading. He makes sure of the correct application of safety instructions by the shipboard personnel and of the loading plan.

Once the ship is moored, he may ask the Pilot's advice for an early removal from berth of the ship or may suspend loading of the ship for reasons such as but not limited to:

safety
bad weather
non-compliance with instructions
insufficient drainage of cargo tanks
dumping of polluted water into the sea
incidents affecting the loading buoy or the pumping installation.

During loading operations he insures the radio co-ordination between the ship and the Terminal.

Mooring Master: He acts under the direction of the Head of Terminal. Mainly in charge of inspection of specifically marine equipment, he shall assist and inform the Pilot and the Head of Terminal during approach, mooring, connection/disconnection and loading phases.

Cargo Inspector: Nominated by the buyer, he is in charge of cargo control.

Customs Officer: The attendance of an Agent of the Administration of Customs is compulsory onboard of lifting vessels.

Mooring and Connection: The engines shall be in condition to deliver their maximum capacity if required. The ship's port derrick shall be rigged to project 1 m. over the ship's side and to lift a minimum load of 10 tons.

The Pilot shall instruct the Master of the ship of the standard manoeuvres for berthing and mooring.

Mooring and connection operations shall be performed by the ship's crew.

Once it is moored, the ship shall keep its engines ready to manoeuvre. No work reducing the ship's manoeuvring potential shall be undertaken without the approval of the Terminal Superintendent or his assistant.

The ship's Master shall ensure that the mooring lines guarantee a secure mooring at all times. He shall make sure that the mooring units operate to satisfactory conditions, in order to minimise wear and to prevent their breakage.

LOADING: When the ship is absolutely ready to perform loading operations, the ship's Master shall present the "Notice of Readiness". The "Notice of Readiness" shall not be accepted if the Terminal is closed.

Once the mooring and hose connections have been completed, the check list shall be checked and signed jointly before the start of loading by the Kelt Cameroon Representative and the ship's Master.

The Terminal Superintendent shall issue the order to start pumping, after the ship has confirmed that she is ready to load and shall notify the ship of the progress of loading operations.

Radio connections shall be checked frequently. All information concerning flow rate, gas pressure, change in cargo tank, cumulative quantities, etc., shall be communicated between the ship and the control room.

30 minutes before the end of loading, the ship shall advise the Loading Master in order to stop pumping in due time.

In the case of a storm or leakage, loading shall be suspended.

Measurement of the ullages, temperatures and draft after loading, for control purposes, shall be performed in the presence of the Kelt Cameroon representative.

Throughout the loading period, the ship shall carry the following:

- by day, a red flag on the masthead ("B" flag of International Code),
- by night, a red light visible 360°.

This requirement shall also be valid for ships which are loaded, moored, or manoeuvring in the danger zone, and also for ships that are not declared "gas free".

The Terminal shall provide the ship with representative samples of the cargo.

Lookout: During the whole stay of the vessel at the SPM, the Pilot ensures watch of safety on board.

Permanent bow lookout: The Kelt Cameroon representative and the Pilot will demand permanent bow watch by a member of the ship's crew and shall be advised of the tanker's position in relation to the buoy.

Permanent lookout at manifold: As soon as connections are made, the Kelt Cameroon representative shall demand permanent manifold watch by a member of the ship's crew and shall be advised of the configuration of the tanker rail hoses and if any leaks in the manifold.

BALLAST: The Terminal is not provided with facilities for treating ballast water. Ships shall therefore arrive with clean ballast. The minimum arrival ballast shall be equal to about 30% of the ship's d.w.t., ensuring a draft consistent with safe manoeuvring, a reasonable trim and a propeller submerged, to the satisfaction of the Pilot.

Inspection of the ballast to be unloaded shall be made on arrival, and any ship arriving with dirty ballast may be required to leave the buoy, and to bear responsibility for any delay resulting from this. The acceptance of the "Notice of Readiness" shall be corrected to show this.

Deballasting operations shall only begin with the agreement of the Head of Loading and the Pilot. As a rule, loading operations shall not begin until deballasting is completed, if the ship is not fitted out for simultaneous deballasting and loading operations. An inspection of tanks shall be carried out after deballasting in the presence of the Kelt Cameroon representative.

POLLUTION: It is prohibited to dump any objects or waste of any type into the sea.

It is also prohibited to dump into the sea any liquid liable to ignite or to pollute the water.

The ship's scuppers must be closed/plugged during the loading operations.

A system designed to collect any drips and leaks shall be placed under the hose/manifold connection.

In the case of water pollution caused by the ship, for any reason whatsoever, Kelt Cameroon declines any responsibility, and the ship shall be held responsible for the direct consequences of this pollution. In particular, the assistance costs incurred by Kelt Cameroon shall be passed on to the ship.

Kelt Cameroon also declines any responsibility concerning any infringement by the ship of international regulations or Port Regulations that could be ascertained by the Pilot or any Kelt Cameroon employee. Written reservations will be expressed and report will be drawn-up.

Objects falling into the sea: Any object falling into the sea shall be stated in a declaration to the Terminal Superintendent, who shall prescribe the measures to be taken for its recovery. Similarly, the recovery or removal of various objects or equipment stationed or deposited in the danger zone shall be carried out automatically, whenever the owner or operator of the said objects or equipment cannot or does not wish to perform this removal himself.

Recovery and removal shall be carried out at the cost, risk and perils of the parties concerned. For any object, (or person) that has fallen into the sea, a written report shall be addressed to the Harbour Master.

MEDICAL: Emergency cases are evacuated to Douala by Kelt Cameroon at ship's expense. Douala has a hospital, clinics and several specialist doctors.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Consulates in Douala:

Denmark
France
Germany
Greece
Lebanon
Monaco
Norway
Sweden
U.S.A.

REPAIRS Not available at Moudi Terminal. However, well equipped repair facilities are available at Douala.

REPATRIATION: Not permitted.

AIRPORT: The nearest airport is 4 km. from Douala. 1 or 2 flights daily for Europe, several flights weekly for the U.S.A. (with changes in Europe).

TIME: GMT plus 1 hour.

STORING: Not possible at Limbe. 2 maritime victualling companies are established in Douala.

GARBAGE DISPOSAL: Offshore Terminal, so no facilties available.

WASTE OIL DISPOSAL: Offshore Terminal, so no facilities available.

SEAMAN'S CLUBS: None.

GENERAL: *Useful Publications:* Ships planning to call at the Moudi Marine Terminal shall refer to the following regulations and documents:

- Safety of Life at Sea,
- IALA "A" system for Navigation Aids,
- International Regulations for Preventing Collisions at Sea,
- Marine Charts Nos. 5633, 5602, 6076 and 5380, of the Service Hydrographique de la Marine (French Marine Hydrographic Service),
- Marine Chart No. 1860 from Hydrographic Office of the Navy,
- ISGOTT (International Safety Guide for Oil Tankers and Terminals (OCIMF/ICS Publication)).

Meteorology: The year is characterised by 2 seasons: Rainy season from June to September, variable season from October to May with low rain frequency.

The outdoor temperature varies on average from 22°C/72°F (July and August) to 30°C/86°F (February to April).

Water temperature at the surface varies from 25°C/77°F (June to September) to 29°C/84°F (February).

The prevailing winds are 4 knots to 10 knots from the S.W. sector throughout the year. The strongest winds, up to 45 knots, are rare and occur from February to May, in October, and in December. They may accompany tornadoes generally travelling from East to West.

Visibility is rarely very good and only rarely exceeds 11 nautical miles. It may be reduced to a half mile by rainfall, especially from June to September.

Tides, Currents, Waves: Tides at the Moudi site are of the semi-diurnal type 35 minutes in advance of those at Bonny (Admiralty Tide Table, Volume 2) or about 1.5 hours in advance of those of Limbe (Victoria) (Service Hydrographique de la Marine).

Surface currents, mainly influenced by the Guinea Currents, generally flow towards the S.W. and rarely exceed a speed of 1 knot.

The predominant direction of waves is S.S.W., with a trough from 0.6 m. to 1.2 m. from October to February, and a trough from 1.3 m. to 1.9 m. from February to September. Mean period 8 seconds to 10 seconds.

SAFETY: *Nautical Safety Rules:* Apart from export tankers using the loading buoy, entry into the "danger zone" is prohibited to all ships except ships of the Administration or those necessary for the development or production of the Moudi Field.

These vessels shall be equipped with fire-fighting facilities and shall not be left without surveillance.

Moreover, it is prohibited in the "danger zone" to establish anchorages, permanent or otherwise, and ships or floating equipment are prohibited from dropping their anchors.

Safety Rules Related to Weather Conditions: Throughout the presence of the ship at the loading buoy, the ship's Master shall ensure that the standard safety regulations are observed, and especially the following:

Keep in service a sufficient portion of the crew in order to guarantee trouble-free manoeuvring of the ship and operating the preliminary fire-fighting facilities.

Keep the engines ready to manoeuvre within a period specified by the Loading Master.

Have a steel wire safety towline, in mousing arrangement, placed starboard bow and stern, in such a manner that the eye can be secured easily by an assistance vessel if the latter is present on the site.

Fire-Fighting Rules: Any person who discovers a fire at the Terminal shall immediately sound the alarm.

If the fire breaks out on the ship, the latter shall transmit the distress signals specified in the international regulations.

Fire-Fighting: The ship's Master shall be responsible for the use of the technical fire-fighting facilities, and the maintenance of the ship's stability and safety.

Throughout the presence of the ship at the loading buoy, the following is prohibited:

Smoking, the use of naked flames or tools liable to generate sparks outside areas normally authorised on a tanker.

Repairs, handling operations or work liable to generate sparks.

The use, in zones classified as dangerous, of equipment or tools which are not of a type approved for this service by a competent agency.

Turning of the propellers, except for steam-ships.

Leaving open hatches and doors leading on to the main deck.

Firing shots.

As a rule, the ships shall comply with the safety requirements specified in the International Safety Guide for Oil Tankers and Terminals. In particular, it shall:

Position and connect 2 fire-hose nozzles in the bow and stern of the ship, ready for use.

Keep the fire-fighting system under pressure.

Position hand extinguishers of a suitable type near the manifold.

Kelt Cameroon reserves the right to take any measures that it deems effective in case of danger and, in particular the postponement or interruption of loading operations.

Emergency Measures: In the case of incidents/accidents which occur during loading, the Loading Master and the Pilot shall be notified immediately in order to take the measures imposed by the incident, promptly and in association with the Terminal Superintendent.

In all cases, the Master shall be capable of coping with these situations rapidly and effectively.

SHIPMASTER'S REPORT: June 1995.

Operations: Loading.

Cargo: Crude.

Connections: Hoses.

Loading: During mooring, a zodiac boat connects ship's messenger to buoy pick-up line. It is therefore impossible to use the recommended 75 mm. messenger from the ship due to the practicalities of handling such a big line from such a small boat. Ship's 32 mm. messenger was used safely by ship's staff.

Vessel had to accommodate 1 pilot, 2 surveyors, 2 Customs officials and 2 Loading Masters without any prior warning from either Terminal or Agent.

Loading rate slow, between 3,000 t.p.h. and 4,000 t.p.h.

Only one securing line to SPM, however, this considered safe up to 280,000 tonnes d.w.t.

Check List thoroughly certified by ship, but to Terminal merely a bit of paper on which to obtain a signature.

Note/s of Protest issued by Ship: Yes.

Recommendations/Requirements: I have not been to a buoy mooring yet that is happy to use 75 mm. messenger from ship, whether or not they are practically able to cope with it.

AUTHORITY: *Operator:* Kelt Cameroon, BP 1225, Douala, Cameroon.
Tel: (237) 42-32-91. *Telex:* 5698 Kn, 5385 Kn. *FAX:* (237) 42-43-59.
Contact: Bernard Castanet, General Manager.

NOTES

Canada

GENERAL (See Plan)

PUBLIC HARBOURS AND PUBLIC PORT FACILITIES: The Canadian port system is a diversified, multi-layered group of over 350 commercially oriented ports. Three major port systems serve commercial marine transportation and the transshipment of national and international waterborne cargo viz. Public Harbours and Ports, Canada Ports Corporation and the Harbour Commissions, all of which fall under various forms of federal jurisdiction, through the Minister of Transport.

Transport Canada maintains, administers and develops public port facilities and public harbours at approximately 300 sites across Canada primarily to assist commercial transportation.

The program for the public harbours and public port facilities is administered by the Canadian Coast Guard's Harbours and Ports Directorate, through five regional offices, and is coordinated by a headquarters unit in Ottawa. Local port administration varies according to the complexity of local operations. A small number of sites are supervised by full-time public servants who serve as port or area managers. In most cases, Transport Canada is represented locally by fee-of-office appointees known as Harbour Masters or Wharfingers.

User Fees are assessed under the Public Harbours and Port Facilities Act, according to trade practice. Typical charges include:

Harbour Dues: A charge assessed against a vessel according to its size and previous destination.

Berthage: A charge for occupying a berth at a port. The charge is based on the vessel's size and its length of stay.

Wharfage: A charge for moving cargo over a public wharf. The fee is based on cargo type, with a rate per tonne or cubic metre.

Storage: A charge for use of sheds or open spaces for assembling or distributing cargoes. The charge depends on space occupied and duration of use.

Letting: A rent, usually based on the market value of the property.

Transport Canada publishes a tariff, as a Schedule, for all charges except lettings, in the Government Wharves Regulations and the Public Harbours Regulations. If Transport Canada must undertake improvements for the benefit of a major user, the Department may supplement or replace these tariffs with negotiated contracts designed to improve the overall rate of cost recovery on investment.

Vessel operators, their Owners or Agents trading with Canada, desiring a berth in a public harbour and/or at a public port facility or, interested in obtaining specific details concerning the operations at "public harbours and public port facilities", are requested to contact and make application, as far in advance of date of docking as possible, to the appropriate regional management at the following address(es), specifying the name of the vessel, date of docking, sailing, nature and quantity of cargo to be handled, and of any special requirements.

Labrador/Newfoundland:

Regional Director, Canadian Coast Guard, Harbours and Ports, 34 Harvey Road, St.John's, Newfoundland, Canada A1C 6H8. Tel: (709) 772-5154. Fax: (709) 772-5127.

Maritimes (Nova Scotia, Prince Edward Island, New Brunswick):

Regional Director, Canadian Coast Guard, Harbours and Ports, Royal Bank Building, Twin Towers, 44 Portland Street, Dartmouth, Nova Scotia, Canada B2Y 4K2. Tel: (902) 426-2588. Fax: (902) 426-3904.

Laurentian (Quebec):

Regional Director, Canadian Coast Guard, Harbours and Ports, Pratt Building, 104 Dalhousie Street, Quebec, Canada G1K 4B8. Tel: (418) 648-4101. Fax: (418) 648-7980.

Central (Ontario):

Regional Director, Canadian Coast Guard, Harbours and Ports, 201 Front Street North, Suite 703, Sarnia, Ontario, Canada N7T 8B1. Tel: (519) 383-1842. Fax: (519) 383-1996.

Western (British Columbia):

Regional Director, Canadian Coast Guard, Harbours and Ports, 800 Burrard Street, 10th Floor, Vancouver, British Columbia, Canada V6Z 2J8. Tel: (604) 631-3800. Fax: (604) 631-3809.

PILOTAGE REGULATIONS: Marine pilotage services in Eastern Canada are provided by the Atlantic, Laurentian and Great Lakes Pilotage Authorities, and in Western Canada by the Pacific Authority. These four Crown corporations may be contacted as follows:

Atlantic Pilotage Authority:

Purdy's Wharf, Tower 1, 1959 Upper Water Street, Suite 1402, Halifax, N.S., Canada B3J 3N2. Tel: (902) 426-2550. Fax: (902) 426-4004.

Laurentian Pilotage Authority:

715 Victoria Square, 6th Floor, Montreal, Quebec, Canada H2Y 2H7. Tel: (514) 283-6320. Fax: (514) 496-2409.

Great Lakes Pilotage Authority Ltd.:

P.O.Box 95, Cornwall, Ontario, Canada K6H 5R9. Tel: (613) 933-2991. Fax: (613) 932-3793.

Pacific Pilotage Authority:

300 – 1199 West Hastings Street, Vancouver, B.C., Canada V6E 4G9. Tel: (604) 666-6771. Fax: (604) 666-1647.

General information on pilotage services, including required notifications, pilot boarding stations and radio frequencies are contained in the Annual Edition of the Canadian Notices to Mariners (No. 23 of 1993).

Pilotage in British Columbia Waters: Pilot's accommodation aboard any ship must be clean, quiet, adequate and equivalent to a deck officer's cabin. On assignments where 2 Pilots are required, 2 such separate cabins must be supplied. Under no circumstances will Pilots accept ships' hospitals accommodation.

Two Pilots shall be assigned to a ship where:

(a) That ship requires the services of a Pilot on bridge watch for a period in excess of 8 consecutive hours, or

(b) The ship will travel more than 105 consecutive miles while under pilotage.

PILOTAGE: British Columbia Coast Pilots:

NOTICE: This Notice applies to all vessels over 350 g.t., arriving in Canadian Waters of British Columbia.

Notice of Requirement for a Pilot:

Pilot Stations:

Triple Island	48 hours
Cape Beale	48 hours
Brotchie Ledge	12 hours

The Master of a vessel may not advance his ETA after sending his 12 hour notice, and must confirm his ETA 4 hours before arriving at the pilot station.

In Harbour or Ports in the Region: The Master, Owner or Agent of a ship departing from a place where pilotage service is required shall place a Notice of Requirement in local time with the Pilotage Authority at least 12 hours before the Pilot or Pilots are required to be on board the transportation to the ship specified in the pilotage order, or at least 12 hours before the Pilot or Pilots are required to be on board the ship, if berthed at a place where Pilots are based.

Accommodation: All vessels intending transits longer than 105 miles in compulsory pilotage waters, and slow speed vessels not able to make a passage in less than 8 hours will be required to take 2 Pilots. Vessels requiring 2 Pilots must provide suitable accommodation, in 2 separate cabins. The pilot cabins must be clean and heated and have operational toilet facilities, either in the cabins or close by, fresh linen and blankets are to be provided. Cabins must be located in quiet areas of the ship and be officer rated, under no circumstances will hospitals be considered suitable.

Authority: The British Columbia Coast Pilots Ltd., 201-1199 West Hastings Street, Vancouver, B.C., Canada V6E 3T5. Tel: Victoria (604) 363-3878, Vancouver (604) 688-0291. Cel: 880-5223. Fax: (604) 688-5250.

NOTICE: *Non-Canadian Ships Compliance Certificate:* In September, 1983, the Shipping Federation of Canada advised the following:

We have been informed by the Canadian Coast Guard that many tankers are being diverted unexpectedly in mid-Atlantic to Canadian ports. Some of these vessels have never been involved in Canadian trade before and as a result do not have a Non-Canadian Ships' Compliance Certificate and are therefore in breach of Canadian regulations. The regulations governing the issuance of the certificate apply to all non-Canadian oil tankers of 500 g.r.t. or more trading in waters South of the 60° parallel of North Latitude. The regulations hinge on the 1930 and 1966 Solas Conventions, the navigating appliances regulations, the oil pollution prevention regulations, the charts and publications, regulations, etc. The certificate is valid for two years and essentially indicates that the ship complies with other Canadian regulations.

The Coast Guard has recently permitted several of these vessels to enter Canadian waters and has diverted the offenders to the nearest suitable port where ship inspectors ensure that the vessels meet Canadian standards prior to issuing a certificate. We have been informed by the Canadian Coast Guard that tankers which contravene the regulations will not be permitted to enter the Gulf of St. Lawrence. This diversion to an inspection port creates a loss of time for the shipowner and efforts must be made to correct the situation.

In waters other than Canadian, an inspector of the government of the state in which the ship is registered and representatives of recognised classification societies are empowered to issue the non-Canadian ships' compliance certificate on behalf of the Canadian Coast Guard.

ARCTIC POLLUTION PREVENTION CERTIFICATE:

Operators trading to Canada should be aware that all vessels, which intend to navigate in a shipping safety zone, should be in possession of an "Arctic Pollution Prevention Certificate". Ships over 100 gross tons with less than 453 cu.m. of oil on board must carry an Ice Advisory in certain areas during the Winter season.

No Arctic Pollution Prevention Certificate shall be issued to the owner or Master of a ship, unless the ship complies with the standards of Canada's Pollution Prevention Regulations. The certificate can be issued by one of the following below:

A. A (Canadian) Inspector, or

B. A surveyor working exclusively for

- (i) American Bureau of Shipping.
- (ii) Bureau Veritas.
- (iii) Det Norske Veritas.
- (iv) Germanischer Lloyd.
- (v) Lloyd's Register of Shipping.
- (vi) Nippon Kaiji Kyokai.
- (vii) Register of Shipping of Russia
- (viii) Registro Italiano Navale.
- (ix) Polski Rejestr Statkow.
- (x) Registrul Naval Roman.

Canadian shipping agents can assist vessel's Owners/Masters in obtaining the certificate.

NOTICE TO MARINERS:

NOTICE No. 10: Transmission of Estimated Time of Arrival:

In the interest of marine safety Masters should give an early indication of the vessel's ETA to the appropriate Port Authority and in this respect comply with any published instructions relating to this requirement. At ports where instructions have not been published, the ETA should be radioed in sufficient time for Port Authorities to make arrangements for the arrival of the vessel, taking into account actual conditions such as tide, size and draft of the vessel and notice as necessary to alert Pilots and towing services.

Notice to Mariners Nos. 25 and 26 also provides information on reporting procedures for specific areas.

Authority: Department of Transport (CGSN).

NOTICE No. 6: Ice Navigation, Routing and Requests for Icebreaker Assistance.

1. Hudson Strait and Canadian Arctic:

Arctic Canada Traffic System (Nordreg Canada). Mariners should be aware of the existence of the Arctic Canada Traffic System (Nordreg Canada) and the advantages of reporting to this system which is a voluntary Vessel Traffic Service (VTS) system covering the waters of Ungava Bay, Hudson Bay and James Bay, South of the parallel of 60° North Latitude and the waters to which the Arctic Waters Pollution Prevention Act applies. During the Arctic navigation season, a Nordreg office based at Iqaluit is staffed with an Ice Operations Officer who provides information on ice conditions and vessel routing in ice. Icebreaker assistance, when requested may be arranged through the Ice Operations Officer. For more detailed information on this VTS system, the definition of waters it covers and the requirements to make certain reports and obtain clearance, Mariners should refer to Notice No. 26 in this Annual Edition of Notices to Mariners.

For general information on ice conditions:

Address: NORDREG CANADA,
P.O.Box 718,
Iqaluit, N.W.T.
X0A 0H0.
Telephone: 819-979-5724.
Fax: (819) 979-4236.
Radiogram: Nordreg Canada.

2. East Coast and Gulf of St. Lawrence:

During the Winter navigation season a similar service is provided to ships intending to transit or to operate in East Coast and Gulf of St. Lawrence waters. Access to this service can be obtained by contacting the Eastern Canada Traffic System (ECAREG CANADA). ECAREG communications procedures are specified in the current Annual Edition of Notices to Mariners.

(a) For general information on ice conditions:

Address: Canadian Coast Guard,
Operations Centre – Maritime,
Ice Operations Section,
P.O.Box 1000,
Foot of Parker Street,
Dartmouth, N.S.
B2Y 3Z8.
Telephone: (902) 426-5664 or (902) 426-5665.
Telex: 019-22510.
Fax: (902) 426-6444.
Radiogram: ECAREG CANADA.

(b) For general information on ice conditions and icebreaker assistance in Newfoundland waters, East of Cape Chidley and Long. 58° 00′ W., including Labrador Coast and Hamilton Inlet:

Address: ECAREG CANADA
VTS Centre, St.John's,
P.O.Box 1300,
St. John's, Newfoundland,
A1C 6H8.
Telephone: (709) 772-2078 or 772-4580.
Telex: 016-4530.
Fax: (709) 772-5369.
Radiogram: ECAREG CANADA.

3. St. Lawrence River:

In the St. Lawrence River West of Long. 66° 00′ W. to Montreal, ship movement is under the general control of the Vessel Traffic Services (VTS) system. During the Winter navigation season, the ice operations centre will provide via "Escoumins Traffic", "Quebec Traffic", or "Montreal Traffic", the recommended ice routes to be used. Information regarding ice conditions and icebreaker assistance may also be requested from the traffic centres.

For general information on ice conditions:

Address: Canadian Coast Guard Fleet Systems,
Operations Centre – Quebec,
2nd Floor,
104 Dalhousie Street,
Quebec (Quebec), G1K 4B8.
Telephone: (418) 648-2442 or 648-2214.
Fax: (418) 648-7305.
Radiogram: Escoumins Traffic
Quebec Traffic
Montreal Traffic.

4. Canadian Great Lakes:

Vessels entering Canadian waters of the Great Lakes may obtain ice information, routing advice and request icebreaker assistance by contacting the following address:

Ice Toronto,
Canadian Coast Guard,
Transport Canada,
20th Foor, Toronto Star Building,
1 Yonge Street,
Toronto, Ontario, M5E 1E5.
Telephone: (416) 973-3918.
Telex: 06-23317
Fax: (416) 973-1516.
Radiogram: Ice Toronto.

5. General Remarks:

A limited number of icebreakers are available for the support of shipping and these are heavily committed. It is emphasised, therefore, that it may not be possible to provide icebreaker support at short notice. In order to make the most efficient use of all available resources, it is important that the VTS Centres be kept informed of the position and projected movements of vessels in Canadian waters.

Authority: Canadian Coast Guard (AMND) (AMFO).

NOTICE No. 25: Vessel Traffic Services (VTS).
See "Plan Section".

REPORT: February 1985.

Herewith is an outline of requirements for chemical tankers which are scheduled to call Vancouver/British Columbia ports.

1. Vessel must have on board a valid non-Canadian Ship's Compliance Certificate (or obtain it on arrival).
2. Certificate of Fitness and date.
3. Provide Agents with 7, 4, 2 and 1 day's notice prior to arrival.
4. Advise Agents of the last 2 cargoes.
5. Advise of any cargo in transit (quantity and type).
6. Vessel is required, in Vancouver, to have a clear passage while transiting the First and Second Narrows Bridge – with a minimum of 1 mile visibility. Vancouver Traffic Centre will advise vessel accordingly upon arrival.
7. Canadian Coast Guard will attend on board upon arrival for safety inspection.

In the case that a vessel arrives in Vancouver with ammonia on board, the vessel is permitted to load propane as a second cargo, providing they are fully segregated.

AMHERSTBURG, Ontario: 42.06 N. 83.08 W. (See Plan)

PORT LIMITS: Southerly Port Limits commence at Buoys 43D and 44D and extend on the Canadian side of the International Boundary Line, Northerly to the Southerly limits of Windsor Harbour.

DOCUMENTS: Vessels may clear Customs at Amherstburg upon request. No Customs Officer available at Amherstburg. Request to clear must be made through Windsor Customs Office.

Pleasure craft 24 hour reporting	Tel. 256-7811.
Customs Office bridge (commercial)	Tel. 254-0893.
Customs Office bridge (auto)	Tel. 253-7271.
Customs Office tunnel (auto)	Tel. 254-3575.

PILOTAGE: Pilotage is compulsory as required by Seaway Regulations.

ANCHORAGES: Windsor Harbour is the only recognized anchorage in Detroit River.

RESTRICTIONS: Seaway draft is maintained in main channel and shallow draft channel of 21 ft. Water levels are affected by fluctuation of Lake Erie. A Low Water Warning is broadcast from Belle Isle on 2670 kHz and 156.6 MHz on the odd hour plus 55 minutes when the water level in the West end of Lake Erie falls 1 in. or more below the lower level of the Lake Survey Centre's predicted range of levels shown in bulletins issued the 5th and 20th of each month during navigation season. Water levels are broadcast on FM radio from Group Detroit.

MAX. SIZE: About 432 ft. long and 21 ft. draft is maximum for Allied Chemical Dock.

HEALTH: Pratique is not necessary as vessel has passed all health requirements before entering Canada.

RADIO: Messages may be sent and received via VBE Sarnia Radio.

VHF: None available for port movement, except as established between vessels in Harbour.

TUGS: Available, but not usually used.

BERTHING: There is no public wharf.

Canadian Coast Guard (C.C.G. Docks available on request for distress or emergency only. Contact by radio or telephone) has two docks: South – 250 ft. in length with approach depth 17 ft.; North – 291 ft., with approach depth 17 ft. The old Town Coal Dock is converted into a public park.

Allied Chemical is a private dock (length 300 ft.)which consists of 3 cement filled caissons protected with steel sheet piling. Import fuel oil and export liquid calcium. Vessels of over 400 ft. length call here regularly, draft approach alongside 21 ft.

CRANES: Shore cranes are available for hire from Windsor, also floating barges with cranes, 100 ton capacity and 200 ft. boom if required.

BULK CARGO FACILITIES: Conditions of various wharves does not warrant any usage for bulk cargoes.

BRIDGES: No bridges within Amherstburg Harbour area.

STEVEDORES: Stevedoring is arranged through Agents in Windsor.

MEDICAL: Should medical attention be required it can be arranged through radio station VBE Sarnia by message to Canadian Coast Guard Base Amherstburg. Hospitals are available in Windsor with Ambulance service. Injured seaman can be taken off if necessary by Canadian Coast Guard in vicinity of Amherstburg, when notified via VBE Radio Sarnia.

TANKERS: Use private wharf of Allied Chemical Limited.

DENSITY: Fresh water only.

FRESH WATER: Fresh water could be supplied in an emergency by tank truck or contacting Public Utilities Commission.

FUEL: Not available on docks, except by truck.

FIRE PRECAUTIONS: Usual ship board fire precautions on board.

CONSULS: None.

REPAIRS: Small ship repairs can be carried out by local firms from Windsor.

DRY DOCK: None.
SURVEYORS: None stationed in port, but arrangements can be made to have an inspector when required.
GANGWAY/DECK WATCHMEN: No regulations requiring watchman.
CUSTOMS ALLOWANCES: Same as all Canadian Customs Regulations.
CARGO GEAR: Ship's gear, unless pallets are used.
REPATRIATION: Arrangements for crew change can be made.
TIME: Local time is GMT minus 5 hours and Summer time minus 4 hours.
HOLIDAYS: All Canadian Holidays, working time requires negotiating with local unions.
POLICE/AMBULANCE/FIRE: Police – 969-6650, Ambulance – 736-5411, Fire – 969-6650.
TELEPHONES: No telephone jacks available on any dock.
SERVICES: Laundry can be done, but takes considerable time. Foodstuffs are available, including fresh produce.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Seaman's I.D. card is sufficient.
REGULATIONS: No unusual regulations.
DELAYS: Private owner's dock is only dock being used for cargo.
AUTHORITY: Canadian Coast Guard, 370 Dalhousie Street, Amherstburg, Ontario N9V 1X3, Canada. *Tel:* 519-736-5449. *Contact:* L. Bill, Sub-District Manager.

AMHERST HARBOUR, Quebec: 47.14 N. 61.50 W.

LOCATION: Situated at the N.E. end of Amherst Is., which is part of the Magdalen Islands group.
DOCUMENTS: Amherst is not a port of entry, clearance obtained at previous Canadian port of call.
PILOTAGE: Not compulsory.
ANCHORAGES: Available inside the harbour, depths 4.88 m. to 5.5 m.
RESTRICTIONS: Navigation season from April 1st to December 15th. Channel depth 16 ft. at LWST.
RADIO: Grindstone (VCN).
TUGS: None.
BERTHING: Transport Canada Wharf: Length 183 m., depth alongside 5.18 m. at LW.
STEVEDORES: Available.
FRESH WATER: Available.
FUEL: Diesel available.
REPAIRS/DRY DOCK: Not available.
AIRPORT: Flights to Charlottetown and Quebec Province.
AUTHORITY: Transport Canada, Garde Cotiere Canadienne, Region des Laurentides, 104 Dalhousie, Suite 121, Quebec, P.Q., G1K 4B8. *Tel:* (418) 648-3680. *Telex:* 051-3051. *Contact:* Felix A. Boudreau, Harbour Master, Amherst.

ARGENTIA, Newfoundland: 47.18 N. 53.59 W.

(See Plan)

LOCATION: The Public Harbour of Argentia is located on the East side of Placentia Bay. The harbour is entered between Low Room Point and Broad Cove Point and extends 3 km. in length S.W. to the head of Sandy Cove. The navigational season is year round.
DOCUMENTS:

3 copies Crew Declaration (Form Y14).
3 copies Ship's Stores List (Form E1).
3 copies Immigration Crew List (Form IMM 200), only Canadian form accepted.
2 copies Bill of Lading or Manifest.

In addition, Customs Clearance from last port, Derat Certificate, extra copy of Crew List, Vaccination List, Ship's Register, Radio Equipment Certificate, Safety Equipment Certificate, Load Line Certificate and Non-Canadian Ship Compliance Certificate. Oil Record Log Book should be up to date and readily available for inspection by Government Steamship Inspectors.
PILOTAGE: Not compulsory, however, licensed Pilots are available, if desired. Pilots board off Argentia in position Lat. 47° 20′ N., Long. 54° 06.3′ W.
Arrivals: To avoid a delay in ordering a Pilot, Masters of vessels bound for Argentia must forward their request for Pilots to "Pilots St.John's" as follows:

First notice 12 hours prior to the ETA (GMT) at the appropriate boarding station, stating:
(a) Which boarding station the Pilot is required at.
(b) Name.
(c) Call Sign.
(d) Deepest draft.
(e) Speed.
(f) Agent.
(g) Length, breadth, moulded depth, deadweight tonnage and the largest net registered tonnage.

Second notice 3 hours prior to the ETA (GMT) at the appropriate boarding station.
Departures/Movages: First notice 9 hours prior to the ETD (Local time). Second notice 3 hours prior to the ETD (Local time).
Embarkation/Disembarkation: Masters of calling vessels are reminded of their obligation to comply with statutory rules, and are recommended to comply with the following:
(a) The Officer responsible for embarkation/disembarkation of the Pilot is a watchkeeping Officer.
(b) The pilot ladder is secure.
(c) The pilot ladder is adequately illuminated at night.
(d) Means are provided to enable the Pilot to pass safely and conveniently from the head of the pilot ladder into the ship or onto the ship's deck. Portable stanchion, if used, should be independently secured to the rail or deck, one on each side of the ladder.
(e) The ladder is in good condition and its treads remain horizontal. The treads to have a rough surface.
(f) The ladder is rigged so that each step rests firmly against the ship's side.
(g) Spreaders are provided not more than 10 ft. apart, to prevent the ladder from twisting.
(h) Manropes should be available, but should not be lowered unless requested by the Pilot.
(i) A lifebuoy with a self-igniting light and a heavy line should be available.
(j) The ladder should be rigged well clear of overboard discharge and deck scuppers.

If the pilot ladder is not safe, the Pilot may refuse to board and thus cause unnecessary delay to the ship.
ANCHORAGE: Available 1.6 km. from wharf. Caution should be exercised when using anchors in Argentia due to abandoned submarine cables.
RESTRICTIONS: Will be dispatched by Transport Canada, Harbours and Ports Directorate, to ship's Agent.
HEALTH: Vessels arriving from a foreign port may obtain pratique by radio from "Quarantine St.John's" at least 12 hours before arrival. Information required by Quarantine Officer shall include:

Name and nationality of the vessel.
Last port of call.
Nature of cargo.
Number of crew and passengers.
Port of destination.
Name of Agent.
Conditions of health of all on board with details of any sickness or death incurred during the voyage.
Animals, if any.

RADIO/VHF: The best radio stations to use en route to Argentia are:
St.John's Marine Radio – call sign VON.
Halifax Marine Radio – call sign VCS.
St.Lawrence Marine Radio – call sign VCP.

To avoid a delay in obtaining a Pilot, Masters of ships bound for Argentia must report by R/T, W/T or Telex, their ETA to Vessel Traffic Management at St.John's at least 24 hours before vessels' ETA at the pilot boarding station. The times should preferably be in GMT, but whatever time is used, it should be expressly stated. ETA should be confirmed or corrected 12 hours and 6 hours prior to arrival at the pilot boarding station by R/T, W/T or Telex through VON Marine Radio Station, St.John's or via any Coast Guard Radio Station. Also see "Pilotage".

Pilotage messages may be forwarded through the nearest Canadian Coast Guard Radio Station. Direct requests can be made through St.John's Traffic Centre on VHF Channel 11 and Placentia Traffic on VHF Channels 12 and 14. Placentia Traffic Tel: (709) 227-2181.

The requirements for water, fuel and ballast should be made known to vessel's Agent in the 72 hour ETA.
TUGS: Three tugs are stationed at nearby Come-By-Chance to assist vessels in berthing and unberthing, if necessary.
BERTHING:

Berth	*Name*	*Length* (m.)	*Width* (m.)	*Depth* (m.)
1	Fleet Dock	150	12.0	10.5
2	Fleet Dock	155	12.0	10.5
3	Fleet Dock	120	18.8	6.1 – 8.5
4	Fleet Dock	48	18.8	6.1 – 8.5
5	Ro-Ro Ramp		17.0	5.5 – 7.5
6	Marine Atlantic	20		
7	Marine Atlantic	185		10.0 – 13.3
8	Navy Dock	105		7.4 – 11.0
9	Navy Dock	105		7.4 – 11.0
10	Navy Dock	105		10.9 – 12.4

MEDICAL: Masters are requested to notify their Agents at least 72 hours prior to arrival, advising the number of crew to see the doctor and their complaint. There is a cottage hospital facility at Placentia, 6.5 km. distance from the port, and full hospital facilities are located in St.John's, 130 km.
CRANES: Mobile cranes and boom trucks available. Heavy lift crane pad on Berth No. 2 (Fleet Dock). This area can accommodate a 200 ton mobile crane at minimum radius.
STEVEDORES: Local labour should be arranged by Agent.
FRESH WATER: Limited quantities of fresh water available. Arrangements should be made through Agent or Harbour Master.
FUEL: Ship's bunkers are available by tank truck.
CONSULS: The following countries have Consular Representatives in St.John's:

Brazil
Denmark
France
Germany
Iceland
Italy
Malta
Netherlands
Portugal
Spain
Sweden

REPAIRS: The Agent should receive early advice of requirements, as most repairs are only available at St.John's (Radio, radar, gyro, Satnav and Loran, etc.). The technicians for such equipment work out of St.John's. The following brand names have representatives in St.John's: Racal-Decca, Marconi, Kelvin Hughes, Furono, Atlas and Sperry.
SURVEYORS: Stationed in St.John's: Lloyd's, BV, NKK, ABS, Germanischer Lloyd, Italian Registry, Russian Registry, China Corp. and Honduran Registry.

GANGWAY/DECK WATCHMEN: Usually ship's crew.
CUSTOMS ALLOWANCES: Each crew member is allowed 200 cigarettes and one 40 oz. bottle of wine or spirits per week.
REPATRIATION: No formal facilities, however, crew changes and repatriation can be carried out. Prior notice to Agent is required.
AIRPORT: Nearest airport is St.John's, 130 km. away.
POLICE/AMBULANCE/FIRE: The Police, Fire Department and Ambulance Service are located in Placentia, 6.5 km. away from the port.
EMERGENCY CO-ORDINATION CENTRE: Canadian Coast Guard, Placentia Traffic, Tel: 709-227-5731 or VHF Channel 16.
BANKS: Several Canadian Banks provide service in the Placentia area.
TIME: GMT minus 3.5 hours. First Sunday in April clocks advance 1 hour. Last Sunday in October clocks retard 1 hour.
SERVICES: *Supplies and Laundry:* Stores and provisions have to be obtained in St.John's. In order to avoid delays, Agent should be notified prior to arrival of the vessel's requirements. Stores and supplies will be delivered by truck at the dock.
SHORE LEAVE: In order to comply with Immigration Regulations, crew should be carefully checked before sailing, and any missing crew member reported to Agent.

In case of crew members left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances (if any) and also instructions for repatriation. An Immigration Bond may be required.
GARBAGE DISPOSAL: Arrangements must be made through Agent.
WASTE OIL DISPOSAL: Arrangements must be made through Agent.
SEAMAN'S CLUBS: None locally. Facilities available at Placentia (6.5 km.) and St.John's (130 km.).
CURRENCY: Canadian Dollar.
WEATHER: The prevailing winds are from the S.W. in Summer and N.W. in Winter. Fog is experienced regularly in April, May, June and July, the latter two months being the worst. The fog is usually associated with a Southerly wind.
CHARTS: Canadian Hydrographic Chart No. 4841.
GENERAL: Masters are strongly advised to contact their Agent 72 hours, 48 hours, 36 hours, 24 hours, 12 hours and 6 hours with ETAs. In the 72 hour message, Masters should advise all port requirements.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, Newfoundland Region, P.O.Box 1300, St.John's, Newfoundland A1C 6H8, Canada. *Tel:*(709) 772-5154. *Telex:* 016-3369. *FAX:* (709) 772-5127. *Contact:* D.A. Lester, Regional Manager, Harbours and Ports.

BADDECK, N.S.: 46.06 N. 60.44 W. (See Plan)

DOCUMENTS:
4 Crew Lists.
Customs Documents.
Harbour Dues Receipt.
Stores List.
Derat Certificate.
Safety Regulations.
Clearance from Last Port.
PILOTAGE: Compulsory. Pilot boarding station at Lat. 46° 20′ 30″ N., Long. 60° 07′ 00″ W. (same as Sydney).
ANCHORAGE: Good anchorage in lake. Depths 50 ft. to 500 ft.
RESTRICTIONS: Can be restricted by heavy fog, tide, ice.
Great Bras d'Or: (Entrance to lakes restricted at Seal Island Bridge to vessels less than 119 ft. high).

Entrance into the Bras d'Or Lakes via the Great Bras d'Or is from the Northward, through a 10 mile long fiord which varies in width from 0.5 to 1 mile wide and flanked by high rolling hills.
MAX. SIZE: Largest vessel to dock 497 ft. long, 66.7 ft. wide. Draft 28 ft.
HEALTH: Pratique obtained at Sydney, N.S.
RADIO: Sydney Radio
TUGS: None.
BERTHING: The dock is 330 ft. in length, with an approach way of 80 ft. length, making an "L" shape. Depth alongside at LW is 15 ft. at the inner end and 25 ft. at the outer end.
MEDICAL: No advance notice required. Hospital available.
DENSITY: In sea 35/1000. In lake 25/1000.
FRESH WATER: Supplied at 20 t.p.h.
FUEL: Diesel oil available by truck.
CONSULS: None.
REPAIRS: Minor repairs only.
SURVEYORS: Lloyds, ABS and BV available from Halifax.
HATCHES: Normally opened and closed by crew.
CERTIFICATES: Registry, Derat and Safety Certificates.
CUSTOMS ALLOWANCES: Tobacco, 100 cigarettes per week or 0.5 lb. tobacco. Wine/spirit: None.
AIRPORT: 55 miles. Served by regular airlines.
TIME: GMT minus 4 hours. Advance 1 hour in Summer.
HOLIDAYS: Sundays and Statutory holidays; New Year's Day; Good Friday; Easter Monday; Victoria Day; Canada Day; Labour Day; Thanksgiving Day; Remembrance Day; Christmas Day.
POLICE/AMBULANCE/FIRE: 295 2350, 292 2032, 295 2110.
TELEPHONES: None available for placing on board.
AUTHORITY: Transport Canada, P.O.Box 1013, Dartmouth N.S., B2Y 4K2. *Tel:* 426-6508. *Telex:* 019-22757. *Contact:* William Beck.

Local Authority: Transport Canada, P.O.Box 162, Baddeck, Nova Scotia B0E 1B0, Canada. *Tel:* (902) 295-2502. *FAX:* (902) 295-2218. *Contact:* Mr. MacRae, Harbour Master/Wharfinger (Cel No. 902-295-7786).

BAIE COMEAU, Quebec: 49.14 N. 68.07 W.

LOCATION: Located on North shore of the St. Lawrence River, N.E. of mouth of the Manicouagan River and 440 km. from Quebec City.
PORT LIMITS: Starting from a point on the Southern limit of Baie Comeau at Pointe St. Gilles Lat. 49° 12′ 10″ N., Long. 68° 08′ 41″ W. Thence, North-Eastward to Pointe St. Pancrace, Lat. 49° 15′ 14″ N., Long. 68° 04′ 43″ W.

All waters inside of these points are understood to be part of Baie Comeau Harbour.
DOCUMENTS: Baie Comeau is a Port of Entry. Customs and Immigration facilities are located in the Town of Baie Comeau. All vessels arriving from Foreign Ports will be boarded by Customs and Immigration Officers.

The following forms are to be completed prior to arrival at the first Canadian Port:
3 copies Immigration Crew List, IMM-200
3 copies Crew Declaration, Y-14
3 copies Ship's Stores, E-1
3 copies Passenger List, IMM-264
2 copies Quarantine Service, *Q-S-1
*To be supplied by Quarantine Officer on arrival.
ETA: Advise Agent 72, 24 and 4 hours before arrival. Include fuel and stores requirements.
PILOTAGE: Not compulsory for public wharves, but recommended. The services of a qualified Docking Master are available through the facilities of Cargill Grain Company. Docking instructions will be given by radio after receiving vessel's ETA.

Normally the Docking Master boards from tug approximately 0.5 mile S.W. of Pointe St. Pancrace.
ANCHORAGES: Anchorage is available in vicinity of Baie Comeau, but a heavy sea rolls into Baie-des-Anglais with East winds.
ICE ADVISORY SERVICE: Ships inbound for Baie Comeau from seaward between December 15th and April 15th should advise the Ice Information Officer, Sydney, N.S., 36 hours prior to entering Cabot Strait stating their position, destination, whether loaded or in ballast. This procedure will facilitate the passing of ice information to the ship as necessary.

On request, ice information is also available from Marine Radio Stations at Halifax, Camperdown, Seven Islands, Twillingate and Grindstone. The Canadian Broadcasting Corporation Maritime network also broadcasts ice information daily during the Winter navigation season. Supplementary ice information may also be obtained from Canadian Marine Service icebreakers.

During the ice season, radio broadcasts of ice information are made twice daily from Marine Radio Stations as follows:

	Call	*Frequencies*	
Cape Race, Nfld.	VCE	420	kHz CW
		2582	kHz RT
Fox River, Que.	VCG	434	kHz CW
		2582	kHz RT
Mont-Joli, Que.	VCF	446	kHz CW
		2582	kHz RT
North Sydney, N.S.	VCO	489	kHz CW
		2582	kHz RT
Halifax	CFH	115.3	kHz CW
		6949.5	kHz
		8662	
		12984	
		17218.4	

RESTRICTIONS: Port open for shipping all year round, but occasionally assistance of ice-breakers may be required.

Channel depth: 8.2 m. at extreme low tide.
MAX. SIZE: Up to 40 ft. draft at Cargill at LW. Size limited only by berth depth.
RADIO: Mont-Joli Radio (VCF) 2582 kHz (VHF, CRM Co. Ltd., Wharf Office, base to ships on marine frequencies) (Channel 7A – 156.350 MHz and Channel 16 – 156.800 MHz, call XJS94).
HEALTH: Incoming vessels making Baie Comeau port of entry must obtain Pratique by radio. Radio Pratique may be obtained between 0900 hrs. and 1700 hrs. the day preceding arrival. Address message "Quarantine Quebec".

For the purpose of Radio Pratique, vessels are required to give the following information:
1. Name and nationality of vessel.
2. Ports called at during voyage.
3. Nature of cargo.
4. Number of crew.
5. Number of passengers.
6. Port of destination and name of Agent.
7. Number of persons without valid certificates.
8. Condition of health of all on board with details of any sickness or death which has occurred during the voyage.

Ships arriving in English Bay in Quarantine will be inspected by Health Officer at anchorage or on arrival alongside. Should Officer board vessel at anchorage, proper accommodation ladder must be provided.
BERTHING:

Wharf	*No.*	*Length* (m.)	*Depth* (m.)	*Remarks*
Public Wharves	1	155	9.0	
	2	155	8.5	
	3	135	8.5	
	4	220	8.5	
Private Wharves		180	7.1	Cie.de Papier Quebec et Ontario
	1	164	10.1	Canadian Reynolds Metals
	2	179	10.1	
	3	168	10.1	
	1	178	12.2	Cargill
	2	178	11.6	
	3	212	8.4	

In 1990, 7,100,000 tons of merchandise were handled which consisted mainly of grain, aluminium, coke, paper and petroleum products.

The public wharf extends N.E., then to the North, which forms a basin protecting the 4 berths inside the public harbour, the wharf of the paper company and the 2 ferry berths.

The section of the public wharf that extends North for 445 m. (1,460 ft.), protects the Berths No. 1, 2 and 3 (berths numbered from the North end). Berth No. 4 is situated at the section extending in a North-Easterly direction. A floating mobile and adjustable Ro-Ro ramp is situated near the inner end of the public wharf. It is a 400 ton capacity ramp, approximately 33 m. (110 ft.) long and 9.0 m. (30 ft.) wide.

The private wharf at the Compagnie de Papier Quebec et Ontario Limitee is situated North of the inner end of the public wharf. The ferry ramp is located on the North side of the private wharf. The rail ferry terminal is situated close North of the same wharf.

The Societe Canadienne de Metaux Reynolds Limitee operates 3 berths from a basin that is located in Anse du Moulin, 0.8 miles North of the public wharf. Berth No. 1 extends in a N.E. direction alongside the approach jetty. It is equipped with 2 pneumatic unloaders for alumina and coke. A conveyor carries the raw materials towards the 3 tanks that are located S.W. of the wharf; 2 tanks with a capacity of 40,000 tons (alumina) and the other with a capacity of 5,000 tons (coke). Connections for the handling of petroleum products are located about 64 m. (210 ft.) from the outer end of Berth No. 1. Berth No. 2 is the extension of the Berth No. 1. There is a storage shed and a dock office. Berth No. 3, situated North of Berth No. 2, is used for loading only. 3 sheds for cargo are located at the berth. Fresh water is available at these 3 berths.

The grain terminal of the Compagnie Cargill Limitee, situated close North of Anse du Moulin, consists of 2 piers, a grain elevator with a capacity of 441,784 tons (wheat), and several silos. The S.E. Pier, 212 m. (696 ft.) long, is a breakwater-wharf which protects Berth No. 3. The N.W. side of the pier is used by vessels discharging grain. The N.W. Pier is 178 m. (584 ft.) long, and ships can berth on both sides for loading. Berth No. 1 is located on the North side, while Berth No. 2 is on the South side. The piers are equipped with pipelines for fuel and fresh water.

TUGS: Available. Not compulsory, except for Cargill Grain Terminal and Canadian Reynolds Metal.
CRANES: All types of cranes available for hire.
CARGO HANDLING FACILITIES:

Canadian Reynolds Metal: 2 Pneumatic unloaders for Alumina and Coke, rate 140 t.p.h. each. at No. 3 Berth.

Cargill Grain Terminal: North Pier: 2 vessels can be loaded simultaneously at a combined average rate of 1,200 t.p.h. (long tons). South Pier: Discharging rate 1,100 t.p.h. (short tons).

STEVEDORES: Each terminal employs own stevedores.
Working Hours: Monday to Friday, 0800 hrs. – 1700 hrs. Sunday and holiday work possible with advance notice.
MEDICAL: All facilities available. Local Hospital in Baie Comeau and Hotel-Dieu, Hauterive, 5 miles.
DENSITY: 1000 – 1025.
FRESH WATER: Delivered by pipeline to the berths (April – October).
FUEL: Available by pipeline to Cargill Grain Terminal. Diesel oil and gasoline delivered by truck (Imperial, Gulf, Texaco and Shell).
CONSULS: At Montreal and Quebec.
REPAIRS: Minor repairs may be effected through local contractors.
DRY DOCKS: Nearest dry dock located at Les Mechins (48 miles from Baie Comeau).
CUSTOMS ALLOWANCES: 200 cigarettes for each man. Officers may be allowed 1 bottle wine/spirits, Master up to 5 bottles.
AIRPORT: Daily service to Quebec and Montreal from Baie Comeau Airport.
TIME: GMT minus 5 hours. Daylight Saving Time: GMT minus 4 hours, applied from first Saturday of April until last Saturday of October each year.
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday of May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday of September), Thanksgiving (2nd Monday of October), Remembrance Day (November 11th), and Christmas (December 25th and 26th).
SHORE LEAVE: Crew members allowed ashore. No restrictions.
IDENTIFICATION CARDS: Gate passes are issued at the gate to all Crew members when going ashore for the purpose of identity on their return.
GENERAL: *Charts:* Canadian Charts No. 1220 and 1245.
Ferry Service: Baie Comeau to Matane.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980.

Y. Leblanc, Harbour Master – Baie Comeau. *Tel:* (418) 296-4296, 296-6694.

BAY ROBERTS, Newfoundland: 47.36 N. 53.26 W. **(See Plan)**

DOCUMENTS: Documents as per Standard Canadian Requirements.
PILOTAGE: Non-compulsory. Can be arranged by Coast Guard Traffic Management Centre, St. John's. Tel: (709) 772-2083.
ANCHORAGES: Good anchorage in outer area of Bay Roberts Harbour in depths of 5 to 6 fathoms.
RADIO: Ship to Shore through St. John's (VON).
BERTHING: Deep water approach, channel depth approximately 60 ft. Navigable year round.
Wharves: (1) Fisheries and Ocean's Wharf – Finger pier 181 ft. long (55 m.) and 40 ft. (12 m.) across the outer face. Depths alongside 20 ft. – 21 ft. LWOST. Concrete deck. Load limits 300 p.s.f., 15 tons concentrated load.

(2) Fish Plant Wharves – Two finger piers; East Wharf 160 ft. long and 26 ft. across the outer face (49 m.×8 m.), and West Wharf 197 ft. long and 26 ft. across the outer face (60 m.×8 m.). Depths alongside East Wharf 11 ft. to 13 ft. (3.4 m. to 4 m.) and West Wharf 13 ft. (4 m.) LWOST. Load limits unknown.

(3) Spencers Wholesale Wharf – Marginal wharf 263 ft. along the outer face (80 m.) with depths alongside 11 ft. to 14 ft. (3.4 m. to 4.3 m.) LWOST. Load limits unknown.

(4) Avalon Coal Salt and Oil Wharf – Marginal wharf 149 ft. long at the outer face (45 m.) with depths alongside 15 ft. to 19 ft. (4.6 m. to 5.8 m.) LWOST. Load limits unknown.

There are several smaller wharves and piers present.

CRANES: Small mobile cranes only.
STEVEDORES: Local labour; should be arranged by Agent.
MEDICAL: Local clinic. Full hospital facilities at Carbonear, 15 km. distant.
TANKERS: See "Berthing".
FRESH WATER: Available at Fish Plant Wharf.
FUEL: Available at Fish Plant Wharf.
REPAIRS: Limited welding can be arranged locally, nearest major repair shops at St. John's, 90 km. distant.
SURVEYORS: Lloyd's Register, P.O.Box 5044, St. John's, Newfoundland A1C 5V3. Tel: (709) 726-0543, (709) 368-2538 (residence).
GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gangway used.
REPATRIATION: Can be arranged by Agent via St. John's Airport.
AIRPORT: At St. John's, 90 km. distant.
POLICE/AMBULANCE/FIRE: R.C.M.P. Detachment at Harbour Grace, local fire station, ambulance service available.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard, Search & Rescue, St. John's, Newfoundland. Tel: (709) 772-5151.
BANKING: Services available.
SHORE LEAVE: No restrictions.
GARBAGE DISPOSAL: No facilities.
WASTE OIL DISPOSAL: No facilities.
SEAMAN'S CLUBS: None.
CURRENCY: Canadian Dollar.
GENERAL: Bay Roberts is covered by Chart No. 4572.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, P.O.Box 1300, St. John's, Newfoundland, A1C 6H8. *Tel:* (709) 7725154. *Telex:* 016-3369. *FAX:* (709) 7722193. *Contact:* D. A. Lester, Regional Manager.

BECANCOUR, Quebec: 46.24 N. 72.23 W. **(See Plan)**

PORT LIMITS: Normally vessel has "arrived" when first line on the bollard (subject to Charter-party terms).
DOCUMENTS: Crew Lists, Customs, Health, Manifests, Bills of Lading, Ship's Papers, Certificates, etc.

Customs, Health, Agents, Port Manager will board ship on arrival.

PILOTAGE: First Pilot boards at Les Escoumins Pilot Station. Exchanging Pilots off Quebec Pilot Station, on to berth in Becancour.
ANCHORAGES: Off berth or off main channel or, 5 miles (8 km.) West of harbour or 8 miles (14 km.) to the East off Batiscan, Que.
RESTRICTIONS: None.
Winter Navigation: From December 10th to April following, every year or as soon as the floating aids to navigation have been lifted a second Pilot is compulsory from Les Escoumins to Montreal.

Daylight navigation only between Quebec and Montreal.

Normal navigation resumes as soon as the aids are floated, normally between 15th March and 15th April.

MAX. SIZE: No restriction as to length, although 800 ft. (244 m.) is considered a respectable length. Chart datum depth 35 ft. (10.7 m.), average water level change 3 ft. (1 m.).
HEALTH: Pratique may be requested through any Canadian Coast Guard Radio Station or VHF traffic control stations.
TUGS: Not compulsory. Stationed in Trois-Rivieres and Quebec. Master's request.
BERTHING:

Berth No.	*Length* (m.)	*Depth (C.D.)* (m.)	*Remarks*
B–1	244	10.67	Outside by main channel.
B–2	150	10.67	Inside basin/Ro-Ro ramp (22 m.).
B–3	219	10.67	Inside basin
B–4	225	10.67	Inside basin
B–5	292	10.67	Smelter plant berth 2 suction systems – 1,000 tonnes per hour.

Average water level 3 ft. (1 m.) above chart datum height. No reversing tide effects. Warehousing facilities, as required paved, lighted, open spaces 35 acres (14 hectares). Total stocking area 150 acres (61 hectares).

CRANES: Up to 200 tons capacity, rental or ship's gear.
STEVEDORES: Quebec Ports Terminals Inc. (exclusive to Becancour). Normal working hours 0800 – 1700 hrs. Overtime for night work, weekends and holidays can be arranged. Tel. 1-819-294-9911.

BULK HANDLING FACILITIES: Self unloading vessels discharging at a rate of 2,000 t.p.h.

A.B.I. smelter plant – bulk equipment: 2 vacuum ship unloaders (rate 1,000 tonnes p.h.) to discharge alumina and petroleum coke.

Total stockpiling area: 150 acres (61 hectares).

SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro ramp 70 ft. (21 m.) wide.

MEDICAL: Nicolet, Trois-Rivieres, emergency ambulance standing-by.

TANKERS: Special tankers are loading chemical products from trucks regularly.

DENSITY: 1000.

FRESH WATER: From dock pipelines and hoses. Agent places order to the stevedores (Can $1.28 per metric ton).

FUEL: Only by truck. Trois-Rivieres depot (35 tons truck). Rate: 20 to 30 t.p.h.

CONSULS: At Montreal and Quebec.

REPAIRS: Piping and welding repairs, other limited ships repairs.

DRY DOCKS: Quebec and Sorel.

SURVEYORS: ABS, Lloyd's, N.V., S.G.S. and private firms.

GANGWAY/DECK WATCHMEN: Recommended.

HATCHES: Opening and closing carried out by crew members.

CARGO GEAR: Ship's gear or shore gear. Heavy lift crane 200 tons (mobile).

REPATRIATION: Can be arranged without restrictions through Montreal International Airport by ship's Agent and Canadian Authorities.

AIRPORT: Inter-provincial airport in Trois-Rivieres. International airports in Montreal and Quebec (1.5 hours). Regular arrival to and from many parts of the world.

TIME: From first Sunday in April (every year) advance 1 hour to E.D.S.T.

From last Sunday of October (every year) minus 1 hour from E.S.T.

HOLIDAYS: Same as Quebec Province.

POLICE/FIRE/AMBULANCE: (819) 298-2211, (819) 298-2223 and (819) 376-1212 respectively.

SERVICES: Commercial firms tank cleaning equipment facilities. Electronic aids to navigation repairs.

SHORE LEAVE: Allowed with permission of Master.

IDENTIFICATION CARD: Seaman's Book is sufficient.

REGULATIONS: Copy of the operational regulations will be handed to Master on ship's arrival by Port Authority.

DELAYS: Delays not experienced to date.

GENERAL: The port facilities are administered and operated by "La Societe du Parc Industriel et Portuaire de Becancour" a provincial Government Corporation under the Minister of Industry, Commerce Quebec.

DEVELOPMENTS: The marine facilities of Becancour are part of an industrial park located within the Municipality of Becancour, Quebec.

The port facilities are meeting the requirements of major industrial developments.

AUTHORITY: "La Societe du Parc Industriel et Portuaire de Becancour", 1000 Boulevard Arthur-Sicard, Parc Industriel Portuaire, Becancour, Quebec, Canada G0X 1B0. *Tel:* (819) 294-6656. *FAX:* (819) 294-9020. *Contact:* Serge Girard, Vice-President - Operations.

BELLEDUNE, N.B.: 47.55 N. 65.51 W.

A deep water harbour administered from Ottawa, Ontario and serving Belledune Fertilizers and other projects in the Bathurst area. This harbour is open to shipping all the year round.

DOCUMENTS: See "Saint John".

PILOTAGE: Pilotage is not compulsory, however, should a Pilot be required, the services of Atlantic Pilotage Authority licenced Pilots are available through ship's Agent.

Regardless of pilotage, estimated times of arrival should be given to Belledune Fertilizers Ltd. 72, 48 and 24 hrs. before.

ANCHORAGE: Vessels wishing to anchor will find no difficulty in obtaining an anchorage in more than 10 fathoms, approximately 1 mile to the Northward of the Belledune Breakwater.

TUGS: None available. May be obtained from Halifax.

BERTHING: One berth, length 550 ft., depth at LW, 34 ft.

TIDES: Tides normally rise 6 ft. at springs and 3 ft. at neaps. Tidal current seldom exceeds 1 knot.

STEVEDORES: Bulk cargoes handled by Belledune Fertiliser Ltd., and general cargo by Longshoremen.

CRANES: Heavy-lift equipment available from private companies. Cranes up to 25 tons available.

MEDICAL: Hospital at Bathurst.

FRESH WATER: Available. Delivered by tank trucks upon arrangement with Belledune Fertilizer Ltd.

FUEL: None locally. Can be obtained and delivered by tank trucks.

CONSULS: None.

REPAIRS: Minor repair facilities at Belledune Fertilizer Ltd. machine shop.

STORES: All types of provisions as well as deck and engine stores can be obtained at Bathurst for delivery to Belledune.

DEVELOPMENTS: A new wharf with length 305 m. under construction. It will handle vessels of 60,000 d.w.t., and after further dredging to 15.6 m., berth will handle 100,000 d.w.t.

AUTHORITY: Canada Ports Corporation, 99 Metcalfe Street, 8th Floor, Ottawa, Ontario K1A ON6. *Tel:* (613) 957-6709. *FAX:* (613) 995-3501. *Contact:* T.A. Lauzon, Senior Port Manager.

Local Representative: Belledune Fertilizer Ltd. *Tel:* (506) 522-5250. *Contact:* R. Boudreau.

BOTWOOD, Newfoundland: 49.09 N. 55.20 W.

(See Plan)

LOCATIONS: The Public Harbour of Botwood is located on the N.W. side of Petres Arm in the Bay of Exploits on the Northern coast of Newfoundland. Navigational season is year round, with occasional icebreaker assistance between the months of January and April.

DOCUMENTS:

3 copies Crews Declaration (Form Y14).

3 copies Ship's Stores List (Form E1).

3 copies Immigration Crew List (Form IMM 200), only Canadian form accepted.

3 copies Bill of Lading or Manifest.

In addition, Customs Clearance from last port, Derat Certificate, extra copy of Crew List, Vaccination List, Ship's Register, Radio Equipment Certificate, Safety Equipment Certificate, Load Line Certificate and Non-Canadian Ship Compliance Certificate. Oil Record Log Book should be up to date and readily available for inspection by Government Steamship Inspectors.

PILOTAGE: Compulsory. Pilot boarding station: May 31st to December 14th: Lat. 49° 23′ N., Long. 55° 09′ W. and December 15th to May 30th: Lat. 47° 33′ N., Long. 52° 37′ W. (off St.John's).

Arrivals: To avoid a delay in ordering a Pilot, Masters of vessels bound for Botwood must forward their request for Pilots to "Pilots St.John's" as follows:

First notice 12 hours prior to the ETA (GMT) at the appropriate boarding station, stating:

(a) Which boarding station the Pilot is required at.
(b) Name.
(c) Call Sign.
(d) Deepest draft.
(e) Speed.
(f) Agent.
(g) Length, breadth, moulded depth, deadweight tonnage and the largest net registered tonnage.

Second notice 3 hours prior to the ETA (GMT) at the appropriate boarding station.

Departures/Movages: First notice 9 hours prior to the ETD (Local time). Second notice 3 hours prior to the ETD (Local time).

Embarkation/Disembarkation: Masters of calling vessels are reminded of their obligation to comply with statutory rules, and are recommended to comply with the following:

(a) The Officer responsible for embarkation/disembarkation of the Pilot is a watchkeeping Officer.
(b) The pilot ladder is secure.
(c) The pilot ladder is adequately illuminated at night.
(d) Means are provided to enable the Pilot to pass safely and conveniently from the head of the pilot ladder into the ship or onto the ship's deck. Portable stanchion, if used, should be independently secured to the rail or deck, one on each side of the ladder.
(e) The ladder is in good condition and its treads remain horizontal. The treads to have a rough surface.
(f) The ladder is rigged so that each step rests firmly against the ship's side.
(g) Spreaders are provided not more than 10 ft. apart, to prevent the ladder from twisting.
(h) Manropes should be available, but should not be lowered unless requested by the Pilot.
(i) A lifebuoy with a self-igniting light and a heavy line should be available.
(j) The ladder should be rigged well clear of overboard discharge and deck scuppers.

If the pilot ladder is not safe, the Pilot may refuse to board and thus cause unnecessary delay to the ship.

ANCHORAGE: In harbour, off the oil dock in depths of 10 – 20 fathoms.

RESTRICTIONS: Navigation season from mid-April to mid-January approximately. Ice-breaker assistance may be necessary in Winter months. Deep water approaches.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: Vessels arriving from a foreign port may obtain pratique by radio from "Quarantine St.John's" at least 12 hours before arrival. Information required by Quarantine Officer shall include:

Name and nationality of the vessel.
Last port of call.
Nature of cargo.
Number of crew and passengers.
Port of destination.
Name of Agent.

Conditions of health of all on board with details of any sickness or death incurred during the voyage.

Animals, if any.

RADIO: The best radio stations to use en route to Botwood are:

St.John's Marine Radio – call sign VON.
Halifax Marine Radio – call sign VCS.
St.Lawrence Marine Radio – call sign VCP.
Confort Cove Marine Radio – call sign VDO.
St.Anthony Marine Radio – call sign VCM.

To avoid a delay in obtaining a Pilot, Masters of ships bound for Botwood must report by R/T, W/T or Telex, their ETA to Vessel Traffic Management at St.John's at least 24 hours before vessels' ETA at the pilot boarding station. The times should preferably be in GMT, but whatever time is used, it should be expressly stated. ETA should be confirmed or corrected 12 hours and 6 hours prior to arrival at the pilot boarding station by R/T, W/T or Telex through VON Marine Radio Station, St.John's or via any Coast Guard Radio Station. Also see "Pilotage".

Pilotage messages may be forwarded through the nearest Canadian Coast Guard Radio Station. Direct requests can be made through St.John's Traffic Centre on VHF Channel 11.

The requirements for water, fuel and ballast should be made known to vessel's Agent in the 72 hour ETA.

TUGS: None available.

BERTHING:

Name	*Length* (m.)	*Depth* (m.)
Transit Wharf (public)	83.0	8.9
Oil Dock (public)	42.5	5.9
Abitibi-Price	142.0	8.2 – 9.4
Irving Oil	12.0	8.2

MEDICAL: Masters are requested to notify their Agents at least 72 hours prior to arrival, advising the number of crew to see the doctor and their complaint. There is full hospital facilities at Botwood.

TANKERS: Finger Pier length 200 ft. with berthing face length 30 ft. Depth alongside 32 ft. Berth owned by Irving Oil Ltd. and used exclusively for discharging oil products.

CRANES: Mobile cranes and boom trucks available.

STEVEDORES: Local labour should be arranged by Agent.

FRESH WATER: Limited quantities of fresh water available. Arrangements should be made through Agent or Harbour Master.

FUEL: Ship's bunkers are available by tank truck.

CONSULS: The following countries have Consular Representatives in St.John's:

Brazil
Denmark
France
Germany
Iceland
Italy
Malta
Netherlands
Portugal
Spain
Sweden

REPAIRS: The Agent should receive early advice of requirements, as most repairs are only available at St.John's (Radio, radar, gyro, Satnav and Loran, etc.). The technicians for such equipment work out of St.John's. The following brand names have representatives in St.John's: Racal-Decca, Marconi, Kelvin Hughes, Furono, Atlas and Sperry.

SURVEYORS: Stationed in St.John's: Lloyd's, BV, NKK, ABS, Germanischer Lloyd, Italian Registry, Russian Registry, China Corp. and Honduran Registry.

GANGWAY/DECK WATCHMEN: Usually ship's crew.

CUSTOMS ALLOWANCES: Each crew member is allowed 200 cigarettes and one 40 oz. bottle of wine or spirits per week.

REPATRIATION: No formal facilities, however, crew changes and repatriation can be carried out. Prior notice to Agent is required.

AIRPORT: Nearest airport is Gander, 86 km. away.

TIME: GMT minus 3.5 hours. First Sunday in April clocks advanced 1 hour. Last Sunday in October clocks retarded 1 hour.

HOLIDAYS: Good Friday; Labour Day; Christmas Day and Boxing Day. No work performed on these holidays.

POLICE/AMBULANCE/FIRE: The Police, Fire Department and Ambulance Service are located in area.

EMERGENCY CO-ORDINATING CENTRE: Canadian Coast Guard, Search and Rescue, St. John's. Tel: (709) 772-5151 or VHF Channel 16.

SERVICES: *Supplies and Laundry:* Stores and provisions have to be obtained in area and at St.John's. In order to avoid delays, Agent should be notified prior to arrival of the vessel's requirements. Stores and supplies will be delivered by truck at the dock.

BANKS: Several Canadian Banks provide service in the Botwood area.

SHORE LEAVE: In order to comply with Immigration Regulations, crew should be carefully checked before sailing, and any missing crew member reported to Agent.

In case of crew members left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances (if any) and also instructions for repatriation. An Immigration Bond may be required.

GARBAGE DISPOSAL: Arrangements must be made through Agent.

WASTE OIL DISPOSAL: Arrangements must be made through Agent.

SEAMAN'S CLUBS: Recreational facilities available locally.

CURRENCY: Canadian Dollar.

CHARTS: Canadian Hydrographic Chart No. 4597.

GENERAL: Masters are strongly advised to contact their Agent 72 hours, 48 hours, 36 hours, 24 hours, 12 hours and 6 hours with ETAs. In the 72 hour message, Masters should advise all port requirements.

AUTHORITY: Transport Canada, Harbours and Ports Directorate, Newfoundland Region, P.O.Box 1300, St.John's, Newfoundland A1C 6H8, Canada. *Tel:* (709) 772-5154. *Telex:* 016-3369. *FAX:* (709) 772-5127. *Contact:* D.A. Lester, Regional Manager, Harbours and Ports.

Harbour Master: Cyril Lanning, P.O.Box 236, Botwood, Newfoundland A0H 1E0, Canada. *Tel:* (709) 257-2613.

BRIDGEWATER, N.S.: 44.23 N. 64.31 W. (See Plan)

DOCUMENTS: See "Halifax".

PILOTAGE: Not compulsory. Report ETA by radio-telephone or radio-telegraph to Superintendent of Pilots, Halifax, N.S. at least 12 hours before arrival at boarding station. ETA to be confirmed 3 hours before arrival. Pilot boards off Moshers Island Light.

ANCHORAGE: At Dayspring, 2 miles below Bridgewater.

RESTRICTIONS: Port is situated on La Have River, 10 miles from the sea. Channel path at LW, 20 ft.

MAX. SIZE: Length 325 ft. Draft 20 ft.

HEALTH: Pratique granted by Customs Officer who boards on arrival at the berth. Also see "Montreal".

RADIO: Halifax Radio.

BERTHING: Transport Canada Wharf, berthing length, 1,073 ft. Depth alongside 21 ft.

MEDICAL: Hospital services available.

STEVEDORES: Available.

FRESH WATER: Available ex wharf only on West side of river.

FUEL: Diesel and gasoline from storage tanks in port.

REPAIRS: Limited facilities for engine repairs.

AIRPORT: Nearest approximately 90 miles away.

HOLIDAYS: Dominion Legal holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 543-2464. Dawson Memorial Hospital Tel: 543-4603.

BANKS: Bank of Montreal, Tel: 543-2415.
Royal Bank of Canada, Tel: 543-7161.
Bank of Nova Scotia, Tel: 543-8155.
Canadian Imperial Bank of Commerce, Tel: 543-2451.

AUTHORITY: Transport Canada, P.O.Box 1013, Dartmouth, N.S., B2Y 4K2. *Tel:* 426-6508. *Telex:* 019-22757. *Contact:* William Beck.

Local Authority: Transport Canada, Bridgewater, Nova Scotia. Tel: 543-8815. Contact: Glayden L. Conrad, Harbour Master.

CAMPBELL RIVER, B.C.: 50.02 N. 125.14 W. (See Plan)

SHIPMASTER'S REPORT: June 1989.

VESSEL PARTICULARS:

D.W.T.		9,262 tons.
LOA		119.62 m.
Moulded Breadth		18.5 m.
Moulded Depth		10.0 m.
Departure Draft	Forward 7.51 m.	Aft 8.45 m.
Cargo Loaded		8,400 tonnes copper concentrate.

DOCUMENTS: See "Vancouver".

PILOTAGE: Compulsory. Pilot boards at Victoria. Confirm ETA Pilot Station by cable to "Pilots Victoria", giving 24 hours, 12 hours and 4 hours notice. Pilot uses a small tug or a pilot boat, depending upon the weather. The distance from Victoria Pilot to Campbell River is 152 miles, which can be shortened by about 10 miles by using Active Pass. Active Pass is a very narrow channel and during daylight hours there are always ferries transitting both ways. Currents in Active Pass should also be considered.

Change of Pilot takes place at Nanaimo, which is half way. Charges are very high if Pilot has done over 8 hours, therefore all ETAs/departure times, etc. should be well calculated. All vessels must follow traffic schemes on entering Juan de Fuca Straits.

ANCHORAGES: Channel is narrow but deep. Tides are very strong.

RESTRICTIONS: Please refer to depths at berth, length of pier and large range of tides. Linesmen are usually available between 0700 hrs. and 2200 hrs. on weekdays, therefore Charterers take vessels during these hours only.

MAX. SIZE: See "Berthing". Ships of 30,000 d.w.t. have loaded at this pier.

HEALTH: See "Vancouver".

RADIO: VAI/Vancouver Coast Guard Radio.

VHF: See "Vancouver".

TUGS: There are 3 very small tugs available for berthing.

BERTHING: Pier is about 120 m. long with dolphins about 22 m. fore and aft. Sea pilot only berths the vessel. These dolphins are joined by steel bridges. There are 2 bollards ashore for breast lines. There is a buoy at each end for bow and stern lines (See "Plan"). All vessels to be moored at the terminal require on board at each end, forward and aft, 6 mooring lines of 3 in. to 3.5 in. diameter nylon or such approved material, each of at least 500 ft. length, without splices and in good condition.

Three small tugs meet the vessel at berth.

The following pattern of lines is used:

1. Two lines each, head and stern lines to the buoys.
2. Two lines each forward and aft as breast lines to shore mooring bollards. These lines are to be landed on the wharf where they are fastened to and hauled ashore by the messenger ropes. Both breast lines are to be attached to the messenger and hauled ashore in one motion. This operation is done by the linesmen.
3. Two lines each forward and aft are to be provided as back springs.

Please note that the weak bollards on the "Plan" should not be used.

First lines recommended are springs fore and aft. This helps vessel to maintain her position alongside while the tugs are pushing at all times. One tug then assists in taking other lines to buoys, etc. There are 4 strong fenders on the pier. Precautions must be taken as at L.W. ship may go below these fenders.

The breast lines are to be sent ashore simultaneously at each end and kept tight at all times.

When breast lines are fast, head and stern lines are sent to the buoys. Finally last springs are made fast.

Owing to large range of tides, moorings should be tended at all times, there have been cases where ships had to haul off due to negligence of same.

The loading berth is named Westmin Resources Tyee Spit (also known as Campbell River Ore Berth/Dock). The shiploader does not have a long travel so the vessel has to shift along the berth for hatch loading changes. The currents in mid-channel are high, consequently caution must be exercised when shifting vessel along the berth.

Care should be taken with the following:

1. Shore leading breast lines must be kept taut at all times. If the vessel is small, care must be taken when shifting forward or aft as the breast lines may come into contact with existing cabins, etc. on the pier, and thus cause damage.
2. No unnecessary slack is to be allowed in the leads of head and stern lines.

3. All back springs are to be tensioned or paid out in accordance with the particular movement ahead or astern.
4. If the tide is strong, shifting at slack water and use of tugs must be considered.
5. If lines are to be shifted, linesmen should be ordered in advance.

LOADING: Mainly copper concentrates are loaded at this berth. The vessel's holds should be free of any previous cargo residue, dry and free of loose scale. Loading starts and the Notice of Readiness is accepted after holds have been inspected by the surveyor. Surveyor is usually charterer's surveyor and also performs the duties of the Port Warden (Canadian Coast Guard Ship Safety Inspector). Shipments of Ore Concentrates from Canada are governed by the Canadian Code of Safe Practice for Solid Bulk Cargoes. The requirements of this code are basically same as IMO code. Prior to commencement of loading, the surveyor will require the shipper to produce a Certificate of Analysis for Moisture Content of the Copper Concentrate. The actual moisture content shown on the certificate must be less than the "Transportable Moisture Limit" which will also be shown on the Certificate. The surveyor will require proof that the vessel is structurally sound to carry this cargo, i.e. load density of the tanktop and that the shear force and bending moments will be within the allowable limits.

Cargo is worked on a 24 hours basis on weekdays. Our vessel averaged a loading rate of 570 tonnes/hour. Cargo weight is determined by the Draft Survey. The loading scale was observed to have an error of 0.5% on the higher side. After loading, each hatch is trimmed flat by the bulldozer which weighs 9 tonnes.

CRANES: Not available.
MEDICAL: Services available.
DENSITY: Varies according to time of year. We obtained 1023.5.
FRESH WATER: Available with notice and is free of charge.
CONSULS: At Vancouver.
REPAIRS: Can be arranged from Vancouver.
DRY DOCKS: At Vancouver.
SURVEYOR: This port has a port warden. Other surveyors can be arranged from Vancouver.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Operated by ship's crew.
REPATRIATION: Possible from Vancouver, 40 minutes flight. There are frequent flights to Vancouver from Campbell River.
TIME: See "Vancouver".
HOLIDAYS: See "Vancouver".
TELEPHONES: There is a telephone at the pier which belongs to the terminal. Facilities for using the telephone are arranged through the Agent. All overseas connections are through the operator.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
GENERAL: Ship chandlers are not available but most of the stores can be self purchased. There are a few banks in the city. Population of Campbell River city is 20,000.

CANAPORT, N.B.: 45.12 N . 65.59 W.

PILOTAGE: Compulsory. Pilot supplied by the Atlantic Pilotage Authority through "Fundy Traffic" and requires 12 hours notice with 4 hours confirmation.
ANCHORAGE: Anchorage Area "C", mud bottom with good holding under fair weather conditions but it should not be considered satisfactory in strong southerly gales. Vessels may anchor South of Lat. 45° 12′ N. without a Pilot.
RESTRICTIONS: Presently daylight berthing only with no restrictions on unmooring. Delays may be experienced due to strong Southerly winds, and in periods of reduced visibility due to fog in the Summer and sea smoke in the Winter.
MAX. SIZE: 350,000 tons Summer d.w.t. 400,000 tons may be accepted under favourable weather conditions. No restrictions on length.
RADIO: The terminal will usually request the following information from the vessel prior to arrival:

(a) Distance from bow to centre cargo manifold.
(b) Hose boom SWL.
(c) Distance from cargo manifold to ship's rail.
(d) Height of manifold above deck.
(e) Size of bow chock opening. Height and width.
(f) Distance of bow chock opening to nearest bollard.
(g) Distance of bow chock opening to mooring bracket.
(h) Number and size of cargo manifold connections.
(i) Confirm that vessel is capable of maintaining 40% of d.w.t. capacity during discharge with segregated clean and cargo tank ballast with 2 valve separation.
(j) Slops, quantity, type and location.
(k) Can vessel accommodate 2 Berthing Masters and 5 Canaport crew, who will remain on board?

ETAs to be sent through Agent, 96, 72, 48 and 24 hours prior to arrival. Vessel to contact Canadian Coast Guard via Agents for permission to C.O.W. whilst discharging at Canaport. Canaport operations on VHF Channel 11 for mooring and UHF frequency for cargo operations.

TUGS: 3 tugs used to assist in mooring and unmooring, and one tug towing astern throughout discharge to keep the vessel clear of the SBM. Tugs' lines used throughout.
BERTH: SBM: Situated 4,100 ft. offshore from Mispec Point. Depth at LW 120 ft. and HW 150 ft.
FRESH WATER: Available by tug whilst at anchor.
FUEL: Bunker, IFO and MDO available by barge whilst at anchor.
BALLAST: It is a terminal requirement that tankers maintain at any stage of the discharge sufficient cargo or ballast, or a combination of both, equal to *40% of S.d.w.t.* Vessels of less than 150,000 tons S.d.w.t. may at the discretion of the Senior Berthing Master, be allowed to reduce this percentage to 30% after taking into account the expected weather condition. In addition, the vessel is to remain at a suitable trim compatible for safe manoeuvring and *not to exceed 18 ft.* by the stern.

The commercial agreements require vessels to lift dirty ballast and discharge concurrently, failure to do so will not count for laytime and will be for the owner's account.

GENERAL: *Arrival:* Hoses may be connected on either port or starboard sides with the weather conditions being the deciding factor as to which side is used. The Berthing Master will advise the vessel which side the hoses are to be connected prior to boarding. Both hose booms should be rigged to lift the mooring equipment from the tug and to lift 2×16 in. hose tails weighing 8 tons each. Pilot ladder should be rigged one side of vessel with accommodation ladder on the other side.
Mooring: Vessel secured to SBM with 2 nylon mooring hawsers and should have 2×3 in. messengers available to pass to the mooring launch. A hammer and crowbar should be available on foc'sle for use in connecting the chafing chains. The first line handled will be dependant on which side of the vessel the hoses are connected.
Cargo Handling: 2 Berthing Masters and a Canaport crew of 5 persons remain on board throughout the discharge to assist in mooring, assist in hose connection and maintain foc'sle head lookout and co-ordinate the discharge. Vessel takes ballast part way through the discharge to maintain 40% of deadweight capacity whilst at the SBM. Vessel's engines must be ready for instant manoeuvring at all times.
Cold Weather Precautions: During January and February air temperature is −7.5°C but temperatures below −20°C may be experienced. Masters are advised in order to protect their interest and to expedite the discharge, the following precautions should be taken prior to arrival to prevent freezing:

(a) Any C.O.W. lines that contain, or suspected to contain water should be purged with dry crude oil.
(b) Quality of anti-freeze or glycol in the deck I.G. pressure vacuum breakers should be checked.
(c) Heat on-deck water seal.
(d) Deck general service, fire and foam lines should be drained of water.
(e) Steam powered deck machinery should be run continuously.
(f) Deck hydraulics and machinery not fitted with 'Arctic' type hydraulic oil should be circulated continuously prior to arrival in order to be kept fluid.
(g) Whesso type ullage gauges and C.O.W. machines should be drained of any accumulated water.
(h) Any exterior fresh water pipes should be drained or lagged.

The above list of precautions should not be considered exhaustive and will vary from ship to ship.

SHORE LEAVE: By launch.
REGULATIONS: The transfer of stores, spares, fuel and fresh water is carried out at anchorage.

SHIPMASTER'S REPORT: February 1987 (Updated 1996).
SBM Location: 45° 11′ 48.3″ N., 65° 59′ 19.9″ W.
Pilotage: Pilot boarding area: 45° 10′ 48″ N., 66° 03′ 42″ W.

Pilotage undertaken by Atlantic Pilotage Authority with the assistance of a Canaport Mooring Master, who takes up station on the forecastle. Communication is by Walkie-Talkie.

Documents:
I.O.P.P. (Also for Coast Guard Safety Inspection on arrival).
Safety Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Ship's Register.
3 copies Canadian Crew List (including place of birth).
3 Vaccination Lists.
1 International Maritime Declaration of Health.
3 copies Stores List.
3 copies Personal Effects List.

Prior to Arrival: Pilot ladder rigged on port side and accommodation ladder/pilot ladder combination available on starboard side. Derrick rigged on port and starboard side to receive mooring gear and 2 × 16 in. hoses. One 3 in. (25 mm. diameter) manila messenger on forecastle to pick up mooring pennant, one messenger starboard side for tug's line and one messenger on poop for tug's line.

Accommodation for 5 seamen, Mooring Master and Assistant Mooring Master to be prepared. Cold weather precautions (seasonal) to be taken, see Admiralty Pilot Volume 59. Ice reports received via Halifax Radio and Coast Guard VHF broadcast. Irving Oil and Coast Guard to be advised of discharge plan.

The vessel is to maintain 40% of Summer d.w.t. at all times whilst deballasting/loading, and have two valve separation.

Restrictions: Berthing daylight only.
Health: Radio Pratique available through "Quarantine St. John". Vessel to send standard message.
Radio: Halifax Radio, Yarmouth Radio and Canadian Coast Guard Control - Bay of Fundy.
Tugs: One tug with 35 tonne bollard pull in attendance assists Pilot in manoeuvring to buoy. 2 mooring launches are also in attendance.
Mooring: 5 Irving Oil seamen assist ship's crew with mooring.

Standard SBM bridle mooring to 2 AKD brackets capable of accepting 3 in. chain. AKD or equivalent torque type brackets are mandatory. Upon completion of mooring tug will proceed to aft end and place on board a towing wire which is connected to a quick-release hook (supplied by Irving Oil), secured to the vessel's poop bitts.

Hoses: 2 × 16 in. standard ASA fitment (150 p.s.i. maximum working pressure) connected by ship's staff assisted by 5 Irving Oil seamen and Mooring Master. Oil may be evacuated by sea water on completion of discharge by ship.

TUGS: None available.
BERTHING:

Name	*Length* (m.)	*Depth* (m.)
Transit Wharf (public)	83.0	8.9
Oil Dock (public)	42.5	5.9
Abitibi-Price	142.0	8.2 – 9.4
Irving Oil	12.0	8.2

MEDICAL: Masters are requested to notify their Agents at least 72 hours prior to arrival, advising the number of crew to see the doctor and their complaint. There is full hospital facilities at Botwood.
TANKERS: Finger Pier length 200 ft. with berthing face length 30 ft. Depth alongside 32 ft. Berth owned by Irving Oil Ltd. and used exclusively for discharging oil products.
CRANES: Mobile cranes and boom trucks available.
STEVEDORES: Local labour should be arranged by Agent.
FRESH WATER: Limited quantities of fresh water available. Arrangements should be made through Agent or Harbour Master.
FUEL: Ship's bunkers are available by tank truck.
CONSULS: The following countries have Consular Representatives in St.John's:

Brazil
Denmark
France
Germany
Iceland
Italy
Malta
Netherlands
Portugal
Spain
Sweden

REPAIRS: The Agent should receive early advice of requirements, as most repairs are only available at St.John's (Radio, radar, gyro, Satnav and Loran, etc.). The technicians for such equipment work out of St.John's. The following brand names have representatives in St.John's: Racal-Decca, Marconi, Kelvin Hughes, Furono, Atlas and Sperry.
SURVEYORS: Stationed in St.John's: Lloyd's, BV, NKK, ABS, Germanischer Lloyd, Italian Registry, Russian Registry, China Corp. and Honduran Registry.
GANGWAY/DECK WATCHMEN: Usually ship's crew.
CUSTOMS ALLOWANCES: Each crew member is allowed 200 cigarettes and one 40 oz. bottle of wine or spirits per week.
REPATRIATION: No formal facilities, however, crew changes and repatriation can be carried out. Prior notice to Agent is required.
AIRPORT: Nearest airport is Gander, 86 km. away.
TIME: GMT minus 3.5 hours. First Sunday in April clocks advanced 1 hour. Last Sunday in October clocks retarded 1 hour.
HOLIDAYS: Good Friday; Labour Day; Christmas Day and Boxing Day. No work performed on these holidays.
POLICE/AMBULANCE/FIRE: The Police, Fire Department and Ambulance Service are located in area.
EMERGENCY CO-ORDINATING CENTRE: Canadian Coast Guard, Search and Rescue, St. John's. Tel: (709) 772-5151 or VHF Channel 16.
SERVICES: *Supplies and Laundry:* Stores and provisions have to be obtained in area and at St.John's. In order to avoid delays, Agent should be notified prior to arrival of the vessel's requirements. Stores and supplies will be delivered by truck at the dock.
BANKS: Several Canadian Banks provide service in the Botwood area.
SHORE LEAVE: In order to comply with Immigration Regulations, crew should be carefully checked before sailing, and any missing crew member reported to Agent.

In case of crew members left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances (if any) and also instructions for repatriation. An Immigration Bond may be required.
GARBAGE DISPOSAL: Arrangements must be made through Agent.
WASTE OIL DISPOSAL: Arrangements must be made through Agent.
SEAMAN'S CLUBS: Recreational facilities available locally.
CURRENCY: Canadian Dollar.
CHARTS: Canadian Hydrographic Chart No. 4597.
GENERAL: Masters are strongly advised to contact their Agent 72 hours, 48 hours, 36 hours, 24 hours, 12 hours and 6 hours with ETAs. In the 72 hour message, Masters should advise all port requirements.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, Newfoundland Region, P.O.Box 1300, St.John's, Newfoundland A1C 6H8, Canada. *Tel:* (709) 772-5154. *Telex:* 016-3369. *FAX:* (709) 772-5127. *Contact:* D.A. Lester, Regional Manager, Harbours and Ports.

Harbour Master: Cyril Lanning, P.O.Box 236, Botwood, Newfoundland A0H 1E0, Canada. *Tel:* (709) 257-2613.

BRIDGEWATER, N.S.: 44.23 N. 64.31 W. (See Plan)

DOCUMENTS: See "Halifax".
PILOTAGE: Not compulsory. Report ETA by radio-telephone or radio-telegraph to Superintendent of Pilots, Halifax, N.S. at least 12 hours before arrival at boarding station. ETA to be confirmed 3 hours before arrival. Pilot boards off Moshers Island Light.
ANCHORAGE: At Dayspring, 2 miles below Bridgewater.
RESTRICTIONS: Port is situated on La Have River, 10 miles from the sea. Channel path at LW, 20 ft.
MAX. SIZE: Length 325 ft. Draft 20 ft.
HEALTH: Pratique granted by Customs Officer who boards on arrival at the berth. Also see "Montreal".
RADIO: Halifax Radio.
BERTHING: Transport Canada Wharf, berthing length, 1,073 ft. Depth alongside 21 ft.
MEDICAL: Hospital services available.
STEVEDORES: Available.
FRESH WATER: Available ex wharf only on West side of river.
FUEL: Diesel and gasoline from storage tanks in port.
REPAIRS: Limited facilities for engine repairs.
AIRPORT: Nearest approximately 90 miles away.
HOLIDAYS: Dominion Legal holidays.
POLICE/AMBULANCE/FIRE: Police Tel: 543-2464. Dawson Memorial Hospital Tel: 543-4603.
BANKS: Bank of Montreal, Tel: 543-2415.
Royal Bank of Canada, Tel: 543-7161.
Bank of Nova Scotia, Tel: 543-8155.
Canadian Imperial Bank of Commerce, Tel: 543-2451.
AUTHORITY: Transport Canada, P.O.Box 1013, Dartmouth, N.S., B2Y 4K2. *Tel:* 426-6508. *Telex:* 019-22757. *Contact:* William Beck.

Local Authority: Transport Canada, Bridgewater, Nova Scotia. Tel: 543-8815. Contact: Glayden L. Conrad, Harbour Master.

CAMPBELL RIVER, B.C.: 50.02 N. 125.14 W. (See Plan)

SHIPMASTER'S REPORT: June 1989.

VESSEL PARTICULARS:

D.W.T.		9,262 tons.
LOA		119.62 m.
Moulded Breadth		18.5 m.
Moulded Depth		10.0 m.
Departure Draft	Forward 7.51 m.	Aft 8.45 m.
Cargo Loaded		8,400 tonnes copper concentrate.

DOCUMENTS: See "Vancouver".
PILOTAGE: Compulsory. Pilot boards at Victoria. Confirm ETA Pilot Station by cable to "Pilots Victoria", giving 24 hours, 12 hours and 4 hours notice. Pilot uses a small tug or a pilot boat, depending upon the weather. The distance from Victoria Pilot to Campbell River is 152 miles, which can be shortened by about 10 miles by using Active Pass. Active Pass is a very narrow channel and during daylight hours there are always ferries transitting both ways. Currents in Active Pass should also be considered.

Change of Pilot takes place at Nanaimo, which is half way. Charges are very high if Pilot has done over 8 hours, therefore all ETAs/departure times, etc. should be well calculated. All vessels must follow traffic schemes on entering Juan de Fuca Straits.
ANCHORAGES: Channel is narrow but deep. Tides are very strong.
RESTRICTIONS: Please refer to depths at berth, length of pier and large range of tides. Linesmen are usually available between 0700 hrs. and 2200 hrs. on weekdays, therefore Charterers take vessels during these hours only.
MAX. SIZE: See "Berthing". Ships of 30,000 d.w.t. have loaded at this pier.
HEALTH: See "Vancouver".
RADIO: VAI/Vancouver Coast Guard Radio.
VHF: See "Vancouver".
TUGS: There are 3 very small tugs available for berthing.
BERTHING: Pier is about 120 m. long with dolphins about 22 m. fore and aft. Sea pilot only berths the vessel. These dolphins are joined by steel bridges. There are 2 bollards ashore for breast lines. There is a buoy at each end for bow and stern lines (See "Plan"). All vessels to be moored at the terminal require on board at each end, forward and aft, 6 mooring lines of 3 in. to 3.5 in. diameter nylon or such approved material, each of at least 500 ft. length, without splices and in good condition.

Three small tugs meet the vessel at berth.
The following pattern of lines is used:
1. Two lines each, head and stern lines to the buoys.
2. Two lines each forward and aft as breast lines to shore mooring bollards. These lines are to be landed on the wharf where they are fastened to and hauled ashore by the messenger ropes. Both breast lines are to be attached to the messenger and hauled ashore in one motion. This operation is done by the linesmen.
3. Two lines each forward and aft are to be provided as back springs. Please note that the weak bollards on the "Plan" should not be used.

First lines recommended are springs fore and aft. This helps vessel to maintain her position alongside while the tugs are pushing at all times. One tug then assists in taking other lines to buoys, etc. There are 4 strong fenders on the pier. Precautions must be taken as at L.W. ship may go below these fenders.

The breast lines are to be sent ashore simultaneously at each end and kept tight at all times.

When breast lines are fast, head and stern lines are sent to the buoys. Finally last springs are made fast.

Owing to large range of tides, moorings should be tended at all times, there have been cases where ships had to haul off due to negligence of same.

The loading berth is named Westmin Resources Tyee Spit (also known as Campbell River Ore Berth/Dock). The shiploader does not have a long travel so the vessel has to shift along the berth for hatch loading changes. The currents in mid-channel are high, consequently caution must be exercised when shifting vessel along the berth.

Care should be taken with the following:
1. Shore leading breast lines must be kept taut at all times. If the vessel is small, care must be taken when shifting forward or aft as the breast lines may come into contact with existing cabins, etc. on the pier, and thus cause damage.
2. No unnecessary slack is to be allowed in the leads of head and stern lines.

3. All back springs are to be tensioned or paid out in accordance with the particular movement ahead or astern.
4. If the tide is strong, shifting at slack water and use of tugs must be considered.
5. If lines are to be shifted, linesmen should be ordered in advance.

LOADING: Mainly copper concentrates are loaded at this berth. The vessel's holds should be free of any previous cargo residue, dry and free of loose scale. Loading starts and the Notice of Readiness is accepted after holds have been inspected by the surveyor. Surveyor is usually charterer's surveyor and also performs the duties of the Port Warden (Canadian Coast Guard Ship Safety Inspector). Shipments of Ore Concentrates from Canada are governed by the Canadian Code of Safe Practice for Solid Bulk Cargoes. The requirements of this code are basically same as IMO code. Prior to commencement of loading, the surveyor will require the shipper to produce a Certificate of Analysis for Moisture Content of the Copper Concentrate. The actual moisture content shown on the certificate must be less than the "Transportable Moisture Limit" which will also be shown on the Certificate. The surveyor will require proof that the vessel is structurally sound to carry this cargo, i.e. load density of the tanktop and that the shear force and bending moments will be within the allowable limits.

Cargo is worked on a 24 hours basis on weekdays. Our vessel averaged a loading rate of 570 tonnes/hour. Cargo weight is determined by the Draft Survey. The loading scale was observed to have an error of 0.5% on the higher side. After loading, each hatch is trimmed flat by the bulldozer which weighs 9 tonnes.

CRANES: Not available.
MEDICAL: Services available.
DENSITY: Varies according to time of year. We obtained 1023.5.
FRESH WATER: Available with notice and is free of charge.
CONSULS: At Vancouver.
REPAIRS: Can be arranged from Vancouver.
DRY DOCKS: At Vancouver.
SURVEYOR: This port has a port warden. Other surveyors can be arranged from Vancouver.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Operated by ship's crew.
REPATRIATION: Possible from Vancouver, 40 minutes flight. There are frequent flights to Vancouver from Campbell River.
TIME: See "Vancouver".
HOLIDAYS: See "Vancouver".
TELEPHONES: There is a telephone at the pier which belongs to the terminal. Facilities for using the telephone are arranged through the Agent. All overseas connections are through the operator.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
GENERAL: Ship chandlers are not available but most of the stores can be self purchased. There are a few banks in the city. Population of Campbell River city is 20,000.

CANAPORT, N.B.: 45.12 N . 65.59 W.

PILOTAGE: Compulsory. Pilot supplied by the Atlantic Pilotage Authority through "Fundy Traffic" and requires 12 hours notice with 4 hours confirmation.
ANCHORAGE: Anchorage Area "C", mud bottom with good holding under fair weather conditions but it should not be considered satisfactory in strong southerly gales. Vessels may anchor South of Lat. 45° 12′ N. without a Pilot.
RESTRICTIONS: Presently daylight berthing only with no restrictions on unmooring. Delays may be experienced due to strong Southerly winds, and in periods of reduced visibility due to fog in the Summer and sea smoke in the Winter.
MAX. SIZE: 350,000 tons Summer d.w.t. 400,000 tons may be accepted under favourable weather conditions. No restrictions on length.
RADIO: The terminal will usually request the following information from the vessel prior to arrival:

(a) Distance from bow to centre cargo manifold.
(b) Hose boom SWL.
(c) Distance from cargo manifold to ship's rail.
(d) Height of manifold above deck.
(e) Size of bow chock opening. Height and width.
(f) Distance of bow chock opening to nearest bollard.
(g) Distance of bow chock opening to mooring bracket.
(h) Number and size of cargo manifold connections.
(i) Confirm that vessel is capable of maintaining 40% of d.w.t. capacity during discharge with segregated clean and cargo tank ballast with 2 valve separation.
(j) Slops, quantity, type and location.
(k) Can vessel accommodate 2 Berthing Masters and 5 Canaport crew, who will remain on board?

ETAs to be sent through Agent, 96, 72, 48 and 24 hours prior to arrival. Vessel to contact Canadian Coast Guard via Agents for permission to C.O.W. whilst discharging at Canaport. Canaport operations on VHF Channel 11 for mooring and UHF frequency for cargo operations.

TUGS: 3 tugs used to assist in mooring and unmooring, and one tug towing astern throughout discharge to keep the vessel clear of the SBM. Tugs' lines used throughout.
BERTH: SBM: Situated 4,100 ft. offshore from Mispec Point. Depth at LW 120 ft. and HW 150 ft.
FRESH WATER: Available by tug whilst at anchor.
FUEL: Bunker, IFO and MDO available by barge whilst at anchor.
BALLAST: It is a terminal requirement that tankers maintain at any stage of the discharge sufficient cargo or ballast, or a combination of both, equal to *40% of S.d.w.t.* Vessels of less than 150,000 tons S.d.w.t. may at the discretion of the Senior Berthing Master, be allowed to reduce this percentage to 30% after taking into account the expected weather condition. In addition, the vessel is to remain at a suitable trim compatible for safe manoeuvring and *not to exceed 18 ft.* by the stern.

The commercial agreements require vessels to lift dirty ballast and discharge concurrently, failure to do so will not count for laytime and will be for the owner's account.

GENERAL: *Arrival:* Hoses may be connected on either port or starboard sides with the weather conditions being the deciding factor as to which side is used. The Berthing Master will advise the vessel which side the hoses are to be connected prior to boarding. Both hose booms should be rigged to lift the mooring equipment from the tug and to lift 2×16 in. hose tails weighing 8 tons each. Pilot ladder should be rigged one side of vessel with accommodation ladder on the other side.
Mooring: Vessel secured to SBM with 2 nylon mooring hawsers and should have 2×3 in. messengers available to pass to the mooring launch. A hammer and crowbar should be available on foc'sle for use in connecting the chafing chains. The first line handled will be dependant on which side of the vessel the hoses are connected.
Cargo Handling: 2 Berthing Masters and a Canaport crew of 5 persons remain on board throughout the discharge to assist in mooring, assist in hose connection and maintain foc'sle head lookout and co-ordinate the discharge. Vessel takes ballast part way through the discharge to maintain 40% of deadweight capacity whilst at the SBM. Vessel's engines must be ready for instant manoeuvring at all times.
Cold Weather Precautions: During January and February air temperature is −7.5°C but temperatures below −20°C may be experienced. Masters are advised in order to protect their interest and to expedite the discharge, the following precautions should be taken prior to arrival to prevent freezing:

(a) Any C.O.W. lines that contain, or suspected to contain water should be purged with dry crude oil.
(b) Quality of anti-freeze or glycol in the deck I.G. pressure vacuum breakers should be checked.
(c) Heat on-deck water seal.
(d) Deck general service, fire and foam lines should be drained of water.
(e) Steam powered deck machinery should be run continuously.
(f) Deck hydraulics and machinery not fitted with 'Arctic' type hydraulic oil should be circulated continuously prior to arrival in order to be kept fluid.
(g) Whesso type ullage gauges and C.O.W. machines should be drained of any accumulated water.
(h) Any exterior fresh water pipes should be drained or lagged.

The above list of precautions should not be considered exhaustive and will vary from ship to ship.

SHORE LEAVE: By launch.
REGULATIONS: The transfer of stores, spares, fuel and fresh water is carried out at anchorage.

SHIPMASTER'S REPORT: February 1987 (Updated 1996).
SBM Location: 45° 11′ 48.3″ N., 65° 59′ 19.9″ W.
Pilotage: Pilot boarding area: 45° 10′ 48″ N., 66° 03′ 42″ W.

Pilotage undertaken by Atlantic Pilotage Authority with the assistance of a Canaport Mooring Master, who takes up station on the forecastle. Communication is by Walkie-Talkie.

Documents:
I.O.P.P. (Also for Coast Guard Safety Inspection on arrival).
Safety Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Ship's Register.

VHF: See "Vancouver".
TUGS: There are 3 very small tugs available for berthing.
BERTHING: Pier is about 120 m. long with dolphins about 22 m. fore and aft. Sea pilot only berths the vessel. These dolphins are joined by steel bridges. There are 2 bollards ashore for breast lines. There is a buoy at each end for bow and stern lines (See "Plan"). All vessels to be moored at the terminal require on board at each end, forward and aft, 6 mooring lines of 3 in. to 3.5 in. diameter nylon or such approved material, each of at least 500 ft. length, without splices and in good condition.

Three small tugs meet the vessel at berth.

The following pattern of lines is used:

1. Two lines each, head and stern lines to the buoys.
2. Two lines each forward and aft as breast lines to shore mooring bollards. These lines are to be landed on the wharf where they are fastened to and hauled ashore by the messenger ropes. Both breast lines are to be attached to the messenger and hauled ashore in one motion. This operation is done by the linesmen.
3. Two lines each forward and aft are to be provided as back springs.

Please note that the weak bollards on the "Plan" should not be used.

First lines recommended are springs fore and aft. This helps vessel to maintain her position alongside while the tugs are pushing at all times. One tug then assists in taking other lines to buoys, etc. There are 4 strong fenders on the pier. Precautions must be taken as at L.W. ship may go below these fenders.

The breast lines are to be sent ashore simultaneously at each end and kept tight at all times.

When breast lines are fast, head and stern lines are sent to the buoys. Finally last springs are made fast.

Owing to large range of tides, moorings should be tended at all times, there have been cases where ships had to haul off due to negligence of same.

The loading berth is named Westmin Resources Tyee Spit (also known as Campbell River Ore Berth/Dock). The shiploader does not have a long travel so the vessel has to shift along the berth for hatch loading changes. The currents in mid-channel are high, consequently caution must be exercised when shifting vessel along the berth.

Care should be taken with the following:

1. Shore leading breast lines must be kept taut at all times. If the vessel is small, care must be taken when shifting forward or aft as the breast lines may come into contact with existing cabins, etc. on the pier, and thus cause damage.
2. No unnecessary slack is to be allowed in the leads of head and stern lines.

3. All back springs are to be tensioned or paid out in accordance with the particular movement ahead or astern.
4. If the tide is strong, shifting at slack water and use of tugs must be considered.
5. If lines are to be shifted, linesmen should be ordered in advance.

LOADING: Mainly copper concentrates are loaded at this berth. The vessel's holds should be free of any previous cargo residue, dry and free of loose scale. Loading starts and the Notice of Readiness is accepted after holds have been inspected by the surveyor. Surveyor is usually charterer's surveyor and also performs the duties of the Port Warden (Canadian Coast Guard Ship Safety Inspector). Shipments of Ore Concentrates from Canada are governed by the Canadian Code of Safe Practice for Solid Bulk Cargoes. The requirements of this code are basically same as IMO code. Prior to commencement of loading, the surveyor will require the shipper to produce a Certificate of Analysis for Moisture Content of the Copper Concentrate. The actual moisture content shown on the certificate must be less than the "Transportable Moisture Limit" which will also be shown on the Certificate. The surveyor will require proof that the vessel is structurally sound to carry this cargo, i.e. load density of the tanktop and that the shear force and bending moments will be within the allowable limits.

Cargo is worked on a 24 hours basis on weekdays. Our vessel averaged a loading rate of 570 tonnes/hour. Cargo weight is determined by the Draft Survey. The loading scale was observed to have an error of 0.5% on the higher side. After loading, each hatch is trimmed flat by the bulldozer which weighs 9 tonnes.

CRANES: Not available.
MEDICAL: Services available.
DENSITY: Varies according to time of year. We obtained 1023.5.
FRESH WATER: Available with notice and is free of charge.
CONSULS: At Vancouver.
REPAIRS: Can be arranged from Vancouver.
DRY DOCKS: At Vancouver.
SURVEYOR: This port has a port warden. Other surveyors can be arranged from Vancouver.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Operated by ship's crew.
REPATRIATION: Possible from Vancouver, 40 minutes flight. There are frequent flights to Vancouver from Campbell River.
TIME: See "Vancouver".
HOLIDAYS: See "Vancouver".
TELEPHONES: There is a telephone at the pier which belongs to the terminal. Facilities for using the telephone are arranged through the Agent. All overseas connections are through the operator.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
GENERAL: Ship chandlers are not available but most of the stores can be self purchased. There are a few banks in the city. Population of Campbell River city is 20,000.

CANAPORT, N.B.: 45.12 N . 65.59 W.

PILOTAGE: Compulsory. Pilot supplied by the Atlantic Pilotage Authority through "Fundy Traffic" and requires 12 hours notice with 4 hours confirmation.
ANCHORAGE: Anchorage Area "C", mud bottom with good holding under fair weather conditions but it should not be considered satisfactory in strong southerly gales. Vessels may anchor South of Lat. 45° 12′ N. without a Pilot.
RESTRICTIONS: Presently daylight berthing only with no restrictions on unmooring. Delays may be experienced due to strong Southerly winds, and in periods of reduced visibility due to fog in the Summer and sea smoke in the Winter.
MAX. SIZE: 350,000 tons Summer d.w.t. 400,000 tons may be accepted under favourable weather conditions. No restrictions on length.
RADIO: The terminal will usually request the following information from the vessel prior to arrival:

(a) Distance from bow to centre cargo manifold.
(b) Hose boom SWL.
(c) Distance from cargo manifold to ship's rail.
(d) Height of manifold above deck.
(e) Size of bow chock opening. Height and width.
(f) Distance of bow chock opening to nearest bollard.
(g) Distance of bow chock opening to mooring bracket.
(h) Number and size of cargo manifold connections.
(i) Confirm that vessel is capable of maintaining 40% of d.w.t. capacity during discharge with segregated clean and cargo tank ballast with 2 valve separation.
(j) Slops, quantity, type and location.
(k) Can vessel accommodate 2 Berthing Masters and 5 Canaport crew, who will remain on board?

ETAs to be sent through Agent, 96, 72, 48 and 24 hours prior to arrival. Vessel to contact Canadian Coast Guard via Agents for permission to C.O.W. whilst discharging at Canaport. Canaport operations on VHF Channel 11 for mooring and UHF frequency for cargo operations.
TUGS: 3 tugs used to assist in mooring and unmooring, and one tug towing astern throughout discharge to keep the vessel clear of the SBM. Tugs' lines used throughout.
BERTH: SBM: Situated 4,100 ft. offshore from Mispec Point. Depth at LW 120 ft. and HW 150 ft.
FRESH WATER: Available by tug whilst at anchor.
FUEL: Bunker, IFO and MDO available by barge whilst at anchor.
BALLAST: It is a terminal requirement that tankers maintain at any stage of the discharge sufficient cargo or ballast, or a combination of both, equal to *40% of S.d.w.t.* Vessels of less than 150,000 tons S.d.w.t. may at the discretion of the Senior Berthing Master, be allowed to reduce this percentage to 30% after taking into account the expected weather condition. In addition, the vessel is to remain at a suitable trim compatible for safe manoeuvring and *not to exceed 18 ft.* by the stern.

The commercial agreements require vessels to lift dirty ballast and discharge concurrently, failure to do so will not count for laytime and will be for the owner's account.
GENERAL: *Arrival:* Hoses may be connected on either port or starboard sides with the weather conditions being the deciding factor as to which side is used. The Berthing Master will advise the vessel which side the hoses are to be connected prior to boarding. Both hose booms should be rigged to lift the mooring equipment from the tug and to lift 2×16 in. hose tails weighing 8 tons each. Pilot ladder should be rigged one side of vessel with accommodation ladder on the other side.
Mooring: Vessel secured to SBM with 2 nylon mooring hawsers and should have 2×3 in. messengers available to pass to the mooring launch. A hammer and crowbar should be available on foc'sle for use in connecting the chafing chains. The first line handled will be dependant on which side of the vessel the hoses are connected.
Cargo Handling: 2 Berthing Masters and a Canaport crew of 5 persons remain on board throughout the discharge to assist in mooring, assist in hose connection and maintain foc'sle head lookout and co-ordinate the discharge. Vessel takes ballast part way through the discharge to maintain 40% of deadweight capacity whilst at the SBM. Vessel's engines must be ready for instant manoeuvring at all times.
Cold Weather Precautions: During January and February air temperature is −7.5°C but temperatures below −20°C may be experienced. Masters are advised in order to protect their interest and to expedite the discharge, the following precautions should be taken prior to arrival to prevent freezing:

(a) Any C.O.W. lines that contain, or suspected to contain water should be purged with dry crude oil.
(b) Quality of anti-freeze or glycol in the deck I.G. pressure vacuum breakers should be checked.
(c) Heat on-deck water seal.
(d) Deck general service, fire and foam lines should be drained of water.
(e) Steam powered deck machinery should be run continuously.
(f) Deck hydraulics and machinery not fitted with 'Arctic' type hydraulic oil should be circulated continuously prior to arrival in order to be kept fluid.
(g) Whesso type ullage gauges and C.O.W. machines should be drained of any accumulated water.
(h) Any exterior fresh water pipes should be drained or lagged.

The above list of precautions should not be considered exhaustive and will vary from ship to ship.
SHORE LEAVE: By launch.
REGULATIONS: The transfer of stores, spares, fuel and fresh water is carried out at anchorage.

SHIPMASTER'S REPORT: February 1987 (Updated 1996).
SBM Location: 45° 11′ 48.3″ N., 65° 59′ 19.9″ W.
Pilotage: Pilot boarding area: 45° 10′ 48″ N., 66° 03′ 42″ W.

Pilotage undertaken by Atlantic Pilotage Authority with the assistance of a Canaport Mooring Master, who takes up station on the forecastle. Communication is by Walkie-Talkie.
Documents:

I.O.P.P. (Also for Coast Guard Safety Inspection on arrival).
Safety Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Ship's Register.
3 copies Canadian Crew List (including place of birth).
3 Vaccination Lists.
1 International Maritime Declaration of Health.
3 copies Stores List.
3 copies Personal Effects List.

Prior to Arrival: Pilot ladder rigged on port side and accommodation ladder/pilot ladder combination available on starboard side. Derrick rigged on port and starboard side to receive mooring gear and 2 × 16 in. hoses. One 3 in. (25 mm. diameter) manila messenger on forecastle to pick up mooring pennant, one messenger starboard side for tug's line and one messenger on poop for tug's line.

Accommodation for 5 seamen, Mooring Master and Assistant Mooring Master to be prepared. Cold weather precautions (seasonal) to be taken, see Admiralty Pilot Volume 59. Ice reports received via Halifax Radio and Coast Guard VHF broadcast. Irving Oil and Coast Guard to be advised of discharge plan.

The vessel is to maintain 40% of Summer d.w.t. at all times whilst deballasting/loading, and have two valve separation.
Restrictions: Berthing daylight only.
Health: Radio Pratique available through "Quarantine St. John". Vessel to send standard message.
Radio: Halifax Radio, Yarmouth Radio and Canadian Coast Guard Control - Bay of Fundy.
Tugs: One tug with 35 tonne bollard pull in attendance assists Pilot in manoeuvring to buoy. 2 mooring launches are also in attendance.
Mooring: 5 Irving Oil seamen assist ship's crew with mooring.

Standard SBM bridle mooring to 2 AKD brackets capable of accepting 3 in. chain. AKD or equivalent torque type brackets are mandatory. Upon completion of mooring tug will proceed to aft end and place on board a towing wire which is connected to a quick-release hook (supplied by Irving Oil), secured to the vessel's poop bitts.
Hoses: 2 × 16 in. standard ASA fitment (150 p.s.i. maximum working pressure) connected by ship's staff assisted by 5 Irving Oil seamen and Mooring Master. Oil may be evacuated by sea water on completion of discharge by ship.

Cargo Survey: Cargo ullages and water dips carried out by Irving Oil Surveyor and monitored by ship's staff.

Tank Dry Certificate will be signed by Irving Oil Surveyor, if acceptable, prior to ballasting concurrent with discharge and on completion of discharge.

Fresh Provisions: Plentiful and good quality but meats and fruits, etc., very costly in Winter months, bonded stores available. All stores are supplied by launch/barge depending on quantity at rate per hour basis, this also is expensive. Shore launch available.

Discharge Rate: Maximum pressure of 150 p.s.i. at the rail is permitted and by using 3 pumps and maintaining 140 p.s.i., a rate of 50,000/53,000 gross bbls. per hour was obtained. Final stripping ashore was part restricted by relatively high back pressure.

General: Throughout discharge the bridge is manned by either the Mooring Master or his assistant, who remains in contact with shore, where strain gauges are available for tension on mooring ropes. Seamen, as deck watches, are positioned, throughout the discharge. Ship's crew are required to be in attendance and on watch at all times and main engine on maximum 5 minutes notice. Ambient temperatures of minus 35°C may be experienced during the hours of darkness in Winter months with chill factor.

Canadian Coast Guard will attend onboard for general safety inspection and sighting of I.O.P.P. Certificate and Non-Canadian Ship Compliance Certificate. Sailing and/or entrance to routing may be delayed due to malfunction of Navigational equipment and/or manoeuvring ability. Master's Declaration to be radioed at least 24 hours prior to arrival to Canadian Coast Guard, relating to the foregoing.

OPERATOR: Canaport Ltd., P.O.Box 2055, Saint John, N.B., Canada. *Tel:* 506-632-7177. *FAX:* (506) 633-7445. *Contact:* Blaine M. Higgs, Canaport Manager.

CARLETON, Quebec: 48.06 N. 66.07 W.

LOCATION: Located on the South shore of the Gaspe Peninsular inside Chaleur Bay.
APPROACHES: No hazards and good anchorage outside. Channel depth at 7 m. extreme low tide. Icebreaker assistance available in Winter if necessary.
PILOTAGE: Not compulsory, but available through Pilots Dalhousie.
RESTRICTIONS: The harbour is open all year round, but occasionally assistance of ice-breakers may be required.
HEALTH: Pratique granted by radio.
RADIO: Grindstone (VCN).
TUGS: Available but not compulsory.
BERTHING: Section No. 1: Length 134 m., max. draft 7.2 m.
CRANES: Available on request.
STEVEDORES: *Working Hours:* Monday to Friday 0800 hrs. – 1700 hrs. Work possible on holidays and weekends with notice.
MEDICAL: Hospital available locally.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Diesel oil available.
REPAIRS: Minor repairs possible.
DRY DOCK: Nearest dry dock located at Les Mechins, 394 km. from Carleton.
AIRPORT: Local airport.
TIME: GMT minus 5 hours. GMT minus 4 hours in Summer (first Saturday in April to last Saturday in October).
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday in May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday in September), Thanksgiving (2nd Monday in October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).
GENERAL:
Chart: Canadian Chart No. 4921.
Formalities: Port of entry for Customs and Immigration. Quarantine services available by radio.
Services: Bank, post office, railway, provisions and marine supplies, fumigation.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980. *Contact:* J.G. Boudreau, Harbour Master, Carleton. Tel: (418) 364-7916, (418) 364-3053.

CHANDLER, Quebec: 48.20 N. 64.39 W. (See Plan)

LOCATION: Situated on the South shore of the Gaspe Peninsular at the entrance of Chaleur Bay.
PILOTAGE: Not compulsory but recommended. Atlantic Pilotage Authority licenced Pilot available through Tel: (418) 689-3378.
RESTRICTIONS: *Navigation Season:* All year round, ice-breakers sometimes accompany vessels.
Channel Depth: 8.0 m.
HEALTH: Pratique is secured by radio through Quebec City.
RADIO: Grindstone (VCN).
TUGS: Available, not required for powered vessels.
BERTHING: *Transport Canada Wharf:* East Side reserved for fishing vessels.

West Side: Length 150 m. Depth at LW 9.0 m.
STEVEDORES: Skilled labour available.
Working Hours: Monday to Friday, 0800 hrs. – 1700 hrs. Sunday and holiday work possible with advance notice.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Diesel oil available. Bunker 'C' can be brought in by rail.
DRY DOCK: Nearest dry dock located at Les Mechins (185 miles from Chandler).
REPAIRS: Minor repairs only.
SURVEYORS: Lloyd's at Quebec City. ABS at Montreal.
AIRPORT: Gaspe Airport.
TIME: GMT minus 5 hours in Winter. GMT minus 4 hours in Summer (from first Saturday of April to last Saturday of October).
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday of May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday of September), Thanksgiving (2nd Monday of October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).
SERVICES: Post office, bank, telephone, notary, telegraph, hospital, local airport, railway, provisions, marine supplies, fumigation and cranes.
GENERAL: *Formalities:* Port of entry for Customs. Immigration services available by radio or telephone. Quarantine services available from Quebec City.
Chart: Canadian Chart No. 4921.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980.

Mr. Jean-Guy Fullum, Harbour Master – Chandler.

CHARLOTTETOWN, P.E.I.: 46.14 N. 63.07 W. (See Plan)

PORT LIMITS: A ship is considered to be "arrived" when it reaches Pilot Boarding Station at Lat. 46° 00′ N., Long. 63° 08′ W.
DOCUMENTS: The following lists and documents must be presented on arrival at the first Canadian port:

Inward Report (on Form A 6).

The following lists must be produced in triplicate (at some ports only in duplicate):

Crew List (Imm. 200).
Passengers List (Imm. 246).
Stowaways List.
Crew's Personal Effects List (Y. 14).
Stores List (E. 1).
Vaccination Certificates.
International Marine Health Declaration.
Deratting Certificate.
Health Declaration of Animals on board.
Vessel's official documents and certificates for inspection.
Cargo documents are usually required in triplicate.

APPROACHES: *Entrance:* The 8 mile approach channel has depths of not less than 11.0 m. (36 ft.) in the fairway, which is marked by light buoys and leading lights.
PILOTAGE: Pilotage is compulsory. One Pilot active with privately owned 40 ft. wooden boat, white hull, blue vertical strip midships. The pilot boarding station is in position Lat. 46° 00′ N., Long. 63° 08′ W. No alternate area in event of bad weather. To avoid a delay in obtaining a Pilot, he may be contacted on VHF Channel 16. Master should report ETA at least 12 hours before the ETA at the pilot boarding station. The ETA must be confirmed or corrected not more than 6 hours later. The Master of a vessel that is to depart or make a move within the compulsory pilotage area must report to "Pilots Charlottetown" 6 hours prior to estimated time of departure.
ANCHORAGES: Anchorage inside harbour at Three Tides – Lat. 46° 13′ N. Long. 63° 08′ W. Average depth of water 30 ft.
RESTRICTIONS: No restrictions, except draft 30 ft.
MAX. SIZE: Draft 30 ft.
HEALTH: Pratique procedure carried out by Customs Officers. (Form QS1).
RADIO: VCA Charlottetown, Canadian Coast Guard.
VHF: Canadian Coast Guard (VCA), Channels 16 and 26.
RADAR: Service not available.
TUGS: Not available.
BERTHING: (1) Charlottetown Marine Terminal: West side, berthing length 500 ft. with depth ranging from 30 ft. at outer end to 10 ft. at inner end at low water; East side, berthing length 600 ft. with depth of water ranging from 30 ft. at outer end to 10 ft. at inner end at low water. Outer end has a berthing length of 230 ft. with a depth of water of 30 ft. at low water. Wharf used for loading and discharging general cargo; equipped with one unheated shed – 385 ft. long×50 ft. wide, one heated freight shed 385 ft.×60 ft. Electric light, water, oil and gasoline available. Mobile cranes available.

(2) Ministry of Transport Wharf, 300 ft. wide, with a depth of 33 ft. alongside. Office and stores building, buoy test shop, etc. West side berth, 450 ft. long, with depth of 26 ft. for Coast Guard use only.

(3) Texaco Canada Ltd. Wharf, 365 ft. long. Mooring dolphins have been erected adjacent to the wharf, and there is reported to be at least 28 ft. alongside at low water.

(4) Irving Oil Ltd. Wharf, on edge of channel, about 600 ft. from Old Bridge Site. Use by Irving tankers only.
CRANES: Shore cranes available.
BULK CARGO FACILITIES: See "Berthing" – "Charlottetown Marine Terminal".

SPECIALISED CARGO FACILITIES: Berths not equipped for handling containers or roll-on/roll-off traffic.
BRIDGES: None.
STEVEDORES: Advise ETA before 1600 hrs. in order to commence 0800 hrs. next day.
MEDICAL: No advance notice required, ample hospital facilities available.
TANKERS: Charlottetown Marine Terminal (East Side): Outer end has a berthing length of 230 ft. with depth of water 30 ft., discharge lines 8 in., 10 in. and 12 in., no slop facilities.

Irving Oil Wharf: On edge of channel about 600 ft. from bridge. Discharge lines 8 in. and 10 in. Depth 30 ft., no slop facilities.
DENSITY: 1025 oz. per cu.ft.
FRESH WATER: Available at Railway Wharf. Order through Agent. Rate 12 t.p.h.
FUEL: Delivered by tank truck. Most grades of bunker fuel and diesel as well as marine lubricants can be obtained through supplier.
REPAIRS: Minor repairs only.
DRY DOCKS: Not available.
GANGWAY/DECK WATCHMEN: Usually ship's crew.
OPENING/CLOSING HATCHES: Stevedores work hatches which are not mechanically operated.
CUSTOMS ALLOWANCES: 200 cigarettes or 2.0 lb. tobacco or cigars, 40 oz. of wine or spirits or 288 oz. of beer.
CARGO GEAR: Vessel required to use own gear for loading and unloading.
REPATRIATION: Crew changes and repatriation can be carried out with little difficulty.
AIRPORT: 4 miles distant, with daily flights by E.P.A. and Air Canada.
TIME: GMT minus 4 hours, May to October; GMT minus 5 hours, November to April.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Victoria Day; Canada Day; Labour Day; Thanksgiving Day; Remembrance Day; Christmas Day; Boxing Day. Work can be arranged on these days.
POLICE/AMBULANCE/FIRE: Police, 894-5513 and 368-2677; Ambulance, 892-5311. Fire, 894-3113.
TELEPHONES: No hookup available.
BANKS:
(1) Royal Bank of Canada, Confederation Plaza, Charlottetown, PEI.
(2) Bank of Montreal, Confederation Plaza, Charlottetown, PEI.
(3) Bank of Nova Scotia, Confederation Plaza, Charlottetown, PEI.
(4) Toronto Dominion, 192 Queen Street, Charlottetown, PEI.
(5) Canadian Imperial Bank of Commerce, Queen Street, Charlottetown, PEI.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required unless disembarking. Crew members should then possess Seaman's Book and/or Passports.
GARBAGE DISPOSAL: Superior Sanitation Service, 68 Allen Street, Charlottetown, PEI. Tel: (902) 892-1333. Service available through Agent.
WASTE OIL DISPOSAL: Creed's Petroleum Equipment Ltd., 23 Norwood Road, Charlottetown, PEI. Tel: (902) 892-6036. Service by tanker trucks available through Agent.
SEAMAN'S CLUBS: None. Church services, football matches and dances can be arranged through Agent.
GENERAL: *Chandler:* Available through Agent.
Tally Clerks: Not compulsory.
Garbage Removal: Available but not compulsory.
Slop Facilities: Not available.
Shore Watchmen: Not compulsory.
Gangway: Not available.
Tariffs: Transport Canada – "Cruise Ships".
Berthage: $0.95 per metre per day.
Passenger Fee: $2.96 passengers on board.
Harbour Dues: $0.0428 per gross registered ton.
Linesmen: Available through Charlottetown Harbour Pilot.
Tides & Currents: Tidal Range 6 ft. – 9 ft. Harbour currents approximately 2 knots.
DELAYS: If berth available, no delays in loading or unloading.
Ice: The Harbour usually freezes over in late December and is clear of ice by late April.

There are a number of days during the Winter when product cannot be loaded because of weather conditions.
AUTHORITY: Transport Canada, Box 1202, Charlottetown, P.E.I., C1A 7M8. *Tel:* (902) 566-7974. *Telex:* 014-44130. *Contact:* Don Harley, Port Manager.

CHATHAM, N.B.: 47.02 N. 65.28 W.
NEWCASTLE, N.B.: 47.00 N. 65.33 W.

DOCUMENTS:

PILOTAGE: Contact Agent for Pilot at least 12 hours in advance. Pilot boat, wooden hull, length 44 ft., grey, Pilot flag about 20 ft. above sea-level. From April 16th to December 9th Pilot taken aboard 2 miles North of Escuminac Breakwater. In event of very bad weather good anchorage Egmont Bay, PEI. Dec. 10th–April 15th Pilot boards at Eddy Point N.S. when inbound from East. In other cases Pilot boards at point of departure in Canada.

From December 10th – April 15th, Pilot boards at Sydney Pilot Station (Lat. 46° 20′ 30″ N., Long. 60° 07′ W.) or as arranged.
MAX. SIZE: Max. draft 7.62 m.
HEALTH: Pratique procedure carried out by Customs Officer.
RADIO: Use Grindstone (VCN) or Charlottetown Radio (VCA), or Escuminac Pilot (VHF Channel 16).
TUGS: Not required.
BERTHING: Approx. 3 hours from Pilot Station to Berth. 11 wharves available.
BRIDGES: Bridge at Chatham 35 m. clearance high tide. Hydro wires at Middle Island 41 m. at 60 degrees Fahrenheit at lowest point, channel wide at this point, able to get 55 m. clearance. Morrisey Bridge, max. span opening is 30 m. Overhead cables at Morrisey Bridge.
STEVEDORES: Notice at least 24 hours before arrival.
MEDICAL: Hotel Dieu Hospital, Chatham and Miramichi Hospital, Newcastle.
TANKERS: Hose connections 15 cm.; no slop discharge facilities.
FRESH WATER: Available only at Government wharves at Chatham and Newcastle.
FUEL: All types by tanker truck.
CONSULS: None.
REPAIRS: Light repairs by Miramichi Foundry and Arvin Speciality Machines.
SURVEYORS: Lloyd's Surveyor at Dalhousie. N.B., others at Halifax.
GANGWAY/DECK WATCHMEN: Not necessary.
CUSTOMS ALLOWANCES: 200 cigarettes/man/5 days. Spirits: 40 oz./man/5 days.
REPATRIATION: Facilities good.
AIRPORT: Chatham. Daily flight to Montreal.
TIME: Atlantic Standard, 4 hours difference GMT. Change from Standard to Daylight Saving first Sunday in April through last Sunday in October. (1 hour forward).
HOLIDAYS: No work Labour Day, Armistice Day, New Brunswick Day. Other holidays may be worked on overtime.
POLICE/AMBULANCE/FIRE:

CHEMAINUS, B.C.: 48.55 N. 123.42 W.
CROFTON: B.C.: 48.51 N. 123.38 W.

DOCUMENTS, PILOTAGE, HEALTH, CONSULS etc.: Refer to "Vancouver, B.C.".
ANCHORAGE: Available in Houston Passage.
RESTRICTIONS: Channel depth 48 ft. MLLW. Restricted by berth size only.
TUGS: Available. Tugs for Crofton are ordered from Chemainus.
BERTHING:
Chemainus:

Wharf	*Berthing Length* (ft.)	*Depth at LW* (ft.)	*Remarks*
MacMillan Bloedel	450	39 (North End) 19 (South End)	Crane available
MacMillan Bloedel	560	53 (North End) 30 (South End)	
Crofton:			
Stuart Channel No. 1	650 (Max. LOA)	35	Check draft with Pilot
No. 2	700 (Max. LOA)	40	
No. 3	700 (Max. LOA)	40	Check draft with Pilot. Vessels berth port side too. Ship's gear used for cargo handling.

No loading gear installed at Crofton berths.

STEVEDORES: 22 gangs available. Refer to "Vancouver, B.C.", for holidays, etc.
MEDICAL: Doctors and hospitals facilities available at Chemainus, 5 miles from Crofton.
DENSITY: Salt water.
FRESH WATER: Available at wharves.
FUEL: Diesel oil available from Imperial Oil Wharf at Chemainus.
REPAIRS: Repairs arranged from Victoria or Vancouver Shipyards. Minor repairs available locally.
CUSTOMS ALLOWANCES: See "Vancouver, B.C.".
AUTHORITY: Transport Canada, Canadian Coast Guard, P.O.Box 706, Chemainus, British Columbia, V0R 1K0 Canada. *Tel:* 246-4655, 246-2682. *Contact:* Ann Cameron Hill, Harbour Master/Wharfinger, 10031 Old Victoria Road, RR1, Chemainus, B.C., V0R 1K0, Canada.

CHURCHILL, Manitoba: 58.47 N. 94.12 W. (See Plan)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists (if applicable).
3 Ship's Stores Lists.
2 Quarantine Certificates.
1 Certificate for Harbour Master to be prepared after approval.
1 Certificate that Gyro Compass in order certified plus copy of manifest giving weight or measurement for each Bill of Lading. Certification by Local Collector of Customs.

Arctic Pollution Prevention Certificates: Ships have arrived in Churchill without such certificates and have thus contravened the Arctic Shipping Pollution Prevention Regulations. This certificate states that a vessel is in class, complies with SOLAS conventions, and has all of the equipment required by the regulations such as two radars, etc.

A certificate may be obtained from a surveyor employed by a major classification society named in the regulations. Ships unexpectedly diverted to Churchill should contact the Port Warden prior to arrival at Churchill.

Ship Masters are cautioned to ensure that they comply with the Arctic Shipping Pollution Prevention Regulations.

PILOTAGE: Pilotage is compulsory for merchant ships entering or shifting in Churchill Harbour. Fees will be advised by the Great Lakes Pilotage Authority.

Vessels must advise their ETA at the port, and should also advise their time of arrival at Fairway Buoy.

Masters can arrange for a Pilot by contacting their Agent at Churchill or calling directly to the pilot boat "H. M. Wilson" on VHF. Pilots board vessels near Fairway Buoy, 4 miles N.E. of harbour. The tug "H. M. Wilson" is used as pilot boat.

ANCHORAGES: Masters of smaller vessels consult Harbour Authorities regarding possible short-term anchorage inside the harbour. The recommended anchorage for larger vessels is 1.0 – 3.0 miles N.W. to N.E. of the Fairway Buoy, in 11 – 14 fathoms, over sand and mud. This anchorage is exposed, and vessels in light condition may drag, particularly in strong N.E. winds. Masters are advised to weigh anchor and stand out to sea when gales are expected, until the weather moderates. Vessels should not anchor off the harbour entrance because the ebb tide is strong and there is a danger of dragging ashore, should an unexpected N.E. gale develop.

RESTRICTIONS: Best time for entering is at slack high or low water, but vessels up to 160 m. in length may enter on the flood tide. Larger vessels enter during or just slightly after slack high water when the river begins to ebb, or alternatively at the last of the ebb just as slack low water is reached.

The ranges of mean tides and large tides at Churchill Harbour are 3.4 m. and 4.8 m. Shallow draft vessels will experience near-surface currents stronger than those shown on the chart. Ebbing surface flows, at the mouth of the river near Merry Rock, can reach speed of 5 knots and can cause a slight set towards the N.W. shore. Ebbing surface flows near the Ports Canada Wharf reach speeds of 4 knots and tend to set in a N.E. direction onto the wharf. During the flood, surface flows reach about 3 knots at the river mouth near Merry Rock, and about 2 knots near the Ports Canada Wharf. This current tends to run parallel to the wharf.

MAX. SIZE: The recommended maximum vessel dimensions are 735 ft. (224 m.) length overall; 105 ft. (32 m.) beam; 55 ft. (17.0 m) moulded depth. Draft would vary in accordance with tide predictions for the date and time of arrival and departure. Vessels whose parameters (approx. 55,000 tonnes d.w.t.) meet or exceed the above parameters will be dealt with on an individual case-by-case basis.
HEALTH: All vessels must fly yellow flag until cleared by authorities after docking.
RADIO: Churchill operates remote from Thunder Bay Coast Guard Radio VBA around the clock during navigation season. Channels to be used: 16 for emergency or to establish initial contact, 12 for Harbour Control and 26 (Duplex) for Coast Guard traffic.
RADAR: Requirements as laid down by Arctic Pollution Prevention Regulations (2).
TUGS: Tugs usually join vessels inside the harbour, and are compulsory for all movements. Two tugs available (1×3,000 b.h.p. and 1×600 b.h.p.). Ship's lines used.
BERTHING: The Main Wharf, 2,772 ft. (845 m.) long, has 2 grain loading berths, one general cargo berth (Dalgleish) and one deep berth (Wolfe), where loaded ships can lay at low water spring tide. There is also a coastal berth 300 ft. (91 m.) long. Depths alongside at Chart Datum (water brackish) vary from 31 ft. – 33 ft. (9.45 m. – 10.0 m.) at the grain loading berths and general cargo berth, 33 ft. – 36 ft. (10.0 m. – 11.0 m.) at the deep berth (Wolfe), and 18 ft. – 20 ft. (5.5 m. – 6.1 m.) at the coastal berth. Vessels are normally partially loaded and then turned on the flood tide so that bow is facing outbound for departure. Topping-up of the vessel's cargo is done on the last rising tide, so that departure is timed for approximately 30 minutes before high tide. Depending on cargo type, loading/discharge is done either by ship's own gear or shore gear. Note: Ports Canada By-Laws A1 are in effect when within Port of Churchill jurisdiction.
CRANES: 1×100 tonnes capacity (shore based crawler type).
BULK CARGO FACILITIES: There are 2 grain loading berths (No. 1 and No. 2), each 694 ft. (211.5 m.) long with depth alongside 31 ft. – 33 ft. (9.45 m. – 10.0 m.) at Chart Datum. Running parallel to the berths is the loading gallery 1,500 ft. (455 m.) long and equipped with 4 conveyor belts feeding 23 spouts for pouring the grain. Loading capacity from the 140,000 tonnes terminal elevator is at 60,000 bushels/hour (1,680 t.p.h.) to the ship's hold. The spouts have a reach of 85 ft. – 90 ft. (25.9 m. – 27.4 m.), and in the case of vessels with large beam, width extensions can be added. Normal loading is one vessel at a time. The Harbour Master's Department issues a maximum safe sailing draft notification to Master, based upon tidal prediction for date and time of sailing. The Port of Churchill accepts no responsibility for delays due to beam width and/or hatch configuration and height.
STEVEDORES: Gangs are available during whole of shipping season, no advance notice required.
MEDICAL: Fully staffed and equipped hospital available, approximately 1 mile from harbour.
TANKERS: Discharge pipes 10 in. diameter flexible hose reduced to 6 in. diameter steel pipe to tank terminal ashore.

Average depth between 31 ft. – 33 ft. (9.45 m. – 10.0 m.) at Chart Datum.

FRESH WATER: Fresh water available at all berths. Water pumped through 2.5 in. pipe connected directly to ship, discharged at rate of approximately 60 t.p.h.
FUEL: Bunker fuel requires 30 days advance notice. Arctic diesel fuel available all times.
CONSULS: None.
REPAIRS: Most repair work. Fully equipped machine shop available.
DRY DOCKS: None.
SURVEYORS: By arrangement with Ship Safety at Thunder Bay.
GANGWAY/DECK WATCHMEN: Ship's crew.
OPENING/CLOSING HATCHES: Carried out by ship's crew.
CUSTOMS ALLOWANCES: See "Montreal".
CARGO GEAR: Ship's gear or shore gear, depending on cargo type.
AIRPORT: Airport situated 5 miles from the harbour and served by Calm Air International Ltd. Canadian partner with flights Northbound twice daily (Monday to Friday), and Southbound twice daily (Monday to Friday). Additional flights arranged during tourist season and on request, based on number of passengers.

Trains: Passenger train (VIA) service is also available Southbound (Tuesday, Thursday and Saturday each week). The train station is situated within 1 mile of the harbour. Regular freight train (CN) intermodal service is available year round to service the port and surrounding community.

TIME: GMT minus 6 hours. Daylight Saving Time (1 hour forward starts first Sunday in April and ends last Sunday in October).
HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Victoria Day (May 24th); Dominion Day (July 1st); Civic Holiday (First Monday in August); Labour Day (First Monday in September); Thanksgiving Day (Second Monday in October); Remembrance Day (November 11th); Christmas Day (December 25th); Boxing Day (December 26th).

Arrangements normally made to have crews available for those days.

POLICE/AMBULANCE/FIRE: Police Tel: (204) 675-8821; Ambulance Tel: (204) 675-8881, Fire Tel: (204) 675-2222.
TELEPHONES: There is a pay telephone located outside Agent's office building.
BANKS: Royal Bank of Canada.
STORING: Vessels may be stored by truck, which may proceed alongside. No forklift trucks available. Riggers may be employed. Customs regulations in force.
SHORE LEAVE: Allowed, no restrictions.
GARBAGE DISPOSAL: Removal of garbage ashore is not presently permitted for vessels arriving from foreign ports. Steel mesh containers are however available at the dockside. Collection service is by Local Government District of Churchill and is available weekdays, excluding public holidays, from 0800 hrs. to 1700 hrs.. Contact Public Works Department via ships agent.
WASTE OIL DISPOSAL: Not available at present.
SEAMAN'S CLUBS: No seamen's clubs, however the local community offers the use of a large recreational complex. Its facilities include a library, swimming pool, bowling alley, arena, gymnasium, hospital and restaurant. Church services are also available locally, as are shops, postal facilities, telephone, sports grounds, and museums.
CURRENCY: Canadian Dollar (C$). U.S.$1.00 = C$1.3908 (13.2.96).
DELAYS: Little delay.
AUTHORITY: Canada Ports Corporation, Port of Churchill, P.O.Box 217, Churchill, Manitoba, Canada R0B 0E0. *Tel:* (204) 675-8823. *FAX:* (204) 675-2550. *Contact:* Pawan K. Chugh, Financial and Administrative Officer. Captain W. Goodman, Harbour Master.

CLARENVILLE, Newfoundland: 48.08 N. 53.56 W.

DOCUMENTS:
Crew List, Form 200 in duplicate.
List of Ship's Stores, Form E1 in duplicate.
Crew Declarations, Form Y.14 in duplicate.
Manifests in triplicate.
Bills of Lading in duplicate.

PILOTAGE: Contact Pilot through St. John's Radio (VON). Pilot usually boards at Clarenville Pilot Station, Lat. 48° 04′ 30″ N., Long. 53° 35′ W., or at the St. John's Pilot Station.
ANCHORAGE: Good anchorages in Random Sound.
MAX. SIZE: Largest ship 644 ft. long, breadth 84 ft., draft 26 ft.
HEALTH: See "Montreal".
RADIO: St. John's Radio (VON).
TUGS: None available.
BERTHING: Newfoundland Hardwoods Wharf: Length 375 ft., depth at LW 28 ft.
STEVEDORES: Available. 48 hours notice required.
MEDICAL: Necessary for Agents to receive advance notice of medical attention required. Hospitals available in the community and St. John's. Vaccination/Fever Certificates necessary for Pratique.
FRESH WATER: Limited supplies available.
FUEL: Light fuels only (no bunkers).
CONSULS: At St. John's.
REPAIRS: Minor repairs possible.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Load Line, Safety Equipment, Derat Certificates.
CUSTOMS ALLOWANCES: Tobacco 200 cigarettes allowed per crew member per week. Wine and/or Spirit, 1 bottle of spirit allowed per crew member on the first voyage in each year. Each subsequent voyage in one year, 1 bottle allowed only to officers.
REPATRIATION: Only available by air.
AIRPORT: Gander International Airport located about 2 hours distance by road/served by regular airlines.
TIME: GMT minus 3.5 hours. Daylight saving time from first week-end in April to last week-end in October, clocks advanced 1 hour.
HOLIDAYS: See "Montreal".
POLICE/AMBULANCE/FIRE: Police 466-3211; Fire 466-7777; Ambulance 466-2010.
TELEPHONES: No facilities for placing on board.
SERVICES: Only limited services available.
GARBAGE DISPOSAL: No facilities available.
WASTE OIL DISPOSAL: No facilities available.
SEAMAN'S CLUBS: None.
CURRENCY: Canadian Dollar.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Canadian Coast Guard, P.O.Box 1300, St. John's, Newfoundland, A1C 6H8, Canada. *Tel:* (709) 772-5154. *Telex:* 016-3369. *FAX:* (709) 7725127. *Contact:* D. A. Lester, Regional Manager.

AGENT: Newfoundland Hardwoods Ltd.

COLLINGWOOD, Ontario: 44.30 N. 80.30 W.

(See Plan)

LOCATION: Collingwood Harbour is situated on Nottawasaga Bay at the extreme Southern end of Georgian Bay, Lake Huron, about 160 km. North of Toronto.
RESTRICTIONS: *Depths:* Approach Channel 7.2 m. Turning Basin 6.1 m. Inner Harbour 6.1 m.
Navigation Season: Mid-March to late December.
BERTHING:

Berth No.	*Name*	*Length* (m.)	*Depth* (m.)
B1	Small Boat Wharf	153.0	3.0 – 5.1
B2	North Terminal Wharf	141.0	6.4
B3	South Terminal Wharf	76.0	6.4
B4	East Harbour Wall	140.0	5.0
B5	Mooring Station	140.0	5.1
B6	Terminal Wharf (Private)	–	–

BULK HANDLING FACILITIES: There is a private grain elevator at the Terminal Wharf.
FUEL: Bunkering by road tanker.
AUTHORITY: Harbours and Ports, Canadian Coast Guard, 201 N. Front Street, Suite 703, Sarnia, Ontario, N7T 8B1 Canada. *Tel:* (519) 383-1942. *FAX:* (519) 383-1996. *Contact:* Regional Manager.
Port Official: Mr. Charles Sandell, Harbour Master/Wharfinger.

COME-BY-CHANCE, Newfoundland: 47.48 N. 54.01 W.

(See Plan)

LOCATION: The North Atlantic Refining Limited plant is located in Placentia Bay. The Terminal position is Lat. 47° 48′ 18″ N., Long.54° 00′ 35″ W.
DOCUMENTS:
3 copies Crew Declaration (Form Y14).
3 copies Ship Stores List (Form E1).
3 copies Immigration Crew List (Form IMM 200), only Canadian form accepted.
2 copies of Bill of Lading or Manifest.

In addition, Customs Clearance from last port, Derat Certificate, extra copy of Crew List, Vaccination List, Ship's Register, Radio Equipment Certificate, Safety Equipment Certificate, Load Line Certificate and Non-Canadian Ship Compliance Certificate. Oil Record log book should be up to date and readily available for inspection by Government Steamship Inspectors.

PILOTAGE: The Placentia Bay compulsory pilotage area is composed of 2 areas, namely:-

Zone "B" (Lat. 47° 20′ N., Long. 54° 06′ 30″ E.). Notice of Arrival should be given in UTC. Pilotage is compulsory for all vessels over 223 m. (731.62 ft.).

Zone "A" which starts off Southern Harbour, approximately 5.65 miles from the terminal. Pilotage is compulsory for all vessels.

Pilots: The pilot boarding station for vessels subject to pilotage Zone "B" is located near Red Island Shoal. The approximate position is:-
Latitude 47° 20.0′ N.
Longitude 54° 06.5′ W.

The pilot boarding station for vessels subject to pilotage Zone "A" is located near Coombes Rock. The approximate position is:-
Latitude 47° 42.3′ N.
Longitude 54° 03.3′ W.

Arrivals: To avoid a delay in ordering a Pilot, Masters of vessels bound for the Come-By-Chance Terminal must forward their request for Pilots to "Pilots St. John's" as follows:-
First notice 24 hours prior to the ETA (GMT) at the appropriate boarding station stating:
(a) Which boarding station the Pilot is required at.
(b) Name.
(c) Call Sign.
(d) Deepest draft.
(e) Speed.
(f) Agent.
(g) Length, breadth, moulded depth, deadweight tonnage and the largest net registered tonnage.

Subsequent notices are to be sent 12 hours, 6 hours and 4 hours prior to the ETA (GMT) at the appropriate boarding station.
Departures/Movages: First notice 9 hours prior to the ETD (Local time). Second notice 3 hours prior to the ETD (Local time).
Embarkation/Disembarkation: Masters of calling vessels are reminded of their obligation to comply with statutory rules and are recommended to comply with the following:
(a) The Officer responsible for embarkation/disembarkation of the Pilot is a watchkeeping officer.
(b) The pilot ladder is secure.
(c) The pilot ladder is adequately illuminated at night.
(d) Means are provided to enable the Pilot to pass safely and conveniently from the head of the pilot ladder into the ship or on to the ship's deck. Portable stanchion, if used, should be independently secured to the rail or deck, one on each side of the ladder.
(e) The ladder is in good condition and its treads remain horizontal. The treads to have a rough surface.
(f) The ladder is rigged so that each step rests firmly against the ship's side.
(g) Spreaders are provided not more than 10 ft. apart, to prevent the ladder from twisting.
(h) Manropes should be available, but should not be lowered unless requested by the Pilot.
(i) A lifebuoy with a self igniting light and a heavy line should be available.
(j) The ladder should be rigged well clear of overboard discharge and deck scuppers.

If the pilot ladder is not safe, the Pilot may refuse to board and thus cause unnecessary delay to the ship.

ANCHORAGE: Will be assigned by the Pilot in conjunction with Transport Canada, Coast Guard.

RESTRICTIONS: Will be dispatched by Transport Canada to ship's Agent.

MAX. SIZE:

Berth No. 1	Max. Size	—	326,000 d.w.t.
	LOA (berth)	—	1,500 ft.
	Max. Draft	—	85 ft.-90 ft.
	Water Depth	—	100 ft.
Berth No. 2	Max. Size	—	67,000 d.w.t.
	LOA (berth)	—	1,000 ft.
	Max. Draft	—	40 ft.-43 ft.
	Water Depth	—	48 ft.

Notes:
1. Attention is drawn to the minimum under-keel clearance of 10 ft. – 15 ft. in Berth No. 1, and 5 ft. in Berth No. 2.
2. An increased loading draft of 3 ft. maximum may be allowed, depending on height of tide where maximum tidal difference is 8 ft.

HEALTH: Vessels arriving from a foreign port may obtain pratique by radio from "Quarantine St. John's" at least 12 hours before arrival. Information required by Quarantine Officer shall include:
Name and nationality of the vessel.
Last port of call.
Nature of cargo.
Number of crew and passengers.
Port of destination.
Name of Agent.
Conditions of health of all on board with details of any sickness or death incurred during the voyage.
Animals if any.

RADIO: Best radio stations to use en route to Come-By-Chance:

St. John's Marine Radio – call sign VON.
Halifax Marine Radio – call sign VCS.
St. Lawrence Marine Radio – call sign VCP.

To avoid a delay in obtaining a Pilot, Masters of ships bound for Come-By-Chance must report by R/T, W/T or Telex, their ETA to Vessel Traffic Management at St. John's at least 24 hours before vessel's ETA at the pilot boarding station. The times should preferably be in GMT, but whatever time is used it should be expressly stated. ETA should be confirmed or corrected 12 hours and 6 hours prior to arrival at the pilot boarding station by R/T, W/T or Telex through VON Marine Radio Station, St. John's or via any Coast Guard Radio Station. Also see "Pilotage".

Pilotage messages may be forwarded through the nearest Canadian Coast Guard Radio Station. Direct requests can be made through St. John's Traffic Centre on VHF Channel 11 and Placentia Traffic on VHF Channels 12 and 14. Placentia Traffic Tel. (709) 227-2181.

The requirements for water, fuel and ballast should be made known to vessel's Agent in the 72 hour ETA.

Pre-Arrival Information Required: Following are general guidelines for the pre-arrival information required at this Terminal. Please contact Agent for specific details.

Prior to arrival, Master shall advise the Terminal either via his Agent or direct on VHF Channels 12, 14 or 16:

(a) ETA: Masters are requested to give their Agent 72, 48, 36 and 24 hours ETA messages via St.John's Radio (VON), or St.Lawrence Radio (VCP), or Halifax Radio (VCS) in GMT. When the vessel is within 24, 12, 6 and 4 hours of Come-By-Chance, the ETA should be confirmed or amended via Placentia Traffic Centre. The 4 hour message confirms the Pilot.

(b) Documents required:
3 copies Crew Declaration (Form Y14).
3 copies Ship's Stores (Form E1).
3 copies Immigration Crew List (Form IMM200).
(To be sent by fax or telex to Agent at least 48 hours prior to arrival).
In addition, the clearance form from the last port of call, and the expiry date of the following documents will be required: Derat Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Construction Certificate and Radio Equipment Certificate. Ensure the Oil Record Book is up-to-date and available for inspection by Government Steamship Inspectors.

(c) Draft, quantity of cargo tank ballast to be discharged to shore tankage, and estimated deballasting time.

(d) Quantity of cargo slops on board and whether to be retained or discharged to shore tankage.

(e) Quantity of cargo to be loaded and bulk loading rate requested.

(f) Number, size and material of vessel's manifold connections.

(g) Confirmation that an inert gas system is fitted, fully operational, and that the oxygen content of all tanks does not exceed 8%.

(h) Repair requirements, as most repair services are only available at St.John's (90 miles from Come-By-Chance).

(i) Laundry requirements are available.

VHF: Both the Pilots and the tugs are equipped with VHF radios covering the following 5 channels:

Channel 16 – 156.8 MHz.
Channel 12 – 156.6 MHz.
Channel 11 – 156.55 MHz.
Channel 9 – 156.45 MHz.
Channel 6 – 156.3 MHz.

Should there be 2 ships moored, each ship will communicate with the Jetty on the *same* channel.

TUGS: Tugs are stationed at Come-By-Chance to assist vessels in berthing and unberthing. 2×2,800 h.p. (40 ton B.P.) and 1×4,000 h.p. (60 ton B.P.).

BERTHING: The jetty extends 914 m. from the shore. Berth No. 1 (outside) can accommodate 325,000 d.w.t. tankers. Length of berth face 463 m. Depth of water alongside 100 ft. Berth No. 2 (inside) can accommodate tankers up to 70,000 d.w.t. Depth of water alongside 48 ft.

Both berths are equipped with hydraulic operated loading arms which are fitted with a speed-seal hydraulically operated manifold coupling.

Berth One

Loading Arm	*Coupling (in.)*	*Product*
1	16	Crude and Ballast
2	16	Crude Ballast
3	16	Crude, Ballast, Residual
4	16	No. 2 Oil, Jet Fuel
5	10	Bunker "C"

Note: Berth No. 1 is connected by 1 × 42 in. crude line to the tank farm which is at 90 ft. elevation and approximately 2,136 m. away.

All crude connections are 16 in., but can be reduced to 12 in.

Berth Two

Loading Arm	*Coupling (in.)*	*Products*
6	10	Clean Products Ballast
7	10	Same as No. 6
8	10	Clean Products Ballast Fuel Residual
9	10	Same as No. 8
10	8	Bunker "C"
11	10	Sulphur
12	6	Propane (Manually Operated)
13	4	Propane Vapour (Manually Operated)

Note: The product tanks are approximately 1,707 m. away at elevations ranging from 80 ft. to 100 ft.

Facilities for discharging ballast are available at both berths. The pumping distance is approximately 1,525 m. away to a tank at 62 ft. elevation.

Cargo Handling Rates:

Berth	*Product*	*Connections*	*Rate*
1	Crude	4×16 in.	25,000 b.p.h./arm
1	Bunker*	1×10 in.	4,000 b.p.h.
2	Bunker*	1× 8 in.	2,000 b.p.h.
2	Jet/Stove† Kerosene†	4×10 in.	12,000 b.p.h.
1	Fuel†	1×16 in.	15,000 b.p.h.
2	Fuel†	2×10 in.	12,000 b.p.h.
1	Gasoline	1×16 in.	14,000 b.p.h.
2	Gasoline	2×10 in.	12,000 b.p.h.
1	HVGO (No. 6 Fuel)	2×16 in.	6,700 b.p.h.
2	HVGO (No. 6 Fuel)	2×10 in.	6,700 b.p.h.
1	Ballast	4×16 in.	12,000 b.p.h.
2	Ballast	4×10 in.	12,000 b.p.h.

* Meters (3) 6 in. 6,000 b.p.h. maximum, i.e. 18,000 b.p.h. maximum, presently out of commission.

† 2 bunkers 8 in. 5,000 b.p.h. maximum each. 2×No. 2 fuel oil 4 in. 2,500 b.p.h. maximum each.

MOORING: After receiving assistance to the berth, it is essential that ships are moored in a sensible and seamanlike manner with the bow facing out to sea. A line boat will be available at all times to assist in bringing lines to the jetty, except in cases of emergency.

(a) It is recommended that vessels should make fast alongside the Come-By-Chance Jetty with an all wires or wires with synthetic rope tails mooring system, which at least meets the Oil Companies International Marine Forum (OCIMF) guidelines on equipment and restraint capability. No mooring lines are provided at either berth.

(b) Vessels unable to comply with the above recommendations may be required to provide additional restraint by doubling or using both ends of certain mooring lines.

The wires and synthetic ropes of all mooring systems shall be of a similar breaking strength, with the exception of synthetic ropes used in the initial stages positioning and berthing which, if appropriate, will not be taken into consideration in the final mooring plan.

It is essential that all mooring lines are taut at all times with each line bearing equal tension. All lines should be in good condition; lines that show obvious wear will not be accepted.

For working the heaving lines, electrically operated capstans with foot operated switches are provided.

On a broad brush basis and under good weather conditions, ships will tie up as follows:

Berth No. 1	Forward:	3 head lines 3 breast lines 3 springs
	Aft:	3 stern lines 3 breast lines 3 springs
Berth No. 2	Forward:	4 head lines 2 breast lines 2 springs
	Aft:	4 stern lines 2 breast lines 2 springs

Note: Breast lines should run ashore from a lead on board directly opposite the quick release hook.

(c) Masters of the vessels must:

(i) Ensure that their vessels are secured in accordance with the preceding paragraphs and to the satisfaction of the Jetty Supervisor.

(ii) Ensure that a strict watch is maintained on their vessel's moorings and that they are tended regularly to prevent undue movement of the vessel.

(iii) Ensure that their vessel's mooring ropes or wires are secured only to the proper fixtures provided for that purpose.

(iv) Provide an efficient and safe gangway which must be adequately lit during hours of darkness.

(v) Provide and rig towing wires of 50 tonne minimum breaking strength (approx.32 mm. in diameter) secured to the offshore bow and quarter with the towing eyes maintained just above water level.

(vi) Ensure that all moorings on self-stowing winches are secured with the winch brake hardened up.

Under adverse weather conditions or at any time when the winches are suspected of, or known to have a low brake efficiency, the winches must be set in the heave position and on the brakes such as to allow the steam (the winches motive power) to retain the moorings at the required tension, should the brakes begin to render.

MEDICAL: Masters are requested to notify their Agents at least 72 hours prior to arrival, advising the number of crew to see the doctor and their complaint. The doctors work out of hospital which is about 48 km. from the berth. Dentist also available.

FRESH WATER: Limited quantities of fresh water available. Rate of 60 U.S. gallons per minute.

FUEL: Ship's bunkers are available. Bunker requirements, including quantities and specifications, should be made known in the 72 hour message.

FIRE PRECAUTIONS: Usual precautions for a refinery.

CONSULS: The following countries have Consular Representatives in St. John's:

Brazil	Germany	Malta	Spain
Denmark	Iceland	Netherlands	Sweden
France	Italy	Portugal	

REPAIRS: The Agent should receive early advice of requirements, as most repairs are only available at St. John's (Radio, radar, gyro, Satnav and Loran, etc.). The technicians for such equipment work out of St. John's. The following brand names have representatives in St. John's: Racal-Decca, Marconi, Kelvin Hughes, Furono, Atlas and Sperry.

SURVEYORS: Stationed in St. John's: Lloyd's, B.V., N.K.K., A.B.S., Germanischer Lloyd, Italian Registry, Russian Registry, China Corp. and Honduran Registry.

GANGWAY/DECK WATCHMEN: Usually ship's crew.

CUSTOMS ALLOWANCES: Each crew member is allowed 200 cigarettes and one 40 oz. bottle of wine or spirits per week.

REPATRIATION: No formal facilities, however crew changes and repatriation can be carried out. Prior notice to Agent is required.

AIRPORT: Nearest airports are St. John's, 152 km. away, and the Gander International Airport, 206 km. away.

POLICE/AMBULANCE/FIRE: The Police are located in Clarenville.

Telephone:	466–3211

Hospital located in Clarenville.

Telephone:	466–3411

The Fire Department located at refinery.

Telephone:	463–8811 (Ext. 14)

TIME: GMT minus 3.5 hours. First Sunday in April clocks advanced 1 hour. Last Sunday in October clocks retarded 1 hour.

TELEPHONES: Available at agent's office.

SERVICES: *Supplies & Laundry:* Stores and provisions have to be obtained in St. John's. In order to avoid delays, Agent should be notified prior to arrival, of the vessel's requirements. Stores and supplies will be delivered by barge, tug, or small boat, or by truck at the dock. Laundry facilities are available in Come-By-Chance.

TERMINAL REGULATIONS: With the object of protecting all concerned against the possibility of fire hazards, oil and smoke pollution, etc., vessels calling at Come-By-Chance must comply with the following Safety Regulations, as well as any prevailing Government Safety Regulations or other Regulations, which may be issued by proper authorities from time to time.

(a) SMOKING and the use of naked lights is strictly prohibited on board vessels alongside the berths, except in those enclosed spaces aboard ship specifically designated by the Master as "SMOKING AREAS."

(b) FIRE WIRES of steel must be hanging over the side of the manifold off side bow and quarter whilst alongside to enable tugs to connect readily in an emergency situation. The towing eye should be lowered to reach the water line at the vessel's minimum draft on the berth.

(c) BOILER TUBES must not be blown whilst vessel is alongside and every precaution must be taken to prevent sparks and soot particles escaping from the funnel.

(d) SCUPPERS must be securely plugged before loading/discharging commences and all possible care taken to avoid spillage on overflow.

(e) SPILLAGE TRAY or other receptacle should be placed under the flange connection at the vessel's manifold.

(f) OIL absorbing material in a suitable quantity should be placed in the proximity of the manifold.

(g) ENGINE REPAIRS must not be made alongside if they will prevent the prompt sailing in an emergency, or upon completion of cargo transfer.

(h) WORK on deck or hull that could cause sparks is not allowed.

(i) INERT GAS GAUGING: At its discretion, Refinery may require that all crude carrying vessels arrive at the terminal with cargo tanks inerted and that tanks will remain inerted throughout discharge. If vessels are instructed to arrive with inerted tanks, Refinery retains the right to request depressurisation of the tanks, under A.P.I guidelines, to allow measurements by designated inspectors, subject to any restraints by regulatory agencies and to Master's satisfaction and consent that same is deemed safe for the vessel, such consent not to be unreasonably withheld. Vessels discharging at the Refinery are considered as having warranted that they are equipped with a properly working inert gas system and that officers and crew are experienced in the operation of same. Any time lost due to improper operation of the vessel's inert gas systems should not count as laytime.

(j) CRUDE OIL WASHING: All vessels discharging crude oil at the Refinery will, at the discretion of the Refinery, be required to perform crude oil washing. Vessels are to provide any advance information or technical data that may be required relative to the conduct of such crude oil washing operations. Vessels are required to consent to crude oil washing of cargo tanks and consent to conduct same simultaneously with discharge of cargo. Any additional time consumed as a result of crude oil washing, up to a maximum of 6 hours or pro-rata on the basis of number of washed to the number of tanks loaded, shall constitute used laytime.

(k) LIGHTS of any description other than those permitted and approved by a recognised Classification Society or Government Department for use in a vapour atmosphere are not allowed.

(l) CARGO: During cargo transfer or ballast operations or when not in a gas free condition, all vessels shall show a red signal during the day and a red light during the night.

(m) TRANSFER OPERATION shall not be started, or if started, shall be discontinued by either the Duty Officer of the vessel or the Terminal Supervisor, when any of the following conditions come to his attention.

1. During severe electrical storm.
2. If a fire occurs on the vessel or terminal.
3. If there is not sufficient competent personnel aboard the vessel or on the terminal to safely handle the cargo operations in progress.
4. Should any condition develop which represents a hazard to the vessel or Terminal installation.

(n) FIREFIGHTING equipment of ships alongside must be kept ready for instant use at all times.

(o) GAS-FREEING is not allowed alongside the berths without permission of the Terminal Supervisor.

(p) MOORING of boats or craft with mechanical propulsion alongside a vessel loading/discharging or in the process of deballasting is not allowed, unless special permission has been given by the Terminal Supervisor.

(q) UNAUTHORISED or apparently intoxicated or disorderly persons shall be prohibited from entering the Terminal.

(r) NOTHING in these Regulations will relieve Masters of their responsibilities in observing the normal safety fire prevention and security regulations. Terminal personnel are authorised to advise and request Masters of calling vessels to take additional measures to ensure a higher degree of safety, if they find such advice and request warranted.

(s) NON-COMPLIANCE with Safety regulations may result in discontinuation of cargo operations, which will only be resumed upon correction of the infringement and strict compliance with the regulations. A vessel will accordingly be held responsible for any cost and delay, which arise from non-compliance with the safety procedures as outlined.

SHORE LEAVE: In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing crew member reported to Agent.

In case of crew members left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances (if any) and also instructions for repatriation. An Immigration Bond may be required.

GARBAGE DISPOSAL: Available through POB Industrial Services Inc. Arrangements must be made through Agent.

WASTE OIL DISPOSAL: Facilities available. Contact Newfoundland Processing Ltd. Tel: (709) 4638811.

Due to ballast tank not being heated, the refinery will test oil to be disposed and determine whether or not to take it.

SEAMAN'S CLUBS: None locally. Facilities available at St. John's (150 km.) and Clarenville (50 km.).

CURRENCY: Canadian Dollar.

WEATHER: *Ship's Officer's Report:* The prevailing winds are from the S.W. in Summer and N.W. in Winter. Fog is experienced regularly in April, May, June and July, the latter two months being the worst. The fog is usually associated with a Southerly wind.

There is no shelter afforded on the North, East and South sides of the quay and only a nominal amount on the West side.

Local Pilots report that the range of tide is between 5.5 ft. and 8.5 ft. which can increase if the wind has been blowing from the South for any length of time.

CHARTS: Canadian Hydrographic Charts, S.E. coast of Newfoundland.

No. 4016	Saint Pierre to St.John's.
No. 4617	Red Island to Pinchgut Point.
No. 4620	Come-By-Chance Harbour.
No. 4622	Cape St. Mary's to Argentia Harbour and Long Island.
No. 4839	Head of Placentia Bay, and Come-By-Chance Harbour.

GENERAL: Masters are strongly advised to contact their Agent 72, 48, 36, 24, 12 and 6 hours with ETAs. In the 72 hour message Masters should advise all port requirements.

AGENCY: Canadian Maritime Agency Ltd., P.O.Box 119, Come-By-Chance, Newfoundland, Canada A0B 1N0. Tel: (709) 463-8753. Telex: 408257955 (U.S.A.). Fax: (709) 463-8737.

AUTHORITY: Transport Canada, Canadian Coast Guard, Newfoundland Region, P.O. Box 1300, St. John's, Newfoundland A1C 6H8. *Tel:* (709) 772-5154. *Telex:* 016-3369. *FAX:* (709) 7725127. *Contact:* D.A. Lester, Regional Manager, Harbours and Ports. Carl Osborne (Tel: 463-8528).

North Atlantic Refining Ltd., P.O.Box 40, Come-By-Chance, Newfoundland A0B 1N0. *Tel:* (709) 463-8811. *FAX:* (709) 463-8076. *Contact:* Chris Hogarth, Supply Manager.

CONTRECOEUR, Quebec: 45.53 N. 73.12 W.

(See Plan)

LOCATION: The Contrecoeur Transfer Dock is located on the South shore of the St. Lawrence River, approximately 25 miles East and downstream from Montreal. (Canadian Chart 1339, Admiralty 422).

DOCUMENTS, HEALTH, RADIO, etc.: Refer to "Montreal" and "Quebec".

PILOTAGE: Compulsory. River Pilot docks and undocks vessels. Boarding at all hours.

ANCHORAGE: Available at Lanoraie 15 miles East of dock and Sorel 20 miles East of dock. Also at Contrecoeur, off the berth.

RESTRICTIONS: Hatch openings must not be less than 25 ft.×35 ft. Vessels will be required to vacate the berth immediately after completion of loading and/or discharging. Masters and/or Agents to advise ETA 36 hours and 24 hours. If any change after 24 hours notice, Terminal will have to assess standby time changes.

MAX. SIZE: 850 ft. length; 105 ft. beam; 35 ft. depth chart datum; fresh water, (subject river levels and recommended keel clearance, average river levels vary from +7 ft. above chart datum (April, May) to +3 ft. (Aug., Sept.) with extremes recorded of +10 ft. and +1.5 ft.).

RADIO: *Arrival Notice:* Cable address: CONORE, Montreal. Master or Agent to advise the Terminal of vessel's ETA 48 hours, 24 hours, 12 hours and 6 hours prior to vessel's arrival.

Also see "Restrictions".

TUGS: Requirement based on size of ship and weather conditions.

BERTHING: Ships will be berthed in regular turn of vessels, providing they present with hatches open, ready for discharging and/or loading, based on the following reporting procedures;

(i) Downbound vessel reported out Cote Ste Catherine Lock before upbound vessel passes Trois Rivieres Pilot Station will have precedence and vice versa.

(ii) Downbound vessel reported clear of Montreal Wharf before upbound vessel passes Ile des Barques reporting station will have precedence and vice versa.

(iii) In cases of two upbound vessels, the first passing Trois Rivieres Pilot Station will be first in turn.

Berthing Facilities: The dock is 1,500 ft. in length and is divided into two berths. Berth No. 1 is 750 ft. in length with dredged depth alongside of 35 ft. fresh water chart datum. It is fitted with two Wellman travelling towers equipped with 7.5 cu.yard grabs with outreach of 57 ft. from fenderline. The tower travel is 476 ft. centre to centre. Concrete pad measuring approx. 600 ft. × 140 ft. is located adjacent to Berth No. 1 and can accommodate approx. 75,000 tons of material stowing less than 20 cu.ft./ton.

Berth No. 2 is 485 ft. in length with dredged depth alongside of 22 ft. chart datum. It is fitted with a stationary boom shuttle for loading bulk materials into vessels. This shuttle is reversible for loading to trucks or rail cars. Bulk commodities can be handled:

(a) Direct from vessel to vessel.
(b) Direct from vessel to truck or rail cars.
(c) Indirect from vessel to pad for stockpiling by truck or reloading to vessel.

Unlimited storage capacity is available for stockpiling bulk and non-bulk materials. Material is reclaimed from dead storage area and returned by trucks to pad for reloading aboard vessels or into rail cars.

The working capacity of discharging or loading free digging bulk materials with a stowage factor of less than 20 cu.ft./ton is as follows:

Transferring direct from vessel to vessel .	1600 L/T per hour
Discharging from vessel to dock	1800 L/T per hour
Loading from dock to vessel	1800 L/T per hour
Transferring from vessel to rail cars . . .	900 L/T per hour
Transferring from vessel to trucks . . .	1200 L/T per hour

The railway siding on the dock property can accommodate 70 railway cars. Dock storage and dead storage areas are available by arrangement. Materials can be held in bond subject to Canadian Government Regulations.

STEVEDORES: Available at following times: Regular working periods are from 0800 hrs. to 1600 hrs., Monday to Friday. Under special arrangement, work performed outside regular hours. Periodically working around the clock.

MEDICAL: Doctor and hospital available.

FRESH WATER: Available.

FUEL: Available.

HOLIDAYS: Legal holidays are as follows: Good Friday, Victoria Day, St. Jean Baptiste Day, Canada Day, Labour Day, Thanksgiving Day, Remembrance Day, December 24th, 25th, 26th and 31st and January 1st.

AGENCY: Contrecoeur Terminal does not handle ship agency. Shipowners or Charterers appoint their own Agents for attending ships' requirements.

AUTHORITY: Contrecoeur Maritime Terminal (A Division of Logistec Stevedoring), 1920 Marie-Victorin, Contrecoeur, Quebec, Canada J0L 1C0. *Tel:* 514-587-2073. *FAX:* 514-587-8570. *Contact:* R. Daigle or B. Chevrier.

CORNER BROOK, Newfoundland: 48.57 N. 57.57 W. (See Plan)

DOCUMENTS:

3 Crew Lists – Form IMM.200.
3 Crew Declaration – Y.14.
3 Bonded Store List – E.1.
2 Maritime Declaration of Health – Form QS 2001. (Not required from USA port).
2 Manifests of Cargo (In Transit) and Manifest of cargo for discharge.

Required by Agent:
Vessel Expiry Dates for Canadian Customs:
Load Line Certificate
Radio Equipment Certificate
Safety Equipment Certificate
Derat Certificate
Safety Construction Certificate
Non-Canadian Compliance Certificate (Tankers only)

APPROACHES: Corner Brook Harbour is approximately 20 miles inland from South Head. South Head commands the Southern entrance to the Bay of Islands. There are no off-lying shoals near the approaches.

PILOTAGE: Pilot launch is called *Glenkim* fitted with radio telephone, receives on 2182, 2558, 2134 and 2582 kHz. Radar and VHF onboard. Pilot Station, Frenchman's Head. Pilotage compulsory, operated by Atlantic Pilotage Authority with head office in Halifax. During the ice season, Pilots will board from tug *Indian Lake* approximately 1 mile from Corner Brook Pulp and Paper Ltd. berths. The tug is also fitted with VHF. Also see "Radio".

ANCHORAGES: Good anchorages in Outer Bay. Most convenient is in Humber Arm off Petitpas Cove in 15 to 20 fathoms. Masters requested to contact local Pilots regarding anchorage as a submarine cable enters waters of Humber Arm at Wild Cove and continues out of the bay to Frenchman's Head.

MAX. SIZE: Max. size tankers handled – LOA 650 ft., max. draft 30 ft. at Corner Brook Pulp and Paper Ltd. No. 4 Berth.

HEALTH: Pratique is granted when all crew have been vaccinated and no suspected sickness on board. Pratique is automatic when from a quarantine port or non-quarantine port, provided Port Health Authorities have been established. Also see "Montreal".

RADIO: For short range: Stephenville Marine Radio operated by DOT. WT 500 and 416 kHz. RT call letters VOJ. Receives 2182, 2598, 2134, 2582 kHz. For long range: Via Halifax Marine Radio.

Advice of Arrival: (Vessels docking at premises of Corner Brook Pulp and Paper Ltd.) ETA messages should be sent (to cable address – "Krugship") in GMT, 72, 48, 24 and 12 hours notice recommended. All messages sent to Agents will be given local Pilots and Customs. Cash requirements and other items requiring immediate attention on arrival should be given in the 48 hours ETA.

It is also recommended that notices advise number of gangs vessel can work, also if there is cargo for discharge, quantity and holds stowed.

Other Port Users: Same as Corner Brook Pulp and Paper Ltd. except when destined for Westerm (1983) Ltd., send to cable address "Westerm".

VHF: Humber Arm Harbour Master on VHF Channels 16, 14, 12, 11, 19A, and 24. Corner Brook Pulp and Paper Ltd. shipping office on Channels 16, 14 and 24.

TUGS: Not available.

BRIDGES: None.

BERTHING: *Corner Brook Pulp and Paper Ltd. Wharves* located near centre of city waterfront. Consist of 4 berths, and are continuous. Run parallel with shore line. Total length 1,650 ft. Max. draft 28 ft. in No. 1 Berth, elsewhere 32 ft. in No. 2 & 3 and 26 ft. in No. 4 at low tide. Fresh water and electric power available.

Vessels loading normally dock port side to No. 2 Berth. Oil and caustic soda tankers discharge port side to No. 4 Berth. General cargo is normally discharged port side to No. 4 Berth.

North Star Cement Wharf: Wharf consists of 3 dolphins. Depth of water 24 ft. at Western end and 17 ft. on inner end. Partly laden tankers of T-2 class discharge at this wharf.

Imperial Oil Ltd.: Discharging pier depth of 30 ft. minimum at low tide. Full laden tankers of the T-2 class can discharge.

Irving Oil Company Ltd.: (Pier destroyed in 1991, awaiting decision on replacement). Discharging pier with depth of water at Eastern end of 30 ft. and at Western end 26 ft. Tankers discharge with the forward draft restricted to 26 ft.

Gulf Oil Ltd.: Discharging pier has a depth at Eastern end of 28 ft. and at Western end 22 ft. T-2 tankers may discharge with restricted drafts accordingly.

Ultramar Canada Inc.: Discharge oil at Gulf Oil Wharf.

Department of Transport Wharves: Length of wharf is 1,200 ft. Steel and concrete structure. Depth of water alongside is 32 ft. to 34 ft. Shed measures 190 ft. by 120 ft. by 20 ft. high, for a capacity of 456,000 cu.ft. Fresh water is available. General cargo is handled.

CRANES: Mobile crane available at Corner Brook Pulp and Paper Ltd. – capacity 11 tons from ship's hold, 18 tons from deck. There is also a 220 ton stationary crane operated by Oceanx.

Other port users: From local rental Agent. Maximum 65 tons.

STEVEDORES: (Vessels at Corner Brook Pulp and Paper Ltd. premises)

Working Hours:

0800 to 1200	– 2 gangs
1200 to 1230	– Lunch break
1230 to 1630	– 2 gangs
1630 to 2030	– 2 gangs
2030 to 2100	– Meal break
2100 to 0100	– 2 gangs

Overtime: Can be worked Mondays to Saturdays (day gangs) 1630 to 2100 hrs. if requested.

MEDICAL: Hospital available. If ships' Crew members require emergency medical attention *on board immediately on arrival*, this should be stated in message to Agents, together with ETA. Otherwise, doctor appointments can be arranged during regular office hours.

TANKERS: It is recommended by local Pilots that oil tankers for North Star Cement Wharf arrive and sail in daylight, otherwise there are no special requirements except usual advance notice should be given to Agents in order to arrange linesmen. See "Berthing".

DENSITY: Average 1015; High water, Easterly wind 1025; High water, Westerly wind 1008; Low water 1005.

FRESH WATER: Fresh water available at Corner Brook Pulp and Paper Ltd. berths – $1.00 per ton plus $40.00 service charge and Westerm (1983) Ltd. – $1.00 per ton plus $30.00 service charge. Fresh water also available at other docks.

FUEL: (Vessels at Corner Brook Pulp and Paper Ltd. premises). Gas oil and marine diesel available by truck delivery from local oil companies.

Other port users: Available at DOT docks by tanker trucks.

CONSULS: Nearest consuls are in St. John's approximately 450 miles. Brazil, Denmark, Dominican Republic, France, Germany, Iceland, Netherlands, Norway, Portugal, Spain, Sweden.

REPAIRS: Minor ship repairs carried out. No dry docks available. Radar and VHF repairs possible.

OPENING/CLOSING HATCHES: (Vessels at Corner Brook Pulp and Paper Ltd. premises). Opening and closing hatches is normally done by ship's crew. Rigging ship's gear is normally done by stevedores.

CUSTOMS ALLOWANCES: On arrival per crew member: 3 lb. tobacco or 300 cigarettes or 75 cigars. Two dozen beers or 60 oz. spirits.

Additional issue will be made *after 7 days* in port. 2 lb. tobacco or 200 cigarettes or 50 cigars. 1.5 dozen beers or 40 oz. spirits.

REPATRIATION: All necessary crew changes and repatriation facilities available.

AIRPORTS: International Airport, 222 miles from Corner Brook, at Gander. Stephenville Airport, CP, 50 miles from Corner Brook. Deer Lake Airport, CP and Air Canada service available, 30 miles from Corner Brook.

TIME: NST-GMT less 3.5 hours. Newfoundland Daylight Saving Time – GMT less 2.5 hours, first Sunday in April to last Sunday in October.

HOLIDAYS: Following applies to ships docking at premises of Corner Brook Pulp and Paper Ltd. Newsprint Manufacturers and Shippers.

January 1st – New Year's Day

September – Labour Day (first Monday in September)

December 25th – Christmas Day. No work is performed after 1600 hrs. on Christmas Eve (December 24th), nor on New Year's Eve (December 31st).

Sunday – As per Union agreement. Work can be performed at time and a half rates as follows: *June, July and August* – a maximum of 3 consecutive Sundays. Remainder of the year – no restriction.

Other port users: Similar to Corner Brook Pulp and Paper Ltd.

POLICE/AMBULANCE/FIRE: *Police:* Alongside Corner Brook Pulp and Paper Ltd., Ext. 274, Mill Guards. Local Police. Area Code: (709) 637-4400.

Ambulance: Alongside Corner Brook Pulp and Paper Ltd., Ext. 274, Ambulance. City Area Code: (709) 634-5611.

Fire: Alongside Corner Brook Pulp and Paper Ltd. Ext. 274, Mill Brigade. City Area Code: (709) 634-4333.

Hospital: 634-5000.

TELEPHONES: (Vessels at Corner Brook Pulp and Paper Ltd. premises). None available on board ships, but phones are on the wharf in nearby offices.

Other port users: Can be available at installation and service costs.

SERVICES: Compass adjuster can be engaged.

SHORE LEAVE: Discretion of Master. No port regulations.

IDENTITY CARDS: Every Crew member should be in possession of some form of identity card.

GENERAL: Ice coverage can be expected between January 1st and April 15th. Shipmasters should contact "Ecareg Ice Halifax", Nova Scotia, Tel: (Area code 902) 526-5664 or 426-5665. Telex No. 019-22625 for routing and Icebreaker assistance. 36 hours ETA in Cabot Strait is required.

AUTHORITY: Transport Canada, 9 Forrestside Street, Corner Brook, Newfoundland, Canada A2H 4R3. *Contacts:* Mr. Ellison Butt, Harbour Master. Tel: (709) 6374282. *FAX:* (709) 6391076, or Terminal Manager, Westerm (1983) Ltd., Tel: (709) 6398961. Telex: 016-44193 (Westerm Cnbk). Cables: Westerm.

Mr.B.Hicks, Customs and Immigration, Tel: (709) 6374494.

Mr.B.Mitchell, Shipping Superintendent, Corner Brook Pulp and Paper Ltd. Tel. (709) 6342810 or 637-3291. Telex: 016-44278 (Krugship Cnbk.). Cables: Krugship.

CORNWALL, Ontario: 45.01 N. 74.43 W. (See Plan)

LOCATION: Cornwall Harbour is located on the North shore of the St. Lawrence River, 120 km. West of Montreal.

RESTRICTIONS: *Navigation Season:* Mid-April to Mid-December.

Depths: Approach Channel 8.2 m.

TUGS: Available.

BERTHING: Government Wharf: Length 175 m. Depth 8.2 m.

FUEL: Available by road tanker.

REPAIRS: Minor repairs possible.

SERVICES: Private tank farm. Storage and warehouse facilities. Divers available.

AUTHORITY: Harbours and Ports, Canadian Coast Guard, 201 N. Front Street, Suite 703, Sarnia, Ontario, N7T 8B1, Canada. *Tel:* (519) 383-1942. *FAX:* (519) 383-1996. *Contact:* Regional Manager.

Port Official: Nick Kaneb, Wharfinger.

COWICHAN BAY, B.C.: 48.45 N. 123.36 W. (See Plan)

LOCATION: Lat. 48° 44′ 50″ N., Long. 123° 36′ W. Cowichan Bay is entered from Satellite Channel Southward of Separation Point and extends 4.8 km. Westwards, terminating in a large mud flat that is the estuary of the Cowichan and Koksilah Rivers.

APPROACHES: The bay is deep and without danger. The deep sea berths at the S.W. corner of the bay on the edge of the mud flat have deep, open water approaches.

PILOTAGE: Compulsory, Pacific Pilotage Authority rates.

ANCHORAGE: Cowichan Bay Anchorage – 8 permanent anchorages in depths of approx. 40 m. – 50 m. on a line starting 700 m. S.S.W. of Skinner Point and ranging with 3 designated anchorage along the Northern side of Cowichan Bay to Separation Point and then on the Southern side of Satellite Channel with 5 designated anchorages from Separation Point to 1,000 m. North of Hatch Point. Anchorage can also be afforded to small vessels at Genoa Bay, in depths of 4.6 m. – 11 m. which has a rock marked by a beacon in the middle of its entrance, and two other rock hazards nearby.

MAX. SIZE: *Largest Vessel:* LOA 200.51 m., beam 30.89 m.

TUGS: Tug services at Cowichan Bay are provided by Falt Towing Ltd., 1805 Pritchard Road, Cowichan Bay, B.C. V0R 1N0. Tel: 748-8175. Falt Towing has one 500 h.p. and two 300 h.p. tugs operating from Cowichan Bay and can supply additional tugs as required with a minimum of 48 hours' notice.

BERTHING: *Deep Sea Vessels:* The CNR Wharf is owned by Canadian National Railways and is operated by Westcan Terminals Ltd., P.O. Box 1442, 189 Dallas Road, Victoria, B.C. V8W 2X2. Tel: 386-1321. Telex: 049-7312. The deep sea wharf consists of two berths used mainly for loading forest products.

Berth No. 1 (South end) has a length of 155 m. and a depth alongside of 9.3 m.

Berth No. 2 (North end) has a length of 198 m. and a depth alongside of 8.3 m.

At a distance of 3 m. from the wharf face the minimum depth alongside for No. 1 is 9.9 m. and No. 2 is 9.7 m.

Log bundles can be made available to adjust the vessel's position alongside for draft considerations.

The South end of Berth No. 1 has a rail barge slip which connects to the rail car handling and loading facility at the terminal and the rail lines on Vancouver Island.

Note: Berth depths alongside CNR Wharf taken from depth survey by Canadian Hydrographic Service April and May 1980.

Small Vessels: There is a Government Wharf situated on the South shore for small vessels only, with depths of 5.2 m. – 6.1 m. alongside. A pile and timber breakwater protects several floats attached to the Eastern and Western sides of the wharf approach structure. The area inside the breakwater and East of the wharf has been dredged to a depth of 3.0 m. A number of privately owned wharves and floats are located Westward of the Government Wharf, along the Southern shore of the bay.

STEVEDORES: Westcan Terminals/Stevedores Ltd. offers 24 hour 7 day cargo handling services. Shifts: first 0100–0430, 0500–0800; second 0800–1200, 1300–1700; third 1700–2100, 2130–0100. Work ceases 1200 hrs. on Christmas Eve and New Year's Day.

MEDICAL: Full medical facilities available at the Cowichan District Hospital in the town of Duncan, 10 km. away. Dental facilities also available in Duncan.

FRESH WATER: Available at berth by local water tanker truck and at berth or at anchor by water barge from Vancouver.

FUEL: Diesel fuel, gasoline and other petroleum products are available in moderate quantities by tanker truck at berth. Heavy fuel and large amounts of bunkers available by bunker barge from Vancouver.

REPAIRS: See "Victoria", B.C. for information on the graving dock and ship repair facilities in Esquimalt, a suburb of Victoria 60 km. S.S.W. of Cowichan Bay.

SERVICES: The following general services are available in the Cowichan Bay/Duncan area or from Victoria, B.C.

Decca: Racal Decca Canada Inc., 353 Harbour Road, Victoria, B.C. V9A 3S2. Tel: 388-6257.

Fumigation: PCO Pied Piper, 3374 Burns Avenue, Victoria, B.C. V8Z 3P2. Tel: 388-9721.

International Garbage: C.W. Disposals Ltd., P.O.Box 279, Duncan, B.C. V9L 3X3. Tel: 746-4589.

Laundry: Chemainus Laundromat & Dry Cleaners, 9870 Croft Street, Chemainus, B.C. V0R 1K0. Tel: 246-9912.

Marconi: Canadian Marconi Co., 1 Burnside Road W., Victoria, B.C. V9A 1B2. Tel: 386-9414.

Contact: Harbour Master – Victoria, Esquimalt, Crofton and Cowichan Bay, Tel: 388-3578. Mr. W. H. Briscoe, Government Wharfinger, Tel: 746-5215.

DALHOUSIE, N.B.: 48.04 N. 66.22 W. (See Plan)

DOCUMENTS:

- Ship's Register.
- Load Line.
- Safety Radio and Safety Equipment Certificates.
- Stores List and Crew Declaration (E–17, Y–14), if from foreign port.
- Pratique, if from a Foreign Port.
- Immigration Clearance from last Canadian Port.
- If from a Foreign Port, 2 copies of crew list.

For Shipping Master: Ship's Articles if British or Canadian Registry.

PILOTAGE: Telegram sent to Restigouche Pilots, Dalhousie, N.B., or to vessel's Agent. 6 hours minimum notice required except during Winter operations (January – April). Pilot vessel is a 40 ft. steel hull, black, grey superstructure, displays proper flag by day and proper lights by night. Pilots meet and board all inbound vessels in position Lat. 48° 03′ N., Long. 66° 15′ W. Pilots prefer pilot ladder for boarding.

ANCHORAGES: Safe anchorage 1.5 miles offshore due East of harbour entrance. Pilots will board vessels for anchorage in from 6 to 12 fathoms.

RESTRICTIONS: Tide restrictions if vessel exceeds 28 ft. on arrival.

MAX. SIZE: Max. length 750 ft., beam 100 ft., draft 34 ft. at the Government Wharf, including oil and bulk carriers. Vessels approaching these dimensions must berth at high water, port side to. Max. draft entering harbour and berthed starboard side to is 28 ft. because of restricted turning basin.

HEALTH: See "Montreal".
RADIO: Fox River.
TUGS: Available.
BERTHING: To berth starboard side to at any berth vessel is requested to arrive 3 hours before high water.
STEVEDORES: Contact Agents.
MEDICAL: Hospital and doctors available.
TANKERS: One 12 in. line with two 8 in. connections laid to the Government Wharf. Depth alongside 34 ft. LWOST.
DENSITY: Average density 1008.
FRESH WATER: Available at all berths at 50 t.p.h.
FUEL: Available by truck if necessary. Advance notice required.
CONSULS: None.
GANGWAY/DECK WATCHMEN: Available if requested.
OPENING/CLOSING HATCHES: As in Charter Party.
REPATRIATION: Facilities exist providing sufficient notice given.
AIRPORT: 1 flight daily to and from Montreal.
TIME: Daylight Saving during Summer months. Atlantic Standard otherwise.
HOLIDAYS: Official Holidays: New Year's Day; Christmas Day; Dominion Day; Labour Day.
POLICE: Telephone 684–5551.
TELEPHONES: Made available upon prior arrangement.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
AUTHORITY: Transport Canada, Harbours and Ports, P.O.Box 1270, Charlottetown, P.E.I. CIA 7M8. *Tel:* (902) 566–7973. *FAX:* (902) 566–7948. *Contact:* Mr M.G. Cormier, Area Manager.

Local Authority: Don Mealey, Harbour Master. Albertina Sullivan, Wharfinger.

DIGBY, N.S.: 44.38 N. 65.45 W. (See Plan)

DOCUMENTS: See "Montreal".
PILOTAGE: Usually contacted through St. John radio station by VHF. 12 hours notice required. Pilot usually meets ships at entrance to Digby. As long as adequate notice is given no waiting is experienced.
ANCHORAGE: Good Anchorage N.E. from town 15 to 25 fathoms.
MAX. SIZE: Length 400 ft. and 28 ft. depth at low water.
HEALTH: See "Montreal".
RADIO/VHF: St. John Radio, call sign VAR.
TUGS: Not normally necessary, light towing available if needed.
BERTHING: Transport Canada Spur Pier 115.0 m. long 'F' shaped pier, 12 m. wide, with 100.0 m. commercial berth with 6.7 m. depth alongside at normal low tide (rise in the tide 6.4 m. – 8.5 m.). Berthing at outer boat basin can provide 100 m. with 4.6 m. depth alongside.
FRESH WATER: Supplied by pipeline under the wharf.
FUEL: Diesel oil available only.
CONSULS: None.
REPAIRS: No major repair facilities available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually carried out by crew.
CUSTOMS ALLOWANCES: 200 cigarettes per man, per week; 40 oz. alcohol per man per week for crew.
REPATRIATION: Can be arranged.
AIRPORT: Small local line based at St. John N.B. supplies service between St. John and Digby. Halifax International Airport 180 miles.
HOLIDAYS: New Year's Day (Jan. 1st); Good Friday; Easter Monday; Victoria Day and Queen Elizabeth Day (May 19th) Canada Day (July 1st); Labour Day (Sept. 1st); Thanksgiving Day (Oct. 13th); Remembrance Day (Nov. 11th); Christmas Day (Dec. 25th).
POLICE/FIRE/AMBULANCE: Police 245–2579; Fire 245–2121; Ambulance 245–2205.
TELEPHONES: Available at cost of installation.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required or passport.
AUTHORITY: Transport Canada, Office of Harbours and Ports – Maritimes Region, P.O.Box 1013, Dartmouth, N.S. B2Y 4K2. *Contact:* The Regional Manager, Tel: (902) 426-2588.

FRASER PORT, B.C.: 49.12 N. 122.55 W. (See Plan)

DOCUMENTS, ANCHORAGE, and further information: Refer to "Vancouver, B.C.".
PILOTAGE: Compulsory from Sandheads. Contact Pilots through Vancouver Pilot Dispatch Office (604) 666-6776. 12 hours notice is required. Pilot boards 1 mile off Sandheads. Contact pilot launch on VHF Channel 74.
MAX. SIZE: Draft limited to 35 ft. on 13 ft. tide. Max. recommended length is 750 ft., max. recommended breadth 106 ft. (largest transit to date: Length 1,050 ft., beam 150 ft., draft 28 ft.).
HEALTH: Pratique and quarantine at Victoria B.C.
TUGS: Available, normally join vessel on arrival.
BERTHING: *Fraser Surrey Docks:* 5 general cargo berths. Berths No. 7 and 8: Combined lengths 1,500 ft., depth alongside at L.W. 35 ft. Berths No. 2, 3 and 4: Combined lengths 1,850 ft., depth alongside at L.W. 33 ft. Berth No. 9 under construction. Water, power and telephone connections at all berths. Cargoes handled include forest products, steel, Ro-Ro traffic, speciality grain, dry petrochemicals, project cargoes and general cargo containers. Terminal well equipped with forklifts, front-end loaders, cranes to 250 tonnes and 2×40 tonne Paceco portainers on Berths No. 7 and 8.

Other facilities include a scow ramp, a complete loop track to handle unit train operations, a warehouse for steel products and a shed for protecting kiln dried lumber. A new 130,000 sq.ft. pulp and paper shed gives the Terminal a total of 300,000 sq.ft. of covered space (built to ISO 900 Standards). Operators are Fraser Surrey Docks Ltd. Tel: (604) 581-2233.

Fraser Wharves: 1 berth, length 500 ft., width 45 ft., depth 35 ft. Berth for loading and unloading automobiles. The terminal offers complete auto refinishing and accessorising shops, computerised inventory control and motor fuel dispensers. Situated at the South end of No. 6 Road, Richmond (604) 277-1141.

Annacis Auto Terminals: 2 berths. No. 1 length 700 ft., width full face, depth 34 ft. No. 2 length 650 ft., width 60 ft., depth 34 ft. The Roll-on/Roll-off terminal specialises in cargoes shipped in car carriers and has 8 on-dock rail loading tracks. Situated at the East end of Annacis Island (604) 521-6681.
MEDICAL: All services available.
DENSITY: Varies with location and season.
FRESH WATER: Available.
FUEL: All grades available by truck or barge.
CONSULS: At Vancouver.
REPAIRS: Engine repairs only.
AIRPORT: Nearest is Vancouver International.
POLICE/AMBULANCE/FIRE: Dial 911.
SHORE LEAVE: Allowed.
GARBAGE DISPOSAL: Available through private companies. Ship's Agent to contact directly.
WASTE OIL DISPOSAL: Service provided by duly licensed private contractor. Ship's Agent to contact directly.
SEAMAN'S CLUBS: Missions to Seamen, 50 North Dunlevy Avenue, Vancouver. Tel: (604) 253-4421. Facilities: Shop, refreshments, souvenirs, mini-bus service.
CURRENCY: Canadian Dollar.
DEVELOPMENTS: Future developments call for channel improvement, expanded berthing facilities and intermodal facility. Also see "Berthing".
AUTHORITY: Fraser River Harbour Commission, Suite 505, 713 Columbia Street, New Westminster, B.C., Canada V3M 1B2. *Tel:* (604) 524-6655. *FAX:* (604) 524-1127. *Contact:* Captain Allen Domaas, Director of Operations and Harbour Master.

GASPE, Quebec: 48.50 N. 64.29 W. (See Plan)

DOCUMENTS:
Immigration Documents:
Passenger Landing Cards (Tourist) 1 each passenger.
1 Crew List from Immigration.
2 Passenger Lists.
Customs Documents:
3 Inward Reports.
3 Outward Reports.
3 Ship Stores Lists (Form E.1).
3 Crew Declarations (Form Y.14).
National Health and Welfare:
2 QS.1 Maritime Declarations of Health.
Manifests required for cargo unloaded only.
PILOTAGE: Not compulsory but recommended. Pilots available. To obtain Pilot, arrange by radio phone through marine radio station VCG at Fox River, Gaspe PQ, on receipt of message either to Agent or Port Authority, Pilot and other arrangements can be made.
MAX. SIZE: Vessels of 650 ft. and over have both docked and anchored. Tide has no effect as it is very sheltered. Government Wharf depth 35 ft. LW.
HEALTH: On arrival in Canadian waters Master applies for Radio Pratique by radio to Quarantine Officer at Quebec City. Master flies yellow flag on arrival and until Medical Officer decides it can be lowered or otherwise according to regulations. See also "Montreal".
RADIO: VCG Marine Station Fox River, Gaspe PQ.
TUGS: Not necessary, no tugs available unless called for in emergency. Line boats available for docking, by arrangement.
BERTHING: *Transport Canada (Sandy Beach) Wharf:* Wharf re-built in 1986. Berthing length 600 ft., depth alongside at LW 33 ft. to 35 ft. outer face and about 26 ft. inner side; railroad tracks on wharf, oil tanks, electric light and water.
STEVEDORES: Good stevedoring available at all times and hours.
MEDICAL: Hospital and ambulance service.
TANKERS: Oil lines on Transport Canada Wharf owned and used by Gulf Oil Canada, Irving Oil, Shell Canada Limited and Imperial Oil. These lines are privately owned.
DENSITY: 1025.
FRESH WATER: Available, arranged through ship's Agent.
FUEL: Light and medium diesel available at all times. If bunker fuel required, on request it will be brought in by tanker car.
CONSULS: None.
REPAIRS: Only minor repairs.
OPENING/CLOSING HATCHES: Done by ship's crew.
CUSTOMS ALLOWANCES: On arrival officers and crew permitted 1 bottle and 200 cigarettes and 1 lb. of tobacco for period of 1 week, further allowances of tobacco given after 1 week, as well as spirits to Master only.

REPATRIATION: May be arranged by Agent subject to Immigration control.
AIRPORT: Situated about 7 miles from the dock. Twice daily service to Quebec and Montreal. Connections to all parts from Montreal. Charter passengers and freight flights also available.
HOLIDAYS: Saturday, New Year (January 1st); Good Friday; Victoria Day (May 19th); Confederation Day (July 1st); Labour Day (September 1st); Thanksgiving Day (about October 13th); Remembrance Day (November 11th); Christmas Day (December 25th). There are a few other R.C. Church days on which some men are not obtainable. On most of these holidays stevedores and men are available.
POLICE/AMBULANCE/FIRE: Police area 418 call 368–3232. Local RCMP area 418 call 368–2543. Ambulance Area 418 call 368–2835.
TELEPHONES: Possible arrangements may be made with local telephone company for installations to vessel.
SERVICES: Radar repairman available.
Ship Supply Service and Shipping Agent: Calypso Agencies Inc., P.O.Box 890, Gaspe, Province Quebec, G0C 1R0. Tel: (418) 368-3648. Telex: 0142236. Cables: Calypso. Fax: (418) 368-7134.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Daily pick-up if necessary. No drums on wharf and no drums provided. Charge: C$75.00 per load. Tel: (418) 368-1631 for service.
WASTE OIL DISPOSAL: Only tanker trucks available for waste oil disposal.

The following company is located 1,000 ft. from the wharves – Plante Vacum, 2 Chantier Maritime, Gaspe. Tel: (418) 368-4411. Fax: (418) 368-6379.
SEAMAN'S CLUBS: No seaman's club in the port.

Many churches, shops, dances, sports, etc.
CURRENCY: Canadian Dollar.

Canadian and U.S. dollars accepted in local shops. Other currencies can be changed at four major banks in Gaspe.
AUTHORITY: Transport Canada, C.P. 1101, Gaspe, Province Quebec, Canada G0C 1R0. *Tel:* (418) 368-6679. *Contact:* L. Innett, Harbour Master (after hours (418) 368-5351).

GEORGETOWN, P.E.I.: 46.11 N. 62.32 W. (See Plan)

SHIPMASTER'S REPORT: January 1995.

LOCATION: Georgetown is in Cardigan Bay on the East coast of Prince Edward Island.
PILOTAGE: Available, but not compulsory.
RESTRICTIONS: *Approach Channel:* Depth 10.97 m.
BERTHING:

Section	*Length* (m.)	*Depth* (m.)
1	153	8.0
2	42	8.0
3	164	8.0
4	70	3.0 – 6.0

STEVEDORES: Available, but poorly equipped for loading logs. Vessel to provide crane operators.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Minor repairs possible.
GENERAL: There is no mooring boat or tug available at the port. Tugs may be arranged at very high cost.

Vessel with LOA 183 m. had her stern sticking out beyond wharf by over 30 m.

Strong wind of over 40 knots from S.E. pushed the ship away from the wharf by over 8.0 m., as no proper lead for stern lines. Tugs could be provided to keep the vessel alongside.

Shallow patches lie at N.E. end and 60 m. away from the wharf.

While sailing in a partly loaded condition with a 12 knots wind from S.E., vessel drifted over the shallow patch under No. 4 and No. 5 holds. With the use of both the anchors and main engine, vessel was able to refloat from mud and gravel bottom during flood of tide.

GODERICH, Ontario: 43.45 N. 81.44 W. (See Plan)

LOCATION: Goderich Harbour is situated at the mouth of the Maitland River on the East shore of Lake Huron, about 90 km. N.E. of Sarnia.
RESTRICTIONS: *Navigation Season:* Mid-April to late-December.
Depths: Harbour Basin: 7.0 m. Inner Entrance Channel: 8.2 m. Outer Entrance Channel: 8.2 m.
TUGS: Available.
BERTHING:

Berth No.	*Berth*	*Length* (m.)	*Depth* (m.)
1	Commercial Dock	152.0	8.2
2	Inner Harbour Wall	92.3	7.0
3	North Harbour Wall	440.0	7.0
4	North Pier	454.5	8.2
5	New Wharf	200.0	8.2
6	Wharf (Private)	–	–

FUEL: Available by truck.
REPAIRS: Minor repairs possible.
SERVICES: Storage and warehousing outside the port, rail line, private grain elevators, Coast Guard Search and Rescue Station.
AUTHORITY: Harbours and Ports, Canadian Coast Guard, 201 N. Front Street, Suite 703, Sarnia, Ontario, N7T 8B1, Canada. *Tel:* (519) 383-1942. *FAX:* (519) 383-1996. *Contact:* Regional Manager.

Port Official: Donald MacAdam, Harbour Master/Wharfinger.

GOOSE BAY, Labrador: 53.22 N. 60.22 W. (See Plan)

DOCUMENTS, HEALTH: See "Montreal".
PILOTAGE: Pilotage is not compulsory. Pilots are available through Pilots St.John's with 24 hours notice of arrival and 6 hours confirmation. The pilot boarding station is at Lat. 54° 13′ 30″ N., Long. 58° 21′ 06″ W.
ANCHORAGE: Good anchorage, with excellent holding ground in 36 ft. (11 m.), mud, can be obtained in the central part of Terrington Basin. Ships carrying dangerous cargoes must use the designated Explosives Anchorage situated 2 miles N.E. of Groves Point.
RESTRICTIONS: Navigation season early June to end November depending on pack ice movements. Approach – Sandy Point Channel at entrance to Goose Bay and 15 miles from the dock has a width of 300 ft. Harbour Master advises draft of 31 ft. HWF. Groves Point Channel at entrance to Terrington Basin and 1.5 miles from Main Dock has depth of 32 ft. HWF and width of 300 ft.
Caution: When a tanker is seen to be leaving her berth in Terrington Basin or is in or approaching Terrington Narrows, she shall be granted the right of way, and other vessels must not be navigated into the narrows until the tanker is well clear of the channel.
Ice: The entry into Goose Bay Harbour is entirely dependent upon ice conditions at the seaward end of Hamilton Inlet. Ice begins to form in Terrington Basin between the latter part of October and mid November, with complete coverage occurring any time between early November and the beginning of December. During Winter the ice attains a thickness of about 42 in. (1.1 m.). Break-up generally occurs between the third week of April and the first week of June.
MAX. SIZE: See "Berthing".
VHF: Pilot vessel on Channels 51 and 16.
TUGS: There are no tugs. 3 landing craft available to assist.
BERTHING: The main Government Wharf is situated 1.5 miles W.S.W. of Terrington Narrows; it has a berthing length of 244 m. and was dredged to 7.5 m. – 9.0 m., but some silting has occurred and up-to-date depths should be obtained from the Harbour Master. There is one large shed leased to Marine Atlantic. The office of the Harbour Master is in a building on the main road leading from the wharf.

Another Government Wharf is situated 0.4 miles N.W. of the main Government Wharf; it has a depth of 21 ft. (6.4 m.) at the outer end.
STEVEDORES: A local stevedoring company can provide labour for handling cargo. There are no fixed cranes on the wharves, but mobile cranes can be hired locally.
MEDICAL: Hospital, 2.5 km.
TANKERS: There is a small oil wharf used for discharging petroleum products at the E.S.E. end of the main Government Wharf. It has a depth of 18 ft. (5.5 m.) at its outer end.
DENSITY: 1000.
FRESH WATER: Available alongside berths.
FUEL: Light diesel oil available by pipeline at the main Government Wharf.
REPAIRS: Only minor repairs may be effected in emergency.
AIRPORT: 1.5 miles distant.
HOLIDAYS: New Year's Day; Good Friday; July 1st; Labour Day; November 11th; Christmas Day; Boxing Day.
GARBAGE DISPOSAL: No facilities are provided by the Port Authority, however local trucking firms may be able to assist.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: No club available. Royal Canadian Legion and other local facilities in the nearby town of Happy Valley.
CURRENCY: Canadian Dollar(C$).
GENERAL:
Communications: Telephone. Canadian Coastguard Radio Station (See "Radio Aids to Marine Navigation").
Transportation: Airfield with frequent scheduled service to other Newfoundland centres and the mainland. Scheduled cargo and cargo/passenger services during the navigation season by Marine Atlantic.
Mail: Post Office.
Accommodation: Several motels.
Banks: Royal Bank and Bank of Nova Scotia.
Police: RCMP detachment.
Supplies: Hudson's Bay Company store and several smaller stores.
Customs: Port of Entry; the Customs Office is situated at Goose Airfield.
AUTHORITY: Harbours and Ports Directorate, P.O.Box 1300, St. John's, Newfoundland A1C 6H8, Canada. *Telex:* 016-3369. *FAX:* (709) 772-5217. *Contact:* D.A. Lester, Regional Manager.

Transport Canada, Goose Bay. *Contact:* George Shiwak, Harbour Master. *Tel:* (709) 896-2569.

GRAND BANK, Newfoundland: 47.06 N. 55.45 W. (See Plan)

PORT LIMITS: A line drawn from Grand Bank Head to L'Anse au Loup Pt. defines the port limits.
PILOTAGE: Pilotage is not compulsory, but recommended for those without local knowledge. A licensed Pilot can be arranged by giving 24 hours notice of requirement to Pilots, St. John's. The Pilot will board off St. John's in position Lat. 47° 33′ 42″ N., Long. 52° 37′ 54″ W. or off Grand Bank Harbour provided the vessel's local Agent arranges for a boat to embark the Pilot. Alternatively, Shipmaster's may arrange to use local persons in the town for pilotage purposes.
ANCHORAGES: Vessels may anchor in depths of 10 fathoms (18.3 m.) off Grand Bank, but the holding ground has been reported as poor.
RADIO: C.G.R.D.O. station St. Lawrence, call sign VCP is the best station for vessels to route ETA cables to Agents, receivers, etc. Telex communication available
VHF: Harbour Authority on VHF. Call sign CHC 442.
BERTHING: The Western Breakwater (deck elevation 4.4 m.), about 600 ft. (183 m.) in length, affords protection to the harbour entrance between the Western Pier and the Eastern Breakwater. In 1977, there was a least depth of 14 ft. (4.3 m.) alongside the Western Pier. Marine coastal vessels berth at this pier which is 240 ft. (73 m.) long. The deck of the wharf has an elevation of about 1.2 m. (4 ft.). A shed, 60 ft. by 41 ft. (18 m. by 12 m.), is located adjacent to the pier. Least depth alongside 3.7 m.

A fish wharf 245 ft. (75 m.) in length, situated on the East side of the harbour, had a least depth of 16 ft. (4.9 m.) alongside in 1977. A fish-packing plant is situated on the wharf.

Marginal wharf length 1,140 ft., depth alongside 14 ft. – 18 ft. LWOST.

A government wharf is situated at the South end of the harbour. The harbour is open all year round.
CRANES: Small mobile cranes only.
MEDICAL: Cottage hospital within the town.
FRESH WATER: Available.
FUEL: Limited supplies of fuel and diesel oil available.
GANGWAY/DECK WATCHMEN: Usually ship's crew, ship's gangway used.
REPAIRS/DRY DOCKS: 2 slipways available.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard, Search and Rescue, St. John's Tel: (709) 772-5151.
BANKING: Services available.
SHORE LEAVE: No restrictions.
GENERAL: Chart: 4611.

Harbour Supervisor equipped with mobile telephone.

There is a laundromat in the town.

Day markers are being installed to assist ships entering the harbour.

A series of lights along the main wharf provide plenty of light.
AUTHORITY: Grand Bank Harbour Authority, P.O.Box 88, Grand Bank, Newfoundland, A0E 1W0, Canada. *Tel:* (709) 832-0255, 832-1823. *Contact:* George Snook, Harbour Supervisor.

GROS CACOUNA, Quebec: 47.55 N. 69.30 W.

LOCATION: On the South shore of the St. Lawrence River, approximately 188 km. downstream from Quebec City.
PILOTAGE: Compulsory.
APPROACHES: Navigable entrance of 110 m. width between breakwaters with a depth of 8.9 m. and 9.5 m. in basin and alongside wharf respectively. Occasional icebreaker assistance may be required during Winter.
HEALTH: Pratique granted by radio.
RADIO: Quebec Radio (VCC).
TUGS: Not available and not required by power driven vessels.
BERTHING:

Berth No.	*Length* (m.)	*Max. Draft* (m.)
1	135	10.2
2	135	10.2

There is a cement terminal at the port operated by Ciment Quebec Co.
CRANES: Available.
STEVEDORES: *Working Hours:* Monday to Friday 0800 hrs. – 1700 hrs. Work possible on holidays and weekends with notice.
MEDICAL: Riviere-du-Loup Hospital is 3 km. from the port.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Diesel oil available.
REPAIRS: Minor repairs possible.
DRY DOCKS: Nearest dry dock at Lauzon (Quebec), 100 km. West of Gros Cacouna.
AIRPORT: Riviere-du-Loup and Quebec.
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday in May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday in September), Thanksgiving (2nd Monday in October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).
TIME: GMT minus 5 hours. GMT minus 4 hours in Summer (first Saturday in April to last Saturday in October).
GENERAL: *Chart:* Canadian Chart No. 1234.
Formalities: Port of Entry for Customs (Rimouski) and Immigration. Quarantine service available from Quebec City.
Services: Banks, post office, provisions, fumigation.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980. *Contact:* Guy Diagle, Harbour Master – Gros Cacouna.

HALIFAX, N.S.: 44.39 N. 63.34 W. (See Plan)

DOCUMENTS:
Port Doctor: Form QS1; Crew Vaccination Certificates; Derat Certificate.
Customs: Customs Clearance or Certificate From Last Port; Cargo List (if no cargo, words "In Ballast" entered); Bonded Stores List (Form E.1); Crew Declaration for each crew member (Form Y14). Ship's Register; Safety Radio, Load Line and Safety Equipment Certificates.
Immigration: Crew List (Form 200) in duplicate in English; all crew Passports (returned prior to sailing).

PILOTAGE: Compulsory. Essential send arrival notice by radio to avoid delay in waiting Pilot. 12 hour notice of ETA required and confirmed or corrected 3 hours before arrival. All times must be UTC. Radio messages should be addressed Marine Aid Centre, Chebucto Head. All pilotage messages subject to full tolls.

When possible, Pilots will board in vicinity of Inner Automatic Light and Whistle Buoy situated about 2 miles N.E. of Chebucto Head. In heavy weather not always possible for pilot vessel to take up station at above position, but will proceed as far seaward as feasible to embark or disembark Pilot.

In normal weather pilot vessel shall, in daytime, fly Pilot flag, and at night will show lights required by international regulations. In abnormal weather – fog, mist, snow, heavy rainstorms – when on station on pilotage duty, in addition to regular signals, will blow 4 long blasts at regular intervals. Vessel requiring Pilot should blow 4 short blasts on whistle at intervals until pilot boat sighted. Pilot boats equipped with radar and stand-by on radio telephone operating on frequency of 156.8 MHz or Channel 16 under international VHF designations.

ETA: For provisional clearance to enter the Halifax Marine Traffic Regulating Zone, vessels should supply the following information to "Halifax Traffic":

1. Position.
2. ETA Zone Limit (Zone boundary is approximately 16 miles radius from Chebucto Head).
3. Destination and last port.
4. Draft.
5. Description and weight of pollutants or any dirty cargo carried.
6. Deficiencies in ship's navigational equipment, engine's steering gear or anchors.
7. Any leakage of pollutants or any damage which may result in pollution.
8. Pilots must be advised ETA 12 hours and 3 hours prior arrival at the Pilots Boarding Station, using UTC, to "Pilots Halifax".

For final clearance to enter the Halifax Marine Traffic Regulation Zone:

1. Report to "Halifax Traffic" on VHF Channel 14 or 2182 kHz, when approaching the zone boundary.
2. Report to "Halifax Traffic" when approaching zone boundaries approximately 8 and 4 miles radius from Chebucto Head.

Vessels leaving Halifax are to report to "Halifax Traffic" when approaching zone boundaries.

ANCHORAGE: Vessels anchor in harbour in areas designated by Halifax Port Corporation..

RESTRICTIONS: Controlling depth in channels of approach 60 ft. in main harbour as far as the Narrows. Ice free all year. Ample turning room for the longest vessel.

MAX. SIZE: Length and breadth unlimited. Can berth ships up to 50 ft. draft. Channel depth 60 ft. Tide range 3 ft. to 6 ft. 135,000 ton tankers with drafts 50 ft. enter harbour regularly.

HEALTH: Quarantine – every vessel coming from port outside Canada shall be inspected by Quarantine Officer at a place specified by him. (Quarantine Station in Anchorage No. 1). Where sufficient information can be given by radio, Radio Pratique may be given between 0900 hrs. and 1700 hrs. local time (address "Quarantine Halifax") and message should include (i) name and nationality of vessel, (ii) ports of call during voyage, (iii) nature of cargo, (iv) number of crew and passengers, (v) statement of health, (vi) name of Agent, (vii) ETA Pilot Station in GMT. A coastwise vessel, free from disease and arriving from a disease-free coastwise port, may be exempted quarantine inspection.

RADIO: Halifax Marine Radio Station, Ketch Harbour. Radio-telephone and other services. Masters may contact Halifax Marine Radio on 500 or 2,182 kHz, VHF on 156.8, working Channel 26 (161.9 and 157.3 MHz).

RADAR: Marine Traffic Regulating Centre at Shannon Hill. Working frequencies Sector One 156.7 MHz (Channel 14); Sector Two 156.6 MHz (Channel 12). Call sign "Halifax Traffic".

TUGS: Join vessel inside harbour at Quarantine Anchorage. Tugs towing use vessel's lines. Tugs made fast alongside vessel for docking or undocking use their own lines at no extra charge.

BULK HANDLING FACILITIES: *Grain Handling Facilities:* Halifax Port Corporation Elevator – Storage capacity 144,256 tonnes wheat equivalent.
Max. Capacity: Berth 28: 1,000 tonnes per hour. (Wheat equivalent) (loading). Berth 26: 800 tonnes per hour. (Wheat equivalent) (unloading)

BRIDGES: There are two: Angus L. MacDonald Bridge (Halifax-Dartmouth) min. vertical clearance at HW 158 ft.; A. Murray MacKay Bridge (narrows) min. vertical clearance at HW 157.7 ft.

STEVEDORES: Available from several private companies.

MEDICAL: Sick Mariners' Service may be obtained for venereal disease only at the Federal Building, Suite 620, Bedford Row, Monday through Friday, Tel: 426-3998. Doctor always available either by telephone or telephone answering service. Information for emergency treatment outside these hours may be obtained from ship's Agent. Emergency hospitalisation can be obtained only at Camp Hill Hospital.

DENSITY: Salt water all tides.

CONSULS: The following countries are represented in Halifax:

Austria
Belgium
Brazil
Britain
Denmark
Finland
France
Germany
Iceland
Italy
Japan
Netherlands
Norway
Peru
Portugal
Spain
Sweden
United States of America

FRESH WATER: Dock side only. Water barges available through private contractor. 50 t.p.h. per hose.
FUEL: See "Tankers".
REPAIRS: All types of repairs possible.
DRY DOCKS: Floating dock 182.9 m. by 30.5 m. by 9.45 m. deep; Lifting capacity 22,680 tons. Graving dock – 172.9 m. long, 24.4 m. wide at keel blocks; clearance at top is 31.2 m.; max. draft over the keel blocks is 7.9 m., capacity 13,610 tons. Two marine railway slips at Dartmouth capable of hauling vessels from 36 to 2,720 tons displacement. Complete machine shop and other repair facilities as well as Salvage equipment available.

New floating dock. Lifting capacity 36,000 tons. Dimensions 237 m. × 38 m. × 9 m. draft.
SURVEYORS: Surveyors and Cargo Inspectors available.
GANGWAY/DECK WATCHMEN: Can be provided.
OPENING/CLOSING HATCHES: Patent mechanical hatches by ship's crew. Wood and canvas hatch covers by stevedores.
CUSTOMS ALLOWANCES: Tobacco: 1 lb. per man per week; 200 cigarettes per man per week. Wine/spirit allowance: 40 oz. bottle per man per week.
CARGO GEAR: All ships liable to inspection by Government Inspectors. Gear Certificates to be produced, if required. Heavy-lift equipment: 59 pieces ranging in single lift capacity to 300 short tons. Normally available on a few hours notice, including floating cranes.
TIME: Standard Time GMT minus 4 hours. Daylight Saving Time from first week-end in April to last week-end in October, clocks advanced 1 hour.
AIRPORT: Halifax International. Regular services to Canada, USA and Europe.
HOLIDAYS: New Year's Day (January 1st); Good Friday; Queen's Birthday (May 20th); Dominion Day (July 1st); Labour Day (September 2nd); Thanksgiving Day (October 14th); Remembrance Day (November 11th); Christmas Day (December 25th). Cargo work can be arranged on all holidays except Labour Day, Christmas (1200 hrs. 24th December to 1800 hrs. 26th December is the "no work period") and New Year's Day.
POLICE/AMBULANCE/FIRE: Police Tel: 4105. Harbour Police (Ports Canada) Tel: 426-3629. Ambulance Tel: 429-5151. Fire Tel: 4103.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard Halifax. Tel: 426-6030. Halifax Traffic Centre. Telex: 22502.
TELEPHONES: Service available at all berths.
SERVICES: All services available including compass adjusting, tank cleaning, etc.
STORING: See "Prelims".

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. None for local stores.
6. Yes.

SHORE LEAVE: Crew allowed ashore.
GARBAGE DISPOSAL: Domestic and international garbage disposal available. Arrangements can be made through vessel's Agent.
WASTE OIL DISPOSAL: Waste oil disposal available by tanker truck. Arrange through ship's Agent.
SEAMAN'S CLUBS: Missions to Seaman at Pier 25. Tel: 422-7790. International telephone service, church services, games and postal facilities available.
GENERAL: Extensive rail and road services plus extensive transit sheds, cold storage with 1,719,000 cu.ft. storage space.

SHIPMASTER'S REPORT: May/July 1989.
Documents:
Original and 2 copies Ship's Stores Declaration (Form E1).
Original and 2 copies Crew Effects Declaration (Form Y 14).
Original and 2 copies Crew List (Form Imm. 200).
Original Health Declaration (Form OS 2001).
All the above are Canadian forms based on IMO forms.
Certificates: The Agent requires advance notice of the expiry dates of the vessel's certificates, i.e. Safety Construction, Safety Equipment, Derat, Safety Radio, I.O.P.P. and Load Line.
Pilot/Tugs: July 1989: Tugs required 12 hours notice but this may be amended within the 12 hours if the vessel is delayed.
Weather: Fog is prevalent from May to July.
Crude Oil Washing: ECAREG require notification if vessel intends to crude oil wash and date of Civil Liability Certificate.
Crew Changes: The procedure for crew changes is the same as the U.S.A. (as described on back of U.S. Crew Lists).

AUTHORITY: Halifax Port Corporation, P.O.Box 336, Halifax, Nova Scotia, Canada B3J 2P6. *Tel:* (902) 426-3643. *FAX:* (902) 426-7335. *Contact:* Captain R. Sherman, Harbour Master (Tel: 426-3648). D.F. Bellefontaine, President and Chief Executive Officer.

HAMILTON, Ontario: 43.14 N. 79.41 W. (See Plan)

For important General Information refer to St. Lawrence Seaway.
DOCUMENTS:
Inward Manifest 3 days prior to arrival of vessel.
1 Steamship company release covering inward shipment.
1 Loading List, 24 hours prior to vessel loading.
1 Customs Report Outwards (A.7).
3 Vessel's Outward Manifest within 3 days after departure of vessel.
PILOTAGE: See "St. Lawrence Seaway".
MAX. SIZE: LOA 730 ft. Max. draft 26 ft.
HEALTH: First port of entry. See "Montreal".
RADIO: VBG Toronto.
Vessels Inbound: Call Burlington Bridge on radio telephone (VHF or AM) for clearance. Call Harbour Master's office for information about docking orders (VHF or AM).
Vessels Outbound: Call Burlington Bridge for clearance. Call Harbour Master's office to advise next port of call.
General: Harbour Master's office keeps radio watch on VHF Channel 12. Tug or linesmen may be ordered through the Harbour Master's office or Agent.
TUGS: Join inside harbour entrance – ship's lines used.
BERTHING: Arrangements made with Harbour Master.
Berthing Capacities: The Port of Hamilton provides berthing facilities for all vessels capable of navigating the St. Lawrence Seaway which can handle maximum size vessels of 730 ft. length × 75 ft. beam with a draft of 26 ft. 6 in.

The Hamilton Harbour Commissioners provide 7,306 m. of berthing and in addition 3,073 m. of berthing is available for private docks i.e. – The Steel Company of Canada, Dominion Foundries & Steel.
Covered Storage Space: Total 59,270 sq.m.
Open Storage Space:
Leased to Private Operators:

Centennial Terminal	74,700 sq.m.
Wellington Street Terminal	46,530 sq.m.
Pier 23	13,000 sq.m.
Pier 11	23,225 sq.m.
Pier 12	55,740 sq.m.
Pier 14	9,300 sq.m.
Pier 15	14,000 sq.m.
Pier 24	35,000 sq.m.
Pier 25	162,841 sq.m.
Pier 26	100,000 sq.m.

BRIDGES: Lift bridge at harbour entrance can be raised any time.
STEVEDORES: Must be ordered prior to 1545 hrs. on previous day.
MEDICAL: Hospital services available and doctors can be arranged.
FRESH WATER: Available.
FUEL: All types available.
CONSULS: Consuls located in Toronto.
REPAIRS: Available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: See "Montreal".
AIRPORT: Hamilton CVC Airport (10 miles South), and Lester B. Pearson International Airport (30 miles East).
HOLIDAYS: Normal Canadian statutory holidays apply and labour can be arranged at extra cost. See "Montreal" for details.
POLICE/AMBULANCE/FIRE: Police 546-4925 or 911.
TELEPHONES: Can be arranged on board.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Skips provided alongside. Prices on request.
Philip Environmental Group. Tel: (416) 544-6687.
Laidlaw Environmental Services. Tel: (416) 332-1111.
WASTE OIL DISPOSAL: 45,000 litre capacity tank trucks. Prices on request.
Philip Enviromental Group. Tel: (416) 544-6687.
Laidlaw Enviromental Services. Tel: (416) 332-1111.
SEAMAN'S CLUBS: Missions to Seamen. Tel: (416) 528-8681. Mini-bus collection.
DEVELOPMENTS: Pier No. 26 under construction.
AUTHORITY: The Hamilton Harbour Commissioners, 605 James St. N., Hamilton, Ontario L8L 1K1, Canada. *Tel:* (905) 525-4330. *FAX:* (905) 528-6282, 525-7258. *Contact:* R.R. Hennessy, Port Director. I.M. Noble, Harbour Master.

HANTSPORT, N.S.: 45.04 N. 64.10 W. (See Plan)

DOCUMENTS: See "Montreal".
PILOTAGE: Non-compulsory, but advisable. Rates by agreement.
MAX. SIZE: Tidal port and no shipping arrives or departs at low water. Draft of largest vessel that entered port was 24 ft. A draft of 25 ft. can be taken in and out.
HEALTH: Customs Officer acts as Quarantine Officer.
RADIO: Ship-to-shore communications; through St. John N.B. or Yarmouth N.S.
BERTHING: Berthing length 400 ft., no water at low tide, ships lie aground on mud alongside. There are railroad tracks on wharf, main and electric lights laid on.
FRESH WATER: From pipeline on Government wharf.
FUEL: Oil by truck from various companies.
REPAIRS: Hull repairs can be made at low water with vessel high and dry.
SERVICES: Supplies: ship's stores can be secured in port.
GARBAGE DISPOSAL: No facilities.
WASTE OIL DISPOSAL: No facilities.
SEAMAN'S CLUBS: None.
AUTHORITY: Mr. John Harvie, Harbour Master/Wharfinger, P.O.Box 35, Hantsport, Nova Scotia B0P 1P0. *Tel:* 684-3216.

HARBOUR GRACE, Newfoundland: 47.43 N. 53.08 W.

DOCUMENTS:
Crew Lists.
Names of passengers.
Clearance from Last Port of call.
Derat Certificate.
Inoculation List of all crew members and passengers.
Manifest of Cargo.
Copy Bills of Lading.
List of Bonded Goods.

PILOTAGE: Not compulsory, but available through "Pilots St.John's".
ANCHORAGES: Pilot will instruct Master.
MAX. SIZE: Max. length 650 ft., max. draft 24 ft. low tide.
HEALTH: See "Montreal".
RADIO: Route cables and telephone calls through St. John's Newfoundland Radio.
VHF: Stand by on Channel 6.
TUGS: Not available.
BERTHING: Nothing specific, Pilot will have instructions; Agent should be given 24 hours arrival notice.
CRANE: Available on request.
STEVEDORES: Available. 24 hours notice required.
MEDICAL: Port doctors available; hospital facilities; advance notice would be helpful in providing ambulance services if needed.
TANKERS: Marine storage terminals for oil are served by Canadian tankers.
FRESH WATER: Available, pipeline delivery at piers, rate of delivery as required.
FUEL: Diesel, gas oil, marine bunkering facilities in piers, available at any time, no notice required.
CONSULS: Norway; Denmark; Spain; Portugal; France.
REPAIRS: Deck and engine repairs available.
GANGWAY/DECK WATCHMEN: Not necessary, available if required.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: Tobacco – each man 200 cigarettes per week. Wine and Spirit – each man 40 oz. wine or spirits per week.
AIRPORT: 1 hour 15 minutes drive, service by regular airlines making connection to all points in the world.
TIME: GMT minus 3.5 hours. Clocks advanced 1 hour first Sunday of April each year and are put back 1 hour last Sunday of October each year.
HOLIDAYS: New Year's Day; Good Friday; July 1st; November 11th; December 25th. Cargoes could be worked on these days with exception of Good Friday and Christmas Day.
POLICE/AMBULANCE/FIRE: One telephone number for all services 709-596-5014.
TELEPHONES: Available at pier.
SERVICES: Compass adjusting, radar repairs, RT repairs, gyro compass repairs, all types electronic equipment repaired. Divers available for surveys and underwater repairs.
SHORE LEAVE: All crew members allowed ashore.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: No facilities available.
WASTE OIL DISPOSAL: Tanker truck available from Crosbie Industrial, St.John's. Tel: 722-8272.
SEAMAN'S CLUBS: None.
CURRENCY: Canadian Dollar.
REGULATIONS: Fishing vessels must advise of week-end arrival on Friday so that permit to take supplies can be obtained from Federal Dept. of Fisheries.
AUTHORITY: Department of Fisheries and Oceans, P.O.Box 5667, St.John's, Newfoundland A1C 5X1, Canada. *Tel:* 772-2661. *FAX:* 772-4525. *Contact:* W.Jenkins.

HAVRE ST. PIERRE, Quebec: 50.14 N. 63.36 W.

LOCATION: Located on the lower North shore of the St. Lawrence River, about 98 km. downstream from Sept-Iles.
DOCUMENTS: Port of entry for Customs and Immigration. Quarantine services also available. Customs office is at Sept Isle, 208 km. to the West.
PILOTAGE: Compulsory. Pilot station at Les Escoumins.
ANCHORAGES: Safe anchorage in 42 ft. – 90 ft. to be found in Eskimo Harbour.
MAX. SIZE: Largest vessel; 10,000 tons, draft 28 ft. 6 in.
HEALTH: Pratique available by radio.
RADIO: Seven Islands – VCK.
TUGS: None available and not necessary.
BERTHING: Quebec Iron & Titanium Corp: Ore Loading Dock has 640 ft. of berthing space, depth alongside 30 ft. at LW.

Transport Canada Wharf: Section 1: Length 93 m., depth 7.5 m. Sector 2: Length 46 m., depth 7.5 m.

Tidal variation from 4.75 ft. – 7.75 ft.

CRANES: 1 rail mounted crane available at the ore loading dock.

Cranes under 30 tons available on request and over 30 tons with delay.

BULK CARGO FACILITIES: Conveyor and loading boom (40 ft. extension) at ore loading dock. Capacity 3,500 t.p.h.
STEVEDORES: *Working Hours:* Monday to Friday 0800 hrs. – 1700 hrs. Sunday and holiday work possible with advance notice.
MEDICAL: Hospital facilities nearby.
FRESH WATER: Available ex-town mains supply.
FUEL: Available on request.
REPAIRS: Minor repairs can be undertaken.
DRY DOCK: Nearest dry dock located at Les Mechins (153 miles from Havre St. Pierre).
AIRPORT: Local airstrip with services, 3 km.
TIME: GMT minus 5 hours in Winter. GMT minus 4 hours in Summer (first Saturday in April to last Saturday in October).
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday of May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday of September), Thanksgiving (2nd Monday of October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).

IQALUIT (Frobisher Bay), N.W.T.: 63.44 N. 68.32 W.

LOCATION: An expanding settlement at the head of Frobisher Bay, Baffin Island. Navigation season, mid-July to mid-October depending on ice conditions. Port of entry.
DOCUMENTS: See "Montreal".
APPROACHES: Anchorage in depths of 38.4 m. to 40.2 m. Approximately 925 m. East of Monument Island settlement. Minimum depths in approaches, 9.8 m.
PILOTAGE: No service as such but a senior port officer may assist vessels to moorings.
TIDES: Rise of Tide, 12.2 m., with strong tidal runs between islands. Low powered vessels generally navigate Pike Resor Channel at slack water, high or low tide if current unfavourable. This channel is mostly navigated during daylight hours.
HEALTH: Free Pratique, if health certificate is in order. In the event of suspected disease or fever on board, report to Frobisher Bay Telecommunications Branch call sign VFF, R/T or W/T.
RADIO: Frobisher Bay R/S VFF. Coast Guard Radio.
TUGS: 2 landing craft (LCM's) each powered with two 130 h.p. diesel engines assist vessels in mooring, acting as tugs and running ship's stern lines to Innuit Head.
BERTHING: Tankers of 160 m. length, 17.68 m. breadth and draft of 9.1 m., discharge approximately 243.8 m. off Innuit Head. Method of mooring is to stream both anchors in anchorage area and stern lines to mooring bollards situated on Innuit Head for this purpose. General cargo ships up to 12,000 tons also moor in this position. Vessels should be prepared for a quick departure in event of storm warnings, especially hazardous from N. and S. winds. Maximum length, breadth and draft determined by Master and Owners or Charterers. Delays can be expected due to tidal conditions. All general cargo, machinery, vehicles, etc., transferred from ship to shore and vice-versa via landing craft as no pier exists; beach gradient is gradual. Frequently barges cannot be discharged and re-floated until next rising tide. Delays expected for cargo vessels anchoring off Monument Island and discharging or loading by lighters during high winds and rough seas.
STEVEDORES: Special arrangements are necessary for these services.
MEDICAL: Hospital facilities available.
DENSITY: From August 1st to September 15th, mean approx. 1024, increasing slightly as season advances.
FRESH WATER: Small quantity in emergency. Approximately 50 gallons per minute.
Note: Due to tidal conditions considerable delay could result in delivering fresh water.
FUEL: Only supplied in emergency, Arctic diesel Grade 1, viscosity quoted as minus 60. Arrangements to be made through Shell Canada.
REPAIRS: Limited repairs, i.e. welding, R/T and radio.
OPENING/CLOSING HATCHES: According to agreements.
REPATRIATION: Crew changes can be effected by air passage to or from Montreal.
AIRPORT: Distance approximately 0.8 km. from landing beach, 6 flights weekly to and from Montreal, weather permitting, via Nordair Ltd. of Montreal. 3 flights weekly to Ottawa via First Air.
TIME: GMT minus 4 hours. Summertime kept from April to October.
POLICE/AMBULANCE/FIRE: RCMP 5202; Ambulance 979-5231; Fire 6666.
IDENTIFICATION CARDS: Required if arriving from a foreign country.
AUTHORITY: Transport Canada, Ottawa.

Transport Canada, c/o Beach Master, Frobisher Bay, Canada XOA OXO. *Tel:* (819) 797-6298 during season. *Telex:* 063-5529. Telegrams, c/o Canadian National Telegraph via VFF or VAW. *Contact:* Captain C. Cote.

KINGSTON, Ontario: 44.12 N. 76.30 W.

For important General Information refer to St. Lawrence Seaway.
DOCUMENTS: See "Montreal".
PILOTAGE: Contact Pilotage Officer, in Cornwall, tel: 613-932-8740, U.S. Pilot Station, Cape Vincent 315-654-2900.
ANCHORAGE: Good anchorage off Penitentiary.
RESTRICTIONS: Channel Depths – Controlling depth at low lake levels 22 ft. until wharves in harbour approached. In upper harbour, controlling depth 17.5 ft. Depths vary from month to month.

Navigating Season April 15th – December 15th.

HEALTH: First port of entry. Quarantine at Quebec City for incoming ships from foreign ports.

TUGS: Available. Necessary for handling ships in rough weather at Elevator and other docks.
BERTHING: Docks extend West from North of bridge (La Salle Causeway) to Little Catariqui Bay – some 4 miles. Transport Canada 455 ft., depth alongside 17 ft. Portsmouth Olympic Harbour – Environment Canada, under construction. Also smaller docks for coastal vessels and private docks, including Canada Steamship Lines Elevator dock 700 ft. long on East side 25 ft. alongside, and 600 ft. on West side depth 22 ft. La Salle Causeway 1,000 ft., 19 ft. alongside, used for berthing in Winter. James Richardson Wharf: Berthing length 800 ft., depth alongside 19 ft.
BULK HANDLING FACILITIES: *Canada Steamship Lines Elevator Dock:* Large Upper Lake vessels are unloaded on East side by two travelling marine towers; canal-size vessels are loaded on the West side, 6 loading spouts. The elevator capacity is 2,500,000 bushels, marine towers 35,000 bushels per hour. Canadian National Railways tracks run to the elevator and cars can be loaded with grain. This dock is also open to general cargo.
STEVEDORES: From Toronto.
MEDICAL: Hospitals, Kingston General and Hotel Dieu.
FUEL: Bunker coal – normal stock 2,000 tons from lighters at wharf. Bunker "C" and diesel oil also available.
FIRE PRECAUTIONS: No unusual precautions.
REPAIRS: Most repairs possible.
DRY DOCK: Will take ships of length 210 ft., beam 44 ft. Depth on sill 13 ft.
CUSTOMS ALLOWANCES: See "Montreal".
TIME: Eastern Standard Time GMT minus 5 hours. Daylight Saving Time from first week-end in April to last week-end in October, clocks advanced 1 hour.
HOLIDAYS: See "Montreal". Port Officials always available.
TELEPHONES: Ship-to-shore phone communications through Kingston (VBH).
AUTHORITY: Transport Canada, P.O.Box 592, Kingston, Ontario K7L 4X1. *Tel:* (613) 546-3335. *Contact:* E. Phipps-Walker, Harbour Master.

KINGSVILLE, Ontario: 42.02 N. 82.44 W. (See Plan)

LOCATION: Kingsville Harbour is located on the North side of Lake Erie about 48 km. S.E. of Windsor.
RESTRICTIONS: *Navigation Season:* April to mid-December.
Depths: Entrance Channel: 5.5 m.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
West Wharf	218	5.5
East Pier	130	4.6

REPAIRS: Minor repairs possible.
SERVICES: Private fish processing plant, outdoor storage, International ferry (alternate port during inclement weather).
AUTHORITY: Harbours and Ports, Canadian Coast Guard, 201 N. Front Street, Suite 703, Sarnia, Ontario, N7T 8B1, Canada. *Tel:* (519) 383-1942. *FAX:* (519) 383-1996. *Contact:* Regional Manager.
Port Official: Jack Scratch, Harbour Master/Wharfinger.

KITIMAT, B.C.: 53.59 N. 128.46 W. (See Plan)

PORT LIMITS: All waters of Kitimat Arm and Kildala Arm bounded by the high water mark, North of a line drawn from Hilton Point (Lat. 53° 48′ 54″ N., Long. 128° 52′ 16″ W.) through Louis Point (Lat. 53° 49′ 08″ N., Long. 128° 45′ 38″ W.) on Coste Island to Steel Point (Lat. 53° 49′ 35″ N., Long. 128° 42′ 20″ W.) on the mainland. Canadian Chart 3743.
DOCUMENTS and General Information: Refer to "Vancouver".
PILOTAGE: Compulsory. Pilot boards at Cape Beale, West Coast, Vancouver Island, or Triple Island, off Prince Rupert. Pilotage Authority require 48 hours notice to allow Pilot to meet vessel at Triple Island or Cape Beale.
ANCHORAGE: No vessel shall anchor in the fairway or dredged channel approaching the wharf or otherwise in a position to interfere with or obstruct the docking or undocking of any other vessel. Pilot will instruct Master. Usual anchorage South of Eurocan Terminal, East side of Kitimat Arm.
RESTRICTIONS: Approach to the port from the South is via Laredo Sound, Laredo Channel, Campania Sound, Whale or Squally Channels and thence via Douglas Channel. From the North via Brown Passage, Arthur Passage, Grenville Channel, Douglas Channel. The route from the South is approximately 120 miles, from the open sea and from the North approximately 130 miles. Entrance channel to Terminal Wharf No. 1 (red and black buoys with flashing light) is 732 m. long, dredged to a depth of 10.67 m. at low water, width varies from 244 m. at entrance to 183 m. In addition, a turning basin has been dredged to 10.67 m. at low water on the side of the channel opposite wharf, providing a turning basin 198 m. in width. The channel has mooring dolphins on West side, 264 m. South of wharf No. 1 to accommodate vessels up to 16,000 d.w.t. while awaiting berth.
Vessels may enter or depart any time of day or night.
MAX. SIZE: LOA, 207 m. beam 27.4 m., draft 11 m. Mean tide range 4.2 m. Depth alongside at zero tide 10.67 m.
HEALTH: (Radio Pratique Waived): Only in the event of suspected disease or fever on board – also request for Derat, contact the Quarantine Officer at Prince Rupert, B.C. Tel: (604) 627-1381.
RADIO: Prince Rupert Radio "VAJ" 500, 2182, 1630.
ETA: Notice of ETA must be given to Alcan, Eurocan or Agent at Kitimat at least 24 hours and 12 hours before arrival. Alcan, Eurocan or Agent may then assign a berth to the vessel but shall not be liable for any delay in providing berth or for failure to provide a berth. Vessels carrying bulk cargoes for discharge are instructed to request Alcan via radio or wireless telegraph through shore stations as to which hatches are to be opened on arrival alongside unloading berth to permit immediate entry of unloading devices.
TUGS: Tug services available. 3 tugs, 500 h.p., 750 h.p. and 1,000 h.p.
BERTHING: Alcan Terminal Wharf No. 1 (concrete caisson construction) is 229 m. long and has two pneumatic unloading towers discharging to a belt conveyor and a Kangaroo Crane for either bulk and general cargo duties. The wharf is connected by rail direct to Aluminum Co. of Canada smelter yard and to the Terrace – Kitimat spurline of CNR.

Rivtow Straits Ltd. operates a weekly Ro/Ro barge service for containers and palletised cargo to and from Vancouver from a barge loading ramp located south of Alcan's mooring dolphins.

Eurocan Terminal is located to the East of Ocelot Terminal and is 137 m. long with mooring dolphins at South end. To the North of the terminal is located a hydraulic barge loading ramp. Dredged alongside to 10.67 m. at LLW. Principle export cargoes are paper and packaged lumber.

No container or LPG carrier facilities available.

Ocelot Industries Ltd., terminal is located South and East of Alcan's facilities and is of concrete piles and consists of a loading platform with 2 pads on either side with mooring dolphins to the North and South. The distance between breasting pads is approximately 78 m. and the overall length between dolphins is approximately 300 m. The berth area is approximately 430 m. long and 90 m. wide and is dredged to 13 m. at LLW. At the entrance there is a Q.F. flashing red buoy in line with the berth and another at the North end. F. W. range lights bearing 001° are located to the North and have a range of 4 miles. Principal export cargo is methanol. As an extension to the methanol plant, Ocelot is presently constructing a 500 tonne/day Ammonia plant, product will be shipped through existing wharf facilities. A separate pipeline and loading arm are under construction.
STEVEDORES: ETA sent by cable 24 and 12 hours before arrival.
MEDICAL: Kitimat General Hospital – complete medical service provided.
DENSITY: Varies with state of tide, water depth and season of the year.
FRESH WATER: Available at Alcan's Terminal Wharf No. 1 and at other terminals by tank truck.
FUEL: Only diesel oil available.
CONSULS: Available at Vancouver, B.C.
REPAIRS: Minor repairs only; nearest shipyard facilities Esquimalt or Vancouver.
SURVEYORS: Cargo Inspectors: S.G.S. Supervision Service Inc. located at Kitimat. A.B.S., B.V. and Lloyd's Surveyor available from Vancouver.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: Normally done by crew on bulk discharge. On general cargo, stevedores open and close hatches.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 0.5 lb. tobacco. Liquor: 40 oz. per man, additional issue after 7 days.
REPATRIATION: Facilities convenient for crew changes.
AIRPORT: Three flights daily from Terrace to Vancouver International Airport. Limousine service from Kitimat to Terrace, distance 40 miles.
TIME: GMT minus 8 hours. Daylight saving time from first Sunday in April to last Sunday in October.
HOLIDAYS: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, and Boxing Day.
POLICE/AMBULANCE/FIRE: Police 632-7111; Ambulance/Fire 632-9111 or 639-9111.
EMERGENCY CO-ORDINATION CENTRE: Local fire chief, R.C.M.P. Kitimat. Tel: 632-7111 or Canadian Coast Guard, Prince Rupert. Tel: 624-9146.
TELEPHONE: Telephone available at dock offices.
STORING: Vessels can be stored by truck, which may proceed alongside the berth. Fork-lift trucks may be used to handle stores. Customs Regulations in force for bonded stores only. Riggers available to assist with storing.
SHORE LEAVE: Permitted.
AUTHORITY: Transport Canada, 224 West Esplanade Street, North Vancouver, B.C. V7M 3J7. *Tel:* 984-3800. *Telex:* 04-53235. *Contact:* Walter Koengeter, Harbour Master, P.O.Box 488, Ocelot Road, Kitimat, B.C. V8C 2R9. Tel: (604) 639-9400 (office), (604) 632-2937 (home).

LISCOMB, Nova Scotia: 45.01 N. 61.59 W.

APPROACHES: Channel depth ranges from 3.6 m. to 9.1 m.
BERTHING: Government Wharf closed as in a state of disrepair.
CRANES: None available.
MEDICAL: Sheet Harbour Hospital, 30 km.
TANKERS: Facilities closed.
AIRPORT: Halifax International Airport, 225 km.
AUTHORITY: Department of Fisheries and Oceans, Small Craft Harbours Branch, 1721 Lower Water Street, 4th Floor, P.O. Box 550, Halifax, Nova Scotia B3J 2S7. *Tel:* (902) 426-8120. *Telex:* 019-21891. *Contact:* R.W. Young.

LIVERPOOL, Nova Scotia: 44.03 N. 64.42 W.

(See Plan)

SHIPMASTER'S REPORT: November 1990 (Updated 1996).

DOCUMENTS: See "Halifax".
PILOTAGE/APPROACHES: For the approach to the outer anchorage, no pilot service is necessary.

There are numerous lighthouses and buoys which mark shallows, and the approach is without difficulties.

Pilots are sent from Halifax and require 3 – 4 hours notice from Agent, therefore vessel has to give Agent plenty of notice. Pilot will board the vessel at the outer anchorage. The pilot boat is aluminium in colour and has no special identification markings, and is also used to bring the mooring lines ashore when berthing. Pilots are only on VHF Channel 16 when they are on duty or prior to boarding a vessel for berthing. Pilots are very experienced.

In addition to listening on Channel 16, vessels should switch to VHF Channel 10 for receiving instructions for the Paper Mill.

Pilot's Remarks: Pilotage is not compulsory, but available through Pilots Halifax on 24 hours notice with 6 hours confirmation. The pilot boarding station is at Lat. 44° 01′ 34″ N., Long. 64° 38′ 55″ W.
ANCHORAGES: There is a safe outer anchorage close to the Pilot Station, situated at the centre of cross bearings from Coffin Island, Eastern Head and Moose Point, about 0.8 nautical miles from each point in about 26.0 m., with good holding ground, no dragging.
RESTRICTIONS: No information available.
MAX. SIZE: As per Bowater Agencies, depending on the state of the tide (LOA 650 ft. (approx.) and draft 26 ft.).
HEALTH: See "Halifax".
RADIO: Halifax Radio, VCS, was used for ETA messages.
VHF: Bowater Agency maintains watch on Channel 10. Coast Guard Radio stations at Halifax and Yarmouth maintain watch on Channel 16.
RADAR: No radar.
TUGS: No tugs available.
BERTHING: Berthing is done by dropping anchor in front of tip of pier and by swinging stern first, and mooring starboard side at the N.E. side of the pier.

There is a finger pier about 550 ft. long with a 26 ft. depth alongside, depending on tide. The wharf was rebuilt in 1991 and has a second berth on the West side. Ro-Ro ramp available.

Loading of newsprint paper rolls is done by ship's gear.
CRANES: There are no cranes.
BULK CARGO FACILITIES: There are no facilities available.
SPECIALISED CARGO HANDLING FACILITIES: No information.
BRIDGES: None.
STEVEDORES: Agent to be kept well informed by cable. Stevedores are local union personnel.

Normal working is 24 hours a day.

Loading rate is about 50 tonnes per gang/working hour.
MEDICAL: There is a modern hospital and several doctors in the town.
TANKERS: No information available.
DENSITY: 1025.
FRESH WATER: Available in unlimited quantities at no cost.
FUEL: Diesel oil can be supplied by trucks from Halifax. Heavy fuel oil not available.
FIRE PRECAUTIONS: Paper Mill maintains a fire brigade.
CONSULS: See "Halifax".
REPAIRS: Minor repairs can be undertaken by Steel and Engine Products Ltd. Steel and Engine Products Ltd. is a multi-disciplined manufacturing and ship repair facility, including ship repair for both wood and steel ships handling a wide range of fishing boats, trawlers, naval vessels, tugs, barges, freighters, and oil exploration craft.
DRY DOCKS: There is a slip at Liverpool for small vessels.
SURVEYORS: There are several surveyors at Liverpool and Halifax.
GANGWAY/DECK WATCHMEN: Not compulsory or necessary.
HATCHES: Opening/closing of hatches normally by crew.
CUSTOMS ALLOWANCES: Every crew member is entitled to 1 bottle of spirits and 200 cigarettes every 7 days. There is only one Customs Officer at this port.
CARGO GEAR: Ship's gear is used.
REPATRIATION: Repatriation can be undertaken without difficulties, through the airport at Halifax.
AIRPORT: Halifax International Airport is 170 km. from Liverpool.
TIME: Summer – GMT minus 3 hours. Winter – GMT minus 4 hours.
HOLIDAYS: See "Halifax".
POLICE/AMBULANCE/FIRE: Use telephone inside Paper Mill or at gate.
EMERGENCY CO-ORDINATING CENTRE: No information available.
TELEPHONES: There is a telephone at the office next to the vessel.
SERVICES: See "Halifax". No special services at Liverpool.
BANKS: At Liverpool – Bank of Montreal, Bank of Nova Scotia and Royal Bank.
STORING: See "Prelims".

1. Can be stored by truck.
2. N.A.
3. Yes, but not during loading hours, due to the very narrow pier space.
4. Yes.
5. No information.
6. Stevedores have to be used.

SHIP SUPPLY SERVICE: No ship chandlers at Liverpool. No information on other services. Fresh provisions can be obtained from Supermarkets, which deliver to ship free of charge.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary.
REGULATIONS: No particular or unusual regulations.
GENERAL: Agent, Customs and stevedores – all very co-operative.
Charts: Canadian Chart No. 4379. B.A. Charts No. 340 and 730.
AUTHORITY: Bowater Mersey Paper Company Limited, P.O.Box 1150, Liverpool, Nova Scotia, B0T 1K0. *Tel:* (902) 354-3411. *Telex:* 019-21556. *FAX:* (902) 354-3579. *Contact:* Gary Levy or Jack Conrad. For administrative matters, call Bill Stewart (Tel: (902) 354-3411. Fax: (902) 354-3136).
AGENT: See "Authority".

LONG HARBOUR, Newfoundland: 47.27 N. 53.49 W.

PILOTAGE: Not compulsory, but can be arranged through St. John's Coast Guard Radio.
TUGS: 3 tugs available from Come-By-Chance.
BERTHING: Erco Wharf is approximately 488 m. long with dolphin 38 m. long, joined to wharf by catwalk. Least depth alongside 10.98 m.
MEDICAL: Nearest hospital is 10 km. away.
AIRPORT: 130 km.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, P.O.Box 1300, St. John's, Newfoundland A1C 6H8, Canada. *Tel:* (709) 772-5154. *FAX:* (709) 772-5127.

LONG POND, Newfoundland: 47.31 N. 52.58 W.

(See Plan)

LOCATION: The Public Harbour of Long Pond is located on the South shore of Conception Bay, about 35 km. West of Cape St.Francis, on the East coast of Newfoundland. Navigational season is year round, with occasional icebreaker assistance in early Spring.
DOCUMENTS:

3 copies Crew Declaration (Form Y14).
3 copies Ship's Stores List (Form E1).
3 copies Immigration Crew List (Form IMM 200), only Canadian form accepted.
2 copies Bill of Lading or Manifest.

In addition, Customs Clearance from last port, Derat Certificate, extra copy of Crew List, Vaccination List, Ship's Register, Radio Equipment Certificate, Safety Equipment Certificate, Load Line Certificate and Non-Canadian Ship Compliance Certificate. Oil Record Log Book should be up to date and readily available for inspection by Government Steamship Inspectors.
PILOTAGE: Not compulsory, however, licensed Pilots are available, if desired.
Arrivals: To avoid a delay in ordering a Pilot, Masters of vessels bound for Argentia must forward their request for Pilots to "Pilots St.John's" as follows:

First notice 12 hours prior to the ETA (GMT) at the appropriate boarding station, stating:

(a) Which boarding station the Pilot is required at.
(b) Name.
(c) Call Sign.
(d) Deepest draft.
(e) Speed.
(f) Agent.
(g) Length, breadth, moulded depth, deadweight tonnage and the largest net registered tonnage.

Second notice 3 hours prior to the ETA (GMT) at the appropriate boarding station.

Departures/Movages: First notice 9 hours prior to the ETD (Local time). Second notice 3 hours prior to the ETD (Local time).
Embarkation/Disembarkation: Masters of calling vessels are reminded of their obligation to comply with statutory rules, and are recommended to comply with the following:

(a) The Officer responsible for embarkation/disembarkation of the Pilot is a watchkeeping Officer.
(b) The pilot ladder is secure.
(c) The pilot ladder is adequately illuminated at night.
(d) Means are provided to enable the Pilot to pass safely and conveniently from the head of the pilot ladder into the ship or onto the ship's deck. Portable stanchions, if used, should be independently secured to the rail or deck, one on each side of the ladder.

TUGS: Available. Necessary for handling ships in rough weather at Elevator and other docks.

BERTHING: Docks extend West from North of bridge (La Salle Causeway) to Little Cataraqui Bay – some 4 miles. Transport Canada 455 ft., depth alongside 17 ft. Portsmouth Olympic Harbour – Environment Canada, under construction. Also smaller docks for coastal vessels and private docks, including Canada Steamship Lines Elevator dock 700 ft. long on East side 25 ft. alongside, and 600 ft. on West side depth 22 ft. La Salle Causeway 1,000 ft., 19 ft. alongside, used for berthing in Winter. James Richardson Wharf: Berthing length 800 ft., depth alongside 19 ft.

BULK HANDLING FACILITIES: *Canada Steamship Lines Elevator Dock:* Large Upper Lake vessels are unloaded on East side by two travelling marine towers; canal-size vessels are loaded on the West side, 6 loading spouts. The elevator capacity is 2,500,000 bushels, marine towers 35,000 bushels per hour. Canadian National Railways tracks run to the elevator and cars can be loaded with grain. This dock is also open to general cargo.

STEVEDORES: From Toronto.

MEDICAL: Hospitals, Kingston General and Hotel Dieu.

FUEL: Bunker coal – normal stock 2,000 tons from lighters at wharf. Bunker "C" and diesel oil also available.

FIRE PRECAUTIONS: No unusual precautions.

REPAIRS: Most repairs possible.

DRY DOCK: Will take ships of length 210 ft., beam 44 ft. Depth on sill 13 ft.

CUSTOMS ALLOWANCES: See "Montreal".

TIME: Eastern Standard Time GMT minus 5 hours. Daylight Saving Time from first week-end in April to last week-end in October, clocks advanced 1 hour.

HOLIDAYS: See "Montreal". Port Officials always available.

TELEPHONES: Ship-to-shore phone communications through Kingston (VBH).

AUTHORITY: Transport Canada, P.O.Box 592, Kingston, Ontario K7L 4X1. *Tel:* (613) 546-3335. *Contact:* E. Phipps-Walker, Harbour Master.

KINGSVILLE, Ontario: 42.02 N. 82.44 W. (See Plan)

LOCATION: Kingsville Harbour is located on the North side of Lake Erie about 48 km. S.E. of Windsor.

RESTRICTIONS: *Navigation Season:* April to mid-December. *Depths:* Entrance Channel: 5.5 m.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
West Wharf	218	5.5
East Pier	130	4.6

REPAIRS: Minor repairs possible.

SERVICES: Private fish processing plant, outdoor storage, International ferry (alternate port during inclement weather).

AUTHORITY: Harbours and Ports, Canadian Coast Guard, 201 N. Front Street, Suite 703, Sarnia, Ontario, N7T 8B1, Canada. *Tel:* (519) 383-1942. *FAX:* (519) 383-1996. *Contact:* Regional Manager.

Port Official: Jack Scratch, Harbour Master/Wharfinger.

KITIMAT, B.C.: 53.59 N. 128.46 W. (See Plan)

PORT LIMITS: All waters of Kitimat Arm and Kildala Arm bounded by the high water mark, North of a line drawn from Hilton Point (Lat. 53° 48′ 54″ N., Long. 128° 52′ 16″ W.) through Louis Point (Lat. 53° 49′ 08″ N., Long. 128° 45′ 38″ W.) on Coste Island to Steel Point (Lat. 53° 49′ 35″ N., Long. 128° 42′ 20″ W.) on the mainland. Canadian Chart 3743.

DOCUMENTS and General Information: Refer to "Vancouver".

PILOTAGE: Compulsory. Pilot boards at Cape Beale, West Coast, Vancouver Island, or Triple Island, off Prince Rupert. Pilotage Authority require 48 hours notice to allow Pilot to meet vessel at Triple Island or Cape Beale.

ANCHORAGE: No vessel shall anchor in the fairway or dredged channel approaching the wharf or otherwise in a position to interfere with or obstruct the docking or undocking of any other vessel. Pilot will instruct Master. Usual anchorage South of Eurocan Terminal, East side of Kitimat Arm.

RESTRICTIONS: Approach to the port from the South is via Laredo Sound, Laredo Channel, Campania Sound, Whale or Squally Channels and thence via Douglas Channel. From the North via Brown Passage, Arthur Passage, Grenville Channel, Douglas Channel. The route from the South is approximately 120 miles, from the open sea and from the North approximately 130 miles. Entrance channel to Terminal Wharf No. 1 (red and black buoys with flashing light) is 732 m. long, dredged to a depth of 10.67 m. at low water, width varies from 244 m. at entrance to 183 m. In addition, a turning basin has been dredged to 10.67 m. at low water on the side of the channel opposite wharf, providing a turning basin 198 m. in width. The channel has mooring dolphins on West side, 264 m. South of wharf No. 1 to accommodate vessels up to 16,000 d.w.t. while awaiting berth.

Vessels may enter or depart any time of day or night.

MAX. SIZE: LOA, 207 m. beam 27.4 m., draft 11 m. Mean tide range 4.2 m. Depth alongside at zero tide 10.67 m.

HEALTH: (Radio Pratique Waived): Only in the event of suspected disease or fever on board – also request for Derat, contact the Quarantine Officer at Prince Rupert, B.C. Tel: (604) 627-1381.

RADIO: Prince Rupert Radio "VAJ" 500, 2182, 1630.

ETA: Notice of ETA must be given to Alcan, Eurocan or Agent at Kitimat at least 24 hours and 12 hours before arrival. Alcan, Eurocan or Agent may then assign a berth to the vessel but shall not be liable for any delay in providing berth or for failure to provide a berth. Vessels carrying bulk cargoes for discharge are instructed to request Alcan via radio or wireless telegraph through shore stations as to which hatches are to be opened on arrival alongside unloading berth to permit immediate entry of unloading devices.

TUGS: Tug services available. 3 tugs, 500 h.p., 750 h.p. and 1,000 h.p.

BERTHING: Alcan Terminal Wharf No. 1 (concrete caisson construction) is 229 m. long and has two pneumatic unloading towers discharging to a belt conveyor and a Kangaroo Crane for either bulk and general cargo duties. The wharf is connected by rail direct to Aluminum Co. of Canada smelter yard and to the Terrace – Kitimat spurline of CNR.

Rivtow Straits Ltd. operates a weekly Ro/Ro barge service for containers and palletised cargo to and from Vancouver from a barge loading ramp located south of Alcan's mooring dolphins.

Eurocan Terminal is located to the East of Ocelot Terminal and is 137 m. long with mooring dolphins at South end. To the North of the terminal is located a hydraulic barge loading ramp. Dredged alongside to 10.67 m. at LLW. Principle export cargoes are paper and packaged lumber.

No container or LPG carrier facilities available.

Ocelot Industries Ltd., terminal is located South and East of Alcan's facilities and is of concrete piles and consists of a loading platform with 2 pads on either side with mooring dolphins to the North and South. The distance between breasting pads is approximately 78 m. and the overall length between dolphins is approximately 300 m. The berth area is approximately 430 m. long and 90 m. wide and is dredged to 13 m. at LLW. At the entrance there is a Q.F. flashing red buoy in line with the berth and another at the North end. F. W. range lights bearing 001° are located to the North and have a range of 4 miles. Principal export cargo is methanol. As an extension to the methanol plant, Ocelot is presently constructing a 500 tonne/day Ammonia plant, product will be shipped through existing wharf facilities. A separate pipeline and loading arm are under construction.

STEVEDORES: ETA sent by cable 24 and 12 hours before arrival.

MEDICAL: Kitimat General Hospital – complete medical service provided.

DENSITY: Varies with state of tide, water depth and season of the year.

FRESH WATER: Available at Alcan's Terminal Wharf No. 1 and at other terminals by tank truck.

FUEL: Only diesel oil available.

CONSULS: Available at Vancouver, B.C.

ANCHORAGES: There is a safe outer anchorage close to the Pilot Station, situated at the centre of cross bearings from Coffin Island, Eastern Head and Moose Point, about 0.8 nautical miles from each point in about 26.0 m., with good holding ground, no dragging.
RESTRICTIONS: No information available.
MAX. SIZE: As per Bowater Agencies, depending on the state of the tide (LOA 650 ft. (approx.) and draft 26 ft.).
HEALTH: See "Halifax".
RADIO: Halifax Radio, VCS, was used for ETA messages.
VHF: Bowater Agency maintains watch on Channel 10. Coast Guard Radio stations at Halifax and Yarmouth maintain watch on Channel 16.
RADAR: No radar.
TUGS: No tugs available.
BERTHING: Berthing is done by dropping anchor in front of tip of pier and by swinging stern first, and mooring starboard side at the N.E. side of the pier.

There is a finger pier about 550 ft. long with a 26 ft. depth alongside, depending on tide. The wharf was rebuilt in 1991 and has a second berth on the West side. Ro-Ro ramp available.

Loading of newsprint paper rolls is done by ship's gear.
CRANES: There are no cranes.
BULK CARGO FACILITIES: There are no facilities available.
SPECIALISED CARGO HANDLING FACILITIES: No information.
BRIDGES: None.
STEVEDORES: Agent to be kept well informed by cable. Stevedores are local union personnel.

Normal working is 24 hours a day.

Loading rate is about 50 tonnes per gang/working hour.
MEDICAL: There is a modern hospital and several doctors in the town.
TANKERS: No information available.
DENSITY: 1025.
FRESH WATER: Available in unlimited quantities at no cost.
FUEL: Diesel oil can be supplied by trucks from Halifax. Heavy fuel oil not available.
FIRE PRECAUTIONS: Paper Mill maintains a fire brigade.
CONSULS: See "Halifax".
REPAIRS: Minor repairs can be undertaken by Steel and Engine Products Ltd. Steel and Engine Products Ltd. is a multi-disciplined manufacturing and ship repair facility, including ship repair for both wood and steel ships handling a wide range of fishing boats, trawlers, naval vessels, tugs, barges, freighters, and oil exploration craft.
DRY DOCKS: There is a slip at Liverpool for small vessels.
SURVEYORS: There are several surveyors at Liverpool and Halifax.
GANGWAY/DECK WATCHMEN: Not compulsory or necessary.
HATCHES: Opening/closing of hatches normally by crew.
CUSTOMS ALLOWANCES: Every crew member is entitled to 1 bottle of spirits and 200 cigarettes every 7 days. There is only one Customs Officer at this port.
CARGO GEAR: Ship's gear is used.
REPATRIATION: Repatriation can be undertaken without difficulties, through the airport at Halifax.
AIRPORT: Halifax International Airport is 170 km. from Liverpool.
TIME: Summer – GMT minus 3 hours. Winter – GMT minus 4 hours.
HOLIDAYS: See "Halifax".
POLICE/AMBULANCE/FIRE: Use telephone inside Paper Mill or at gate.
EMERGENCY CO-ORDINATING CENTRE: No information available.
TELEPHONES: There is a telephone at the office next to the vessel.
SERVICES: See "Halifax". No special services at Liverpool.
BANKS: At Liverpool – Bank of Montreal, Bank of Nova Scotia and Royal Bank.
STORING: See "Prelims".
1. Can be stored by truck.
2. N.A.
3. Yes, but not during loading hours, due to the very narrow pier space.
4. Yes.
5. No information.
6. Stevedores have to be used.

SHIP SUPPLY SERVICE: No ship chandlers at Liverpool. No information on other services. Fresh provisions can be obtained from Supermarkets, which deliver to ship free of charge.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary.
REGULATIONS: No particular or unusual regulations.
GENERAL: Agent, Customs and stevedores – all very co-operative.
Charts: Canadian Chart No. 4379. B.A. Charts No. 340 and 730.
AUTHORITY: Bowater Mersey Paper Company Limited, P.O.Box 1150, Liverpool, Nova Scotia, B0T 1K0. *Tel:* (902) 354-3411. *Telex:* 019-21556. *FAX:* (902) 354-3579. *Contact:* Gary Levy or Jack Conrad. For administrative matters, call Bill Stewart (Tel: (902) 354-3411. Fax: (902) 354-3136).
AGENT: See "Authority".

LONG HARBOUR, Newfoundland: 47.27 N. 53.49 W.

PILOTAGE: Not compulsory, but can be arranged through St. John's Coast Guard Radio.
TUGS: 3 tugs available from Come-By-Chance.
BERTHING: Erco Wharf is approximately 488 m. long with dolphin 38 m. long, joined to wharf by catwalk. Least depth alongside 10.98 m.
MEDICAL: Nearest hospital is 10 km. away.
AIRPORT: 130 km.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, P.O.Box 1300, St. John's, Newfoundland A1C 6H8, Canada. *Tel:* (709) 772-5154. *FAX:* (709) 772-5127.

LONG POND, Newfoundland: 47.31 N. 52.58 W.

(See Plan)

LOCATION: The Public Harbour of Long Pond is located on the South shore of Conception Bay, about 35 km. West of Cape St.Francis, on the East coast of Newfoundland. Navigational season is year round, with occasional icebreaker assistance in early Spring.
DOCUMENTS:
- 3 copies Crew Declaration (Form Y14).
- 3 copies Ship's Stores List (Form E1).
- 3 copies Immigration Crew List (Form IMM 200), only Canadian form accepted.
- 2 copies Bill of Lading or Manifest.

In addition, Customs Clearance from last port, Derat Certificate, extra copy of Crew List, Vaccination List, Ship's Register, Radio Equipment Certificate, Safety Equipment Certificate, Load Line Certificate and Non-Canadian Ship Compliance Certificate. Oil Record Log Book should be up to date and readily available for inspection by Government Steamship Inspectors.
PILOTAGE: Not compulsory, however, licensed Pilots are available, if desired.
Arrivals: To avoid a delay in ordering a Pilot, Masters of vessels bound for Argentia must forward their request for Pilots to "Pilots St.John's" as follows:

First notice 12 hours prior to the ETA (GMT) at the appropriate boarding station, stating:
(a) Which boarding station the Pilot is required at.
(b) Name.
(c) Call Sign.
(d) Deepest draft.
(e) Speed.
(f) Agent.
(g) Length, breadth, moulded depth, deadweight tonnage and the largest net registered tonnage.

Second notice 3 hours prior to the ETA (GMT) at the appropriate boarding station.
Departures/Movages: First notice 9 hours prior to the ETD (Local time). Second notice 3 hours prior to the ETD (Local time).
Embarkation/Disembarkation: Masters of calling vessels are reminded of their obligation to comply with statutory rules, and are recommended to comply with the following:
(a) The Officer responsible for embarkation/disembarkation of the Pilot is a watchkeeping Officer.
(b) The pilot ladder is secure.
(c) The pilot ladder is adequately illuminated at night.
(d) Means are provided to enable the Pilot to pass safely and conveniently from the head of the pilot ladder into the ship or onto the ship's deck. Portable stanchions, if used, should be independently secured to the rail or deck, one on each side of the ladder.

(e) The ladder is in good condition and its treads remain horizontal. The treads to have a rough surface.
(f) The ladder is rigged so that each step rests firmly against the ship's side.
(g) Spreaders are provided not more than 10 ft. apart, to prevent the ladder from twisting.
(h) Manropes should be available, but should not be lowered unless requested by the Pilot.
(i) A lifebuoy with a self-igniting light and a heavy line should be available.
(j) The ladder should be rigged well clear of overboard discharge and deck scuppers.

If the pilot ladder is not safe, the Pilot may refuse to board and thus cause unnecessary delay to the ship.

APPROACHES: Entrance channel is 50 m. wide with limiting depth of 7.9 m. Turning area in harbour extends 135 m. off the wharf with limiting depth of 8.2 m. near wharf face.

RESTRICTIONS: Will be dispatched by Transport Canada, Harbours and Ports Directorate, to ship's Agent.

HEALTH: Vessels arriving from a foreign port may obtain pratique by radio from "Quarantine St.John's" at least 12 hours before arrival. Information required by Quarantine Officer shall include:

Name and nationality of the vessel.
Last port of call.
Nature of cargo.
Number of crew and passengers.
Port of destination.
Name of Agent.

Conditions of health of all on board with details of any sickness or death incurred during the voyage.

Animals, if any.

RADIO: The best radio stations to use en route to Argentia are:

St.John's Marine Radio – call sign VON.
Halifax Marine Radio – call sign VCS.
St.Lawrence Marine Radio – call sign VCP.

To avoid a delay in obtaining a Pilot, Masters of ships bound for Long Pond must report by R/T, W/T or Telex, their ETA to Vessel Traffic Management at St.John's at least 24 hours before vessels' ETA at the pilot boarding station. The times should preferably be in GMT, but whatever time is used, it should be expressly stated. ETA should be confirmed or corrected 12 hours and 6 hours prior to arrival at the pilot boarding station by R/T, W/T or Telex through VON Marine Radio Station, St.John's or via any Coast Guard Radio Station. Also see "Pilotage".

Pilotage messages may be forwarded through the nearest Canadian Coast Guard Radio Station. Direct requests can be made through St.John's Traffic Centre on VHF Channel 11.

The requirements for water, fuel and ballast should be made known to vessel's Agent in the 72 hour ETA.

TUGS: Not available.

BERTHING: Public wharf has a length of 245 m. and depth of 6.9 m. – 8.2 m.

MEDICAL: Masters are requested to notify their Agents at least 72 hours prior to arrival, advising the number of crew to see the doctor and their complaint. There are local clinics in area with full hospital facilities located in St.John's, 25 km.

CRANES: Mobile cranes and boom trucks available. Heavy lift crane pad can accommodate a 200 ton mobile crane at minimum radius.

STEVEDORES: Local labour should be arranged by Agent.

FRESH WATER: Limited quantities of fresh water available. Arrangements should be made through Agent or Harbour Master.

FUEL: Ship's bunkers are available by tank truck.

CONSULS: The following countries have Consular Representatives in St.John's:

Brazil
Denmark
France
Germany
Iceland
Italy
Malta
Netherlands
Portugal
Spain
Sweden

REPAIRS: The Agent should receive early advice of requirements, as most repairs are only available at St.John's (Radio, radar, gyro, Satnav and Loran, etc.). The technicians for such equipment work out of St.John's. The following brand names have representatives in St.John's: Racal-Decca, Marconi, Kelvin Hughes, Furono, Atlas and Sperry.

SURVEYORS: Stationed in St.John's: Lloyd's, BV, NKK, ABS, Germanischer Lloyd, Italian Registry, Russian Registry, China Corp. and Honduran Registry.

GANGWAY/DECK WATCHMEN: Usually ship's crew.

CUSTOMS ALLOWANCES: Each crew member is allowed 200 cigarettes and one 40 oz. bottle of wine or spirits per week.

REPATRIATION: No formal facilities, however, crew changes and repatriation can be carried out. Prior notice to Agent is required.

AIRPORT: Nearest airport is St.John's, 25 km. away.

POLICE/AMBULANCE/FIRE: The Police, Fire Department and Ambulance Service are located in the area.

EMERGENCY CO-ORDINATION CENTRE: Canadian Coast Guard, Placentia Traffic, Tel: 709-227-5731 or VHF Channel 16.

BANKS: Several Canadian Banks provide service in the Placentia area.

TIME: GMT minus 3.5 hours. First Sunday in April clocks advance 1 hour. Last Sunday in October clocks retard 1 hour.

SERVICES: *Supplies and Laundry:* Stores and provisions have to be obtained in St.John's. In order to avoid delays, Agent should be notified prior to arrival of the vessel's requirements. Stores and supplies will be delivered by truck at the dock.

SHORE LEAVE: In order to comply with Immigration Regulations, crew should be carefully checked before sailing, and any missing crew member reported to Agent.

In case of crew members left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances (if any) and also instructions for repatriation. An Immigration Bond may be required.

GARBAGE DISPOSAL: Arrangements must be made through Agent.

WASTE OIL DISPOSAL: Arrangements must be made through Agent.

SEAMAN'S CLUBS: None locally. Facilities available at St.John's (25 km.).

CURRENCY: Canadian Dollar.

CHARTS: Canadian Hydrographic Charts No. 4581 and 4848.

GENERAL: Masters are strongly advised to contact their Agent 72 hours, 48 hours, 36 hours, 24 hours, 12 hours and 6 hours with ETAs. In the 72 hour message, Masters should advise all port requirements.

AUTHORITY: Transport Canada, Harbours and Ports Directorate, Newfoundland Region, P.O.Box 1300, St.John's, Newfoundland A1C 6H8, Canada. *Tel:* (709) 772-5154. *Telex:* 016-3369. *FAX:* (709) 772-5127. *Contact:* D.A. Lester, Regional Manager, Harbours and Ports.

LOUISBOURG, Nova Scotia: 45.55 N. 59.58 W.

LOCATION: On the North side of N.E. arm of Louisbourg Harbour, S.E. Coast of Cape Breton Island, Nova Scotia.

PILOTAGE: Pilotage is not compulsory, but if required, may be arranged through Pilots Cape Breton.

ANCHORAGE: Safe anchorage anywhere clear of the ship channel leading to docks.

RESTRICTIONS: *Navigation Season:* Port open all year. No ice forms sufficiently to hinder shipping

Channel depth: Lowest depth at low tide in ship channels is 30 ft. Draft of largest vessel (8,000 g.r.t.) to enter port was 30 ft. 6 in. Tides rise 4 ft. to 5 ft.

HEALTH: Quarantine Station is in the South West harbour. Health officers board vessels at wharves.

RADIO: Sydney Radio (VCO).

BERTHING: (1) Small Craft Harbours Wharf: Berthing length 530 ft., depth alongside at LW 19 ft., used for general freight. The inner 181 ft. of the wharf is open faced creosoted timber cribwork. The next 217 ft. is of steel sheet pile encased creosoted timber pilework driven through remains of timber cribwork. The remaining outer stem portion and the "T" are of concrete crib construction. The limiting loads are 300 pounds per square foot on the timber cribwork section and 500 pounds per square foot on all other sections.

(2) Louisbourg Fisheries Wharf: 300 ft. long and 60 ft. wide, of concrete construction. Across the head of the wharf there is 20 ft. to 21 ft. of water alongside at LW. From the head of the wharf towards shore the depth decreases from 20 ft. to 15 ft. In addition, there are several smaller wharves in the harbour with 20 ft. and less depth alongside at LW. Administered by Small Craft Harbours.

MEDICAL: Hospital at Sydney.

FRESH WATER: Available.

FUEL: Fuel and diesel oils can be secured from tank wagons or in barrels – no ship storage in bulk. Light diesel oil on pipelines to wharves.

REPAIRS: No facilities available.

SURVEYORS: Lloyd's, Bureau Veritas and American Bureau at Halifax.

GENERAL: *Services:* Post Office, Telegraph, Telephone, Customs.

Trade: Exports: Fish. Imports: General Merchandise.

Charts: Canadian Charts No. 4375 and 4376.

Provisions: Available.

AUTHORITY: Department of Fisheries and Oceans, Small Craft Harbours Branch, P.O. Box 1085, Sydney, Nova Scotia B1P 6J7. *Tel:* (902) 564-7362. *Contact:* E. P. Gibney, District Manager.

Local Authority: C. G. Shaw, Transport Canada – Harbour Master and Fisheries and Oceans – Harbour Manager. *Tel:* 733-2117.

MARYSTOWN, Newfoundland: 47.10 N. 55.09 W.

(See Plan)

LOCATION: Located on the shore of an inlet in the Southwest part of Mortier Bay. Mortier Bay is located on the West side of Placentia Bay. The navigational season is year round.

PILOTAGE: Not compulsory, but can be arranged by reporting via any coastal radio station by radiotelephone or radiotelegraph to Pilots, Marystown. 48 hours, 24 hours and 12 hours ETA required. Time must be GMT.

BERTHING: Public wharf with length 36 m. and depth of 6.2 m. Private wharves consist of the Fishery Products Wharves: 60 m. long with 5.5 m. depth and 55 m. long with 10.7 m. depth. The oil rig servicing base, operated by the Marystown Shipyard has an L-shaped wharf extending 115 m. long by 44 m. with a depth of 15 m. This facility also has a stern loading ramp that is 33 m. wide with a depth of 5.0 m.

The Marystown Shipyard has a marine syncrolift that is 76.2 m. long by 18.3 m. wide with a lifting capacity of 3,000 tonnes. The wharves at this yard are 137 m. long with 7.3 m. depth, 73 m. long with 6.1 m. depth, 61 m. long.

STEVEDORES: Ordered by Agent.

MEDICAL: No advanced notice required unless serious emergency. Hospital facilities available.

FRESH WATER: Available.

FUEL: Available.

CONSULS: Nearest Consuls are situated in St.John's, which is approximately 300 km. away.

REPAIRS: Possible at Marystown Shipyard.

GANGWAY/DECK WATCHMEN: Usually crew.
AIRPORT: St.John's, 300 km. away and Gander, 313 km. away.
GENERAL: *Officials:* Harbour Master and Customs available.
Services: Supplies available.
Charts: Canadian Chart No. 4587.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, P.O.Box 1300, St.John's, Newfoundland A1C 6H8, Canada. *Tel:* (709) 772-5154. *FAX:* (709) 772-5127. *Contact:* D.A. Lester, Regional Manager, Harbours and Ports.

MATANE, Quebec: 48.51 N. 67.34 W.

LOCATION: On the South shore of the St. Lawrence River, approximately 400 km. from Quebec City.
PILOTAGE: Not compulsory but available.
APPROACHES: Channel depth 8.5 m. (extreme low tide).
RESTRICTIONS: The harbour is open all year round, but occasionally assistance of ice-breakers may be required.
HEALTH: Radio Pratique available.
RADIO: Mont-Joli, call sign VCF.
TUGS: Available, but not required by power-driven vessels.
BERTHING:

Section	*Length* (m.)	*Depth* (m.)
1	186	10.0
2	92	4.9
3	120	4.0

CRANES: Available on request.
STEVEDORES: *Working Hours:* Monday to Friday, 0800 hrs. – 1700 hrs. Sunday and holiday work possible with advance notice.
MEDICAL: Hospital at Matane.
DENSITY: 1025.
FRESH WATER: Available on request.
FUEL: Light fuel and diesel oil available.
REPAIRS: Minor repairs possible.
DRY DOCK: Nearest dry dock located at Les Mechins (30 miles from Matane).
AIRPORT: At Mont-Joli.
TIME: GMT minus 5 hours in Winter. GMT minus 4 hours in Summer (first Saturday of April to last Saturday of October).
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday of May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday of September), Thanksgiving (2nd Monday of October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).
GENERAL: *Formalities:* Port of entry for customs (Rimouski) and immigration. Quarantine services also available by radio or telephone.
Chart: Canadian Chart No. 1236.

SHIPMASTER'S REPORT: November, 1983.
Pilotage: Optional; advisable on first visit. Pilot can be requested by telephoning (418) 562-3201 or 4083, or by contacting the Harbour Master's Office during office hours.

Pilot boards vessel 1 mile off the entrance.
Anchorage: In the river, 1 mile from the West breakwater, in depths of 9 m. – 18 m. Bottom mud.
Max. Size: Up to 30,000 d.w.t., length 175 m. (575 ft.) and max. draft 8.5 m. (28 ft.).
Health: Pratique is granted on arrival.
Radio: Mont-Joli: VCF.
VHF: Harbour Authority has no VHF.
Berthing: Matane is on St. Lawrence River South Shore, 36 miles above Cap Chat. The new harbour is 2 miles West of the town and open to traffic throughout the Winter.

Two breakwaters protect and form Matane harbour, which provides a commercial quay of 183 m. (600 ft.) with 8.2 m. (27 ft.) depth alongside.

An underwater oil pipeline extends 600 m. seaward N.E. and parallel with the N.E. breakwater. The seaward end in 6 m. of water, is marked by a buoy.

Entry direct from the river. The 150 m. (500 ft.) wide entrance between the breakwater heads faces N.E. In the Autumn, strong N.E. winds send in a heavy sea.

Max. tidal rise is 4.4 m. (14 ft. 6 in.). The mean tidal rise: MHWS 3.4 m. (11 ft.), MHWN 2.7 m. (9 ft.) and MLWN 1.2 m. (4 ft.).
Stevedores: Good supply of labour available.
Medical: Full range of medical services available.
Density: 1013.
Fresh Water: Laid on to berth. Has to be reconnected in Winter season, which makes it expensive.
Fuel: Light fuel and diesel oil available.
Customs: Matane is a port of entry.
Airport: Daily flight to Montreal.
General: Port used mainly for Canadian timber exports.

AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980.

G. Desrosiers, Harbour Master – Matane. *Tel:* (418) 562-0042, 562-0986, 562-1842.

MONT-LOUIS, Quebec: 49.14 N. 65.44 W.

LOCATION: Located on the South shore of the St. Lawrence River, 300 nautical miles downstream from Quebec City.
PILOTAGE: Not compulsory but available.
ANCHORAGE: In the Bay in 6 fathoms, mud bottom. There is not much room to work out from this anchorage.
RESTRICTIONS: The harbour is open year round, but occasionally assistance of ice-breakers may be required.

Some Masters have found the port and certain berths in it hazardous during bad weather. Shipmasters are advised to take the advice of the local ships' Agents in this respect.
Channel: Approach channel depth 9.1 m. Tides rise 9.5 ft. at Springs and 7 ft. at Neaps.
HEALTH: Pratique available by radio.
RADIO: Fox River (VCG).
TUGS: None available.
BERTHING: (1) Transport Canada Wharf on West shore of bay. All access at this wharf is prohibited, at present this wharf is falling into ruins.

(2) Transport Canada Wharf, located on the East side of the bay, 403 ft. long and 47 ft. wide at outer end, having a depth of 30 ft. at its outer end.
CRANES: Available on request.
STEVEDORES: *Working Hours:* Monday to Friday, 0800 hrs. – 1700 hrs. Sunday and holiday work possible with advance notice.
MEDICAL: Hospital at Ste. Anne des Monts, 90 km. to the West.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Diesel oil available.
REPAIRS: Minor repairs only.
DRY DOCKS: Nearest dry dock located at Les Mechins (56 miles from Mont Louis).
AIRPORT: Matane and Gaspe.
TIME: GMT minus 5 hours in Winter. GMT minus 4 hours in Summer (first Saturday of April to last Saturday of October).
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday of May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday of September), Thanksgiving (2nd Monday of October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).
GENERAL: *Services:* Post Office, Telephone, Provisions.
Charts: Canadian Chart No. 1230 (Mont-Louis Bay Inset).
Transportation: Good highway connects with coastal villages and Quebec. No railroad.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980.

N. Bernachez, Harbour Master – Mont-Louis. *Tel:* (418) 797-2491.

MONTREAL, Quebec: 45.30 N. 73.33 W. (See Plan)

DOCUMENTS:
3 copies Crew Lists.
3 copies Passenger Lists.
3 copies Customs Documents.
3 copies Health Documents.
3 copies Manifests.
3 copies Bills of Lading.
3 copies Ship's Papers.
PILOTAGE: Compulsory. Pilots board inbound vessels at Anse-aux-Basques (near Les Escoumins) to bring ships as far as port of Quebec where Pilots are exchanged for the trip to Trois-Rivieres. Pilots are again exchanged at Trois-Rivieres before ships may proceed to Montreal.

For further information refer to "Quebec".
ICE ADVISORY SERVICE: Ships inbound from seaward between December 15th and April 15th should advise "Ice St. John's" 36 hours prior to reaching 58° 00′ W., Cabot Strait or the Strait of Belle Isle, stating the name of the vessel, the position, speed, destination, whether loaded or in ballast, Classification Society, Ice Class (if any) and agency in Canada. This procedure will facilitate the passing of ice information to the ship as necessary.

Ice information is also available from Coast Guard Marine stations at regular scheduled broadcast times or upon request. For more information consult the "List of Radio Signals". Updated ice charts are also transmitted by faxsimile from Coast Guard Radio Stations at scheduled broadcast times.

Ice St. John's can be contacted through the following radio stations:

VON	St. John's
VCS	Halifax
VOO	Comfort Cove
VCO	Sydney
VCM	St. Anthony
VAU	Yarmouth

Master should obtain Canadian Coast Guard publication "Ice Navigation in Canadian Waters". This book will explain ice breaker procedure and sound advice for ice navigation.
ANCHORAGE: Available at Lanoraie, approx. 3 miles above Sorel harbour limits, and at Pointe-aux-Trembles anchorage below Berth 110. Also opposite Grain Elevator No. 4. Boatmen services are available to vessels at anchor.

Anchorages will be allocated by the Harbour Master (Montreal), through the Vessel Traffic Services Centre, Montreal.
MAX. SIZE: Entry only restricted by draft. Main channel depth is 11.00 m. Channel 243.8 m. wide at narrowest point.

HEALTH: Except in case of coastwise vessels free of disease and arriving in Canada from ports or areas that are not infected, every vessel coming from a port outside Canada is inspected by the Quarantine Officer, and shall not make customs entry until it has received pratique.

"Coastwise Vessel" means a vessel operating exclusively between Canada and the island of St. Pierre and Miquelon or between Canada and the United States, including Alaska. A "coastwise vessel" loses coastwise status and is subject to quarantine inspection on its next arrival at a Canadian port when at any time it touches a foreign port other than those mentioned above.

Where sufficient quarantine information can be given by wireless, Radio Pratique may be obtained between the hours of 0900 and 1700 the day preceding arrival:

- *(a)* From "Quarantine Halifax" by vessels bound for Halifax, Nova Scotia.
- *(b)* From "Quarantine Saint John" by vessels bound for Saint John, New Brunswick.
- *(c)* From "Quarantine Quebec" by vessels approaching Canadian ports via the Saint Lawrence River.

For the purposes of Radio Pratique vessels are required to give the following information:

- *(a)* Name and nationality of vessel.
- *(b)* Ports called at during voyage.
- *(c)* Date and place of last fumigation or Derat Exemption Certificate.
- *(d)* Nature of cargo.
- *(e)* Number of crew.
- *(f)* Number of passengers.
- *(g)* Port of destination and name of Agent.
- *(h)* Number of persons without valid vaccination certificates.
- *(i)* Condition of health of all on board with details of any sickness or death which has occurred during the voyage.

Vessels proceeding directly into the Seaway may now receive quarantine inspection and clearance while at anchor awaiting entrance to the Seaway.

RADIO: All communications via Montreal Radio, call sign VFN. Vessel Traffic Services handle VHF traffic as follows: Between Yamachiche and Cap St. Michel, VHF Channel 9 (156.45 MHz.). From Cap St. Michel to Montreal, VHF Channel 10 (156.50 MHz.). Ship to ship communication, VHF Channel 6, (156.3 MHz.). Port radar service available.

TUGS: 8 tugs, 1,000 h.p. – 1,600 h.p.

FRESH WATER: Available by pipeline at most berths.
FUEL: All grades can be delivered at oil companies' terminals; also by bunker barges to vessels lying anywhere in the harbour.

Dock and Location: Berth 76, East Montreal.
Operator: Terminal Norcan Inc., 6370 Notre Dame St. East, Montreal, Quebec H1N 2E1. Tel: (514) 253-2222. Contact: Daniel Carrier.
Storage Capacity (Barrels): 1,000,000.
Length of Dock: 156.4 m.
Depth at Dock: 10.7 m.

Dock and Location: Berth 94, East Montreal.
Operator: Olco Petroleum Group Inc., 2561 Georges V, Montreal, Quebec H1L 6J7. Tel: 645-6526. Contact: Louis Senechal, Dock Manager.
Type of Dock: Loading and unloading.
Type of Cargo Handled: Crude oil, gasoline, stove oil, marine fuel oil, marine diesel fuel, No. 2 fuel oil, No. 6 fuel oil.
Size of Pipelines: 16 in.; 12 in. and 10 in.; 10 in.; 12 in.; 12 in.; 12 in.; 12 in.
Storage Capacity (Barrels): 1,000,000; 430,000; 80,000; Production capacity: 15,000; 400,000; 300,000.
Distance from Dock to Storage Tanks: 3.5 miles; 1,500 ft.; 1,500 ft.; 3.5 miles.
Length of Dock: 238.05 m.
Depth at Dock: 10.67 m.

Dock and Location: Berths 95, 96 and 97.
Operators: Terminal Montreal Est (T.M.E.) Ltd., 11650 Metropolitan Boulevard E., Montreal, Quebec H1B 1A5. Tel: (514) 640-9361. Contact: Jacques Riendeau, Terminal Assistant.
Type of Dock: Oil – loading and unloading, marine bunkering. Type of cargoes handled: Asphalt, distillate, bunker 'C'. Marine bunkers: A complete range of marine blended fuel oils, marine diesel, marine gas oil, marine bunker 'C', fresh water. Storage capacity: 1,800,000 barrels. Distance from dock to storage: 0.5 km. (1,500 ft.). Length of dock: 404.8 m. and water depth alongside varies from 9.1 m. to 10.7 m.

Dock and Location: Berth 101 E., 102 E. and 102 W.
Operator: Imperial Oil Products and Chemicals Division, 10515 Notre-Dame E., Montreal, Quebec H1B 2T9. Tel: (514) 640-2600. Contact: Donald Gwilliam, Tel: (514) 640-2613.
Type of Dock: Loading and unloading, bunkering.
Type of Cargo Handled: Used for loading and unloading. Both 101 E and 102 E handle gasoline, aviation and jet fuels, mid-distillates, crude, bunker, asphalt and specialty products as well as bunkering vessels with all grades of marine fuel oils (Berth 102 W is used exclusively by Marine Bunkering Barge).
Size of Pipelines: 16 in.; 12 in.; and 8 in.; 10 in.; 12 in.; 12 in.; 16 in. and 12 in.
Storage Capacity (Barrels): 3,000,000. Total storage capacity rotated by products depending on seasonal demands.
Distance from Dock to Storage Tanks: 2,800 ft.
Length of Dock: Inside 97.5 m. Outside 385 m.
Depth at Dock: 4.6 m. and 10.7 m.

Dock and Location: Berth 103 S. & 103 N. Montreal East.
Operator: Shell Canada Ltd., 10501 Sherbrooke St. East, Montreal, Quebec H1B 1B4. Tel: (514) 645-1661. Contact: C. Demers, Dock Supervisor. Tel: (514) 640-3366.
Type of Dock: Loading and unloading.
Type of Cargo Handled: Gasoline, stove oil, furnace oil, chemicals, jet fuel, aviation fuel, marine diesel, bunker "C", thin fuels 200 secs./3,500 secs.
Size of Pipeline: 2–10 in.; 2–12 in.; 20 in.
Storage Capacity (Barrels): 4,000,000.
Distance from Dock to Storage Tanks: 1.75 miles.
Length of Dock: 2×189.6 m.
Depth of Dock: 10.7 m. S., 9.1 m. N.

Dock and Location: Berth 104.
Operator: Sunoco Inc., 11055 Victoria Street, Montreal, Quebec H1B 2N6. Tel: (514) 645-6599. Fax: (514) 645-4515. Contact: Lionel Croteau, Superintendent.
Type of Dock: Loading and unloading.
Type of Cargo Handled: Gasoline and No. 1 and No. 2 fuel oil.
Storage Capacity (Barrels): 7 tanks of 50,000; 2 tanks of 25,000.
Distance from Dock to Storage Tanks: 500 m.
Length of Dock: 32 m. but can accommodate vessels up to 148 m.
Depth at Dock: 9.1 m.

Dock and Location: Berths 105 and 106 E.
Operator: Ultramar Canada Inc., 7000 Marien, Montreal, Quebec H1B 4W3. Tel: (514) 640-2333. Contact: Andre Rehault, Operations Manager.
Type of Dock: Loading and unloading.
Type of Cargo Handled: Crude oil; gasoline; light fuels; marine gasoil; marine diesel; medium fuels 200 secs/3,000 secs; bunker "C".
Size of Pipe-lines: 12 in. and 8 in.; 10 in.; 3–8 in.
Storage Capacity (Barrels): 6,300,000 total storage capacity rotated by products depending upon production requirements.
Distance from Dock to Storage Tanks: 1 mile.
Length of Dock: 232.5 m.
Depth at Dock: 9.45 m.

Dock and Location: Sections No. 109 and 110 E.
Operator: Petro-Canada, 11701 Sherbrooke Street East, Montreal, Quebec H1B 1C3. Tel: (514) 640-8000. Contact: Serge Rivard, Superintendent. Tel: (514) 640-8240.
Type of Dock: Loading and unloading.
Type of Cargo Handled: Gasoline, stove oil, furnace oil, chemicals, jet fuel, aviation fuel and marine diesel.
Storage Capacity (Barrels): 650,000; 900,000; 300,000; 540,000.
Distance from Dock to Storage Tanks: 0.75 mile.
Length of Dock: 440.1 m.
Depth at Dock: 10.7 m.

NANAIMO, B.C.: 49.10 N. 123.57 W. (See Plan)

DOCUMENTS:
3 copies Crew List Form IMM.200.
1 copy Passenger List.
3 copies Ship Stores E.1.
3 copies Crew Declarations Y.14.
1 Quarantine Certificate.
Manifest from previous Ports.

PILOTAGE: Compulsory. Pilots board off Victoria. Pacific Pilotage Authority – Tel: 666–6771.
ANCHORAGES: 5 deep sea anchorages to the West of Newcastle and Protection Islands.
RESTRICTIONS: No restrictions on Nanaimo Assembly Wharf or Duke Point. Harmac Wharf restricted from 2045 to 0700 hrs.
MAX. SIZE: Controlling depths: Harbour entrance, 17.37 m. at HW and 13.41 m. at datum. Minimum controlling depth for inner portion of harbour: Approach to "A" and "B" Berths 8.0 m.; "C" Berth 9.0 m. Mean range of tide 3.2 m., with maximum range of 4.9 m.
HEALTH: Pratique granted at Victoria, B.C.
RADIO: Vancouver Radio and Nanaimo Radio, VHF Channel 87.
VHF: Nanaimo Radio on Channel 16. Vancouver Traffic Management on Channel 11.
TUGS: Join vessel at Gallows Point, Protection Island. Ship's lines used if necessary. Available all hours in and out and as required by Pilot.
BERTHING: *Assembly Wharf:*
Berth "A" – Length 182.88 m. Depth alongside: 10.1 m.
Berth "B" – Length 182.88 m. Depth alongside: 12.4 m.
Berth "C" – Length 182.88 m. Depth alongside: 10.9 m.
Coastwise – Length 60.96 m., scow and barge berth.
60 tonne barge ramp.
Terminal Area – 15 ha. paved, 8,332 sq.m. warehouse space.
Duke Point Deep Sea Terminal:
Berth "D" – 170.0 m. long, LW depth 13.5 m.
100 tonne barge ramp.
Terminal area – 6 ha. of paved storage area. Additional 19.5 ha. of storage area available adjacent to barge ramp facility.
Cruise Ship Facility: The "Visiting Ship Pier" is a floating structure with length 180 m. and depth of 8.5 m. at L.W. is located in the inner harbour. Vessels of 3,000 tons displacement and LOA 113 m. (370 ft.) can be accommodated, and larger vessels can be accommodated, subject to approval of Harbour Master. Potable water and sewage connections available.
Private Wharves:
MacMillan & Bloedel Ltd:
(1) Harmac Pulp Wharf – 115 m. long, LW depth 10.00 m.
(2) Harmac Lumber Wharf – 137 m. long, LW depth 10.40 m.
CP Rail Coastal Marine Wharf:
N.E. side – condemned.
S.W. side – (guide pier) – 79 m. long, LW depth 9.14 m.
Canadianoxy Chemicals Ltd.:
Wharf – 70.00 m. long, LW depth 9.20 m.
Imperial Oil Ltd.:
Wharf – 48.76 m. long, LW depth 6.10 m.
Petro Canada Inc.:
Wharf – 14.00 m. long, 33.5 m. between dolphins, LW depth 4.88 m.
BULK CARGO FACILITIES:
Exports: Lumber, pulp and other related forest products.
STEVEDORES: Ordered by Agent, 16 hours minimum notice.
MEDICAL: No advance notice except in case of serious illness, to be included in arrival cable. Hospital facilities available.
TANKERS: Tanker berths at private companies' wharves where own line restrictions apply. See "Berthing".
DENSITY: Average density in port is 1019.5.
FRESH WATER: Available at all berths. Delivery by hose at $1.30 per metric ton plus connection fee.
FUEL: Bunkering by tanker truck and barge.
FIRE PRECAUTIONS: No other specific precautions except during extreme heat when smoking may be prohibited on wharf adjacent to lumber.
CONSULS: None.
REPAIRS: Possible.
DRY DOCKS: Nanaimo Shipyard - Max. 200 ft. and 600 tons. (Also see "Vancouver").
SURVEYORS: Arranged by Agent.
GANGWAY/DECK WATCHMEN: Services not necessary but security guards are available.
OPENING/CLOSING HATCHES: Either crew or stevedores whichever to ship's advantage.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 1 lb. tobacco and 15 cigars per crew member per week. Wine and/or Spirit: 40 oz. per week per crew member. Beer: No restrictions.
REPATRIATION: Facilities exist in Vancouver.
AIRPORT: Nanaimo Airport 16 km. South of port, serviced by various airline companies.

Scheduled Seaplane service from Nanaimo Harbour to Vancouver Harbour. Charters available.

TIME: Pacific Standard Time, 8 hours behind GMT. Daylight Saving Time in effect from early April to late October.
HOLIDAYS:
(1) Good Friday, Easter Monday, Victoria Day (May 24th), Canada Day (July 1st), British Columbia Day (August 1st), Thanksgiving, Remembrance Day (November 11th) and Boxing Day (December 26th), crews are available at overtime rates by arrangement.
(2) No cargo work on Labour Day, Christmas Day and New Year's Day except in the case of emergency.
(3) Crews cease work at 1200 hrs. on December 24th until 0100 hrs. December 26th; also from 1200 hrs. December 31st until 0100 hrs. January 2nd.

POLICE/AMBULANCE/FIRE: Police: 753-2212, non-emergency – 754-2345; Fire: 753-1234, non-emergency 753-7311; Ambulance: 758-8181.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard Search and Rescue Emergency – Tel: 1-800-742-1313.
TELEPHONES: Available for each vessel.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Can be arranged through agent if reasonable notice given.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Canadian Dollar.
DEVELOPMENTS: The turning circle will be dredged in 1994/95 in order to increase the minimum controlling depth to 8.5 m.
AUTHORITY: Port of Nanaimo, P.O. Box 131, Nanaimo, British Columbia, Canada V9R 5K4. *Tel:* (604) 753-4146. *FAX:* (604) 753-4899. *Contact:* W.E. Mills, Port Manager and Chief Executive Officer (Tel: (604) 753-4146). Kevin G. Obermeyer, Director of Marine Operations and Harbour Master.

NANISIVIK, N.W.T.: 73.04 N. 84.32 W. (See Plan)

DOCUMENTS: Standard Canadian documents, See "Montreal".
PILOTAGE: No pilotage.
ANCHORAGE: Anchorage can be obtained 15 miles within the entrance of Strathcona Sound, 8 cables off the South shore of the Sound in a berthing depth of 69 m. (228 ft.), clay. Good anchorage is reported to be available in English Bay in a depth of 15 m. (48 ft.).
RESTRICTIONS: Vessel must comply with Canadian Arctic Pollution Regulations which govern earliest and latest dates permitted within Arctic zones depending on vessel's ice classification, nature and quantity of cargo and fuel.
MAX. SIZE: Draft must not exceed approx. 40 ft. alongside dock. Mooring facilities feasible for vessels up to 50,000 tons gross but may prove awkward for those over 20,000 tons gross especially under S.E. wind conditions.
HEALTH: See Iqaluit (Frobisher Bay). Customs Officer (R.C.M.P.) acts as Quarantine Officer.
RADIO: Vessels bound North should pass messages through Iqaluit (Frobisher Bay) VFF until into Lancaster Sound where communications regarding ETA, etc. are relayed via Resolute Bay VFR.

Nanisivik Mines no longer has regular HF radio communications available on frequency 4145.0 kHz for ship-to-shore contact.

VHF: Channel 16 monitored once arriving vessels have entered Strathcona Sound en route to port of Nanisivik. Channel 6 monitored as standby.
BERTHING: No special requirements. The dock consists of three parallel 70 ft. wide cells which are 55 ft. apart. The centre cell supports the shiploader. The right and left hand cells each have two bollards (See "plan") each with an additional bollard 150 ft. in from the dock face. To the East and West of the dock there are dolphins supporting single bollards. To connect to these the ship's bow and stern lines are towed ashore and attached to a 0.5 in. diameter × 600 ft. heaving line. Once ashore the lines are shackled to a 3.25 in. diameter × 380 ft. mooring line which is secured to the bollard. The lines are then taken up and made fast.
CRANES: The only shore cranes available are mobile units when they are not in service by the mine.
BULK CARGO FACILITIES: One fixed shiploading gantry capable of loading 100 tonnes per hour. The facilities are automatically shut down when winds exceed 50 m.p.h.
STEVEDORES: As per contract with Nanisivik Mines Limited.
MEDICAL: The community has a large modern nursing station with a full time nurse and occasionally a doctor. No advance notice required. Transportation provided by mine vehicles. For serious medical cases vessels should radio in advance so air transportation can be arranged to Iqaluit (Frobisher Bay) hospital.
DENSITY: Density varied with ice conditions and tides. Note — When reading densities it has been found that different readings have been found at different depths due to ice melting.
FRESH WATER: Available by tank truck through Nanisivik Mines Limited.
FUEL: Not available.
REPAIRS: Minor repairs only i.e. welding, etc., by mine personnel.
SURVEYORS: Not available. Nearest availability is Montreal, Quebec.
GANGWAY/DECK WATCHMEN: Not obligatory but recommended due to sudden changes in wind and tide. Nanisivik Mines Ltd. provide gangway.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: Standard Canadian allowance except no beer or alcohol permitted ashore. This restriction strongly upheld by R.C.M.P.

REPATRIATION: Crew changes can be effected 3 times weekly, Mondays at 1330 hrs. local time, to Ottawa, Ont., via First Air, Wednesday at 1600 hrs. local time, to Yellowknife, NT, via First Air, Thursdays at 1600 hrs. local time, to Ottawa, Ont., via First Air. Mine requires one weeks notice through the Port Authority for loading arrangements.
AIRPORT: Approx. 8 miles from dock, transportation provided courtesy of mine.
TIME: GMT minus 4 hours during Summer months (shipping season).
EMERGENCY CO-ORDINATION CENTRE: Canadian Coast Guard, Ottawa, Ontario. Tel: (613) 996-9788, Telex: 053-3128.
TELEPHONES: Not available on or near dock. Phone calls can be made from the mill offices or in the community.
BANKS: There are no banks in the community. However, the local Northern Store has cash machine facilities.
STORING: See "Prelims". Items 1, 2, 5, 6 not applicable. Items 3 and 4: Trucks and forklift trucks can proceed alongside at the berth.
SHORE LEAVE: Permitted.
GARBAGE DISPOSAL: Garbage pick-up available by truck. Garbage has to be in plastic bags. Charge is at an hourly rate.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: The community is dry.
There is a recreation centre with a swimming pool.
CURRENCY: Canadian Dollar.
AUTHORITY: Nanisivik Mines Limited, P.O.Box 225, Nanisivik, N.W.T., Canada X0A 0X0. *Tel:* (819) 436-7472. *FAX:* (819) 436-7435. *Contact:* John Goyman, Mill and Material Services Superintendent.

NEW RICHMOND (Black Cape), Quebec: 48.08 N. 65.50 W. (See Plan)

LOCATION: On the North Shore of (Cascapedia Bay) Baie des Chaleurs in the municipality of New Richmond.
ANCHORAGE: Outside Black Cape Wharf. Masters are instructed not to anchor in the area of the effluent line to the West of the wharf (See "Plan").
RADIO: Ship to shore through Grindstone (VCN) or Fox River (VCG). Calling Frequency 2182 kHz.
Arrival Advice: 72, 48, 24 hours prior to arrival.
VHF: Consolidated Bathurst Inc.
Frequencies: 156.500 kHz (Simplex)
Channel No.: 10 (Marine traffic control)
Station location: New Richmond, Quebec, Canada
Co-ordinates: Lat. 48° 09′ 24″ N., Long. 65° 50′ 06″ W.
Call Sign: X 00749
Operating range is about 20 miles.
TIME: Atlantic Standard Time. Daylight Saving time is observed.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Canadian Dollar.
GENERAL:
Charts: B.A. Chart No. 1715.
Tides: Atlantic Coast Tide and Current Tables.
Prevailing Winds: Southwest.
Port of Reference: Pointe St. Pierre.

SHIPMASTER'S REPORT: May 1979.
Approaches: Straightforward. We used Canadian Chart 4486 – Baie des Chaleurs. The light on the end of the pier is a rotating beacon type, which shows both Green and White on one rotation. The pier is a good Radar target, but is not conspicuous from seaward in daylight.
Anchorage: Vessels may anchor off the pier as convenient (See "Anchorage" above). We did not anchor, but we would imagine the holding ground to be good, as we found stiff clay in the vicinity of the pier.
Berthing: There are no tugs or Pilots at New Richmond. In good weather conditions, such as we experienced, berthing and unberthing present no difficulties. Caution should be exercised, since the tide and prevailing winds set across the pier.

An offshore anchor let go about 2 cables off the pier head, was found to be most useful arriving and leaving. We let the cable run to one shackle on deck. This is a little too much, for it was found necessary to slack away to 4 shackles in order to get the ship alongside. In good weather, the anchor just on the bottom should be sufficient. Line handlers should be arranged with Consolidated prior to arrival. There is no lineboat.

We berthed head in, starboard side to, on the West side of the New Wharf.

The 17 ft. depth is only available for a length of 400 ft., so vessels of greater length will find their stern overhanging. For plan of soundings taken at LW (See "Plan").
Departure: The vessel was backed easily down the pier, heaving in the cable at the same time and carrying down a bresting line to use as a check if necessary. One shackle of cable should be left out to assist with turning the vessel off the pierhead. This turn should be as short round as possible and care should be taken to keep as near as possible on the line of the axis of the pier while making it. We strayed a little to the Eastwards, but maintained a minimum depth of water of 11.5 m. while making the turn.

The pier is unlighted and it is not advisable to berth during the hours of darkness. Sailing in the dark presents no problem, as the ship's decklights proved adequate.
Density: 1016.
Agency: Matters were attended to by the Consolidated Warehouse Manager.
Documents: New Richmond was our second Canadian port and the only documents required were 2 copies of Crew List and clearance from previous port.
Officials: The only official person encountered was the local Customs Officer, who was pleasant and obliging.
Cargo Work: Normal hours of work are 0800 hrs. to 2200 hrs., with breaks from 1200 hrs. to 1300 hrs., 1500 hrs. to 1520 hrs. and from 1700 hrs. to 1720 hrs.

Vessel loaded 448 tonnes of Linerboard rolls, using 2 gangs and ship's gear. Rate of loading, nett time per gang-hour, was 27 tons. The stow was not of very good quality and a lot of chocking and securing was required on completion of loading.

The cargo is brought down to the pier by road transport and waits some time there before being loaded. On a wet day, many rolls will get wet, as Consolidated do not have sufficient covers for all trailers.
General: The pier is some miles from the town of New Richmond.

AUTHORITY: Stone-Consolidated Inc., Division Chaleur, New Richmond, Quebec Province, G0C, 2B0. *Tel:* (418)-392-2133. *Telex:* 014-43111. *FAX:* (418) 392-6668. *Contact:* J. Pierre Savard.

NORTH SYDNEY, N.S.: 46.16 N. 60.13 W. (See Plan)

DOCUMENTS:
3 Copies Crew List IMM.200.
3 Copies Ships Stores E1.
3 Copies Crew Declarations Y14.
Required ship information.
PILOTAGE: Compulsory. Pilotage distance is approximately 12 miles and administered under the Atlantic Pilotage Authority. Pilot boarding station is Lat. 46° 20′ 30″ N., Long. 60° 07′ W. ETA should be addressed to "Pilots Cape Breton" 12 hours beforehand with confirmation at 6 hours.
ANCHORAGE: The land-locked harbour affords safe anchorage for a large number of any size vessels with depths ranging from 40 ft. – 60 ft.
Vessels can anchor in depths ranging from 9.15 m. to 12.8 m., with mud bottom. Depth at entrance 11.9 m.
RESTRICTIONS: Open year round. During Winter months January/March drift ice can be expected. However, vessels can be assisted by Canadian Coast Guard (Ice Operations).
The controlling depth is 38 ft. at lowest normal tides with average rise and fall from 3 ft. – 5 ft.
MAX. SIZE: See "Berthing".
HEALTH: See "Sydney".
RADIO: Sydney Coast Guard Radio.
TUGS: Available from Sydney.
BERTHING:
Marine Atlantic: Private pier used for ferries carrying passengers and freight daily to Newfoundland. There is 1 transit shed and 2 Ro/Ro berths to handle passenger car, truck and rail car loadings. The depth of water varies from 20 ft. to 29 ft.
Transport Canada Wharf: Section 1 – Length 130 m., with depth 7.3 m. – 7.9 m.
Section 2 – Length 127 m., with depth 7.9 m.
Section 3 – Length 30 m., with depth 7.9 m.
Pier accommodated with power, telephone, fresh water and night lighting. Paved open storage area and 640 sq.m. transit shed provides facilities for handling various commercial cargoes.
Private Freight and Fish Plant Wharves: Range up to 250 ft. in length and have a 12 ft. – 16 ft. depth at LW.
FRESH WATER: Available at all wharves.
FUEL: Fuel oil and diesel oil available. See "Sydney".
REPAIRS: Sydney Engineering & Dry Dock Co. Ltd., P.O.Box 100, Sydney, N.S. B1P 2G9. Tel: 902-564 4488.
DRY DOCK: The North Sydney Marine Railway operates 5 repair cradles, the largest being 125 ft. long and 35 ft. wide at bilge. This can accommodate vessels with a draft of 12 ft. forward and 14 ft. 6 in. aft and a displacement of 550 tons. A connecting machine shop is capable of making major repairs in hulls, engines and other parts.
SURVEYORS: SGS Supervision Services Ltd., Dominion St., P.O.Box 39, Whitney Pier, Sydney, N.S B1N 3B1. Tel: 902-562 2344. Telex: 019-35219.
Ship Safety and Inspection: Canadian Coast Guard College, Westmount Road, Sydney, N.S. Tel: (902) 564-7002.
AIRPORT: Sydney. Regular service to Halifax and Montreal International Airports.
EMERGENCY CO-ORDINATION CENTRE: Canadian Coast Guard: Oil spills and other emergencies from Sydney Harbour area (no charge) ask operator for Zenith 49000.
SERVICES: Radio, Radar and Decca repairs possible. Ship chandlers available.
GARBAGE DISPOSAL: Available upon request.
WASTE OIL DISPOSAL: Service not available.
SEAMAN'S CLUBS: None.
AUTHORITY: Sydney Ports, Marine and Cruise, Development, P.O.Box 1448, Sydney, Nova Scotia B1P 6R7, Canada. *Tel:* (902) 564-4344. *FAX:* (902) 564-5422. *Contact:* George Wheeliker, Director.

OCEAN FALLS, B.C.: 52.21 N. 127.41 W.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
3 copies Inward Report (Customs A6).

PILOTAGE: Compulsory. Pilots may be taken at Vancouver or Victoria. ETA to be given to Pilots 6 hours before arrival through radio station VAK.
ANCHORAGE: In harbour, ample room for any size vessels.
RESTRICTIONS: Channel depth 25 fathoms.
MAX. SIZE: For berthing alongside, length 600 ft., draft 30 ft.
HEALTH: Ships from overseas are given Pratique at William Head.
RADIO: Vancouver Radio, VAK.
TUGS: Not usually considered necessary. Can be made available by prior arrangement.
BERTHING: Ocean Falls Corporation owns 4 wharves depth alongside 31 ft. at LW.
FRESH WATER: Available from wharves, free of charge.
CUSTOMS ALLOWANCES: 200 cigarettes or 2 lb. tobacco may be held out of bond per person, and 40 ounces of alcohol.
HOLIDAYS: Easter Monday; July 1st; Labour Day; Thanksgiving Day; Remembrance Day; Christmas and Boxing Day; New Year's Day.
POLICE/FIRE/AMBULANCE: Police Tel: 957-2388. Fire Tel: 289-3828.
SHORE LEAVE: Crew members allowed ashore.
GENERAL: Ocean Falls Corporation Paper Mill ceased operations in 1980 and it is very unlikely to resume in the near future. Ocean Falls Corporation is maintaining a caretaking operation (12 employees) until such a time that there is a decision made on the future of Ocean Falls.
AUTHORITY: Ocean Falls Corporation, P.O.Box 730, Ocean Falls, B.C. V0T 1P0, Canada. *Tel:* 604-289 3355. *Contact:* F. A. MacDonald, Manager.

OSHAWA, Ontario: 43.52 N. 78.50 W. (See Plan)

PORT LIMITS: The limits of the Oshawa Harbour is defined as follows:
All the waters of Lake Ontario within the following limits: Commencing at the high water mark of Lake Ontario where it intercepts the Easterly limit of Lot 1 of the broken front concession of the Township of East Whitby.

Thence along the high water mark in a Westerly direction to a point where it intercepts the Westerly limit of Lot 17 of the broken front concession of the Township of East Whitby.

Thence in a Southerly direction 3,000 ft. into Lake Ontario on the extension of the said Westerly limit of Lot 17.

Thence on a straight line in an Easterly direction to a point on a Southerly extension of the said Easterly limit of Lot 1, 3,000 ft. from the high water mark.

Thence in a Northerly direction to the point of commencement.

And all water-front property, wharves, piers, docks, buildings, shores and beaches in or along the said waters.

DOCUMENTS: The matter of documentation is done through Durham Stevedoring and Warehousing (Terminal Operator) in conjunction with the Customs Office located at the City of Oshawa.
ANCHORAGES: Off the entrance of Lake Ontario.
RESTRICTIONS: Draft 27 ft. at East Wharf and 22 ft. on West Wall.
MAX. SIZE: Applies to maximum size of vessels entering seaway.
HEALTH: Normal formalities are conducted at first port in Canada in the St. Lawrence Seaway or East Coast, and therefore the vessel is usually considered cleared prior to entering the Seaway system.
RADIO: Toronto VOR or by telephone: (416) 576-0400.
VHF: Not available.
RADAR: None.
TUGS: Tugs available at the harbour entrance.
BERTHING: East Wharf – 730 ft., draft 27 ft. West Wharf – 900 ft., draft 22 ft. Discharging: Ship's gear or shore equipment.
East Wharf – General Cargo, Petroleum, Steel, Automobiles.
West Wharf – Petroleum Products, Steel.
CRANES: Mobile cranes having a capacity of up to 300 tons are available at all times. The largest crane in the Great Lakes is permanently stationed at Oshawa with a lifting capability of 326 tonnes.
BULK CARGO FACILITIES: Dry bulk cargoes with the exception of sugar, i.e. coal, salt and gypsum, are carried by self-underloaders and discharged by ship's gear. Present discharging gear by high water level, specific details will be made available on request.
BRIDGES: None.
STEVEDORES: The port stevedore (Durham Stevedoring and Warehousing) employs members of the I.L.A., Local 1997, and 4 gangs are available from this local.

The main commodities handled are unitised general cargo, containerised general cargo, import and export steel.

The productivity rate is above average, with general cargo usually reaching a level of 20 tons plus, per gang. Depending on units, weights, runs somewhere in the region of 60 – 125 tons per gang hour. Bulk commodities are usually discharged at a rate of 250 t.p.h.

MEDICAL: A full range of medical services is available at the local Medical Clinic and Oshawa General Hospital.
FRESH WATER: Fresh water available at East Wharf only.
FUEL: Available on request.
FIRE PRECAUTIONS: Usual regulations.
CONSULS: All major consuls in Toronto, 29 miles away.
REPAIRS: Available on request.
SURVEYORS: Classification Societies are represented by Lloyd's, ABS and N.V. in Toronto.
GANGWAY/DECK WATCHMEN: Not required at the Port of Oshawa.
HATCHES: The opening and closing of hatches is normally carried out by ship's crew.
CUSTOMS ALLOWANCES: In accordance with Canadian standards.
CARGO GEAR: Wherever possible by shore crew.
REPATRIATION: Possible.
AIRPORT: Toronto International Airport. All major airlines, 45 miles West.
TIME: EST.
HOLIDAYS: Usual holidays with the exception that Ontario celebrate Civic Holiday which is the first weekend in August. Cargo work can be arranged.
POLICE/AMBULANCE/FIRE: Police Tel: 579-1234. Fire Department Tel: 725-6574. Ambulance Tel: 576-8711.
TELEPHONES: Arrangements can be made through Bell Canada for telephones to be placed on board. A cost of approximately $24.75 installation charge per line.
SERVICES: All services available on request to Terminal Operator.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Arranged through independent service on a per vessel, as required, basis.
WASTE OIL DISPOSAL: Arranged through independent service on a per vessel, as required, basis.
SEAMAN'S CLUBS: Missions to Seamen in Toronto provides mobile service.
CURRENCY: Canadian Dollar.
AUTHORITY: Oshawa Harbour Commission, 1050 Farewell Avenue, Oshawa, Ontario L1H 6N6. *Tel:* (416)-576-0400. *Telex:* 06-981229. *FAX:* (416) 576-5701. *Contact:* Donna Taylor, Chief Executive Officer.

PARRY SOUND, Ontario: 45.20 N. 80.02 W. (See Plan)

LOCATION: Parry Sound Harbour is situated at about the midpoint of the East shore of Georgian Bay at the mouth of the Seguin River. The distance from Parry Sound to Sarnia is about 345 km. and to Sault Ste. Marie via the North Channel is about 338 km.
RESTRICTIONS: *Navigation Season:* Mid-April to mid-December.
Depths: Dredged Channel: 6.4 m.
BERTHING: Wharf with length 140 m. and depth 6.4 m. Large open storage area at wharf.
FUEL: Available by truck.
REPAIRS: Minor repairs possible.
SERVICES: Divers available.
AUTHORITY: Harbours and Ports, Canadian Coast Guard, 201 N. Front Street, Suite 703, Sarnia, Ontario, N7T 8B1 Canada. *Tel:* (519) 383-1942. *FAX:* (519) 383-1996. *Contact:* Regional Manager.
Port Official: Robert Jacklin, Harbour Master/Wharfinger.

PASPEBIAC, Quebec: 48.01 N. 65.15 W. (See Plan)

LOCATION: Located on the South shore of the Gulf of St. Lawrence in Chaleur Bay, approximately 195 km. upstream from Gaspe.
DOCUMENTS: See "Quebec".
PILOTAGE: Not compulsory but available.
ANCHORAGES: Vessels anchor in 36 ft. in Paspebiac Bay.
RESTRICTIONS: The harbour is open year round, but occasionally services of an ice-breaker are required.
Channel: Depth 6.1 m.
MAX. SIZE: See "Berthing".
HEALTH: Pratique available by radio.
RADIO: Riviere-au-Renard Radio (VCC).
TUGS: Available all year round.
BERTHING: L-shaped wharf owned by Ministry of Transport provides 150 m. for berthing with depth 6.0 m. Berthing not possible due to dangerous condition of wharf. There is a small wharf for fishing vessels.
CRANES: No cranes available on site.
STEVEDORES: *Working Hours:* Monday to Friday, 0800 hrs. – 1700 hrs. Sunday and holiday work possible with advance notice.
DENSITY: 1025.
MEDICAL: Services available on request.
FRESH WATER: Available on request.
FUEL: Fuel oil available on request.
REPAIRS: Minor repairs only.
AIRPORT: Gaspe (150 km.).
TIME: GMT minus 5 hours in Winter. GMT minus 4 hours in Summer (from first Saturday of April to last Saturday of October).
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday of May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday of September), Thanksgiving (2nd Monday of October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).
GENERAL: *Formalities:* Port of entry for Customs (Gaspe) and Immigration. Customs Officer acts as Quarantine Officer.
Chart: Canadian Charts No. 4921 and 4486.
AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980.
Jean Baptiste Parise, Harbour Master, Paspebiac. Tel: (418) 752-2145.

PICTOU, N.S.: 45.41 N. 62.43 W.

DOCUMENTS:

Customs Report Inwards, Form A6 in duplicate.
Clearance from last port.
Stores List, Form E1 in duplicate.
Crew Declarations, Form Y14 in duplicate.
Crew List, Immigration Form 200 in duplicate.
Quarantine Q25 in duplicate.
Fumigating and Derat Certificate.
Load Line Certificate.
Inspection Certificate.
Safety Equipment Certificate.
Radiotelegraphy Certificate.
Certificate of Register.

If Pictou is first port of call in Canada, photostat copies of the ship's ocean bills of lading in duplicate to cover all goods for discharge in Canada.

PILOTAGE: Pilotage is not compulsory, but may be arranged locally by telephoning (902) 485-1278 at 12 hours and 6 hours before ETA. Boarding is at Lat. 45° 42′ 30″ N., Long. 62° 34′ W.

ANCHORAGE: Safe anchorage all over harbour in 40 ft.

RESTRICTIONS: No entry restrictions except draft over bar at entrance to harbour, which is 22 ft. low water.

MAX. SIZE: Government Pier 720 ft. long with 27 ft. water on both sides.

HEALTH: Masters must complete Quarantine Form QS.25. Vessel may be quarantined by port doctor, if any disease on board.

RADIO/VHF: Halifax, call sign, VCS, Channels 26, 59, 79. Alternate Charlottetown call sign VCA, Channel 59.

TUGS: Not necessary for berthing.

BERTHING: No specific requirements; berths usually available at all times.

STEVEDORES: Usually 24 hours' notice required for stevedores.

MEDICAL: Hospital facilities available. Serious cases may be transferred to larger hospital at New Glasgow 8 miles distant, or to Halifax 100 miles distant.

FRESH WATER: Supplied by town through 4 in. line. Water pressure 110 p.s.i.

FUEL: Diesel fuel available in quantity. 24 hours' notice required for bunker fuel as it is only brought in on order.

CONSULS: None.

REPAIRS: Facilities to carry out all types of ship's repairs, including deck, engine, electrical and hull repairs.

DRY DOCKS: Largest dry dock, 2,000 ton capacity, 250 ft. long, 42 ft. beam.

GANGWAY/DECK WATCHMEN: Not usually required unless requested by ship.

OPENING/CLOSING HATCHES: Usually by crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. Issue may be made if ship is in port for long periods. Wine/Spirits: One bottle per man.

REPATRIATION: Crewmen repatriated through Halifax.

AIRPORT: Closest airport is Halifax International Airport approximately 80 miles distant.

TIME: Eastern Standard Time GMT minus 5 hours. Daylight saving time from first week-end in April to last week-end in October, clocks advanced 1 hour.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Queen's Birthday (May 19th); Dominion Day (July 1st); Labour Day (1st Monday in September); Thanksgiving Day (2nd Monday in October); Remembrance Day (November 11th); Christmas Day; Boxing Day. Cargo normally not worked on holidays. Would have to be arranged with stevedoring company.

POLICE/AMBULANCE/FIRE: Police 485-4363; Fire 485-4141; Ambulance 485-4381.

TELEPHONES: Facilities available for placing telephones on ships.

IDENTIFICATION CARDS: Not required. Customs and Immigration Officer should be notified if any crew member wants to travel any distance from port area.

GENERAL: For larger and bulk cargoes stevedores should be notified well in advance. Rates vary according to the type of cargo.

AUTHORITY: Transport Canada – Harbour Master/Wharfinger, Pictou, Nova Scotia. *Tel:* 485-5170. *Contact:* Robert Ross, Harbour Master.

POINTE AU PIC, Quebec: 47.37 N. 70.08 W.

LOCATION: Situated on the North shore of the St. Lawrence River, approximately 130 km. East of Quebec City.

PILOTAGE: Compulsory, Pilot Station at Les Escoumins.

APPROACHES: Depth of channel 7.9 m. at lowest low water.

ANCHORAGE: Good anchorage can be obtained off Murray Bay in depth of 21.9 m.

RESTRICTIONS: The harbour is open year round, but occasionally assistance of ice-breakers may be required.

HEALTH: Radio Pratique available.

RADIO: Quebec Radio (VCC).

TUGS: Available.

BERTHING: Available length 120 m. with max. depth 7.9 m.

CRANES: Available on request.

STEVEDORES: *Working Hours:* Monday to Friday 0800 hrs. – 1700 hrs. Work possible at weekends and holidays with notice.

MEDICAL: Hospital locally.

FRESH WATER: Available.

FUEL: Diesel oil available.

REPAIRS: Minor repairs possible.

DRY DOCK: Nearest dry dock at Lauzon (Quebec), 70 miles from Pointe au Pic.

AIRPORT: Quebec City (130 km.).

TIME: GMT minus 5 hours. GMT minus 4 hours in Summer (first Saturday in April to last Saturday in October).

HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Days (4th Monday in May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday in September), Thanksgiving (2nd Monday in October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).

GENERAL: *Chart:* Canadian Chart No. 1234.
Formalities: Port of Entry for Customs and Immigration. Quarantine service available from Quebec City.
Services: Banks, post office, provisions, fumigation.

AUTHORITY: Transport Canada, Harbours and Ports Directorate, 901 Rue Cap-Diamant, 4th Floor, Quebec G1K 4K1, Canada. *Tel:* (418) 648-3680. *FAX:* (418) 648-7980. *Contact:* Raymond Gagnon, Harbour Master – Pointe au Pic.

PORT ALBERNI, B.C.: 49.14 N. 124.50 W. (See Plan)

PORT LIMITS: A line drawn 320° through Pill Pt. extending across Trevor Channel and Junction Passage (See Canadian Chart No. 3668).

DOCUMENTS, HEALTH, CONSULS, ETC.: See "Vancouver".

PILOTAGE: Compulsory, contact through Vancouver Radio. Pilot boards at Cape Beale.

ANCHORAGE: Three deep water anchorages available in harbour, each with a radius of 1,000 ft.,depths up to 66 ft.

RESTRICTIONS: Depths in approaches 84 ft. MLLW.

MAX. SIZE: "Panamax" size vessels.

VHF: Channel 74 (VTS Tofino); Channel 6, tugs and inter-harbour traffic.

RADAR: There is no Port Control Radar.

TUGS: Available and required for berthing.

BERTHING: Port Alberni Terminals, owned and operated by the Port Alberni Harbour Commission. Berth 3: 600 ft. long with a depth alongside of 40 ft., 50,000 sq.ft. covered storage and 17 acres of open storage.

Port Alberni Terminals Berths 1 and 2: Berthing length is 1,050 ft. with 50 ft. minimum depth at the South end of Berth No. 1 decreasing to 37 ft. minimum at the North end of Berth No. 2. Storage sheds and forklifts. 40 ft. container handling capability. All forest products handled.

CRANES: 4 mobile cranes – 1×150 ton, 2×50 ton and 1×70 ton.

BRIDGES: There are no bridges.

STEVEDORES: 15 Gangs available. Refer "Vancouver" for holidays, etc.

MEDICAL: Doctors and hospital facilities available.

DENSITY: 1012, approximately.

FRESH WATER: Available at wharves.

FUEL: Supplies by barge from Vancouver or by truck to dockside.

REPAIRS: Machine shop capable of major repairs. Also radar, radio, etc.

SURVEYORS: Surveyors and Cargo Inspectors available from Nanaimo and Vancouver B.C.

CUSTOMS ALLOWANCES: See "Vancouver".

TIME: Local time is GMT minus 8 hours (P.S.T.) or GMT minus 7 hours (P.D.S.T.) in Summer.

POLICE/AMBULANCE/FIRE: R.C.M.P., Tel: 723-2424; Fire Hall, Tel: 724-1234. Ambulance, Tel: 723-2444.

EMERGENCY CO-ORDINATION CENTRE: V.T.S. Centre ("Tofino Traffic") Channel 74 (VHF) or Tel: (604) 726-7777.

TELEPHONES: Service available at all berths.

SERVICES: Garbage disposal and septic tank extraction by arrangement.

Ship chandlers available.

BANKS: Contact: Port Alberni Shipping Co. Ltd. Telex: Pasco Ttal 044-64553. Tel: (604) 723-7373.

STORING: Vessels may be stored by truck, for regulations check with Terminal Manager. Trucks may proceed alongside. For distances check with Terminal Manager.

GARBAGE DISPOSAL: Port Alberni does not usually accept foreign garbage. However arrangements can be made through Canada Customs and Canadian Health Authorities for disposal. The nearest port that handles garbage disposal on regular basis is Vancouver.

WASTE OIL DISPOSAL: Collection service is available for waste oil in small amounts. Waste oil can be discharged at any one of Port Alberni Terminals berths. There are 2 local companies, each having 2 tanker trucks. Alberni Septic Tank Service has a total of 3,900 gallons capacity and 1,000 gallon land storage facility. Tel: (604) 723-8513, hourly rate of $80.00. Walco Industries has 6,000 gallon capacity. Tel: (604) 723-6919, hourly rate $110.00.

SEAMAN'S CLUBS: Port Alberni's local club is called "Seamen's Haven of Port Alberni", under International Sailors Society of Canada, located at 3071 Kingsway, Port Alberni, B.C. Canada V9Y 1X7. Tel: (604) 723-8222. This facility is within walking distance of the Deep Sea Docks. The club has international telephone, a small shop, Entertainment Centre, snooker table, table tennis, a variety of board games and a library. Transport to local malls, church, etc. can be arranged through Haven managers, Gerry and Alberta Judge, open daily until 2300 hrs.

CURRENCY: Canadian Dollar. Only Canadian and U.S. currency accepted locally.

DELAYS: No delays in berthing should be anticipated – one company scheduling – ice free port.

GENERAL: *Tides:* 12 ft. range at Springs, 8 ft. range at Neaps.
Loading: Carried out by ship's cranes or by mobile cranes if ship's equipment malfunctions.

AUTHORITY: Port Alberni Harbour Commission, 2750 Harbour Road, (P.O.Box 99), Port Alberni, B.C. V9Y 7X2, Canada. *Tel:* (604) 723-5312 (multi line). Port Alberni Terminals: 723-7922. *FAX:* (604) 723-1114. *Contact:* Denis J. White, Port Manager. Captain B. Stansbury, Harbour Master. Mr.K. Fertuck, Terminal Manager.

PORT ALFRED: Quebec: 48.20 N. 70.52 W. (See Plan)

LOCATION: Ha! Ha! Bay, Saguenay River, about 60 miles from junction of the Saguenay with the St. Lawrence.

Port Alfred, Ville de La Baie, is located within the limits of the National Harbours Board of Haut-Saguenay.

DOCUMENTS:
- 2 Crew Lists.
- 2 Passenger Lists.
- 3 Crew's Declaration (Canadian Form Y.14).
- 3 Stores Lists (Canadian Form E.1).
- Quarantine (Canadian Form QS.2001).
- 3 Cargo Manifests.
- 3 Bills of Lading.
- 2 Stowage Plans.
- Harbour Master Dues receipt.

PILOTAGE: Pilotage is compulsory. A minimum notice of 24 hours must be given to ensure availability of Pilot. This notice to be confirmed 12 hours and 4 hours prior to arrival at Pilot Station. Reports stating ETA and Nett Reg. Tonnage of Vessel to be addressed to "Pilots Montreal" and passed by the Marine Traffic Control communication system on VHF Channel 14 (156.7 MHz), or by any coast radio station.

The Pilot station for vessels upbound to Baie des Ha! Ha! is located at Anse-aux-Basques, charted 2 miles S.W. of Les Escoumins Wharf on the North shore of the St. Lawrence river and for downbound vessel at Quebec City.

ANCHORAGE: Vessels awaiting berthing facilities anchor off Anse a Philippe (48° 21′ N., 70°73′ W.).

RESTRICTIONS: None. Vessels may enter or depart at any time of day or night.

MAX. SIZE: Vessels of up to 39 ft. draft may berth at Duncan Wharf and 33 ft. and 36 ft. at Powell Wharf. Max. breadth 110 ft. LOA 800 ft. (243.8 m.).

HEALTH: Pratique obtained by cable to Quarantine Quebec, and serves for duration of vessel's stay in Canada. See also "Montreal".

RADIO: Halifax Radio Station used by vessels while in Atlantic and Sept-Iles Radio Station while in Gulf of St. Lawrence.

VHF: VHF radio telephone Channel 66.

TUGS: 2 Voith-Schneider tug-boats available 2,400 h.p. and 3,000 h.p. Join vessel 1 mile off wharves at Port Alfred. Ship's lines used. Tugs are compulsory for all vessels over 3,000 g.r.t. docking or undocking at Duncan Wharf and for tankers above 5,000 g.r.t., docking at Powell Wharf. Also, tugs will be compulsory when judged necessary by the management.

BERTHING:
Private Facilities

Berth	*Length* (m.)	*Depth at Low Water* (m.)	*Utilisation and General Remarks*
Port Alfred (Alcan Smelters and Chemical Ltd, Transport Division).			
(1) Powell Wharf			
South Side	346	10.0	Floor capacity 20,000 tons.
North Side	146	11.9	Two 5 ton electric level-luffing gantry cranes (bucket or hook) operate on a 35 ft. apron.
Across outer end	67	10.0	
(2) Duncan Wharf			
South Side	386	11.9	Berth No.1: Two electric unloading towers of 600 t.p.h. and/or one "Screw-Type" unloader with a capacity of 450 t.p.h. Berth No.2: Two electric unloading towers of 1,000 t.p.h each. Railway and truck transportation direct from wharf and conveyors to storage areas.

DENSITY: Varies, 1002 – 1015.

FRESH WATER: Available at all berths.

FUEL: By trunk.

FIRE PRECAUTIONS: Alcanport have a trained fire-fighting crew and fire hydrants installed at all strategic points.

STEVEDORES: ETA sent by cable 72, 24 and 12 hours prior to arrival is sufficient to arrange gangs.

Working hours: The regular working hours at Port Alfred are:

General commodities on Powell Wharf:

(a) From Monday to Saturday: 0800 to 1600 hours
1600 to 2400 hours

(b) For hours worked outside of above hours and on Sundays and holidays, premium will apply.

At commencement of a working period (0800 or 1600 hrs.) a minimum of four (4) hours applies to any gang ordered as per procedure.

All operations cease from 0001 hrs. Sunday to 0800 hrs. Monday except in extreme circumstances such as to complete a vessel within a maximum of two (2) hours.

Rules: The following rules and regulations are now in effect for general commodities on Powell Wharf:

(a) All requests for labour must be done by telex or cable.

(b) In order to insure that gang(s) will be available, it is imperative that Telex and Fax messages be in Alcan office by 1400 hours the day before the gang(s) is (are) required. Failing this, it will be beyond Alcan control to obtain gangs. Also note that this goes for every day of the week, including Sunday for Monday work. The following is an example of the type of information required on telex or by telephone.
- – ETA of vessel.
- – Number of gangs required and number of carpenters.
- – Tonnage of commodities to be loaded or unloaded per hatch.
- – Instruction if machines (forklifts, etc.) can be used at the beginning of the operations.
- – if overtime approved when applicable.

Nevertheless Alcanport reserves the rights as to the number of gangs to be placed on any vessel.

Bulk commodities on Duncan Wharf: From 0001 hours each Monday to 2400 hours each Saturday, and in most cases on Sunday, the unloading towers will work three 8-hour shifts daily.

MEDICAL: General hospital at Chicoutimi located 13 miles away, in addition to local hospital.

TANKERS: 1×12 in. hose (Fuel Oil) and 1×12 in. arm (Caustic Soda). ASA fittings. No slop discharge facilities. One berth available for tankers at 39 ft. draft. (No. 4 Powell Wharf).

Notice to Tankers: It is important for all vessels discharging fuel oil or caustic soda that the following specific limits be strictly adhered to:

Fuel Oil: Maximum temperatures 150°F, minimum 120°F, with maximum pressure of 115 p.s.i. to a minimum of 75 p.s.i.

Caustic Soda: Maximum temperatures 110°F, minimum 90°F, with maximum pressure of 110 p.s.i. to a minimum of 60 p.s.i.

The above specifications are for security purposes of pipelines, and official readings are those on charts on the dock.

CONSULS: Dr. Francois Brochet, 1596 Avenue Begin, Chicoutimi. Tel: 545-7098

Norway: Mr. C.J. Tremblay, 1522-6th Avenue, Ville de la Baie, Que., Canada G7B 1R6. Tel: (418) 544-1488.

REPAIRS: Only minor deck and engine repairs.

SURVEYORS: Lloyd's at Quebec City. ABS, DNV and BV at Montreal.

GANGWAY/DECK WATCHMEN: To be attended by ship's personnel.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: One carton (200) cigarettes allowed for each crew member. Wine and/or Spirits, one bottle for Officers and crew and 5-6 bottles to Master.

REPATRIATION: Facilities convenient for crew charges.

AIRPORT: At Bagotville, 6 miles from dock, Daily service to Montreal, Quebec City, Sept-Iles and Baie Comeau.

TIME: Eastern daylight saving time will prevail from early April 1989 to late October 1989 (+4). The remaining part of the year is Eastern Standard time (+5).

HOLIDAYS: 1st & 2nd January, Easter Monday, 1st Monday in June, St. Jean Baptiste Day (24th June), Confederation Day, 2nd Monday of August, Labour Day and 25th December.

POLICE/AMBULANCE/FIRE: Police 544-6804; Fire 544-6804; Ambulance 544-3335.

TELEPHONES: At the main office and public pay phone outside.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Canadian Dollar.

REPORTING: *Notice to Masters of vessels approaching Canadian waters during Winter months:*

Masters of vessels proceeding from sea inbound to Port Alfred (Ville de la Baie) Quebec must report, at least 24 hours before entering the Gulf of St. Lawrence, to the Canadian Coast Guard, through Halifax Radio Station, N.S. or through any other Canadian Coast Station giving all pertinent information, i.e. name of ship, d.w.t., b.h.p., date built, ice class or non-strengthened, approximate draft and time entering Cabot Strait, destination. Then the Coast Guard should acknowledge and give the vessel the recommended route. When a vessel is beset in ice, the Master must radio for ice-breaker assistance, and in the case where conditions improve and vessel makes progress, it must be reported soonest to the ice-breaker in the vicinity or the Coast Guard so that the breaker coming to the assistance is well informed of the new position.

GENERAL: *Conditions for use of Alcan dock facilities:*

1. Notice of ETA, description and tonnage of the commodity to be loaded or discharged and the number of passengers to be landed or embarked, must be given to Alcanport at least 48 hours and 24 hours before arrival. Alcanport may then assign a berth to the vessel but shall not be liable for any delay in providing a berth or for failure to provide a berth.

2. Vessels shall not berth at Alcanport's wharves before obtaining permission. Berthing instructions will be given on VHF Radio, Channel 66.

3. The normal berthing will be on a "First come, first served" basis but the port management reserves the right to change priority.

4. With a view of expediting the work of the port, Alcanport reserves the right, free of expense to itself, to order (a written three-hour notice) a vessel to vacate its berth or to shift from one berth to another at any time. If the vessel does not vacate its berth or does not shift in accordance with Alcanport's instructions, an additional dockage charge of $500.00 per hour or fraction thereof shall be payable in advance in cash to Alcanport, time to count three hours after notice to shift or vacate has been delivered in writing to the person in charge of the vessel. This clause shall not impair the right of Alcanport to compel removal of the vessel by any lawful means.

5. Any object landed from a vessel on Alcanport's property is to be accompanied by a written permit signed by the Master or Officer-in-charge of the vessel; the said permit is to be handed to Alcanport's gateman.

6. Persons wishing to visit vessels berthed alongside Alcanport's wharves are required to have written permission, signed by the Master of the vessel.

7. No person shall smoke or expose a naked light in any shed or warehouse owned or operated by Alcanport, or in any railway car while on Alcanport's property.

8. Tugs are available on call for service in accordance with the charges and the Standard Towing Conditions.

9. If an anchor is used during the berthing of a vessel at Port Alfred, the Master of such vessel is hereby requested to heave in the anchor on completion of berthing operations.

The cost of any delay caused by any vessel due to not heaving in the anchor will be charged to the owner of such vessel.

Gangways:

10. Vessels berthed on Duncan Wharf or Powell Wharf are to provide safe and efficient gangways fitted with handrails and safety nets, (no ladders allowed). The bottom end of the gangway must rest on the wharf and be tied to the eyebolts of the rails on the wharf. Gangways are to be supervised by ship's personnel.

Note: The safety net must be so installed that it will catch anyone that might fall off when embarking or disembarking the vessel. Also a life buoy with a lifeline must be placed at the bottom end of the gangway and ready for use at all times. In addition, at the Duncan Wharf, such a gangway must be positioned longitudinally in line with the vessel so as to permit free movement to the discharging towers from one berth to another as necessary. In cases where the gangway cannot reach and rest on the wharf, a small union gangway with handrails must be so placed so as to permit safe and free passage from the wharf to the ship's gangway. In order to avoid delays, we urge that these gangways be as ready as possible to be set out quickly on docking of the vessels.

In addition there must be a free passage on ship's decks, free of hazards, so as to permit officials and stevedores to safely carry out their respective duties. Any failure to comply with the above rule may cause the shore personnel to refuse to board, and the cost for any delay incurred while the ship's crew rectify the situation will be charged against the vessel.

Further, during the coldest months, all accesses including hatch covers must be kept free of ice.

For vessels berthed on Powell Wharf only:

There are 2 aluminium gangways available for rental at a minimal fee of $100.00 per 24 hours., or part thereof. It is to be noted that these gangways, as for vessels using their own, are to be under the responsibility and supervision of the ship's personnel at all times while in use by the vessel.

WARNING:

11. This is to advise vessels that Alcanport's wharves are equipped with underwater cathodic protection which prevents corrosion of the wharf structure.

Any debris on the river bed, and especially metallic objects such as wire rope, cans, etc., will adversely affect this expensive system. We request your co-operation to ensure that no refuse of any nature be thrown overboard from vessels. This will avoid damage to the cathodic protection and also claims which we would be compelled to make in the event of damage being caused by refuse from vessels.

It is unlawful to discharge or dispose of any ship's refuse at Port Alfred. (There is no incinerator in this region).

Any ship approaching or manoeuvring near the wharves at Alcanport must ensure that divers working on the cathodic protection system are not under water. When divers are at work, the International Divers' Flag is displayed at the east end of the wharf or wharves involved.

Sailing Directions: Canadian Hydrographic Service in Ottawa (Ontario). St. Lawrence Pilotage (below Quebec City). Canadian Charts Nos. 1202 and 1203.

Tide: Rise and fall 2.1 m. (7 ft.) to 6.7 m. (22 ft.).

Transfer of Funds: All transfers of funds to Alcan Smelters and Chemicals Ltd., Transport Division, or to vessels as cash advance or otherwise through Alcanport, must be sent to: The Royal Bank of Canada, Bagotville Branch, 375 rue Bagot, Ville de La Baie, (Quebec) G7B 2N6. *Tel:* (418) 544-6836.

AUTHORITY: Alcan Smelter and Chemicals Ltd., P.O. Box 10, 261 1e Rue, Ville de la Baie (Sector Port Alfred) P.Q., Canada G7B 3R1. *Tel:* (418) 544-9643. *Telex:* 051-36176. *FAX:* (418) 544-9622. *Cables:* ALCANPORT.

Contact: Andre Chevalier, Port Director. Claude Page, Agent (Tel: (418) 544-9674, after hours (418) 544-7094).

PORT ALICE, B.C.: 50.22 N. 127.28 W. (See Plan)

PILOTAGE: Compulsory. Pilots can be secured off Cape Beale, Barkley Sound, South end of Vancouver Island. Master should advise "Pilots Victoria" via Radio Station VAK giving their ETA Cape Beale.

ANCHORAGE: Good anchorage within 0.5 miles of dock in 30 fathoms.

HEALTH: The nearest station is at Victoria, B.C. Ships coming from foreign other than U.S.A. ports and having duplicate Pratique from same to British Columbia ports other than Victoria must obtain Radio Pratique through Victoria, B.C.

VHF: Ship to shore communications on Channel 6.

TUGS: 2 Small tugs (335 h.p.) available to assist berthing and departure if required.

BERTHING: Controlling depth from entrance of Quatsino Sound to Port Alice dock 24 fathoms. A draft of 25 ft. can be handled alongside dock and a vessel 525 ft. in length can be berthed with safety.

Oil tankers with draft up to 35 ft. and 580 ft. in length can berth against berthing scow positioned between dock and oil tanker. (Width of scow 35 ft.).

Bulk Carriers with draft of 35 ft., 565 ft. in length are berthed approximately 16 ft. out from dock by means of log fenders. Gantry of monck cranes extending over apron of dock. Largest ship handled of this type, 29,500 d.w.t., draft 35 ft. 4 in. (Cargo loaded – Units of woodpulp).

STEVEDORES: Working day of 12 hours.

MEDICAL: 12 bed hospital, physician in attendance.

FRESH WATER: Available.

FUEL: Limited quantity of diesel oil. Fuel oil only available in an emergency from gravity hose on dock, vessel must supply hoses.

CONSULS: None.

REPAIRS: Minor repairs can be made in the company workshop.

CUSTOMS: Customs board at Port Alice.

CARGO GEAR: No shore cranes, ships use own gear.

AIRPORT: 35 miles from Port Alice, daily service.

HOLIDAYS: All Dominion legal holidays.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Canadian Dollar.

GENERAL: Port Alice is a private port open to navigation all year round. Limited quantity of supplies available.

AUTHORITY: Western Pulp Inc., Shipping Department, P.O.Box 2000, Port Alice, B.C. V0N 2N0, Canada. *Tel:* (604) 284-7745. *FAX:* (604) 284-6631. *Telex:* 610-975 7035. *Cables:* West Pulp Pa. *Contact:* L.W. Scott.

PORT AUX BASQUES, Newfoundland: 47.35 N. 59.08 W.

PILOTAGE: Not compulsory, but can be arranged through nearest Coast Guard Radio Station to Pilots VTS Centre Port aux Basques at least 12 hours prior to arrival at pilot boarding station.

RESTRICTIONS: Occasionally the harbour may be blocked by drift ice which comes in with S.W. winds during February and March.

VHF: VTS Centre Port aux Basques on Channels 16 and 14.

BERTHING: Facilities privately owned by Marine Atlantic.

MEDICAL: Hospital available.

REPAIRS: Minor facilities available.

AIRPORT: 160 km. away.

AUTHORITY: Transport Canada, Harbours and Port Directorate, P.O.Box 1300, St.John's, Newfoundland A1C 6H8, Canada. *Tel:* (907) 772-5154. *FAX:* (709) 772-5127.

PORT CARTIER, Quebec: 50.02 N. 66.47 W. (See Plan)

LOCATION: Port Cartier is located on the North shore of the St. Lawrence River, approximately 25 miles, in a Westerly direction from Sept-Iles (Seven Islands) at Lat. 50° 02′ N., Long. 66° 47′ W.

DOCUMENTS:

Immigration:

Crew List Form IMM.200 in triplicate or IMO No. 6.

Customs:

Report Inwards (A.6) in triplicate.

Crew Declaration (Y.14) in triplicate.

Ship's Stores List (E.1) in triplicate.

Ship's Register.

The above forms will be supplied by mail on request.

The Master shall also have ready for inspection by Customs:

Certificates of Registry, Safety Construction, Safety Equipment, Derat, Safety Radio, Load Line, Clearance from Last Port. Any spares, materials for repair, or materials for furtherance must be declared on Form A6A on arrival.

Also see "Health".

On Canadian or International Crew Lists, black pen or typewriter must be used. Blue is not acceptable because of copy reproduction difficulties.

Designation and dates of expiry of all major trading certificates are required for outward clearance.

Arrangements have been made so that loading can commence before Customs Entry has been completed, and Customs Outward papers will be completed so as not to interfere with immediate departure after completion of loading.

Also see "Shore Leave".

APPROACHES: The depth of water in the harbour is 50 ft. at MLW. A depth of 54.5 ft. at MLW is maintained in the channel for a width of 200 ft. on each side of the centre line of approach into the harbour. For a distance of 300 ft. on both sides of this channel a depth of 40 ft. at MLW is maintained.

PILOTAGE: Pilotage is compulsory at Port Cartier for docking, sailing and, at Port Authority's discretion, for changing berths.

An exception is made in the case of Coasters or vessels less than 350 ft. LOA unless requested by the Master, or, if considered necessary by the Port Authority.

Pilot will board vessels from attending tug or harbour tender approximately 1 mile off the harbour entrance.

It is the responsibility of all vessels to ensure that the pilot ladder is in good condition and in a safe position for the boarding of the Pilot.

Frequencies for VHF communication with Pilot and Harbour Office. Calling 156.8 MHz. Receiving/transmitting 156.6 MHz. Internal harbour (tugs and Pilots) 156.35 MHz.

Vessels over 40,000 d.w.t. shall also provide accommodation ladder with rope ladder alongside. The landing platform of the accommodation ladder should be approximately 20 ft. above the water.

AIDS TO NAVIGATION:
Fairway Buoy: A black and white vertically striped light and bell buoy "Mo (A)" (white light showing the morse code letter A) equipped with a radar reflector, marked "Port Cartier" is in position: Lat. 50° 00′ 12″ N., Long. 66° 47′ 45.7″ W. Removed during Winter season (mid November to mid April).

Rear Range Light: F.G. 255 ft. backed by 10 ft. square fire orange daymarker. Lat. 50° 02′ 25″ N., Long. 66° 46′ 45″ W.

Front Range Light: F.G. 151 ft. backed by 10 ft. square fire orange daymarker. Lat. 50° 02′ 10″ N., Long 66° 46′ 52″ W.

Fog Horn: Signal – Continuous short pulses during poor visibility and fog off Port Cartier on request from vessel. Lat. 50° 01′ 52″ N., Long. 66° 47′. W.

Corossel Island Light: White Gp. Fl.2 ev. 18 secs. 190 ft. 20 miles radio beacon. Fog signal ev. 30 secs. Lat. 50° 05′ 20″ N., Long. 60° 22′ 44″ W.

Local Chart: Canadian Chart No. 1226 Port Cartier and Approaches.

N.B.: All aids to navigation subject to change. ALL VESSELS NOT UNDER PILOTAGE MUST GET PERMISSION FROM THE PORT AUTHORITY BEFORE ENTERING THE HARBOUR, AND MUST ALSO OBTAIN PERMISSION BEFORE LEAVING ANY DOCK WITHIN THE HARBOUR LIMITS.

ANCHORAGE: Anchorage areas have been established as follows:

Designation	*Position*
A.	Lat. 50° 00′ 57.0″ N., Long. 66° 46′ 36.2″ W.
B.	Lat. 50° 01′ 07.1″ N., Long. 66° 45′ 44.5″ W.
C.	Lat. 50° 01′ 16.4″ N., Long. 66° 44′ 53.2″ W.
D.	Lat. 50° 00′ 32.8″ N., Long. 66° 45′ 44.5″ W.
E.	Lat. 50° 00′ 22.7″ N., Long. 66° 46′ 35.0″ W.
F.	Lat. 49° 59′ 56.5″ N., Long. 66° 48′ 43.0″ W.
G.	Lat. 49° 59′ 44.0″ N., Long. 66° 49′ 32.8″ W.

Chart: (Last edition) 1226, dated 27-05-88. Publication – Gulf and River St. Lawrence Sailing Directions, 6th edition 1985.

MAX. SIZE: Vessels of 100,000 d.w.t. and over must have a draft not exceeding forward 33 ft. and aft 38 ft. on arrival. Also see "Berthing" and "General".

HEALTH: New procedure since July 1991: 24 hour Pre-Arrival Notification to be sent by Telex or Fax to the local Agent, who will in turn transmit it to the Customs Office. Pre-Arrival Notification to contain information listed under "Documents".

Free Pratique granted alongside berth by Customs/Immigration Officer. Ships trading between Canada and the United States continuously and touching no other foreign port, since last granted Canadian Pratique, comply with the above, only on first trip to Canada.

Vessels inspected by Port Health Officer soon as possible, in berth or not.

Masters shall have ready for inspection:

Maritime Declaration of Health Form Q.S.2001 (Only if death onboard).

Derat Certificate.

RADIO: Cable Address "Cartier" Port Cartier.

Vessels entering the Gulf from the Atlantic should keep watch on Halifax Radio for all traffic. Information as to time of reports and frequencies will be found in International Radio Aids to Navigation Manual.

Traffic List	420 kHz	Even hours plus 50 GMT
	2582/161.9	Even hours plus 40 GMT

Weather, Ice Reports and Notice to Shipping.

Channel 21	Receiving Frequency	161.65 MHz
Channel 59	Receiving Frequency	2582 kHz
Channel 26 and CW	Receiving Frequency	161.9 MHz

When vessels are 36 hours from Port Cartier, they should keep W/T watch on VCK Seven Islands Radio for traffic from this Port.

VCK – Seven Islands: Tel: 418-968 3118.

	Channel	*Transmitting*		*Receiving*	
W/T Frequency		500	kHz	500	kHz
R/T (HF)	Channel 51	2182	kHz	2182	kHz
	Channel 57	2514	kHz	2118	kHz
R/T (VHF)	Channel 16	156.8	MHz	156.8	MHz
	Channel 12	156.6	MHz	156.6	MHz
	Channel 24	161.8	MHz	157.2	MHz
	Channel 26	161.9	MHz	157.3	MHz
	Channel 21	161.55	MHz	157.05	MHz
Port Cartier Station					
R/T (VHF)	Channel 12	156.6	MHz	156.6	MHz
	Channel 7A	156.35	MHz	156.35	MHz
	(Internal tugs and Pilot)				
Traffic Escoumins					
RT (VHF)	Channel 14	156.70	MHz	156.70	MHz

The Port Office telephone number is 418-768 2485, Telex number is 051-8-6422 and the Fax No. (418) 768-2344. It is also fitted with VHF on the frequencies mentioned above. The office is open to receive messages on a 24 hour basis. Radio and radio telephone traffic by a ship at anchor in the area off Port Cartier is permissible.

THE ST. LAWRENCE WATERWAY TRAFFIC REGULATIONS: The zone extends from Long. 66° 00′ W. to Montreal. In general, the regulations state that a ship must report to the Marine Traffic Regulator by contacting Channel Escoumins on 156.7 MHz, Channel 14 before entering Zone 1 (i.e. crossing Long. 66° 00′ W.). The Port of Port Cartier is in Zone 1. Ships have to maintain a continuous radio watch on Channel 14, except when alongside. Authorisation to communicate on another Channel has to be requested from Channel Escoumins, unless the vessel is equipped with 2 radios. Clearance must be obtained from Channel Escoumins to move within the anchorage.

ARRIVAL ADVICE: Also see "General". ETAs – All vessels must advise ETA 72 hours, 48 hours and 24 hours before arrival. If any change in ETA of more than 1 hour occurs after transmission of the 24 hour ETA, the vessel must send a corrected ETA immediately. These ETAs shall be submitted in local time at Port Cartier.

In the 72 hours ETA vessels will advise: Tonnage of cargo required; grain fittings, if any; quantity orders for supplies; bunkers, water and cash advance requirements; and bonded stores.

In the 24 hours ETA vessels will advise the estimated time for pumping ballast after arrival alongside. However, if because of weather or any other cause the estimated pumping time should change, the Port Authority will be notified immediately.

All ships shall request docking instructions 2 hours before arrival.

TUGS: Compulsory, with the exception of coasters or vessels less than 380 ft. LOA unless requested by the Master, or, if considered necessary by the Port Authority. Meet vessel outside harbour under instructions from Pilot. Tug lines used at all times. Two tugs of 3,800 h.p. available.

BERTHING: Harbour and Terminal:

1. The North Dock is 2,600 ft. in length, the West 2,000 ft. being Berths No. 1 and 4 for ore loading and the East 600 ft. being Berth No. 4a for bentonite and limestone discharge. Facilities for oil receiving are located at Berths No. 1, 2, 3 and 4.

Coastal vessels may also use Berths No. 1, 2 and 3 when permitted to do so by the Port Authority.

2. The depth of water in the harbour is 50 ft. at MLT. A depth of 54.5 ft. at MLT is maintained in the channel for a width of 200 ft. on each side of the centre line of approach into the harbour. For a distance of 300 ft. on both sides of this channel a depth of 40 ft. at MLT is maintained.

3. Vessels of 100,000 d.w.t. and over must have a draft not exceeding forward, 33 ft. and aft, 38 ft. on arrival.

4. The harbour bottom is smooth rock and anchors are of little value, although Pilots may advise Masters as to the use of anchors under special circumstances.

5. The faces of all berths are fitted with rubber and tyre fenders.

6. Mooring bollards are positioned 75 ft. apart at Berths No. 1, 2 and 3. There are also hooks at every pier at Berth No. 4. All bollards except those at Berth Nos. 2 and 5 are 4 ft. in extreme diameter and all mooring ropes and wires should have eyes at least 8 ft. in diameter.

7. The East Breakwater Cells are cathodically protected. The cabling and anodes extend approximately 60 ft. from the cells, affording all round protection. The use of anchors, or equipment likely to damage this protection, is not permitted within these areas.

Bentonite and Limestone: The bentonite and limestone discharging facility has a rated capacity of 1,500 t.p.h., with the discharge hopper being in a fixed location on Berth No. 4.

MEDICAL: Hospital facilities are available at Port Cartier. All costs for medical and dental treatment required by seamen will be charged to the vessels in which the seamen are serving as crew members. All crew members requiring medical attention should be available upon the vessel's arrival alongside.

TANKERS: No facilities for slop discharge.

DENSITY: Has been known to vary slightly between 1025 and 1021, but is considered salt.

FRESH WATER: Available to all vessels at Berths No. 1, 2, 3, 4 and 5 with connections conveniently located. Rate of approximately 20 t.p.h. The fresh water line is 6 in. with 2.5 in. standard Quebec hose, male connection of 7 threads to the inch. Necessary connections and hoses are to be furnished and handled by vessel.

If required, fresh water can be supplied to vessels at anchor. Max. amount per trip 40 tons.

FUEL: Available at Berth Nos. 1, 2, 3 and 4 for Bunker "C", marine diesel and/or any specialised blend and connections are positioned for ready supply to all vessels. All bunker requirements are directly supplied by Gulf Oil Canada Limited, and proper credits should be established. Bunker "C" can be supplied at approximately 1,500 b.p.h. Marine diesel oil can be supplied at approximately 900 b.p.h., Bunker "C" line is 10 in. with 8 in. reducer flange connection. Marine diesel oil line is 8 in. with 4 in. reducer flange connection. There is no coal available at this port.

Vessels nominated for Port Cartier and required to anchor awaiting a berth, which in the meantime require bunkers, will be permitted to enter the harbour, if a berth is available with bunkering facilities, for the purpose of bunkering, and shall then return to anchor. The fee for this service shall be $3,780 (including second tug if used) plus applicable line handling charges.

REPAIRS: Minor repairs can be effected. They must be supervised by the vessel's personnel, and will be the responsibility of the vessel.

GANGWAY/DECK WATCHMEN: Not necessary. Security guards obtainable on request.

OPENING/CLOSING HATCHES: Normally done by crew.

REPATRIATION: Crew changes and repatriation can be carried out.

AIRPORT: Nearest airport is Seven Islands about 40 miles by road. Services to Quebec City and Montreal, 4 flights daily.

TIME: Port Cartier is located in the Eastern Standard Time Zone (GMT minus 5 hours). Daylight Saving Time (GMT minus 4 hours) is observed from first Sunday in April to last Sunday in October.

HOLIDAYS: See "General".

CUSTOMS ALLOWANCES: Canadian Customs Regulations allow each crew member to have in his possession for his personal consumption 200 cigarettes, 50 cigars, 2 lb. pipe tobacco and 40 oz. of spirits. All quantities must be declared on Crew Declaration Form Y-14 along with all personal effects such as radios, cameras, tape recorders, binoculars, souvenirs, etc., plus serial numbers of these items.

N.B.: Masters of vessels are advised that tobacco items and spirits in excess of these amounts in possession of crew members should be collected and placed in bonded stores prior to the vessel's arrival in order to speed up the clearance of the vessel.

Canadian seamen returning from voyages to American or other foreign ports are permitted $100 value of duty free merchandise every quarter for periods outside Canada of over 48 hours and $300 once a year for periods outside Canada of 7 days.

POLICE/AMBULANCE/FIRE: Police Tel: 766 2233. Ambulance/Fire Tel: (418) 768-2323.

TELEPHONES: No direct connections to vessels. Available on berths.

POLLUTION: The discharge of oil and garbage into the waters of Canada is prohibited by strictly enforced regulations which provide heavy penalties on summary conviction. Every precaution must be taken to prevent escape of oil from a vessel, but should such an escape occur, the regulations require that vessel immediately report it to the nearest Canadian Coastguard Officer or to the Chairman, Board of Steamship Inspection, Ministry of Transport, Ottawa.
SERVICES: Electronic repair services to navigational equipment. Should be requested in advance.
SHORE LEAVE: All ships arriving from a foreign port will be boarded by Customs and Immigration Officers. Ship's personnel are not allowed ashore until permission is granted by these Officers, nor shall crew members joining a vessel board without Customs permission.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
DELAYS: Occasionally Easterly weather conditions may delay vessels berthing.
GENERAL: Vessels which have completed discharging of grain and are to load iron ore should have ratguards fitted to all mooring lines at all times.
Ore Concentrate and Pellet Vessels:
I. Advising Arrival: (See also "Arrival Advice") 1. Each vessel operator or its principal shall notify Quebec Cartier Mining at least 2 weeks prior to the expected arrival of each vessel at Port Cartier and Quebec Cartier Mining Company shall forthwith advise such vessel operator or principal whether it can accept the vessel at such time. An allowance of 3 days preceding and 3 days subsequent to the date so fixed will be made for the actual arrival of each vessel. If the vessel's actual arrival is not within such 3 day period preceding or subsequent to the date fixed for its arrival, Quebec Cartier Mining Company may fix another arrival date for such vessel that will not interfere with other scheduled loading. Quebec Cartier Mining Company shall be kept fully advised of all vessel nominations, substitutions, cancellations, delays, sailing dates at Port Cartier of all vessels designated to accept delivery of ore at this Port.

2. The submission of a Notice of Readiness by the vessel will constitute acceptance of all terms and conditions of this Advice to Vessels by the vessel, its Managers, Agents, Master, Operator and or Charterer.

II. Loading Conditions: Ships will be loaded in regular turn of vessel's arrival off Port Cartier provided they present with hatches open and do not have ballast pumping time which will exceed minimum loading time. The 1 shiploader has a rated capacity of 9,000 tonnes/p.h. for concentrate and 7,200 tonnes/p.h. for pellets. A vessel which has berthed at the loading dock and is found to have a deballasting rate time which in the opinion of the Port Authority will not permit loading at maximum rate, may be ordered off the dock and moved to the standby berth or to anchorage until it is in a condition to accept its cargo at maximum loading speed.

The vessel will then be returned to the ore loading berth in turn, following re-submission of Notice of Readiness. All moves to be at vessel's expense. Quebec Cartier Mining Co., Port Authority will be final arbitrator in case of dispute.

III. Loading Minimum and Vessel Specifications: Each vessel designated to accept delivery of ore at Port Cartier, must conform in construction to the following specifications and conditions:

1. Not less than 4 ore hatches of at least 18 ft. square, except Great Lake Bulk Carriers where the minimum width of hatches shall be 9 ft., to accept ore cargo direct from loading tower at Port Cartier.

2. All vessels nominated must be suitable for the loading and the transportation of concentrates or pellets and capable of taking the entire cargo to be loaded in the lower holds without "peak-up" above the tween deck levels. The vessel shall load and stow cargo in accordance with the Canada Shipping Act and Regulations.

3. Hatch opening sufficiently clear of obstruction on deck to permit free and direct contact with loading tower.

4. Vessels may be loaded to a draft of 54 ft. if tides permit them to sail while maintaining a safe under keel clearance (at least 3 ft.) on a rising tide.

If a vessel requests to wait for a following higher tide in order to lift more cargo, and the Port Authority agrees, then this additional time is not to count and, if required by the current operational condition of the Port shifting is necessary, all additional shifting fees will be for the account of the vessel.

5. *Maximum Allowable Dimensions:* Maximum allowable dimensions of vessels at the ore berth.
LOA 995 ft.
Beam 174 ft. Moulded depth 92 ft. (to top of hatch cover).
Air draft under loader:
MHW 42 ft. water line to top of hatch covers.
MLW 52 ft. water line to top of hatch covers.
Draft of Vessel Loaded:
Draft at MLW 48 ft. loaded.
Draft at MHW 54 ft. loaded.

IV. Special Regulations: 1. Any vessel which discharges a cargo of grain and is to load a cargo of iron ore will be considered in turn for loading only after the vessel has completed discharging grain and is in all respects clean and ready to receive iron ore.

2. Loading plan should be available as soon as possible after arrival and must be presented to the ore loading foreman, in metric tons, on arrival at the berth.

3. All shipboard work necessary for docking and loading, including but not limited to line handling and tending, opening and closing hatches, and normal deck cleanup, shall be done by the vessel's crew.

4. Any Owner or Charterer with more than 1 vessel waiting turn to load may interchange his vessels, provided they are of comparable capacity (deadweight). Any interchange of turn must be arranged with and have the approval of Quebec Cartier Mining Company.

5. All weights shown on the Bill of Lading and/or Manifest will be the same as recorded on the weighing facilities of Quebec Cartier Mining Company.

6. The Port will be in operation 24 hours a day, 7 days a week; however, ore vessels will not be loaded on New Year's Day (January 1st), and on Christmas Day (December 25th), nor will they be loaded from 0800 hrs. Sunday to 1600 hrs. Sunday, nor during the same period on the following holidays: Good Friday; St. Jean Baptiste Day – June 24th; Dominion Day – July 1st; second Monday of July; first Monday of August; Labour Day – first Monday of September; Thanksgiving – second Monday of October; Boxing Day – December 26th.

7. Arrangements have been made so that loading operations will commence as soon as possible after the vessel's arrival at the loading berth.

8. Vessels usually dock port side to at Ore Berth.

V. General Instructions in Preparing Vessels' Holds to Accept Iron Ore Concentrate: Quebec Cartier's iron ore is a type of iron ore concentrate which weighs on the average 192 lb. per cu.ft., and stows at approximately 12/13 cu.ft. per gross ton.

The iron ore contains an average moisture content from 2.5% to 3.5%, and could sometimes in the Summer Season be shipped at as high as 5%. The character of this ore is self draining. It will retain moisture up to about 2.5%, but all moisture over and above this will drain on compaction of the material, and also, if the ore is left for long periods in stock-pile or in the hold of a vessel, this drainage of moisture will sometimes leave a considerable quantity of water in the hold of the vessel, and could cause some inconvenience when discharging the cargo. For this reason all bilge strums or wells should be sounded regularly and pumped out at regular intervals, so as to keep the bottom of the hold as dry as possible.

Quebec Cartier's iron ore is abrasive, and could cause damage to bilge pumps. Masters of vessels are advised to cover all bilge strums or wells with burlap in a similar manner as when receiving a grain cargo in bulk; so as to permit a free flow of the water and retain the iron ore in the hold of the vessel.

All holds for the acceptance of this cargo should be clean prior to the arrival of the vessel.

VI. Pellet Stowage Factor: Iron ore pellets will stow at about 17 – 18 cu.ft. per gross ton.

All holds for the acceptance of this cargo should be clean prior to the arrival of the vessel.

VII. All vessels loading more than 18% of their cargo capacity in iron ore concentrate must present a Certificate of "Fitness to Load" as issued by the Canadian Ministry of Transport (Port Warden) prior to loading and a "Fitness to Proceed" prior to sailing.

Port Warden costs will be charged to the vessel in accordance with the government tariff.
Grain Vessels: Berthing and use of the Elevator Dock Facilities:
Regulations, Terms and Conditions:
(The term 'Tariff' refers to the Tariff issued periodically by the Elevator Company; the term 'Company' in this section refers to the Elevator Company).

1. *Application for Berth:* For all vessels desiring a berth at the Elevator there shall be filed an Application for a Loading Berth at the Elevator Office, between 0900 – 1700 hrs. Mondays through Fridays and from 0900 – 1200 hrs. on Saturdays, except on holidays. Application shall be made in writing on forms supplied by the Company. Whether or not such Application Form is signed, the Owner and Charterer of each vessel shall be deemed to agree in consideration of the Company permitting the vessel to berth at the Elevator for the purpose of loading or discharging bulk grain, to abide by all rates, rules and regulations stipulated in the Company's current Tariff, and to acknowledge having taken communication of same and, without restricting the generality of the foregoing, to undertake and agree that the berthing of the vessel at the Elevator will be free of risk and expense to the Company. Owners and Charterers also agree to indemnify the Company against and hold it harmless from any and all damages whatsoever and howsoever caused which may be occasioned to its facilities or any of them by the vessel and in like manner to indemnify the Company against and hold it harmless from any and all claims of any nature whatsoever arising from damages which may be sustained by the vessel while berthed or during berthing or unberthing. Owners and Charterers shall in like manner be deemed to agree to make prompt payment of invoices as presented and *in the case of export grain to deliver to Les Silos Port Cartier signed written evidence of the receipt on board of the grain according to the Les Silos Port Cartier Description and Tally (i.e. "Mate's Receipts").* All charges shall constitute a lien against the vessel until paid. The Application for Berth shall be dated and timed and shall constitute a contract between the Company and the Owners and Charterers of the vessel, such that the latter shall be bound by the terms thereof and, without restriction, to comply with all the charges, rules and regulations stipulated in the Company's current Tariff.

2. *Allocation of Loading Berth:* Except as otherwise provided in these regulations, vessels shall be assigned a loading berth in the chronological order in which they file with the Elevator Office the signed Application for Berth, accompanied at the time of filing by the following documents:

(a) Certificate issued by the Canadian Government Department of Agriculture and/or by the United States Department of Agriculture, Grain Division, as the case may be, that all cargo compartments are fit to load in compliance with the regulations of the respective departments.

(b) Certificate of Readiness in all compartments issued by the Port Warden.

(c) Evidence to the effect that the vessel has been entered at the Canadian Customs House.

(d) Evidence to the effect that the vessel has been tendered to and accepted by the Charterer.

Vessels are required to present alongside the Loading Berth with hatches open and gangway and gangway net ready.

3. *Allocation of Unloading Berth to Lake Vessels:* Subject to the exceptions contained herein, but at all times in accordance with the provisions of the Canada Grain Act and Canadian Grain Commission Regulations, Lake vessels shall be assigned to an unloading berth in the order in which they arrive in port and file application and required documents for berth with the Company with evidence of vessel's readiness to discharge.

(a) A hold of a vessel having been partially unloaded at another port shall not be accepted for unloading unless by prior express arrangement with the Company.

(b) A hold of a vessel having a separation between more than one grade or kind of grain shall not be accepted for unloading.

4. *Berthing Prior to Receipt by the Company of Appropriate Certification:*

(a) At the sole discretion of the Company, a vessel may be allowed to berth alongside the Elevator prior to having received all the above certificates. If subsequently, the vessel fails to deliver such certification, it must, immediately on order of the Company vacate the berth. Nothing contained in this rule shall be deemed a waiver of any of the provisions of Item 5 hereinafter.

(b) Any vessel, which has been allowed to berth at the Elevator having previously filed all the certificates enumerated in above item 2, and which subsequently is found by an Official Inspector unsuitable to receive grain for any reason, must, if required by the Company, immediately vacate the Elevator Berth. Nothing contained in this rule shall be deemed a waiver of any of the provisions of Item 5 hereinafter.

5. *Refusal or Failure to Vacate Berth:* Any vessel which fails or refuses to vacate the berth when required by the Company for any reason whatsoever including being under arrest, except as provided hereinafter, in Item 9, shall be liable, in addition to any other charges due hereunder, to pay to the Company a charge of $1,500.00 per hour, or any part thereof after vacating notice has been given in writing to the Owner, Manager, Agent, Master, Mate, Operator or Charterer of the vessel. This charge shall be paid promptly and it is accepted that it accurately represents a minimum estimate of damages to the Company because of refusal or failure of the vessel to vacate. This payment shall not constitute a waiver on the part of the Company to claim greater actual damages that may be sustained as a result of the vessel's failure to vacate.

The Company shall have the right, authority and privilege to compel the removal of the vessel, by any lawful means, at the vessel's own risk and expense and shall not be liable for any damages, delay or other expenses, including legal costs, arising from the act of removal of the vessel, by whomsoever incurred.

6. *Berth Operations:* The Company, in its sole discretion, may:

(a) Alter the turn of vessels whether in berth or not, when confronted by an urgent need to receive or ship a particular grade or kind of grain or when in its judgment

(i) This is necessary or desirable in order to facilitate elevator operation, or

(ii) Conditions within the Elevator or approaches thereto render this necessary or desirable.

(b) Require a vessel to load in overtime hours at vessel's own expense during all hours when labour can be available, continuously until loading is completed, or for any part of such hours as the Company may determine necessary. This rule may be applied whenever more vessels are in port than can be berthed at the Elevator, or in order to expedite the movement of vessels and/or grain, or to ensure the fullest possible use of the Elevator, or to eliminate any threat of actual or possible congestion of any other vessels. Any vessel unwilling to work overtime as directed in accordance with this rule shall vacate the berth without delay and the vacating vessel shall only be permitted to berth again at the Elevator after giving written agreement to load continuously until completed whether in regular or in overtime hours. Should any vessel refuse to vacate, it will be liable for damages described in above Item 5.

(c) If a strike or other labour disturbance involving a vessel at berth or waiting for berth (whether by vessel's crew or otherwise) or any other circumstance affecting a vessel and not attributable to the Company will, in the Company's judgment, tie up or impede operations at the dock, the Company may order such vessel out of berth or refuse to accept it at the berth. Should any vessel refuse to vacate, it will be liable for damages described in above Item 5.

7. *Vessel in Berth:* Any vessel in berth shall at all times maintain appropriate Officers and crew aboard to permit shifting of the vessel or reception or discharge of cargo at any time of day or night including Saturdays, Sundays and Holidays.

All vessels discharging or loading grain shall at all times have adequate rat guards on all mooring lines.

8. *Work Interruptions:* When work is interrupted on account of rainy or other weather conditions, a vessel at its own expense may be required, at the discretion of the Company, to retain on standby, according to local labour rules, stevedore and other labour necessary to the loading, up to a maximum of 4 hours in any stevedoring work period. Any vessel or its Agent failing to have such labour available, if so required, shall be, in addition to any other charges due hereunder, assessed a charge of $1,500.00 per hour for any period where work is subsequently ordered resumed by proper authority (after the weather interruption) but cannot be carried out for lack of labour.

If such interruption occurs during an overtime period or on Saturdays, Sundays or Holidays, the usual charges for overtime periods will still be fully assessable and due in addition to the above charge. This rule shall be applicable unless otherwise agreed by the Company in writing.

9. *Completion of Loading: Upon completion of loading, a vessel shall not occupy the loading berth at the Elevator longer than is necessary to close the hatches, but in any event for not longer than 1 hour.* Vessels requiring extra time to set booms and derricks before making ready for sea or for any other reason may, at the time of docking, request written permission from the Company to do this work at the Elevator Berth, but it shall be at the sole discretion of the Company whether such permission is granted or not. Any vessel not granted such permission must vacate the berth immediately as required by the Company. Most vessels requiring extra dock time will be ordered to a lay-by berth, if available, or to anchorage, at vessel's expense.

Failure to comply with this requirement will automatically cause the vessel or its Agents to be assessed an extra charge of $1,500.00 per hour or part thereof from the time that permission was refused. This charge shall not impair the right of the Company to compel removal of the vessel from the berth nor shall it constitute a waiver on the part of the Company to claim any greater damages that may be sustained as a result of vessel's failure to vacate. The Company shall have the right, authority and privilege to compel the removal of the vessel by any lawful means at the vessel's own risk and expense and the Company shall not be liable for any damages, delay or other expenses including legal costs, arising from the act of removal of the vessel, by whomsoever incurred.

Port Expenditure: In addition to the port charges, the following charges will be applicable:

1. Grain Inspection Fee.
2. Charges as stipulated in the Company's Current Tariff.
3. The Port Warden and D.O.A. and/or U.S./D.O.A. fees when applicable, charged at cost in accordance with the regulations.

Unloading and Loading Facilities: The grain unloading berth is adequate for the largest lakers known and is equipped with 2 marine towers able to unload grain at a peak rate of over 2,240 tonnes (80,000 bushels) per hour.

The loading berth can handle ocean vessels having up to the following maximum dimensions:

Length Overall	900 ft. (See "Note" below).
Beam	137 ft. for self-trimming bulk carriers.
	137 ft. for OBO-centre holds only.
	125 ft. for tankers, provided off-shore tank openings are a minimum of 15 ft. inside ship's side.
Draft	47 ft. at MLW, subject to slight increase depending on state of tide. Port Authorities require vessels to have 3 ft. under their bottoms at all times.
Air Draft	53 ft. at MLW, to top of hatch covers.
	45 ft. at MHW, to top of hatch covers.

Note: Vessels having in excess of 730 ft. LOA up to 900 ft. LOA, may be accepted at the Elevator, but only by prior arrangement with the Company, which reserves the right, at its sole discretion, to refuse to load any vessel over 730 ft. because of its length or other physical characteristics which makes it impracticable to load.

The Port Cartier harbour as well as the grain loading berth have a depth of water of 15.2 m. (50 ft.).

REGULATIONS: Also see "General".

1. Ships will leave the loading or discharging berth immediately on completion of loading or discharging. If any delays occur on documentation, crew members missing etc., ship will leave the dock and all matters will be handled from anchorage or another berth.

2. Vessels ordered to anchor, should do so in the recommended area, see "Anchorage". Failure to do so may result in delays to vessels from being boarded by Port and Government Authorities. *Vessels at anchorage must remain 0.25 miles clear of the Harbour Approach Channel.*

3. Vessels arriving in ballast should ensure they are in good trim for safe handling into the harbour, bearing in mind the loading rate, so as not to cause any delay in loading due to deballasting. However should a vessel not be sufficiently ballasted at the time of proceeding into the harbour, the Pilot may request further ballasting, depending on the prevailing weather conditions. If in doubt the Master should contact the Port Office by Radio Telephone.

4. Vessels should have main engines and deck machinery operable at all times when alongside the berth. Permission contrary to the above must be obtained from the Port Authority.

5. All O.B.O. vessels not in possession of a valid Gas Free Certificate by an independent chemist will advise accordingly in the 72 hour ETA, and arrangements will be made to have a chemist available on arrival at vessel's expense. Masters must present a valid Gas Free Certificate before Notice of Readiness may be tendered.

6. Normally, vessels will be permitted entry to the harbour, to their assigned berth in order of their arrival. However, the Port Authority may alter the order to assure in its sole opinion, efficient operation of the harbour. The Port Authorities shall be the final arbitrator in case of dispute.

7. The Port Authority may require a vessel to vacate an assigned berth, proceed to anchor or standby berth and return to the assigned berth to complete loading or discharging as soon as conditions permit.

8. Any vessel which fails or refuses to vacate the berth when required by the Company, shall be assessed, in addition to any other charges due hereunder, an automatic charge of $2000.00 per hour or any part thereof after vacating notice has been given in writing to the Owner, Manager, Agent, Master, Mate, Operator or Charterer of the vessel. This charge shall be paid promptly and it is accepted that it accurately represents a minimum estimate of damages to the Company because of refusal or failure of the vessel to vacate. This payment shall not constitute a waiver on the part of the Company to claim greater actual damages that may be sustained as a result of the vessel's failure to vacate.

The Company, through the Port Authority, shall have the right, authority and privilege to compel the removal of the vessel, by any lawful means, at the vessel's own risk and expense and shall not be liable for any damages, delay or other expenses, including legal costs, arising from the act of removal of the vessel, by whomsoever incurred.

9. A stand-by charge of $1500.00 per hour will be assessed against any vessel causing delay of ore loading alongside berth when such delay is caused by the vessel not complying with Port regulations and requirements.

SHIPMASTER'S REPORT: December 1989.
Radio: When the vessel is alongside it is simple and quick to walk to the agent's dock office and send a telex or telefax message. When the vessel is at anchor all cables have to be routed through VCK (Sept Iles Coastguard station) as agents are not permitted to occupy the VHF with long messages. If however the Port Warden has to visit the ship for an inspection, then it is again simple to have him take a message ashore for the agent to transmit as a telex, etc.
Draft: Maximum departure draft 54 ft., depending on tide.
Restrictions: Daylight docking only for vessels over 950 ft. LOA, undocking at any time.
Tugs: 2 tugs for berthing and unberthing, tugs lines used. One tug is on standby 24 hours and will push vessel alongside if any difficulties experienced with moorings while alongside. Call Dock Office on VHF Channel 12.
Bilges: A new type of material for covering bilges is available locally and is recommended by the Canadian Coastguard for holds carrying concentrates. Material supplied free of charge.

AUTHORITY: Quebec Cartier Mining Company, Marine Services, P.O.Box 188, Port Cartier, P.Q. G5B 2G8, Canada. *Tel:* 418-768 2400/768 2439/768 2485. *Telex:* 051-86422. *Cables:* Cartier, Port Cartier. *FAX:* (418) 768-2344. *Contact:* L.S. McGee, Port Manager. A. Spence, Marine Supervisor.

PORT COLBORNE, Ontario: 42.52 N. 79.15 W.

Refer to "St. Lawrence Seaway" for important general information.
DOCUMENTS: All documentation carried out by Authorities in Montreal. Only when vessels have called at United States port after departing Montreal will any changes in documentation be necessary, which will consist of a United States Customs Clearance Certificate, to be available on board.
Immigration papers.
1 copy QS2 (Health Certificate).
3 Stores Lists.
Crew Personal Effects List.
Customs Clearance.
All of the above will have been stamped in Montreal.
PILOTAGE: Compulsory for ocean vessels over 250 tons gross. Pilots are available at Port Weller (upbound) and Sarnia (downbound). Supervisor of Pilots located in St. Catharines.
ANCHORAGE: In Lake Erie, beyond the 3-mile fairway buoy at entrance to Port Colborne Harbour.
RESTRICTIONS: Navigation season approximately from April 1st to December 31st. Channel depth 27 ft. dependent on Lake level.
Limiting depth in the channel from Port Colborne piers to Bridge 21 and 20 is 8.23 m. (27 ft.). From Bridge 21 and 20 North to Rameys Bend the limiting depth in the channel is 8.23 m. (27 ft.). The Welland Canal will accommodate vessels not exceeding 222.5 m. (730 ft.) in overall length and 23.16 m. (76 ft.) in extreme breadth. Permissible draft is 8.0 m. (26 ft. 3 in.). Air draft 35.5 m.
MAX. SIZE: 730 ft. length, 76 ft. beam, 26 ft. 3 in. draft and 35.5 m. air draft.
HEALTH: Pratique granted at Quebec City for incoming vessels from foreign ports.
TUGS: None available.
BERTHING:

Canada Starch Dock (Old Channel) Wharf No. 11:

Type	Grain Discharge into Hopper
Equipment	Ships' Equipment
Length	120 m. (390 ft.) between three dolphins
Depth	8.23 m. (27 ft.)

Rameys Bend, Wharf No. 12:

Type	Stone and Sand
Equipment	Tunnel and Belt Conveyor, Loading
Length	1,797 ft. (547.7 m.)
Depth	27 ft. (8.23 m.)
Operator	Port Colborne Quarries Ltd.

Robin Hood Dock, Wharf No. 13:

Type	Elevator – Grain and Grain Products
Length	1,000 ft. (304.8 m.)
Depth	25 ft. (7.62 m.)
Operator	Robin Hood Flour Mills Ltd.

Wharf No. 15:

Type	Sand
Equipment	Self-unloaders
Length	850 ft. (259.1 m.)
Depth	14 ft. (4.27 m.).
Operators	Beam Building & Supply Co. Ltd., and Underwater Gas Developers Ltd.

Wharf No. 16:

Type	Unloads and loads bulk cargoes, marine diesel oil and coal bunkers available.
Equipment	1 Belt Conveyor 7 in. – 8 in. Pipe-line
Length	1,480 ft. (451.1 m.)
Depth	27 ft. (8.2 m.)
Storage Capacity	27,000 tonnes above.
Operator	Rochester & Pittsburg Coal Co. (Canada) Ltd.

Fuelling Wharves:

Wharf No. 17:

Type	Unloads and loads bulk cargoes using ship's or mobile gear
Equipment	Mobile repair equipment
Length	1,120 ft. (341.4 m.)
Depth	27 ft. (8.2 m.)
Storage Capacity	225,000 tonnes.

Imperial Oil – Shell Canada, Wharf No. 18:

Type	Marine Diesel Fuel, Bunker "C" and Coal
Length	1,650 ft. (502.9 m.)
Depth	27 ft. (8.2 m.)
Storage Capacity	170,000 Barrels.

Maple Leaf Mills Ltd., Wharf No. 19:

Type	Grain Elevator
Length	1,650 ft. (502.9 m.)
Depth	27 ft. (8.2 m.)
Storage Capacity	63,000 tonnes

National Harbours Board, Wharf No. 20:

Type	Grain Elevator
Length	Holding Side 900 ft. (274.3 m.)
Depth:	Holding Side 19 ft. (5.79 m.)
Storage Capacity:	84,000 tonnes.
Operator	Goderich Elevators Ltd.

MEDICAL: Local hospital at Port Colborne. All assistance available.
DENSITY: Fresh water.
FRESH WATER: Available at West Side Wharf.
FUEL: Bunker and diesel fuel available.
REPAIRS: Local repair shops for boiler, engine and above deck repairs.
DRY DOCK: At Port Weller.
SURVEYORS: ABS and Lloyd's at Toronto.
GARBAGE DISPOSAL: Available.
WASTE OIL DISPOSAL: Mobile reception facilities available in the Welland Canal.
SEAMAN'S CLUBS: None.
GENERAL: *Publications:* Sailing Directions – Great Lakes Volume 1 – Seaway Handbook.
AUTHORITY: St. Lawrence Seaway Authority, Niagara Region, P.O.Box 370, 508 Glendale Avenue, St. Catharines, Ontario L2R 6V8, Canada. *Tel:* (905) 641-1932, (nights (905) 641-1939). *FAX:* (905) 461-4632. *Contact:* Captain A. Soni, Coordinator – Vessel Traffic Services.

PORT DALHOUSIE, Ontario: 43.12 N. 79.16 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information.
LOCATION: On the South shore of Lake Ontario 43 km. Southeast of Hamilton and 5 km. West of Port Weller, the Northern entrance of the Welland Canal. Port Dalhousie is now amalgamated with the City of St. Catharines.
APPROACHES: Access to the port is through 2 parallel entrance piers projecting out into Lake Ontario, which lead into a wide basin utilized by recreational vessels.
RESTRICTIONS: Navigation season: Usually April 1st to December 30th. Channel depth: Limiting depth in the channel between the entrance piers is approximately 21 ft. to 23 ft. below Chart Datum (Elev. 242.8 ft.) and gradually reduces in depth towards the basin.
RADIO: Ship-to-Shore communications: Through Toronto (VBG).
TUGS: No towing facilities.
BERTHING: The entrance to the harbour is between 2 parallel concrete piers 61.0 (200 ft.) apart. The East pier 701.1 m. (2,300 ft.) in length, extends out 457.3 m. (1,500 ft.) from the shore, 76.2 m. (250 ft.) beyond the outer end of the West Pier. Southward of the inner end of the entrance piers, the harbour widens out into a basin utilised by recreational vessels.
MEDICAL: General Hospital and Hotel Dieu at St. Catharines.
FUEL: Gasoline available.
SURVEYORS: Lloyd's at St. Catharine, ABS at Toronto.
CUSTOMS: Officers available at St. Catharines at any hour by previous arrangement.
SERVICES: Supplies available.
AUTHORITY: City of St. Catharines (Parks & Recreation Dept.), P.O.Box 3012, 320 Geneva Street, St. Catharines, Ontario, L2R 7C2. *Tel:* (905) 688-5601 (Ext.No.3144). *FAX:* (905) 646-9262. *Contact:* W.E. Fenwick, Harbour Manager. T.M. Cotton, Deputy Harbour Manager.

PORT HAWKESBURY AND STRAIT OF CANSO, N.S. (See Plan)

PORT LIMITS: Port Hawkesbury and Mulgrave harbour limits are from a line joining Melford Point and Bear Head, and the Canso Causeway.

DOCUMENTS:

3 copies Crew Declaration, Form Y14 (IMO Form 5 acceptable).
3 copies Store List, Form E1.
3 copies Immigration Crew List, Form IMM 200.
3 copies Inward Report, Form A6. *
2 copies Shipping Report, Form S1. **
3 copies Outward Report, Form A6. *
Completed Maritime Declaration of Health, Form QS 2001.
Valid Derating Certificate.
International Vaccination Certificates for crew members.
Complete copy of Manifest for Goods to be Discharged in Canada.
Clearance from Last Port.

* The Inward Report Form and Outward Report Form are usually prepared by the Agent.

** The Shipping Report Form is required for vessels performing coasting trade only.

ICE: Ice Advisory and Shipping Support Service is provided from mid-December to the end of the ice season. Information regarding ice conditions is broadcast regularly and special reports will be obtained on request from "Ice Halifax" through Halifax Radio (VCS).

Masters are cautioned that it may be necessary to remove certain buoys in Chedabucto Bay and the Strait of Canso during the ice season, and it is recommended that Masters request information on their deposition prior to entering.

PILOTAGE: Pilotage is compulsory. Pilotage boarding stations:

Strait of Canso, Northern Approach:	45° 41′ 42″ N. 61° 28′ 18″ W.
Strait of Canso, Southern Approach:	
(a) For vessels of 730 ft. and under:	45° 29′ 30″ N. 61° 11′ 06″ W.
(b) For vessels over 730 ft.:	45° 24′ 00″ N. 61° 01′ 00″ W.

Vessels must report by radio-telephone or radio-telegraph their ETA's 12 hours before the vessel's ETA. Time used must be UTC. ETA's must be confirmed or corrected not more than 8 hours later nor less than 4 hours prior to the new ETA.

Canso pilot boat guards Channel 14 (working on Channel 12) whilst in the area of Chedabucto Bay approach and Channel 14 whilst in the area of St. George's Bay approach.

ANCHORAGES: In the interests of safe navigation, anchorage berths for vessels of 65 ft. registered length have been established.

Anchorages "A" to "F" are situated in Chedabucto Bay in water depths from 14 to 26 fathoms.

Anchorages "G" to "O" are situated in Inhabitants Bay in water depths from 5 to 8 fathoms.

There is additional anchorage available at Pirates Harbour (45° 35′ 22″ N., 61° 22′ 28″ W.).

RESTRICTIONS: Overhead power cable – clearance 178 ft.

MAX. SIZE: Tankers of 350,000 d.w.t. can be accommodated at the Statia Terminal at Point Tupper. See also "Berthing" and "Tankers".

HEALTH: Pratique will be granted on arrival at berth by boarding officers, but it is the Master's responsibility to report by radio all details of any sickness or death occurring during the voyage to "Quarantine Halifax".

RADIO/VHF: Halifax (VCS) continuous year round. 500, A2; 2,182, A3; 156.8; F3 also 4, 6, 8, 12, 16, 22 MHz bands.

Sydney (VCO) continuous year round. 500, A2; 2,182 A3, 156.8, F3.

Canso (VAX) continuous year round. 2,182, A3; 156.8, F3.

Grindstone, Magdalien Island (VCN) continuous year round. 500, A2; 2,182, A3; 156.8 F3.

Canso Locks (VAZ3) continuous during navigation season. 2,182, A3; 156.8, F3.

Canso Traffic – VHF Channels 12 and 14 (Tel: (902) 625-5439, (902) 625-1950).

Canadian Coast Guard VTS and Pilot guard VHF Channel 14.

TUGS: Provided by Atlantic Towing Ltd. at the oil terminal.

BERTHING: *Nova Scotia Forest Industries Wharf:* Situated at Madden Point and serves the pulp and paper manufacturing facility, the wharf is 425 ft. long, with dolphins extending a farther 100 ft. from each end of the wharf, depth alongside 26 ft. at LW. Fresh water available, bunkers not available.

Georgia Pacific Corporation Terminal: Situated at Point Tupper, this gypsum loading facility consists of a series of dolphins capable of mooring a ship over 700 ft. in length and has a min. depth of 32 ft. LW. Conveyor system from plant to centre of dolphins. No fuel oil or fresh water available.

Port Hawkesbury Government Wharf: The 6.7 m. wide pier, 149.3 m. long. Provides a 80.0 m. commercial berth with 5.5 m. at LW. No fresh water or open storage area. Dockside power and telephone available.

Mulgrave Department of Transport Wharf: Berthing length 1,440 ft., depth of water 25 ft. to 32 ft. Used for wood pulp and general cargo loading/discharging rail tracks, fresh water available, fuel oil delivered by truck, No permanent hoists, mobile cranes upon request.

MEDICAL: Masters are required to give early advice to their Agent regarding medical and dental attention requirements, hospitalisation cases will be referred, Antigonish, 40 miles distant.

TANKERS: Statia Terminal – Point Tupper:

Operator: Statia Terminals Point Tupper, Inc., P.O.Box 2116, Port Hawkesbury, Nova Scotia, Canada B0E 2V0. Tel: (902) 625-1711. Fax: (902) 625-3098. Contact: Paul Crissman,Terminal Manager.

Location: Lat. 45° 34.5′ N., Long. 61° 20.5′ W.

With a current total capacity of more than 7.6 million barrels, the Terminal is the largest of its kind on the East Coast of North America, and is located in the deepest ice-free harbour. The primary function of the Terminal is to transship crude and refined hydrocarbons, blend gasoline and fuel oil, and supply ships' bunkers.

Notices and Communications: Vessels proceeding to Statia Terminals Point Tupper are required to radio Port Hawkesbury via Sydney Radio (VCO) or Halifax Radio (VCS) with 72 hours, 48 hours and 24 hours notice of ETA. For bunker requirements, the 48 hour notice should indicate the exact bunker quantities and grades required. After tendering the 24 hour ETA, any change in ETA greater than 2 hours is also to be advised. 4 hours prior to arrival, vessels should contact Statia Terminals Point Tupper via VHF Channel 7A for instructions (Control Room, Tel: (902) 625-2607). Telex notices may be made to F.K.Warren Agency (Telex No. 01937513) in Nova Scotia, Canada, or by contacting the Terminal through the following Tel: (902) 625-1711. Fax: (902) 625-3098.

Tugs: 2 tugs are available at all times in Point Tupper. Additional information and/or tugs can be obtained by contacting Point Tupper Marine Services Ltd. (See "Operator" above). Also see "Notice".

Vessel Dimension Requirements:

	Berth I	*Berth II*
Maximum Allowable Draft	84 ft.	45 ft.
Maximum LOA	1,245 ft.	750 ft.
Minimum LOA	550 ft.	N/A
Deadweight Restrictions:		
Maximum	350,000	75,000
Minimum	25,000	N/A
Loading Arms	6×16 in. 2×10 in.	2×12 in. 2×10 in. 2× 8 in.

Bunker Connections at Dock:

Fuel Oil	2×10 in.	1× 8 in.
Diesel Oil	1×16 in.	2×10 in. 1× 8 in.

Tanker Discharge Rates (B.P.H.):

Crude Oil	80,000/100,000	20,000/25,000
Fuel Oil	43,000	12,300
Diesel Oil	12,800	12,800
Gasoline	12,700	12,700

Tankage:

Crude Oil Storage: 8 tanks 450,000 bbls. each, equipped with internal floating roofs and side entry mixers.

Ballast Facilities: There is no ballast facility at Point Tupper. All vessels must arrive with only segregated ballast. No ballast contained in the vessel's cargo tanks may be discharged into the Strait of Canso, even if the ballast meets the 15 p.p.m. limitation.

Expansion Capabilities: The facility comprises 1,720 acres. Additional tanks can be constructed.

Notice: Dated 6th October 1995.

Port costs for calling at Statia Terminals Point Tupper Inc.

Vessel Size	*Rate*	*Tugs included*
0 to 5,000 d.w.t.	U.S.$ 6,450	None.
5,001 to 10,000 d.w.t.	U.S.$ 9,700	1 tug in, none out.
10,001 to 15,000 d.w.t.	U.S.$ 12,950	1 tug in, 1 tug out.
15,001 to 25,000 d.w.t.	U.S.$ 16,150	1 tug in, 1 tug out.
25,001 to 35,000 d.w.t.	U.S.$ 19,400	1 tug in, 1 tug out.
35,001 to 85,000 d.w.t.	U.S.$ 27,250	2 tugs in, 2 tugs out.
85,001 to 121,000 d.w.t.	U.S.$ 31,600	2 tugs in, 2 tugs out.
121,001 to 220,000 d.w.t.	U.S.$ 37,350	2 tugs in, 2 tugs out. *
220,001 to 290,000 d.w.t.	U.S.$ 43,250	2 tugs in, 2 tugs out. *
290,001 to 350,000 d.w.t.	U.S.$ 48,300	2 tugs in, 2 tugs out. *
350,001 up	U.S.$ 50,250	2 tugs in, 2 tugs out. *

* Additional tugs will be required by the Pilots. The additional tugs will be supplied at cost; however, will require a minimum of 10 days notice to be dispatched from another port.

The above charges include ship agency, pilotage, harbour dues, line handling, line boat(s), tug(s) (as indicated), and one round trip use of the water taxi.

Presently: Point Tupper Marine Services Limited's "Bulk Oil Cargo Fee" at Canadian$0.225 per gross metric tons cargo as of November 9/95.

Signed: Robert L. Potter, President, Point Tupper Marine Services Ltd.

DENSITY: 1025. Influenced by Spring thaw run-off.

FRESH WATER: Available at Point Tupper.

FUEL: Not available.

CONSULS: See "Halifax".

REPAIRS: Hull and machinery repairs to vessels afloat possible. Radio and radar service is available locally, the vessel's Agent should receive early advice of repair requirements.

GANGWAY/DECK WATCHMEN: Usually ship's crew.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 50 cigars or 2 lb. tobacco per person per week. Beer: 288 oz. of beer or ale. Wines/spirits: Total of 40 ounces per person over 19 years old.

Subsequent issues may be authorised to crew members of foreign vessels, but the max. quantity any crew member may hold at any time must not exceed 300 cigarettes, or 75 cigars, or 3 pounds of tobacco and 60 ounces wines/spirits.

Crew personal effects such as radios, tape recorders, binoculars, etc., should be declared on manifest.

REPATRIATION: Crew changes and repatriation permitted.

AIRPORT: Regular services by Air Canada from Halifax International Airport 150 miles distance, and from Sydney Airport 90 miles distant. Charter flights by small aircraft can be arranged from Port Hawkesbury Airport to Halifax and Sydney.

SUPPLIES: Provisions and bonded stores come from Halifax, so Masters are advised that to avoid delays, their Agent should be notified prior to arrival on their requirements, particularly for deck and engine stores.

Laundry facilities are available and in order to expedite the service, Masters should request their Agent to have a representative to attend on arrival.

Supplies of stores will have to be conveyed to tankers at Statia Terminals Point Tupper, Inc. by stores boat or barge.

TIME: GMT minus 4 hours. First Sunday in April, clocks advanced 1 hour, last Sunday in October, clocks retarded 1 hour.
POLICE/AMBULANCE/FIRE: Police 625-2220; Ambulance 625-2929 or 625-1911; Fire 625-2838.
SHORE LEAVE: Permitted, via water taxi.
CANSO CAUSEWAY CANAL: Max. vessel dimensions, length 715 ft., width 75 ft., draft 28 ft., vessels with draft greater than 28 ft. and not more than 30 ft. may proceed through with special permission of the Canal Superintendent. Depth of water on the North and South approach mooring berth is 32 ft. During the months December to April, Masters should consult with Ice Operations, Halifax, whether lock in operation.
GENERAL: *Environmental Emergencies:* Tel: 1-800-565-1633 (Oil, pesticide and chemical spills, fish kills, defective aids to navigation and other environmental emergencies).

Local Salvage Co.: Contact Point Tupper Marine Services Ltd. Tel: 1-902-625-1711.
AUTHORITY: The Port Manager, Port Hawkesbury, Nova Scotia, Canada. *Tel:* (902) 747-3143, after hours (902) 625-2508. *Contact:* John Langley, Port Manager – Mulgrave, N.S.
Transport Canada, P.O.Box 1013, Dartmouth, Nova Scotia, Canada B2Y 4K2. *Tel:* (902) 426-7132, 747-3143. *FAX:* (902) 426-3904, 747-2860.

PORT HOPE, Ontario: 43.56 N. 78.17 W. (See Plan)

TUGS: None.
BERTHING: Two breakwaters form artificial harbour. Depth at entrance 5 ft. – 10 ft. Town docks have 650 ft. total berthing length with 7 ft. – 9 ft. alongside. Queen's Wharf is 1,200 ft. long with 6 ft. alongside.
FRESH WATER: Available at Queen's Wharf.
FUEL: Diesel fuel and gasoline available.
AUTHORITY: Port Hope Harbour Committee, 56 Queen Street (P.O.Box 117), Port Hope, Ontario L1A 3V9, Canada. *Tel:* (905) 885-4544. *Contact:* E.M. Creighton, Chairman.

PORT SAGUENAY (Chicoutimi), Quebec: 48.25 N. 71.02 W. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
3 Crews Declaration (Canadian Form Y14).
3 Stores Lists (Canadian Form E.1).
Health Declaration (Canadian Form QS. 2001).
3 Cargo Manifests.
3 Bills of Lading.
PILOTAGE: Pilotage is compulsory for Grande-Anse Terminal and Albert-Maltais Marine Terminal. Pilots board vessels that are Westerly-bound at Anse-aux-Basques and Easterly-bound at Quebec City.
ANCHORAGE: Ships can anchor on the North side at the beginning of the channel.
RESTRICTIONS: Albert-Maltais Marine Terminal: The navigation season is from mid-April to end of November (approximately).
MAX. SIZE: Grande-Anse Marine Terminal: 100,000 d.w.t. Albert-Maltais Marine Terminal: 10,000 d.w.t.
HEALTH: Pratique may be obtained by radio to Quarantine Quebec. Health Officer boards on arrival.
RADIO: The Master of every ship inward bound in the Gulf of St.Lawrence and destined for ports West of Anse-aux-Basques must report his ETA to "Pilots Montreal" via Vessel Traffic Service on VHF Channel 14 (156.7 MHz), or by other means of communications to Seven Island Radio Station (VCK), giving his ETA at Escoumins Pilotage Station.
VHF: No port radio station.
RADAR: VTS Les Escoumins, Channel 14 (156.7 MHz).
TUGS: Available.
BERTHING:
Grande-Anse Marine Terminal:
Location:
On the Saguenay River at about 54 nautical miles from junction of the Saguenay with the St. Lawrence. Latitude: 48° 24.1′ N., Longitude: 70° 49.9′ W.
Wharf Length: 286 m.
Depth: 13.8 m. at mean low tide.
Berthing Capacity: Over 100,000 d.w.t.
Storage: Transit shed – length 127 m.
width 45 m.
area 5,715 sq.m.
Open storage – 5.5 hectares.
Navigation Period: Year-round.
Albert Maltais Marine Terminal:
Location: On the Saguenay River at about 60 nautical miles from junction of the Saguenay with the St. Lawrence. Latitude: 48° 27.0′ N., Longitude 70° 59.2′ W.
Dock: Length: 305 m.
Width: 150 m.
Depth: 9.1 m. at mean low tide.
Vessels: 10,000 d.w.t.
Berthing Capacity: Maximum draft: 7.8 m.
Maximum length: 137 m.
Channel: 6.0 km. × 61 m. width.
Navigation Period: From mid-April to mid-December.
CRANES: At the berth at Grande-Anse there is 1×165 ton capacity crane.
BULK CARGO FACILITIES: Dry bulk storage: 80,000 tons (salt). 40,000 tons (coal).
Liquid bulk storage: 12,000 tons (caustic).
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: *Loading Ships:* The regular working hours at Grande-Anse Marine Terminal are: 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs. However, according to user needs, the schedule can be extended during the week until 2200 hrs. and weekend from 0800 hrs. to 2200 hrs. (7 days a week).
MEDICAL: Doctors, hospital facilities available.
TANKERS: No facilities.
DENSITY: Fresh water.
FRESH WATER: Available (24 hours a day).
FUEL: Available by truck only (24 hours a day). Make arrangements with Agent.
REPAIRS: Minor machine shop repairs only.
FIRE PRECAUTIONS: No smoking in the dangerous area.
CONSULS: Norway, France and U.S.A.
REPAIRS: Small repairs possible.
DRY DOCKS: None available.
SURVEYORS: Classification Society and Cargo Surveyors available.
GANGWAY/DECK WATCHMEN: Not necessary, but it depends on the ship.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes for each man. Officers may be allowed 1 bottle wine/spirits, Master up to 5 bottles.
CARGO GEAR: See "Cranes".
REPATRIATION: Possible.
AIRPORT: 25 km. from the port. Flights operated by Air Alliance and Canadian.
TIME: GMT minus 5 hours. Daylight Saving Time: GMT minus 4 hours, applied from first Sunday of April until last Sunday of October each year.
HOLIDAYS:
New Year's Day (January 1st)
January 2nd
Easter Monday
Victoria Day (third Monday of May)
St.Jean-Baptiste Day (June 24th)
Canada Day (July 1st)
Labour Day (first Monday of September)
Thanksgiving Day (second Monday of October)

Vessel Dimension Requirements:

	Berth I	*Berth II*
Maximum Allowable Draft	84 ft.	45 ft.
Maximum LOA	1,245 ft.	750 ft.
Minimum LOA	550 ft.	N/A
Deadweight Restrictions:		
Maximum	350,000	75,000
Minimum	25,000	N/A
Loading Arms	6×16 in. 2×10 in.	2×12 in. 2×10 in. 2× 8 in.

Bunker Connections at Dock:

Fuel Oil	2×10 in.	1× 8 in.
Diesel Oil	1×16 in.	2×10 in. 1× 8 in.

Tanker Discharge Rates (B.P.H.):

Crude Oil	80,000/100,000	20,000/25,000
Fuel Oil	43,000	12,300
Diesel Oil	12,800	12,800
Gasoline	12,700	12,700

Tankage:

Crude Oil Storage: 8 tanks 450,000 bbls. each, equipped with internal floating roofs and side entry mixers.

Ballast Facilities: There is no ballast facility at Point Tupper. All vessels must arrive with only segregated ballast. No ballast contained in the vessel's cargo tanks may be discharged into the Strait of Canso, even if the ballast meets the 15 p.p.m. limitation.

Expansion Capabilities: The facility comprises 1,720 acres. Additional tanks can be constructed.

Notice: Dated 6th October 1995.

Port costs for calling at Statia Terminals Point Tupper Inc.

Vessel Size	*Rate*	*Tugs included*
0 to 5,000 d.w.t.	U.S.$ 6,450	None.
5,001 to 10,000 d.w.t.	U.S.$ 9,700	1 tug in, none out.
10,001 to 15,000 d.w.t.	U.S.$ 12,950	1 tug in, 1 tug out.
15,001 to 25,000 d.w.t.	U.S.$ 16,150	1 tug in, 1 tug out.
25,001 to 35,000 d.w.t.	U.S.$ 19,400	1 tug in, 1 tug out.
35,001 to 85,000 d.w.t.	U.S.$ 27,250	2 tugs in, 2 tugs out.
85,001 to 121,000 d.w.t.	U.S.$ 31,600	2 tugs in, 2 tugs out.
121,001 to 220,000 d.w.t.	U.S.$ 37,350	2 tugs in, 2 tugs out. *
220,001 to 290,000 d.w.t.	U.S.$ 43,250	2 tugs in, 2 tugs out. *
290,001 to 350,000 d.w.t.	U.S.$ 48,300	2 tugs in, 2 tugs out. *
350,001 up	U.S.$ 50,250	2 tugs in, 2 tugs out. *

* Additional tugs will be required by the Pilots. The additional tugs will be supplied at cost; however, will require a minimum of 10 days notice to be dispatched from another port.

The above charges include ship agency, pilotage, harbour dues, line handling, line boat(s), tug(s) (as indicated), and one round trip use of the water taxi.

Presently: Point Tupper Marine Services Limited's "Bulk Oil Cargo Fee" at Canadian$0.225 per gross metric tons cargo as of November 9/95.

Signed: Robert L. Potter, President, Point Tupper Marine Services Ltd.

DENSITY: 1025. Influenced by Spring thaw run-off.

FRESH WATER: Available at Point Tupper.

FUEL: Not available.

CONSULS: See "Halifax".

REPAIRS: Hull and machinery repairs to vessels afloat possible. Radio and radar service is available locally, the vessel's Agent should receive early advice of repair requirements.

GANGWAY/DECK WATCHMEN: Usually ship's crew.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 50 cigars or 2 lb. tobacco per person per week. Beer: 288 oz. of beer or ale. Wines/spirits: Total of 40 ounces per person over 19 years old.

Subsequent issues may be authorised to crew members of foreign vessels, but the max. quantity any crew member may hold at any time must not exceed 300 cigarettes, or 75 cigars, or 3 pounds of tobacco and 60 ounces wines/spirits.

Crew personal effects such as radios, tape recorders, binoculars, etc., should be declared on manifest.

REPATRIATION: Crew changes and repatriation permitted.

AIRPORT: Regular services by Air Canada from Halifax International Airport 150 miles distance, and from Sydney Airport 90 miles distant. Charter flights by small aircraft can be arranged from Port Hawkesbury Airport to Halifax and Sydney.

SUPPLIES: Provisions and bonded stores come from Halifax, so Masters are advised that to avoid delays, their Agent should be notified prior to arrival on their requirements, particularly for deck and engine stores.

Laundry facilities are available and in order to expedite the service, Masters should request their Agent to have a representative to attend on arrival.

Supplies of stores will have to be conveyed to tankers at Statia Terminals Point Tupper, Inc. by stores boat or barge.

TIME: GMT minus 4 hours. First Sunday in April, clocks advanced 1 hour, last Sunday in October, clocks retarded 1 hour.
POLICE/AMBULANCE/FIRE: Police 625-2220; Ambulance 625-2929 or 625-1911; Fire 625-2838.
SHORE LEAVE: Permitted, via water taxi.
CANSO CAUSEWAY CANAL: Max. vessel dimensions, length 715 ft., width 75 ft., draft 28 ft., vessels with draft greater than 28 ft. and not more than 30 ft. may proceed through with special permission of the Canal Superintendent. Depth of water on the North and South approach mooring berth is 32 ft. During the months December to April, Masters should consult with Ice Operations, Halifax, whether lock in operation.

PORT HOPE, Ontario: 43.56 N. 78.17 W. (See Plan)

TUGS: None.
BERTHING: Two breakwaters form artificial harbour. Depth at entrance 5 ft. – 10 ft. Town docks have 650 ft. total berthing length with 7 ft. – 9 ft. alongside. Queen's Wharf is 1,200 ft. long with 6 ft. alongside.
FRESH WATER: Available at Queen's Wharf.
FUEL: Diesel fuel and gasoline available.
AUTHORITY: Port Hope Harbour Committee, 56 Queen Street (P.O.Box 117), Port Hope, Ontario L1A 3V9, Canada. *Tel:* (905) 885-4544. *Contact:* E.M. Creighton, Chairman.

PORT SAGUENAY (Chicoutimi), Quebec: 48.25 N. 71.02 W. (See Plan)

DOCUMENTS:
- 2 Crew Lists.
- 2 Passenger Lists.
- 3 Crews Declaration (Canadian Form Y14).
- 3 Stores Lists (Canadian Form E.1).
- Health Declaration (Canadian Form QS. 2001).
- 3 Cargo Manifests.
- 3 Bills of Lading.

PILOTAGE: Pilotage is compulsory for Grande-Anse Terminal and Albert-Maltais Marine Terminal. Pilots board vessels that are Westerly-bound at Anse-aux-Basques and Easterly-bound at Quebec City.
ANCHORAGE: Ships can anchor on the North side at the beginning of the channel.
RESTRICTIONS: Albert-Maltais Marine Terminal: The navigation season is from mid-April to end of November (approximately).
MAX. SIZE: Grande-Anse Marine Terminal: 100,000 d.w.t. Albert-Maltais Marine Terminal: 10,000 d.w.t.
HEALTH: Pratique may be obtained by radio to Quarantine Quebec. Health Officer boards on arrival.
RADIO: The Master of every ship inward bound in the Gulf of St.Lawrence and destined for ports West of Anse-aux-Basques must report his ETA to "Pilots Montreal" via Vessel Traffic Service on VHF Channel 14 (156.7 MHz), or by other means of communications to Seven Island Radio Station (VCK), giving his ETA at Escoumins Pilotage Station.
VHF: No port radio station.
RADAR: VTS Les Escoumins, Channel 14 (156.7 MHz).
TUGS: Available.
BERTHING:
Grande-Anse Marine Terminal:
Location:
On the Saguenay River at about 54 nautical miles from junction of the Saguenay with the St. Lawrence. Latitude: 48° 24.1′ N., Longitude: 70° 49.9′ W.

Wharf Length:	286 m.
Depth:	13.8 m. at mean low tide.
Berthing Capacity:	Over 100,000 d.w.t.
Storage:	Transit shed – length 127 m. width 45 m. area 5,715 sq.m. Open storage – 5.5 hectares.
Navigation Period:	Year-round.

Albert Maltais Marine Terminal:
Location: On the Saguenay River at about 60 nautical miles from junction of the Saguenay with the St. Lawrence. Latitude: 48° 27.0′ N., Longitude 70° 59.2′ W.

Dock:	Length: 305 m. Width: 150 m. Depth: 9.1 m. at mean low tide.
Vessels:	10,000 d.w.t.
Berthing Capacity:	Maximum draft: 7.8 m. Maximum length: 137 m.
Channel:	6.0 km. × 61 m. width.
Navigation Period:	From mid-April to mid-December.

CRANES: At the berth at Grande-Anse there is 1×165 ton capacity crane.
BULK CARGO FACILITIES: Dry bulk storage: 80,000 tons (salt). 40,000 tons (coal).
Liquid bulk storage: 12,000 tons (caustic).
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: *Loading Ships:* The regular working hours at Grande-Anse Marine Terminal are: 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs. However, according to user needs, the schedule can be extended during the week until 2200 hrs. and weekend from 0800 hrs. to 2200 hrs. (7 days a week).
MEDICAL: Doctors, hospital facilities available.
TANKERS: No facilities.
DENSITY: Fresh water.
FRESH WATER: Available (24 hours a day).
FUEL: Available by truck only (24 hours a day). Make arrangements with Agent.
REPAIRS: Minor machine shop repairs only.
FIRE PRECAUTIONS: No smoking in the dangerous area.
CONSULS: Norway, France and U.S.A.
REPAIRS: Small repairs possible.
DRY DOCKS: None available.
SURVEYORS: Classification Society and Cargo Surveyors available.
GANGWAY/DECK WATCHMEN: Not necessary, but it depends on the ship.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes for each man. Officers may be allowed 1 bottle wine/spirits, Master up to 5 bottles.
CARGO GEAR: See "Cranes".
REPATRIATION: Possible.
AIRPORT: 25 km. from the port. Flights operated by Air Alliance and Canadian.
TIME: GMT minus 5 hours. Daylight Saving Time: GMT minus 4 hours, applied from first Sunday of April until last Sunday of October each year.
HOLIDAYS:
- New Year's Day (January 1st)
- January 2nd
- Easter Monday
- Victoria Day (third Monday of May)
- St.Jean-Baptiste Day (June 24th)
- Canada Day (July 1st)
- Labour Day (first Monday of September)
- Thanksgiving Day (second Monday of October)
- Christmas Day (December 25th)
- Boxing Day (December 26th)

POLICE/AMBULANCE/FIRE: Police 418-697-5100. Ambulance 418-544-3335. Fire 418-697-5100.

TELEPHONES: Available on the berth and in stevedores office.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Contact Port Authority on arrival.
WASTE OIL DISPOSAL: By truck only.
SEAMAN'S CLUBS: None.
AUTHORITY: Port Saguenay, C.P. 760, 49 Lafontaine Street, Chicoutimi, Quebec G7H 5E1, Canada. *Tel:* (418) 698-5535. *FAX:* (418) 543-4633. *Contact:* Mrs. Ghyslaine Collard, General Manager. Rejean Dufour, Planning and Operations.

PORT STANLEY, Ontario: 42.39 N. 81.13 W. (See Plan)

LOCATION: Port Stanley Harbour is located at the mouth of Kettle Creek 29 km. West of Port Burwell and 96 km. West of Long Point on the North shore of Lake Erie in the County of Elgin.
RESTRICTIONS: *Navigation Season:* March to December.
Depths:

Approach Channel	7.0 m.
Outer Harbour	6.7 m.
Outer Turning Basin	5.5 m.
Inner Harbour	6.4 m.
Inner Turning Basin	4.6 m.

TUGS: Available by arrangement.
BERTHING:

Berth No.	*Berth*	*Length (m.)*	*Depth (m.)*
B1	West Pier	642.0	6.4
B2	West Pier	70.0	4.6
B3	East Pier	259.0	6.4
B4	East Pier	300.0	4.6

FUEL: Available by road tanker.
REPAIRS: Minor repairs possible.
SERVICES: Divers, fish processing plant, fuel tank farms, rail line, storage domes, warehouses, tank farm, grain elevators.
AUTHORITY: Harbours and Ports, Canadian Coast Guard, 201 N. Front Street, Suite 703, Sarnia, Ontario, N7T 8B1 Canada. *Tel:* (519) 383-1942. *FAX:* (519) 383-1996. *Contact:* Regional Manager.
Port Official: R.C. Payne, Harbour Master/Wharfinger.

PORT WELLER, Ontario: 43.14 N. 79.13 W.

LOCATION: On the South shore of Lake Ontario, West End. Port Weller is the Northern entrance of the Welland Canal and is 5 km. East of Port Dalhousie.
PILOTAGE: Master of ships requiring pilotage service in the Port Weller-Sarnia area should send a notice of their arrival by radio-telephone so as to avoid any delay in waiting for a Pilot. When Westbound, Master should order a Pilot 4 hours in advance of the ETA at Port Weller through Prescott Radio (VBR). When Eastbound, Masters should order a Pilot 4 hours in advance of their ETA at Port Huron Buoys 11 and 12 or Rogers City. Both an accommodation ladder and a pilot ladder are required to assist Pilots boarding ships at Port Weller.
District Supervisor of Pilots: P. Hansell. P.O.Box 2008, Station B, St. Catharines, Ontario L2M 6P5. Tel: (905) 934-2921.
RESTRICTIONS: Channel depth: Limiting depth at entrance and through the Welland Ship Canal is 8.23 m. (27 ft.). Permissible draft is 8.0 m. (26 ft. 3 in.). The locks will accommodate vessels not exceeding 222.5 m. (730 ft.) overall length and 23.16 m. (76 ft.) extreme breadth.
Navigation season: April 1st to December 30th.
HEALTH: Quarantine service at Quebec, P.Q., for incoming ships from foreign ports.
RADIO: Ship-to-shore communications: Through Prescott Coast Guard Station (VBR).
TUGS: Available from Port Weller Dry Docks Ltd. for dry docking only.
BERTHING: See "St. Catharines".
MEDICAL: Hospitals at St. Catharines.
FUEL: Not available.
REPAIRS/DRY DOCKS: Port Weller Dry Docks, Ltd., 222.5 m. (730 ft.) building dock, gate width 24.38 m. (80 ft.); 228.6 m. (750 ft.) graving dock gate width 24.38 m. (80 ft.). Also 365.8 m. (1,200 ft.) fitting out berth. Complete machine shop in connection; major conversion jobs and all kinds of hull and machinery repairs. Shipyard gantry crane, 45 tons capacity; shearlegs crane, 125 tons capacity; two self-propelled cranes, 15 tons and a 55 ton level luffing gantry crane extending 609.6 m. (2,000 ft.) from the shipbuilding berth to the fitting out berth. Forged finished shafting available from Canada Foundries & Forgings Ltd.
SURVEYORS: ABS and Lloyd's at Toronto.
GARBAGE DISPOSAL: Available in the Welland Canal.
WASTE OIL DISPOSAL: Mobile reception facilities available in the Welland Canal.
SEAMAN'S CLUBS: None.
GENERAL: *Transportation:* All vessels entering the Welland Canal from Lake Ontario, or vessels from Lake Erie to Lake Ontario, via the canal, use this port but no steamship line makes it a regular port of call for discharging or loading freight. Highway connects with St. Catharines, 5.5 km.
Holidays: Officials of canal available at all times during navigation season.
Publications: Great Lakes Volume I – Sailing Directions. Seaway Handbook.
AUTHORITY: St. Lawrence Seaway Authority, Niagara Region, P.O.Box 370, 508 Glendale Avenue, St. Catharines, Ontario L2R 6V8, Canada. *Tel:* (905) 641-1932, (nights (905) 641-1939). *FAX:* (905) 461-4632. *Contact:* Captain A. Soni, Coordinator – Vessel Traffic Services.

POWELL RIVER, B.C.: 49.52 N. 124.33 W. (See Plan)

DOCUMENTS:
Customs Clearance from last port.
Manifest for goods to be off-loaded and "In Transit" cargo tonnage.
Duplicate Pratique for vessels arriving from ports other than U.S. ports.
Canadian Immigration Crew List, (Imm. 200) required in triplicate.
Passenger List in triplicate.
Seamen's passports and I.D. cards should be available when arriving from sea.
Ship's Certificates.
PILOTAGE: Payment compulsory. Incoming ships take Pilot at Race Rocks, near Victoria. Pilotage District of British Columbia.
ANCHORAGE: No suitable anchorage is available in Powell River area. Vessels usually anchor in English Bay (Vancouver) or various anchorages Vancouver Island.
MAX. SIZE: Up to 660 ft. LOA. 32 ft. draft. Tankers up to 615 ft. have berthed for discharging purposes (No. 2).
HEALTH: Duplicate pratique for first port of call. See also "Montreal".
RADAR/VHF: No radar. Pilots are in contact with tugs and mill office using VHF Channel 10. Mill office on Channel 10 throughout 24 hours.
TUGS: Two tugs available, to 500 h.p.
BERTHING: Berth No. 1 requires a tug when berthing only. Berth No. 2 Pilot's discretion. Accommodation: Channel depth 30 ft. – 35 ft. LW. Two private piers; Pier A with Berth No. 1, 500 ft. long, depth alongside 30 ft. LW, Berth No. 2, 482 ft. long, accepts vessels up to 660 ft. length, depth alongside 30 ft. LW.
Three 10-ton elevators. Dock storage for 10,000 tons. The elevators are used for loading barges only.
The mill uses toxic gases in it's manufacturing process. Area evacuation procedures must be reviewed once berthing completed.
Procedures can be obtained from the ship's Agent or Mill Dock Attendant (24 hours a day).
STEVEDORES: None. Local longshoremen only. Supercargoes are sent from Vancouver to assist in loading vessels. Longshoremen are members of Papermakers' Union.
MEDICAL: Powell River General Hospital and port doctor available. Complete medical services provided.
TANKERS: Bunker oil supplied by barges.
FRESH WATER: Unlimited supply, $35.00 connection charge.
FUEL: Fuel oil, diesel, and gasoline available.
CONSULS: Available at Vancouver, B.C.
GANGWAY/DECK WATCHMEN: On request.
OPENING/CLOSING HATCHES: By crew prior to arrival and departure.
CUSTOMS ALLOWANCES: 300 cigarettes, or 50 cigars, or 1 lb. tobacco on arrival. Issues every 7 days. 60 oz. or 2 cases beer on arrival. Issues every 7 days.
AIRPORT: 5 flights per day to Vancouver International Airport. 4 miles from docks. Charter flights available to Vancouver Island on request.
TIME: Pacific Standard Time.
HOLIDAYS: Union Contract. Usual holidays are New Year's Day, Easter Monday, Labour Day and Christmas Day.
TELEPHONES: Ship's telephone available. No. 483-3326.
SERVICES: Arranged by Powell River Shipping Services.
STORING: No cargo or equipment to be lifted on or off ship except by mill crews.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Keep available for inspection.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Canadian Dollar.
AUTHORITY: MacMillan Bloedel Ltd., 6270 Yew Street, Powell River, British Columbia V8A 4Z7, Canada. *Tel:* (604) 483-2884. *Telex:* 044755. *FAX:* (604) 483-2952. *Contact:* J.D. Hughes, Product Distribution Superintendent.
Anne Tait, Port Captain, 4727 Marine Avenue, Powell River, British Columbia, Canada. Tel: (604) 485-6866.

PRESCOTT, Ontario: 44.44 N. 75.31 W. (See Plan)

For important General Information refer to "St. Lawrence Seaway".
PORT LIMITS: The Canada Ports Corporation, Port of Prescott, is located on the N.W. shore of the upper St. Lawrence River, approximately 125 miles West of Montreal, Quebec. See "Plan" for Port Limits.
DOCUMENTS: Documentation to the satisfaction of St. Lawrence Seaway Authority, Canada Coast Guard, Canada Customs, Agriculture Canada (Grain carriers) will suffice.
Also see "Montreal".
PILOTAGE: As required by Canadian Pilotage Authority, Upper Street, Lawrence River.
ANCHORAGE: As prescribed by St. Lawrence Seaway Authority.
RESTRICTIONS: Seaway draft in both loading and unloading slips. Permission must be granted by the Administrative Officer of the Port of Prescott prior to docking at this port.
MAX. SIZE: Loading Slip: 924 ft./617 ft. length and 200 ft. width. Unloading Slip: 1,450 ft./1,294 ft. and 250 ft. width. Seaway draft in both slips. River Berth: Length 478 ft. See "Plan".
HEALTH: In case of suspected diseases or fever on board, vessels must contact Leeds & Grenville Health Unit. Tel: 613-345-5685.
RADIO: Canada Coast Guard.
VHF: Canada Coast Guard.
TUGS: Tugs not required at Port of Prescott.
BERTHING: Ships loading grain dock in Loading Slip "A": Length of dock 924 ft. This slip also used for loading/unloading cargo on adjacent side of slip, length of dock 617 ft. Width of Slip "A" 200 ft. Short dock of 478 ft. on riverside for ship to tie up.
Ships unloading grain dock in Loading Slip "B": Length of dock 1,294 ft. This slip also used for loading/unloading cargo on adjacent side of slip. Length of dock 1,450 ft. Width of Slip "B" 250 ft.
Ships loading or unloading grain: Dock in respective slips against elevator. Ships loading/unloading other cargoes, taking on fuel, etc., or berthing for repairs, tie up in loading or unloading slips or on short dock.
CRANES: No cranes on site belonging to Port. Cranes and ship loading conveyors available from others.
BULK CARGO FACILITIES: See "Berthing". In addition to paved areas on docks adjacent to elevator building, an additional 5,600 sq.m. of paved asphalt area available for containers, palletised cargo, steel, etc., at head of loading slip. Other unpaved land available for rental or lease by arrangement.
Grains can be unloaded from vessel into grain elevator on to vessels, barges, railcars or trucks (See limitations under "General"). Other bulk commodities, containers, palletised cargo and other freight may be stored on property/wharves by arrangement. Trucks, cranes and forklifts have access to wharves adjacent to elevator in both loading and unloading slips. Canada Customs regulations apply to cargoes of foreign origin.
SPECIALISED CARGO HANDLING FACILITIES: See "Bulk Cargo Facilities".
BRIDGES: No bridges.
STEVEDORES: A minimum of 16 hours notice required for ordering of gangs for grain loading/unloading. Tariff schedule available on request. Normal hours of work 0800 hrs. to 1630 hrs. Rates for overtime work also available on request. Gangs normally available up to 2200 hrs.
MEDICAL: Medical physicians, dentists, chiropractors, pharmacies and ambulance services available in Prescott. Nearest hospital is Brockville (25 km.). The Port Office will assist Agents to direct patients to appropriate medical attention as soon as possible on request.

TANKERS: Not a tanker port. However, port does have an oil containment boom which can be deployed to extend across ship's entrance to Slip A – Loading Slip. Port works in conjunction with Canada Coast Guard Base, Prescott, Ontario, in case of an oil spill.
DENSITY: Fresh water.
FRESH WATER: Potable drinking water available.
FUEL: Available by tank truck.
FIRE PRECAUTIONS: Empty tankers arriving at this port for repairs must be purged before arrival to meet the requirements of the law. No burning, welding or grinding allowed on docks against grain elevator.
CONSULS: No consulates locally. Consulates in Ottawa, 45 miles.
REPAIRS: Repairs or arrangement for repairs available by Prescott Machine & Welding. Tel: 613-925-4277.
DRY DOCKS: No dry dock.
SURVEYORS: Port Warden available from Department of Transport, Ship's Safety, Kingston, Ontario. Tel: 613-548-4451. Canadian Grain Commission, Grain Inspection, Montreal, Quebec. Tel: 514-283-7696. Agriculture Canada, Ottawa, Ontario. Tel: 613-998-9926.
GANGWAY/DECK WATCHMEN: Available through Port Administration Office.
HATCHES: Opening and closing of hatches by ship's crew.
CUSTOMS ALLOWANCES: Contact Canada Customs Office, Prescott, Ontario. Tel: 613-925-4225.
REPATRIATION: Possible, contact Canada Customs and Immigration Offices, Prescott, Ontario. Tel: 613-925-2595.
AIRPORT: Ottawa International Airport, 45 miles. Montreal International Airport, 125 miles. Both airports served by regular airlines.
TIME: Eastern Standard Time, last weekend of October to last weekend of March. Eastern Daylight Time, last weekend of March to last weekend of October.
HOLIDAYS: New Year's Day; January 2nd; Good Friday; Easter Monday; Victoria Day; Dominion Day; Civic Holiday; Labour Day; Thanksgiving Day; Remembrance Day; December 24th (half day); Christmas Day; Boxing Day; December 31st (half day). Cargo work may be arranged on these days.
POLICE/AMBULANCE/FIRE: Ontario Provincial Police, Prescott Office. Tel: 613-925-4221 or 1-800-267-8919.

Ambulance Service, Prescott. Tel: 613-925-2925.

Fire Emergency Calls. Tel: 613-925-1211.

STORING: Local riggers can be employed to assist in storing.
SHIP SUPPLY SERVICE: Contact ship's Agent or Seaway Authority.
SHORE LEAVE: Crew members allowed ashore as long as Canada Customs Office gives permission.
IDENTIFICATION CARDS: Shore passes not issued by port. Canada Customs will advise as to identification papers required while ashore.
GARBAGE DISPOSAL: Garbage collection available by licensed private operator. Contact: T.L.C. Waste Systems. Tel: 613-342-3413.
WASTE OIL DISPOSAL: Contact T.L.C. Waste Systems. Tel: 613-342-3413.
SEAMAN'S CLUBS: No seaman's club at this port. Churches of most denominations in Prescott, 3 miles. Prescott has all modern municipal facilities, i.e. shops, post office, sports fields and licensed taverns and dining establishments.
CURRENCY: Canadian currency. U.S.$ 1.00 = Can.$ 1.37 (2.96).
REGULATIONS: Safety regulations as prescribed by Canada Labour Code apply.
DELAYS: Unless ship's berth is occupied by another vessel, minimum delays.
GENERAL: For information not listed, contact Ports Canada Office.
DEVELOPMENTS: No new developments planned.
AUTHORITY: Ports Canada, P.O.Box 520, River Road East, Prescott, Ontario K0E 1T0, Canada. *Tel:* (613) 925-4228. *FAX:* (613) 925-5022. *Contact:* Raymond Robusky, General Manager, Port Operations (Tel: 613-957-6762). Claire Worth, Port Financial and Administrative Officer (Tel: 613-925-4228). John Horan, Operations Manager (Tel: 613-925-4228).

PRINCE RUPERT, B.C.: 54.19 N. 130.20 W. (See Plan)

PORT LIMITS: Prince Rupert Harbour Limits are shown on Canadian Charts No. 3957 and 3958, and described in British Columbia Coast Sailing Directions (Vol. II), published by the Canadian Hydrographic Service. Porpoise Harbour and Ridley Island are included within the Prince Rupert Harbour limits.

Charter-party terms govern when laytime will commence and, as such there is generally no specific geographical point at which a vessel is considered to be an "arrived ship".

DOCUMENTS: If first Canadian port:

General Declaration (A6) 5 copies.
Cargo Declaration (A6A) (inward cargo) 5 copies.
Crew List (IMM. 200) 3 copies.
List of Ship's Stores (E.1) 3 copies.
Personal Possession List (Crew Declaration Y.14) 3 copies.
Maritime Declaration of Health (QS 2001) 3 copies.
Calculation of stability for vessels loading bulk grain (82/0579).
Warning to Ship Owners (Agriculture Canada) 2 copies.

PILOTAGE: Compulsory. Telegraphic address: "Pilots Victoria", Tel: (604) 627-3015. Telex: 047-89133. 48 hours' notice required with confirmation of ETA Pilot Station at 24 hours and 12 hours. VHF Channels 17, 77 and 16. Pilot boat, "Pacific Pilot Four", 20 m. vessel with red hull and yellow/orange house. Boarding station 1 mile radius from Triple Islands (Lat. 54° 18′ N., Long. 130° 53′ W.). Heavy weather – follow pilot boat into sheltered waters when advised by Pilot.
ANCHORAGES: Inside harbour limits – allocated by Harbour Master, Port of Prince Rupert.

A: Grindstone Beacon (Fl R) bearing 276° (T) × 8.8 cables, 65 m. depth. Max. LOA 270 m.
B: Grindstone Beacon (Fl R) bearing 257° (T) × 13.9 cables, 35 m. depth. Max. LOA 270 m.
C: Grindstone Beacon (Fl R) bearing 251° (T) × 19.0 cables, 40 m. depth. Max. LOA 225 m.
D: Grindstone Beacon (Fl R) bearing 248° (T) × 24.2 cables, 40 m. depth. Max. LOA 180 m.
V: Seal Cove Beacon bearing 067° (T) × 12.5 cables, 40 m. depth. Max. LOA 170 m.
E: Seal Cove Beacon bearing 128° (T) × 4.4 cables, 46 m. depth. Max. LOA 200 m.
X: Greentop Beacon bearing 232° (T) × 19.3 cables, 57 m. depth. Max. LOA 240 m.
Y: Greentop Beacon bearing 316° (T) × 19.5 cables, 68 m. depth. Max. LOA 300 m.
Z: East Kinahan Is. Lt. bearing 281°(T) × 12.9 cables, 40 m. depth. Max. LOA 270 m.

Note: Anchorage Z used as a standby anchorage with maximum waiting time of 6 hours.

Additional anchorages area available outside harbour limits in the vicinity of Prescott Island.

RESTRICTIONS: Nil on Prince Rupert Harbour. Porpoise Harbour, slack water and daylight, Max. LOA 187 m. Swept to 7.0 m. (23 ft.) at LW.
MAX. SIZE: See "Berthing".
HEALTH: Master shall complete and furnish promptly to the Customs Inspector, 3 copies of the Declaration of Health in the prescribed form.

Advance radio notification to a Quarantine Station applies only if a condition of health irregularity occurs onboard.

Masters should acquaint themselves with Section 12 of the Quarantine Regulations.

RADIO: Prince Rupert Coast Guard Radio 'VAJ' 500, 2182, 4125 and VHF Channel 16.
VHF: Prince Rupert Vessel Traffic Services operate on VHF Channels 11 and 71. Vessels should establish communications with "Prince Rupert Traffic" on VHF Channel 11 when 50 nautical miles West of the Queen Charlotte Islands. Vessels proceeding to Prince Rupert via Vancouver or Tofino Traffic Zones will be advised when to change frequencies to VHF Channel 11. Vessels at anchor within the Harbour Limits must also maintain a radio watch on Channels 16 and 71.

Vessels wishing to communicate with the Port Authority shall call "Prince Rupert Traffic" on Channel 71.

TUGS: Join vessel off berth. Not all tugs have lines. No extra charge if tug's line used.
Mooring: Linesboat required at berths on Ridley Island. Linesmen available at all berths through ship's agent.
BERTHING: DEEP SEA BERTHS:
Fairview Terminal: (Forest Products, Mineral Concentrates, Grain By-products, Oilseed, Heavy Lifts and General).

Owner	Prince Rupert Port Corporation.
Length	645 m.
Depth.	13.70 m.
Open Area	21.5 hectares
Covered Storage. .	6,467 sq.m.
Rail Siding	2,850 m.
Ro/Ro	145.6 ton ramp

Ocean Dock: (Passenger Vessels, Max. LOA 150 m. and Max. displacement 5,000 tons).

Owner	Prince Rupert Port Corporation.
Length	151 m.
Depth.	7.90 m.
Open Area	5,754 sq.m.

Cruise Ship Lightering Dock:
Owner: Prince Rupert Port Corporation.

This facility is located 380 m. N.E. of Ocean Dock. It consists of a concrete pontoon 30 m. in length connected to the shore by a 30 m. steel ramp.

Designed to handle passengers from cruise vessels too large to berth at Ocean Dock. The facility can handle two 12 m. tenders at any state of tide. The length of the ramp allows easy access by passengers confined to wheelchairs even at low water. Total displacement alongside not to exceed 10 tonnes.

PRG No. 2 – Ridley Island: (Grain Elevator).
Owner: Prince Rupert Grain Ltd. Tel: (604) 627-8777.

Berth:	Type	Dolphin
	Length	Berthing Dolphins 118 m. Mooring Dolphins 240 m. Mooring buoys have been positioned to take the head and stern lines of vessels over 240 m. LOA. Buoys are 300 m. apart. Max.LOA 285 m.
	Depth.	14.5 m.
	Bollard Pull	100 tonnes
	Max. Berthing Speed	0.125 m./sec. (0.24 knots).

Shiploaders:
Three - Tower Mounted – Spaced 50 m. apart. Slewing Boom.

Shipping Bins . . .	8 at 750 tonnes (28,000 bu.)
Conveyor Routes .	2 at 2,000 t.p.h.
Elevator to Ship . .	600 m.
Shoreline to Ship. .	200 m.

RTI, Ridley Island.: (Coal).
Owner: Ridley Terminals Inc. Tel: (604) 624-9511.

Type	Dolphin
Length	Berthing Dolphins 150 m.
	Mooring Dolphins 370 m.
Max. ship size	LOA 325 m.
	Breadth 50 m.
	Max. guaranteed draft 20 m.
Bollards	75 and 100 tonnes.

Shiploaders:
2 × 4,500 t.p.h. capacity each.
Quadrant type with elevating boom.
Air draft on berthing – unlimited.
Max. allowable working height 34 m. above LLW
Outreach 43.0 m.
Max. permissible combined hatch length 240 m.
Storage capacity: 1.2 million tonnes.
Stacker Reclaimer: 2 × 3,500 t.p.h. (average).
Berthing/Unberthing: At Master's discretion.
Max. berthing speed: 0.15 m./sec. (0.29 knots).
Max. design impact: 15 cm./sec. 250,000 d.w.t. 80% laden.
Tokyo Keiki approach velocity indicator is installed.

Skeena Cellulose, Porpoise Harbour: (Woodpulp).
Owner: Repap Enterprises (Montreal).
Tel: (604) 628-3671.

Length	360 m.
Depth	10.6 m.
Berthing	Daylight, slack water only.

STEVEDORES: Gangs arranged through Agent.

Main Commodities for Export and Loading Rates:
Packaged Lumber – 40,000 to 90,000 fbm per gang hour*.
Logs – up to 20,000 scrib per gang hour*.
Pulp – 45 to 200 tonnes per gang hour*.
Mineral Concentrate – up to 300 tonnes per hour.
*Dependent on ship's gear.

Non-working Days:
Ridley Terminals Inc.: Christmas Day.
All other berths: Labour Day, Christmas Day, New Years Day.

MEDICAL: Hospital facilities available.

DENSITY: Variable, 1013 to 1025.

FRESH WATER: Available at all berths.

FUEL: All major companies represented. Marine diesel oil available in limited quantities and supplied by truck or barge. Masters should radio fuel requirements in advance of arrival, and advise Prince Rupert Agent.

REPAIRS: Minor repairs to hull, machinery and electronics can be effected locally.

DRY DOCKS: Two small slipways for 150 ft.) vessels.

SURVEYORS: SGS Supervision Services Ltd., 940 Saskatoon Avenue, Prince Rupert, B.C. V8J 4J2. Tel. (604) 624-9745.

Rupert Marine Surveyors Ltd., P.O.Box 75, Prince Rupert, B.C. V8J 3P4. Tel: (604) 624-6694.

Overseas Merchandise Inspection Co. Ltd., 1434 Sloan Avenue, Prince Rupert, B.C. V8J 3X7. Tel: (604) 624-5105.

Classification Societies are based in Vancouver and will attend a vessel in Prince Rupert upon request.

GANGWAY/DECK WATCHMEN: Shore gangways available. Port Operating By-Law states that gangways shall be attended at all times by a watchman or other responsible person and clearly illuminated at night.

OPENING/CLOSING HATCHES: This work is carried out by stevedores except for specially constructed hatches such as MacGregor.

CERTIFICATES: Safety Construction, Safety Equipment, Derat, Safety Radio and Load Line.

Certificate of inspection for chain or wire lashings if timber deck cargo to be loaded.

CUSTOMS ALLOWANCES: Tobacco, 50 cigars and 200 cigarettes and 2 lb. of tobacco. Wine and Spirit, 1 bottle per officer, (40 oz.) and Beer 288 oz. or 24 pts.

CARGO GEAR: Cargo Gear Book to be ready for inspection.

REPATRIATION: Crew changes and repatriation can be carried out with little difficulty. Connections for international flights are made at Vancouver.

AIRPORT: Two major airlines (Air Canada and Canadian Airlines) offer regular jet services to Vancouver, B.C. Travelling time to airport about 1 hour.

TIME: Pacific Standard Time (GMT minus 8 hours). First Sunday in April to last Sunday in October is Summer Time, clocks advanced 1 hour.

HOLIDAYS: New Year's Day (no work); Good Friday; Easter Monday; Queen's Birthday; Dominion Day; Labour Day (no work); Thanksgiving Day; Remembrance Day; Christmas Day and Boxing Day (no work).

POLICE/AMBULANCE/FIRE: Tel: 911.

EMERGENCY CO-ORDINATION: Within Port Limits call "Prince Rupert Traffic" on VHF Channel 71 or Tel: 627-3074.

TELEPHONE: Placed on board if required.

SERVICES: Compasses adjusted. No tank cleaning equipment or facilities for discharge of tank washings. Radios and electronic navigational aids may be serviced by local technicians.

SHIP SUPPLY SERVICE:

Tug Services: Minette Bay Ship Docking Ltd., 941-8th Avenue East, Prince Rupert, B.C. V8J 2N2. Tel: (604) 624-6273.

RivTow Straits Ltd., P.O.Box 65, Prince Rupert, B.C. V8J 3P4. Tel: (604) 624-1331.

Launch Services: Prince Rupert Water Taxi, P.O.Box 685, Prince Rupert, B.C. V8J 3S1. Tel: (604) 624-3337.

Minette Bay Marine Services Ltd., (See "Tug Services").

Helicopter Services: Northern Mountain Helicopters, Terrace Airport, Terrace. Tel: 638-1955.

Vancouver Island Helicopters Ltd., P.O.Box 115, Prince Rupert, B.C. V8J 3P4. Tel: (604) 624-2792.

STORING: Stores are available without restrictions with handling equipment available.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Local currency is Canadian Dollar. Most retail stores will accept Canadian and U.S. Dollars, but exchange rate of U.S. Dollars is usually unfavourable. Banks will provide best rates. Other foreign currency not accepted.

REGULATIONS: Vessels anchored in the harbour must have engines on stand-by and second anchor ready for letting go if wind speed attains 25 knots.

GENERAL: *Navigation Characteristics:* Large, deep, natural harbour with least depth of 35 m. at the entrance. Easy access and well lit with year round, ice-free navigation.

Charts: The Port of Prince Rupert and the approaches are covered by Canadian Charts 3955, 3957 and 3958 and B.A. charts. The Canadian Hydrographic Service is gradually replacing existing charts with metric versions. The first of these metric charts is 3955. Mariners should consult Canadian Notices to Mariners issued weekly for the publication dates of additional new charts.

Tidal Information: Type: Mixed, mainly semi-diurnal. Mean Tide: Range 4.9 m., HHW 6.1 m. LLW 1.2 m. Large Tide: Range 7.7 m., HHW 7.5 m., LLW –0.2 m.

Customs and Immigration: Officers board on arrival.

AUTHORITY: Prince Rupert Port Corporation, 110 Third Avenue West, Prince Rupert, B.C. V8J 1K8. *Tel:* (604) 627-7545, emergency after office hours (604) 627-3074. *FAX:* (604) 627-7101. *Email:* pcorp Kaien.awinc.com. *Contact:* Don Krusel, President and Chief Executive Officer. Captain Peter Turner, Manager - Operations/Harbour Master. Captain David Woodman, Assistant Harbour Master.

QUEBEC, P.Q.: 46.49 N. 71.12 W. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists (cargo vessels).
8 Passenger Lists (passenger vessels).
3 Ship's Stores Lists.
3 Crew Declarations.
1 Maritime Declaration of Health.
1 Complete Manifest of cargo to be discharged in all Canadian Ports.
5 Manifest for local cargo.
No bills of lading required to Local Authorities.

PILOTAGE: Compulsory from Les Escoumins and upstream. On arrival at Anse-aux-Basques, a ship takes on board a Pilot of the Laurentian Pilotage Authority to bring the ship to Quebec. Pilotage and payment of dues are compulsory. Pilots board inbound vessels at Anse-aux-Basques. The Master of every ship inward bound in the Gulf of the St. Lawrence and destined for ports West of Anse-aux-Basques must report ETA to Pilots Montreal, via Marine Traffic Control on VHF radio Channel 14 or by other means of communication to Seven Islands Radio Station, giving any information Control may require.

A minimum notice of 24 hours and 12 hours must be given to Montreal Pilot Station. This notice must be confirmed 6 hours prior to arrival at the Pilot station.

Note: The 3 Pilot boats and Pilot Station keep watches on 156.45 MHz. (Channel 9) and have VHF facilities, which are only used for local instructions from one to the other.

Pilot boats in operation: Canada Pilot No. 9 and No. 10 (10 knots) and Abraham Martin (20 knots). Hull painted blue, white superstructure. Pilot-jack welded on stack – all-steel vessels. Equipment: Radar – echo sounder – radio VHF/all frequencies. A.M. – all frequencies – electric whistle – loud hailer – searchlight.

Pilot station can either be raised by radiotelephone frequency 156.8 MHz., by morse lamp – semaphore – by just blowing the code letter "G" consecutively or displaying code flag "G". Exact location of Pilot Station Anse-aux-Basques, on North shore of St. Lawrence River. Lat. 48° 19.2′ N., Long. 69° 24.9′ W. Pilotage ground limits are rectangular distance of 2 miles from the station. In bad weather, pilot boats removed from station to more secure position and pilotage service held up until better conditions. Same procedure applies during severe ice conditions. Any changes regarding pilot boat service obtained through Marine Traffic Control.

Vessels using pilot boarding stations within St. Lawrence River – Seaway – Quebec Harbour – Lakehead, requested provide accommodation ladder. Landing platform of accommodation ladder should be 10 ft. above water.

Vessels arriving Anse-aux-Basques without having previously stated ETA Pilot Station 24 hours and 12 hours in advance, or during such time as pilotage service held up for any reason, vessels normally proceed to anchorage off Ile-aux-Basques on Southern side of river, where good anchorage ground can be found. Further instructions will be given to Vessel by Marine Traffic Control or Pilot Station on VHF or 156.55 MHz.

ANCHORAGE: Due to submarine cables and other submarine installations, anchoring in the harbour is prohibited without permission of the Harbour Master. Permission for anchoring is to be obtained through Marine Traffic Control Centre. The official anchorage area extends Southwestward from the fixed blue light on Queen's Wharf Lat. 46° 48′ 34″ N., Long. 71° 12′ 12″ W.

RESTRICTIONS: North Traverse – Depth of water in 11 mile dredged channel is 40 ft. at low tide to which depth add height of tide which, at times, may give up to 20 ft. maximum extra.

MAX. SIZE: No limit in length and breadth. Draft limited to 47 ft. Winter and 51 ft. in Summer.

HEALTH: Radio Pratique obtained through Seven Islands by wireless. In case of reported suspected disease instructions will be given by wireless. When Pratique granted, vessel automatically cleared for *all Canadian Ports.*

RADIO: Seven Islands: Call sign VCK. Quebec: Call sign VCC, VHF Channel 16.

RADAR/VHF: A marine traffic regulating system is in effect in the approaches to and in the Port of Quebec. The St. Lawrence River Vessel Traffic System (V.T.S.) extends from due South of Sept-Iles to the upper limits of Montreal Harbour. All vessels over 100 gross tons and more than 20 m. in length are required to be fitted with VHF radiotelephone equipment and maintain a continuous listening watch on designated frequencies which are manned at all times at Control Centres located at Les Escoumins 156.45 (Channel 9), Quebec 156.55 (Channel 11) and Montreal 156.5 (Channel 10) and intended exclusively for marine traffic safety information and traffic regulatory control messages. The Master of a vessel must obtain clearance from the proper regulating Centre before entering waters under the Marine Traffic Regulating jurisdiction. A complete description of the system is available from the Port of Quebec Harbour Master.

For vessels not provided with VHF equipment, portable VHF sets will be taken on board by Pilot. Rental charge for this service. Vessels approaching meridian of Longitude passing through Sept-Iles from Eastwards should call Channel Quebec on 156.7 (Channel 14) for further instructions.

TUGS: Tugs join vessels in stream and use ship's lines.

4 tugs available, each equipped with radio-telephone. Two tugs of 4,200 h.p.; one tug of 1,200 h.p. and one tug of 7,200 h.p.

STEVEDORES: Dead-line for orders: 1100 – 1600 – 2200 hrs. for periods starting 0800 – 1300 – 1900 hrs.; 1 hour required before deadline to order gangs.

CRANES: 100 mobile cranes up to 440 tonnes capacity.

MEDICAL: No advance notice required for medical attention. Hospital facilities available.

BULK HANDLING FACILITIES: *Grain Elevators (See Page 382):*

1. Bunge – Storage capacity: 225,000 metric tons, served by CN Railways. Grain cleaning system.

2. Terminal Sillery – Storage capacity: 76,000 metric tons, served by CN and CP Railways.

A marine terminal facility on Piers 52 and 53 which include 4 bridge towers with a loading capacity of 3,100 t.p.h. A new 1,000 m. conveyor system provides repid stockpiling and recovery of bulk cargoes, while allowing direct ship to ship transfers.Liquid storage facilities of 200,000 cu.m. for any liquid products serviced by 10 in. marine pipelines and a 8 in. loading rack.

Storage facilities: 60,000 sq.m. of shed space (6 sheds), including 3 insulated and heated buildings.

TANKERS: No slop discharge facilities available. Eight tanker berths on public and private wharves. Depths from 5.8 m. to 16.7 m. See "Berthing".

FRESH WATER: Available to all berths, provided directly from the Corporation's hydrants and hoses to vessels. Rate: St. Charles River piers, 30 t.p.h. Anse-aux-Foulons 30 t.p.h. with 1 line, and 2 lines 60 t.p.h.

DRY DOCKS: Department of Public Works located within M.I.L. Davie Inc., P.O. Box 130, Levis, Quebec. "Champlain", length 350.5 m., width at gate entrance 36.6 m. "Lorne" 190.2 m. long, 22.4 m. floor width, 18.7 m. entrance breadth at high water and 7.8 m. depth on sill at high water. Floating dry dock 182.8 m. × 30.5 m. Also 3 outdoor berths and 1 covered berth.

DENSITY: Fresh water.

FUEL: Available at any berth by truck.

FIRE PRECAUTIONS: Only usual precautions; towing wire hanging overboard.

RIMOUSKI, Quebec: 48.29 N. 68.31 W.

LOCATION: Situated on the South bank of the St. Lawrence River, opposite Matane on the North bank.

DOCUMENTS: See "Quebec". Rimouski is a port of entry with Customs and Immigration Officers stationed at the port. It is also a quarantine sub-station.

PILOTAGE: Not compulsory but available. Pilots board at entrance to harbour.

APPROACHES: Rimouski is approached through a dredged channel with depth 5.2 m. (lowest tide).

ANCHORAGES: Vessels anchor in the roads or near the East end of Barnaby Island.

RESTRICTIONS: *Navigation Season:* The harbour is open year round, but occasionally assistance of ice-breakers may be required.

HEALTH: Radio Pratique available.

RADIO: Mont – Joli (VCF).

TUGS: Available but not necessary.

BERTHING: There are 2 wharves, operated by Transport Canada.

Section	*Length* (m.)	*Depth* (m.)
1	213	7.3
2	184	7.3
3	130	7.3
4	150	7.3
5	150	7.3
6	113	7.3
7	255	4.3
8	30	3.5

CRANES: All types of cranes available for hire.

STEVEDORES: *Working Hours:* Monday to Friday 0800 hrs. – 1700 hrs. Sunday and holiday work possible with advance notice.

MEDICAL: Hospital in Rimouski.

DENSITY: 1025.

FRESH WATER: Available ex-wharf.

FUEL: Bunker "C" and diesel available.

REPAIRS: Minor repairs only.

DRY DOCKS: Nearest dry dock located at Les Mechins (70 miles East of Rimouski).

AIRPORT: Rimouski Airport.

TIME: GMT minus 5 hours in Winter. GMT minus 4 hours in Summer (first Saturday in April till last Saturday in October).

HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Queen's Day (4th Monday of May), June 24th, Dominion Day (July 1st), Labour Day (1st Monday of September), Thanksgiving (2nd Monday of October), Remembrance Day (November 11th) and Christmas (December 25th and 26th).

Jacques St. Laurent, Harbour Master, Rimouski. *Tel:* (418) 723-6563, 724-5734, 723-9025, or 735-2623.

ST. ANDREWS (Bayside), New Brunswick: 45.10 N. 67.08 W. (See Plan)

DOCUMENTS:

- Clearance from Last Port.
- 3 copies of Crew List.
- Crew's Effects List.
- Stores List.
- 4 copies of Customs Entrance A-6 and 2 copies Manifests.
- Current Safety Radio Certificate.
- Safety Construction Certificate.
- Safety Equipment Certificate.
- Load Line Certificate.
- Derat Certificate.

PILOTAGE: Not compulsory but strongly recommended. Pilot boards off East Quoddy Head, Campobello Island. Notice required 24 hours. The Pilot is a retired fisherman and he only gives advice on tide and weather.

ANCHORAGES: Areas are available a few hundred metres off of the wharf face, 3 miles from the Wharf just East of St. Andrews and in the vicinity of Campobello Island. All of the locations have over 70 ft. of water and good bottom. Those in the vicinity of Campobello can be reached by radio direction from the Pilot if shelter is needed and the Pilot cannot board.

RESTRICTIONS: None have been imposed but daylight berthing and departures are recommended.

HEALTH: Send advice to Saint John, New Brunswick at least 24 hours before arrival.

RADIO: Yarmouth, Nova Scotia.

VHF: Bay of Fundy, Traffic Control Channel 14 (Tel: 506-636-4696); Pilot, Channel 11(Tel: 506-752-2283). Port Stevedores and line crews, Channel 10 (Tel: 506-529-8866. Telex: 014 47321).

BERTHING: *Bayside Marine Terminal:* The wharf is located in position Lat. 45° 09' 35" N., Long. 67° 08' 30" W. The wharf is in the form of an "L" shape.

The outer face has a length of 792 ft. and draft at LWOST of 34 ft. The inner face has a length of 260 ft. and draft of 25 ft. Mean tidal range at berth is 26 ft. The ebb tide and river flow set onto the wharf, the flood tides sets off the pier.

The distance from the Pilot Station to the pier is 21 miles, with a minimum draft of 45 ft. There are navigation lights in the channel and the pier is well lit.

CRANES: Shore cranes are available in the 25 to 35 ton range.

SPECIAL CARGO HANDLING FACILITIES: Conveyors are available to load bagged cargoes (i.e. potatoes). This equipment requires ship's crew to be very diligent in tending lines.

There is a combination freezer and cool storage at the terminal. Total capacity of 5,000 tonnes.

MEDICAL: Doctor and hospital available.

DENSITY: 1017 (varies with tide).

STEVEDORES: Normal working hours are 12 to 16 hours per day (varying by commodity), 7 days per week. Cargoes handled regularly are cartoned frozen fish, butter, meats, lumber, potatoes, unitised pulp, frozen orange juice concentrate in drums as well as fresh citrus. Transhipping is also done at the pier both across the pier and directly from ship to ship.

FRESH WATER: Available.
FUEL: MDO and IFO are available. Delivery is by truck.
SURVEYORS: Located in Saint John.
GANGWAY/DECK WATCHMEN: Ship's crew. Ship's gangway used. Fixed accommodation ladders are only usable at or near high tide.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco each man 200 cigarettes per week. Alcohol each man 40 oz. of wine or spirits per week. Ale or beer for each week of the voyage, to 8.2 litres (288 fluid ounces).
AIRPORT: Nearest commercial airport at Saint John, New Brunswick, (45 miles), but a small public airstrip is located in St. Stephen, New Brunswick (16 miles).
TIME: GMT minus 4 hours. First Sunday in April clocks advanced 1 hour and last Sunday in October clocks retarded 1 hour.
HOLIDAYS: New Year's Day; Easter Sunday; Thanksgiving Day; Christmas Day.
SHORE LEAVE: No restrictions.
GARBAGE DISPOSAL: Service is possible but must be done under the supervision of Canadian Agriculture officials. Cost is approximately Canadian $100.00 per service.
WASTE OIL DISPOSAL: Contact Inland Re-Refining Ltd. Tel: (902) 895-6346. Fax: (902) 895-6349.
SEAMAN'S CLUBS: None.
CURRENCY: Canadian Dollar.
GENERAL:
Services: Fresh provisions, ship's laundry service. Full chandlery locally available. Pre-arrival advice recommended (48 hours if possible) Tel./Fax: (506) 466-4259.
Chart: Use U.S. Chart (Calais to West Quoddy Head) No. 13398 for the Pilot Station to the pier and Canadian Chart No. 4011 for the entrance to Bay of Fundy and traffic control areas.
AUTHORITY: Transport Canada, Harbours and Ports, Champlain Industrial Park, Bayside, (P.O.Box 51), St. Andrews, New Brunswick E0G 2X0. *Tel:* (506) 529-5079 (office), (506) 529-3429 (Residence). *FAX:* (506) 529-5217. *Contact:* Milton Cross, Harbour Master.

ST. CATHARINES, Ontario: 43.10 N. 79.16 W.

Refer to "St. Lawrence Seaway" for important general information.
DOCUMENTS: See "Montreal".
PILOTAGE: Commences in lower St. Lawrence River and is continuous from district throughout Great Lakes. See "Quebec".
ANCHORAGES: Good anchorage areas at both ends of the Welland Canal.
MAX. SIZE: Max. size of vessel permitted in Welland Canal is LOA 730 ft. (222.51 m.), beam 76 ft. (23.16 m.), draft 26 ft. 03 in. (8.0 m.).
HEALTH: Pratique granted at Quebec City for incoming vessels from foreign ports.
RADIO: Prescott Radio (VBR), Buffalo Radio (WBL).
TUGS: Tugs may be obtained from Port Weller Dry Docks Ltd. for dry docking only.
BERTHING:

Port Weller Harbour East, Wharf No. 1:
Type – Various and Sundry Partial Cargoes
Equipment – Self Unloaders or Rented Cranes
Length – 638 ft. (194.5 m.)
Depth – 27 ft. (8.23 m.)
Operator – McKeil Marine Limited, 208 Hillyard Street, Hamilton, Ontario L8L 6B6.

Port Weller Harbour West Wharf No. 2:
Type – Coal, Sand, Zircon Ore, Bulk Sugar
Equipment – Self Unloaders, mobile cranes, ship's gear.
Length – 1,288 ft. (392.6 m.)
Depth – 27 ft. (8.23 m.)
Storage Capacity – 76,500 tons.
Operator – Seaway Terminals, Hamilton, Ontario Fourum Transport Ltd.

St. Catharines Wharf, Wharf No. 3 (Homer Dock):
No longer in commercial use.
Length – 330 ft. (100.6 m.)
Depth – 25 ft. (7.62 m.)

Abreast of Wharf No. 3 is a turning basin with a depth of 7.62 m. (25 ft.) for ships of 106.68 m. (350 ft.) in length.
BRIDGES: Vessels are instructed by Traffic control on the transit of the Canal. Generally no delay for bridges.
MEDICAL: Medical and hospital facilities are available.
TANKERS: No facilities.
DENSITY: Fresh water.
FRESH WATER: None available except in emergency by tank wagon.
FUEL: Available by truck from suppliers in the Welland Canal.
CONSULS: No consuls.
REPAIRS: Deck and engine repairs are possible at Port Weller.
DRY DOCKS: Situated at Port Weller able to accommodate vessels, LOA 730 ft.
SURVEYORS: ABS and Lloyd's at Toronto. Senior Steamship Inspector, Mr. J. Aspin.
GANGWAY/DECK WATCHMEN: At discretion of the Master.
CUSTOMS ALLOWANCES: See "Montreal".
AIRPORT: International Airport at Toronto, 75 miles away.
TIME: GMT minus 5 hours. Daylight Saving Time when clocks advanced 1 hour, usually first Sunday in April until last Sunday in October.
POLICE/AMBULANCE/FIRE: St. Catharines – Fire 684-4311; Police 905-688-4111. Welland – Fire 734-4511; Police 905-735-7811. Port Colborne – Fire 834-4511. All emergencies 911.
SHORE LEAVE: Only when usual formalities are observed, e.g. Customs, Immigration, etc.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Available in the Welland Canal.
WASTE OIL DISPOSAL: Mobile reception facilities available in the Welland Canal.
SEAMAN'S CLUBS: None.
GENERAL: *Publications:* Sailing Directions: Great Lakes, Volume I. Seaway Handbook.
AUTHORITY: St. Lawrence Seaway Authority, Niagara Region, P.O. Box 370, 508 Glendale Avenue, St. Catharines, Ontario L2R 6V8, Canada. *Tel:* (905) 641-1932, (nights (905) 641-1939). *FAX:* (905) 461-4632. *Contact:* Captain A. Soni, Coordinator – Vessel Traffic Services.

SAINT JOHN, N.B.: 45.16 N. 66.03 W. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived vessel" when it enters harbour limits.

Seaward limits of the Port are as follows:
From Cape Spencer Lighthouse (Lat. 45° 11′ 42″ N., Long. 65° 54′ 37″ W.) due South to position Lat. 45° 08′ 03″ N. thence due West to intersect with the HW mark on the mainland near the Easterly entrance to Little Musquash Cove (Lat. 66° 17′ 12″ W.).
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
3 copies Customs Documents.
3 copies Health Documents.
6 copies Cargo Manifests.
6 copies Bills on Lading.
3 copies Ship's Papers.
PILOTAGE: Compulsory. Pilot boarding station in vicinity of position: Lat. 45° 10′ 48″ N., Long. 66° 03′ 42″ W. Vessels order Pilots through the Coastguard VTS Centre "Fundy Traffic", by giving 12 hours notice of ETA in GMT to "Pilots Fundy Traffic", amending or confirming ETA 4 hours before arrival. Pilot may also be ordered through Agent.

Vessels must report to the Coast Guard Vessel Traffic Management System prior to entering the Bay of Fundy. VHF Channels 14 and 12 are monitored. Vessels must follow instructions from VTS regarding traffic control.
ANCHORAGE: See chart. Also see "Plan".
RESTRICTIONS: Saint John is a tidal harbour experiencing 2 high and 2 low tides every 24 hours; most vessels being handled between 2-3 hours before to 2-3 hours after HW depending on berth.

During the Spring each year, due to thaw conditions, a strong downflow (freshet) is experienced in the main harbour from the Saint John River. Vessels entering or departing from Courtenay Bay may be restricted to 28 ft. maximum draft and daylight movements only depending on conditions at the time. Freshet conditions normally occur between March and June and their duration depends on seasonal conditions.
MAX. SIZE: Controlling depth in main channel is 30 ft. at LW. Vessels length and breadth unlimited. Also see "Tankers".
HEALTH: See "Montreal".
RADIO: VCS Halifax or VAU Yarmouth.
TUGS: Available and considered necessary for docking and undocking large ships unless such vessels are equipped with thrusters. Modern fleet available up to 4,500 h.p.
BERTHING: 27 berths. Dredging done each year to maintain depth. Due to rise and fall of tide, boatmen usually necessary for running lines and docking. All berths are tidal. Tidal range varies from 22 ft. – 28 ft. (HW) and from 0 ft. – 7 ft. (LW).
Saint John Port Corporation Facilities:

Berth	Wharf Length (m.)	Depth Low Tide (m.)	Remarks
Navy Is. 1a-1b	377	10.4	2 sheds – forest products – 2 Ro/Ro facilities. 1 for stern ramps – 1 for starboard quarter ramps
2a – 2b	312	10.6	Forest products and general cargo (1 Ro/Ro ramp for stern ramps). Piers 2 and 3 are served by Shed 1C (10,000 sq.m.).
3a – 3b	312	10.6	Pier accommodates starboard quarter ramps.
Rodney A	295	12.2	Container Terminal – 2 cranes. Floating ramp for stern ramp vessels.
Rodney B, C & D	606	12.2	
11	134	9.1	
12a – 12b	265	9.1	
Long Wharf A	189	9.1

Pugsley North	92	10.7	Lay-by berth
Pugsley A/B	297	10.7	511 sq.m.
Pugsley C	232	10.7	Heated shed
Lower Cove	245	11.0	Open terminal – Ro/Ro facility (starboard quarter ramp vessels). Manifold for petroleum products.
Barrack Point	245	11.0	Bulk facility – potash

Berth	Wharf Length (m.)	Depth Low Tide (m.)	Remarks
Private Facilities:			
Lantic Sugar	134	9.1	Refinery – bulk sugar unloading – 2 cranes
Canadian Coastguard Base	407	7.9	East side of harbour
Irving Oil Terminals	506	12.2	3 berths Courtenay Bay – oil tankers.
Marine Atlantic	253	6.7	Terminal – Ro/Ro ferry for vehicles/passengers

CRANES: Mobile cranes available.

J. D. Irving, Limited, (Equipment Division), have available for rental mobile cranes with hydraulic boom from 8 tons to 75 tons, with conventional boom for 17.5 tons to 140 tons and crawler cranes with conventional boom from 25 tons to 300 tons.

The above (and other equipment) available on prior request only.

SPECIAL CARGO FACILITIES: *Navy Island Forest Products Terminal:* Operated by Forterm (Forest Products Terminal Corp., Ltd.).

The terminal occupies areas adjacent to and includes Piers 1, 2 and 3 with 38,000 sq.m. of shed storage. Shed 1A/1B at Pier 1 provides a 24 m. wide apron. Newly constructed Shed C serves the open Piers 2 and 3. The terminal can accommodate 3×40,000 d.w.t. vessels at one time, and is served by road and rail. Ro-Ro stern ramp facilities at Berths No. 1A and 2A. Starboard quarter ramp vessels handled at Berths No. 1B and 3A.

Rodney Container Terminal: Operated by Brunswich Terminals Inc. (BTI). Container terminal located at Rodney Terminal with 2×45 tonne gantry cranes, with supporting ground equipment. Crane outreach of 115 ft. and a back reach of 60 ft.

The cranes are designed with articulating rail trucks on each of their 4 legs, enabling them to operate on both berths at the 50 acre, L-shaped facility. BTI has a 2,000 ft. marginal berth and 1,200 ft. slip berth. Water depth (minimum) is 40 ft.

BTI provides a full range of terminal services and facilities for both electrical and cryogenic refrigerated containers. Floating ramp available for stern ramp vessels.

Barrack Point Potash Terminal: Two sheds, one of 75,000 tonnes capacity belonging to the Potash Company of Saskatchewan, a second of 115,000 tonnes belonging to Potacan, share loading facilities at a Courtenay Bay berth owned by the Saint John Port Corporation. A conveyor system moves potash to loading dock which is served by a single quadrantal-loader, with loading capacity of 2,700 tonnes per hour. Throughput at the Barrack Pt. Terminal is in excess of one million tonnes annually.

STEVEDORES: Stevedores required in morning must be ordered by 1600 hrs. preceding day, and stevedores required in afternoon must be ordered by 1100 hrs. same day.

MEDICAL: Doctors and Hospitals available.

TANKERS: Controlling depth in channel to tanker wharves at Courtenay Bay is 18 ft. LW. Also see "Restrictions" and Canaport.

FRESH WATER: Available from pipelines throughout the docks.

FUEL: Fuel oil and diesel oil – ample stocks of fuel oil and diesel oil are always available. Diesel and bunker fuel can be delivered by pipeline in Courtenay Bay (vessels restricted to navigation at HW). Irving Oil operates a bunkering barge service and also delivers to ships by pipeline or by truck or tankwagon. Gulf, Crystal Oil Ltd. and Texaco Canada Ltd. also supply vessels by truck.

CONSULS:

Belgian Consulate – Honorary Consul, Joz De Bedie, 6126 Regina Terrace, Halifax, N.S. Tel: (902) 425-6546.

Danish Consulate – Eric L. Teed, Q.C., Seawood Lane, West. Tel: 672-6856.

Dominican Republic – Honorary Vice-Consul, John A. Driscoll, 50 Broad Street. Tel: 693-1403.

Finland – Thomas L. McGloan Jr., Q.C., Harbour Building. Tel: 634-7450.

France – Honorary Consular Agent of France, Charles F. Whelly, Q.C., 1 Brunswick Square. Tel: 632-8900.

Italy – Honorary Consular Agent, Guy Gaetano De Giacinto, 634 Queen Street, Fredericton, N.B. Tel: 454-2271.

Netherlands – Honorary Consul, Charles F. Whelly, Q.C., 1 Brunswick Square. Tel: 632-8900.

Norway – Honorary Consul, Donald F. MacGowan, 40 Wellington Row. Tel: 633-3800.

Sweden – Consul, G. A. McGillivray, Hilyard Place, Building A. Tel: 632-1090. Residence 633-1046.

REPAIRS: Complete repair facilities and equipment available also salvage equipment.

DRY DOCKS: Two. One 1,780 ft.×125 ft.×53 ft. deep with 42 ft. of water over sills at high tide. Smaller one 440 ft.×60 ft.×34 ft. deep, 22 ft. water over sills at high tide.

SURVEYORS:

Lloyd's Sub Agent – Hope Marine Surveys Ltd. Tel: 632-1987.

N.K.K., Tel: 672-1083.

China Corporation Register of Shipping. Telex: 014-47512. Tel: 672-1083.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 50 cigars or 2 lb. tobacco per person over 16 years old.

Wines/Spirits: total of 40 ounces per person over 21 years old.

Subsequent issues may be authorised to Crew members of foreign vessels, but the max. quantity any Crew member may hold at any time must not exceed 300 cigarettes, 75 cigars, 3 lb. tobacco, and 60 ounces wines/spirits.

REPATRIATION: Can be arranged.

AIRPORT: Regular services by major airlines from airport 12 miles from harbour.

TIME: GMT minus 4 hours. In Summer, time is GMT minus 3 hours.

HOLIDAYS: Sundays, New Year's Day, Good Friday, Victoria Day, Dominion Day, New Brunswick Day (1st Monday in August), Labour Day, Thanksgiving Day, Remembrance Day, Christmas Day and Boxing Day, of which Labour Day and Christmas Day are "No Work Days" for longshoremen.

POLICE/AMBULANCE/FIRE: Available as follows:

(a) Through "Fundy Traffic" VTS (VHF Channel 12).

(b) On regular phones – Dial 911.

TELEPHONES: Telephones can be placed on board vessels at most facilities. Must be ordered ahead through Agent.

SERVICES: All services available including compass adjustment.

BANKS:

Bank of Canada, 75 Prince William St. Tel: 635-3600.
